Fall Quarter, 2009

- Fall quarter begins: Monday, September 21
- Instruction begins: Thursday, September 24
- Veterans Day: Wednesday, November 11
- Thanksgiving holiday: Thursday–Friday, November 26–27
- Instruction ends: Friday, December 4
- Final exams: Monday–Saturday, December 7–12
- Fall quarter ends: Saturday, December 12
- Christmas holidays: Thursday–Saturday, December 24–25
- New Year holidays: Thursday–Friday, December 31–January 1

49 Days of Instruction • 60 Days in Quarter

Winter Quarter, 2010

- Winter quarter begins: Friday, January 1
- Instruction begins: Monday, January 4
- Martin Luther King, Jr. holiday: Monday, January 18
- Presidents’ Day holiday: Monday, February 15
- Instruction ends: Friday, March 12
- Final exams: Monday–Saturday, March 15–20
- Winter quarter ends: Saturday, March 20

48 Days of Instruction • 56 Days in Quarter

Spring Quarter, 2010

- Spring quarter begins: Thursday, March 25
- Cesar Chavez holiday: Friday, March 26
- Instruction begins: Monday, March 29
- Memorial Day holiday observance: Monday, May 31
- Instruction ends: Friday, June 4
- Final exams: Monday–Friday, June 7–11
- Spring quarter ends: Friday, June 11
- Commencement: Saturday–Monday, June 12–14

49 Days of Instruction • 57 Days in Quarter

- Independence Day holiday: Monday, July 5, 2010
- Labor Day holiday: Monday, September 6, 2010

Introduction

History

UC San Diego is one of the ten campuses which make up the University of California system. The other campuses are located in Berkeley, Davis, San Francisco, Santa Cruz, Santa Barbara, Riverside, Los Angeles, Irvine, and Merced. Each has its own distinct academic and social character, and each offers programs and facilities which set it off from the others.

As a member of the ten-campus family of the University of California, UCSD is a university in scale and scope. Graduate and undergraduate programs, offered in a wide range of disciplines, lead to the bachelor's, master's, M.B.A., Ed.D., M.D., Ph.D., and Pharm.D. degrees. UCSD's Scripps Institution of Oceanography is internationally renowned, and UCSD's School of Medicine has won national acclaim for excellence. UCSD's Graduate School of International Relations and Pacific Studies is the only school of international affairs in the UC system. The UCSD Skaggs School of Pharmacy and Pharmaceutical Sciences enrolled its charter class in 2002, and the Rady School of Management enrolled Executive MBA students in 2004 and full-time students in 2005. At both the undergraduate and graduate levels, UCSD's curricula and programs have been highly ranked in recent surveys of American higher education.

UCSD enrolled its first undergraduates in 1964. Nevertheless, the campus can trace its origins in this area as far back as the late 1800s. At that time, zoologists on the Berkeley campus, seeking a suitable location for a marine field station, found La Jolla a very desirable site. The facility they established became a part of the University of California in 1912 and was eventually named the Scripps Institution of Oceanography. In the late 1950s, when the Regents of the University of California decided to situate a general campus in the San Diego region, the Scripps Institution formed the nucleus of the new campus.

Today UCSD is recognized throughout the academic world for its faculty and for its graduate and undergraduate programs. The faculty now includes eight Nobel laureates (four of whom hold joint appointments with the nearby Salk Institute); three recipients of the National Medal of Science; one winner of the Pulitzer Prize; sixty-three members of the National Academy of Sciences; eighty-two Fellows of the American Academy of Arts and Sciences; fourteen Fellows of the American Philosophical Society; eight fellows of the Econometric Society; fourteen members of the National Academy of Engineering; five members of the International Academy of Astronautics; twenty-five members of the Institute of Medicine; and three members of the National Academy of Education.

UCSD houses a chapter of Phi Beta Kappa, the best-known honor society for the liberal arts and sciences in America. The campus is one of 265 four-year institutions selected for this distinction since the society was founded in 1776, and more than 200 current faculty and staff are members.

UCSD is a member of the Western Association of Schools and Colleges (WASC) and is fully accredited by the Senior College Commission of WASC. WASC is located at 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, and may be reached at (510) 748-9001 or by fax at (510) 748-9797.

University and Community

There are certain facts about UCSD to consider in making your choice. Among them are:

- UCSD, a four-year undergraduate campus, is also a full-fledged graduate and research institution. UCSD faculty and scholars are continually involved in research and developmental projects that put this campus on the cutting edge of science, technology, and the arts and humanities.

- San Diego has become one of America’s major centers for high-technology electronics and biomedical industries. Students concentrating on sciences or engineering are actively sought by these industries to fill summer jobs and career positions. Off-campus internships also are available to UCSD students in all fields of study.

- UCSD is recognized nationally as a major center for the arts and humanities, including music and theater.

- Undergraduates are offered opportunities to participate in certain research projects conducted by UCSD faculty. A number of UCSD undergraduates have developed computer skills that have led to their employment by leading computer manufacturers, and still others have gone on to form their own software enterprises as a direct result of their UCSD training.

- UCSD’s unique small-college structure encourages undergraduates to play a more active role in student government, social life, and athletics than is generally open to them in other major universities. Opportunities for involvement in student governance are especially strong as there are student governing bodies at the campus level as well as within the six individual colleges.

- Campus athletic facilities include the Recreational and Intramural Athletic Center (RIMAC), two gymnasiums, two swimming pools, and numerous tennis and handball courts. The university’s recreational and intramural athletic programs are among the most varied and extensive in the nation today.

Major Fields of Study

UCSD offers a wide variety of nationally recognized majors in a broad array of fields, see Departmental Undergraduate Majors. (For a listing of graduate programs, refer to the section of this catalog titled “Graduate Studies.”)

For academic departments of UCSD see Undergraduate Departments. Details and requirements of the various individual courses are found in the “Courses, Curricula, and Programs of Instruction” section.

UCSD has limited the number of its academic departments. For example, there is only one Department of Literature. This system has proved especially valuable to undergraduates who choose to avoid overspecialization early in their studies.

A number of special, individually oriented programs use the combined resources of two or more departments. Among these are Chinese Studies, Classical Studies, Computing and the Arts, Critical Gender Studies, Environmental Systems, Human Development, German Studies, International Studies, Italian Studies, Japanese Studies, Judaic Studies, Latin American Studies, Study of Religion, Russian and Soviet Studies, the Education Studies Program, Third World Studies, and Urban Studies and Planning.

Engineering students may choose from a number of majors in the Department of Bioengineering (BE), the Department of Computer Science and Engineering (CSE), the Department of Electrical and Computer Engineering (ECE), the Department of Mechanical and Aerospace Engineering (MAE), the Department of NanoEngineering, or the Department of Structural Engineering (SE). All six departments seek to educate the engineer of tomorrow.
Undergraduates interested in premedicine and prelaw majors should note that a variety of departments can serve their needs. For premed students, the common choices are biology, chemistry, psychology, and bioengineering. Some students are electing double majors or are combining nontraditional majors with science majors. For prelaw students, nearly any undergraduate major will qualify a student for admission to a law school.

Should you need help in deciding on a major, many UCSD professionals are available to aid you. Among them are the deans of academic advising in the provosts’ offices of the six colleges, faculty members, and departmental advisors. Additional specialists in Career Services Center and in Psychological and Counseling Services are available to help you appraise your personal aptitudes.

Summer Session

UCSD offers Summer Session, consisting of courses selected from the regular undergraduate curriculum and taught by UCSD faculty. UCSD is in transition toward state-supported year-round instruction.

The Summer Session Program offers open enrollment to UCSD students, students of other colleges and universities, qualified high school juniors and seniors, and the general public.

Summer Session courses are shorter and more intensive. Students may be able to progress more rapidly toward their degree, make up course deficiencies, or explore new areas of study.

Summer Session enrollment and registration policy and procedures are available at http://summersession.ucsd.edu. UC students pay a per-unit fee equivalent to the fee paid for fall, winter, or spring. Contact summer@ucsd.edu or call 858.534.5258.

What UCSD Does NOT Offer

Although the range and variety of programs offered at UCSD are very wide, there are certain disciplines which are not available on this campus. In some instances, the absence of a particular program reflects the academic philosophy of the UCSD campus and its faculty. In others, the absence of a curriculum is temporary, awaiting the availability of funds, personnel, or facilities before a program can be offered. In still others, programs have not been included which would, in the university’s judgment, unnecessarily duplicate comparable offerings on other UC campuses or at other institutions.

Among undergraduate majors currently not available at UCSD are:

1. Business.

2. Oceanography. UCSD offers strong training in oceanography through the undergraduate minor in marine science offered through the Scripps Institution of Oceanography. The marine science minor is designed to complement the strong disciplinary training of UCSD basic science majors (i.e., chemistry, physics, biology, earth science) and, as such, provides students a strong foundation for careers or graduate work in oceanography.

3. Nursing.

4. Industrial Arts.

5. Journalism. Although no major in journalism is offered, the Department of Literature offers a major in writing that can emphasize journalistic writing, and the development of writing skills is stressed in many disciplines. Many courses offered in the humanities and social sciences will provide the kind of broad-based preparation needed by practicing journalists. Several student newspapers are published on campus, providing ample "laboratory" opportunities for students to practice journalism.

6. Geography.

7. Physical Education. Note: There is no intercollegiate football team at UCSD.

The Colleges of UCSD

UCSD undergraduates enjoy the benefits of a great university without the disadvantages of bigness found in many of today’s mega-universities. The master plan conceived by UCSD's planners borrowed from the Oxford and Cambridge concept to provide a family of colleges, each with its own special academic and social flavor. UCSD's students gain a sense of belonging through affiliation with one of the campus’s semiautonomous colleges.

There are six colleges: Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt, and Sixth College. Each is independent, yet all are interrelated: all university academic and support facilities are available to all students, regardless of their college affiliation.

Each college has its own educational philosophies and traditions, its own set of general-education requirements, and its own administrative and advising staff. The objective is to give students and faculty the advantages of a small, liberal arts college combined with the best features of a major university.

Students applying to UCSD should select a college in order of their preference.

Details regarding the individual colleges are given in the “Choosing a College at UCSD” section of the catalog.

Recreation at UCSD

UCSD’s undergraduate colleges are situated on a parklike site at La Jolla. La Jolla has some of the finest beaches and coves, art galleries, and other attractions in the nation.

Much of UCSD’s recreational and social life centers on the waterfront, with surfing, SCUBA diving, and beach activities among the favorite diversions of UCSD students. Throughout the area, students find a variety of amusements, ranging from the small-town atmosphere of waterfront Del Mar to the primitive wilderness of Mexico’s Baja California peninsula.

The city of San Diego, some twelve miles south of the campus, offers a wide range of recreational opportunities, including Old Town (California’s birthplace), Sea World on Mission Bay, and the world-famous San Diego Zoo and Wild Animal Park. A year-round calendar of major league sporting events is offered in the city’s Sports Arena, PETCO Park, and in San Diego Qualcomm Stadium.

There are numerous theaters in San Diego. A year-round program of contemporary and classical professional theater may be enjoyed in the Old Globe and the adjacent Cassius Carter Centre Stage, and special summer theater fare is featured on the park’s outdoor Festival Stage.

On-campus entertainment includes a year-round series of movies and cultural programs, dances, chamber music, and rock-band concerts sponsored by the University Events Office. The Department of Theatre and Dance presents plays in both the 500-seat Mandell Weiss Theatre and the 500-seat Forum Theatre. The Department of Visual Arts offers a continuing series of art shows in the Mandeville Art Gallery and displays of student art in other campus galleries.

Informal meeting places on campus are hubs of student activity throughout the day and evening, among them the Muir Rathskeller, Marshall College Mountain View Lounge, and the Price Center.

Mountains, Deserts, and Beaches

Many Southern Californians enjoy the out-of-doors. The San Diego metropolitan area enjoys the most comfortable year-round climate in the United States.

Fishing opportunities are plentiful offshore in kelp beds west of La Jolla and surrounding the Coronado Islands in Mexican waters. Fresh water fishing is available in nearby lakes. An hour’s drive to the east, the Laguna Mountains provide pleasure during all seasons for campers and hikers. Beyond the Lagunas lies the vast Anza-Borrego Desert with its breathtaking display of wildflowers every spring.

The peninsula of Baja California, one of the world’s last great wilderness areas, stretches
for 900 miles southward from the international gateway at Tijuana. It is the site every year of the grueling Baja cross-country auto race.

Sports at UCSD

Through its intercollegiate athletic and intramural programs, UCSD provides its students with one of the more extensive and competitive sports programs in the United States. UCSD fields a wide variety intercollegiate athletic teams along with several club sports teams, while the intramural program provides for student competition in a wide variety of sports in three categories of play: men, women, and coed.

Need More Information? Check the Following:

How do I apply for admission? See page 32.
Undergraduate Admissions, Policies & Procedures.
(See also “Note,” below.)
• What’s the grading system at UCSD? See “Grading Policy” under “Academic Regulations,” page 60.
• How should I decide which college to choose at UCSD? See “Choosing a College at UC San Diego,” page 12.
• What services and facilities are available to students at UCSD? See “Campus Services and Facilities,” page 84.
• Where do I write for more information? See “Correspondence Directory,” page 1.

NOTE: An admissions packet for students interested in applying to UCSD can be obtained from any California high school or community college counselor’s office, by writing to the Office of Admissions on any University of California campus, or online at http://www.ucop.edu/pathways/appctr.html.

Footnote 1: The teaching credential in California requires an academic major, plus professional preparation courses in education, an approved program of practice teaching or an internship, and a full year of college work beyond the baccalaureate. The Education Studies Program leads to a single subject (secondary) or multiple-subjects (elementary) credential.

Footnote 2: Law schools do not require any particular major, but they do require evidence of good scholarship in demanding subjects. Almost any undergraduate major can qualify a student for consideration by a law school. The UCSD career services staff includes professional prelaw advisors.

Footnote 3: Like law schools, medical schools do not generally demand a particular major but ask for a solid background in the sciences upon which medicine is built. Most premed students major in biology, chemistry, physics, or bioengineering, but a substantial number major in the humanities and social sciences. The UCSD career services staff includes professional premedical advisors.
Choosing a College at UC San Diego

One of the features that sets UC San Diego apart from most major universities in the United States is its family of undergraduate colleges: Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt, and Sixth.

The division of the campus community into small colleges was patterned after the concept which has served Oxford and Cambridge so successfully for centuries. The planners of the UC San Diego campus were convinced that students learn more, and find greater fulfillment in their personal lives, when joined academically and socially with a relatively small group of students. At the same time, the advantages of size in a university, including a faculty of international renown, first-rate teaching and research facilities, laboratories, libraries, and other amenities, were to be an important part of the design.

The result was an arrangement which combined the academic advantages of a large research university with the finest features of a small liberal arts college—the UC San Diego college system. Each of these semi-autonomous undergraduate colleges has its own residence facilities, staff, traditions, general-education requirements, and distinctive educational philosophy. The system was inaugurated with the opening of Revelle College in 1964. In the intervening years, five more colleges—John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt, and Sixth—have been established. Although many American university campuses have a separate college structure, in most cases, these colleges are designed to serve specific disciplines, such as engineering or business administration. At UC San Diego, however, any undergraduate may select from the full range of majors available. The choice of a college is not based on your major, but on your preferences in terms of the various educational philosophies and environments offered by the colleges.

UC San Diego’s college system allows undergraduates to choose from among six distinct general-education curricula supplementing their major requirements. These curricula range from a very structured liberal arts program to a program with a broad range of electives. By contrast, most universities offer only one general-education curriculum.

Students must rank the colleges in order of preference when applying for admission. Brief summaries of the various college curricula and philosophies follow. Later in this section, these variations are spelled out in considerable detail, college by college.

Revelle College Programmatic Theme

Revelle College stresses the broad character of general education. A structured liberal arts curriculum establishes a strong educational foundation for any major. All students complete a highly respected core humanities sequence and courses in the arts and social sciences. Students either meet proficiency in a foreign language or complete the fourth quarter of college-level instruction. All students also complete sequences in calculus and science, with separate courses available for science and non-science majors. Throughout the final two years, students concentrate on developing professional competence in an academic discipline.

Revelle College is distinguished by its emphasis on specific general-education requirements and high academic standards. A high percentage of Revelle College students enroll in graduate or professional schools (law, medicine, management, etc.), graduate with double majors, design individualized interdisciplinary majors, work on a research project, and graduate with university honors.

John Muir College Programmatic Theme

John Muir College has established a set of general-education and graduation requirements that ensure breadth and depth of learning and encourage the students of the college to take an active role in their own intellectual development. Students complete four year-long sequences drawn from the social sciences; the natural sciences or mathematics; and two sequences out of the following three areas: the humanities, fine arts, or foreign languages. Many choices are available for each of these year-long sequences. Students complete two analytical writing courses in addition to the four year-long sequences. Muir has a one-course U.S. cultural diversity graduation requirement in addition to a minimum number of 18 upper-division four-unit courses (72 upper-division units) among the 180 units required to graduate.

Muir’s general-education and graduation requirements accommodate a wide range of interests and aptitudes. Muir’s academic advisors meet with students on a one-to-one basis to help students make informed decisions. The general structure and options of the general-education requirements make Muir College particularly attractive to exceptionally able and well-prepared students with well-defined or developing academic interests.

John Muir is distinguished by its atmosphere of friendliness, informality, and deep concern for the rights and welfare of others. Concern for one’s fellow students goes well with Muir’s educational philosophy, which stresses individual choice and development. The environment thus created fosters responsibility for informed academic decisions, consequences of academic choices, and, ultimately, well-rounded students.

Thurgood Marshall College Programmatic Theme

The dedicated focus of Thurgood Marshall College is the active development of the student as scholar and citizen. The college, a small liberal arts and sciences community, is characterized by an open, friendly environment in which students pursue any major in the natural and physical sciences, social sciences, engineering, humanities, and fine arts offered at the university.

The college’s educational philosophy is guided by the belief that, regardless of a student’s major, a broad liberal arts education must include an awareness and understanding of the diversity of cultures that comprise contemporary American society, and the richness that socio-cultural diversity brings to the lives of American people. Integral to the Marshall experience is the unique, three-quarter core sequence, “Dimensions of Culture—Diversity, Justice, and Imagination.” This interdisciplinary, issues-oriented curricular experience explores both the diversity of American experiences across race, religion, class, and gender, and also the shared resources all Americans draw on when their different identities and interests conflict. Students also choose courses in mathematics or logic, natural/physical sciences, writing, humanities, and fine arts to fulfill general-education requirements.

In addition to the strong academic program, Thurgood Marshall College is proud of its emphasis on the student as citizen. Students are encouraged to integrate educational alternatives and public service opportunities, such as Partners at Learning (PAL), for which they earn academic credit, into their curricula. Through PAL and
other options, such as study abroad, internships, public service and leadership activities, students develop skills learned in the classroom and apply them to real-world experiences. Toward that end, the Student Leadership Program is especially designed to encourage active participation in the governance of the college and in community service.

Thurgood Marshall College’s hallmark is community, where students are encouraged to be active participants in their university education and to take advantage of the abundance of opportunities to learn and develop as exemplary scholars and citizens in a multicultural twenty-first century.

**Earl Warren College Programmatic Theme**

Earl Warren College was founded in 1974 and named in honor of the former governor of California and Chief Justice of the United States Supreme Court. Consistent with Earl Warren’s principles, the college is committed to preparing students for life intellectually, socially, and professionally as responsible citizen-scholars. Warren’s guiding philosophy, “Toward a Life in Balance,” helps students define their individual educational and career paths. The college strives to provide all students with an experience that underscores the harmony necessary between academic and cocurricular endeavors.

Earl Warren’s focus on the individual’s relationship with society is reflected in the required course Ethics and Society. This class examines ethical principles and their social and political applications to contemporary issues. All students enroll in the two-quarter Warren College Writing Program, which stresses written argumentation based on primary and secondary sources. The college sponsors two interdisciplinary minors, open to all UCSD undergraduates. The law and society minor emphasizes the interrelationship of legal, social, and ethical issues in their historical context. The health care-social issues minor analyzes complex social and ethical implications of healthcare policies and delivery systems. Additionally, Warren College is home to the Academic Internship Program, which offers qualified UCSD juniors and seniors the chance to acquire valuable work experience related to academic and career interests.

Warren College’s general-education requirements and academic philosophy guarantee that students will acquire both the breadth and depth necessary to successfully compete in graduate school, professional school, or the workplace. The college’s requirements include a major and two additional programs of study that encompass academic areas outside of a student’s major. Additional courses in formal skills and cultural diversity provide an essential educational complement. Warren students are encouraged to pursue academic internships as well as study abroad; both opportunities create well-rounded students with heightened cultural and intellectual curiosity.

Earl Warren College offers students flexibility in fulfilling their general-education requirements, and provides a vibrant and welcoming home for the pursuit of rigorous academic study and personal growth.

---

**Sixth College Programmatic Theme**

Sixth College opened in 2002. As the newest college at UC San Diego, Sixth is characterized by a spirit of creativity and collaboration. The college theme, Culture, Art, and Technology, embraces the rich opportunities available in new interdisciplinary approaches to learning and practice. In doing so, it bridges the divisions traditionally separating social and natural science, humanities, technology, and the arts. By piloting educational initiatives and building partnerships with such groups as the Center for Telecommunication and Information Technology (Calit2), the Center for Research in Computing and the Arts, the Jacobs School of Engineering, and the University Events Office, we are developing opportunities for our students to participate in meaningful creative learning experiences across the entire campus, as well as the larger community. A supportive yet challenging integrated learning environment, both in and out of the classroom, helps our students develop the cultural competence and understanding necessary to become fully engaged, effective global citizens in the twenty-first century.

Sixth College’s theme is woven into an educational philosophy and curriculum intended to prepare students for a future that demands ethical integrity, creativity, self-understanding, critical reasoning, appreciation of the powers and implications of science and technology, and flexibility. Students will learn interactive skills and approaches needed for success in an increasingly global society: teamwork, cross-cultural understanding, strong writing and multimedia communication skills, and information technology fluency.

All students must complete the three-quarter core sequence in Culture, Art, and Technology (CAT). The sequence, with its imbedded writing program, develops our students’ abilities to achieve a reflexive understanding of themselves and their society by approaching issues and problems from interdisciplinary perspectives. It examines the foundations, historical interactions, and future possibilities of culture, art, and technology in relation to the problems and potentials afforded by human nature and the larger environment on which we depend. The Sixth College breadth requirements build on the core approach by including courses in art making and information technology fluency, as well as social science, humanities, natural science, mathematics and logic, and statistical methods. The curriculum culminates in a capstone experience that offers our students the opportunity to engage with the real world in a meaningful way through a self-directed, community- or team-based practicum project followed by an upper-division writing course in which they will reflect on the significance of their practicum project for their entire educational experience at UC San Diego.

---

**Eleanor Roosevelt College Programmatic Theme**

Eleanor Roosevelt College (ERC) emphasizes a comprehensive general education designed to prepare students to compete successfully in the global and multicultural economy of the twenty-first century. Successful professional people will need to understand their own cultural heritage as well as those of people from other societies with whom they will be interacting in their workplaces and communities.

The perspectives gained at ERC prepare students well for the future, whatever their goals and their major field of study, and whether they plan to go on to graduate school, professional school, or the worlds of science and technology, business, or the arts.

At the core of the curriculum are six courses comprising The Making of the Modern World (MMW). This interdisciplinary sequence was developed by faculty from anthropology, history, literature, political science, and sociology. It teaches students to think historically and analytically, as well as across disciplines, about both Western and non-Western societies, and the ways humans have organized their experience in different places and times.

ERC students receive exposure to natural science, quantitative methods, foreign language, and fine arts, and each selects a geographic region for in-depth study. Interested students are encouraged and assisted in finding ways to study, work, or travel in other countries to expand their horizons.

A friendly and supportive campus community, ERC is also distinguished by its emphasis on helping each individual reach his or her full potential intellectually, and in those skills, contributing to effective participation and leadership.

As Eleanor Roosevelt wrote, “Whether or not they have made the world they live in, the young must learn to be at home in it, to be familiar with it. They must understand its history, its peoples, their customs and ideas and problems and aspirations.” ERC students and graduates find themselves as much “at home” in the world as any of their generation, and more than most!
College Administration

The provost is a faculty member who acts as the college’s chief administrative officer and academic dean. In addition to the provost, each college has a dean of academic advising and a dean of student life.

The academic departments and the college academic advising offices are designated campus units responsible for providing official academic advice and direction to undergraduate students. The college academic advising staff have primary responsibility for providing academic advice and services that assist new and continuing students in developing educational plans and course schedules which are compatible with their interests, academic preparation, and career goals.

The college academic advising offices conduct academic orientation/enrollment programs for all new students and advise continuing students about college general-education and graduation requirements. The advising staff of each college provide general academic and curricular information, clarify academic rules and regulations, review all aspects of academic probation, monitor academic progress, assist students with decision-making strategies, and give information about prerequisites and screening criteria for majors. In conjunction with the academic departments and the Office of the Registrar, the advising offices certify students for graduation and facilitate their academic adjustment to the university.

Moreover, college academic advisors are available to counsel students about educational alternatives; selection of courses and majors; program changes; new academic opportunities; and special programs such as exchange programs, honors programs, outreach programs, etc.

With a central concern for student development, dean’s staff members provide a variety of nonacademic services such as coordinating educational and social programs; overseeing residential programs; assisting students with decisions and procedures regarding withdrawal from school; coordinating disciplinary procedures, both academic and social; and making referrals to other student services on campus. (See also “Student Services and Programs.”)

Whatever the question or concern, the provost and his or her staff stand ready at all times to assist undergraduates.

Phi Beta Kappa

The UC San Diego chapter of Phi Beta Kappa elects student members on the basis of high scholastic achievement in academic programs emphasizing the liberal arts and sciences. Phi Beta Kappa was founded in 1776 at the College of William and Mary in Virginia and is the oldest, most prestigious, academic honor society in America. See also “Honors” in the index.

Honors

Each college awards honors to outstanding students on the basis of criteria approved by the Academic Senate. These honors are posted on students’ transcripts and noted on their diplomas. For further details, see “Honors” in the index.

Transfer Students

Students transferring to UC San Diego must complete the requirements of the chosen undergraduate college. Students are strongly advised to complete all lower-division preparation for the major prior to enrollment at UC San Diego. The college academic advising staff will review the transfer course work for applicability to general-education and college graduation requirements. Students are encouraged to choose carefully the UCSD undergraduate college which best fits their general-education program or course work. Academic departments will review courses applicable to students’ majors. See Undergraduate Admissions, Policies and Procedures, “University of California Transfer Agreement.”

Graduation Requirements in the UC San Diego Colleges

Unless otherwise indicated, the figures in this chart refer to the number of COURSES rather than the number of units. Most UC San Diego courses carry four quarter-units of credit, and a student usually takes four courses each quarter. Academic disciplines are classified as humanities/fine arts, social sciences, and mathematics/natural sciences/engineering. The term “noncontiguous” refers to a discipline that is different from that of the major. Students must meet the Entry Level Writing requirement prior to enrolling in the writing courses of their respective college. Each college’s cultural diversity requirement can be fulfilled as noted by an asterisk (*) below.

John Muir College

General Education

ANALYTICAL WRITING—2
A three-course sequence in one of the following disciplines from the: —3

SOCIAL SCIENCES
A three-course sequence in either—3

MATHEMATICS (CALCULUS)
OR One of the disciplines from the NATURAL SCIENCES
A three-course sequence in each of TWO of the disciplines from TWO different categories—6

FINE ARTS
HUMANITIES
FOREIGN LANGUAGE

Minor/Additional Graduation Requirements
Optional Minor —“One U.S. cultural diversity course to be chosen from an approved list as part of the major, optional minor, elective, or an appropriate general-education course
Minimum Number of Courses Required for Graduation

B.A./B.S. degrees require a minimum of 45 courses (180 units); at least 18 courses (72 units) must be upper-division.

Thurgood Marshall College

General Education

DIMENSIONS OF CULTURE—3
Includes two six-unit courses with intensive instruction in university-level writing

HUMANITIES—2
Includes cultural diversity

FINE ARTS—1

NATURAL SCIENCES—3
One course each in biology, chemistry, and physics. (Courses are available for science and non-science majors.)

MATHEMATICS AND LOGIC—2
(Courses are available for science and non-science majors.)

DISCIPLINARY BREADTH—4
Noncontiguous to the major. Two must be upper-division; one must include writing.

PUBLIC SERVICE—(optional)
The four-unit public service option may be used to fulfill one course in disciplinary breadth.

Minor/Additional Graduation Requirements

Optional Minor

Minimum Number of Courses Required for Graduation

B.A./B.S. degrees require 45 courses (180 units). At least 60 units must be upper-division.

Eleanor Roosevelt College

General Education

THE MAKING OF THE MODERN WORLD—6
Includes two six-unit courses with intensive instruction in university-level writing.

FOREIGN LANGUAGE—0 to 4
Proficiency exam or number of courses.

FINE ARTS—2
To include study of both Western and non-Western arts.

NATURAL SCIENCES—2
(Courses are available for science and non-science majors.)

QUANTITATIVE/FORMAL SKILLS—2
(Courses are available for science and non-science majors.)

REGIONAL SPECIALIZATION—3
To include at least two courses taken at the upper-division level.

Minor/Additional Graduation Requirements

Optional Minor—Students may combine foreign language and regional specialization course work to create a minor focusing on a particular geographic area.

Sixth College

General Education

CULTURE, ART, AND TECHNOLOGY—3
Three-quarter sequence includes two (six-unit) courses of intensive instruction in university-level writing.

INFORMATION TECHNOLOGY FLUENCY—1
This requirement may be satisfied with courses from a variety of departments.

MODES OF INQUIRY—7
Two courses in social sciences, two courses in humanities, two courses in natural sciences, one course in math/logic (different options available for science and non-science majors)

UNDERSTANDING DATA—1
One course in statistical methods (different options available for science and non-science majors)

SOCIAL AND ETHICAL CONTEXTS—2
One course in ethnic or gender studies; one course in ethics.

ART MAKING—2
Two courses in music, theatre (including dance), or visual arts.

PRACTICUM—2
Capstone project with a four-unit course in upper-division writing.

Minor/Additional Graduation Requirements

Optional Minor

Minimum Number of Courses Required for Graduation

B.A./B.S. degrees require a minimum of 45 courses (180 units). At least 15 courses (60 units) must be upper-division.

Major

NOTE: Students normally may pursue any major, except for college individualized majors, regardless of the college they choose. Majors are identical regardless of the student’s chosen college. Most majors require twelve to eighteen upper-division courses based upon adequate lower-division preparation; such preparation may be part of the general-education requirements. Majors in certain engineering programs may require as many as twenty-one upper-division courses.
Revelle College

Revelle College, the first college on the UC San Diego campus, was named in honor of Dr. Roger Revelle, former University of California dean of research and director of the Scripps Institution of Oceanography. Dr. Revelle is perhaps best known for his plenary research on greenhouse gases and his predictions of their effects.

The initiation of Revelle College in 1958 provided the faculty with the opportunity to design a complete undergraduate curriculum for some of the country’s best-prepared students. The faculty asked the fundamental question: What should an educated person know? The Revelle College general-education requirements offer a specific but broad introduction to the academic disciplines of the university. A student graduating from Revelle College will have attained:

1. a basic knowledge of calculus; foreign language; the physical, biological, and social sciences; the fine arts; and the humanities
2. preprofessional competence in an academic discipline
3. an understanding of an academic area outside his or her major discipline

General-Education Requirements

Students are encouraged to meet the general-education requirements and the prerequisites to the major early in their university career.

Freshmen with Advanced Placement credits can use many of these advanced courses to meet general-education requirements (see Advanced Placement chart in “Undergraduate Admissions, Policies and Procedures”). Transfer students may meet all general-education requirements before entering by following articulation agreements with community colleges or taking, at any institution, courses which Revelle College judges approximately equivalent in content to those at UCSD.

The general-education requirements are:

1. Humanities

The humanities requirement confronts students with significant humanistic issues in the context of a rigorous course. It is also an introduction to the academic disciplines of history, literature, and philosophy and provides training and practice in rhetorical skills and particularly persuasive written expression.

   Students may satisfy this requirement by completing the five-quarter interdisciplinary (history, literature, and philosophy) humanities sequence.

   For course descriptions, see “Courses, Curricula, and Programs of Instruction: Humanities.”

2. Fine Arts

One course is required. It serves as an introduction to creativity in theatre, dance, music, or visual arts. (See “Courses, Curricula, and Programs of Instruction: Theatre and Dance, Music, and Visual Arts.”)

3. Social Sciences

Two lower-division courses from the same department chosen from anthropology, critical gender studies, economics, ethnic studies, human development, linguistics/general, political science, psychology, sociology, or urban studies and planning.

4. American Cultures

One course in American Cultures from an approved list, available at http://revelle.ucsd.edu. (TAG students exempt.)

5. Calculus

Three quarters of calculus are required. There are two beginning-year sequences which meet the Revelle College calculus requirement. Both sequences include integral and differential calculus. Freshman placement in these sequences depends upon the student’s preparation in mathematics and the student’s choice of major. Students are urged to keep their mathematical skills at a high level by taking mathematics during their senior year in high school. (See “Courses, Curricula, and Programs of Instruction: Mathematics.”)

6. Natural Sciences

The natural science courses present current developments in the fundamental concepts of modern physics, chemistry, and biology.

   Students choose their five required physical and biological science courses from the sequences depending upon their interests, prior preparation, and intended majors.

   Students planning to major in a science must consult the appropriate departmental listing under “Courses, Curricula, and Programs of Instruction” to find the additional preparation needed for their major.

7. Foreign Language

Revelle College students are required to demonstrate basic conversational and reading proficiency in any modern foreign language, or advanced reading proficiency in a classical language or complete the fourth quarter of foreign language instruction with a passing grade.

   Modern foreign language programs are currently offered in American Sign Language, Chinese, French, German, Hebrew, Italian, Japanese, Korean, Russian, Spanish, and Heritage Languages, and classical language programs are offered in Greek, Latin, and Hebrew. Students who have preparation in other languages should contact Revelle College Academic Advising for information on a proficiency examination. This exam may also be taken by native speakers of any foreign language without further course study.

8. Area of Focus

Three courses from a single department in an area noncontiguous to the major are required. The three courses must be interrelated and should focus on some discipline, subject area, or topic. For the purposes of this requirement, the humanities/arts, the social sciences, and the natural sciences/engineering/mathematics are considered three different areas. Courses from more than one department should be approved prior to enrolling. The area of focus is not posted to the diploma or transcript.

These three courses may not be used on any other requirements. These courses may be upper division or lower division but one should keep in mind that graduation requirements stipulate that at least sixty units of all work must be from upper-division courses. The courses may be taken Pass/Not Pass and Advanced Placement or International Baccalaureate credits may be used. Students may complete an optional noncontiguous minor to replace this requirement, if they wish to do so.

* Science majors may want to take part of the social science requirement in the junior year to allow time for additional science laboratories and/or calculus.

Transfer Students

Transfer students may enter Revelle College by following community college articulation agreements which can be viewed at http://www.ASSID.org or by signing up for specific Transfer Admissions Guarantee (TAG) plans or by following the Intersegmental General Education Transfer Curriculum (IGETC). However, Revelle College does not accept IGETC as satisfaction of all its lower-division requirements. Revelle accepts IGETC courses to meet requirements with additional classes in science, calculus, and foreign language. (Students are exempt from the language requirement if they can pass proficiency in a foreign language. Note: Proficiency exams are not available in all languages. Consult Revelle College Academic Advising for more information.) Science and mathematics majors will need these additional classes in preparation (or to meet prerequisites) for their major. The additional math/science classes or language classes can be taken at the community college or after transfer to UCSD. See details on our Web site at http://revelle.ucsd.edu/prosp/igetc.html.

The Major

All undergraduate majors offered at UCSD are available to Revelle College students. An exceptional student who has some unusual but definite academic interest for which a suitable major is not offered on the San Diego campus may, with the consent of the provost of the college and with the assistance of a faculty advisor, plan his or her own major. The Revelle Individual Major must be submitted no later than three quarters before the student's intended graduation and be approved by the Executive Committee of the college before it may be accepted in lieu of a departmental or interdepartmental major. The faculty advisor will supervise the student's work, and the provost must certify that the student has completed the requirements of the individual major before the degree is granted.

Students who fail to attain a grade-point average of at least 2.0 in work taken in the prerequisites for the major, or in the courses in the major, may, at the option of the department, be denied the privilege of entering or of continuing in that major. For a list of majors requiring additional screening for acceptance into the major, visit the Revelle College Web site at http://revelle.ucsd.edu.

Optional Minor

A minor is not required in Revelle College. However, if a student wishes to complete a Department Minor or a Project Minor and have it posted to the transcript, he or she may do so. If a student completes either of these types of minors in a field noncontiguous to that of the major, it will replace the three-course noncontiguous area of focus general education requirement. Non-science majors may take courses for the natural science requirement Pass/Not Pass: American Cultures, fine arts, language and area of focus. Science and mathematics majors will need these additional classes in preparation (or to meet prerequisites) for their major. The additional math/science classes or language classes can be taken at the community college or after transfer to UCSD. See details on our Web site at http://revelle.ucsd.edu/prosp/igetc.html.

Optional Minor

A minor is not required in Revelle College. However, if a student wishes to complete a Department Minor or a Project Minor and have it posted to the transcript, he or she may do so. If a student completes either of these types of minors in a field noncontiguous to that of the major, it will replace the three-course noncontiguous area of focus general education requirement. Non-science majors may take courses for the natural science requirement Pass/Not Pass: American Cultures, fine arts, language and area of focus. Non-science majors may take courses for the natural science requirement Pass/Not Pass: American Cultures, fine arts, language and area of focus. Non-science majors may take courses for the natural science requirement Pass/Not Pass: American Cultures, fine arts, language and area of focus. Non-science majors may take courses for the natural science requirement Pass/Not Pass: American Cultures, fine arts, language and area of focus.

Graduation Requirements

To graduate from Revelle College, a student must
1. Satisfy the University of California requirements, including the UC Entry-Level Writing Requirement and American History and Institutions.
2. Satisfy the general-education requirements.
3. Successfully complete a major according to all requirements of that department.

4. Complete a minimum of fifteen upper-division courses (sixty units).

5. Pass at least 184 units for the B.A./B.S. degree. (No more than three units of physical education transferred from another institution may be counted toward graduation.)

6. Attain a C average (2.0) or better in all work attempted at the University of California (exclusive of UC San Diego Extension). Students are responsible for checking with the department of the major for all regulations.

7. Meet the senior residence requirement. (See “Academic Regulations: Senior Residence.”)

---

**Honors**

Particularly well-prepared students are invited to join a freshman honors program, which includes weekly participation in small faculty seminars (Revelle 20). Acceptance into the honors program at admission is automatic for Regents Scholars and National Merit Scholars as well as those students entering with a high school GPA of 3.8 or higher and verbal and math SAT scores of 700 or higher. Admission to the program’s winter quarter is offered to those who achieve a 3.7 GPA in at least twelve graded units taken at UCSD during the fall quarter. A variety of other perquisites are also awarded.

**Quarterly provost’s honors, honors at graduation, departmental honors, and Phi Beta Kappa honors** are awarded. At least five outstanding graduating seniors are honored at graduation each year with a monetary honorarium. An honors banquet is given for the top two hundred students in Revelle each spring. Seniors are selected for participation in honors seminars. For additional information, see “Revelle Honors Program” and “Honors” in the index.
John Muir College admitted its first students in the fall of 1967 and moved to its present quarters in 1970. The college was named for John Muir (1838–1914), a Scottish immigrant who became a famous California naturalist, conservationist, and author. Muir explored the Sierra Nevada and Alaska, and worked for many years for the cause of conservation and the establishment of national parks and forests. Please visit our Web site at http://provost.ucsd.edu/muir.

The Character of the College
Inspired by John Muir’s remarkable life, Muir College stresses the spirit of individual choice and responsibility within the framework of a strong and supportive community. It encourages awareness of environmental issues and involvement in environmental preservation and sustainability both on and off campus. The interdisciplinary minor in Environmental Studies was started and continues to flourish at Muir. The college also sponsors the Film Studies minor, the Critical Gender Studies major and minor, and courses in contemporary issues. It has also established an individualized major called the Muir Special Project. And it has inaugurated an exchange program with Dartmouth College, one of the most distinguished undergraduate institutions in the United States. Each quarter UC San Diego students attend Dartmouth, while a similar number come from Dartmouth to Muir. By these and other means, the college maintains at UCSD the heritage of the remarkable man for whom it was named.

