## The Joint Doctoral Program

---

The interdisciplinary partnership of the  
Department of Psychiatry at the UCSD School of

Medicine and the Department of Psychology at  
San Diego State University greatly extends the  
range of perspectives and furnishes unusual  
opportunities for graduate study leading to the  
Ph.D. degree in clinical psychology. The Joint  
Doctoral Group in Clinical Psychology currently  
consists of faculty from the UCSD Department of  
Psychiatry, School of Medicine, and the Depart-  
ments of Neurosciences, Cognitive Science,  
Family and Preventive Medicine, and Psychology,  
and the SDSU Department of Psychology and  
School of Public Health.

Information regarding admission is found in  
the current edition of the Bulletin of the  
Graduate Division of San Diego State University.

The program goal is to train clinical psycholo-  
gists who are accomplished both as clinicians  
and as research scientists. The curricula and  
training provide a strong foundation in clinical  
psychological concepts, methods, theories, and  
data, together with intensive concentrations in  
specialized areas of clinical psychology. Currently  
our program has three areas of specialization:  
behavioral medicine, neuropsychology, and  
experimental psychopathology.

The scientist-practitioner model on which this  
program is based requires that students receive  
ongoing supervised research experience, includ-  
ing planning, design, implementation, analysis,  
and communication of findings. Equally impor-  
tant is extensive supervised experience aimed at  
developing sound general and specialized clini-  
cal skills. Students are expected to be actively  
involved in all these activities throughout their  
tenure in the program.

The program is designed as a five-year cur-  
riculum, including a one-year clinical internship.  
The curriculum is based on a twelve-month aca-  
demic year. The program is accredited by the  
American Psychological Association.

Specific courses currently required as part of  
the core at UCSD include: Clinical Psychology  
294A,B,C, (required for neuropsychology track  
majors only); Clinical Psychology 296 (independ-  
ent study, lab practicum); Clinical Psychology 299  
(independent study project); School of Medicine  
202E (Psychopathology).

## Ph.D. Time Limit Policies

Students must be advanced to candidacy by  
the end of five years. Total University support  
cannot exceed six years. Total registered time at  
UCSD cannot exceed seven years.

## COURSES

### **Clinical Psychology 205. Neuroanatomy (6)**

Fundamental anatomy/physiology of human nervous system, emphasizing higher cortical functions. Methods of clinical problem solving in neurology; background in basic neuropsychological skills.

### **Clinical Psychology 294. Pro-Seminar in Neuropsychology (3)**

Year-long course (294A,B,C), each for three credits, offered sequentially fall, winter, spring. Provides a fundamental knowledge of brain-behavior relationships as well as strategies and methods of neuropsychological assessment and rehabilitation.

### **School of Medicine 202E. Social and Behavioral Sciences-Psychopathology (3)**

This sequence will acquaint students with techniques of interviewing, concepts of mental illness and normality, basic research in causality of behavioral disorders, and approaches to treatment, all in the context of a bio-psycho-social frame of reference. Format combines a lecture followed by smaller group sessions with a faculty leader. The groups enable students to meet patients with behavioral disorders, to practice interviewing, to develop observational skills, and to discuss material presented in lectures and assigned readings. (S/U grades only.) *Prerequisite: SOM 202A, C, D or consent of instructor.*

### **Clinical Psychology 296. Independent Study (1-12)**

Independent survey of basic concepts in clinical psychology using various sources of material, including scientific papers in clinical psychology and behavioral science and other sources as seem indicated.

### **Clinical Psychology 299. Graduate Research (1-12)**

Individual study course under one or more of the joint doctoral program faculty to develop certain research questions, design a methodology to answer the questions, and then carry out actual research, data reduction, and analysis.
