Language and Communicative Disorders

OFFICE: Cognitive Science Building, Room 266
Mail code: 0526
(619) 594-6775
http://chhs.sdsu.edu/SLHS/phdmain.php

Professors
Farrell Ackerman, Ph.D., Linguistics
Ursula Bellugi, Ed.D., Adjunct/Neurology
Jeff Elman, Ph.D., Cognitive Science
Mark Kritchevsky, M.D., Clinical Neurosciences
Marta Kutas, Ph.D., Cognitive Science
Karen Emmorey, Ph.D., Cognitive Science
Carol Padden, Ph.D., Communication
David Swinney, Ph.D., Psychology
Doris Trauner, M.D., Neurosciences/Pediatrics

Associate Professors
Karen Emmorey, Ph.D., Adjunct/Neurology
Victor Ferreira, Ph.D., Psychology
John Moore, Ph.D., Linguistics

Assistant Professors
Leslie Carver, Ph.D., Psychology
Gedeon Deak, Ph.D., Cognitive Science

Research Scientist
Nina Dronkers, Ph.D. (Adjunct/Neurology UC Davis)

The Joint Doctoral Program

San Diego State University (SDSU) and the University of California, San Diego (UCSD), offer jointly a doctoral program in Language and Communicative Disorders. The program’s focus is the interdisciplinary study of language and communicative disorders. A major emphasis of the program is to apply techniques developed in cognitive science and neuroscience to the study of language and language disorders. The program involves study and research in normal language (including sign languages of the deaf and language impairments), and in the neural bases of language use and language loss. Participating faculty have research interests in a wide range of issues in processes of language development, language and aging, multilingualism, language disorders, assessment, and intervention. Graduates of the program will be qualified to serve as faculty in university programs in a variety of disciplines, and to provide leadership in research and health services. The doctoral program faculty at UCSD are members of the Departments of Cognitive Science, Communication, Linguistics, Neurosciences, and Psychology. The doctoral program faculty at SDSU are members of the Departments of Communicative Disorders, Linguistics, and Psychology. The program is coordinated by the doctoral program coordinators at each campus, in conjunction with an Executive Committee comprising three faculty from each campus appointed by the Graduate Deans from each campus.

The program is innovative in that many of the requirements are designed to function as a model of professional preparation specifically incorporating activities in which a successful teacher and researcher must engage after obtaining the Ph.D. Students will be required to participate in interdisciplinary research throughout the program, learn about the nature and ethics of research, prepare grant proposals, write manuscripts, and will gain experience in oral presentations and teaching. Graduates from the program will be well prepared for the rigors of an academic/research career. The doctoral program in Language and Communicative Disorders, being interdisciplinary, draws from a variety of undergraduate disciplines including communicative disorders, psychology, cognitive science, linguistics, engineering, and other related sciences. Students should have adequate preparation in mathematics, statistics, and biological sciences. Background in neurosciences and/or language sciences, or language disorders is helpful, but not required for admission.

By the end of the first year, all students will select a major field of emphasis by choosing one of three concentrations. The Adult Language concentration is intended to provide intensive education in communicative disorders in adults. Students in this concentration will also develop expertise in the study of language processing in normal adults. The Child Language concentration is intended to provide specialized education in childhood (birth to adolescence) communicative disorders. Students in this concentration will also achieve competence in developmental psycholinguistics emphasizing language acquisition in normally developing children. The Multilingualism concentration is intended to provide education in cross-linguistic, ethnographic, and other comparative studies of communicative disorders in children and/or adults, including those associated with bilingualism and second-language acquisition (including acquisition of sign language in deaf individuals). All students will be required to take some courses in each of the three concentrations. In addition, each student will elect a methods minor, applying one of the new technologies of cognitive neuroscience to research on language and communicative disorders. These may include computer-controlled studies of language processing in real-time functional brain imaging (including event-related brain potentials and/or functional magnetic resonance imaging), or neural network simulations of communicative disorders.

The program is designed as a five-year curriculum, based on a twelve-month academic year. Students will be admitted to the doctoral program only in the fall semester/quarter. Information regarding admission is found in the current edition of the Bulletin of the Graduate Division of San Diego State University. To receive an application for admission, contact: SDSU/UCSD Joint Doctoral Program in Language and Communicative Disorders, San Diego State University, 5500 Campanile Drive, San Diego, California 92182-1518, (619) 594-6775.

Required courses include the Tools requirement (two courses in statistics/research design, a course in neuroanatomy and physiology, a course in language structure and theory and a professional survival skills course), the Foundations requirement (three courses on normal language and three courses on disorders of language) and the Electives requirement (at least five courses, with a minimum of three courses related to the chosen concentration, chosen from a broad list of approved options from Anthropology, Cognitive Science, Communicative Disorders, Computer Science, Linguistics, Neurosciences, and Psychology). Consult with adviser for approved list of elective courses. The five required electives must be approved by the student’s adviser and the Doctoral Program Coordinators. In addition to their course requirements, students are required to complete three laboratory rotations in different research methodologies (each lasting a minimum of one quarter), two research projects (first year and second year), a qualifying examination for advancement to candidacy, and a dissertation proposal in the form of grant proposal.
to one of the public agencies that funds research in communicative disorders.

**Ph.D. Time Limit Policies**

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

---

### COURSES

(See individual departments for details; for courses available at SDSU, see SDSU Graduate Catalogue.)

**Tools Requirement:**

Quantitative Methods
- Psychology 201A-B-C

Ethics and Survival Skills in Academia
- Cognitive Science 241

Neuroanatomy and Neurophysiology
- Cognitive Science 201 or Basic Neurology
- SOMC 205

Language: Theories and Methods in the Study of Cognitive Phenomena
- Cognitive Science 203 or Introduction to Grammatical Theory (Linguistics 221A) and Introductory Phonology (Linguistics 211A)

**Foundations Requirement:**

Special Topics in Psycholinguistics
- Psychology 244

Aphasia
- Cognitive Science 251 or Psychology 245

Language Acquisition
- Psychology 215 or Cognitive Science 256

**Electives:**

Cognitive Science
- 211A-B-C: Research Methods in Cognitive Science
- 213: Issues in Cognitive Development
- 260: Seminar on Special Topics
- 272: Topics in Theoretical Neurobiology
- 273: Biological Basis of Attention

Communication
- 200A: Communication as Social Force
- 200B: Communication and Culture
- 200C: Communication and the Individual
- 201B: Ethnographic Methods for Communication Research
- 201C: Discourse Analysis
- 222: Childhood and Culture

Linguistics
- 211A: Introductory Phonology
- 221A: Introduction to Grammatical Theory
- 225: Topics in Syntax

249: Topics in Sign Languages of the Deaf
270: Psycholinguistics
272: Topics in Neurolinguistics
278: Research in Second Language Acquisition

**Psychology**

218A-B: Cognitive Psychology
222: Biological Psychology
227: Cognitive Development
236: Substance Abuse
242A-B-C: Research Topics in Developmental Psychology
244: Special Topics in Psycholinguistics
252: Seminar on Cognitive Neuroscience
254: Functional Brain Imaging
264A-B-C: Advanced Topics in Language Processes

**Computer Science and Engineering**

250A-B: Artificial Intelligence
253: Neural Networks
256: Statistical Natural Language Processing
258A: Connectionist Natural Language Processing

**Neurosciences:**

243: Physiological Basis of Human Information
263: Developmental Neurobiology
264: Behavioral Neuroscience

**Philosophy:**

234: Philosophy of Language

*Students who use this course to fulfill the Tools requirement may not use this as an elective.*