The General-Education Philosophy and Requirements
The faculty of John Muir College established Muir’s general-education program to guide students toward a broad and liberal education while allowing them substantial choice in the development of that education. This is accomplished by granting students the responsibility and flexibility to customize to a high degree their general-education courses within a broad framework of learning.

General-education requirements at Muir College include the completion of one three-quarter sequence from each of the following areas:

- Social Science
- Mathematics (calculus) or Natural Sciences

In addition, two three-quarter sequences from two of the three following areas are required:

- Fine Arts
- Humanities
- Foreign Languages

The freedom to choose carries with it the responsibility on the part of the student to plan carefully. Before making a final selection of courses, students should request from the college’s Academic Advising unit a list of general-education requirements and approved sequences in each area. As they plan, students should be aware that:

1. Only complete sequences may be applied to the general-education requirement. Ordinarily, an entire sequence from one department is taken in one academic year.
2. Courses taken to satisfy only the general-education requirements and not for a major or minor may, in general, be taken Pass/Not Pass.
3. Units obtained from advanced placement may be applied toward the 180 units needed for graduation; some units may be used to fulfill some of the general-education requirements.

For students who transfer to Muir College from another institution, the general-education requirements will be interpreted in this way: two semester-courses or three quarter-courses in one subject represented on the approved list normally will be accepted as completing one of the four required sequences. After the Office of Admissions evaluates a student’s transcript, the Academic Advising unit of the Office of the Provost makes an evaluation of prior work for each student at the time of his or her first enrollment.

In addition to the four year-long sequences, Muir College has the following two general-education requirements:

- Composition Requirement: A two-course sequence in critical thinking, rhetorical analysis, and expository writing. Freshman students fulfill this requirement with Muir College Writing 40 and Muir College Writing 50. TAG- and IGETC-certified transfer students have the option of completing an upper-division Muir College Writing course. The writing courses should be completed during the first year of attendance and are offered for a letter grade only.
- U.S. Cultural Diversity Requirement: One four-unit course exploring the diversity of the United States. A list of acceptable courses may be obtained from the Academic Advising unit of the Office of the Provost.

Pass/Not Pass Grading Option
Muir students are reminded that to take a course Pass/Not Pass, they must be in good academic standing (2.0 GPA). No more than one-fourth (25 percent) of an undergraduate student’s total UCSD course units counted in satisfaction of degree requirements may be in courses taken on a Pass/Not Pass basis. All major-related courses and most minor courses must be taken for a letter grade. Students are advised to check with their major or minor department regarding restrictions or exceptions.

Enhancing Your Education
Students may enhance their undergraduate education by participating in the UC Education Abroad Program (EAP) and UCSD’s Opportunities Abroad Program (OAP) while still making regular progress toward graduation. Information on EAP/OAP is detailed in the Education Abroad Program section of the UC San Diego General Catalog. Interested students should contact the Programs Abroad Office in the International Center and visit the Web site at http://pao.ucsd.edu. Financial aid recipients may apply aid to the EAP program, and special study abroad scholarships are available.

Many programs are now available for sophomores, as well as juniors and seniors. With careful planning students should be able to fulfill some general-education, major, and/or minor requirements while studying abroad.

Major Programs and Special Projects
A Muir College student may pursue any of the approximately 125 undergraduate majors offered at UCSD. Most major programs at UCSD require a pattern of prerequisites at the lower-division level before students may enroll in upper-division major courses. Students must declare a major upon accumulating ninety units. Careful planning will assure the student access to a wide range of majors. Students are strongly encouraged to consult regularly with the college academic advisors as well as departmental major advisors concerning the selection of appropriate courses so as to graduate by the 200 unit maximum limitation.

Each academic department has, in its section of this catalog, a paragraph entitled “The Major Program.” Students are encouraged to read these sections carefully, for they indicate both the extent and the nature of courses required for the specific program. The following points are useful to keep in mind:
1. A substantial command of at least one foreign language is required by some departments (e.g., International Studies, Linguistics, Literature).

2. Specific science courses are required by many departments. For example, the Department of Computer Science and Engineering and the Department of Electrical and Computer Engineering require Physics 2A-B-C-D or Physics 4A-B-C-D-E; the Department of Chemistry and Biochemistry requires Physics 1A-B-C, Physics 2A-B and C or D, or Physics 4A-B-C-D-E, etc.

3. The Physical and Life Sciences, Applied Sciences (the Jacobs School of Engineering majors) together with certain Social Sciences (including Cognitive Science and Economics), require at least one year of calculus.

The Muir Special Project (MSP) major is a B.A. degree only and is intended for students who have specific talents and interests which are not accommodated by one of the departmental majors. Each proposal and senior thesis or project must be approved by the Muir provost. The MSP normally includes regular course work and independent study representing up to fifteen upper-division four-unit courses as well as a project or thesis. The project may be one of two kinds: creative work of some sort (e.g., a book of poetry, a collection of musical compositions) or a detailed program of study and research in a particular area. The latter results in a long paper representing a synthesis of knowledge and skill acquired. In either case, a tenured member of the UCSD faculty must serve as an advisor to a student doing the project. It should be understood that the demands of a special project major are great, and this option is not appropriate for a student who simply does not want the discipline of a normal major. For a course to be included as part of a Muir Special Project, the student must earn in it a grade of C– or better. Please note: there is no MSP minor available. Further information may be obtained from the Muir Academic Advising Office.

**Graduation Requirements**

To receive a degree of bachelor of arts or bachelor of science, a John Muir College student must

1. Declare graduation by completing the electronic Degree and Diploma Application. Please see the Muir Academic Advising Office for further information. Students who plan to graduate at the end of a summer session must complete the above-mentioned process early in spring quarter. Degrees are not automatically granted: students must file their intention to graduate online at [http://degree.ucsd.edu](http://degree.ucsd.edu).

2. Meet the general university requirement in Entry Level Writing (formerly Subject A). (See “Undergraduate Admissions, Policies, and Procedures.”)

3. Satisfy the University of California requirement in American History and Institutions (See “Undergraduate Admissions, Policies, and Procedures.”)

4. Meet the Muir College requirement in writing proficiency. This requirement asks that the student demonstrate an ability to write English according to standards appropriate for all college work. (See Muir College course listings: “The Writing Program.”)

5. Fulfill the general-education requirements.

6. Fulfill the U.S. cultural diversity requirement.

7. To receive a B.A. or B.S. degree, students must complete a minimum of forty-five four-unit courses (180 units), which include a minimum of eighteen upper-division courses (72 units).

8. Show some form of concentration and focus of study. Ordinarily this is accomplished by completing a department or interdisciplinary major. Students in the college may attempt any major upon completion of the prerequisites. (Some departments require students to attain a minimum GPA in prerequisite courses and apply for admission to majors in the departments. Refer to the departments for current detailed information.) Students who do not choose to meet this requirement by means of a departmental or interdisciplinary major and who qualify may propose a special project major. (See the section, “Major Programs and Special Projects,” above.)

9. Satisfy the residency requirement, which stipulates that thirty-six of the last forty-five units passed be taken at UCSD as a registered Muir College student. Students planning to study abroad during the senior year should be aware that they must return to complete a minimum number of twenty-four units at UCSD. Such students should see their college academic advisor for clarification.

10. Accumulate a grade-point average of at least 2.0 overall and in most majors. Departments may require a C average in all upper-division courses used for the major or C– grades in each course used for the major. Students should consult with their department to determine which grading regulation applies.

11. Make up all incomplete grades. Students may not graduate with “NRs,” “IPs,” or “Incomplete” entries on their transcript. Therefore, they should be sure that all Incompletes have been cleared and final grades have been properly recorded by the end of the quarter in which they plan to graduate.

12. Complete all requirements for the degree during the quarter in which students file to graduate. If the degree requirements are completed after the expiration of the deadline in a quarter, but before the beginning of the next quarter, students must retranscript their Degree and Diploma Application and reapply to graduate for the subsequent quarter.

13. Retract the electronic Degree and Diploma Application if unable to satisfy all graduation requirements, including grade changes, by the end of the proposed graduating quarter. Students will graduate at the end of the quarter in which deficiencies are satisfied.

14. It is the students’ responsibility to contact their department advisor to verify that they have satisfied departmental requirements for graduation.

While John Muir College does not call for the completion of a minor to fulfill its requirements for the degree of bachelor of arts or bachelor of science, it does acknowledge the completion of an approved departmental minor on a student’s transcript. No upper-division courses may be used to satisfy both a major and a minor.

For a minor, students are required to complete twenty-eight units of interrelated work, of which at least twenty units must be upper-division. Departments or programs may establish more stringent criteria than the minimum. A formal request for the minor must be approved by the department or program and college by the quarter before graduation.

Upon satisfaction of the graduation requirements, Muir College will recommend that students be awarded the degree of bachelor of arts or bachelor of science.

**Honors**

Quarterly provost’s honors, departmental honors, Latin honors, membership in the Caledonian Society of John Muir College, and Phi Beta Kappa honors are awarded. Please note that graduating seniors must have letter grades for eighty units of work completed at the University of California for college honors. For additional information, see “Honors” in the Index.

**Honorary Fellows of Muir College**

- Hannes Alfvén, Scientist and Nobel laureate
- Georg von Bekesy, Psychologist and Nobel laureate
- Oscar (Budd) Boetticher, Filmmaker
- David Brower, Conservationist
- Francis H.C. Crick, Scientist and Nobel laureate
- Ernst Krenk, Composer
- William J. McGill, Educator
- Jonas Salk, Scientist
- Claude E. Shannon, Mathematician
- John L. Stewart, Founding Provost
- Earl Warren, Jurist and Statesman
- Robert Penn Warren, Poet and Novelist
- Mandell Weiss, Philanthropist
Thurgood Marshall College, formerly known as Third College, was founded in 1970. From its inception, the college has enriched the lives of undergraduates with its intellectual and philosophic commitment to the development of students as both scholars and citizens. In July of 1993, the college was renamed in honor of the famous lawyer and Supreme Court Justice, Thurgood Marshall. Justice Marshall was widely known and recognized for his historic contributions to American life and dedication to breaking down barriers to education, civil rights, freedom of speech, women's rights, and the right to privacy.

Thurgood Marshall College, its faculty, staff, and students are committed to furthering the ideals and dreams of Justice Marshall; accordingly, students are provided opportunities to develop as both scholars and citizens.

Thurgood Marshall’s 3,800 students pursue any major in a variety of disciplines. About 40 percent choose majors in biology, the physical sciences, mathematics, and engineering; 35 percent select majors in the social sciences; and 25 percent pursue majors in the humanities and fine arts areas. One of the primary aims of the college is to prepare its students for the pursuit of a rigorous academic curriculum which in turn promotes entry into graduate/professional schools or into the career of one’s choice.

Educational Philosophy

The educational philosophy of Thurgood Marshall College is guided by the belief that regardless of a student’s major, a broad liberal arts education must include an awareness and understanding of one’s role in society. Therefore, the distinctive core sequence, which serves as the centerpiece of the general-education requirements, emphasizes a critical examination of the human condition in our diverse American society. This three-quarter core sequence, “Dimensions of Culture—Diversity, Justice, and Imagination,” challenges students to develop an informed awareness of the many cultural perspectives that have shaped American society. The core sequence is designed as an interdisciplinary, contemporary issues-oriented curricular experience that explores both the diversity of American experiences across race, religion, class, and gender, and also the shared resources all Americans draw on when their different identities and interests conflict. Other general-education requirements include courses in mathematics, the physical and biological sciences, humanities, and the arts.

Wishing to uphold the ideals set forth by the college’s namesake, Thurgood Marshall students are encouraged to develop their skills not only as scholars, but also as citizens. Therefore, it is our belief that scholarship and social responsibility are mutually compatible. In this regard, our students receive academic credit for participating in the Partners-at-Learning Program (PAL) by taking courses which train and place them as tutors and mentors in local inner-city elementary schools and high schools, as well as the on-campus model school, The Preuss School, and the Gompers Charter Middle School in Southeast San Diego. Because this activity shares importance with other academic experiences, completion of one of these specific public service courses, offered through Education Studies, satisfies an upper-division general-education requirement.

Further underpinning the educational philosophy of Thurgood Marshall College is the belief that the best preparation for a complex, interdependent, and rapidly changing world is a broad liberal arts education, complemented by in-depth study in areas of the student’s choice. This educational approach has several major advantages:

1. It guarantees a basic understanding of the principal branches of knowledge: the humanities and arts, social sciences, the natural sciences, and mathematics.
2. It enables students with well-defined interests and goals to begin work in their chosen field of study as first-year students.
3. It allows students who have not decided on a major to sample an array of potential majors while simultaneously satisfying the general-education requirements of the college.

General-Education Requirements

General-education requirements are established by Thurgood Marshall College faculty to be broad and flexible enough to encourage students to integrate other alternatives, such as public service, internships, study abroad, research, special studies, etc., into their academic program. This permits students flexibility in pursuit of their academic goals and in the practical application of their liberal arts degree, whether they wish to enter the work force or continue their education in graduate or professional school. These courses are designed to introduce students to the academic focus of the college, provide a broad liberal arts and science background, and furnish students with the academic skills and the basic knowledge necessary to pursue any departmental or interdisciplinary major.

The general-education requirements for first-year students are composed of a core sequence and a menu of choices within a liberal arts framework:

1. DIVERSITY, JUSTICE, AND IMAGINATION: This is a three-course interdisciplinary sequence. Two of the three courses are six-units and include intensive instruction in university-level writing. This is a required sequence for all first-year students. All courses must be completed at UCSD and taken on a letter-grade basis only. (See “Dimensions of Culture” in the departmental listings.)
2. FINE ARTS: One course in either music, theatre, or visual arts (non-performance).
3. NATURAL SCIENCES: Three courses. Choose one course each in biology, chemistry, and physics. Courses are available for science and non-science students.
4. QUANTITATIVE/FORMAL SKILLS: Choose two courses in mathematics or one course in mathematics or statistics and one in computing or logic. Courses are available for majors and non-majors.
5. HUMANITIES AND CULTURE: Two courses. Choose one course each from ethnic studies and Third World studies.
6. DISCIPLINARY BREADTH: Four courses. Students choose four courses from a variety of disciplinary breadth areas: humanities/foreign language; social sciences; natural sciences; math/engineering. Courses used to satisfy the disciplinary breadth requirement come from fields outside the major field of study. Two of these courses must be upper-division. At least one upper-division course must include significant writing.
7. PUBLIC SERVICE (optional): This four-unit public service option may be used to fulfill one course in Disciplinary Breadth for any major and fulfills the upper-division writing requirement. (See “Partners at Learning” and Education Studies Program listings.)

The Thurgood Marshall College Executive Committee publishes an annual fact sheet with specific course choices which may be used to meet these requirements. Contact the college academic advising office for additional information or refer to the college Web site.
Graduation Requirements
To receive a bachelor’s degree from Thurgood Marshall College, a student must:
1. Satisfy the university English Language Writing Requirement (ELWR). (See “Undergraduate Admissions, Policies and Procedures.”)
2. Satisfy the university requirement in American History and Institutions. (See “Undergraduate Admissions, Policies and Procedures.”)
3. Fulfill the general-education requirements as described.
4. Complete a departmental or interdisciplinary major.
5. Satisfy the college residency requirement (thirty-five of the last forty-five units must be completed as a registered Thurgood Marshall College student).
6. Successfully complete a minimum of 180 units for the B.A./B.S. degree. At least 60 of these units must be completed at the upper-division level.
7. A 2.0 or better GPA is required for graduation.

Transfer Students
Transfer students have a variety of academic options available to complete lower-division general education prior to transfer. Specific details regarding appropriate general-education agreement are in the section on “Undergraduate Admissions” and through the community college. Students may also contact UCSD Transfer Student Services prior to transfer. Also, the college Web site http://marshall.ucsd.edu contains pertinent information.

Majors and Minors
Majors: Thurgood Marshall College students may pursue any of the departmental or interdisciplinary majors offered at UCSD. The majority of the academic departments have established lower-division prerequisites. Generally, these prerequisites must be completed prior to entry into upper-division major courses. Many of these courses may be counted for general-education credit as well. Students are strongly encouraged to work closely with department faculty and college advisors. For details on the specific major departments, refer to the “Courses, Curricula, and Programs of Instruction” section of this catalog.

Minors are optional. However, students are encouraged to keep as many options open as possible. A minor provides an excellent opportunity to complement the major field of study. Students are required to complete twenty-eight units of interrelated work, of which at least twenty units must be upper-division. See your college or department for further information.

Pass/Not Pass Grading Option
1. Courses to be counted toward a departmental major or as prerequisites to the major must be taken on a letter-grade basis.
2. Only one upper-division course to be counted toward a college independent studies minor may be taken on a Pass/Not Pass basis.
3. Courses taken toward completion of the college general-education requirements, with the exception of Dimensions of Culture (Diversity, Justice and Imagination), may be taken on a Pass/Not Pass basis, while at the same time the restrictions for prerequisites to majors and courses counted toward a minor must be observed.
4. Courses taken as electives may be taken on a Pass/Not Pass basis, while at the same time the restrictions on the majors and minors must be observed.
5. No more than one-fourth of the total University of California, San Diego units may be completed on a Pass/Not Pass basis.

Honors
Quarterly provost’s honors, honors at graduation, departmental honors, and Phi Beta Kappa are awarded to Thurgood Marshall College students. For additional information see “Honors” in the Index, speak with the academic honors program advisor in the academic advising office, or go to http://marshall.ucsd.edu/current/programs/honors.

Enhancing Your Education
Students are able to enhance their undergraduate education by participating in the UC Education Abroad Program (EAP) and UCSD Opportunities Abroad Program (OAP) while still making regular progress toward graduation. Information on EAP/OAP is detailed in those sections in the General Catalog. Interested students should contact the Programs Abroad Office in the International Center and visit the Web site at http://orpheus.ucsd.edu/center/pao/index.html. Financial aid recipients may apply aid to the program, and special study abroad scholarships are readily available.

College-Sponsored Programs
Individual Studies Major
The Individual Studies major allows students to pursue a coherent course of study not formally offered at UCSD. To apply for the major, students must have a 3.25 grade point average. A written proposal with supporting documentation from a faculty advisor, a list of prerequisite courses, and a proposed curriculum plan are required. Students pursuing this major must be goal-oriented and self-directed.

Partners-at-Learning Program (PAL)
Students may participate in the Partners-at-Learning Program (PAL) by taking specified Education Studies (EDS) courses which train and place them as tutors and mentors in local elementary and high schools, as well as the on-campus Preuss School, and the Gompers Charter Middle School in Southeast San Diego. Participation in the PAL program can be counted toward satisfying the Public Service option at Thurgood Marshall College. This campuswide program is open to all students in good standing and at the junior level. (See EDS in the department listing—specifically EDS 130, 134, 136, 138, and 139.)

Price Public Affairs Forum
The Price Public Affairs Forum invites leading public figures to speak on important contemporary issues. Such wide-ranging topics as “Race and Justice in America,” “Women’s Role in the Workplace,” and “The Modern American Family” have been presented. These forums are open to the general public.

Public Service Minor
Thurgood Marshall College sponsors the Public Service Minor at UCSD, which encourages students to understand the history and practices of public service and to participate in the development of civic skills. This minor is open to all UCSD students in good standing. Please see “Public Service Minor” in the departmental listings or visit the Web site at http://publicsvcminor.ucsd.edu.

African-American Studies Minor
The African-American Studies Minor is an interdisciplinary program that seeks to provide comprehensive understanding and appreciation of African-American history, social politics, culture, and art. Please see “African-American Studies Minor” in the departmental listings or visit the Web site at http://af-amstudies.ucsd.edu.

Thurgood Marshall College Honors Program
The Thurgood Marshall College Honors Program sponsors activities and events designed to introduce students to the excitement of pioneering research and innovative scholarship in all disciplines at UCSD and to create opportunities for discussion on public issues with locally and nationally known figures. See Thurgood Marshall College Honors Program in the department listings or visit the Web site at http://ucsd.edu/current/programs/honors.
Thurgood Marshall Institute

The Thurgood Marshall Institute is deeply devoted to undergraduate research, public debate, and vital policy papers. The institute has organized and supported faculty and student group research projects in education and public law; hosted conferences and symposia on pressing issues; trained junior and senior high school instructors in the teaching of the United States Constitution and its amendments; commissioned political drama on radio and on stage; and created an active blog with political essays and interviews. Also, visit the Web site at http://marshallinstitute.ucsd.edu.

UCSD-Morehouse/Spelman Student Exchange Program

The UCSD-Morehouse/Spelman Student Exchange Program was established in the fall quarter of 1989. This formal exchange program was developed by Thurgood Marshall College and is open to all UCSD undergraduates. Morehouse and Spelman Colleges are located in Atlanta, Georgia.

The purpose of the program is to provide a unique opportunity for students to live and study at important institutions of higher learning that are significantly different from the social and educational environment typical of California state colleges and universities. Similarly, the exchange students coming to UCSD from Morehouse and Spelman will have an opportunity to experience an exciting and very different educational environment. See the program coordinator in the college academic advising office for additional information or visit the Web site at http://marshall.ucsd.edu.

Student Leadership Program

Complementary to its strong academic programs, Thurgood Marshall College is proud of its emphasis on the student as citizen. The Student Leadership Program is especially designed to encourage active involvement in the governance of the college and participation in community and public service programs. College life outside of the classroom and laboratory is a vital part of each student’s undergraduate experience. The college offers a wide variety of opportunities for students to shape the nature and character of student life. This active participation allows students to develop self-confidence and strong interpersonal, organizational, and leadership skills. The friendly and outgoing manner of Thurgood Marshall students contributes to a sense of community and mutual respect. This spirit of cooperation is a college hallmark.

Honorary Fellows of the College

- Maryann Callery, College Activist
- *Cesar Chavez, Civil Rights Activist
- Ernesto Galarza, Novelist and Educator
- Samuel Goldwyn, Jr., Film Producer and Director
- Joseph W. Watson, Educator, Professor, Vice Chancellor
- Marian Wright Edelman, President, Children’s Defense Fund

*Deceased
Earl Warren College

Earl Warren College opened in the fall of 1974, and currently enrolls more than 4,000 students. The college is named for the former Chief Justice of the United States and the only three-term governor of California. A native Californian, Justice Warren earned his college and law school degrees at the University of California. During his governorship, he served as an ex-officio member of the Board of Regents of the University of California for eleven years. He also saw public service as District Attorney of Alameda County and as Attorney General of California.

As governor during an era of lightning growth for California, Earl Warren developed the State Department of Mental Hygiene and led reforms of the prison system in California by establishing the Board of Corrections and the Prisoner Rehabilitation Act. In his final role as a public servant, he was Chief Justice of the United States, which, under his leadership, elaborated a doctrine of fairness in such areas as criminal justice, voting rights, legislative districting, employment, housing, transportation, and education.

The college derives its core values from Earl Warren’s judicial examination of the relationship between the individual and society. All students in the college explore this critical nexus and its profound implications in two required core courses in Ethics and Society. Earl Warren College also administers two campus-wide interdisciplinary minors, Law and Society and Health Care-Social Issues (open to all UC San Diego students), which further pursue the study of the college’s guiding precept. The college employs the scales of justice in its logo, and the symmetry of this image led to the adoption of the college’s philosophy, “Toward a life in balance.” Warren College strives to encourage students in the discovery of that essential balance through their undergraduate years and beyond.

Whether students wish to continue their education in graduate or professional school, seek an immediate career, or pursue other options, the college stands ready to assist. The Earl Warren College administration encourages students to identify their abilities and interests, examine career possibilities, and prepare for the future. The required, two-course Warren College Writing Program provides a strong grounding in written argumentation and prepares students for the demands of crafting college-level analytical papers. The Warren College Writing Center offers all Warren students extra-curricular assistance in honing their writing skills. The college-administered Academic Internship Program affords students the opportunity to explore classroom theory in a professional work environment. In addition, Earl Warren College is a strong supporter of international education and encourages students to pursue the many opportunities that are available for study abroad.

The college’s students and faculty represent all disciplines offered at UC San Diego. Graduation requirements, which include a major and two additional areas of academic focus, enable students to cover a wide range of material while concentrating on specific topics in depth. The diversity of its academic program has made Earl Warren College an exciting home for students who seek flexibility in designing their own educational paths.

General-Education Requirements

The Earl Warren College faculty firmly believes that each student should have the opportunity to develop a program best suited to his or her individual interests within a framework that ensures both depth and breadth of study. All students are required to have significant exposure to the social sciences, arts and humanities, and the sciences. The faculty and staff of the college provide extensive advising on individual academic programs and possible career implications within each program. Students who enroll at Earl Warren College are required to work within the following academic plan:

Warren College Writing Program: Each student must complete a two-course sequence in writing, Warren Writing 10A-B, within four quarters following successful completion of the UC Entry Level Writing requirement for a letter grade only.

Ethics and Society: After completion of Warren Writing 10A-B, all students must complete two courses in Ethics and Society, offered jointly by the Departments of Political Science and Philosophy (Political Science 27 and 28/Philosophy 27 and 28). These courses must be taken by the end of the second year at UC San Diego for a letter grade only.

Formal Skills: All students must satisfy the formal skills requirement by completing two courses chosen from an approved list that includes calculus, computer programming, statistics, and symbolic logic.

Programs of Concentration/Area Studies: In tandem with the student’s major, these ensure a significant exposure to the three disciplines: humanities/ fine arts, social sciences, and sciences. All students are required to complete two focused collections of courses outside the areas of their majors.

For students other than B.S. Engineering majors, two Programs of Concentration are needed. Each program requires six courses outside the discipline of the major. A minimum of three courses must be upper division. In lieu of a Program of Concentration, a student may choose to declare a minor in a department or an interdisciplinary program.

For B.S. Engineering majors, each student must complete two Area Studies, one in the humanities/fine arts and one in the social sciences. Each of these Area Studies consists of three courses. A minimum of two courses must be upper division. In lieu of an Area Study, a student may choose to declare a minor in a department or an interdisciplinary program.

All Interdisciplinary Programs of Concentration and Area Studies must be approved by the Earl Warren College Academic Advising office. All minors must be approved by academic departments or programs.

Advanced Placement and International Baccalaureate Credit

Advanced Placement (AP) and International Baccalaureate (IB) units may be substituted for corresponding lower-division course work in a Program of Concentration or Area Study. In general, a maximum of twelve units may be applied toward a Program of Concentration and a maximum of eight units may be applied to an Area Study.

Majors

Earl Warren College students may pursue any of the departmental or interdisciplinary majors offered at UC San Diego. For details on the specific major department requirements, refer to the “Course, Curricula, and Programs of Instruction” section of this catalog.

A student may declare a double major upon the approval of both academic departments and the Warren College academic advising office. If the two majors are from noncontiguous disciplines, one Program of Concentration or Area Study from the third discipline will be required. If the two majors are from the same discipline, two Programs of Concentration or Area Studies will be required from each of the remaining noncontiguous disciplines.

Earl Warren College Individual Studies Major

This major is designed to meet the needs of students who have a definite academic interest for which a suitable major is not offered at UC San Diego. The student must submit a written proposal
explaining the merits of the program and why it cannot be accommodated within existing UC San Diego majors. The proposal must first be approved by a faculty advisor and then approved by the College Executive Committee of the Faculty.

**Minors**

In lieu of a Program of Concentration or Area Study, Earl Warren students may pursue a departmental minor to fulfill general-education requirements. An approved departmental minor applied toward the general-education requirement will be posted to the student’s official transcript. Upper-division courses taken for the departmental minor may not overlap with courses in the major, the Programs of Concentration, or the Area Studies.

**Pass/Not Pass Grading Option**

Programs of Concentration and Area Studies courses may be fulfilled by courses taken on the Pass/Not Pass basis. Major requirements and prerequisites are required to be taken on a graded basis. The total number of Pass/Not Pass units may not exceed one-fourth (25 percent) of a student's total UCSD units.

**Graduation Requirements**

To receive a B.A. or B.S. degree from Earl Warren College a student must:

1. Satisfy the University of California requirement in American History and Institutions, and the UC Entry Level Writing Requirement. (See “Undergraduate Admissions, Policies, and Procedures.”)
2. Fulfill the general-education requirements described above.
3. Complete one course in Cultural Diversity in U.S. Society, to be chosen from an approved list. This course may overlap with the major, the general-education requirements, or an elective.
4. Successfully complete a major chosen from those regularly offered at UC San Diego or, with prior approval, an Earl Warren College Individualized Study major.
5. Attain a minimum cumulative GPA of 2.0. Major GPA requirements may differ by department.
6. Satisfy the senior residency requirement that thirty-six of the last forty-five units passed must be completed as a registered Earl Warren College student.
7. Pass a minimum of 180 units for the B.A./B.S. degree. A minimum of 60 of these units must be taken at the upper-division level.

**Transfer Students**

For students who completed their lower-division general-education requirements at an accredited four-year college or students who completed a systemwide or campuswide approved core curriculum in a California community college prior to entering UC San Diego, the only additional general-education requirements are three upper-division courses noncontiguous to the discipline of the major. For these students, the cultural diversity graduation requirement, #3 above, is waived. All other transfer students must complete the Earl Warren College general-education requirements (see “Earl Warren College” in the section “General Education Requirements”).

**Warren College Honors Program**

The Warren College Honors Program offers students educational, cultural, and social experiences designed to broaden their intellectual interests. The activities vary annually and are planned to foster student interaction and promote a sense of community. Entering freshmen with a high school GPA of 3.8 or above and SAT I scores of 700 reading/700 math/700 writing, or the ACT equivalent, are eligible to participate in the Honors Program. Students remain in the program until thirty-six units of UC San Diego credit are completed. In all subsequent quarters, students must maintain a cumulative UC San Diego GPA of 3.7. Students who do not qualify for the Honors Program at the time of admission, and all transfer students, may join as soon as a cumulative GPA of 3.7 is attained on twelve or more units completed at UC San Diego.

**Warren College Scholars Seminar**

Freshmen who meet the Warren College Honors Program requirements may qualify for admission to the Scholars Seminar by submitting a writing sample. Students who are invited to participate in the two interdisciplinary seminars enroll in Warren 11A-B. The seminars replace the required Warren College writing courses (WCWP 10A-B) and must be taken for a letter grade.

**Warren College Interdisciplinary Programs**

**Law and Society**

The Law and Society Program at UC San Diego offers courses, speakers, and events that emphasize the interrelationship and complexity of legal, social, and ethical issues in their historical context. The interdisciplinary minor offers students the opportunity to examine the role of the legal system in society and study specific legal issues from the perspectives of the social sciences and the humanities. Students benefit from the program by learning how to analyze and understand legal implications related to policy and decision making. The program is administered by Warren College and is open to all undergraduate students with an interest in law.

**Health Care—Social Issues**

The Health Care—Social Issues Program at UC San Diego is designed to enhance student competence in analyzing complex social and ethical implications related to health care issues by offering an interdisciplinary minor, events, and speakers from a wide range of disciplines. Students gain an understanding of how the economy, culture, and social and psychological processes affect modern health care. The program is administered by Earl Warren College and is available to all students with a general interest in health care.

**Educational Enrichment**

Students are encouraged to earn credit toward graduation by studying abroad through the University of California’s Education Abroad Program (EAP).

Earl Warren College offers students an option to complete an EAP Program of Concentration with an emphasis in either humanities/fine arts or social sciences.

EAP participants study in over 150 institutions in thirty-five countries. Students may choose to study abroad for a full academic year or for a shorter term. Most EAP programs require a minimum 2.5–3.0 cumulative GPA and junior standing at the time of participation.

**Academic Internship Program**

Earl Warren College administers an Academic Internship Program available to students from all six colleges. The program is based on the conviction that quality education results from a combination of classroom theory and practical experience. Participants volunteer or intern full- or part-time for a public or private organization. Placements match students’ major areas of academic study and correlate with their career goals. Students may enroll for four, eight, or twelve units per quarter, with a maximum of three internships and/or sixteen units of internship credit. Although most placements are in the San Diego area, the Academic Internship Program is international in scope and varied in offerings. Students might work for a senator in Washington; the governor in Sacramento; a legal-aid office in Los Angeles; a business, T.V. station, research lab, or social service agency in San Diego; a public relations firm in London; or any number of other possibilities. Working closely with faculty advisors, students complete research papers or research projects that integrate their academic backgrounds and internship experience. For more information, see “Academic Internship Program” in the Index.

**Honors**

Quarterly provost’s honors, honors at graduation, departmental honors, and Phi Beta Kappa honors are awarded. For additional information, see “Honors” in the Index.
Eleanor Roosevelt College (ERC), formerly known as Fifth College, was established in 1988 and is currently home to almost 3,500 men and women. In 1994, the College was named after Eleanor Roosevelt, affirming the connection between the College’s educational program and Mrs. Roosevelt’s legacy as one of the most influential figures of the twentieth century. During the Great Depression and World War II, Mrs. Roosevelt traveled widely in the United States and abroad to understand and propose solutions to social problems and political conflicts. Throughout her life, she was an active champion for civil and social rights in the U.S. She carried that experience into her role as the leading architect of the United Nations Universal Declaration of Human Rights, adopted by the United Nations in 1948. She earned worldwide respect and became known as the “First Lady of the World.”

Eleanor Roosevelt College proudly embraces Mrs. Roosevelt’s legacy and has as its primary goal the education of students with a global vision. Consistent with the College’s motto of Developing World Citizens through Scholarship, Leadership and Service, the general education program is designed to prepare students to be effective contributors to their professions and citizens of a rapidly changing world. The core curriculum of the college exposes students to a variety of academic disciplines, providing a foundation in critical thinking, writing, and analysis that is suitable for all career aspirations. The program develops students’ intellectual capacities, expands general knowledge, and strengthens foundational skills. Students have many choices within the program’s structured framework.

Eleanor Roosevelt College serves students interested in pursuing academic excellence in any of the over 150 majors offered at UC San Diego. The general education program in tandem with majors in all academic divisions (engineering, social sciences, physical and biological sciences, the arts and humanities) prepares students to work effectively in any professional environment. Students planning postgraduate study in fields as diverse as medicine, business, law, public policy, and traditional doctoral programs will be well prepared by the combination of strong training in the major and the broad curriculum of the college.

ERC combines an academic program with student life programs that help students engage in thoughtful leadership and meaningful service. In the college’s supportive community, students are valued and respected. They are challenged and helped to succeed as they make the transitions to college and the world beyond.

**General Education**

The general-education requirements at ERC are designed to provide all students with a broad intellectual foundation. The curriculum offers undergraduates opportunities to learn about the various fields that may be open to them, thus assuring that their choices in selecting a major, pursuing graduate study, or seeking employment will be based on clear understandings about the nature of the work and their own interests and talents.

**Advanced Placement Credits**

University credit may be granted for College Board Advanced Placement Tests on which a student earns a score of 3 or higher. The credit may be applied toward general-education requirements (approximately half of which can be met by Advanced Placement credit), elective units for graduation, as subject credit for use in a minor, or as a prerequisite to a major. For further details, see the advanced placement chart in “Undergraduate Admissions, Policies and Procedures.”

ERC academic counselors provide information about advanced placement or courses that meet the general education requirements of the college. Students should take advantage of the counseling available in the Academic Advising Office to help them effectively incorporate the college general-education requirements into their academic program.

**ERC General-Education Requirements for Students Entering as Freshmen**

**The Making of the Modern World (six quarters)**

This interdisciplinary sequence of six courses incorporates humanities (literature, history, and philosophy) and social sciences as well as writing. The courses examine Western and non-Western societies, cultures, and state systems both historically and comparatively. The Making of the Modern World (MMW) is taught by faculty from many disciplines, including anthropology, history, literature, political science, and sociology.

**Natural Sciences (two quarters)**

Two courses are to be chosen from selected offerings in biology, chemistry, physics, and/or earth sciences.

**Quantitative Methods (two quarters)**

Two courses are to be chosen from selected offerings in pre-calculus, calculus, statistics, symbolic logic, or computer programming.

For students majoring in scientific fields, these courses are preparation for major study; for students who will continue their studies outside the sciences, they provide a basic understanding and appreciation of methods and developments in the fields. Many of the selected courses are designed for non-science majors.

**Foreign Language (zero to four quarters)**

ERC students are required to demonstrate basic conversational and reading proficiency in a modern foreign language, or advanced reading proficiency in a classical language, by completing the fourth quarter of foreign language instruction (or equivalent) with a passing grade.

Students may also complete this requirement by demonstrating advanced language ability on a special proficiency exam. Students considering this option should consult with an ERC academic counselor during their first year at UCSD.

Advanced placement scores in language or literature, and IB scores in language, may exempt students from all or part of the ERC language requirement.

College-level language study is a prerequisite for study abroad in most non-English speaking countries and enhances understanding of those societies. Students wishing to study abroad in non-English speaking countries may need to take additional language classes, and will need to take all language courses for letter grades.

**Fine Arts (two quarters)**

Two four-unit courses are required, to include study of both Western and non-Western music, theatre, dance, and/or visual arts. These courses help students appreciate the rich range of human expression to be found in cultures and ages other than their own.

**Regional Specialization (three quarters)**

Each ERC student selects three courses dealing with a single geographic region of the world. The college has defined regions broadly enough to assure course availability and narrowly enough to ensure coherence of subject matter. These courses may be chosen from offerings in humanities, social sciences, and fine arts. At least two of the three must be taken at the upper-division level. See “Minors” below about application of this course work to an optional ERC minor.
Upper-Division Writing Requirement
To demonstrate competency in written English at the upper-division level, students submit to the Academic Advising Office a paper or papers of specified lengths that were written for one or more upper-division courses and graded C– or higher.

Pass/Not Pass Grading Options
1. Courses that meet the following ERC general-education requirements may be taken Pass/Not Pass: fine arts, foreign language, natural sciences, quantitative methods, and one regional specialization course. All other general-education courses must be taken for letter grades.
2. No more than 25 percent of total UCSD units counted in satisfaction of degree requirements may be taken on a Pass/Not Pass basis.
3. Electives may be taken on a Pass/Not Pass basis except if they are to be applied to majors or minors. Check with the appropriate department or college for rules applying to specific majors or minors.

Sample Program
A program like the sample one shown here would lead to completion of most general-education requirements during the first two years of college. Some variation will occur depending upon a student’s academic preparation, choice of major, and individual interests and priorities. For example, students planning to major in science, math, or engineering will be taking many prerequisite courses for their major; those courses typically also fulfill the general-education requirements in natural sciences and/or quantitative methods.

Leadership and Community
ERC students are recognized for their strong sense of community. These bonds are created in part by common classroom experiences in MMW. They also grow from shared explorations in a variety of college programs in which students take active roles: college and campus-wide student government, service to the campus and the larger community, the acquisition of leadership skills, and sports and social activities.

The college is home to UCSD’s International House, which offers informative and dynamic discussions for the campus community at its weekly International Affairs Group meetings. ERC also hosts (with the Programs Abroad Office) a retreat each fall to welcome back study abroad returnees from all six colleges and assist with their re-integration into the UCSD community.

Transferring to ERC
Transfer students may meet most ERC general-education requirements before entering UCSD if they have followed articulation agreements with community colleges, or taken courses elsewhere that ERC deems equivalent in content to UCSD courses that meet their requirements.

All transfer students must take three quarters of MMW, and it is recommended that these courses be taken in sequence. Students who have not met their freshman writing requirement elsewhere must complete it by taking MMW 2 and/or MMW 3 as part of this three-course requirement.

All transfer students must also take two upper-division regional specialization courses and satisfy the upper-division writing requirement. See “Graduation Requirements” below.

ERC Honors Program
The Freshman and Sophomore Honors programs at ERC have been established to provide exceptionally motivated and capable students with enhanced educational experiences in association with faculty and other honors students.

Selected new students are invited to enroll in the Freshman Honors Seminar. During fall quarter, students meet with a variety of faculty members to learn more about their research and about academic enrichment opportunities at UCSD. Seminar members also participate in other enriching academic and cultural events.

The Freshman Honors Seminar continues during winter quarter (and some years through spring quarter) with faculty speakers who focus on international themes. In winter (and spring) quarters, these seminars carry one unit of credit each (ERC 20). See “Eleanor Roosevelt College” in the department listings.

Sophomores who have earned cumulative grade-point averages (GPAs) of 3.5 or higher have opportunities to pursue independent study with individual faculty for credit (ERC 92). See “Eleanor Roosevelt College” in the department listings.

Additional honors opportunities are offered in MMW. Students with excellent grades in MMW 1, 2, and 3 and high cumulative GPAs are eligible to take honors sections of MMW (4H, 5H, and 6H). These students attend regular MMW lectures and meet in separate honors discussion sections. They also attend special guest lectures and enrichment activities related to course content.

At the upper-division level, students may qualify to enroll in honors programs offered by their major departments. These programs usually include research under the direction of a faculty mentor and the writing and presentation of an honors thesis.

Honors Recognition
Students who earn a quarter GPA of 3.5 or higher are notified of having achieved Provost’s Honors. Students who maintain GPAs of 3.5 or higher for a full academic year are awarded Provost’s Honors certificates.

Every spring, ERC holds an academic honors recognition event to which high achieving students are invited, and graduating seniors are encouraged to invite individual faculty as their guests.

Also each spring, UCSD’s chapter of the Phi Beta Kappa Society invites to membership seniors who have demonstrated outstanding academic achievement (3.65 GPA), breadth in their academic programs (including humanities, language, and quantitative methods), and good character, among other criteria. See “Phi Beta Kappa” in the index.

At Commencement, ERC graduates with extraordinarily outstanding overall academic records are named Provost’s Scholars. Graduates with final cumulative GPAs equivalent to approximately the top 14 percent of UCSD graduates become eligible for University Honors and receive their degrees Cum Laude (with honors), Magna Cum Laude (with high honors), or Summa Cum Laude (with highest honors).

Majors
An ERC student may pursue any of the approximately 150 undergraduate majors offered at UCSD. Students may complete more than one major, provided they comply with all Academic Senate regulations concerning double majors. To declare a double major, a student must have accrued at least ninety but no more than 135 units, have at least a 2.50 GPA, and meet university requirements regarding total maximum number of units earned and quarters attended at UCSD.

Most majors require the completion of specified “pre-major” or prerequisite courses at the lower-division level before enrollment in upper-division major courses. For some majors, admission to upper-division course work is contingent upon a satisfactory GPA in certain pre-major courses. Students are strongly encouraged to work closely with department advisors as well as college academic counselors to assure adequate and timely preparation for their majors.

Completion of certain majors may take more than four years or the minimum 180 units required for graduation. Time-to-graduation in
other instances may be affected by a student’s level of preparation for upper-division work in the major or by a decision to change major. See “The Undergraduate Program(s)” in respective department listings.

**ERC Individual Studies Major**

ERC offers an Individual Studies major to meet the needs of students who have defined academic interests for which suitable majors are not offered at UCSD. Students who find themselves in this situation should consult a college academic counselor at the first opportunity.

This major includes regular course work and often independent study, representing a minimum of twelve upper-division four-unit courses. A regular member of the faculty serves as advisor to the student. Students admitted to the Individual Studies major may enroll in ERC 199, an independent study course supervised by a faculty member, who tailors the content to fit the major.

Qualifying seniors pursuing an Individual Studies major may undertake an honors thesis research project (ERC 196) under the tutelage of their faculty mentor. See “Eleanor Roosevelt College” in the department listings.

Further information about an Individual Studies major may be obtained from the ERC Academic Advising Office.

**Minors and ERC Special Minors**

Minors are not required at ERC. However, completion of a minor can be an educational or pre-professional asset. All students have the option of completing any approved departmental or interdepartmental minor.

Alternatively, students may wish to combine foreign language course work with an associated regional specialization to earn an ERC Special Minor in, for example, Asian Studies or Middle Eastern Studies. Such minors must conform to Academic Senate policies. For students entering the University before January 1998, this means completion of at least six courses (twenty-four units), of which at least three (twelve units) must be at the upper-division level. Students entering in January 1998 or later must complete at least seven courses (twenty-eight units), of which at least four (sixteen units) must be at the upper-division level. Upper-division courses applied toward a minor may not be used to meet the requirements of the major.

**International Migration Studies Minor**

Eleanor Roosevelt College and the Center for Comparative Immigration Studies jointly host the only International Migration Studies minor in the country. It focuses on one of the most significant social, economic, and political influences in the modern world—the voluntary and forced flow of people across international borders and the dispersal of cultural communities around the world. The minor, open to students from all colleges, enables students to understand how migration has historically shaped different societies and economies as well as the policies governments have adopted to control population movements. Requirements include seven courses from a list of approved courses, at least five of which must be upper division. Students may pursue one of three tracks for the minor: course work (seven courses from a list approved for the minor); a combination of courses and an approved, related internship; or field research (participation in the Mexican Migration Field Research program or courses and an independent research project). The research track affords students an excellent opportunity to work closely with faculty, learning the craft of research and writing a report. Students in the Mexican Migration Field Research program co-author a published book on each year’s project. For details on the minor, see “International Migration Studies.”

**Human Rights Minor**

The purpose of the Human Rights minor is to encourage students to treat human rights as an intellectual and practical question. Students will engage openly with the history and the implementation of human rights, explore its origins and trajectory, the passions it arouses, and the range of its influences and effects. The development and multiple meanings of human rights, its institutional advocates and adversaries, and the attendant moral dilemmas are all recognized today as topics of profound interest and objects of study. Many of the courses in the minor have a clear international content, but a good portion has a U.S. or comparative approach. This program helps to prepare students for a career in research and teaching, and working in NGOs that advocate for and monitor human rights compliance, government agencies, or law.

To receive a minor in Human Rights, a student must complete seven four-unit courses (twenty-eight units)—including two required courses (HMNR 100 and HMNR 101)—and five courses from the list of approved courses, at least two of which should be from the list of Core Courses. Since the Human Rights minor is an interdisciplinary program, students are allowed to take no more than three courses in any one department. The Human Rights minor is administered by Eleanor Roosevelt College in cooperation with the Institute for International, Comparative, and Area Studies (IICAS).

**Study Abroad**

Students whose interests extend beyond our borders are encouraged and assisted in finding opportunities to spend part of their college career in another country. There are many options, including short-term or year-long academic programs, work opportunities, and career-related internships.

At one time or another, men and women from ERC have studied in more than forty different countries in Europe, Africa, Latin America, the Middle East, and Asia. Students on university financial aid who participate in the UC Education Abroad Program pay UCSD fees and retain their financial aid packages, which are budgeted to include study abroad expenses. In addition, there are a number of sources for scholarship aid designated for study abroad.

**Internships**

Internships, whether for credit, pay, or experience, can be a useful part of a student’s undergraduate experience. They offer an opportunity to apply classroom learning, develop pre-professional experience and networks, and test out possible career paths. Students can find internship placements through the Academic Internship Program (AIP) which offers credit-bearing opportunities in San Diego, Washington D.C., and many other locations. Alternatively, the UCDC and UC Sacramento programs combine course work and internships in those two capital cities. Finally, through Career Services, students can identify paid and service internships. Some internships require upper-division standing. For details on each program, see separate listings in the catalog.

**Graduation Requirements**

To graduate with a baccalaureate degree from the University of California, an Eleanor Roosevelt College student must:

1. Satisfy two University of California requirements: the Entry Level Writing requirement in English composition and the American History and Institutions requirement. See “Undergraduate Admissions, Policies and Procedures.”

2. Fulfill the ERC general-education requirements as described.

3. Complete an approved departmental or interdepartmental major, meeting all requirements as specified by the major department or program.

4. Satisfy the senior residency requirement that thirty-five of the final forty-five units must be completed as a registered UCSD student. Students studying abroad in their senior year may petition to have this requirement waived.

5. Complete and pass a minimum of 180 units for the Bachelor of Arts or Bachelor of Science degree. At least sixty of those (fifteen courses) must be at the upper-division level. The B.S. degree is awarded in biology, physics, cognitive science, chemistry, earth sciences, management science, and designated engineering and psychology programs; the B.A. is awarded in all other majors.

6. Earn a cumulative GPA of 2.0 or higher.
Sixth College

http://sixth.ucsd.edu

Sixth College, the newest of UC San Diego’s six undergraduate colleges, draws on its theme, Culture, Art, and Technology, to meet the lifelong educational needs of students in the twenty-first century. New global challenges demand new approaches to visualization, problem solving, information handling, and communication across cultural and disciplinary boundaries. Intellectual flexibility; creative, critical thinking; ethical judgment; fluency in assessing and adapting to technological change; and the ability to engage effectively in collaboration with others from a wide range of backgrounds will be critically important to our graduates. To help prepare our students for the future, Sixth College offers an integrated learning environment that emphasizes collaborative learning; creative imagination; interdisciplinary inquiry; and written, visual, kinetic and auditory investigation, argument, and expression. Students will learn to use digital as well as traditional communication and research tools. The college is committed to help students develop skills necessary for lifelong learning, including self-reflection with information technology and the crucial ability to learn from experts.

Sixth College offers students opportunities to explore its theme, Culture, Art, and Technology, both within its academic program and through non-classroom based programs that provide our students with learning, work, and research experiences both on and off campus.

Sixth College challenges students to examine the multidimensional interactions between culture, art, and technology in order to imagine the future and create new forms of inquiry and communication. Teamwork, artistic expression, interdisciplinary ways of thinking and knowing, and multicultural awareness are core educational goals.

Sixth College students will be encouraged to engage with the outlying community through the practicum. More than an ethical obligation to service, such an engagement is integral to the process of learning to listen across cultures and to consider implications of diverse agencies of change. Sixth College is committed to pioneer meaningful application of evolving technologies inside and outside the classroom. For example, wireless communication technology is incorporated into the very design of this college’s physical infrastructure and curricular planning, allowing Sixth College to pioneer new teaching, communication, community, and lifelong learning paradigms. On campus and off, students will be linked in many ways—by digital media, by team-based course and extracurricular projects and learning exercises, by social and local community engagement (e.g., practicum project), and by diverse cultural and intellectual events that seamlessly connect many aspects of residential life and student affairs programming with the college curriculum. All these linkages help ensure that Sixth College students have the opportunity to develop, learn, and act as integral members of a local and larger community.

Culture, Art, and Technology

All students will take a three-quarter core sequence titled Culture, Art, and Technology (CAT). CAT is a highly interdisciplinary sequence integrating learning in arts and humanities, social sciences, and science and engineering. It introduces students to thinking across disciplines so they can identify interactions, recognize patterns, and provide opportunities for learning by inquiry in a collaborative environment. Exercises and instruction that develop fluency with information technology and information literacy, as well as writing and communication skills, will be embedded in the core sequence.

Practicum

Sixth College Practicum program is an opportunity to put education in action. The practicum is an academic learning experience in which students address a real-world problem by undertaking a project. Under faculty mentorship, the students plan, execute, and reflect upon the project and their effectiveness. The practicum reflects Sixth College’s commitment to form bridges with the UCSD campus units and to San Diego’s communities, to engage students in communal issues, and to foster students’ ethical obligation to service.

General-Education Requirements

The Sixth College breadth requirements have three primary goals: (1) to produce comprehensive knowledge and connections, (2) to encourage creative imagination, and (3) to accomplish these activities from an ethically informed perspective. The aim is to allow students to discover the richness of UCSD’s academic life and to see relationships among the sciences, social sciences, engineering, arts, and the humanities. Because Sixth College emphasizes cross-disciplinary ways of thinking, it is critical for students to appreciate the different modes of inquiry within academic disciplines. For information about courses available to satisfy the general-education requirements, please visit the academic advising office in the Sixth Administration Building or check the Web site at http://sixth.ucsd.edu.

1. Culture, Art, and Technology: Three courses. Core Sequence CAT 1, 2, and 3. Includes two (6 unit) quarters of intensive instruction in university-level writing.
2. Information Technology Fluency: One course. This requirement may be satisfied with courses from a variety of departments.
3. Modes of Inquiry: Seven courses. Two courses in social sciences, two courses in humanities, two courses in natural sciences, one course in math/logic (different options available for science and non-science majors).
4. Understanding Data: One course in statistical methods (different options available for science and non-science majors).
5. Societal and Ethical Contexts: Two courses. One course in ethnic or gender studies and one course in ethics.
6. Art Making: Two courses in two different artistic genres in literature, music, theatre (including dance), or visual arts.
7. Practicum: Upper-division students must complete a Practicum Project that extends outside the classroom, for which they will receive four units of credit. They must also take the Practicum Reflective Writing course (CAT 125), in which they write about their Practicum Project experience. See the Sixth College advising center for details.

Graduation Requirements

In order to graduate from Sixth College, all students must
1. Satisfy the University of California requirements in Entry Level Writing and American History and Institutions (See “Academic Regulations: UC Entry Level Writing Requirement”; and “American History and Institutions”).
To apply for the major, students must have completed at least sixty units of work at UCSD, including CAT 1, 2, and 3, have a minimum cumulative GPA of 3.25 and be in good academic standing. Transfer students must have at least one quarter of residence at UCSD. Students pursuing this major must be goal oriented and self-directed and must submit a written proposal explaining the merits of the program and why it cannot be accommodated within existing UCSD majors. The proposal must first be approved by two faculty advisors (a primary and secondary advisor) to ensure that students will have the opportunity to work closely with a faculty mentor throughout their undergraduate career at UCSD. Specifically:

- The major program must include a minimum of twelve four-unit upper-division classes from at least two different academic departments at UCSD. No more than nine courses can be completed in the same department.
- With prior approval, students will be allowed to use courses taken abroad under the Education Abroad Program (EAP) and Opportunities Abroad Program (OAP) toward their ISM.
- All major courses must be taken for a letter grade, and students must earn at least a C+ in each course to have it counted toward the major.
- A grade point average of 2.0 overall and in the major is required for graduation.
- No more than twelve units of Independent Study (199) may be used toward the major, including CAT 199, CAT 198, and CAT 197.
- The major must satisfy the residency requirements which states that nine of the twelve upper-division courses must be completed at UCSD.

**Pass/Not Pass Grading Option**

Some general-education requirements may be fulfilled by courses taken on the Pass/Not Pass basis. Sixth College students are reminded that major requirements and prerequisites must be taken on a graded basis. In accordance with University Academic Regulations, the total number of Pass/Not Pass units may not exceed one-fourth of a student's total UCSD units.

**Honors**

In addition to the College Honors Program (see under Sixth College), there are many types of Honors at UCSD.

- **Provost Honors**—Awarded each quarter based on completion of twelve graded units with a GPA of 3.5 or higher. For each year of Provost’s Honors, a certificate of merit is awarded.
- **Departmental Honors**—Outstanding students often enroll in departmental honors programs, and they may receive university honors at graduation. They may also be eligible to be invited to membership by the UCSD chapter of Phi Beta Kappa, the nation’s oldest, most respected academic honor society.

**Expanding Your Educational Horizons**

**Leadership and Community**

http://sixth.ucsd.edu/

Collaboration and connectedness are central values of Sixth College. These values are reflected in Sixth’s commitment to providing meaningful opportunities for students to contribute to the direction and evolution of UCSD’s youngest college. Student leadership opportunities include serving on the Sixth College Student Council or in campus-wide student governance roles. Additionally, students assume leadership in the Sixth community through service as resident advisors, orientation leaders, and members of the Sixth College Executive Committee. These opportunities and others not only contribute to shaping what Sixth College is and will become, but also foster the development of life skills that prepare students to be effective citizens and leaders in a world of ever increasing complexity and diversity.

**Undergraduate Research**

Research opportunities for undergraduates at UCSD

UCSD encourages all undergraduates to become involved in the research life of the university. Every academic department has opportunities for undergraduates to work with faculty on the cutting edge research projects for which UCSD is world-renowned. Working closely with faculty, students will deepen their knowledge and skills in areas of special academic interest, while experiencing what it means to be part of an intellectual community engaged in research. Information can be found through Undergraduate Research at UCSD: http://ugr.ucsd.edu; Academic Enrichment Program: http://aep.ucsd.edu/, and Summer Research Opportunities: http://sea.ucsd.edu/summer_research/

**California Institute for Telecommunications and Information Technology (Calit2)**

http://www.calit2.net/

Calit2 ensures that California maintains its leadership in the rapidly changing telecommunications and information technology marketplace. The
Pacific Rim Undergraduate Experiences (PRIME)
http://www.pragma-grid.net/PRU/index.htm

This undergraduate research program provides opportunities to participate in an international research and cultural experience that will prepare students for the global workplace of the twenty-first century. Students will live and work at an international host site either in Japan, Taiwan, China, or Australia, and gain greater cultural understanding of a new region.

Community Work

BIO-BRIDGE
http://BioBridge.ucsd.edu

Bio-Bridge combines biotech laboratory training, lecture, and group discussions to help college students communicate scientific concepts to high school and middle school students and underserved communities in San Diego. Students gain practical experience while working with the Bio-Bridge network to bridge the gap between progressive scientific research and the grade school science curriculum. UCSD students also engage in supervised group mentoring to middle school and high school students and teachers throughout the project.

PAL (Partners at Learning)
http://tep.ucsd.edu/service.shtm

PAL is the service-learning division of UCSD's Teacher Education Program. PAL classes give UCSD students meaningful opportunities to learn about and experience issues of equity and education in San Diego's K-12 schools. Through PAL, UCSD students serve as tutors and mentors in K-12 classrooms throughout San Diego County. Each year, PAL students contribute about 20,000 hours of service to underserved schools.

TIES (Teams in Engineering Service)
http://ties.ucsd.edu

TIES is a new and innovative academic program putting UCSD undergraduates and their technical and creative skills to work for San Diego nonprofit organizations. Multidisciplinary teams of UCSD students design, build, and deploy projects that solve technology-based problems for community partners.

Cultural Enrichment
The Center for Research in Computing and the Arts (CRCA)
http://crca.ucsd.edu/

CRCA is an organized research unit of UCSD whose mission is to facilitate the invention of new art forms that arise out of the developments of digital technologies. Current areas of interest include interactive networked multimedia, virtual reality, computer-spatialized audio, and live performance techniques for computer music and graphics. Through Sixth College's partnership with CRCA, students have opportunities to participate in special events, meet artists, and engage in research.

Arts6

Arts6 is a unique and powerful connection between ArtPower! (http://www.artpower.ucsd.edu/), UC San Diego's performing arts program, and Sixth College's theme of Culture, Art, and Technology. Arts6 provides opportunities for students to engage with diverse, world-renown artists through vibrant, challenging, multidisciplinary, and multimedia performances that explore ways in which art reveals and communicates what is significant and universal in contemporary society. Arts6 supports string quartet concerts at the college, workshops with professional artists, music listening parties with world-renown musicians, and heavily discounted performance tickets for Sixth College students.

Programs Abroad Office (PAO)
http://pao.ucsd.edu/pao/

Through the Programs Abroad Office, students can take advantage of a variety of international opportunities, including study, work, volunteer, and internship programs. Each year, UCSD sends about 1,000 students overseas. Students may choose from the University of California's system-wide Education Abroad Program (EAP) that has educational opportunities in thirty-five countries, or from the Opportunities Abroad Program (OAP) that links students with worldwide opportunities sponsored by organizations and universities other than the University of California.

Professional Preparation

Academic Internship Program (AIP)
http://aip.ucsd.edu/

The program offers qualified juniors and seniors the opportunity to acquire valuable work experience related to academic and career interests. Although most internships are in the San Diego area, the Academic Internship Program is national and international in scope, including the popular Washington, D.C., program and the London program. An extensive library lists more than 2,000 available internships in varied settings including, but not limited to, TV and radio stations; law offices; medical research labs and clinics; government agencies; high-tech and biotech companies; engineering, advertising and public relations firms; and financial institutions. Students also can work with the internship office to set up their own positions.

Departmental Internships

Most departments offer internships for their majors; the courses are numbered 197 (see individual departments for additional information).
Undergraduate Admissions, Policies, and Procedures

All communications concerning pre-applicant undergraduate admission for U.S. citizens should be addressed to:

Office of Admissions and Relations with Schools
Student Affairs
University of California, San Diego
9500 Gilman Drive, Dept. 0021
La Jolla, CA 92093-0021
E-mail: admissionsinfo@ucsd.edu
(858) 534-4831
http://admissions.ucsd.edu

Definitions

An application to the University of California, San Diego is processed and evaluated as a freshman or transfer, California resident; freshman or transfer, nonresident; or freshman or transfer, international applicant. See definitions below:

An Undergraduate Applicant
A student who wishes to complete a program of studies leading to a bachelor of arts or a bachelor of science degree.

A Freshman Applicant
A student who has graduated from high school but who has not enrolled since then in a regular session in any accredited college-level institution. This does not include attendance at a summer session immediately following high school graduation.

A Transfer Applicant
A high school graduate who has been a registered student in another accredited college or university or in college-level extension classes other than a summer session immediately following high school graduation. A transfer applicant may not disregard his or her college record and apply for admission as a freshman.

An undergraduate student can earn transfer credit upon successful completion of college-level work which the university considers consistent with courses it offers. Such credit may be earned either before or after high school graduation. The acceptability of courses for transfer credit is determined by the Office of Admissions and Relations with Schools.

For more information regarding transferring to UCSD call or write:
University of California, San Diego
Transfer Student Services
Office of Admissions and Relations with Schools
Student Affairs
9500 Gilman Drive, Dept. 0021
La Jolla, CA 92093-0021
(858) 534-4831
E-mail: transferinfo@ucsd.edu
http://prospective.ucsd.edu/go/transfer

A Nonresident Applicant
A student who lives outside the state of California and who is required to present a higher scholarship average than is required of California residents to be eligible for admission to the university, in addition to paying the nonresident tuition fees.

An International Applicant
A student who holds or expects to hold any nonimmigrant visa.

Educational Opportunity Programs

The Educational Opportunity Program (EOP) is a recruitment and academic support program established by the university to increase the enrollment of educationally disadvantaged and low-income students. Students are provided with pre-admission counseling, and academic and personal support services. EOP eligibility is based on family income level.

Services available to EOP students cover a broad range of needs. Recruitment and application-related services include pre-admission counseling, application fee waivers, application follow-up, and deferral of the Statement of Intent to Register fee. Academic support for EOP students is offered through the Office of Academic Support and Instructional Services (OASIS).

The method of applying is online at http://www.universityofcalifornia.edu/admissions/undergrad_adm/apply/apply_online.html. To apply for EOP, check the appropriate box in the UC application designated for the Educational Opportunity Program. Fill in the information requested in the application pertaining to family size and income, parental education level and occupation. This information is used in conjunction with other information from the admission application in determining eligibility for EOP.

Financial aid is available to eligible EOP students from the regular state, federal, and university sources administered through the UC San Diego Financial Aid Office at http://fao.ucsd.edu. Although EOP eligibility does not guarantee financial aid, the low-income ceilings for EOP eligibility mean that most EOP applicants should qualify for substantial financial assistance. Financial aid information is available from the UCSD Financial Aid Office. Admissions information can be sought from your high school or community college counselor or the Office of Admissions and Relations with Schools. For additional information about EOP eligibility requirements, program services, or general information regarding UCSD, call or write:
University of California, San Diego
Office of Admissions and Relations with Schools
Student Affairs
9500 Gilman Drive, Dept. 0021
La Jolla, CA 92093-0021
(858) 534-4831
E-mail: admissionsreply@ucsd.edu
http://admissions.ucsd.edu

Undergraduate Colleges and Majors

Colleges

Even though you may be uncertain about your major, your application for admission must include the name of the UC San Diego college with which you want to affiliate (Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt or Sixth College). You must indicate a second and third choice in the event your first choice college closes early. Applicants may be reassigned to another college by the Office of Admissions and Relations with Schools if enrollment quotas prohibit first choice. Applicants who do not indicate a UC San Diego college preference will be assigned a college.

In the “Choosing a College” section, which describes the educational philosophies of the six colleges at UCSD, you will find information concerning the requirements of each college. It is very important that you read that section of the catalog carefully, and that you decide which of the colleges is the right one for you.
You can also find information about UCSD’s six colleges, and much more, on the Web site of the Office of Admissions and Relations with Schools (http://admissions.ucsd.edu).

**Impacted Majors**

It sometimes becomes necessary to limit enrollment in certain majors. When this occurs the affected majors will be listed in the UC San Diego General Catalog as soon as possible. When the catalog does not reflect these conditions, newly admitted students will be notified of them in the university's admissions letter. Currently, the following majors are considered impacted for freshmen: aerospace engineering and mechanical engineering (both within the Department of Mechanical and Aerospace Engineering), bioengineering and bioengineering; biotechnology (both within the Department of Bioengineering), and all majors in the Division of Biological Sciences (biochemistry/cell biology; bioinformatics specialization; ecology, behavior and evolution; general biology; human biology; microbiology; molecular biology; physiology and neuroscience). Freshmen considering applying to these majors must also select an alternate major on the UC application. Students admitted to UC San Diego who are not admitted directly into one of these majors will be admitted into their alternate major, provided it is not impacted.

Entering freshmen who have indicated the desire to major in aerospace or mechanical engineering, in bioengineering or bioengineering; biotechnology, or in any Biological Sciences major will be further evaluated based on their Comprehensive Review. This does not apply to transfer students wishing to declare one of these impacted majors until 2011. However, transfer students are strongly recommended to complete their major preparation classes for success in their chosen major.

Continuing UC San Diego students who wish to transfer into one of the majors designated as being impacted should have completed at least one year/three quarters in residence at UC San Diego and have completed all lower-division requirements for the requested major. A target number of applications will be accepted two times per year and applicants will be ranked by their UCSD overall GPA on the date of the application. For the 2009–10 academic year, eligible continuing students will be admitted into the major based on the GPA ranking system.

**Pre-Majors**

The following majors admit freshmen to pre-major status only: bioengineering; premedical, human development, literature/writing, and math-computer science.

As a pre-major, you must satisfy all pre-requisites before admission to the major. The set of conditions, determined on a department-by-department basis, and approved by the San Diego Committee on Educational Policy, is explained in detail under the department listing in this catalog.

Other departments may be approved to offer pre-majors by the Committee on Educational Policy subsequent to this publication. Please refer to "Major Fields of Study" in the introduction to the catalog.

**Undergraduate Admissions**

**Minimum Requirements**

The university’s minimum undergraduate admission requirements, which are the same on all University of California campuses, are based on three principles. They are: (1) the best predictor of success in the university is high scholarship in previous work; (2) the study of certain subjects in high school gives a student good preparation for university work and reasonable freedom in choosing an area for specialized study; and (3) standardized assessment tests provide a broad base for comparison, and mitigate the effects of differing grading practices.

The academic requirements for admission are minimum entrance standards. Students admitted to UCSD are chosen from a large number of highly competitive applicants, most of whom will have greatly exceeded the minimum requirements. Therefore, selection depends on additional factors.

Academic preparation is the principal basis for gaining admission to UC San Diego. Students are encouraged to pursue the most rigorous academic curriculum possible, including honors and Advanced Placement (AP) courses, in order to prepare for the university experience. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of courses. Overall performance must be well above minimum requirements in order to admit you to the campus and major of your choice.

**UC San Diego Admission Policy and Selection Criteria**

The undergraduate admission policy at the University of California, San Diego is designed to select a highly qualified and diverse student body. As a major public institution of higher education serving the teaching, research, and public service needs of California, UC San Diego strives to reflect the diversity of the population of the state. This undergraduate admission policy has been developed by the San Diego campus in compliance with the University of California Policy on Undergraduate Admissions that "seeks to enroll a student body that, beyond meeting the University’s eligibility requirements, demonstrates high academic achievement and exceptional personal talent, and that encompasses the broad diversity of California."

**Freshman Selection**

The number of applicants to UCSD far exceeds the number of spaces available, and it has become necessary to adopt standards which are much more demanding than the minimum requirements to admit students. The San Diego campus has developed the following procedures for the selection of applicants to be admitted from its pool of eligible candidates:

**Comprehensive Review**

All UC eligible applicants will receive a review which considers a combination of factors—aesthetic, personal characteristics, and achievement, including:

- Uncapped grade-point average (maximum of eight semesters of approved honors, AP/IB HL, or UC-transferable college-level courses)
- Scores of all required examinations
- Number of "a-g" courses beyond the minimum specified for UC eligibility
- Eligibility in the Local Context (ELC)
- Educational environment
- Low family income
- First-generation college attendance
- Demonstrated leadership
- Special talents, achievements, and awards
- Volunteer/community service
- Sustained participation in educational preparation programs
- Special circumstances and/or personal challenges

Academic achievement constitutes approximately 75 percent of the overall comprehensive review score. Applicants with the highest level of academic, personal characteristics, and achievement will be admitted in sufficient numbers to meet UCSD’s enrollment goals.

**Advanced-Standing Selection**

Admitted applicants will be selected primarily on the basis of academic performance, as assessed by review of the GPA in all UC-transferable courses and the total number of UC-transferable units completed one full term prior to the initial quarter of attendance at UCSD.

Applicants who have satisfactorily completed sixty transferable semester units (ninety quarter units) one full term prior to the term of admission will be considered for admission. California community college applicants must have a competitive GPA (based on the strength of the applicant
pool) in UC-transferable courses. Highest priority for admission is given to upper-division transfer students from California community colleges, followed by upper-division transfer students from other UC campuses, upper-division California resident transfer students from other two-year or four-year institutions, and upper-division transfer students who are not residents of California.

At least 95 percent of UCSD’s transfer students come from California community colleges. A California community college applicant is defined as follows: a student who was enrolled at one or more California community college campuses for at least two terms, excluding summer sessions; the last college attended before admission to UCSD was a California community college; and the student has completed thirty semester (forty-five quarter) UC-transferable units at one or more California community colleges.

**Admission as a Freshman Applicant**

**Minimum Requirements**

To be eligible for admission to the university as a freshman you must meet the high school diploma requirement, the subject requirement, the scholarship requirement, and the examination requirement, which are described below.

**High School Diploma Requirement**

You must earn a diploma from a high school in order to enter the university as a freshman. The Certificate of Proficiency, awarded by the California State Department of Education upon successful completion of the High School Proficiency Examination, proficiency tests from other states, and the General Education Development (GED) certificate, will be accepted in lieu of the regular high school diploma. Subject, scholarship, and examination requirements discussed below must also be met.

**Subject Requirement**

A student applying for admission as a freshman to the University of California must have completed a minimum of fifteen units of high school work during grades nine through twelve. At least seven of the fifteen units must have been earned in courses taken during the last two years of high school. (A one-year course is equal to one unit; a one-semester course is equal to one-half unit.)

These units must have been earned in academic or college preparatory courses, as specified below. Lists of approved courses are compiled by the UC Office of the President for high schools in California. Lists are specific to each high school and are available through your high school’s counseling office, and on the Web site (http://www.ucop.edu/a-gGuide/ag/a-g/welcome.html). A detailed description of the “a–g” requirements can be found at http://pathststat1.ucop.edu/ag/a-g.

Applicants from high schools outside California may find the following guidelines helpful in determining acceptability of courses.

**Specific “a–g” Course Requirements**

(a) **HISTORY/SOCIAL SCIENCE**

Two units (equivalent to two yearlong courses or four semesters) are required. Course work must include:

- World History, Cultures, and Geography—One year, which can be met by a single integrated course or by two one-semester courses; and
- U.S. History/American Government (Civics)—One year of U.S. History, or one-half year of U.S. History combined with one-half year of American government (civics)

(b) **ENGLISH**

Four units (equivalent to four yearlong courses or eight semesters) of college preparatory composition and literature are required. Both reading and writing components must be included in the courses.

- Reading—Acceptable courses must require extensive reading of a variety of literary genres, including classical and/or contemporary works. Reading assignments must include full-length works. Excerpts from anthologies, articles, etc., can be supplemental but cannot constitute the main component of reading assignments.
- Writing—Courses must also require substantial, recurrent practice in writing extensive, structured papers. Student must demonstrate understanding of rhetorical, grammatical, and syntactical patterns, forms, and structures through responding to texts of varying lengths in unsupervised writing assignments.

(c) **MATHEMATICS**

Three units (equivalent to three one-year courses) of college preparatory mathematics are required. Four units are strongly recommended.

- Elementary Algebra
- Geometry—Courses must include topics in two- and three-dimensional geometry.
- Advanced Algebra

(d) **LABORATORY SCIENCE**

Two units (equivalent to two one-year courses) of laboratory science are required (three units are strongly recommended) by a course that either

1. Covers the core concepts in one of the fundamental disciplines of biology, chemistry, or physics; or
2. Has as a prerequisite of biology, chemistry, or physics, and builds upon that knowledge. Such a course may include elements of another scientific discipline.

(e) **LANGUAGE OTHER THAN ENGLISH**

Two units (equivalent to two one-year courses) of course work in a single language. Three units are recommended.

Minimum Performance Objectives—Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, and composition. At this level, emphasis should not be on the ability to describe grammatical features of the language. The minimum performance objectives after two years of high school study should be the following:

- The ability to sustain a brief conversation on simple everyday topics demonstrating good use of the whole sound system (good pronunciation), and the basic structural patterns in the present, past, and future tenses, the subjunctive, and commands.
- Summarize orally and in writing, the main points of a relatively simple reading passage not involving specialized vocabulary.

Classical languages (Latin, Greek) and American Sign Language (ASL) are acceptable to fulfill the (e) requirement.

(f) **VISUAL AND PERFORMING ARTS (VPA)**

One year-long approved arts course from a single VPA discipline: dance, drama/theater, music, or visual art.

Intention—To provide a meaningful experience and breadth of knowledge of the arts. Approved VPA courses must be directed at acquiring concepts, knowledge, and skills in the arts disciplines.

Prerequisites—Acceptable courses need NOT have any prerequisite courses.

- Co-Curricular Work—Work outside class must be required: for example, portfolio/performance preparation, reading, writing, research projects, and/or critical listening/viewing.
- Course Standards—Courses should provide students with an experience that implements the intent of the California State Board of Education approved Visual and Performing Arts (VPA) Content Standards. Each VPA course shall sufficiently address the state content standards under all five component strands:
  1. Artistic Perception
  2. Creative Expression
  3. Historical and Cultural Context
  4. Aesthetic Valuing
  5. Connection, Relations, and Application

(g) **COLLEGE PREPARATORY ELECTIVE COURSES**

One unit (equivalent to two semester courses) is required. Course(s) can be taken in 9–12 grades but must fall within the following subject areas: visual and performing arts (non-introductory-level courses), history, social science, English, advanced
that are designed to meet state-mandates social studies graduation requirements are acceptable provided that they meet the above criteria. Courses with applied, service, or career-related content are acceptable only if those components are used to augment the strong academic content of the course.

**English:** Courses should require substantial reading with frequent and extensive practice in writing that is carefully evaluated and criticized, as noted in the "b" English requirement (above). Courses in journalism, speech, debate, creative writing, or advanced-level ESL are acceptable electives if they meet the general requirements in reading and writing stated above.

**Advanced Mathematics:** Courses with second-year algebra as a prerequisite such as trigonometry, linear algebra, pre-calculus (analytic geometry and mathematical analysis), calculus, probability, and statistics are acceptable. A computer science course is acceptable if it fulfills the following objectives: (1) enables students to express algorithms in a standard language; (2) requires students to complete substantial programming projects; and (3) involves the study and mastery of various aspects of computer science (e.g., how computers deal with data and instructions, the internal components of a computer, and the underlying computer logic).

**Laboratory Science:** Acceptable courses should cover topics from the biological or physical sciences and include laboratory activities. A terminal course designed only to meet graduation requirements is not acceptable.

**Language Other Than English:** Elective courses in the same language used to satisfy the "e" requirement must have at least two years of the language as a prerequisite. In order for a second language other than English to qualify as an elective, at least two years of this language must be completed.

**Writing Requirement**

As a UC undergraduate, you must demonstrate proficiency in writing. Admitted students who do not meet the Entry Level Writing requirement (previously known as the Subject A requirement) prior to April 1 are required to achieve a passing score on the UC Analytical Writing Placement Examination (previously known as the Subject A Examination). Notice of this exam will be sent to all admitted students from the Educational Testing Service. There will be a $70 fee.

### Freshman Eligibility

**California Residents**

(Reference also to "Admission as a Freshman Applicant")

Please be advised that these are minimum eligibility requirements. The San Diego campus has been unable to accommodate all minimally
eligible applicants. You must exceed these require-
ments in order to be considered for admission.
See “UC San Diego Admission Policy and Selection
Criteria.”

Eligibility Index: You must earn the required
combination of GPA and college admission test
scores as specified in the University’s Eligibility
Index. Beginning with the fall 2007 term, California applicants must earn at least a 3.0 (3.4
for nonresidents) in their “a–g” courses to meet the
Scholarship Requirement.

The index, along with an online calculator you
can use to assess your eligibility, is available at
http://www.universityofcalifornia.edu/admissions/
scholarshipreq.

Non-California Residents
(Minimum Requirements)
(Refer also to “Admission as a Freshman Applicant”
and “Freshman Eligibility: California Residents.”)

Please be advised that these are minimum eligibility requirements. The San Diego campus
has been unable to accommodate all minimally
eligible applicants. You must exceed these require-
ments in order to be considered for admission.
See “UC San Diego Admission Policy and Selection
Criteria.”

Scholarship: An applicant who is not a resident
of California is eligible to be considered for admis-
sion to the university with a grade-point average
of 3.40 or better, calculated on the required high
school subjects and achieve a correlating test
score indicated in the Eligibility Index (p. 37) for
Nonresidents. These subjects, referred to as “a
through g,” are the same for the nonresident as for
the resident.

High school Advanced Placement courses and
UC-transferable college courses are considered
honors courses for admission purposes for
non-California resident applicants. PLEASE NOTE:
College entrance exams are also required of non-
California residents.

Additional Preparation for
University Work: Freshman
Applicants

High school courses required for admission to
the university are listed at the beginning of this
section. This list is not intended to constitute
an outline for a valid high school program. The
courses listed were chosen for their value as
predictors of success in the university. These
required courses add up to fifteen “Carnegie”
units, while graduation from high school requires
from fifteen to nineteen. Courses beyond our
requirements should be chosen to broaden your
experience, and should fit in with your personal
plans for the future.

For example, besides taking courses in chem-
istry, physics and biology, a science major will find
more than three years of mathematics essential.
A science major without a working knowledge of
trigonometry and at least intermediate algebra
is likely to be delayed in getting a degree. If you
have an interest in languages or plan a college
program with a language other than English
requirement, you should have completed more
than the two years of language other than English
needed for admission.

The “a through g” requirements for admission are
minimum entrance standards. Completing the
required high school courses with satisfac-
tory grades will not automatically prepare you
for freshman work in every subject, much less in
your major or program of study. Many entering
students discover that they are not adequately
prepared for basic courses, such as English com-
position and calculus, which they are expected
to take in their freshman year. Also, many under-
grade majors, particularly those in sciences
and mathematics, require more high school
preparation than that necessary for admission.

For these reasons, you are advised to take
courses that will prepare you beyond minimum
levels of competence in reading, writing, and
mathematics. A student who is well prepared
for university work will have taken four years of
English in high school, four years of mathematics,
two to three years of language other than English,
three years of laboratory science, two or more
years of history/social science, and one or more
years of visual and performing arts.

Reading: Freshman-level university work
demands a great amount, and high level, of
reading. Proficiency in reading and understand-
ing technical materials and scholarly works is
necessary. Learn to read analytically and critically,
actively questioning yourself about the author’s
intentions, viewpoint, arguments, and conclu-
sions. Become familiar and comfortable with the
conventions of standard written English and
with various writing strategies and techniques.
Your reading experience should include original
works in their entirety (not just textbooks and
anthologies) that encompass a wide variety of
forms and topics.

Writing: Prospective students must learn to
write clearly and skillfully. You will be expected
to write papers for English and many other university
classes, and many exams will include essays. You
will have to think critically and analyze what you
learn in class and in outside reading, and present
your ideas in a clear and persuasive manner. By
university standards, a student who is proficient
in English composition is able to: (a) understand
the assigned topic; (b) select and develop a theme
by argument and example; (c) choose words
which clearly and precisely convey the intended
meaning; (d) construct effective sentences; (e)
demonstrate an understanding of the rules of
standard written English; and (f) punctuate,
capitalize, and spell correctly.

If you plan to attend the university, it is
imperative that you take English courses in high
school that require the development and practice
of these skills. You must take at least four years
of English composition and literature that stress
expository writing: the development of persuasive
critical thinking on the written page.

Mathematics: Many fields require prepara-
tion in mathematics beyond that necessary for
admission to the university. Courses in calculus
are included in all majors in engineering and the
physical, mathematical, and life sciences, as well
as in programs leading to professional degrees
in fields such as medicine, dentistry, optometry,
and pharmacy. Moreover, many majors in the
social sciences, business, and agriculture require
statistics or calculus, and sometimes both.

Most students take calculus or statistics, if
required, during the freshman year. The university
strongly recommends that students take four
years of mathematics in high school, includ-
ing pre-calculus in the senior year. Courses in
mathematics should include basic operations with
numerical and algebraic functions; operations
with exponents and radicals; linear equations
and inequalities; polynomials and polynomial
equations; functions and their graphs; trignom-
etry, logarithms, and exponential functions, and
applications and word problems.

Students who are not prepared to take calculus
or statistics during the freshman year will have to
take one or more preparatory mathematics classes
at the university. This could affect their success in
other courses and delay their entire undergradu-
ate program.

Laboratory Science: The university requires
two years of laboratory science in high school, but
many majors require additional science courses.
Programs in the biological sciences and some
natural resource fields require high school biology,
chemistry, and physics. Programs in the physical
sciences, mathematics, engineering, agriculture,
and the health sciences require chemistry and
physics, and recommend biology.

College Credit: Freshman
Applicants

There are many steps you can take to earn credit
which will be applicable to your graduation from
college. Some of these steps may be taken even
before you graduate from high school. Among
them are the following:

College Courses

Many high schools have arrangements with
nearby postsecondary institutions, allowing you
to take regular courses while you are still in high
school. Many of these courses are accepted by the
university exactly as they would be if you were a
full-time college student if courses are posted for
credit on the college transcript.

No matter how many college units you earn
before graduating from high school, you will still
apply as a freshman.
Admission as a Transfer Applicant

UC San Diego welcomes transfer students. The campus Transfer Student Services provides admissions counseling and a variety of programs and services for prospective transfer students. The university defines a transfer applicant as a high school graduate who has been a registered student in another accredited college or university or in college-level extension classes other than a summer session immediately following high school graduation. A transfer applicant may not disregard his or her college record and apply for admission as a new freshman.

Each year UC San Diego receives more applications from eligible transfer students than the campus can accommodate. In addition to satisfying UC minimum requirements, only transfer students who have completed ninety or more transferable quarter-units by the end of spring term are considered for admission. Priority is given to students transferring from California community colleges. See “Advanced-Standing Selection.”

UCSD admits transfer applicants at the junior level only. To be competitive, applicants need to present an academic profile stronger than that represented by the minimum UC admissions requirements, and they should complete preparation for their intended field of study.

Impacted Majors

It sometimes becomes necessary to limit enrollment in certain majors. When this occurs the affected majors will be listed in the UC San Diego General Catalog as soon as possible. When the catalog does not reflect these conditions, newly admitted students will be notified of them in the university’s admissions letter. Effective fall 2009, certain majors will be considered impacted majors for freshmen. These are aerospace engineering and mechanical engineering (in the Department of Mechanical and Aerospace Engineering), bioengineering and bioengineering: biotechnology (in the Department of Bioengineering), and all majors in the Division of Biological Sciences (biochemistry/cell biology; bioinformatics specialization; ecology; behavior and evolution; general biology; human biology; microbiology; molecular biology; physiology and neuroscience). Note that these majors will not be considered impacted for transfer students until fall 2011. It is strongly recommended that transfer students continue to complete the major preparation classes to succeed in their chosen major in engineering or biology. Transfer students interested in applying to any of the above majors must select an alternate major on the UC application. Qualified applicants not admitted directly to the major will be admitted to their alternate major, provided it is not also impacted.

Pre-Majors

The following majors admit transfer students to pre-major status only: bioengineering: pre-medical, human development, literature/writing, math-computer science. As a pre-major, you must satisfy all prerequisites before admission to the major. The set of conditions, determined on a department-by-department basis, and approved by the San Diego Committee on Educational Policy, is explained in detail under the department listing in this catalog. Other departments may be approved to offer pre-majors by the Committee in Educational Policy subsequent to this publication. Please refer to "Major Fields of Study" in the introduction to the catalog.

Transfer Eligibility

California Residents (Minimum UC Requirements)

As a transfer applicant you must meet one of the requirements described below to be considered for admission to the university. Admission to UCSD is very competitive. You must exceed the minimum UC admission requirements.

1. If you were eligible for admission to UC when you graduated from high school—meaning you satisfied the subject, scholarship, and examination requirements, or were identified by the university during your senior year in high school as eligible under the Eligibility in the Local Context (ELC) program—you are eligible to transfer if you have a C (2.0) average in your transferable course work.

2. If you met the scholarship requirements but did not satisfy the subject requirement, you must take transferable college courses in the missing subjects, earning a C or better in each required course, and have an overall C average in all transferable course work to be eligible to transfer.

3. If you were not eligible for admission to UC when you graduated from high school because you did not meet the scholarship requirements, you must have:
   a. Completed ninety quarter-units (sixty semester-units) of UC-transferable college credit with a grade point average of at least 2.4, and:
   b. Completed a course pattern requirement, earning a grade of C or better in each course, to include:
      • two UC-transferable college courses (three semester- or four to five quarter-units each) in English composition, and;
      • one UC-transferable college course (three semester- or four to five quarter-units each) in mathematical concepts and quantitative reasoning, and;
      • four UC-transferable college courses (three semester- or four to five quarter-units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, the physical and biological sciences.

Students who satisfy the Intersegmental General-Education Transfer Curriculum prior to transferring to UC may satisfy Option 3b above of the transfer admission requirements.

Transfer Eligibility

Non-California Residents (Minimum UC Requirements)
The minimum admission requirements for nonresident transfer applicants are the same as those for residents, except that nonresidents must have a grade-point average of 2.8 or higher in all UC-transferable college course work.

Transfer Eligibility

Second Baccalaureate/Limited Status Applicants

For the past several years, UC San Diego has not accepted applications from students who have earned a four-year degree. There is no change in the current policy. However, if there were a policy change in the future, then applications received by the Undergraduate Admissions from non-degree-seeking students, or those who have...
earned a four-year degree, would be reviewed by the college provost’s office. Limited-status (non-degree-seeking) applicants and those seeking a second B.A. or B.S. would be held to the same restrictions as are other newly admitted students; fields that have restrictions for admission would also be restricted to these applicants.

**Determining Your Grade-Point Average**

Your grade-point average for admission purposes is determined by dividing the total number of acceptable units you have attempted into the number of grade points you earned on those units. You may repeat courses that you completed with a grade lower than C (2.0).

The scholarship standard is expressed by a system of grade points and grade-point averages earned in courses accepted by the university for advanced-standing credit. Grade points are assigned as follows: for each unit of A, four points; B, three points; C, two points; D, one point; and F, no points.

**Credit from Another College**

The university gives unit credit to transfer students for courses they have taken at other accredited colleges and universities, including some extension courses. To be accepted for credit, the courses must be consistent with those offered at the university, as determined by the Office of Admissions and Relations with Schools. Applications from students who have more than 135 quarter-units (ninety semester-units) of transfer credit and meet selection criteria are considered to have excess units (senior standing). Applicants in this category may be reviewed for admission if space permits.

Many students who plan to earn a degree at the university find it to their advantage to complete their freshman and sophomore years at a California community college. Each community college offers a full program of courses approved for transfer credit. The university will award graduation credit for up to seventy semester- (105 quarter-) units of transferable course work from a community college. Courses in excess of seventy semester-units will receive subject credit and may be used to satisfy university subject requirements.

The transferability of units from California community colleges and all other postsecondary institutions is as follows: (1) the UC Office of the President determines unit transfer policies which are binding upon, and implemented by, each campus’ admissions office; (2) applicability of transferred units to breadth (general-education) requirements is determined for each UCSD college by its provost (see also "Transfer Agreements" below); (3) applicability of units toward the major is determined by the appropriate UCSD academic department. Before applying to UC San Diego you may obtain more information on many of these matters from the Office of Admissions and Relations with Schools.

Applicants who have completed courses at a postsecondary institution outside the U.S. should have these records sent to the Office of Admissions and Relations with Schools as soon as possible. Advanced standing credit for appropriate courses will be decided on an individual basis.

**NOTE:** The University of California does not give credit for CLEP examinations.

---

**University of California/UC San Diego Transfer Agreements and Preparation Programs**

UC San Diego **strongly recommends** that transfer students complete lower-division breadth and general-education (B/GE) requirements prior to transfer. Transfer students are also strongly advised to complete all lower-division preparation for the major prior to enrollment.

The University of California, San Diego has established five transfer agreements and preparation programs. These agreements and programs, Transfer Admission Guarantee (TAG), UniversityLink, UC Transfer Reciprocity, Intersegmental General-Education Transfer Curriculum Agreement, and Articulation, allow students to fulfill all or most lower-division B/GE requirements prior to transfer.

Transfer students may fulfill their lower-division B/GE requirements with any of these agreements or programs, or they may fulfill them at UCSD. Completion of IGETC or UC Reciprocity agreements will satisfy the lower-division requirements of Earl Warren, Thurgood Marshall, Sixth, or John Muir College only. Students who follow IGETC or UC Reciprocity are welcome to apply to Eleanor Roosevelt or Revelle College. Courses completed prior to transfer will be applied toward the college’s own lower-division requirements. Revelle students must also complete the remainder of the college’s requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the “Making of the Modern World” sequence in addition to the IGETC or UC Reciprocity requirements. They must also complete any of the college’s general education requirements which can be met by transfer course work. The college will make every effort to apply as much transfer course work as possible. Transfer applicants should refer to the catalog pages for individual departments’ specific courses for GPA requirements.

**Transfer Admission Guarantee (TAG)**

UC San Diego’s TAG program in effect beginning with the fall 2009 quarter has changed from the previous program. TAG eligibility now includes all California community colleges. The program will be offered for students transferring in fall or winter quarters only. California community college students* can participate in this guarantee if they complete the requirements and submit a UC application during the filing period for fall (November 1–30) or winter (July 1–31). You must indicate TAG and Intersegmental General Education Transfer Curriculum (IGETC) on your UC application, and if you meet the TAG requirements, you will be guaranteed admission to UC San Diego. Full completion of IGETC is required. Send your IGETC certification form by July 15 for fall quarter (IGETC completed by end of the previous spring); and by September 15 for winter quarter admission (IGETC completed by end of the previous summer). TAG does not guarantee your choice of one of UC San Diego’s six colleges; please rank your college choices on your UC application.

*You must meet the definition of a California community college (CCC) student applying for admission with junior status (sixty UC transferable semester units or ninety UC transferable quarter units completed by spring for fall TAG applicants, or summer for winter TAG applicants):

- Enrolled at one or more CCCs for at least two regular terms (excludes summer sessions)
- Last college before UCSD admission is a CCC (excludes summer sessions)
- Completed at least thirty semester (forty-five quarter) UC transferable units at a CCC

For fall admission, you must earn a cumulative 3.0 minimum UC GPA by the end of fall term one year prior, and maintain a 3.0 GPA through the end of spring term before you enroll at UC San Diego. For winter admission, you must earn a cumulative 3.0 minimum UC GPA through the end of the summer before you enroll at UC San Diego. All students must be in good standing during their last regular term. Both UC English courses and the UC math. course must be completed by the end of fall term prior to fall admission, and by the end of summer term prior to winter admission.

This agreement is available to U.S. citizens, permanent residents, AB540 students, and former UC students in good standing (except former UCSD students). TAG does not apply to students with senior class standing (students with ninety or more UC transferable semester units or 135 quarter units) from accredited four-year universities and community colleges combined.

Students cannot reach senior standing with only community college units completed. A maximum of seventy UC transferable community college semester or 105 quarter units will be accepted toward graduation. Subject credit is awarded for community college units taken beyond the seventy semester units or 105 quarter units. All UC-transferable units completed at a four-year university apply toward
the limit of ninety semester units or 135 quarter units. Advanced Placement and International Baccalaureate units earned prior to high school graduation do not apply to the limit of ninety semester units or 135 quarter units.

TAG applies to general admission but not necessarily to an impacted major. Students must meet the screening criteria for designated majors that require lower-division preparation prior to admission into the major. For more information about major preparation course work, see the agreements by major between UC San Diego and your community college at http://www.assist.com. All transfer students are strongly advised to complete lower-division major requirements before enrolling at UC San Diego.

**UniversityLink**

UniversityLink provides guaranteed admission to high school seniors who sign an agreement and successfully complete academic and program requirements at a participating community college. UniversityLink partnerships are currently established with the following colleges: Cuyamaca, East Los Angeles, Grossmont, Imperial Valley, Mira Costa, Palomar, San Diego City, San Diego Mesa, San Diego Miramar, and Southwestern.

**Transfer Preparation Programs**

The following avenues do not guarantee admission. However, they do allow you to fulfill your lower-division general-education requirements at the community college or other UC campus:

**UC Transfer Reciprocity Agreement**

Transfers who have attended any campus of the University of California and satisfied lower-division breadth and general-education (B/GE) requirements at that campus prior to transfer may consider these requirements satisfied for John Muir, Thurgood Marshall, Sixth, or John Muir college only. Students who follow UC Reciprocity are welcome to apply to Eleanor Roosevelt or Revelle college. Courses completed prior to transfer will be applied toward the college’s own lower-division requirements. Revelle students must also complete the remainder of the college’s requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the “Making of the Modern World” sequence in addition to the IGETC requirements. They must also complete any of the college’s general education requirements, which can be met by transfer course work. The college will make every effort to apply as much transfer course work as possible.

Transfers should obtain the “IGETC Certification” from their community college and submit it to the Office of Admissions and Relations with Schools. Students are encouraged to provide this certification prior to the start of classes at UC San Diego.

**Intersegmental General-Education Transfer Curriculum Agreement**

Transfers from California community colleges can fulfill the UC lower-division breadth and general-education (B/GE) requirements by completing the Intersegmental General-Education Transfer Curriculum (IGETC). Completion of IGETC will satisfy the lower-division B/GE requirements at UCSD for Earl Warren, Thurgood Marshall, Sixth, or John Muir college only. Students who follow IGETC are welcome to apply to Eleanor Roosevelt or Revelle college. Courses completed prior to transfer will be applied toward the college’s own lower-division requirements. Revelle students must also complete the remainder of the college’s requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the “Making of the Modern World” sequence in addition to the IGETC requirements. They must also complete any of the college’s general education requirements, which can be met by transfer course work. The college will make every effort to apply as much transfer course work as possible.

Transfers should obtain the “IGETC Certification” from their community college and submit it to the Office of Admissions and Relations with Schools. Students are encouraged to provide this certification prior to the start of classes at UC San Diego.

**Articulation**

UCSD has Articulation Agreements for general education breadth requirements with forty-four California community colleges, and major preparatory agreements for certain majors with a number of California community colleges. These agreements can be found on the ASSIST Web site (http://www.assist.org), which includes statewide transfer information.

**International Applicants**

International applicants must meet highly rigorous selection criteria for admission.

Courses at UC San Diego are conducted in English, and every student must have sufficient command of that language to benefit from instruction. To demonstrate such command, students whose native language is not English will be expected to take the Test of English as a Foreign Language (TOEFL). Arrangements for taking this test may be made by writing to the Educational Testing Service, TOEFL Registration Office, P.O. Box 6151, Princeton, New Jersey 08541-6151, U.S.A.

Online information is available at http://www.toefl.org. The minimum acceptable TOEFL score is 550 (paper-based exam) or 83 (Internet-based exam).

In lieu of the TOEFL, a score of 7 (academic module) on the International English Language Testing System (IELTS) will also be accepted. Information is available at http://www.ielts.org.

The results of this test will be used to determine whether the applicant’s command of English is sufficient to enable him or her to pursue studies effectively at UCSD. Students whose command of English is slightly deficient will be required to take an English course and, therefore, a reduced academic program.

In addition to an adequate English-language background, international students must have sufficient funds available to cover all fees; living, and other expenses; and transportation connected with their stay in the United States (see “Fees and Expenses”).

International students are required to obtain health insurance for themselves and dependents who accompany them. Suitable insurance policies and additional information are available at the Student Health Service and at the International Center.

Address all communications concerning undergraduate admission of international students to: University of California, San Diego, Office of Admissions and Relations with Schools, 9500 Gilman Drive, Dept. 0021, University of California, San Diego, La Jolla, CA 92093-0021, e-mail: admissionsreply@ucsd.edu.

**How to Apply for Admission**

Undergraduate admissions applications are available online in the fall at the UC Pathways Web site (http://www.universityofcalifornia.edu/admissions/undergraduate_adm/apply/apply_online.html), Follow the accompanying directions carefully. If you choose to print and mail your application, please send it to:

University of California
Undergraduate Application Processing Center
P.O. Box 4010
Concord, CA 94524-4010

You may apply to as many as nine campuses of the University of California on one application form.

**Application Fees**

The basic application fee of $60 entitles you to be considered at one campus of the university. For each additional campus you select, you must pay an extra $50 fee. These fees are not refundable. International nonimmigrant applicants pay a $70 application fee for each campus selected.
When to Apply for Admission

To make sure that you will be considered for admission to the university campus(es) you want to attend, and to the major or program of study you want to pursue, you must submit your completed application during the filing period (see below).

If you plan to apply for financial aid, university housing, or other special programs, you must submit your application on time.

Filing Period

Fall Quarter: File November 1–30
Winter Quarter: File July 1–31

NOTE: UCSD accepts winter applications from Transfer Admission Guarantee (TAG) students only.

Adding a Campus

If you decide to apply to additional UC campuses after you submit your application, submit your request in writing to the processing service before the filing deadline. Be sure to note your application ID number, additional campus(es) to which you wish to apply, major(s), major code(s), and a check or money order for $60 for each additional campus you select, payable in U.S. dollars to the “Regents of the University of California.”

International nonimmigrant applicants pay a $70 application fee for each campus selected. You may not substitute new campus choices for your original choices. Your request will be honored only if the campus(es) you choose still has space available. The processing service will notify you as to whether your application was accepted. Do not submit a second application form; it will not be processed.

Selecting Campuses and Programs of Study

You are encouraged to approach the selection of a university campus and a program of study very carefully. You may be familiar with only one or two of the university’s general campuses, probably those nearest to your home or mentioned more frequently in the news. You should seriously consider the many different educational alternatives and programs offered by other campuses of the university before completing your application. Your counselor and the university staff in the Office of Admissions and Relations with Schools can provide you with insights that will help you in the selection process.

College Choice

The application to UCSD must include a choice of undergraduate college (Eleanor Roosevelt, Thurgood Marshall, Earl Warren, Revelle, John Muir, or Sixth) before it can be processed. Selecting alternative UCSD college choices is also advisable since each college has enrollment quotas that limit the number of new freshmen and transfer students. The Office of Admissions and Relations with Schools will select an alternate college if an alternate choice is not indicated.

Transcripts

If you are admitted for the fall term, you must arrange to have final, official transcripts sent to the Admissions Office no later than July 15. If you attended school outside the United States, see the information in the box below.

Freshman Applicants: If you are admitted you must arrange to have an official, final high school transcript (showing your date of graduation) sent to the campus where you plan to enroll. Unless a campus requests it, do not send a sixth or seventh semester transcript.

Transfer Applicants: If you are admitted, you will be asked to submit official transcripts from all schools and colleges you attended, including high school, regardless of the length of attendance or whether you believe the credit is transferable. Some campuses may request transcripts prior to admission.

Transcript Information for Applicants Who Have Attended School Outside the United States

The Admissions Office may make a preliminary evaluation of your application based on the information you provide on your application. However, if you are admitted, the university must receive an official academic record directly from each institution you attended, beginning with grade nine, and up to and including, the school or college/university you currently attend.

Each academic record must list the dates you attended the institution, the titles of courses and examinations you completed, the grades (marks) you received, the credit, hours or units earned, and any degree or diploma you may have received. In the United States, the academic record is called a “transcript.” It may be called by another name—such as leaving certificate, maturity certificate, baccilllario, or baccalaureat—in your country.

Because it may take some time for schools outside the U.S. to forward your records to the university, you are encouraged to send a legible photocopy of your official foreign academic records directly to the Admissions Office at each campus to which you apply.

The university recognizes that it may be difficult to obtain foreign records in the event of political upheaval or natural disaster; however, these situations are rare. Failure to provide official records may jeopardize your enrollment at the university.

The transcripts and other documents that you submit as part of your application become the property of the university; they cannot be returned to you or forwarded in any form to another college or university.

Checklist for Applicants

1. File an application on the University of California’s Pathways Web site (http://www.universityofcalifornia.edu/admissions/undergraduate_adm/apply/apply_online.html) during the November filing period. Fee may be paid by credit card, or you may ask the UC application processing services to bill you by mail.

2. You must select UC San Diego colleges in order of preference. Be sure to sign the form

3. Complete your personal statement.

4. Fill in the self-reported academic data and test information carefully and accurately.

5. Take the ACT Assessment plus Writing or the SAT Reasoning Test, and SAT Subject Tests (in two different areas) if you are a freshman applicant no later than December of your senior year. Refer to the Examination Requirement section above for full details.

6. Request that your school(s) send transcripts and other required documents directly to: Office of Admissions and Relations with Schools
   Student Affairs
   UCSD
   9500 Gilman Drive, 0021
   La Jolla, CA 92039-0021

Final high school transcripts, and all college transcripts for transfer students, must be on file in the UCSD Office of Admissions and Relations with Schools by July 15.

Notification of Admission

Admission–Freshmen

If you are a freshman applicant and you filed your application on time, UC San Diego will notify you, between mid-March and March 31, whether you have been admitted. All offers of admission are provisional until the receipt and verification of your test results and official final high school transcript (and college transcript, if applicable). If you are offered admission based on your self-reported academic record, official documents will be used to verify the self-reported academic data you submit. Offers of admission will be rescinded if: a) there are discrepancies between your official transcripts and your self-reported academic record; b) you do not complete the courses listed as “in progress” or “planned”; or c) you do not
complete your twelfth-grade courses at the same academic level as in previous course work.

**Admission–Transfer**

If you are applying to transfer for the fall quarter and you submitted your application on time, UC San Diego will notify you between mid-March and April 30. All offers of admission are provisional until the receipt and verification of all official transcripts. If you are offered admission based on your self-reported academic record, your official high school transcript and transcripts from all colleges attended will be used to verify the self-reported academic data you submit. Offers of admission will be rescinded if: a) there are discrepancies between your official transcripts and your self-reported academic record; b) any college or school attended is omitted from your application; c) you do not complete the courses listed as "in progress" or "planned;" or d) the specified GPA is not maintained for courses "in progress" or "planned." These admission notification dates apply only to applicants who file during the November filing period. Applicants for winter quarter are notified as soon as possible (within three months) following receipt of all appropriate documents.

Upon receipt of notification of admission:

1. Read the information in your online admission notification carefully, noting any special proviso governing your admission.
2. Request that any outstanding transcripts be forwarded to the Office of Admissions and Relations with Schools by the stated deadline.
3. Complete and submit to the Office of Admissions and Relations with Schools the Statement of Intent to Register (SIR), online or by mail, and the online Statement of Legal Residence (SLR). Please note the deadline to return your SIR. If it is submitted or postmarked after this date, you may be denied enrollment due to space limitations. For fall quarter admitted students, the deadline for return of your SIR and SLR is May 1 for freshmen and June 1 for transfers.

**Statement of Intent to Register (SIR)**

Upon receipt of your Statement of Intent to Register (SIR), the Office of Admissions and Relations with Schools provides information to various campus offices including the Financial Aid Office, Housing and Dining Services, and your college provost. You will then receive additional information from each of these offices. The $100 nonrefundable fee accompanying your SIR (if required at that time) is applied toward payment of the university registration fee for the quarter of your admission.

Even though you may be admitted to more than one campus of the University of California, you can return the SIR to only one campus.

**Student Health Requirement**

Entering students are required to complete a Medical History form and to send it to the Student Health Center. Forms and complete instructions are usually sent to entering students well in advance of registration, or they may be obtained at the Student Health Center. Information submitted to the Student Health Service is kept confidential and is carefully reviewed to help provide individualized health care.

**Mandatory Health Insurance:** The University of California has established mandatory health insurance as a non-academic condition of enrollment for undergraduates. Health insurance packages will be available for year-round coverage. The cost will be factored into grants, loans, and work-study programs offered to students who receive financial assistance. Students already covered by adequate health insurance can waive the requirement. The new campus-based insurance plans will not replace the primary medical care and referral services provided by the Student Health Service.

**Hepatitis B Immunization:** The California State Legislature mandates that first-time enrollees at the University of California who are eighteen years of age or younger provide proof of full immunity against Hepatitis B prior to their enrollment. All students who accept UC San Diego's offer of admission, and who will still be eighteen years old by the beginning of their first quarter, will receive the Hepatitis B information by campus e-mail. The immunization consists of a series of three vaccinations, which you must start in time to complete the sequence by your second quarter of enrollment. You can receive further information through your health care provider or county health department. You can also review the Hepatitis B FAQs from UC San Diego's Student Health Service at http://studenthealth.ucsd.edu/hepbfaqs.shtml.

Students are urged also to submit a physical examination form completed by their family physician, particularly if they plan to take part in intercollegiate athletic competition. Routine physical examinations are not provided by the Student Health Service. An optional student health plan that provides additional benefits off campus may be purchased at the time registration fees are paid. Student health insurance is also mandatory for all international and graduate level students and is a condition of enrollment.

**Reapplication**

An application for admission is effective only for the quarter for which it is submitted. If you are ineligible for admission, or if you are admitted and do not register, you must file a new application to be considered for a later quarter. The selection criteria in effect for the new term must be met.

If you have been admitted to the university, enrolled, and paid registration fees, but did not attend, contact your undergraduate college for information on refunding your registration fees.

**Fees and Expenses**

The exact cost of attending the University of California, San Diego will vary according to personal tastes and financial resources of the individual. All estimates are based on information available at the time of publication, and are subject to change. For estimating and budgeting purposes, one can generally assume that the current total expense for three quarters, or one college year, is estimated at approximately $23,800 for California residents living away from home.

It is possible to live simply and to participate moderately in the life of the student community on a limited budget. The university can assist the student in planning a budget by indicating certain and probable expenses. For information regarding student employment, loans, scholarships, and other forms of financial aid at UC San Diego, see “Campus Services and Facilities” in this catalog. Check the UC San Diego Web pages for prospective students concerning budgeting and expenses for changes and updates to these numbers.

Revelle College

Art (Studio)
Fulfills fine arts requirement and 1 course of the noncontiguous area of focus or may meet 2 courses of the noncontiguous area of focus

Art History
Fulfills fine arts requirement and 1 course of the noncontiguous area of focus or may meet 2 courses of the noncontiguous area of focus

Biology
Score of 3, 4, or 5 meets Revelle biology requirement

Chemistry
Partial completion of natural science requirement

Computer Science
Partial completion of noncontiguous area of focus
Economics
Each score of 3, 4, or 5 exempts student 1 course on social science requirement

English
2 courses of the noncontiguous area of focus or 8 units of elective credit

Environmental Science
Elective units or may meet 1 course of noncontiguous area of focus

Geography, Human
4 units of elective credit or may meet 1 course of noncontiguous area of focus

Government and Politics: United States
1 course toward social science requirement or 1 course of noncontiguous area of focus

Government and Politics: Comparative
1 course toward social science requirement or 1 course of noncontiguous area of focus

History: United States
2 courses toward social science requirement or 2 courses of noncontiguous area of focus

History: European
2 courses of the noncontiguous area of focus

History: World
2 courses of the noncontiguous area of focus

Language
Score of 4 or 5 meets language proficiency requirement

Latin
Usually prepares student to take Lit/Latin 100; may meet 2 courses of the noncontiguous area of focus or may be used as 8 units of elective credit.

Literature
Score of 3, 4, or 5 meets proficiency requirement

Mathematics
AB exam = 1 course toward math requirement; BC exam = 2 courses toward math requirement.

Music
Fulfills fine arts requirement and 1 course of noncontiguous area of focus

Physics
B exam = meets one course of the natural science requirement. C exam = (Mech. or E&M) each 4 units can meet 1 course of the natural science requirement.

Psychology
1 course toward social science requirement or 1 course of noncontiguous area of focus

Statistics
4 units of elective credit

Muir College

Art (Studio)
8 units of elective credit

Art History
8 units of elective credit

Biology
Score of 3 exempts BILD 10. Score of 4 or 5 exempts BILD 1, 2 and 3

Chemistry
Refer to UCSD Course Exemptions

Computer Science
2-4 units of elective credit. If applied to major, refer to UCSD Course Exemptions.

Economics
Refer to UCSD Course Exemptions

English
8 units of elective credit and clears Entry Level Writing requirement (8 units maximum to both tests)

Environmental Science
Score of 4 or 5 exempts SIO 10

Geography, Human
4 units of elective credit

Government and Politics: United States
Refer to UCSD Course Exemption and AH&I Requirement

Government and Politics: Comparative
Refer to UCSD Course Exemption

History: United States
Refer to UCSD Course Exemptions and clears American History and Institutions requirement. May take HILD 2A OR 2B OR 2C to complete G.E. sequence.

History: European
Score of 3, 4, 5 exempts 2 courses of European history. 3rd course by petition after student consults with Muir advisor.

History: World
Score of 3, 4, 5 exempts 2 courses of non-Western history. 3rd course by petition after student consults with Muir advisor.

Language
See UCSD Course Exemptions. Determines placement in language sequence and clears 2 courses in a G.E. sequence if student chooses the Foreign Language option.

1 course toward Narrative, Aesthetic, and Historical Reasoning

Linguistics
1 course toward Narrative, Aesthetic, and Historical Reasoning

Literature
Elective credit

Mathematics
1 course toward Structured Reasoning

Music
Elective credit

Physics
1 course toward Analytic Methodologies / Scientific Method

Psychology
1 course towards Social Analysis

must also complete the remainder of the college’s requirements. Students at Eleanor Roosevelt College must complete three academic quarters of the “Making of the Modern World” sequence in addition to the IGETC requirements. They must also complete the remainder of the college’s general-education requirements.

Transfers should obtain the “IGETC Certification” from their community college and submit it to the Office of Admissions and Relations with Schools. Students are strongly encouraged to provide the IGETC certification prior to the start of classes at UC San Diego.

English Communication:

One course, English Composition, three semester- (four to five quarter-) units; this course is a prerequisite to Critical Thinking.

One course, Critical Thinking-English Composition, three semester- (four to five quarter-) units; strong emphasis on writing; prerequisite: English Composition.

Mathematical Concepts and Quantitative Reasoning:

One course, Mathematics/Quantitative Reasoning, three semester- (four to five quarter-) units.

Arts and Humanities:

Three courses, at least one course in arts, and at least one course in humanities, nine semester- (twelve to fifteen quarter-) units.

Social and Behavioral Sciences:

Three courses in at least two disciplines or an interdisciplinary sequence, social and behavioral sciences, nine semester- (twelve to fifteen quarter-) units.

Physical and Biological Sciences:

One course in each area, at least one must include a laboratory; two courses, seven to nine semester- (nine to twelve quarter-) units.

Language Other than English:

Proficiency equivalent to two years’ high school study in the same language.

| Entering Transfers | $55.00  |

Non-Resident Tuition for Undergraduates

$22,021 + $648 Education Fee

Note: Fees are subject to change.
Undergraduate Registration

Enrollment in Courses

Prior to the quarter for which they have been admitted, new students will receive information from their college regarding orientation dates, course enrollment, and fee-payment deadlines. Enrollment materials will be provided at the college provosts’ offices on the days assigned for new students’ registration. New freshman students admitted for the fall quarter will be invited to attend a new student orientation during the summer preceding fall quarter.

New Student Orientation/Enrollment

Orientation programs are designed to acquaint students with the nature, functions, and purposes of UCSD’s college system, and to show students how to deal with a variety of requirements set by the university, college, and academic departments. Although all six colleges have the same goals for students, each has developed its own distinctive program. The professional staffs of Revelle, Muir, Marshall, Warren, Roosevelt, and Sixth Colleges have designed programs for their respective students and the students’ parents.

New students will be made aware of the opportunities offered by their college and the UCSD community as a whole.

All new students are required to attend an orientation session, and they will be charged a fee for the program. Parents’ attendance is optional and varies across the colleges, and a fee is typically charged. Details will be provided by the college.

Enrollment and orientation are two distinct and separate events occurring at different times. All new students, regardless of their college orientation schedule, enroll online (but not on campus) during the same enrollment period. The colleges’ academic advisors guide students through this online process. Details of both the orientation and enrollment proceedings are posted on the colleges’ respective Web sites after the final publicized deadline for Statement of Intent to Register (SIR), which is determined by the Office of Admissions.

In addition to the Summer Orientation, students should attend Welcome Week—the week before the official opening of the fall quarter and the beginning of classes.

Continuing Student Enrollment

Continuing students (those currently registered or eligible to register) should refer to TritonLink for enrollment information, dates, and fee payment instructions: https://tritonlink.ucsd.edu.

Definitions

Students are considered enrolled when they have requested space in at least one course and space in classes has been reserved. Students are not considered registered until they have both enrolled in courses and paid registration fees. Waiting a class does not constitute enrollment.

Enrollment is processed using WebReg in StudentLink on the Web. Continuing undergraduate students are assigned a start time, after which they may enroll in classes. Start times are based on the number of units completed. Students who have completed more units will receive earlier start times than students with fewer units.

Students are responsible for all courses in which they are enrolled. Students should check StudentLink/WebReg to confirm class enrollments. Students must make any necessary changes by the Add/Change/Drop process (through WebReg in TritonLink) or by appropriate withdrawal.

Adding, Changing, and Dropping Courses

After enrollment, students may make any necessary corrections to their class schedules on WebReg in TritonLink, through pre-authorization by departments. Through the second week of instruction, students may add courses via TritonLink. During the third and fourth weeks, students only with extraordinary circumstances or with documentation of a university error may petition to add courses. Please refer to TritonLink for appropriate approvals required.

Students may continue to change grading options through the end of the fourth week and to drop courses through the end of the ninth week of instruction. Students who wish to drop all their courses are required to file an Undergraduate Withdrawal form with their college academic advising or dean’s office. Please see the W (Withdrawal) grade regulation that applies after the fourth week of instruction.

Weeks

1–2: ADD/DROP/CHANGE Grade Option
2–4: DROP/CHANGE Grade Option
5–9: DROP ONLY—“W” recorded on transcript
10 and later: No changes; final grade assigned

The Undergraduate Program

The undergraduate program consists of four four-unit courses each quarter, or sixteen units per quarter, for four years. Students must complete a minimum of thirty-six units in three consecutive quarters in order to satisfy the minimum progress requirements (see “Minimum Progress” in the “Academic Regulations” section). Undergraduate students wishing to take more than twenty-two units of credit in a quarter will need their college provost’s approval.

Approval for Enrollment for More than 200 Units

The minimum unit requirement for the bachelor’s degree is 184 quarter-units in Revelle College and 180 quarter-units in Muir, Marshall, Warren, Roosevelt, and Sixth Colleges. A student is expected to complete the requirements for graduation within this minimum unit requirement. The bachelor of science degree may require satisfaction of additional units, depending upon the student’s major. Candidates for B.S. degrees in engineering are permitted 230 units (240 for engineering majors in Revelle and Roosevelt colleges).

Under special circumstances, students may extend their undergraduate training beyond the minimum. Non-engineering students who are attempting to achieve more than 200 quarter-units will not be permitted to register without their college provost’s approval. Other exceptions will be granted only for compelling academic reasons and only with the approval of the college provost and the concurrence of the Committee on Educational Policy. Transfer units applicable toward general-education requirements or major requirements are included in the maximum unit calculation; all other transfer units are excluded. Advanced placement and international baccalaureate units are excluded. (See information regarding “Minimum Unit Limitation” in the “Academic Regulations” section of this catalog.)
**Enrollment and Registration Holds**

A student may have a “hold” placed on his or her enrollment or registration (payment of fees) and/or academic transcripts for the following reasons:
1. Failure to respond to official notices.
2. Failure to settle financial obligations when due or to make satisfactory arrangements with the Student Business Services Office.
3. Failure to present certification of degrees and/or status on leaving previous institution(s).
4. Failure to comply with admission conditions.
5. Failure to declare major after ninety units.

Each student who becomes subject to a hold action is given advance notice and ample time to deal with the situation. However, if the student fails to respond, action will be taken without further notice, and he or she is entitled to no further services of the university, except assistance toward reinstatement.

Undergraduate students wishing to have their status restored must secure a release from the office initiating the hold action. Reinstatement is not final until the registration process is completed.

**Change of Address**

UCSD has identified electronic mail as the recognized and official means of communication by which university officials, at their discretion, may send communications to students. Such communications may be sent exclusively using electronic mail. Students can use TritonLink to request and maintain their university-assigned e-mail address.

In addition, students who change their local or permanent addresses are expected to update their address via TritonLink. Students will be held responsible for communications from any university office sent to the last address on record and should not claim indulgence on the plea of not receiving the communication.

**California Residence for Tuition Purposes**

**Tuition Fee for Nonresident Students**

If you have not been living in California with intent to make it your permanent home for more than one year immediately before the residence determination date for each term in which you propose to attend the university, you must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter—and for schools on the semester system, the day instruction begins for the semester.

**Law Governing Residence**

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors. (See below.)

**Who is a Resident?**

If you are an adult student (at least eighteen years of age) you may establish residence for tuition purposes in California if: (1) you are a U.S. citizen; (2) you are a permanent resident or other immigrant; or (3) you are a nonimmigrant who is not precluded from establishing a domicile in the United States. Nonimmigrants who are not precluded from establishing domicile in the United States include those who hold valid visas of the following types: A, E, G, H-1, H-4, I, K, L, 0-1, 0-3, or R. To establish residence you must be physically present in California for more than one year and you must have come here with the intent to make California your home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of your stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year.

Effective fall 1993, if your parents are not residents of California or you were not previously enrolled as a UC student, you will be required to be financially independent in order to be a resident for tuition purposes. Your residence cannot be derived from your spouse, registered domestic partner, or your parents.

**Requirements for Financial Independence**

You will be considered “financially independent” if one or more of the following applies: (1) you are at least twenty-four years of age by December 31 of the calendar year for which you are requesting residence classification; (2) you are a veteran of the U.S. Armed Forces; (3) you are a ward of the court or both parents are deceased; (4) you have legal dependents other than a spouse or registered domestic partner; (5) you are married, a registered domestic partner, or a graduate student or a professional student, and you were not claimed as an income tax deduction by your parents or any other individual for the tax year immediately preceding the term for which you are requesting resident classification; or (6) you are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you are requesting resident classification, and you can demonstrate self-sufficiency for those years and the current year; (7) your parents are residents of the State of California; (8) you reach the age of majority in California while your parent(s) were residents of this state AND the California resident parent(s) leave the state to establish a residence elsewhere AND you continue to reside in the State of California with all your ties here after your parent(s) departure. (Note: Financial dependence will not be a factor in residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed forty-nine percent or more of full time or awarded the equivalent in University-administered funds, e.g., grants, stipends, or fellowships at the University of California in the term for which classification is sought.)

**Establishing Intent to Become a California Resident**

Indications of your intent to make California your permanent residence can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver’s license or, if you do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a California residence in which you keep your personal belongings; and licensing for professional practice in California. The absence of these indica in other states during any period for which you claim residence can also serve as an indication of your intent. Your intent will be questioned if you return to your former state of residence when the university is not in session. Documentary evidence is required, and all relevant indications will be considered in determining your classification.

**General Rules Applying to Minors**

If you are an unmarried minor (under age eighteen), the residence of the parent with whom you live is considered to be your residence. If you have a parent living, you cannot change your residence by your own act, by the appointment of a legal guardian, or by the relinquishment of your parent’s right of control. If you lived with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms...
of a nonimmigrant visa that precludes you from establishing domicile in the U.S., you may establish your own residence when both your parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

Divorced/Separated Parents
You may be able to derive California resident status from a California resident parent if you move to California to live with that parent on or before your eighteenth birthday. If you begin residing with your California parent after your eighteenth birthday, you will be treated like any other adult student coming to California to establish residence.

Parent of Minor Moves from California
You may be entitled to resident status and not be required to establish financial independence if you are a minor U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if:
1. you remained in California after your parent(s) departed;
2. you enroll in a California public post-secondary institution within one year of your parent(s)’ departure; and
3. once enrolled, you maintain continuous attendance in that institution.

Two-Year Care and Control
You may be entitled to resident status if you are a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

Member of the Military
If you are an undergraduate student and a member of the U.S. military stationed in California on active duty or the spouse, registered domestic partner, or dependent child, you may be exempt indefinitely from the nonresident tuition fee. A graduate or professional student and a member of the U.S. military stationed in California on active duty will be eligible for a resident classification for two years, during which time he must fulfill the UC residence requirements in order to maintain his residence status. A graduate or professional student spouse, registered domestic partner, or dependent child will be eligible for the resident classification only until he has resided in the state the minimum time necessary to become a resident (366 days/one year). You must provide the residence deputy on campus with a statement from your commanding officer or personnel officer stating that your assignment to active duty in California is not for educational purposes. The letter must include the dates of your assignment to the state.

Child or Spouse of Faculty Member
To the extent funds are available, if you are an unmarried dependent child under age twenty-one or the spouse or registered domestic partner of a member of the university faculty who is a member of the Academic Senate, you may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member’s membership on the Academic Senate must be secured each term this waiver is granted.

Child or Spouse of University Employee
You may be entitled to resident classification if you are a full-time university employee, an unmarried dependent child, the spouse, or registered domestic partner of a full-time university employee whose assignment is outside of California (e.g., Los Alamos National Laboratory). Your parents’ or spouse’s employment status with the university must be ascertained each term.

Child of Deceased Public Law Enforcement or Fire Suppression Employee
You may be entitled to a waiver of the nonresident tuition fee if you are the child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

Dependent Child of a California Resident
A student who has not been an adult resident of California for more than one year, and who is the dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, may be entitled to a waiver of the nonresident tuition until the student has resided in California for the minimum time necessary to become a resident so long as continuous attendance is maintained at an institution.

Native American Graduates of a BIA High School
If you are a graduate of a California high school operated by the Federal Bureau of Indian Affairs, you may be eligible for an exemption from the nonresident fee.

Employee of a California Public School District
Any person holding a valid credential authorizing service in the public schools of the state of California who is employed by a school district in a full-time certificate position may be eligible for a nonresident tuition waiver.

Student Athlete in Training at U.S. Olympic Training Center; ARCO
Any amateur student athlete in training at the United States Olympic Training Center in Chula Vista may be eligible for a waiver of the nonresident tuition until he or she has resided in the state the minimum time necessary to become a resident.

Graduate of California High School (AB 540)
A student who attended high school in California for three or more years (ninth grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident tuition. For eligibility requirements: www.ucop.edu/sas/sfs/ucteqfaq.pdf.

Surviving Dependents of California Residents Killed in 9/11/01 Terrorist Attack
A student who was a dependent of a California resident who was killed in the September 11, 2001, terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93. Eligible students must meet the financial need requirements for the Cal Grant A program.

Recipients of the Congressional Medal of Honor
Any undergraduate student who is a recipient of a Congressional Medal of Honor or who is the child of a recipient of the Congressional Medal of Honor. The recipient must be a California resident or must have been a California resident at the time of his or her death. The student may not be older than twenty-seven, and the student’s annual income may not exceed the national poverty level.

Maintaining Residence During a Temporary Absence
If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during noninstructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. A student who is in the state solely for educational purposes will NOT be classified as a resident for tuition purposes regardless of the length of his or her stay.

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or your parents if you are a minor) to verify that you did nothing inconsistent with your claim of continuing California residence during your absence. Steps that you (or your parents)
should take to retain a California residence include:
1. Continue to use a California permanent address on all records—educational, employment, military, etc.
2. Satisfy California resident income tax obligations. (Note: If you are claiming California residence, you are liable for payment of income taxes on your total income from the date you establish California residence. This includes income earned in another state or country.)
3. Retain your California voter’s registration and vote by absentee ballot.
4. Maintain a California’s driver’s license and vehicle registration. If it is necessary to change your driver’s license and/or vehicle registration while you are temporarily residing in another state, you must change them back to California within the time prescribed by law.

Petition for Resident Classification
You must submit petition and documentation by mail or drop off at the Registrar’s Office for a change of classification from nonresident to resident status. For further information, please visit tritonlink.ucsd.edu.

Incorrect Classification
If you were incorrectly classified as a resident, you are subject to a nonresident classification and to payment of all nonresident tuition fees not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents should immediately notify the campus residence deputy.

Inquiries and Appeals
Inquiries regarding residence requirements, determinations, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 9500 Gilman Drive, La Jolla, CA 92093-0022, or the Legal Analyst-Residence Matters, Office of the General Counsel, University of California, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. No other university personnel are authorized to supply information relative to residence requirements for tuition purposes.

A complete version of the regulations is available in the Office of the Registrar. Please note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within thirty calendar days of notification of the residence deputy’s final decision.

Payment of Registration Fees

Billing Statement and Payment Information
Registration at UCSD is a two-step process: (1) enrollment in classes and (2) payment of fees. You must enrol first so that your fees can be assessed. You can pay fees anytime after you enroll in classes. An E-Bill notice will be e-mailed to your UCSD e-mail address after enrollment; however, if you wait to enroll just prior to the enrollment deadline, you will not receive an E-Bill notice. Payment by E-check on TritonLink or make checks payable to: UC Regents. Mail checks to UCSD Cashier’s Office, 9500 Gilman Dr., La Jolla, CA 92093-0009. Be sure to include your student PID number on your check and include the remittance stub from TritonLink or the top portion of your billing statement. Fees are due and payable by the published deadline whether or not an E-Bill notice is received. Payments must be posted to your student account by published deadlines. Your current account activity and balance are available on TritonLink during normal TritonLink hours.

Your monthly billing statement from the university will list your charges and credits. Charges include registration fees, housing, parking, and other indebtedness. Credits include payments and, if you are a financial aid recipient, the funds which are disbursed through UCSD, e.g., Pell Grants, scholarships, and Stafford and Perkins Loans. Financial aid credits will offset against the statement’s charges, and you will either pay the remaining amount on the statement or receive a refund if there is a credit. If you have any questions about the entries, use the phone numbers listed online to contact the appropriate office.

E-Bill notices are sent to students’ UCSD e-mail address and up to three other authorized payers’ e-mail addresses that the student sets up on TritonLink. See http://sbs.ucsd.edu for more information on E-Bill.

If your fees are fully paid by financial aid or other programs and you decide not to attend UCSD, it is very important that you contact your college and initiate withdrawal/leave of absence procedures immediately. Graduate students should refer to the “Graduate Studies” section of the catalog for leave of absence or withdrawal procedures. Failure to do this may result in F grades being assigned to your courses.

Financial Aid/Credit Balances and Refunds
Student financial aid, graduate support, or fee waivers awarded to pay registration fees will be directly credited to your student account and appear on your billing statement as a credit. Financial aid will not be credited to your account until you have completed the enrollment process. Financial aid recipients are expected to be enrolled full-time. Student Business Services will refund all financial aid, including outside agency scholarships and private loans, through direct deposit. For those students who choose not to sign up for direct deposit, refund checks will be mailed to the current mailing address on StudentLink. All Federal Perkins Loan borrowers must complete the information sheet or references and Perkins Loan master promissory note. Loan funds will not be released (credited) to student accounts until the master promissory note is signed. You may complete these documents during your financial aid award and acceptance process, by going to the Student Business Services Web site: http://sbs.ucsd.edu, or in person at the Student Business Services Office.

Loan Counseling
It is required by federal law and/or university policy that all students receiving Perkins, Stafford (subsidized/unsubsidized), or university loans have a pre-loan counseling session wherein they are informed of the rights, obligations, and consequences attached to the loans. These counseling sessions are called entrance interviews. These sessions can be conducted online and provide the student with an understanding of the issues involved in receiving a loan. Also, all graduating students and students who withdraw or take a leave of absence who have received a loan must have final counseling before they leave school. These sessions are called exit interviews. At this time, students are individually told how much they owe on student loans, what their repayment amounts will be, and when their repayments will begin. In both sessions, all counseling content and documentation is made available. You may complete your exit interview by going to the Student Business Services Web site: http://sbs.ucsd.edu, or in person at the Student Business Services Office. Please call (858) 822-4SBS (4727) for more information.

Registration and Other Payments through the Central Cashier’s Office
Registration payments must be made by mail, E-check, or in the Cashier’s Office drop box as early as possible. The Central Cashier’s Office receives payments for all university debts. The mailing address of the Cashier’s Office is: Central Cashier’s Office, UCSD, 9500 Gilman Drive, La Jolla, CA 92093-0009. (Make checks or money orders payable to: UC Regents.)

Triton Registration Installment Plan
The UCSD Triton Registration Installment Plan (TRIP) is available for students who desire an alternative method of financing their registration fees on a short-term basis. All students in good financial and academic standing are eligible for the program, except for those students whose financial aid or graduate support will pay their registration fees. A prerequisite to apply for the program is enrollment for the term. The Triton Registration Installment Plan allows registration
fees to be paid in up to three installments each quarter. On a three-month plan, the first payment is required by the quarterly registration due date. The remaining payments are itemized on the student’s next two monthly UCSD Billing Statements. There is a $30 per quarter nonrefundable application fee for California residents and a $45 quarterly nonrefundable application fee for nonresidents that must be submitted with the first payment. This fee is used strictly to offset the costs of the program. Students may enroll online using TritonLink.

Indebtedness Counseling and Student Business Services Hold Releases

Entering college for the first time can be an overwhelming experience. And part of that experience is learning to handle your own finances. Most students have no real problem, but sometimes things can get out of control. Student Business Services staff members will counsel you on campus indebtedness which you may have already incurred and how to prevent such conditions in the future. It is the policy of the University of California that no student can continue in the next academic quarter if that individual owes the university money. Consequently, when a student owes the university money, an automatic hold prevents him or her from future registration, and from receiving financial aid and transcripts until the bill is paid. It is recognized that there are occasional problems and situations which may be taken into account. On occasion, after counseling, the Student Business Services Office may authorize a Time Payment Agreement (TPA) with a non-current student.

If a student does not resolve their balance, their account may be assigned to an outside collection agency and reported to a credit bureau.

Location

The Central Cashier’s office and Student Business Services are both located in the Student Services Center on the corner of Myers and Rupertus in the University Center. Central Cashier’s is on the ground level, suite 170. Student Business Services is on the third floor, suite 355.

Office Hours

The Central Cashier’s Office is open from 8:00 a.m. to 4:00 p.m. Monday through Friday. The Student Business Services Office is open from 8:00 a.m. to 4:30 p.m. Monday through Friday, except on Thursday, when the office opens at 10:00 a.m.

Deadlines and Penalty Fines

Students should refer to StudentLink for actual deadline dates.

All prior delinquent debts must also be paid. Health insurance is mandatory for all students, both graduate and undergraduate, as a condition of enrollment. All students will be assessed the cost of the policy provided by the campus. Undergraduates who already have adequate health insurance should access StudentLink to request a waiver of this premium. An additional charge will be made for failure to pay required fees or deposits by the dates announced in this catalog and on StudentLink. Please note that students who enroll in courses but fail to pay fees by the published deadline will be assessed a late payment fee. Students who fail to enroll in courses prior to the enrollment deadline will be assessed a late enrollment fee and a late payment fee. Currently these fines are $50 each. (See "Miscellaneous Expenses").

With the exception of appeals to the legal analyst regarding a student’s residence classification, no claim for remission of fees will be considered unless such claim is presented during the fiscal year to which the claim is applicable.

Receipts are issued for all payments made in person at the Central Cashier’s Office, and these should be carefully preserved. No student will be entitled to a refund except after surrender to the Cashier’s Office of the student’s original receipt, if issued, or canceled check or money order receipt.

Exemption from Fees

Except for miscellaneous fees and service charges, no fees of any kind are assessed any surviving child of a California resident who was an active law enforcement or active fire suppression official who was killed in the performance of active duties or died as a result of an accident or injury caused by external violence or physical force incurred in the performance of such duties.

No fees of any kind are assessed a student who was a dependent of a California resident who was killed in the September 11, 2001, terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93. Eligible students must meet the financial need requirements for the Cal Grant A program. No fees of any kind are assessed any undergraduate student who is a recipient of a Congressional Medal of Honor or who is the child of a recipient of the Congressional Medal of Honor. The recipient must be a California resident or must have been a California resident at the time of his or her death. The student may not be older than twenty-seven, and the student’s annual income may not exceed the national poverty level.

Students who believe themselves entitled to one of these exemptions must apply for a fee exemption at the Office of the Registrar before registering. Without this authorization, students will not be permitted to register without payment of the entire fee. Graduate students should apply to the dean of Graduate Studies.

Nonresident Tuition

Students who have not established and maintained California residence for at least one year immediately prior to the residence determination date for the term during which they propose to attend the university, and who do not otherwise qualify for resident classification under California law, are charged, along with other fees, a nonresident tuition fee each quarter. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter. Final classifications are made by the residence deputy, who is located in the registrar's office, on the basis of a Statement of Legal Residence completed by the student and signed under oath. Prospective students who have questions regarding their residence status should consult the General Catalog or contact the residence deputy.

University Registration Fee

The university registration fee is $864 per year for undergraduates and must be paid at the time of registration. It covers services that benefit the student and are complementary to, but not a part of, the instructional program, and it includes recreational activities, student organizations, and the Student Health Service. No part of this fee is refunded to students who do not make use of these privileges.

In addition, there is a campus activity fee of $84 per year for undergraduates, a university center fee of $229.50 for all students to be used for the construction and operation of the student centers, and a $276 recreational facility fee.

Note: Fees are subject to change. Please refer to TritonLinkhttp://www.registrar.ucsd.edu for the most current fee information.

Educational Fee

The educational fee was established by the regents for all students beginning fall quarter 1970. The educational fee is a charge assessed against each registered student to cover part of the cost of the student’s education at the University of California. The educational fee is $6,262 per year for resident undergraduates and $6,849 per year for nonresident undergraduates. The educational fee may be reduced by one-half for students approved on part-time status. Note: Fees are subject to change. Please refer to TritonLinkhttp://www.registrar.ucsd.edu for the most current fee information.

Mandatory Health Insurance

All undergraduate, graduate, professional, and international undergraduates are required to have health insurance as a condition of enrollment. Undergraduates are automatically enrolled in the Undergraduate Student Health Insurance Plan (USHIP). The Graduate Student Health Insurance Plan (GSHIP) provides coverage for graduate, professional, and international undergraduates. USHIP and GSHIP premiums are automatically assessed and paid with registration fees each quarter. For full information, including the plan
brochures, click on “about USHIP Plan” and “about GSHIP Plan” or contact the Student Insurance Office at (858) 822-5981 or (858) 534-2123.

Miscellaneous Expenses, Fees, Fines, and Penalties

Books and supplies average about $469 per quarter. However, students should be aware of the following possible expenses:

- Statement of Intent to Register fee (new undergraduate) $100.00
- Application fee (each campus)
  - Domestic 60.00
  - International 70.00
- Duplicate Photo I.D. Card 15.00
- Transcript of record 6.00
- Verification of Student Data/Status 6.00
- Muir Activity (per quarter) 7.00
- Eleanor Roosevelt (per quarter) 7.50
- Revelle Activity (per quarter) 9.00
- Sixth College Activity (per quarter) 8.00
- Thurgood Marshall Activity (per quarter) 6.00
- Warren College Activity (per quarter) 7.00
- Late enrollment 50.00
- Return check collection 35.00
- Return e-check collection 35.00
- Late payment of fees (late registration) 50.00
- Duplicate diploma 25.00
- Statement late charge 25.00

(See also “Withdrawal from the University.”)

NOTE: Fees are subject to change. Please refer to TritonLink http://www.registrar.ucsd.edu for the most current fee information.

Returned Check Policy

Several facilities at UCSD accept personal checks for payments and/or cash. Any individual who writes checks with insufficient funds will be subject to all legal action deemed appropriate by the university. In addition, anyone who writes to the university three or more checks that are subsequently returned will have their check writing privileges permanently revoked.

Parking

Students who park motor vehicles on the campus are subject to parking fees. Parking permits may be purchased through StudentLink or at the parking office in the Gilman parking structure. A copy of the campus parking regulations may be obtained from the cashier at the time of permit purchase.

Part-Time Study at the University of California

General Policy

1. Degree programs in the university may be open to part-time students wherever good educational reasons exist for so doing.
2. No majors or other degree programs will be offered only for part-time students, except as specifically authorized by the Academic Senate.
3. For the purposes of this statement of policy and procedures, the following definition applies:

A part-time undergraduate student is one who is approved to enroll for ten units or fewer, or an equivalent number of courses, per quarter.

Admissions and Enrollment

1. The same admissions standards that apply to full-time students will apply to part-time students.
2. Approval for individual students to enroll on a part-time basis will be given for reasons of occupation, family responsibilities, health, or, for one quarter only, graduating senior status.
3. Approval to enroll as a part-time student shall be given by the appropriate dean or provost.
4. Students must apply for part-time study prior to the end of the second week of the quarter and must be enrolled in ten or fewer units at that time (including any units taken through UCSD Extension) to qualify for reduced fees.

Procedures

Students must apply for part-time status on the Part-Time Study application form available at their colleges prior to the end of the second week of the quarter. Approval for part-time study is granted for one academic year only—fall through spring quarters, winter through spring quarters, or spring quarter only. Students must reapply for approval each fall quarter and substantiate reasons for request. Approval for part-time study will automatically exempt students from the thirty-six unit-per-year minimum progress requirement. Students who are receiving financial assistance should contact their college financial aid office regarding eligibility requirements.

Reduced Fees

Undergraduate students who have been approved for part-time study and who are enrolled in ten units or fewer at the end of the second week of classes are eligible for a reduction of one-half of the educational fee and one-half of nonresident tuition, if applicable. Students who drop to ten or fewer units after this date will receive no reduction, and any student who receives a reduction in fees will be billed for the difference if the number of units increases to ten and one-half or more anytime in the quarter.

Undergraduates enrolled in Education Abroad and other special programs are excluded from this reduced fee policy. Employees of the university enrolled as students in the Employee Program have fees reduced by waiver from the Personnel Office and are not eligible to receive this further reduction. Extension courses taken by students in the Complimentary Enrollment Program will be included in the unit count whether or not the credit is accepted as part of a university degree program. Questions concerning this policy may be addressed to the Office of the Registrar.
Academic Regulations

Undergraduate Degree Requirements

Each of the undergraduate colleges on the San Diego campus has specific requirements for a degree. (See “Choosing a College at UCSD.”)

Changes in Requirements

When a change in graduation requirements is introduced, it is implemented so that continuing students (as defined below) are not substantially hindered in the orderly pursuit of their degrees. Since changes in requirements vary greatly in character, this principle will have different implications for different changes. For purposes of this policy, ‘continuing students’ are those who began higher education at UC San Diego or elsewhere before the change. Colleges and departments may deny protection under this policy to a student who has interrupted his or her education for more than two years.

Students transferring to UCSD from another UC campus who have completed their lower-division general-education requirements at a UC campus are considered to have met UCSD’s lower-division general-education requirements at Thurgood Marshall College, Warren College, Sixth College, and John Muir College. A letter certifying satisfaction of general education requirements under the UC reciprocity agreement must be sent to the Academic Advising Office of the student’s college. UCSD upper-division general education requirements must be satisfied. (See “Graduation Requirements” for each undergraduate UCSD college.)

Students transferring to UCSD from California Community College campuses may elect to satisfy their lower-division general-education and breadth requirements prior to transfer by completing general-education/breadth requirements using the UCSD Articulation Agreement on file at the California Community Colleges; following the Intersegmental General Education Transfer Agreement; or signing a TAG (Transfer Admission Guarantee) contract and completing TAG requirements prior to entering UCSD. See “New University of California Transfer Agreements” in the “Undergraduate Admissions, Policies and Procedures” section of this catalog.

Requirements for the Bachelor’s Degree

All course work required for a degree must be completed by the end of the quarter filed for graduation.

Every candidate for a bachelor’s degree must have completed a major.

1. A major shall require the equivalent of twelve or more upper-division courses (forty-eight or more units).

2. Requirements for majors shall be determined by departments and programs, subject to the approval of the Committee on Educational Policy.

3. Double Majors: With the approval of both departments or programs and of the college provost, a student in good standing may declare a double major.

a. A student with a double major must fulfill the separate requirements of each major, and the equivalent of at least ten upper-division courses (forty units) must be unique to each major. Courses taken in fulfillment of lower-division requirements may overlap to any degree.

b. The two majors may not be within the School of Engineering, nor, except with the approval of the Committee on Educational Policy, within a single department.

c. A student who has declared a double major is not subject to the maximum-unit limitations of Regulation 600.C. and may accrue up to 240 units.

d. A student with a double major may graduate only upon completion of all requirements for both majors. Both majors will be noted on the student’s transcript and diploma. If the two majors lead to different degrees (B.A. and B.S.), that fact will be noted on the transcript, and the two degree designations will appear on one diploma.

e. A student who has declared a double major may graduate in one major upon completion of all requirements for that major, but may not continue in the University for completion of the second major.

4. An undergraduate student must have declared a major or pre-major upon completion of ninety units.

Other requirements for graduation shall be determined by the colleges in conformity with universitywide regulations and subject to approval by the San Diego Division of the Academic Senate.

American History and Institutions

A knowledge of American history and of the principles of American institutions under federal and state constitutions is required of all candidates for the bachelor’s degree. This requirement may be met in any one of the following ways:

1. By having passed with a grade of C or better one high-school unit in American history, or one-half high-school unit in American history and one-half high-school unit in civics or American government.

2. By completing with a grade of P or C— or better any one-quarter course of instruction accepted as satisfactory by the Committee on Educational Policy and Courses. Any of the following courses are suitable for fulfilling the requirement: HILD 2A-B-C, HILD 7A-B-C, or any course listed under HIUS (other than HIUS Colloquia); Political Science 10, 100A, 100B, 100C, 102C, 102H, 104A, 110EA-EB, 110J, 142A; and Ethnic Studies 112A-B, 125, 130, 131, 149, 167, 170A-B.

3. By presenting proof of having received a score of 550 or more on the SAT II Subject Test of the College Entrance Examination Board (CEEB) in American History.

4. By presenting proof of having received a grade of 3 or higher on the Advanced Placement Test in American History administered by the Educational Testing Service, Princeton, New Jersey.

5. By presenting proof of having satisfied the present requirement as administered at another collegiate institution within the state.

6. By presenting proof of successful completion of an acceptable one-quarter or one-semester course, with a grade of C or better, in either American history or American government at a community college within the state.

7. By presenting proof of successful completion of an acceptable one-quarter or one-semester course, with a grade of C or better, in either American history or American government at a recognized institution of higher education, junior college included, in another state.

8. An alien attending the university on an F-1 or J-1 student visa may, by showing proof
of temporary residence in the United States, petition for exemption from this requirement through the office of his or her college provost.

**UC Entry Level Writing Requirement (formerly Subject A: English Composition)**

The University of California requires all undergraduate students (including international students) to demonstrate a minimum proficiency in English composition (the Entry Level Writing requirement). This proficiency can be demonstrated by:

1. Submitting a score of 680 or better on either the Writing Test, English Composition, or the English Composition with Essay Test, SAT II Subject Tests of the College Entrance Examination Board (CEEB) (Note: not to be confused with the verbal portion of the Scholastic Assessment Test [SAT I]); or
2. Submitting a score of 3, 4, or 5 on the CEEB Advanced Placement Test in English; or
3. Submitting a score of 5 or better in the International Baccalaureate Higher Level examination in English (Language A only); or
4. Submitting proof of completion, prior to enrollment at UCSD, of an acceptable transfer-level college course of four quarter-units or three semester-units in English composition with a grade of C or better; or
5. Writing a passing essay on the UC Analytical Writing Placement Exam (which is required of all students who have not otherwise met the requirement). This exam is administered statewide during May and on campus at the start of fall quarter. This examination may be taken only once.
6. Achieving a minimum score on the ACT Assessment Writing Test (English/Writing score).

All students who have not previously satisfied the Entry Level Writing requirement must take the UC Analytical Writing Placement Exam prior to enrollment at UCSD. Students who fail this examination must enroll each quarter in an approved Entry Level Writing requirement course until they satisfy the Entry Level Writing requirement. Students satisfy the requirement by achieving a grade of C or better in SDCC 1 (English Composition—Entry Level Writing Requirement) and by passing the Entry Level Writing Requirement Exit Examination at the end of SDCC 1. The exit examination is administered by the Basic Writing Office. Students whose performance on the Analytical Writing Placement Exam indicates that they need work in English as a Second Language must enroll in ESL courses for three quarters (or until released by the ESL director) before enrolling in SDCC 1. Students must enroll in SDCC 1 (or ESL) during their first quarter of residence at UCSD. For further information on SDCC 1, refer to “Entry Level Writing Requirement” in the catalog section “Courses, Curricula, and Programs of Instruction.” For further information on ESL, see “English as a Second Language” in the catalog section “Courses, Curricula, and Programs of Instruction.”

The Entry Level Writing requirement must be satisfied during a student’s first year of residence. Students will be barred from enrollment at the university if they fail to satisfy the Entry Level Writing requirement by the end of their third quarter of enrollment at UCSD. (Exception: Students in need of ESL course work may have up to three extra quarters of residence in which to satisfy the Entry Level Writing requirement.) Students will not be allowed to enroll in university-level writing courses at UCSD until the Entry Level Writing requirement has been satisfied. Students who have been barred from enrollment because of failure to satisfy the Entry Level Writing requirement will be allowed to present evidence of further work in composition. If the Basic Writing Office director approves, these students may take an Entry Level Writing requirement examination a final time. Students performing successfully on this final examination will be eligible to apply for re-enrollment at the university.

For further information about the UC Entry Level Writing requirement or the Proficiency Test, please visit the Basic Writing Office, 3232 Literature Building, or call (858) 534-6177.

**Senior Residence**

Each candidate for the bachelor’s degree must complete thirty-five of the final forty-five units in residence in the college or school of the University of California in which the degree is to be earned. For further information on ESL, see “English as a Second Language” in the catalog section “Courses, Curricula, and Programs of Instruction.” For information on Educational Policy, see “Committee on Educational Policy” in the catalog section “Courses, Curricula, and Programs of Instruction.”

The Entry Level Writing requirement must be satisfied during a student’s first year of residence. Students will be barred from enrollment at the university if they fail to satisfy the Entry Level Writing requirement by the end of their third quarter of enrollment at UCSD. (Exception: Students in need of ESL course work may have up to three extra quarters of residence in which to satisfy the Entry Level Writing requirement.)

Students will not be allowed to enroll in university-level writing courses at UCSD until the Entry Level Writing requirement has been satisfied. Students who have been barred from enrollment because of failure to satisfy the Entry Level Writing requirement will be allowed to present evidence of further work in composition. If the Basic Writing Office director approves, these students may take an Entry Level Writing requirement examination a final time. Students performing successfully on this final examination will be eligible to apply for re-enrollment at the university.

For further information about the UC Entry Level Writing requirement or the Proficiency Test, please visit the Basic Writing Office, 3232 Literature Building, or call (858) 534-6177.

**Maximum Unit Limitation**

1. An undergraduate student may register for no more than 200 course units. An exception is permitted for candidates for B.S. degrees in engineering, for whom the limits are 240 units in Revelle and Roosevelt Colleges and 230 units in all other colleges. Other exceptions will be granted only for compelling academic reasons and only with the approval of the college provost and the concurrence of the Committee on Educational Policy.

2. Transfer units applicable toward general-education requirements or major requirements are included in the maximum unit calculation; all other transfer units are excluded. Advanced Placement and international baccalaureate units are excluded.

Special kinds of study—e.g., laboratories, reading programs, studio work—may be required in addition to the basic course work in given curricula.

**Graduation Credit for Physical Education Courses**

No more than three units of physical education, whether earned at UCSD or transferred from another institution, may be counted toward graduation.

**Undergraduate Minors and Programs of Concentration**

A minor curriculum—or “minor” for short—is a set of courses on a well-defined subject. For students entering after January 1, 1998: a minor shall consist of at least twenty-eight units, of which at least twenty units must be upper-division. For sound academic reasons and with the approval of the Committee on Educational Policy, a minor may be established with fewer than twenty upper-division units. All minor curricula must be approved by the Committee on Educational Policy and be published in this General Catalog. A student may not apply toward the minor any upper-division course that has been used to satisfy the requirements of his or her major curriculum. A student’s successful completion of a minor curriculum will be recorded on his or her transcript at graduation.

Certain colleges require their students to complete one or more “programs of concentration” before graduation, and the courses or types of courses acceptable for programs of concentration are determined by the faculty of the college or a subcommittee thereof. A program of concentration is not necessarily a minor. Indeed, a program of concentration is a minor only if it meets the criteria in the above paragraph, and only then may it be listed on a student’s transcript as a minor. Otherwise it will be recorded as a concentration at graduation.

**Honors**

**College Honors at Graduation**

The Academic Senate has established the following standards for award of college honors at graduation:

There shall be a campus-wide requirement for the award of college honors at graduation. No more than 14 percent of the graduating seniors on campus shall be eligible for college honors. Normally, no more than the top 2 percent shall be eligible for summa cum laude and no more than the next 4 percent for magna cum laude,
although minor variations from year to year shall be permitted. The remaining 8 percent are eligible for cum laude. The ranking of students for eligibility for college honors shall be based upon the grade-point average. In addition, to be eligible for honors, a student must receive letter grades for at least eighty quarter-units of course work at the University of California. Each college may award honors at graduation only to those who are eligible to receive college honors.

Department Honors

Each department or program may award honors to a student at graduation in accordance with the following criteria:

1. The student must have completed a special course of study within the department or program. The requirements for this special course of study shall be approved by the divisional Committee on Educational Policy and published in the catalog. The requirements must include 8–12 units of supervised research or other creative activity leading to the preparation of a paper or other appropriate project.

Public presentation of the project, through performance, participation in the undergraduate research conference, or other appropriate means, shall explicitly be encouraged.

2. The department or program shall establish formal procedures and criteria for application and admission to the program, which shall normally include a GPA of 3.5 in the major as a prerequisite. Students with a GPA lower than 3.5 may be admitted by exception if they show promise of success in research or creative activity.

3. Each student whose project earns the equivalent of a grade of "B" or better and who has maintained a GPA of at least 3.25 in the major shall be entitled to the designation "with distinction" on the diploma after the departmental or program name. Subject to the approval of the Committee on Educational Policy, each department or program shall establish criteria for the award of the designations "with high distinction" and "with highest distinction.

Honors awarded by departments may be designated on the diploma by the words "with distinction," "with high distinction," and "with highest distinction" after the departmental or program name. Currently the departments and majors listed below are approved to award honors to graduating seniors: Anthropology, Biology, Chemistry, Chinese Studies, Classical Studies, Cognitive Science, Communication, Critical Gender Studies, Earth Sciences, Economics, Electrical and Computer Engineering, German Studies, History, Human Development, International Studies, Japanese Studies, Judaic Studies, Linguistics, Literature, Management Science, Mathematics, Muir Special Project, Music, Philosophy, Physics, Political Science, Psychology, Roosevelt Individual Studies, Sociology, Study of Religion, Theatre and Dance, Urban Studies and Planning, and Visual Arts.

Provost Honors

Provost honors are awarded quarterly based upon the completion of twelve graded units with a GPA of 3.5 or higher with no grade of D, F, or NP recorded for the quarter.

Phi Beta Kappa

Phi Beta Kappa is the oldest and most prestigious academic honor society for undergraduates in the liberal arts and sciences in America. UCSD is one of only 278 four-year institutions that have been granted chapters since the society was founded in 1776. In addition, there are approximately fifty active PBK alumni associations in major cities around the country.

More than 200 UCSD faculty and staff were initiated at their own undergraduate colleges, and they make up the local chapter, Sigma of California. Each spring the campus chapter elects student members on the basis of high scholastic achievement and breadth of academic background. The minimum criteria for membership, evaluated at the end of winter quarter, include:

1. Successful completion of at least 160 quarter-units by the time of consideration and at least junior standing.
2. Cumulative GPA of 3.65 or higher for work at UCSD. GPAs from transfer work are considered, but the GPA at UC must be at least 3.65, as must the overall GPA. (Juniors are rarely invited into Phi Beta Kappa, and they are held to higher standards, including a minimum GPA of 3.80.)
3. A minimum of five courses in the humanities or equivalent subjects, explicitly excluding performance or studio courses as required by the National Society.
4. At least one year of college-level course credit in a second language or officially demonstrated equivalent literacy and proficiency.
5. At least one year of college-level course credits in mathematics, quantitative science, logic, or statistics (not all science courses fulfill this requirement).
6. Full-time enrollment at UCSD for at least two years (or completion of at least seventy graded credits at UCSD).

As required by the National Society of Phi Beta Kappa, when they consider a student for membership the reviewers examine the excellence of the individual's academic record, the breadth and quality of the courses taken, and evidence that the student has pursued a serious line of work and is of good character. Invitations to membership are sent simultaneously by e-mail and by letter to each student's permanent address, as maintained by the student on StudentLink. Letters are sent in mid-May, and initiation takes place in early June.

Application for Degree

Undergraduate seniors are required to file a Degree and Diploma Application form with their college academic advising office. Students should check with their college academic advising office for exact deadlines. Advising and counseling sessions should take place well before the quarter of graduation to ensure all degree requirements will be satisfied. Applications not on file by the deadline are subject to special approval. Students who have not completed all degree requirements by the end of the quarter filed for graduation must file a new application. Failure to file this application may delay the receipt of the diploma.

Specific Regulations

Progress toward Degrees

In order to apply the units of a course toward unit requirements for a degree, a student must receive an A, B, C, D, F, or S grade in the course. (Plus or minus suffixes (+/-) may be affixed to A, B, and C.) Further, an undergraduate student must have a 2.0 or higher grade-point average (GPA) to receive a bachelor’s degree, and a graduate student must have a 3.0 or higher GPA to receive a higher degree.

Probation

An undergraduate student is subject to academic probation if at the end of any term his or her GPA for that term is less than 2.0.

Subject to Disqualification

An undergraduate student is subject to academic disqualification from further full-time registration if at the end of any term his or her GPA for that term is less than 1.5 or if he or she has completed two successive terms on academic probation without achieving a cumulative GPA of 2.0. Continued registration of an undergraduate who is subject to disqualification is at the discretion of the faculty of the student’s college or its authorized agent (generally the provost/Office of the Provost).

If a student is not currently in scholastic good standing or has been denied registration for the next ensuing quarter on the date on which he or she left the university, a statement of his or her status shall accompany his or her transcript. A student who has been disqualified from further registration at the University of California may not register for UCSD courses through Summer Session, through UCSD Extension by way of the concurrent enrollment mechanism, or in UCSD Extension courses offered at the 100 level.
Students receiving financial assistance should refer to information in the Financial Aid section of this catalog. Unique scholarship eligibility requirements must be met.

Minimum Progress
A full-time undergraduate student is subject to disqualification from further full-time registration if he or she does not complete thirty-six units in any three consecutive quarters of enrollment. Continued registration of an undergraduate who is subject to disqualification due to lack of minimum progress is at the discretion of the faculty of the student’s college or its authorized agent (generally the provost/Office of the Provost).

Eligible students may file for an exemption from the minimum progress requirement by completing the Part-time Study application and receiving college approval prior to the end of the second week of the quarter. (See “Part-time Study at the University of California”)

Double Majors
See “Requirements for the Bachelor’s Degree” in this section.

Repetition of Courses
Repetition for credit of courses not so authorized by the appropriate Committee on Courses is allowed subject to the following limitations:
1. A student may not repeat a course for which a grade of A, B, C, I, P, or S is recorded on his or her transcript. (Plus or minus suffixes (+/-) may be affixed to A, B, and C.)
2. Courses in which a grade of D or F has been awarded may not be repeated on a P/NP or S/U basis. (Graduate students must petition and receive approval in advance to repeat a course for credit.)
3. Undergraduate students may repeat a course in which a grade of NP has been awarded for a P/NP or letter grade, if applicable. Graduate students may repeat a course in which a grade of U has been awarded on an S/U basis only.
4. Repetition of a course for which a student’s transcript bears two or more entries with grades among D, F, NP, or U requires approval of the appropriate provost or dean.
5. All grades received by a student shall be recorded on the student’s transcript. A student may receive degree credit for a course only once, unless the course has been approved for repetition.
6. The first sixteen units of courses that have been repeated by an undergraduate student and for which the student has received a grade of D, F, or NP, shall not be used in grade-point calculations, unless the course is repeated by a student who has admitted to or been found guilty of academic dishonesty; in which case, the units for both the initial course and the repeated course shall be counted in grade-point calculations.

NOTE: Although the University of California grade-point average will not include these repeated courses, other institutions/graduate programs, and agencies may recalculate the grade-point average to reflect all assigned grades.

Special Studies Courses
Subject to the limitations below, a student may earn credit for supervised special studies courses on topics of his or her own selection. An undergraduate taking one or more special studies courses must complete an application for each such course before the start of the course.

Course Number
Ordinarily, special studies courses are numbered 97, 98, or 99 for lower division and 197, 198, or 199 for upper division. The 97 and 197 courses are for individually arranged field studies. The 98 and 198 courses are for directed group study. The 99 and 199 courses are for independent study.

Limitations
1. Enrollment requires the prior consent of the instructor who is to supervise the study and the approval of the department chair. The applicant shall show that his or her background is adequate for the proposed study.
2. A student must have completed at least thirty units of undergraduate study at UCSD and must have attained a UCSD grade-point average of at least 3.0 to enroll in a lower-division special studies course, and at least ninety units of undergraduate study and must have attained a grade-point average of at least 2.5 to enroll in an upper-division special studies course.
3. A student may enroll for no more than a total of four units of 98, 99, 198, and 199 Special Studies courses in one term.
4. Except as may otherwise be authorized by the CEP Subcommittee on Undergraduate Courses (e.g., for honors programs), only a grade of P or NP is to be assigned for undergraduates enrolled in any special studies course.
5. Subject to the approval of the CEP Subcommittee on Undergraduate Courses, a department may impose additional limitations on its supervised special studies courses.

Exceptions
On the advice of the instructor(s) and the department chair concerned, the provost of a student’s college may authorize exceptions to the limitations (2) and (3) listed above.

Procedures
1. Students must complete an “Application for UCSD Special Studies Course Enrollment,” available in department offices and via TritonLink, and secure instructor and department chair approval.
2. Students must submit an approved form to the Office of the Registrar to enroll in a special studies course.

Undergraduate Assistance in Courses
An undergraduate instructional apprentice is an undergraduate student who serves as an assistant in an undergraduate course under the supervision of a faculty member. The purpose of the apprenticeship is to learn the methodology of teaching through actual practice in a regularly scheduled course.

Guidelines
1. An undergraduate instructional apprentice shall be an upper-division student. He or she shall be involved only with lower-division courses.
2. Students are not permitted to assist in courses in which they are enrolled.
3. An undergraduate instructional apprentice must have a minimum grade-point average of 3.0. Departments may establish higher grade-point average requirements.
4. The faculty instructor is responsible for course content and for maintaining the overall quality of instruction, including supervision of undergraduate instructional apprentices. The faculty instructor is responsible for all grades given in the class.
5. The instructor is expected to meet regularly with the undergraduate instructional apprentice to evaluate the student’s performance and to provide the direction needed for a worthwhile educational experience.
6. An undergraduate instructional apprentice may receive credit on a Pass/Not Pass basis only (through registration in a 195 course), subject to approval by the Committee on Educational Policy.
7. A student may not be an undergraduate instructional apprentice more than once for the same course for credit.
8. A student may not be an undergraduate instructional apprentice in more than one course in a quarter.
9. The total credit accumulated as an undergraduate instructional apprentice shall not exceed eight units.
Procedure
All departments/programs using undergraduate instructional apprentices shall submit to the CEP Subcommittee on Undergraduate Courses a description of the role of the undergraduate instructional apprentice, as part of the petition for approval. Any deviation from the guidelines above must be explained and justified in a memo accompanying the petition. Any major change in the function or duty of the apprentice in a course should also be approved by CEP. All UGIA applications must be received and approved by the CEP prior to the start of the quarter in which the student is to apprentice.

Writing Requirements
A student may register in an upper-division course only if the student has satisfactorily completed the writing requirement of his or her college or has obtained the consent of the instructor of the upper-division course. The requirement is waived for a student who has been admitted as a transfer student and has not completed three quarters of residence at UCSD.

Final Examinations
Final examinations are obligatory in all undergraduate courses except laboratory courses, or their equivalent, as individually determined by the Committee on Courses.

Each such examination shall be conducted in writing whenever practical and must be completed by all participants within the announced time shown in TritonLink under Calendars and Exam Schedules. These examinations may not exceed three hours in duration.

In laboratory courses, the department concerned may, at its option, require a final examination subject to prior announcement in TritonLink under Calendars and Exam Schedules.

Religious Accommodation
It is the policy of the university to make reasonable efforts to accommodate students having bona fide religious conflicts with scheduled examinations by providing alternative times or methods to take such examinations. If a student anticipates that a scheduled examination will occur at a time at which his or her religious beliefs prohibit participation in the examination, the student must submit to the instructor a statement describing the nature of the religious conflict and specifying the days and times of conflict.

1. For final examinations, the statement must be submitted no later than the end of the second week of instruction of the quarter.
2. For all other examinations, the statement must be submitted to the instructor as soon as possible after a particular examination date is scheduled.

If a conflict with the student’s religious beliefs does exist, the instructor will attempt to provide an alternative, equitable examination which does not create undue hardship for the instructor or for the other students in the class.

Policy on Final Examinations
a. Academic Senate Regulations specify that final examinations are required in all undergraduate courses, unless an exception has been approved by CEP or the CEP Subcommittee on Undergraduate Courses. Final examinations are, however, normally not required in laboratory courses.
b. Final examinations may not be given at any time before examination week without explicit approval of CEP.
c. Although the instructor may give a final examination at an alternative time during final examination week with the approval of CEP, students must be permitted to take an equivalent examination at the originally scheduled time if they so desire.
d. An instructor may administer an examination at an alternative time if a valid reason is given by the student for not taking the regularly scheduled examination. Valid reasons include: serious illness and family disasters. Rescheduling as a result of a religious obligation is governed by the UCSD Policy on Religious Accommodation.
e. No student may be excused from assigned final examinations.
f. A final examination must, whenever practicable, be written and must be completed by all participants within a previously announced time limit.
g. Final examinations in non-laboratory courses may not exceed three hours duration.
h. No instructor may require a “take-home” final examination be turned in before the date and hour at which the examination for the course was scheduled by the Registrar’s Office.
i. Faculty members (including visiting faculty) must be available to students during final examination week up to the time when the final examinations of their courses are given and, physically present in the examination room for the entire final examination, except in special cases when an exam is given in more than one room. In cases where the approved absence of a course instructor cannot be avoided, the department chair or program director must seek CEP approval to designate another faculty member to administer the final examination. Nevertheless, faculty course instructors themselves must assign grades for the courses they teach.

Policy on Midterm Examinations
a. Faculty are obliged to have posted in the Schedule of Classes the date and time of any midterm which is to be given outside of the regularly scheduled class hours.
b. Additionally, any midterm given outside of the regularly scheduled class hours must be announced in a syllabus distributed to the class at the beginning of the quarter.

Retention of Examination Papers
Instructors are required to retain examination papers for at least one full quarter following the final examination period, unless the papers have been returned to the students.

Credit by Examination
Credit by examination may be authorized and given by the instructor for a course with the concurrence of the student’s provost (or dean). The examination will cover work for the entire course.

The student requesting credit by examination must be registered and in good academic standing.

A part-time student who, by registering to take a course credit by examination, surpasses the number of units allowed for part-time status, must register and pay fees as a full-time student.

If credit by examination is authorized, the student will receive a grade of A+, A, A–, B+, B, B–, C+, C, C–, D, or F unless the student’s petition for examination specifies the grade to be Pass or Not Pass. The student’s record will indicate that the course was attempted through credit by examination.

Use of Student Petition
For exceptional circumstances, students may request approval for variances to regulations and policies. This should be done by filling out an Undergraduate Student Petition (available on StudentLink, in the provost’s offices, or the Office of the Registrar), securing the necessary approvals, and filing the petition with the appropriate department or college academic advising office.
Grading Policy

Grades in undergraduate courses are defined as follows: A, excellent; B, good; C, fair; D, poor; F, fail; I, incomplete (work of passing quality but incomplete for good cause); and IP (In Progress). The designations P (Pass) and NP (Not Pass) are used in reporting grades for some undergraduate courses. P denotes a letter grade of C– or better. A blank grade indicates no record or no report of grade was received from the instructor. W is recorded on the transcript indicating the student withdrew or dropped the course sometime after the beginning of the fifth week of a quarter.

NOTE: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.

Instructors have the option of assigning plus (+) and minus (–) suffixes to the grades A, B, and C. This option became available as of fall 1983.

Grade Points

For each student, the registrar will calculate a grade-point average (GPA) over courses taken at any campus of the University of California, not including Extension courses. Grade points per unit will be assigned as follows: A=4, B=3, C=2, D=1, F=0. When attached to the grades of B and C, plus (+) grades carry three-tenths of a grade point more per unit. The grade of A+, when awarded, represents extraordinary achievement but does not receive grade-point credit beyond that received for the grade of A. When attached to the grades of A, B and C, minus (–) grades carry three-tenths of a grade point less per unit than the unsuffixed grades. Courses in which an I, IP, P, NP, S, U, or W grade has been awarded will be disregarded in grade-point calculations. A graduate student's GPA will be calculated over courses taken while in graduate standing.

</tr>
</tbody>
</table>

The grade-point average is computed by dividing the total number of grade points earned by the total unit value of letter-graded courses completed.

At the end of each quarter, the instructor of each course will assign a letter grade to each student who was enrolled in that course at the end of the ninth week of instruction on the basis of the work required for the entire course. An I grade may be assigned if appropriate.

Changes in Grades

All grades except I and IP are final when filed by instructors on end-of-term grade reports. However, a final grade may be corrected when a clerical or procedural error is discovered. No change of a final grade may be made on the basis of revision or augmentation of a student’s work in the course. No term grade except Incomplete may be revised by further examination. No grade may be changed after one calendar year from the time it was recorded.

No Report/No Record

A blank entry on student transcripts in lieu of a grade indicates that no grade was assigned by the instructor. A blank entry will lapse automatically into an F, NP, or U if not replaced by a final grade by the last day of instruction of the subsequent quarter.

Pass/Not Pass

The Pass/Not Pass option is designed to encourage undergraduate students to venture into courses which they might otherwise hesitate to take because they are uncertain about their aptitude or preparation. Consistent with college policy, an undergraduate student in good standing may elect to be graded on a P/NP basis in a course. No more than one-fourth of an undergraduate student’s total UCSD course units may be graded on a P/NP basis. Departments may require that courses applied toward the major be taken on a letter-grade basis. Enrollment under this option must take place within the first four weeks of the course. A grade of Pass shall be awarded only for work which otherwise would receive a grade of C– or better. Units passed shall be counted in satisfaction of degree requirements, but such courses shall be disregarded in determining a student’s grade-point average.

If students wish to change their selected grading option after enrolling, they may use WebReg in StudentLink, or complete an Add/Change/Drop card and file it at the Registrar’s Office. The last day to change grading options is the end of the fourth week of instruction.

Only a grade of P or NP is to be assigned for courses numbered 97, 98, 99, 195, 197, 198, and 199. Subject to the approval of the CEP Subcommittee on Undergraduate Courses, departments may impose additional limitations or restrictions.

The W Grade

When a student withdraws from the university or drops a course, other than a laboratory course, between the beginning of the fifth week of instruction and the end of the ninth week of instruction of a quarter, the registrar will assign a W to the student for each course affected. Only the registrar may assign a W.

NOTE: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade. Courses in which a W has been entered on the student’s transcript will be disregarded in determining a student’s grade-point average.

Adding and Dropping Courses and the W Grade

A student may, with the approval of the instructor (and advisor, if required), add a course to the study list before the end of the second week of instruction of a quarter.

A student may drop a course before the end of the ninth week of instruction via TritonLink, after first notifying the instructor and/or department.

A student who wishes to drop all courses is required to file an Undergraduate Request for Withdrawal form with the college academic advising or dean’s office.

1. A course dropped before the end of the fourth week of instruction will not appear on the student’s transcript.

NOTE: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.

2. If a student drops a course after the end of the fourth week of instruction and before the end of the ninth week of instruction, the registrar will assign a final grade of W to the student for that course. Students may only receive one W per course.

3. A student may not drop a course after the end of the ninth week of instruction.

When an instructor has assigned a grade in a course in accordance with the Academic Senate policy on integrity of Scholarship prior to the end of the ninth week of instruction, that grade may not subsequently be changed by dropping the course or withdrawing from the university. If an instructor filed a charge with the academic integrity coordinator, the student may not drop the course.

Withdrawing from School and the W Grade

A student may withdraw from the university before the end of the ninth week of instruction of a quarter.

1. If a student withdraws before the end of the fourth week of instruction, no course entries will appear on the student’s transcript for that quarter.

NOTE: Students who drop certain laboratory courses after the second scheduled meeting period will receive a W grade.
2. If a student withdraws after the end of the fourth week of instruction and before the end of the ninth week of instruction, the registrar will assign a final grade of W to the student for each course in which the student was enrolled at the beginning of the fifth week of instruction.

3. Each student will receive a final grade for each course in which the student was enrolled at the end of the ninth week of instruction of the quarter.

When an instructor has assigned a grade in a course in accordance with the Academic Senate policy on integrity of Scholarship prior to the end of the ninth week of instruction, that grade may not subsequently be changed by dropping the course or withdrawing from the university.

**The In Progress (IP) Grade**

For exceptional and compelling reasons, a course extending over more than one quarter may be authorized with the prior approval of the Committee on Educational Policy and Courses (for undergraduate courses) or the Graduate Council (for graduate courses). In such courses an evaluation of a student’s performance may not be possible until the end of the final term. In such cases the instructor may assign the provisional grade IP (in progress).

IP grades shall be replaced by final grades if the student completes the full sequence. The instructor may assign final grades, grade points, and unit credit for completed terms when the student has not completed the entire sequence provided that the instructor has a basis for assigning the grades and certifies that the course was not completed for good cause. An IP not replaced by a final grade will remain on the student's record.

In calculating a student's grade-point average, grade points and units for courses graded IP shall not be counted. However, at graduation, courses still on the record as graded IP must be treated as courses attempted in computation of the student's grade-point average in assessing a student's satisfaction of Senate Regulation 634.

**The Incomplete (I) Grade**

Academic Senate regulations state that the Incomplete grade (I) for undergraduates shall be disregarded in determining a student's grade-point average, except at point of graduation, when students must have an overall 2.0 (C) on all work attempted at the University of California. All work required for a degree must be completed by the end of the quarter the student filed for graduation. Students requesting an I grade the last quarter before graduation may have their graduation date delayed.

Undergraduate students whose work is of non-failing quality but incomplete for good cause, such as illness, must file a Request to Receive/Remove Grade Incomplete form. Graduate students enrolled in graduate courses may request instructors to assign the grade of “Incomplete” in order to be permitted to complete required work within the following quarter. If the required work is not submitted by the end of the quarter following so that the grade can be reported by the instructor, the grade will automatically be changed to one of “Failure” by the registrar. Graduate students must file a Request to Receive/Remove Grade Incomplete form.

1. Students should complete their portion of the request form, including the reason they are requesting the Incomplete, and provide appropriate documentation to support their request (e.g. doctor’s note). The deadline for filing a Request for an Incomplete shall be no later than the first working day after final examination week.

2. The instructor has the option to approve or disapprove the request and should state on the form how and when the I is to be completed. If approved, the instructor submits the form with term grade reports.

3. Students must complete the work to remove the Incomplete on or before the date agreed upon with the instructor and in time for the instructor to assign a grade before the end of finals week the following quarter.

4. Failure to complete this work within the regulation time limit will result in the Incomplete lapsing to a permanent F, NP, or U grade.

A student who has received an I grade should not re-enroll in the course to make up the missing work. If the student were to re-enroll, the course would be considered a repeat and would not remove the prior quarter's Incomplete, which would lapse to a permanent F, NP, or U grade.

**Intended Use of the Incomplete**

The Incomplete is intended for use when circumstances beyond a student’s control prohibit taking the final exam or completing course work.

The Incomplete is not intended as a mechanism for allowing a student to retake a course. A student who has fallen substantially behind and needs to repeat a course can drop the course prior to the end of the ninth week of classes. Otherwise, the instructor should assign the appropriate final grade (D, F, NP, or U, for example).

An Incomplete may not be used simply to allow a bit more time for an undergraduate student who has fallen behind for no good reason. An I may be granted only to students who have a legitimate excuse. Examples of unacceptable reasons for approving an Incomplete include the need to rewrite a paper; the demands of a time-consuming job; the desire to leave town for a vacation, family gathering, or athletic contest; the desire to do well on GRE tests; and the like.

**Extension of Incomplete**

For justifiable reasons, such as illness, students can petition to extend the Incomplete past one quarter. Petitions to extend the Incomplete must be submitted to the Academic Senate or the dean of OGS (for graduate students), and must have the prior approval of the instructor and the department chair. Requests for extensions must be submitted before the Incomplete grade lapses to an F, NP, U grade. The extension cannot be made retroactively.

An I grade may be replaced upon completion of the work required by a date agreed upon with the instructor, but no later than the last day of finals week in the following quarter. If not replaced by this date, the I grade will lapse into an F, NP, or U grade, depending upon the student's initial grading option.

**Student Copy of Final Grades**

At the end of each quarter students should check StudentLink for grade information. Grades are usually available ten working days after the end of final examinations. Students should examine their record for accuracy and report any omissions or errors to the Office of the Registrar immediately.

**Transcript Requests**

Application for an official transcript of record to be sent to another party or institution should be submitted to the registrar several days in advance of the time needed. An application for a transcript must bear the student's signature. Please refer to the UCSD Registrar's Web site at http://www.registrar.ucsd.edu for the most current transcript information.

**Grade Appeals**

A. 1. If a student believes that nonacademic criteria have been used in determining his or her grade in a course, he or she may follow the procedures described in this regulation.

2. *Nonacademic criteria* means criteria not directly reflective of academic performance in the course. It includes discrimination on political grounds or for reasons of race, religion, sex, or ethnic origin.

3. Appeals to this committee [see (B)(4)] shall be considered confidential. Neither any member of the subcommittee nor the Academic Senate Office shall release any information about the appeal except as specifically provided in this regulation.

B. 1. The student must attempt to resolve the grievance with the instructor within the first month of the following regular academic quarter.

2. If the grievance is not resolved to the student’s satisfaction, he or she may then...
attempt to resolve the grievance through written appeal to the department chair or equivalent, who shall attempt to adjudicate the case with the instructor and the student within two weeks.

3. If the grievance still is not resolved to the student’s satisfaction, he or she may then attempt to resolve the grievance through written appeal to the provost of the college, the Dean of Graduate Studies, or the Dean of the School of Medicine, who shall attempt to adjudicate the case with the instructor, the chair, and the student within two weeks.

4. If the grievance is not resolved to the student’s satisfaction by the provost or dean, the student may request consideration of the appeal by the CEP Subcommittee on Grade Appeals (hereinafter called the Committee) according to the procedures outlined below. This request must be submitted before the last day of instruction of the quarter following the quarter in which the course was taken.

C. 1. The student’s request for Committee consideration should include a written statement outlining the nature of the grievance, including copies of any and all documents in his or her possession supporting the grievance. The submission of the statement to the Committee places the case before it and restricts any change of the challenged grade to a change initiated by the Committee, unless the Committee determines that all other avenues of adjudication have not been exhausted.

2. Upon receipt of the student’s request, the Committee immediately forwards a copy of it to the instructor, the department chair or equivalent, and the provost or dean with a request for written reports of their attempts to resolve the complaint.

3. The Committee, after having determined that all other avenues of adjudication have been exhausted, shall review the complaint and the reports to determine if there is substantial evidence that nonacademic criteria were used.

a. If the Committee finds substantial evidence that nonacademic criteria were used, it shall follow the procedure in paragraph (D) below.

b. If the Committee decides the allegations are without substance, it shall serve written notification of its findings to the complainant and to the instructor within two weeks. Within ten days the complainant or the instructor may respond to the findings. If there are no responses, or if after consideration of such responses the Committee sustains its decision, the grade shall not be changed.

D. 1. If the Committee determines that there is evidence that nonacademic criteria were used, it shall interview any individual whose testimony might facilitate resolution of the case. The complainant shall make available to the Committee all of his or her work in the course which has been graded and is in his or her possession. The instructor shall make available to the Committee all records of student performance in the course and graded student work in the course which is still in his or her possession. At the conclusion of the case each document shall be returned to the source from which it was obtained.

2. The Committee shall complete its deliberations and arrive at a decision within two weeks of its determination that evidence of the use of nonacademic criteria had been submitted. A record of the Committee’s actions in the case shall be kept in the Senate Office for three years.

3. If the allegations of the complainant are not upheld by a preponderance of the evidence, the Committee shall so notify the complainant and the instructor in writing. Within one week of such notification, the complainant and the instructor shall have the opportunity to respond to the findings and the decision of the Committee. If there are no responses, or if after considering such responses the Committee sustains its decision, it shall so notify the complainant and the instructor in writing and the grade shall not be changed.

4. If the Committee determines that nonacademic criteria were significant factors in establishing the grade, it shall give the student the option of either receiving a grade of P or S in the course or retroactively dropping the course without penalty. A grade of P or S awarded in this way shall be acceptable towards satisfaction of any letter grade in the course had been required, but such grades shall not be counted in the number of courses a student may take on a P/NP basis. If the student elects to receive a grade of P or S, the student may also elect to have a notation entered on his or her transcript indicating that the grade was awarded by the divisional grade appeals committee.

a. The Committee shall serve written notification of its findings and its decision to the complainant and the instructor. The complainant and the instructor may respond in writing to the findings and the decision of the Committee within one week of such notification.

b. If there are no responses, or if after considering such responses the Committee sustains its decision, the grade shall be changed; the Committee shall then instruct the registrar to change the grade to P or S or, if the student elected the drop option, to retroactively drop the course from the student’s record. Copies of the Committee’s instruction shall be sent to the complainant and the instructor.

E. These procedures are designed solely to determine whether nonacademic criteria have been used in assigning a grade, and if so to effect a change of that grade.

1. No punitive actions may be taken against the instructor solely on the basis of these procedures. Neither the filing of charges nor the final disposition of the case shall, under any circumstances, become a part of the personnel file of the instructor. The use of nonacademic criteria in assigning a grade is a violation of the Faculty Code of Conduct. Sanctions against an instructor for violation of the Faculty Code may be sought by filing a complaint in accordance with San Diego Division By-law 230(D). A complaint may be filed by the student or by others.

2. No punitive actions may be taken against the complainant solely on the basis of these procedures. Neither the filing of charges nor the final disposition of the case shall, under any circumstances, become a part of the complainant’s file. The instructor may, if he or she feels that his or her record has been impugned by false or unfounded charges, file charges against the complainant through the office of the vice chancellor for Student Affairs, the dean of Graduate Studies, or the associate dean for Student Affairs of the School of Medicine.

UCSD Policy on Integrity of Scholarship

Integrity of scholarship is essential for an academic community. The university expects that both faculty and students will honor this principle and in so doing protect the validity of university intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. Instructors, for their part, will exercise care in planning and supervising academic work, so that honest effort will be upheld.

The following policies apply to academic course work for both undergraduate and graduate students. A separate policy exists governing integrity of research. Medical students are governed by policies specified in the Handbook for School of Medicine Advisors and Students, as formulated by the School of Medicine Committee on Educational Policy.
Instructors’ Responsibility

At the beginning of the term the instructor shall state in writing (e.g., in the syllabus, information sheets, or Web site) what graded assignments and exams will be required of students. If there are any course-specific rules required by the instructor for maintaining academic integrity, the instructor shall also inform students in writing what kinds of aid and collaboration, if any, are permitted on graded assignments and exams. The UCSD Policy on Integrity of Scholarship states the general rules for student integrity.

Students’ Responsibility

Students are expected to complete the course in compliance with the instructor’s standards. No student shall engage in any activity that involves attempting to receive a grade by means other than honest effort, for example:

• No student shall knowingly procure, provide, or accept any unauthorized material that contains questions or answers to any examination or assignment to be given at a subsequent time.

• No student shall complete, in part or in total, any examination or assignment for another person.

• No student shall knowingly allow any examination or assignment to be completed, in part or in total, for himself or herself by another person.

• No student shall plagiarize or copy the work of another person and submit it as his or her own work.

• No student shall employ aids excluded by the instructor in undertaking course work or in completing any exam or assignment.

• No student shall alter graded class assignments or examinations and then resubmit them for regrading.

• No student shall submit substantially the same material in more than one course without prior authorization.

A student acting in the capacity of an instructional assistant (IA), a category including but not limited to teaching assistants, readers, and tutors, has a special responsibility to safeguard the integrity of scholarship. In this role the student functions as an apprentice instructor, under the tutelage of the responsible instructor. An IA shall equitably grade student work in the manner agreed upon with the course instructor. An IA shall not make any unauthorized material related to tests, exams, homeworks, etc., available to any student.

Responsibility for Disposition of Cases of Academic Dishonesty

The responsibility for maintaining the standards of academic honesty rests with two university authorities: the faculty and the administration. Under the Standing Orders of the Regents, discipline is the exclusive responsibility of the campus administration, while authority over courses and curricula is delegated to the faculty through the Academic Senate. When a student has admitted or has been found guilty of a violation of the standards of academic honesty, two separate actions shall follow.

1. The instructor shall determine the student’s grade on the assignment and in the course as a whole. Any breach of academic honesty may be considered grounds for failure in the course, although less serious consequences may be incurred in less serious circumstances.

2. The appropriate administrative authority shall impose a disciplinary penalty. For undergraduates, the appropriate administrative authority is the Council of Deans of Student Affairs. For graduate students, the appropriate administrative authority is the assistant dean of Graduate Studies. Sanctions will be imposed in accordance with guidelines authorized by the Committee on Educational Policy.

Procedures for Disposition of Cases of Academic Dishonesty

The procedure for disposition of cases of academic dishonesty is divided into three phases (A. Initial Phase; B. Decision and Resolution Phase; C. Appeals Phase):

A. The Initial Phase

When an instructor has reason to believe that a student has violated UCSD’s Policy on Integrity of Scholarship, the instructor should proceed in one of two ways:

I. Call the student to a meeting to discuss the suspected violation. If the instructor decides that there is evidence of academic dishonesty, he or she must report the suspected violation to the Office of Academic Integrity Coordinator (AIC).

II. Notify the AIC directly that there is a suspected violation of academic integrity.

Once the AIC has been notified by the instructor, the AIC shall notify the appropriate dean that a student is suspected of a violation of academic integrity and initiate record keeping to track the disposition of the case. For graduate students, the appropriate dean is the assistant dean of Graduate Studies. For an undergraduate student who is alleged to have acted alone or in concert with students from his or her own college, the appropriate dean is the dean of Student Affairs of the student’s college. If students from more than one college are allegedly involved in the same incident, the AIC will direct the case to the chair of the Council of Deans of Student Affairs. The chair will then appoint one of the deans to proceed with the case for all students, regardless of college.

The dean shall contact the instructor and discuss the evidence in the case. If the instructor decides to proceed with the charges, the dean shall notify the student of the charges in writing and inform the student of the procedures for processing cases of academic dishonesty under the UCSD Policy on Integrity of Scholarship and where to obtain advice and assistance, such as from Student Legal Services. If the instructor is absent, the instructor’s department chair or program director may represent the instructor.

B. The Decision and Resolution Phase

The student shall have ten (10) business days following notification by the dean to meet with the dean to discuss the charges and possible administrative penalties. The student shall then decide whether:

I. to accept the charge of academic dishonesty, or

II. to deny the charge of dishonesty and to proceed to a formal hearing

Consequences of each of these decisions are presented below. If the student fails to respond to the written notification of alleged misconduct and does not meet with the dean, he or she shall be presumed to have taken decision I.

Decision I (Student accepts charge of academic dishonesty): If an undergraduate makes decision I, the dean shall notify the AIC of the student’s decision. The AIC shall notify the instructor and, if the course has been completed, request a grade assignment. The instructor shall assign a grade for the course and notify the AIC of the grade.

The dean shall also make a recommendation of any administrative penalty to the Council of Deans of Student Affairs. The Council of Deans of Student Affairs shall decide the administrative penalty and notify the AIC of the decision. Notification to the AIC of the administrative penalties should take no longer than 30 business days from the time the dean is notified by the AIC of the charge.

Within (10) ten business days of being notified by the Council of Deans of Student Affairs, the AIC shall notify the student, the dean, and the instructor of the administrative penalty. Once the course has been completed and the AIC has been notified of the grade by the instructor, the AIC will notify the student, the dean, and the Registrar of the grade.
If a graduate student makes decision I, the assistant dean of Graduate Studies shall decide the administrative penalty and the instructor shall decide the course grade. Both shall notify the AIC of their decisions. The AIC shall then notify the student, the dean, and the Registrar of the grade, and the instructor of the administrative penalty.

A record of the administrative penalty shall be maintained in the office of the appropriate dean, the Council of Deans, and the AIC. A statement of the final disposition of the case shall be sent by the AIC to the chairperson of the department or program in which the violation occurred.

Decision II (Student denies charge and requests a formal hearing): If the student denies having committed the alleged act of academic dishonesty (decision II), he or she must submit a written request for a formal hearing to the appropriate dean within ten (10) business days of being notified of the charges by the dean. The dean shall transmit the written request to the AIC. Within thirty (30) calendar days after receipt of the request, the AIC shall schedule a formal hearing of the case by the Academic Dishonesty Hearing Board ("Hearing Board"). The AIC shall provide at least at least ten (10) business days’ notice to the student and the instructor of the time, date, and location of the hearing. The AIC shall be available to advise the instructor of the procedures and options for presentation of the case and, if the instructor so chooses, to present the case to the hearing board.

The Standing Hearing Board shall be composed of three faculty members appointed by the Academic Senate, one graduate student appointed by the assistant dean of Graduate Studies, one upper-division undergraduate student appointed by the vice chancellor of Student Affairs, and a college dean, who shall serve as the presiding officer. Members shall normally serve a two-year term. The presiding officer shall conduct the hearing and advise the Hearing Board on procedure, but shall not vote. If the student is enrolled in the same college as the presiding dean, a dean from another college shall serve as the presiding officer.

The Hearing Board shall be governed by the general UCSD rules of procedural due process. The Academic Senate will appoint a panel of six standing and seven alternate faculty members eligible to serve on the Standing Hearing Board. When standing members are not available, the formal hearing may be conducted with alternates appointed from the appropriate panel as listed below. To proceed with the hearing, however, the Hearing Board must have three of the faculty members present, at least one of which must be a member of the standing board. The AIC shall select alternates to the Hearing Board from the following panels:

1. A panel of seven faculty members appointed by the Academic Senate Committee on Committees.
2. A panel of upper-division (junior or senior) undergraduate students, one from each college, appointed by the college dean. Members of this panel must have completed at least one year on a standing judicial board at UCSD.
3. A panel of five graduate students to be appointed by the assistant dean, OGS.

The Hearing Board shall hold a formal hearing and decide on the basis of a preponderance of the evidence whether the student engaged in academic dishonesty. In cases in which the Hearing Board deems that expert advice is essential to its judgment, the hearing board, in consultation with the Committee on Committees, may appoint an ad hoc committee to advise it. The ad hoc committee shall consist of three faculty members with knowledge of the field in question. The members of the ad hoc committee shall be present at the hearing and shall advise the Hearing Board during the board’s deliberations. The final judgment on the case shall rest with the Hearing Board. Within five (5) business days from the date on which the hearing is completed, the presiding officer shall forward the Hearing Board’s findings to the appropriate dean, with copies to the AIC, department chairperson or program director, the instructor, and the accused student.

If the student is found guilty of academic dishonesty, the appropriate administrative authority (for undergraduate students the Council of Deans of Student Affairs; for graduate students the assistant dean of Graduate Studies) shall then decide the administrative penalty and shall inform the student in writing within ten (10) business days after receipt of the notice of the Hearing Board’s final judgment. They shall also notify the instructor, the AIC, and the department chair or program director. The instructor then shall assign a grade for the course and notify the AIC of the grade within ten (10) business days. The AIC shall notify the student, the dean, and the Registrar of the grade.

If the Hearing Board finds the evidence insufficient to sustain the charge of academic dishonesty, the administrative authority and the instructor shall dismiss the matter without further action against the student, who shall be permitted either to complete the course without prejudice or to withdraw from it. The student shall notify the AIC of his or her decision, and the AIC shall notify the Registrar of the student’s decision. If the student withdraws from the course, it shall not be listed on his or her transcript.

C. The Appeals Phase: (Section I describes the appeal of the judgment of the Hearing Board, and Section II describes appeals of the academic action, administrative penalty, or both.)

I. Appeal of the Judgment of the Hearing Board: If the Hearing Board sustains the charge of academic dishonesty, an undergraduate student may appeal the judgment by writing to the Council of Provosts. Appeals must be made within five (5) business days of formal notification of the final disposition of the case. The Council of Provosts will consider the appeal within ten (10) business days from the date of appeal.

A graduate student or IA may submit an appeal to the dean of Graduate Studies.

The basis for appeal of the Hearing Board’s judgment shall be: (i) that the standards of procedural fairness were violated, e.g., that the student did not have sufficient opportunity to present his or her side of the case; or (ii) that there exists newly discovered important evidence that has substantial bearing on the findings of the Hearing Board. If the appeal is sustained, the case shall be referred back to the Hearing Board for a new hearing. Except for such appeals, the judgment of the Hearing Board shall be final.

II. Appeal of the Academic Action, Administrative Penalty, or both: Within five (5) business days of receipt of the AIC’s notification, the student may appeal the instructor’s grade assignment, or the administrative officer’s administrative penalty, or both, by submitting a written request as provided below:

Request for Modification of Academic Action: A request for review of the grade assignment may be directed to the CEP Subcommittee on Grade Appeals. If the case has been heard by the Hearing Board, the CEP Subcommittee on Grade Appeals shall receive the report of the Hearing Board and accept its findings as to the facts of the case.

Request for Reduction of Administrative Penalty: An appeal of the appropriate authority’s administrative penalty shall be directed by an undergraduate student to Council of Provosts. The Council of Provosts will evaluate the student’s appeal and make a final decision within ten (10) business days of receiving the appeal. An appeal by a graduate student shall be directed to the dean of Graduate Studies.
Policies for Student Records and Timeline Extensions

Once an instructor has decided to proceed with a charge of academic dishonesty, he or she will refrain from assigning a course grade for the student until the charge has been resolved. If the course concludes before the charge is resolved, the instructor will assign an "IP" on the course grade sheet for the student’s grade and will indicate in the memorandum column that this IP is for a “Pending Charge of Academic Dishonesty.” Academic Records will note in attached text to the course (i.e., not on the student’s transcript) that the hold is for a “Pending Charge of Academic Dishonesty.” The student's transcript will show an “IP” for the course until the charge is resolved. While a hold is in effect, the student shall not drop the course. The faculty hold shall not be removed by the Registrar until notification from the AIC, who shall release the hold once the charge is resolved and a grade has been assigned by the instructor. If a passing grade is assigned and a conflict arises with a duplicate, cross-listed, or equivalent course taken after the charge has been recorded, the AIC will direct the Registrar to drop the student from the duplicate course or remove the grade for the duplicate course from the student’s record.

If the student accepts the charge of academic dishonesty or is found guilty by the Hearing Board, the grade assigned by the instructor will be counted in the student’s GPA even if the course is retaken. Academic Records will permanently note in text attached to the course (i.e., not on the student’s transcript) that the grade was given as a result of “Academic Dishonesty.”

If the student withdraws from UCSD before the final disposition of the case, the following policy shall govern. If the student is found to have committed an act of academic dishonesty, and the instructor assigns him or her a final grade in the course, this grade shall be permanently entered on the transcript. If the administrative penalty is dismissal, the transcript shall bear a notation that readmission is contingent upon the approval from the chancellor. Any administrative penalty less severe than dismissal shall be imposed when the student returns to the university.

If a case of suspected academic dishonesty is also the subject of an administrative inquiry under the Policy on Integrity of Research, then the senior vice chancellor for Academic Affairs, in consultation with the Hearing Board, may make such modifications in procedure as are necessary to coordinate the two inquiries.

If the final decision in the case results in dismissal of the student, a record of the case and its outcome shall be established in the office of either the vice chancellor for Student Affairs or the dean of Graduate Studies, depending on the registration status of the student. If the administrative penalty is suspension or dismissal, the fact that the student was suspended or dismissed for academic dishonesty must be posted on the academic transcript for the duration of the penalty. The AIC may extend any timelines in this policy when practical exigencies so dictate. If a delay is imposed, the affected individuals will be notified.

Reporting, Record Keeping, and Review of this Policy

The AIC shall report annually to the Academic Senate Committee on Educational Policy, the Council of Provosts, and the vice chancellor for Student Affairs on the number and character of misconduct, the pattern of decision-making (contested or uncontested), the severity of sanctions, both administrative and academic, and other relevant matters as decided by the Committee on Educational Policy.

Special Programs

Education Abroad Program and the Opportunities Abroad Program

Please refer to the “Courses, Curricula, and Programs of Instruction” section of this catalog, where the Education Abroad Program and the Opportunities Abroad Program are described in full.

Intercampus Transfer (ICT)

An undergraduate in good academic standing who is now, or was previously, registered in a California campus, on or before the appropriate deadlines, should complete the ICV application form and return it to the Office of the Registrar on the home campus. The ICV application is subject to approval of both the home and host campuses.

Reporting, Record Keeping, and Review of this Policy

The AIC shall report annually to the Academic Senate Committee on Educational Policy, the Council of Provosts, and the vice chancellor for Student Affairs on the number and character of misconduct, the pattern of decision-making (contested or uncontested), the severity of sanctions, both administrative and academic, and other relevant matters as decided by the Committee on Educational Policy.

Special Programs

Education Abroad Program and the Opportunities Abroad Program

Please refer to the “Courses, Curricula, and Programs of Instruction” section of this catalog, where the Education Abroad Program and the Opportunities Abroad Program are described in full.

Intercampus Transfer (ICT)

An undergraduate in good academic standing who is now, or was previously, registered in a regular session at any campus of the University of California and has not since registered at any other institution may apply for admission as a transfer in the same status to another campus of the university.

How to Apply

Intercampus transfers must complete the University of California Undergraduate Application form. These forms are available in the Office of the Admissions, or at http://www.universityofcalifornia.edu/apply. You may apply to one or to as many as nine UC campuses of the university using one application form. Send your completed application to:

University of California
Admissions Application Processing Service
P.O. Box 23460
Oakland, CA 94623-0460

Mail only your application form if downloaded, fees, and essay to the processing service address above. Send your transcripts, test scores, and all other correspondence relating to your application directly to the Admissions Office at the university campus(es) to which you apply. The processing service will not forward them.

You may apply online using Pathways: http://www.ucop.edu/pathways.

Application Fees

The basic application fee entitles you to apply to one university campus. If you apply to more than one campus, you must pay an additional fee for each campus you select. These fees are not refundable.

When to Apply

Priority dates for filing applications for intercampus transfer are identical to the application filing dates for new students: fall, November 1–30; winter, July 1–31; and spring, October 1–31. UC Berkeley fall semester, November 1–30. A campus will accept applications after the priority period only if it still has openings. If you apply after the priority filing period to a campus that is no longer accepting applications, the Admissions Application Processing Service will notify you by mail that your application will not be forwarded to that campus. In this case, you may receive a full or partial refund of the application fee.

Please note: UCSD does not accept applications for winter and spring quarters. Consult the application for undergraduate admission for information regarding other campuses.

Intercampus Visitor (ICV)

Qualified undergraduates may take advantage of educational opportunities on other campuses of the University of California as an Intercampus Visitor (ICV). This program is designed to enable qualified students to take courses not available on their home campus, to participate in special programs, or to study with distinguished faculty members on other campuses of the university. Students who meet the following requirements should complete an application available in the Office of the Registrar.

1. An undergraduate student must have completed at least one year in residence on the home campus and have maintained a grade-point average of at least 2.0 (or equivalent) to apply as an intercampus visitor.
2. Approval of the appropriate provost office is required.
3. Some UC campuses have additional requirements. See the application for requirements and deadlines.

If students meet the above conditions, they should complete the ICV application form and return it to the Office of the Registrar on the home campus, on or before the appropriate deadlines. The ICV application is subject to approval of both the home and host campuses.
A nonrefundable fee is charged for each ICV application.

**Simultaneous Enrollment of UCSD Students at other UC Campuses**

UCSD students may enroll in classes at another UC campus for the same term providing the student:

- Has completed one quarter as a matriculated student at UCSD
- Is enrolled and paid for a minimum of twelve units for the current term at UCSD and maintains this status
- Is in good standing
- Has the appropriate academic preparation as determined by the host campus.

Financial aid is available only through UCSD. Students eligible for veterans, rehabilitation, social security, and other federal, state, or county benefits must secure eligibility certification through the UCSD financial aid office. Units taken at both campuses may be combined to establish full-time enrollment for financial aid.

**ROTC**

UCSD does not have an ROTC program. Students may, however, with the permission of their college, enroll in ROTC courses at another institution in conjunction with completing their degree programs at UCSD.

ROTC courses are conducted on the campuses of the University of San Diego and San Diego State University. Further information on these programs may be obtained from the ROTC advisor at the Aerospace Studies Department, (619) 594-5545, and the Military Science Department, (619) 594-4943, at San Diego State University, or the Department of Naval Science, (619) 260-4811, at the University of San Diego.

**Absence/Readmission to the University**

Undergraduate students absent for no more than one quarter are considered to be continuing students and may enroll on TritonLink.

Students in good academic standing who are absent for two or more consecutive quarters must file an application for readmission no later than four weeks prior to the beginning of the quarter. A nonrefundable fee is charged. The Web site containing the online readmission application and information is: http://tritonlink.ucsd.edu. Select the “Academics” tab then select “Readmission.”

Students in good academic standing who were absent for three quarters or more, should consult with a college academic advisor before enrollment to ensure adherence to graduation requirements. Students who were on probation or subject to dismissal the last quarter of attendance at UCSD may be required to consult with an academic advisor prior to approval of the readmit application and establish a contract before enrollment.

Students who were dismissed from UCSD, but have subsequently met the conditions stipulated in their original dismissal letter, must consult with an academic advisor and establish a quarterly contract before readmission and enrollment.

Students who attended another institution since leaving UCSD must submit official transcripts for all academic work completed. This work must be of passing or higher quality.

In the case of major departments with approved screening criteria, students may be re-admitted as pre-majors.

**Withdrawal from the University**

Enrolled or registered (paid fees) students who wish to withdraw either prior to or during the quarter are required to complete the Undergraduate Application for Withdrawal. The form should be filed with the student’s college academic advising or dean's office. These forms serve two purposes: 1) a means to provide a refund of fees, if appropriate (see below); 2) automatic withdrawal from classes (see also "The W Grade"). Students considering withdrawing are urged to consult with their respective college. The colleges recognize that there are many reasons for students withdrawing from the university.

**Refund Policy**

**New Undergraduate Students**

Prior to the first day of instruction, the registration fee is refunded minus the statement of intention to register fee.

**Refund Schedule**

The following schedule of refunds is effective beginning with the first day of instruction and refers to calendar days (including weekends):

<table>
<thead>
<tr>
<th>Days</th>
<th>0–1</th>
<th>2–7</th>
<th>8–18</th>
<th>19–13</th>
<th>36 days and over</th>
</tr>
</thead>
<tbody>
<tr>
<td>100</td>
<td>90</td>
<td>50</td>
<td>25</td>
<td>0</td>
<td>(Subject to Change)</td>
</tr>
</tbody>
</table>

The effective date of withdrawal used in determining the percentage of fees to be refunded is the date indicated on the withdrawal form by the college academic advising or dean’s office.

**Return of Title IV Federal Student Aid**

Financial aid recipients may be required to return some or all of their aid at the time of withdrawal. This requirement applies only to undergraduate students who withdraw prior to completing 60 percent of the quarter. Questions about financial aid repayment should be directed to the Financial Aid Office.

**Auditing**

Interested individuals, including registered students, are permitted to audit courses only with the explicit and continuing consent of, and under such rules as may be established by, the faculty member in charge of the course. The instructor is not obligated to devote time to the work of individuals not officially enrolled in the course. All persons auditing are required to abide by University policies and campus regulations.
At UC San Diego, all programs leading to master's degrees and to doctoral degrees (other than the M.D.) are under the jurisdiction of the Graduate Council and are administered by the Office of Graduate Studies.

The San Diego campus emphasizes the research character of graduate education. Doctoral and master's degrees are the culmination of creative effort and attest to the ability of the recipient to continue original inquiry. In addition to requiring original research, most of UCSD's graduate programs expect their students to obtain teaching experience.

Much of the training that UCSD offers takes place outside the classroom—not only in seminars but in independent research and in tutorial work. Students can benefit from the many visitors from other universities; there are opportunities to study at other campuses of the University of California; and many students become involved in the research activities of UCSD's research institutes and centers. La Jolla has become one of the most important intellectual centers of the West. Not only has UCSD attracted many of the world's great scholars, but other research institutions located nearby such as the Salk Institute for Biological Studies, the Burnham Institute, and The Scripps Research Institute have enhanced the area's reputation.

The Nature of Graduate Instruction

Graduate courses demand, on the part of both instructor and student, a capacity for critical analysis and a degree of research interest beyond those appropriate for undergraduate study. These courses generally carry a number in the 200 series and may be conducted in any of several ways: (1) as advanced lecture courses; (2) as seminars in which faculty and students present critical studies of selected problems within the subject field; (3) as independent reading or study under faculty supervision; or (4) as research projects conducted under faculty supervision. Graduate courses numbered 400–499 are designed for professional students and may not be used to satisfy minimum departmental core course, departmental requirements and grading standards, and residency requirements are met.

earned in those courses will not be considered in their overall grade-point average (GPA) for the purpose of determining good standing, except for students in the M.P.I.A. program who may take lower-division language courses for a letter grade and for inclusion in their GPA for the purpose of determining good standing.

The graduate student is accorded considerable liberty in choice of courses as long as minimum departmental core course, departmental requirements and grading standards, and residency requirements are met.

4. Approving official study lists.
5. Acting on the petitions of graduate students.
6. Insuring that adequate records are maintained on all graduate students in the department, group, or school, and supplying relevant information as requested by the dean.
7. Assisting the dean of Graduate Studies in the application of university regulations governing graduate students, graduate study, and graduate courses.
8. Advising the chair of the department and the dean of Graduate Studies about developments of the graduate program in the department, group, or school.

Graduate Student Association

The Graduate Student Association (GSA) is the officially recognized graduate student government at UCSD. It represents all graduate and medical students—including those at Scripps Institution of Oceanography, the Graduate School of International Relations and Pacific Studies, Rady School of Management, the School of Medicine, and the School of Pharmacy and Pharmaceutical Sciences—in academic, administrative, campus, and university matters. The GSA Council, composed of six executive officers and representatives from each department, group and school, nominates graduate student representatives for appointment to campus governing bodies and committees, including the Graduate Council, the Registration Fee Committee, and the systemwide Student Body Presidents' Council. The GSA also sponsors projects and social activities designed to improve the academic and social lives of students. Meetings are open to all graduate, School of Pharmacy, and School of Medicine students.

For more information contact the GSA at (858) 534-6504, or go to http://gsa.ucsd.edu.

Graduate Student Diversity

The University of California, San Diego actively recruits and admits qualified students to graduate programs who will enhance the diversity of UCSD graduate programs.

UCSD recognizes the value to students, faculty, staff, and the community in having a campus which reflects the full richness and talents of the people of California. Diversity is viewed as a campus strength and a critical component of higher education. The campus has a firm commitment
to recruit and admit graduate students from all demographic groups including students from traditionally underrepresented backgrounds.

The Graduate Student Affairs Unit in the Office of Graduate Studies provides an array of counseling and advocacy services to assist U.S. citizens and permanent residents in applying to graduate school, obtaining financial support, and successfully completing graduate degree programs.

UCSD offers the San Diego Fellowship Program, which is designed to increase campus diversity. The fellowship provides two awards: The San Diego Fellowship and the Eugene Cota-Robles Fellowship. Incoming students who have overcome significant economic, educational, or social hardship in pursuit of their education, or whose presence would enhance campus or departmental diversity in other ways, are eligible to apply for awards through the San Diego Fellowship Program. Refer to the Fellowship and Traineeship section for more details.

A limited number of graduate student fellowships are available in specific science disciplines through the National Science Foundation, Alliance for Graduate Education and the Professoriate (AGEP) Program.

For assistance and further information about special opportunities for underrepresented students, contact the assistant dean, Office of Graduate Studies, Student Services Center (SSC), Fourth Floor, North, (858) 534-3555 or (858) 534-3678.

Career Services for Graduate Students

The Career Services Center offers a wide range of programs and services to assist graduate students with their career planning and job search needs. Individual career counseling is available on both an appointment and drop-in basis. In addition, workshops and special events are regularly offered covering such areas as resume writing, job search strategies, and nonacademic employment options. The Career Services Center houses a career reference library containing information on employers, job listings, alumni contact list, salaries, sample resumes, and publications pertinent to graduate students’ career issues. An online database and Internet access computer lab is also available to assist in placement efforts. For more information, see the “Career Services” section of this catalog or visit the Career Services Office.

General Requirements for Higher Degrees

Courses and Grades

Only upper-division and graduate courses in which a student is assigned grades A, B, C (including plus [+] or minus [-]), D, or S are counted in satisfaction of the requirements for all doctoral and master’s degrees. An incomplete grade, as well as an NR, will automatically lapse to an F or U if it has not been removed when the final report for the degree is approved by the Office of Graduate Studies. (See also “Grades.”)

Undergraduate language courses and courses in the 400 series are only used for degree credit in the program for the M.P.A. degree offered by the Graduate School of International Relations and Pacific Studies. For course information see the section on “International Relations and Pacific Studies” elsewhere in this catalog.

Registration in the Final Quarter for the Award of the Degree

A student completing course work, using university facilities including the library, or making any demands upon faculty time (other than final reading of the thesis or dissertation, or administering the comprehensive or doctoral examination), must register in the final quarter in which the degree is to be conferred. Students who need only to submit their theses or dissertations, or to take the comprehensive or final examination may pay a filing fee in lieu of registration in the final quarter (see “Filing Fee”).

Master Degrees

Master of Advanced Study (M.A.S.)

The University of California offers graduate professional degree programs leading to the master of advanced study (M.A.S.) degree. This degree meets the needs of working professionals continuing in educational programs. While some M.A.S. programs are tailored to career advancement, other programs enable individuals to pursue new career directions or advanced study in the liberal arts. Each M.A.S. program accommodates flexible, part-time, academically qualified working adults who cannot be full-time students. All M.A.S. degree programs must be in conformity with one of the following two plans: Plan I. Thesis Plan or Plan II. Comprehensive Examination Plan. Pending program approval, an alternative capstone plan is a third option. Specific degree requirements, curriculum, and other details are available with each individual program.

Master of Arts (M.A.) and Master of Science (M.S.)

The master of arts and master of science degrees are offered under two plans: Plan I. Thesis, and Plan II. Comprehensive Examination. Since some departments offer both plans, with varying unit requirements, students should consult with their advisors before selecting a plan for completion of degree requirements.

Master of Business Administration (M.B.A.)

The M.B.A. is a professional degree that provides distinguished education in the theory and practice of management. The program provides a comprehensive education in the fundamental disciplines of business coupled with a focus on the business and management issues faced by technology and innovation driven companies. Students interested in becoming managers and leaders in such companies and in understanding the role that technologies play in driving the global business marketplaces will be well suited for the Rady School of Management. For degree requirements and curriculum, please refer to the school.

Master of Education (M.Ed.)

The Education Studies Program offers a master of education (M.Ed.)/multiple subject credential to authorize teaching grades K-6, and a master of education (M.Ed.)/single subject credential for teaching grades 7-12 is offered in the subject areas of biology, chemistry, geoscience, English, mathematics, and physics. Degree requirements, curriculum, and other details regarding the program may be obtained from the Education Studies Program.

Master of Engineering (M.Eng.)

Several departments in the School of Engineering offer the master of engineering (M.Eng.). The M.Eng. is a terminal degree designed to address the technical needs of engineers. Degree requirements, curriculum, and other details regarding the program may be obtained from the Department of Electrical and Computer Engineering and the Department of Bioengineering.

Master of Fine Arts (M.F.A.)

The master of fine arts degree is offered in the Departments of Theatre and Dance, and Visual Arts under a modified thesis plan. A short written thesis that may be regarded as a position paper, presenting a descriptive background for the student’s work, is required. There is no written final examination, but great weight is given to the candidate’s final presentation and the oral defense of the thesis.
**Master of Pacific International Affairs (M.P.I.A.)**

The Master of Pacific International Affairs Program provides training for those interested in pursuing professional careers in international affairs and international management with an emphasis on the countries of the Pacific Rim. For degree requirements and curriculum, please refer to the International Relations and Pacific Studies description under the catalog listings of programs of instruction.

**Programs of Study**

**Plan I: Thesis Plan**

A minimum of at least thirty-six quarter-units are required: eighteen units in graduate courses, including a minimum of twelve units in graduate-level courses in the major field; twelve additional units in graduate or upper-division courses; and six units in research course work leading to the thesis. Consult your department for specific unit and course requirements.

Following advancement to candidacy, the student electing Plan I must submit a thesis. The thesis committee, appointed by the chair of the department or group and approved by the dean of Graduate Studies, consists of at least three faculty members, with at least two from the candidate's major department.

When all members of the committee have approved the thesis, a Final Report of the Thesis for the Master of Arts or Master of Science Degree under Plan I must be completed. Prior to the formal submission of the thesis to the Office of Graduate Studies, the student is required to pay a fee to the Cashier's Office. Final approval by the dean of Graduate Studies and acceptance of the thesis by the university archivist (on behalf of Graduate Council) represent the final steps in the completion of all requirements by the candidate for a master of arts or master of science degree on the San Diego campus.

**Plan II: Comprehensive Examination Plan**

A minimum of at least thirty-six quarter-units are required: twenty-four units in graduate courses; consult your department for specific unit and course requirements.

**Plan III: Modified Thesis Program**

Courses used must be taken prior to matriculation at UCSD.

In any case, no more than a total of one-half of the units required for a master's degree may be transferred in from any UC or other institutions. Courses used for a previous degree may not be transferred. A letter from the institution from which the courses are being transferred will be required stating the courses were not used toward another degree.

Course work approved for transfer credit will not be included in calculating a student's grade-point average, regardless of the source.

**Transferring Credit**

Courses used for a previous degree may not be transferred. A letter from the institution from which the courses are being transferred will be required stating the courses were not used toward another degree.

Course work approved for transfer credit will not be included in calculating a student's grade-point average, regardless of the source.
**Advancement to Candidacy**

After completing all preliminary requirements of the department with a GPA equivalent to 3.0 in upper-division and graduate course work undertaken, a total of no more than eight units of F and/or U grades, and a minimum of five quarters of residency, the student may file an Application for Candidacy for the Modified Thesis, Plan III, for the Master of Fine Arts Degree. An application for candidacy must be filed no later than two weeks after the first day of the quarter in which degree requirements are to be completed. (See “Academic Calendar”)

**Graduate Work Completed Elsewhere**

In exceptional circumstances, a student may be given a leave of absence for the purpose of studying elsewhere. While appropriate credit may be allowed for course work completed elsewhere with a grade of B or better in a graduate program, the period involved will not reduce the UCSD academic residence requirement of six academic quarters for visual arts and eight quarters for theatre.

**Doctoral Degrees**

**Doctor of Audiology (Au.D.)**

The Au.D. is a professional doctoral degree offered jointly with San Diego State University (SDSU). The four-year degree program is designed for individuals who intend to specialize in clinical practice and to meet professional standards requiring a clinical doctorate as the entry-level degree for a certified audiologist. Graduates of this program will have the knowledge base, research exposure, and advanced clinical skills to enter the workforce in any setting, and be prepared to function as independent audiology professionals in the expanding health care arena. For degree requirements and curriculum, please refer to the Audiology section in the catalog.

**Doctor of Education (Ed.D.)**

The Ed.D. is a professional degree in which regional professional educators gain content knowledge as well as specific skills related to instructional leadership within the K–12 and postsecondary educational community. Advanced Ed.D. students will conduct research on professional practice within their own institution addressing specific local problems that have national implications for education. For degree requirements and curriculum, please refer to the Education Studies Program section in this catalog.

**Doctor of Musical Arts (D.M.A.)**

The D.M.A. degree emphasizes the dual preparation for professional careers in the performance of contemporary music, as well as in the equally demanding area of teaching these skills on an advanced level. Candidates for this degree are expected to demonstrate musical excellence, artistic maturity, and the capability for doing original scholarly work. For degree requirements and curriculum, please refer to the Department of Music description under the catalog listings of programs of instruction.

**Doctor of Philosophy (Ph.D.)**

The Ph.D. degree is a research oriented degree which requires individual study and specialization within a field or the establishment of connections among fields. It is not awarded solely for the fulfillment of technical requirements such as academic residence and course work. Candidates are recommended for the doctorate in recognition of having mastered in depth the subject matter of their discipline and having demonstrated the ability to make original contributions to knowledge in their field of study. More generally, the degree constitutes an affidavit of critical attitude in scholarship, imaginative enterprise in research, and proficiency in communication, including—in most departments—practice in teaching.

**Program of Study**

The student’s program of study is determined in consultation with the advisor who supervises the student’s activities until the appointment of the doctoral committee. A doctoral program generally involves two stages.

The first stage requires at least three quarters of academic residence and is spent in fulfilling the requirements established by the Academic Senate and by the major department, group, or school. When the department considers the student ready to take the qualifying examination, it arranges for the appointment of a doctoral committee. Immediately upon passing the qualifying examination administered by the doctoral committee, the student advances to candidacy.

The second or in-candidacy stage is devoted primarily to independent study and research and to the preparation of the dissertation. A minimum interval of three quarters of academic residence must elapse between advancement to candidacy and the filing and final defense of the dissertation.

**Foreign Language Requirements**

Some doctoral programs require candidates to demonstrate language proficiency in one or more languages as part of the formal requirements for the degree. In these cases, the testing of proficiency is the responsibility of the department, group, or school concerned.

**Doctoral Time Limits**

All graduate students in doctoral programs are subject to campus policy on time limits to their degree. Each graduate program has three time limits pertaining to students’ academic progress toward the doctoral degree:

1. The registered time by which a student must advance to doctoral candidacy;
2. The registered time during which a doctoral student is eligible for support; and
3. The registered time by which a student must complete all doctoral requirements.

Students will not be permitted to continue in doctoral status beyond the pre-candidacy and total registered time limits. Students will not be permitted to receive UCSD-administered financial support beyond the support limit. Information about these time limits is given in the descriptions of each department’s graduate program in this catalog and departmental publications.

University policy requires that graduate students be continuously registered—unless on an approved leave of absence—from the first quarter of enrollment to completion of degree requirements. (See “Continuous Registration” and “Leave of Absence”)

For purposes of calculating when precandidacy and total registered time limits are reached, accrued time is the elapsed time from first enrollment as a graduate student at UCSD less (a) approved leave of absence, and (b) time between completion of one graduate program at UCSD and first registration in another. For the support time limit, a maximum of three quarters of approved leave will be deducted from elapsed time in calculating accrued time. Time spent in graduate study at another institution or University of California campus prior to beginning graduate study at UCSD will not count toward accrued time, with the exception of students entering the doctoral program in electrical engineering, computer science, or music who have earned a master’s degree in that discipline. All of the following will count toward accrued time: time spent at UCSD as a master’s, non-degree, or intercampus exchange graduate student; time spent on leave beyond three quarters; time spent between completion of or withdrawal from a graduate program at UCSD and re-registration in the same field of study. Precandidacy and total registered time limits will not accrue during periods of leave of absence.

Further information may be obtained from departmental graduate coordinators or the Office of Graduate Studies.

**Academic Residence**

The minimum residence requirement for a doctoral degree is six quarters, three of which must be in continuous academic residence at
UCSD. Residency is established by the satisfactory completion of six units or more per quarter, at least some of which must be at the graduate level. Joint doctoral students meet the UCSD academic residency requirement by successfully completing a minimum of thirty-six units of course work at UCSD.

A candidate must be registered in the final quarter in which the degree is to be awarded. (See “Registration in the Final Quarter.”)

**The Doctoral Committee**

At least three weeks prior to a scheduled qualifying examination, the department requests approval for the appointment of the doctoral committee by the dean of Graduate Studies. This committee conducts the qualifying examination, supervises the preparation and approval of the dissertation, and administers the dissertation defense.

The committee consists of five or more officers of instruction, no fewer than four of whom shall hold professorial titles of any rank. The committee members shall be chosen from two or more departments/programs; at least two members shall represent academic specialties that differ from the student’s field and one of these two must be a tenured UCSD faculty member from another department. Consult the departmental graduate coordinator or the Office of Graduate Studies for further details.

**Reconstituted Doctoral Committee**

For a variety of reasons a doctoral committee may need to be reconstituted. The request for reconstitution of the membership of a doctoral committee must be submitted on a reconstitution form to the dean of Graduate Studies by the chair of the candidate’s major department, group, or school no less than two weeks prior to the qualifying examination or defense of the dissertation. The request must include departmental affiliation of the members of the proposed reconstituted committee and the reason(s) for requesting the change.

**Qualifying Examination and Advancement to Candidacy**

The doctoral committee administers the qualifying examination and authorizes the issuance of the Report of the Qualifying Examination and Advancement to Candidacy. Formal advancement to candidacy requires the student to pay a candidacy fee to the cashier prior to submitting the form to the dean of Graduate Studies for approval. Students must maintain a GPA equivalent to 3.0 or better in upper-division and graduate course work undertaken with a total of no more than eight units of F and/or U grades in order to take the qualifying examination and advance to candidacy.

If the committee does not issue a unanimous report on the examination, the dean of Graduate Studies shall be called upon to review and present the case for resolution to the Graduate Council, which shall determine appropriate action.

**Dissertation and Final Examination**

A draft of the doctoral dissertation should be submitted to each member of the doctoral committee at least four weeks before the final examination. The form of the final draft must conform to procedures outlined in the publication, *Preparation and Submission Manual for Doctoral Dissertations and Master’s Theses “Bluebook,”* which can be found on the Web site [http://ogs.ucsd.edu/AcademicAffairs/Documents/Dissertations_Theses_Formatting_Manual.pdf](http://ogs.ucsd.edu/AcademicAffairs/Documents/Dissertations_Theses_Formatting_Manual.pdf).

The doctoral committee shall supervise and approve the candidate’s dissertation and conduct the final oral defense which shall be public and so announced.

If the committee does not issue a unanimous report on the examination, the dean of Graduate Studies shall be called upon to review and present the case for resolution to the Graduate Council, which shall determine appropriate action.

The Report of the Final Examination and Filing of the Dissertation for the Doctoral Degree form is initiated by the department, group, or school, signed by members of the doctoral committee, and the chair of the (major) department, group, or school.

The candidate submits the dissertation to the Office of Graduate Studies. Final approval by the dean of Graduate Studies and acceptance of the dissertation by the university archivist (on behalf of Graduate Council) represent the final steps in the completion of all requirements by the candidate for a doctoral degree on the San Diego campus. All dissertations and theses submitted in partial satisfaction of doctoral or master’s degree requirements shall be catalogued with the university library, and submitted to Proquest Information and Learning, for publication.

**Candidate in Philosophy Degree**

In several departments, as approved by the Graduate Council, the intermediate degree of candidate in philosophy (C.Phil.) is awarded to students upon advancement to candidacy for the Ph.D. degree. The minimum residence requirement for this degree is three quarters of continuous academic residence at UCSD. The C.Phil. degree cannot be conferred simultaneously with or following the award of a Ph.D. degree.

**Postgraduate Appointments**

A UCSD graduate student is not eligible for any UCSD postdoctoral appointment until all requirements for the doctoral degree have been completed. Such appointments may begin after the university archivist has accepted the dissertation and the Office of Graduate Studies has accepted the final report.

**Special Degree Programs**

**Graduate Programs in the Health Sciences**

UC San Diego offers research training programs in the health sciences leading to the doctor of philosophy degree. The purpose of these graduate programs is to prepare students for careers in research and teaching in the basic medical sciences. Program requirements are flexible, consisting of graduate courses and supervised laboratory or clinical investigation. Graduate programs in the health sciences are offered by (1) regular campuswide departments with activities related to the health sciences, for example, the Departments of Bioengineering, Biology, Chemistry and Biochemistry, and Psychology and (2) interdisciplinary groups of faculty drawn from the School of Medicine and from campuswide departments or from San Diego State University.

The following departments or interdisciplinary graduate groups provide research-training opportunities in the biomedical sciences and should be contacted directly for further information: biomedical sciences, biochemistry (in either biology or chemistry and biochemistry), bioengineering, bioinformatics, biology, biophysics, chemistry, clinical psychology, molecular pathology, neurosciences, physics, psychology, public health (in either epidemiology or health behavior), and the Scripps Institution of Oceanography.

**Ph.D.-M.D. Program**

Students may meet the requirements for both the Ph.D. and M.D. degrees in programs offered jointly by the School of Medicine and the graduate programs in the health sciences. In most cases, students are first admitted to the School of Medicine and may then apply for admission to a relevant graduate program. However, those students who wish to be considered for admission to the Medical Scientist Training Program (MSTP) may apply for admission to the School of Medicine and the MSTP concurrently.

Elements of the first two years of the medical school curriculum satisfy many of the requirements of the graduate program, but additional courses will be required. Thus, the student must complete requirements for the Ph.D. in accordance with the regulations of a department or
a group and must in addition meet the requirements for the professional degree. Students interested in such programs should consult the associate dean for Student Affairs, School of Medicine.

**Joint Doctoral Programs**

Certain departments of the University of California cooperate with similar departments on several campuses in the California State University System to offer joint programs of study leading to the doctoral degree. At UCSD, joint doctoral programs in audiology, biology, chemistry, clinical psychology, language and communicative disorders, engineering sciences (applied mechanics), mathematics and science education, and public health (in either epidemiology, global health, or health behavior) are currently offered in conjunction with San Diego State University, and in educational leadership in conjunction with San Diego State University and California State University, San Marcos. A Ph.D. in drama and theatre is offered in conjunction with University of California, Irvine. Applicants interested in these joint programs should consult the Departments of Biology, Chemistry and Biochemistry, Communicative Disorders, Mechanical Engineering, Psychology, Surgery, Theatre and Dance; or the Office of the Dean, College of Engineering; or the Center for Research in Mathematics and Science Education; or the School of Public Health at San Diego State University. Joint doctoral students meet the UCSD academic residency requirement by successfully completing a minimum of thirty-six units of course work at UCSD.

**Special Programs**

**Intercampus Exchange Program for Graduate Students**

A graduate student registered on any campus of the University of California, who wishes to take advantage of educational opportunities for study and research available on another campus in the UC system, must apply to become an intercampus exchange student on that UC campus. UCSD students must have completed at least one quarter of study and be in good standing prior to beginning an exchange.

Informal arrangements between departmental faculty on the two campuses must be undertaken prior to submission of a student’s application to assure that space in desired courses, seminars, or facilities will be available.

**NO LATER THAN FOUR WEEKS PRIOR** to the opening of the term on the host campus, a student must complete the Application for Intercampus Exchange Program for Graduate Students available online at http://ogs.ucsd.edu/AcademicAffairs/Documents/formicep.pdf. This application, approved by the student’s departmental graduate advisor and the graduate dean of the home campus, is forwarded for approval by the department and the graduate dean on the host campus.

Students participating in an intercampus exchange must pay all required fees and enroll as appropriate at the home campus. Evidence of fee payment, at the home campus, must be presented to enroll in classes at the host campus.

An exchange student is not admitted to graduate standing at the host campus, but is considered a graduate student in residence at the home campus. Grades obtained in courses taken by the student enrolled in the intercampus graduate student exchange program are transferred to the home campus for entry on the student’s official record. Library, health center, and other student privileges are extended by the host campus.

**Off-Campus Study**

(Other than Intercampus Exchange Program)

If the research and study program of a graduate student requires being off campus for extended periods of five weeks or more, the student may apply for off-campus study. During such periods a student is required to remain a registered student at UCSD and to carry twelve units of course work or research.

If the off-campus study is outside the state of California, one-half of the registration fee may be waived. All required fees including, but not limited to the full educational fee, student center fee, recreation facility fee, health insurance fee, and nonresident fee, if applicable, must be paid.

A graduate student who holds a fellowship, traineeship, or a research assistantship and desires to study off campus may do so under the following circumstances: The student must have completed at least one year of graduate study at UCSD, obtained the approvals of the academic department and the dean of Graduate Studies, and agreed to comply with the rules and regulations governing the award or appointment.

Regulations concerning accepting additional awards or compensation for appointments as outlined under the financial assistance section apply to off-campus study as well as on-campus study.

**UCSD Extension**

Students wishing to use UCSD Extension course work taken prior to admission at UCSD as a graduate student in partial satisfaction of requirements for a master’s degree must file a General Petition with the Office of Graduate Studies. Acceptance of such course work is subject to the regulations on “Transferring Credit” (which are described elsewhere in this catalog), the recommendation of the major department, and approval of the dean of Graduate Studies, and will be considered upon satisfactory completion of course work in a regular session.

**Complimentary Enrollment**

Through a reciprocal agreement with UCSD Extension, a limited number of spaces in extension classes are open to full-time graduate students (registered for twelve units or more) in good standing without payment of additional fees. The number of spaces available for each quarter varies. The student must obtain a UCSD Application for Enrollment from the Office of Graduate Studies and personally secure the necessary approvals. Course work taken through Complimentary Enrollment cannot be used in partial satisfaction of requirements for a master’s degree, nor can it be used toward the twelve unit full-time enrollment requirement.

**Education Abroad Program**

Graduate students may apply to study at most Education Abroad Program (EAP) host institutions, provided that they meet EAP requirements and have completed at least one year of graduate work prior to departure, are in good standing, and have the support of their academic department and graduate dean.

Costs vary according to location.

Students pay fees to the University of California and are enrolled at UCSD while abroad. Full academic credit is received for courses satisfactorily completed.

At UCSD, complete information and application forms for the various overseas campuses may be obtained from the Programs Abroad Office, International Center, University Center, 0018 or on the Programs Abroad Web site http://pao.ucsd.edu/pao/index.html. In addition, the Programs Abroad Office also offers information and advisory services to graduate and undergraduate students interested in pursuing other activities involving study, research, work, or travel abroad.

For a detailed list of the countries with EAP study centers, see also Education Abroad Program in the chapter titled “Courses, Curricula, and Programs of Instruction.” Study abroad information is also available online by accessing the EAP Web site http://eap.ucscd.edu.

**Postdoctoral Education**

Postdoctoral education emphasizes scholarship and continued research training for individuals who have recently completed a doctoral degree. The postdoctoral scholar conducts research under the general oversight of a faculty mentor in preparation for a career position in academe, industry, government, or the nonprofit sector.

The Office of Research Affairs has responsibility for the administrative management of the Postdoctoral Scholar Program. Interested candidates should directly contact the department,
research unit, or faculty member for information
on available positions or training opportunities.
The department or research unit initiates all
appointments.

Postdoctoral scholars are eligible for the UC
Postdoctoral Scholar Benefits Program, academic
photo identification card, and access to campus
resources (library, recreation facilities, etc.).

**Fees**

The following schedule of quarterly fees is
anticipated for the 2009–10 academic year:

<table>
<thead>
<tr>
<th></th>
<th>Resident</th>
<th>Nonresident</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tuition</td>
<td>$4,898.00</td>
<td>$8,360.50</td>
</tr>
<tr>
<td>Registration</td>
<td>288.00</td>
<td>288.00</td>
</tr>
<tr>

<td>Totals</td>
<td>$3,358.50</td>
<td>$8,360.50</td>
</tr>
</tbody>
</table>

**Miscellaneous Fees and Fines**

Students should also be aware of the following:

- Application fee for admission
  - Domestic: $60
  - International: 80
- Duplicate Photo-ID card: 10
- Petition for Readmission: 60
- Advancement to Candidacy for Ph.D.: 90
- Transcript of Record: 6
- Late payment of fees (Late registration): 50
- Late enrollment: 50
- Late and retroactive Add/Drop: 3
- Returned check collection: 35
- Filing fee: 119
- UCSD Statement Late Charge: 25
- Master's Thesis submission fee: 55

* Subject to change without notice. Updated information regarding fees may be found on the Web site http://ogs.ucsd.edu/Pages.tf.aspx

All receipts for payments made to the cashier,
whatever their nature, should be carefully preserved.
Not only do they constitute evidence that financial
obligations have been discharged, but they may be
required to support a claim that certain documents
or petitions have been filed.

**Fees for graduate students approved for enrollment in a half-time program (not to exceed six units) may be reduced by one-half of the Educational fee and one-half of nonresident tuition for nonresidents.**

**California Residency and the Nonresident Tuition Fee**

Each new student entering UCSD is required to submit a Statement of Legal Residence to the Office of the Registrar. No tuition is charged to students classified as residents of California. Nonresidents, however, are required to pay a quarterly tuition fee.

A complete statement covering California
residency requirements, determination of residence for tuition purposes, and/or recognized exceptions appears in the section “Residency Requirements” or on the Web site http://registrar.ucsd.edu/ver2/info/residency/nonres.html.

Additional information may be obtained from the Campus Residence Deputy, Office of the Registrar, Student Services Center, 2nd Floor, Suite 261. No other university personnel are authorized to supply information relative to residence requirements for tuition purposes. Students seeking to establish California residency for tuition purposes are advised to review the requirements and deadlines.

Adherence to the published deadlines is the responsibility of each student and is essential. Exceptions to waive or extend deadlines are not considered.

To the extent funds are available, subject to change, waiver of nonresident tuition may be granted to spouses and dependent, unmarried children under age twenty-one of university faculty members who are qualified for membership in the Academic Senate. Inquiries should be directed to the Office of the Registrar or the Academic Senate Office.

**University Registration Fee**

The university registration fee is a quarterly fee required of all registered students, and it must be paid at the time of the student’s registration. This fee is for services which benefit the student and are complementary to, but not part of, the regular instructional programs of the university. No part of this fee is refunded to students who do not make use of these services; however, students who petition and are approved for out-of-state study will receive a waiver for one-half of the registration fee. Exemption from this fee may be granted to surviving children of certain deceased California fire fighters or police officers. Students who believe they may qualify for an exemption on this basis must consult with the Financial Aid Office, Student Services Center (SSC), Third Floor North, for a ruling.

**Student Health Services and Insurance Plans**

The Student Health Service (SHS) is a nationally accredited health care facility providing primary health care for no or minimal charge during the academic year for all students who pay the university registration fee. Students with the Student Health Insurance Plan (SHIP) in the spring have access to the SHS during the summer at no additional charge. Students without SHIP may be seen in the summer for a modest fee. Additional information on the wide variety of services available at SHS is available via the Web at http://studenthealth.ucsd.edu.

SHS provides primary health care to all students with SHIP. Access to SHIP benefits requires written SHS referral except in cases of emergency care or care 150 miles out of the UCSD area.

**The Student Health Insurance Program (SHIP)**

SHIP is a mandatory year-round insurance plan for graduate and professional students unless a waiver has been granted (see WAIVERS). Students must be enrolled in SHIP for the spring quarter in order to retain coverage through summer. Three quarterly payments will provide year-round coverage under SHIP. The spring quarter premium extends insurance coverage through the summer quarter. Benefits and additional information may be viewed at the Web site http://studenthealth.ucsd.edu.

Premium payment for SHIP is due with the payment of the registration fee. Premiums for students holding graduate academic appointment titles for a full academic term at 25 percent time or greater will be paid directly by the university. Premiums for most students holding fellowships and training grants are also paid directly. Loans to cover premiums may be available for students who receive need-based financial assistance.

For first-year students arriving on campus prior to the start of the academic calendar year, it is highly recommended that the student review current insurance status and purchase short term coverage if necessary. Insurance information may be obtained by calling the insurance counselor at (858) 534-2124.

**Refunds**

No premium refunds are permitted, except when a student withdraws on or prior to the first day of classes, in which case a full refund of the premium will be made and coverage for that quarter will be canceled effective from the first day of the quarter. If an insured enters the armed forces, a pro-rata refund of premium paid will be made upon request. Refunds for all other fees are subject to the Refund Fee Schedule published in the Schedule of Classes. That refund schedule is effective beginning on the first day of the quarter and counts all calendar days. Students cannot expect exceptions to this schedule, regardless of the circumstances of the leave of absence/withdrawal request.

**Leave of Absence**

A student is eligible to be enrolled in SHIP when on approved leave of absence for a total of one
Waivers

Students already insured under a policy containing benefits equal to or better than SHIP may be eligible for SHIP waivers for up to one academic year. Documents required for a waiver are: 1) student’s written request, 2) proof of present insurance and premium payment to the end of the quarter, 3) a copy of the summary of insurance benefits, and 4) a copy of the insurance identification cards. Submit written requests with all required documents directly to UCSD, Student Health Insurance Office, 9500 Gilman Drive, Dept. 0039, La Jolla, CA, 92093-0039 no later than the last business day of the first week of the quarter. The insurance coordinator will mail final decisions regarding waiver requests to the student.

Educational Fee

The educational fee was established as a required fee for all students beginning with the fall quarter 1970. It is used to cover a variety of educational costs as determined by the regents. The educational fee may be reduced by one-half for students enrolled in six units or fewer (see “Part-time Study”).

Student Center Fee

Every student is required to pay a student center fee each quarter.

Recreation Facility Fee

Every student is required to pay a recreation facility fee each quarter.

Reduced Fee Enrollments

1. One-half of the established registration fee may be waived for graduate students whose research or study requires them to remain outside the state of California for five weeks or more of the quarter. Students must file a General Petition for this privilege. The reduction pertains to one-half of the registration fee only. A student must pay, in addition, all required fees including, but not limited to, the educational fee, student center fee, recreation facility fee, health insurance fee, and nonresident tuition fee, if applicable.

2. Graduate students approved for enrollment in a half-time program (not to exceed six units) are eligible for a reduction in fees of one-half the educational fee, and, if applicable, one-half of the nonresident tuition fee.

3. A full-time employee who is not subject to nonresident tuition, who has worked full time for the university for at least six months prior to the latest date that registration will be accepted, and who meets the admission requirements of the university is eligible for two-thirds reduction of both the university registration fee and the university educational fee for up to nine units or three regular session university courses per quarter, whichever is greater. An employee so registered is ineligible for the services and facilities of the Counseling Center, recreation facilities, or the Student Health Services, other than those services to which the employee is regularly entitled (University of California Staff Personnel Policy 260.23). Authorization for this privilege is secured from the Staff Personnel Office for staff employees, or from the Academic Personnel Office for individuals on academic appointments.

NOTE: In accordance with Academic Senate regulations, no voting member of the San Diego Division of the Academic Senate shall be recommended for a higher degree from UCSD unless the dean of Graduate Studies shall have certified that all requirements for that degree have been met prior to the appointment to a rank carrying the voting privilege.

Filing Fee

A student registered in the immediately preceding quarter, or on an approved leave of absence who has completed all requirements except for the final reading of the dissertation or thesis or the taking of the final examination is eligible to petition to pay a filing fee in lieu of registering and paying all required fees in the final quarter. The filing fee applies to both residents and nonresidents. Students must apply for this privilege by means of a General Petition.

Refund of Fees

Students who withdraw from UCSD during the first five weeks of instruction (35 calendar days) may receive partial refunds of fees, excluding health insurance, if applicable. The date of withdrawal, as related to the fee refund schedule, shall be the date on which notice of withdrawal is submitted to the Office of Graduate Studies (OGS). See Schedule of Classes for schedule of refunds.

Parking Fee

Students who park motor vehicles, including motorcycles, on the campus are subject to parking fees. (See “Parking,” in chapter entitled “Campus Services and Facilities.”)

Penalty Fees

Penalty fees (see “Fees”), are charged for failure to comply with normal deadline dates. To avoid such fines, students should fulfill all requirements in advance of the deadlines listed in the Schedule of Classes.

Transcript Fees

Students may obtain transcripts of their UCSD records from the Office of the Registrar for $6 for each copy. Transcripts must be requested several days in advance of date needed.

Late Fees

Students are responsible for meeting quarterly enrollment and registration (fees payment) deadlines which are published on StudentLink, in the Schedule of Classes, and a variety of student-directed Web sites and publications. A $50 late fee will be assessed for late enrollment and/or late registration up to $100 total. Late enrollment automatically causes late registration as payments cannot be credited to a student’s account until enrollment occurs. Late fee waivers are rarely granted and only in extenuating and verifiable circumstances. Only certain staff in the Office of Graduate Studies (OGS) are authorized to grant waivers.

Financial Assistance

Several kinds of financial assistance are available to graduate students at UCSD. These include fellowships and traineeships; assistantships in teaching, language instruction, and research; scholarships in full or partial payment of tuition and/or fees; and loans and grants-in-aid. Further details about these awards/appointments may be obtained from departmental, group, or school offices.

Descriptions in this section deal entirely with awards administered directly by the university.

Applicants for financial assistance should note the following: “Pursuant to Section 7 of the Privacy Act of 1974, applicants for student financial aid or benefits are hereby notified that mandatory disclosure of their Social Security number is required by the University of California to verify the identity of each applicant. Social Security numbers are used in processing the data given in the financial aid application; in the awarding of funds; in the coordination of information with applications for federal, state, university, and private awards or benefits; and in the collection of funds and tracing of individuals who have borrowed funds from federal, state, university, or private loan programs.”

Fellowships and Traineeships

Regents Fellowships, offered to students with excellent academic and research qualifications, provide a stipend of $20,000 for nine or ten months, plus tax-free resident fees and nonresident tuition, if applicable. These awards may be
supplemented with a partial graduate student researcher or research fellowship from available departmental resources. The amount of the supplement varies by department.

The San Diego Fellowship is designed to increase the quality of education and research by enhancing campus diversity. Currently it provides a minimum stipend of $1,250 per month plus resident fees and one year of nonresident tuition. These awards are usually given for two years. Academic departments are responsible for two additional years of support for the Ph.D, D.M.A., or Ed.D. students awarded this fellowship. Look online at http://ogs.ucsd.edu/fellowships/ for further information.

The seven most outstanding nominees for the San Diego Fellowship are awarded the Cota-Robles Fellowship. Fellows receive an $18,000 stipend plus fees for two years. Nonresident fellows are eligible for a tuition scholarship in their first year. Doctoral fellows are guaranteed comparable departmental support for at least two additional years.

The Alliance for Graduate Education and the Professoriate (AGEP) program is funded by the National Science Foundation (NSF). This fellowship is awarded to eight eligible graduate students in selected programs in science, mathematics, and engineering. For further information, look online at http://ogs.ucsd.edu/agep/index.aspx.

All other fellowship stipends are established by the department, group, or school and may vary in tenure from one to twelve months and in any amount up to a maximum of $3,111 per month. Fellowships awarded for one, two, or three quarters will also provide tax-free resident fees and nonresident tuition, if applicable. U.S. citizens and permanent residents are eligible for nonresidentship scholarships only for their first three quarters at UCSD. Awardees must register for twelve units of upper-division and graduate-level work each quarter and must remain in good academic standing, as described under “Standards of Scholarship.”

Fellows and trainees on twelve-month tenure are required to devote full time to graduate study and research during the summer as well as during the academic year. A brief resume of proposed summer graduate study or research, approved by the appropriate advisor, must be filed with the dean of Graduate Studies before the end of the spring quarter preceding the summer portion of the fellowship or traineeship tenure.

Some fellowships and traineeships offer the privilege of participation in the teaching or research programs of the university. The principal types of fellowships/scholarships at UCSD are the following:

1. Regents Fellowships
2. San Diego and Cota-Robles Fellowships
3. Research Fellowships
4. U.S. Public Health Service Predoctoral Traineeships
5. Fee Scholarships
6. Tuition Scholarships (eligibility limited to international students and first-year domestic nonresident students, only)

**Assistantships**

Graduate students may be appointed by UCSD on a part-time basis as graduate student researchers and teaching assistants.

Graduate students enrolled full-time (twelve units or more) may be appointed up to 50 percent time (twenty hours/week) during the academic year and 100 percent time during the summer months, although most departments limit support to 50 percent time-round. Students enrolled for less than full-time (one to eleven units) are eligible, at the discretion of the department, for 25 percent time appointments. Appointees must remain in good academic standing, as described under “Standards of Scholarship.”

The seven most outstanding nominees for the San Diego Fellowship are awarded the Cota-Robles Fellowship. Fellows receive an $18,000 stipend plus fees for two years. Nonresident fellows are eligible for a tuition scholarship in their first year. Doctoral fellows are guaranteed comparable departmental support for at least two additional years.

The Alliance for Graduate Education and the Professoriate (AGEP) program is funded by the National Science Foundation (NSF). This fellowship is awarded to eight eligible graduate students in selected programs in science, mathematics, and engineering. For further information, look online at http://ogs.ucsd.edu/agep/index.aspx.

All other fellowship stipends are established by the department, group, or school and may vary in tenure from one to twelve months and in any amount up to a maximum of $3,111 per month. Fellowships awarded for one, two, or three quarters will also provide tax-free resident fees and nonresident tuition, if applicable. U.S. citizens and permanent residents are eligible for nonresidentship scholarships only for their first three quarters at UCSD. Awardees must register for twelve units of upper-division and graduate-level work each quarter and must remain in good academic standing, as described under “Standards of Scholarship.”

Fellows and trainees on twelve-month tenure are required to devote full time to graduate study and research during the summer as well as during the academic year. A brief resume of proposed summer graduate study or research, approved by the appropriate advisor, must be filed with the dean of Graduate Studies before the end of the spring quarter preceding the summer portion of the fellowship or traineeship tenure.

Some fellowships and traineeships offer the privilege of participation in the teaching or research programs of the university. The principal types of fellowships/scholarships at UCSD are the following:

1. Regents Fellowships
2. San Diego and Cota-Robles Fellowships
3. Research Fellowships
4. U.S. Public Health Service Predoctoral Traineeships
5. Fee Scholarships
6. Tuition Scholarships (eligibility limited to international students and first-year domestic nonresident students, only)

**Assistantships**

Graduate students may be appointed by UCSD on a part-time basis as graduate student researchers and teaching assistants.

Graduate students enrolled full-time (twelve units or more) may be appointed up to 50 percent time (twenty hours/week) during the academic year and 100 percent time during the summer months, although most departments limit support to 50 percent time-round. Students enrolled for less than full-time (one to eleven units) are eligible, at the discretion of the department, for 25 percent time appointments. Appointees must remain in good academic standing, as described under “Standards of Scholarship.”

Graduate students who are appointed as graduate student researchers are eligible for remission of tuition and fees if they have a minimum 25 percent appointment for the entire quarter for which tuition and fees are paid, or the dollar equivalent; have an appointment effective with the first week of instruction in the quarter for which tuition and fees are paid; and are within the time limits for support described earlier in this section.

Teaching assistants and others appointed on academic titles at 25 percent time or more for the quarter are eligible for payment of partial fee remission of 100 percent of the annual education and registration fees and 100 percent of the Graduate Student Health Insurance fee.

Graduate students appointed as teaching assistants, associates, readers or tutors (ASE's) are represented by the Association of Student Employees/UAW under a collective bargaining agreement with the University of California. All salary payments under these titles are subject to a deduction for union membership dues or agency fee deduction for students who choose not to become members of the union. The university/UAW Agreement can be retrieved electronically at http://ogs.ucsd.edu/ase/index.htm.

All graduate students who are U.S. citizens and appointed as teaching assistants or graduate student researchers or are employed by the university in other positions are required by the California Constitution to sign the State Oath of Allegiance. In addition, all graduate student appointees and employees are required by university policy to sign the university's Patent Agreement. Copies of both documents may be obtained from the student's academic department.

**Taxability of Awards**

Under the 1986 Tax Reform Act, the taxability of awards is as follows:

1. Fellowships and Scholarships. The portion of the stipend used for tuition, fees, books, and course-related expenses required of all students in the course are not taxable income. The portion of a stipend used for other purposes are taxable income.
2. Graduate Student Researchers and Teaching Assistants. All compensation is taxable income.
3. Payment of tuition and fees under the Graduate Student Researcher Tuition and Fee Remission program and payment of partial fee remission and graduate student health insurance for those appointed 25 percent time or more as teaching assistants or other academic titles, is nontaxable income.
4. Grants for Travel to Scholarly Meetings and for Graduate Student Research Expenses. May be taxable.

Students are advised to review available tax materials and make their own decisions about tax withholding, reporting of income, excluding income from taxation, and filing required tax forms. UCSD departmental and central administrative staff are not able to advise students on individual tax matters.

Graduate student fellowships, scholarships, and traineeships are not subject to withholding for taxes under the Federal Insurance Contribution Act (FICA). The salary of graduate students appointed as Teaching Assistants, Graduate Student Researchers, Readers, Tutors, or who are employed on campus are exempt from FICA/DICP if the students are registered for a minimum of six units by the third week of each quarter and employed less than 80 percent. Nonresident aliens on F-1 and J-1 visas are, by federal law, exempt from FICA/DICP. If students do not meet the exemption requirement, 8.95 percent (7.5 percent for DCP in lieu of social security and 1.45 percent for Medicare) will be deducted from their salary.

To remain exempt during the summer, a student employee (non-career) must be employed less than 80 percent and be registered by the first day of summer session in a minimum of six units for an undergraduate student, three units (five-week session) or six units (ten-week session) for a graduate student.

**Application Procedures**

Entering students. The online application form for graduate admissions is used to apply for any of the following: fellowships, traineeships, scholarships, and assistantships (teaching, language, or research).

In order for an applicant to be considered for the ensuing academic year, all supporting materials must be received by the department application deadline. No assurance can be given that requests for fellowships, traineeships, or scholarships can be processed after stated deadlines. Requests for assistantships may be accepted
after the deadline, but most departments offer assistantships at the same time they consider applications for fellowships. Therefore, applicants for these appointments are strongly urged to submit their requests as early as possible.

Continuing and returning students. Consult with their departments.

**Award Notification**

The awarding of fellowships and similar awards for the following academic year will be announced not later than April 1. UCSD subscribes to the agreement of the Council of Graduate Schools of the United States, under which successful applicants for awards are given until April 15 to accept or decline such awards. An award accepted from one of the member universities may be resigned at any time through April 15. However, an acceptance given or left in force after that date commits the student not to accept another appointment without first obtaining formal release for that purpose.

**Loans and Grants-in-Aid**

An excellent package of grants-in-aid, work-study, and loans is available to graduate students who show evidence of financial need as determined by analysis of a completed Free Application for Federal Student Aid (FAFSA).

See section on financial assistance in chapter entitled “Campus Services and Facilities.”

**Time Limits for Graduate Student Support**

For doctoral students, all financial support administered by UCSD (including fellowships, scholarships, and appointment but excluding loans) is restricted to students who are within their departmental support time limits (see “Ph.D. Time Limits” and description of each department’s graduate program).

M.F.A. and M.P.I.A. students can be supported for a maximum of ten quarters. M.A. and M.S. students can be supported for a maximum of seven quarters.

**Fellowships and Research Awards from Outside the University**

In addition to fellowships, traineeships, and loans administered by the university, other types of graduate student support are available through federal agencies and private foundations. Students wishing to explore such sources of support for their studies at UCSD are urged to consult one of the many directories available in the reference section of Geisel Library, the fellowship listings provided via UCSD’s SURF Fellowship database (http://research.ucsd.edu/surf/), the Community of Science Web site (http://www.cos.com), Grants Select (http://www.grantselect.com), and the University of California’s research opportunity page (http://www.ucop.edu/research/). Most application deadlines occur in the fall or early winter. Among the many organizations which award fellowships to students at UCSD are the Department of Defense; the Department of Education; the Ford Foundation; the Hertz Foundation; the Howard Hughes Medical Institute; Institute of International Education; the National Aeronautics and Space Administration; the National Science Foundation; the Social Science Research Council; and the Woodrow Wilson National Fellowship Foundation. Additional support is offered by the Office of Graduate Studies and the Graduate Fellowship Advisor.

**General Policies and Requirements**

**Integrity of Scholarship**

See “UCSD Policy on Integrity of Scholarship” in the Academic Regulations section of this catalog.

**Student Conduct**

Graduate students enrolling in the university assume an obligation to conduct themselves in a manner compatible with the university’s function as an educational institution. Rules concerning student conduct, student organizations, use of university facilities, and related matters are set forth in UC San Diego Campus Regulations Applying to Campus Activities, Organizations, and Students. Copies are available online at http://ugr8.ucsd.edu/judicial and at the Office of Graduate Studies, and the Office of Judicial Affairs.

**Student Appeals**

**Academic Appeals**

The faculty of a department or program has primary responsibility for maintaining the excellence of graduate programs, and it is in the best position to judge its students’ academic performance. Consequently a graduate student appeal of an academic decision should first be made to the individual faculty member who made the decision. If this does not result in a resolution that is satisfactory to the student, he or she may appeal to the department or program chair. Graduate students may appeal a course grade or Ph.D. or master’s qualifying or final exam result only if he or she believes that nonacademic criteria were applied in determining the course or exam grade. A student who wishes to appeal a course grade or exam result should follow the procedure described in “Grade Appeals” in the “Academic Regulations” section of the UC San Diego General Catalog.

**Non-Academic Appeals**

Graduate students may appeal actions of departments, programs, individual faculty members, departments, or administrators relating to a student’s academic program or financial support if they believe that:

1. due process was not followed in arriving at a decision
   OR
2. personal prejudice affected the judgment rendered.

A non-academic appeal may be submitted to the department or program chair, individual faculty member, or administrator within one month of the date of learning of the action or the date that the student should have reasonably known of the action.

If an appeal to an individual faculty member or administrator is not resolved to the student’s satisfaction, he or she may then submit a written appeal to the department or program chair, who shall attempt to adjudicate the case with the faculty member or administrator and the student within two weeks.

If the appeal is not resolved to the student’s satisfaction at the department or program level, he or she may then attempt to resolve the matter through written appeal to the dean of Graduate Studies, who will attempt to adjudicate the case within two weeks. The dean may take the appeal to the Graduate Council for review, which may extend the time required to reach a final resolution.

The student’s request for the dean’s review should include a written statement describing the nature of the grievance, along with copies of any and all documents in his or her possession supporting the grievance. Students are encouraged to contact the assistant dean for Student Affairs in the Office of Graduate Studies for assistance with the appeal process.

**Employment Appeals**

Students holding an academic appointment, such as graduate student researcher, are subject to the Academic Personnel Manual policy 140. A copy of this policy is available in the Office of Graduate Studies or it may be viewed online at http://www.ucop.edu/acadaiv/acadpers/apm/welcome.html. Appeals by teaching assistants, readers, and tutors are covered by the ASE/UAW contract that may be viewed at http://ogs.ucsd.edu/pages/ase.aspx.

**Other Appeals**

Grievances concerning violations of student rights are covered by the Student Conduct Code grievance procedures, which are available online at http://ugr8.ucsd.edu/judicial/23_00.html. Examples of violations of students' rights include those affecting rights to privacy or protection...
from discrimination. These grievances are handled by the Office of Student Policies and Judicial Affairs, (858) 534-6225, http://ugr8.ucsd.edu/judicial.

Students who disagree with an instructor’s response to his or her request for disability accommodation may appeal the faculty decision or action to the CEP Subcommittee on Appeals for Accommodation of Students with Disabilities and Steps for Academic Accommodation, as provided at http://www-senate.ucsd.edu/manual/Appendices/app3.htm. A student’s appeal of a grade based on disability discrimination follows the Grade Appeal Process for resolution. A student’s challenge of any other action based on an alleged disability discrimination, must be lodged in accordance with Student Grievance procedures in the Student Conduct Code.

Student rights grievances should be made promptly to the decision-maker, if known to the student. If an appeal to an individual faculty member or administrator is not resolved to the student’s satisfaction, he or she may submit a written appeal to the appropriate committee, governmental body, unit manager, supervisor, or designated representative for review and disposition. Such appeal must be made not later than one hundred (100) calendar days from the date of the incident causing the grievance. If the appeal at this level is not resolved to the student’s satisfaction, the appeal may be continued as described in the Student Conduct Code procedures referenced above.

Appeal and other rights for students accused of violating UCSD policies and procedures are outlined in the Student Conduct Code http://ugr8.ucsd.edu/judicial/22_00.html.

Exceptions

A student may request an exception to the normal procedures and requirements governing graduate studies by submitting a General Petition, available from the department. The petition must state clearly the reasons for requesting the exception and bear all required approvals before being submitted to the Office of Graduate Studies.

Within twelve months of action by UCSD with which the student disagrees, such as denial of a right to withdraw, dropping or adding a class, or other decisions related to the student’s transcript, a student may petition the dean of Graduate Studies for review. Petitions pertaining to matters that occurred in excess of twelve months in the past are submitted to the Committee on Educational Policy of the UCSD Academic Senate through the dean of Graduate Studies.

Requests for exceptions to time limits require a letter of explanation and support from the student’s research advisor, and support and justification from the program’s graduate advisor and endorsement by the department or group chair. Such requests are submitted to the Graduate Council through the dean of Graduate Studies. Exceptions to the time limits policy are granted only in the case of truly exceptional and unavoidable circumstances.

Standards of Scholarship

Grades

Only upper-division, graduate, and professional courses in which grades of A, B, C (including plus (+) or minus (–)), D, or S (Satisfactory) are earned can be counted in satisfaction of the requirements for a higher degree.

A student’s grade-point average (GPA) is computed by dividing the total number of grade points earned by the total unit value of graded upper-division, graduate, and professional courses undertaken at UCSD with the exception of those undertaken in UCSD Extension. Grades of S, U, I, IP, NR, and W are excluded in computing a grade-point average. Lower-division course work units are not used in computing a graduate student’s grade-point average or in satisfying program requirements for a higher degree, with the exception of language courses taken by students in the M.P.I.A. program.

Each department or group prepares, not later than the second week of each spring quarter, a detailed, written evaluation of each of its doctoral or M.F.A. students. These evaluations are designed to inform students of their progress and to improve communications between faculty and graduate students. Evaluations are discussed with students who may elect to add written comments before signing the copy of the evaluation sent to the Office of Graduate Studies. A student’s signature on the evaluation indicates knowledge of the assessment but does not necessarily signify agreement.

To be in good standing academically a graduate student must meet departmental standards including a satisfactory spring evaluation, maintain a GPA of 3.0 or the equivalent in upper-division, graduate, and professional course work, and must not have accumulated more than a total of eight units of F and/or U grades overall, unless departmental standards specify more stringent grade requirements.

Good standing is a requirement for:

1. Holding academic and staff appointments.
2. Holding fellowship, scholarship, or traineeship appointments.
3. Participating in the Education Abroad Program (EAP)
4. Advancing to candidacy for a graduate degree.
5. Going on leave of absence.
6. Receiving a graduate degree from UCSD.

Graduate students who are not in good standing for any reason are subject to probation and/or disqualification from further graduate study.

Grading System

The grade of A+, when awarded, represents extraordinary achievement but does not receive grade-point credit beyond that received for the grade of A. The grades of A, B, and C may be modified by plus (+) or minus (–). When attached to the grades of B and C, plus (+) grades carry three-tenths of a grade point more per unit, and when attached to A, B, and C, minus (–) grades carry three-tenths of a grade point less per unit. Grades and grade points are described as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>4.0</td>
</tr>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>A–</td>
<td>3.7</td>
</tr>
<tr>
<td>B+</td>
<td>3.3</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>B–</td>
<td>2.7</td>
</tr>
<tr>
<td>C+</td>
<td>2.3</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>

<tr>
<td>C–</td>
<td>1.7</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>F</td>
<td>0.0</td>
</tr>
<tr>
<td>S</td>
<td>0 (equivalent to B– or better)</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>U</td>
<td>Unsatisfactory</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete—but work of non-failing quality*</td>
</tr>
<tr>
<td>IP</td>
<td>In Progress (provisional grade; replaced when full sequence is completed)</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawal (assigned when withdrawing or dropping a course beginning fifth week to end of ninth week of instruction)</td>
</tr>
</tbody>
</table>

* Requires Request to Receive Grade Incomplete form to be initiated and completed by the student, approved by the instructor, and filed with the department prior to the end of finals week. The Incomplete grade will lapse to F or U if not made up by the last day of finals week in the following quarter.

All grades except Incomplete and In Progress are final when entered in an instructor’s course report filed at the end of the quarter.

While grades of U are not computed in a grade-point average, they are not considered satisfactory grades for students on appointment, nor are they considered to be evidence of satisfactory progress on the part of any student. Therefore, a student whose record bears more than eight units of U and/or F grades in upper-division, graduate, or professional course work may not be eligible to continue on appointment and may be subject to academic probation or disqualification.
Changes in Grades
All grades except I and IP are final when filed by the instructor unless a clerical or procedural error is discovered.

No change of a final grade may be made on the basis of revision or augmentation of a student’s work; no term grade except Incomplete may be revised by further examination; and no grade may be changed after one calendar year from the time the grade was recorded.

Repetition of Courses
A student assigned a grade of D, F, or U may petition to repeat the course on the same grading basis for which it was first taken. That is, a course in which a grade of D or F has been received may not be repeated on an S/U basis. Conversely, a course in which a grade of U has been awarded may not be repeated on the basis of a letter grade. Degree credit for a course will be given only once, but the grade assigned for each enrollment shall be permanently recorded. Only the grade received in the repetition of the course will be used in calculating the overall grade-point average for the first sixteen units repeated. For additional units repeated, the grade assigned for each enrollment shall be used in calculating the grade-point average.

No Report/No Record
A blank entry appearing on student transcripts in lieu of a grade indicates that the student’s name appeared on a grade report but no grade was assigned by the instructor. A blank entry will lapse automatically into an F or U if not removed or replaced by a final grade by the last day of instruction of the subsequent quarter, and will be computed in the student’s GPA.

I (Incomplete)
The grade of I may be assigned by an instructor only when the student’s work is of passing quality but is incomplete. The student must complete and submit to the instructor the form, Request to Receive Grade Incomplete and Removal of Grade Incomplete, which will contain both the reason for requesting the grade I and the conditions to be met before the Incomplete can be replaced with a final grade. The Incomplete must be made up, the grade assigned, and the completed form filed with the Office of the Registrar no later than the end of final examination week the following quarter.

Incomplete grades assigned in the quarter before a graduate student withdraws or takes an approved leave of absence must be replaced by a final grade before the end of the academic quarter following to prevent the Incomplete from lapsing to F or U.

IP (In Progress)
An IP is assigned in a sequential course which extends over more than one quarter, and the evaluation of a student’s performance may not be possible until the end of the course. A student who has dropped out without completing the entire sequence may be assigned final grades and unit credit for any quarter(s) completed, provided that the instructor has a basis for assigning the grades and certifies that the sequence was not completed for good cause. An IP not replaced by a final grade will remain on the student’s record. Courses graded IP are not in calculating a student’s grade-point average until graduation. At that time course units still graded IP on a student’s record must be treated as units attempted in calculating the GPA; thus units graded IP will have the same effect on the overall GPA as an F or U.

S/U (Satisfactory/Unsatisfactory)
The minimum standard of performance for a course of Satisfactory shall be the same as the minimum for a grade of B–.

With the approval of the Graduate Council, departments may offer graduate courses in which graduate students may elect to be evaluated on an S/U basis and courses in which S/U grading shall be the only grading option. Grading options for a given course are identified in course listings in the UC San Diego General Catalog.

In addition, with the approval of the department and the instructor concerned, graduate students may elect to have the following courses graded on an S/U basis: any upper-division or lower-division course taken (provided they have obtained approval of the instructor and the department), and any graduate or upper-division course outside their major department. If departmental requirements have been fulfilled for advancement to candidacy for the doctoral degree, graduate students may take any course on an S/U basis.

Selection of S/U as a grading option must be made in the first two weeks of a quarter. Units graded Satisfactory shall be counted in satisfaction of degree requirements but shall be disregarded in determining a student’s grade-point average. No credit shall be allowed for work marked Unsatisfactory.

W (Withdrawal)
Students who discontinue graduate study any time during a quarter without formally withdrawing will receive failing grades for all course work undertaken. Formal withdrawal requires filing a Leave of Absence, Extension and/or Withdrawal form prior to leaving campus with the Office of Graduate Studies after receiving departmental approval and all other approvals listed on the form. When a student withdraws before the end of the fourth week of instruction, no course entries will appear on the transcript for that quarter. Students who withdraw from the university or drop a course between the beginning of the fifth week of instruction and the end of the ninth week of instruction will be assigned a W (Withdrawn) by the registrar for each course affected.

Courses in which a W has been assigned will be disregarded in determining a student’s grade-point average.

Final Grades
Students may access their full UCSD graduate academic record on StudentLink in the academic history module. The student must have his/her PID and PAC numbers to access StudentLink. If lost or misplaced, the PAC number may only be obtained from the Office of the Registrar (OAR) after providing proof of identification; the PID may be obtained through the departmental graduate program coordinator or the OAR. While grade reports submitted by instructors at the end of the quarter are generally considered final, students should carefully examine their grade report or transcript for omissions and clerical errors and consult with instructors and the Office of the Registrar to clarify any discrepancies.

Admission Requirements

Academic
Applicants for graduate admission must present official evidence of receipt of a baccalaureate degree from an accredited institution of higher education or the equivalent, with training comparable to that provided by the University of California. A minimum scholastic average of B or better is required for course work completed in upper-division, or prior graduate study.

Admission Policies

Duplication of Advanced Degrees
Normally, duplication of advanced academic degrees, M.A., M.S., Ph.D., is not permitted. A duplicate academic degree is one at the same level, e.g., a second master’s degree or second Ph.D., regardless of the discipline or the specialization awarding the degree. A professional degree at the master’s or doctoral level, e.g., Au.D., D.M.A., Ed.D., M.B.A., M.Ed., M.F.A., M.P.I.A., M.D. Pharm.D., is not regarded as a duplicate of an academic degree.

Students who already hold an advanced degree may be admitted to UCSD to pursue a second advanced degree at the same level only
under limited circumstances, and only with the consent of the Graduate Council. Recognizing that there are circumstances in which it is appropriate for a student to pursue a second degree, the Graduate Council will consider the following criteria when reviewing requests for permission to do so at UCSD.

1. The degree already held by the student must be in a fundamentally different disciplinary field from the department to which the student is applying. A request for permission to be admitted to a degree program at UCSD should document this clearly, and should indicate the differences both in intellectual training and in qualification for future employment that the second degree would confer.

2. The department or program considering the applicant must make a clear case that there is no other way at UCSD for the student to obtain the same outcome for future employment prospects, e.g., by pursuing a master's program or postdoctoral study rather than a second Ph.D.

If the decision of the Graduate Council is that the student should be admitted to a particular department or program for a master’s degree alone, the student is barred from requesting permission to continue for a Ph.D. in that department or program.

Non-Degree Study

There is no “student-at-large” classification at UCSD; application for admission must be made to a specific department or group. Applicants who wish to enroll for ‘course work only” within a department or group and who do not intend to pursue a higher degree at UCSD may request admission for non-degree study. Applicants for non-degree study must satisfy all admission requirements and are not eligible for fellowships or assistantships. Non-degree status is granted for up to one year; students may petition the dean of Graduate Studies for a second year of non-degree status.

Part-Time Study, Including Half-Time

Students who enroll in fewer than twelve graduate or upper-division units each quarter are considered part-time students. International students on F1 or J1 visas must be enrolled full-time each quarter. Students who are approved by their major department and by the dean of Graduate Studies for enrollment in a program of half-time study (maximum of six units or fewer) for reasons of occupation, family responsibilities or health, may be eligible for a reduction in fees. All other part-time students (7–11 units) pay the same fees as full-time students.

Part-time study may be pursued in several masters’ programs and a few doctoral programs at UCSD. In all instances, part-time students must satisfy the same admission requirements as full-time students and are eligible, at the discretion of a department, for appointment to 25 percent time teaching or research assistantships. Admitted students must file the petition for half-time study with the Office of Graduate Studies no later than the last day of the second week of the quarter to be eligible for a fee reduction.

Application Procedures

When to Apply

Each graduate program sets a unique application deadline. Most deadlines are set between December and February. A few programs accept applications for winter and spring admissions. For specific deadlines refer to the online application instructions at http://ogs.ucsd.edu or contact the specific program office. Applicants need not have completed their undergraduate programs prior to applying.

How to Apply

UCSD encourages the use of the online application and payment of the nonrefundable application fee by credit card. The online application can be accessed at http://ogs.ucsd.edu where detailed instructions for completion of the application are provided.

Additional program and application information can be obtained from each graduate program office. Access the UCSD Web site http://ucsd.edu and the appropriate program’s graduate study information. Telephone numbers and campus addresses are listed with the department information in this catalog. The Graduate Admissions Application includes application for a fellowship, traineeship, scholarship, or assistantship. The primary documents required in support of an application are listed below. Each program may require additional documents.

Required Supporting Documents

All supporting documents, including letters of recommendation, should be completed using the online system. Any additional supplemental materials are mailed directly to the applicant’s prospective major department.

Academic Records

Applicants must request that official transcripts of all previous academic work, including certification of degrees received or documentation of status upon leaving each institution, be forwarded to their prospective major department. Only official records bearing the signature of the registrar and the seal of the issuing institution will be accepted. Applicants with academic work in progress who expect to complete a degree program before the intended date of enrollment at UCSD must submit evidence of degree conferral and a final academic record, as soon as they are available. The undergraduate degree must be completed prior to the start of graduate study.

SPECIAL NOTE TO INTERNATIONAL APPLICANTS

In all applications for graduate admission, official records bearing the signature of the registrar or other responsible academic officer and the seal of the issuing institution are required. However, true copies, facsimiles, or photostatic copies of foreign academic records will be accepted if, after the copies have been made, they have been personally signed and stamped by an educational official of the issuing institution, who certifies that they are exact copies of the original document. Properly signed copies should be sent instead of irreplaceable original documents. Unless academic records are issued in English by the institution itself, certified English translations must accompany official documents written in a language other than English.

Foreign academic records should show all courses attended each year, examinations passed, seminars completed, and grades or marks received in all institutions where formal records are maintained. Official evidence of degree conferral must also be supplied, together with evidence of rank in class if possible.

Graduate Record Examinations (GRE) Scores

Most graduate programs require that applicants take the GRE. Contact the specific program for further information. Applicants who are applying for admission to a department, group, or school which requires that they take the GRE should do so as early as possible to insure the timely receipt of their score results. Applicants must take the GRE no later than fall in order to meet most departmental deadlines for admission. Consult the GRE Information & Registration Bulletin or the GRE Web site http://gre.org for further information. Only official scores sent to UCSD by E.T.S. will be accepted for admission.

To facilitate the processing of applications for admission, applicants may forward to their proposed major department, group, or school a copy of their GRE examination score as soon as it is received, since official copies are not always immediately received by the appropriate department at UCSD.

Letters of Recommendation

Applicants should arrange to have three letters of recommendation submitted online to UCSD. If
paper letters are necessary they must be mailed to the prospective major department, group, or school. (Recommendation forms can be printed from the online application site). It is most important that letters of recommendation be completed by individuals in a position to analyze an applicant’s abilities and academic or professional promise.

International Applicant Financial Statement

International applicants accepting admission to UCSD are required to certify that they possess sufficient funds to cover all fees, transportation, and living expenses during the first academic year of graduate enrollment at UCSD. An International Applicant Financial Statement, for the purpose of indicating the amount and source of funds available for graduate study, is made available to applicants after accepting admission; the financial statement must be submitted to the Graduate Admissions office before visa forms can be provided.

Opportunities for employment, on or off campus, are extremely limited, and international applicants should not base their educational plans on the hope of finding employment after arriving in the United States.

Admissions Examination Information

There are a variety of internationally administered examinations which may be taken to meet requirements for admission to graduate study or to satisfy certain requirements for advanced degrees. Several examinations of importance to UCSD applicants are listed here.

English Language Test

All international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) exam and submit their test scores to the Office of Graduate Admissions.

The minimum TOEFL score for admission is 550 for the paper-based test (PBT), 213 for the computer-based test (CBT), or 80 for the Internet-based test (IBT). The minimum IELTS score is 7.0. Applicants admitted with low scores may be required to take an English proficiency test upon arrival at UCSD and to enroll in an English course until the required proficiency is attained.

Application: TOEFL information and forms are available online at http://toefl.org or from TOEFL Services, P.O. Box 6151, Princeton, NJ 08541-6151. IELTS information and forms are available online at http://www.ielts.org. Information and forms may also be available at United States embassies, consulates, and related centers.

Test of Spoken English (TSE)

The Test of Spoken English helps foreign students provide a reliable measure of proficiency in spoken English. This test is highly recommended for foreign applicants who wish to be considered for a teaching assistantship. Test information is available at http://www.ets.org.

Admission and Registration

Official admission to graduate study at the university is contingent upon review of an applicant’s record, receipt of final undergraduate transcript showing degree(s) awarded, receipt of official transcripts of all attended institutions, an affirmative recommendation by the prospective department, group, or school, and action by the Office of Graduate Studies. The dean of Graduate Studies or the prospective major department, group, or school may deny admission if an applicant’s scholastic record is undistinguished, if the preparation is judged inadequate as a foundation for advanced work, or in the event that no further students can be accommodated for a given quarter. Only the official Certificate of Admission from the dean of Graduate Studies constitutes formal approval of admission to a graduate program at UCSD.

Official notification of admission by the dean of Graduate Studies will be sent well in advance of the beginning of the quarter for which application has been made. Applicants should call their prospective major department, if formal notification is not received four weeks prior to the beginning of the quarter for which they applied.

Admission to graduate standing does not constitute registration for classes. A student is not officially registered for classes until the entire registration procedure is completed each quarter. Information and all necessary registration materials will be available at department offices approximately two weeks before the opening of the quarter (see “Academic Calendar”).

Deferral and Reapplication

Applicants who are admitted but decide not to register in the quarter for which they first apply may request deferral of their application for a later quarter within the same academic year or the academic year immediately subsequent. Application for admission of an approved deferred applicant for the subsequent academic year may be made by submitting a statement of activities and official transcripts of any academic work undertaken since the first application to the department or group. Admission is not guaranteed to previously admitted applicants who have an approved deferral. In no case are application files retained for more than four consecutive academic quarters from the date of first application. Application after this period may be made only by completing a new application and providing all necessary documents, including payment of the graduate application fee.

Students who are denied admission must submit a new application and fee together with required documentation in order to be considered for admission in another academic year.

Readmission

A graduate student whose status has lapsed because of an interruption in registration must petition his or her department for readmission at least eight weeks prior to the first day of the quarter in which reenrollment is intended. Do not complete an Application for Admission. Students must submit supplementary transcripts of all academic course work undertaken since last enrolled at UCSD, pay a readmission fee of $60, and complete a General Petition and a supplementary Statement of Activities. In addition, a Statement of Legal Residence is required for all students returning after an absence of two quarters or more.

Readmission is not automatic.

Registration Requirements and Procedures

All students must enroll and pay fees on or before the deadline dates established by the Office of the Registrar for each quarter to avoid paying late fees. Enrollment materials are obtained at the major department. (See Schedule of Classes for current deadlines.)

Full-Time Student

A full-time student is required to be registered for twelve units each quarter of each academic year until the completion of all requirements for the degree, including the filing of the thesis or dissertation.

Part-Time Student

A part-time student is enrolled in fewer than twelve units a quarter but is admitted as a regular student. A part-time student must pay full fees unless approved by the dean of Graduate Studies to enroll in half-time status for six units or fewer. A student must file the petition for half-time study with the Office of Graduate Studies no later than the last day of the second week of the quarter to be eligible for reduced fees. (See “Admissions Policies-Part-Time Study.”)

Schedule of Classes

Detailed information on registration and enrollment procedures is contained in the quarterly
Payment of Registration Fees

Please refer to the “Payment of Registration Fees” section in the “Undergraduate Registration” portion of this catalog or the quarterly Schedule of Classes which outlines procedures for payment of registration fees.

Continuous Registration

All graduate students are required to be registered each quarter until all degree requirements have been completed, including filing of the thesis or dissertation and the final examination, or to be on an approved leave of absence.

A student who fails to register or to file an approved leave of absence form by the registrar’s deadline date (no later than the end of the second week each quarter) will be assumed to be withdrawn from UCSD and will be dropped from the official register of graduate students. In addition, all outstanding Incomplete grades, and NRI assigned by the registrar, will lapse to F’s or U’s unless cleared by the end of the current quarter.

A student who is on leave of absence or who has withdrawn from the university is not entitled to withdraw books from the library or to use other university facilities or faculty time. A student who is withdrawn must petition for readmission to resume study at a later date, pay the nonrefundable readmission fee, and be considered for readmission with all others requesting admission to that quarter.

Doctoral degree candidacy will lapse for graduate students who fail to register and are not granted a formal leave of absence. To be reinstated to candidacy, a graduate student must be readmitted, enroll and register, be readvanced to candidacy, and pay the candidacy fee.

Late Registration/Deadline and Penalty Fees

Students will be assessed late fees if not enrolled and registered by the registrar’s published deadlines outlined in this catalog and the quarterly Schedule of Classes. Please refer to the “Graduate Admission Information and Enrollment Deadlines” portion of this catalog or to the quarterly Schedule of Classes for additional information.

A student who has not completed registration (enrolled and paid fees) by the deadline for change of program must petition for permission to register late and will pay late fees totaling $100, regardless of the source of fees payment.

A student whose registration in classes is cancelled for non-payment of fees and seeks reinstatement will be assessed both the late enrollment ($50) and late registration fees ($50), currently totaling $100, regardless of the source of fees payment.

Students are advised to consult the quarterly Schedule of Classes for current deadline dates.

Changes in Course Selection

Add/Drop Cards reflecting changes in class enrollment must be filed with the Office of the Registrar in order for the student to receive credit for added courses and be relieved of responsibility for dropped courses.
Add/Drop Cards must be completed in full and include correct course information and course codes as listed in the current Schedule of Classes. After enrolling in courses, a graduate student may add courses, change sections of a given course, or change grading options up to the end of the second week of instruction without fee by completing an Add/Drop Card available at the Office of the Registrar. Students may also use WebReg. Students in some programs must obtain approval of their graduate advisor or department. See Schedule of Classes, “Changes of Programs.” Any requests to the dean of Graduate Studies for exception to this policy require written explanation and instructor verification of attendance/course work completion to date.

A graduate student may drop a class up to the end of the ninth week of classes by filing an Add/Drop Card with the registrar, after first notifying the instructor, and obtaining the approval of the graduate advisor or department and the dean of Graduate Studies. If the course is dropped before the end of the fourth week of classes, no course entry will appear on the student’s transcript. Courses dropped after the end of the fourth week of instruction and before the end of the ninth week of instruction will remain on the transcript as permanent entries showing course number and title, and the registrar will assign a final grade of W, signifying Withdrawal.

Students may not drop courses after the end of the ninth week of instruction and will receive the earned grade or an Incomplete, if applicable. When a grade in a course has been assigned in accordance with the Academic Senate policy on Integrity of Scholarship, a student may not subsequently change that grade by dropping the course or withdrawing from the university.

**Enrollment Limits**

A full-time graduate student in a regular quarter is expected to enroll in twelve units of upper-division or graduate course work with the exception that in the Graduate School of International Relations and Pacific Studies the normal course load is sixteen units. A student who wishes to take units in excess of these limits must obtain the approval of the graduate advisor or department chair.

Graduate students holding half-time appointments as graduate student researchers, teaching assistants, language assistants, readers, or other employment titles, or who receive support from traineeships, fellowships, or scholarships paid through the university or directly to the student, must enroll and register for twelve units of upper-division and/or graduate course work and research each quarter.

Teaching units (500 series) above the full-time program of twelve units are not considered an overload. Graduate students approved for half-time study are limited to a maximum of six units of upper-division or graduate course work each quarter.

**Changes of Name or Address**

Students must file official change of name or address forms with the Office of the Registrar. Students are advised to also notify their major department, group, or school.

**Leave of Absence/Extension**

A student who discontinues graduate study with the intention of resuming during a later quarter, with department approval, files a formal Leave of Absence, Extension and/or Withdrawal form prior to leaving the campus. Graduate students must have completed at least one quarter of academic residence and be in good standing (GPA 3.0 minimum or equivalent and no more than eight units of U or F) to be granted a leave. All graduate students are limited to a maximum of three quarters of leave and/or withdrawal.

Prior to the end of the second week of instruction of the quarter in which the leave is to begin, a student must complete a Leave of Absence form and obtain required signatures as listed under the clearance section of the form, and the approvals of the graduate advisor, chair of the (major) department, group, or school, and dean of Graduate Studies. Fee refund will be subject to the refund schedule published in the quarterly Schedule of Classes (see section on “Withdrawal”). A graduate student who enrolled in classes before requesting a Leave of Absence must also request a withdrawal from course work for the quarter of leave to avoid paying fees for that quarter. Graduate students may request an extension of an approved leave prior to the expiration of the leave, up to the maximum of three quarters in all degree programs. For an extension of an approved leave, the student must complete a new leave of absence form and obtain the signatures of the graduate advisor, chair of (major) department, housing, and dean of graduate studies.

**Parenting Leave**

A graduate student who is bearing a child, who has primary responsibility for the care of an infant immediately following birth, a child under the age of five, or adoption of a child under age five, and is in good academic standing will be granted, on request, a one-quarter extension of all unexpired doctoral time limits. During the quarter in which childbirth or adoption occurs, the graduate student may choose one of the following registration options:

1. Continue registering as a full-time graduate student and retain eligibility for support.
2. Reduce to part-time status (less than twelve units) and be eligible for up to 25 percent time employment on campus.
3. Take a leave of absence.

After the quarter in which childbirth or adoption occurs, a graduate student who has primary responsibility for caring for a child up to the age of five will be granted, on request, a leave of absence for the purpose of caring for the child for a maximum of two quarters (or three quarters, if a one-quarter extension has not been granted for the quarter in which childbirth or adoption occurred).

The total amount of time for which graduate students may receive extensions of time limits for parenting or childbearing may not exceed three quarters in a graduate student’s career at UCSD. Approved leaves for childbearing and parenting will not count in the three-quarter leave limit available to all graduate students.

A student who has a long-term loan is considered to be out of school while on a leave of absence and must set up an exit interview with the Loan Records Office before leaving the campus. Since rules and regulations pertaining to such loans are complex, it is to the student’s advantage to determine loan requirements prior to seeking a leave of absence.

A student on leave of absence may not (1) be employed by UCSD, UCSD Medical Center or UC Extension, or hold a fellowship, traineeship, or similar appointment administered by the university, (2) use university facilities, (3) complete a qualifying examination for advancement to candidacy, or (4) place demands on faculty, including discussion of thesis or dissertation work, either directly or by correspondence, during the period of leave.

A student may remain in student housing while on an approved leave of absence providing he or she has been a full-time student (twelve units or more) for three consecutive quarters immediately prior to the leave of absence and is eligible for university housing.

Students must return all borrowed library material if requesting a leave of absence or withdrawing. Any student on an approved Leave of Absence must contact their major department to be reinstated and cleared for enrollment and registration.

A new Statement of Legal Residence is required for all graduate students returning from a leave of absence of two quarters or more.

**Withdrawal**

A student withdrawing from the university must obtain a Leave of Absence, Extension and/or Withdrawal form and secure appropriate signatures. The approved form must be filed with the Office of Graduate Studies. Students who withdraw during the first thirty-five days of instruction will receive refunds of fees in proportion to the number of elapsed calendar days since the first day of instruction. The date of withdrawal used in calculating the refund shall be the date on which the approved
notice of withdrawal is submitted to the Office of Graduate Studies.

A registered student who stops attending classes and fails to file a Leave of Absence, Extension, and/or Withdrawal form will receive a grade of F or U in each course, thus jeopardizing eligibility for readmission.

Return of Title IV Federal Student Aid

Financial aid recipients may be required to return some or all of their aid at the time of withdrawal. This requirement applies only to undergraduate students who withdraw prior to completing 60 percent of the quarter. Questions about financial aid repayment should be directed to Student Financial Services Office.

Bar from Registration/Nonacademic

After suitable warning, a student may be barred from further registration for a variety of nonacademic reasons, including failure to comply with official notices, to settle financial obligations when due, to provide final undergraduate transcripts, or other related matters.

Bar from Registration/Academic

Academic disqualification is determined by the dean of Graduate Studies in consultation with the student's department, and normally relates to: unsatisfactory academic performance, e.g., failure to maintain a grade-point average of 3.0 or better; failure to meet departmental criteria of performance; failure to advance to candidacy or complete the degree within established time limits; accumulation of more than eight units of F or U grades; or failure to comply with conditions set at the time of admission to a graduate degree program.

*The master’s degree may be awarded to students pursuing work toward the Ph.D. after fulfillment of the appropriate requirements. See appropriate section of catalog.

**UCSD undergraduates in the junior or senior year may apply to their respective departments for admission to the integrated B.S./M.S. degree program. A similar program is available to UCSD undergraduates in several of the engineering and science specialties. Consult department personnel and/or catalog departmental listing for complete information.

***Pending approval.

Students who have completed some graduate study at UCSD and have been admitted to a doctoral program may apply to several interdisciplinary programs. See appropriate section of catalog.
Academic Services

Academic Advising
The college academic advising offices and the academic departments are the designated campus units responsible for providing official academic advice and direction to undergraduate students. The college academic advising offices and departments have primary responsibility for academic advice and services that assist new and continuing students to develop educational plans and course schedules which are compatible with their interests, academic preparation, and educational and career goals.

College Advising Offices
Revelle College, Admin. Building, Mail Code 0321, (858) 534-3490
John Muir College, 2126 H&S, Mail Code 0106, (858) 534-3580
Thurgood Marshall College, Admin. Building, Mail Code 0509, (858) 534-4110
Earl Warren College, Computer Science and Engineering (EBU 3), Mail Code 0422, (858) 534-4350
Eleanor Roosevelt College, Admin. Building, Mail Code 0546, (858) 534-9864
Sixth College, Pepper Canyon Hall, 2nd Floor, Mail Code 0054, (858) 822-5955

Specifically, the college academic advisors conduct academic orientation/enrollment programs for all new students and advise new and continuing students about college general-education and graduation requirements. The advising staff of each college provides general academic and curricular information, clarifies academic rules and regulations, reviews all aspects of academic probation, monitors academic progress, assists students with decision-making strategies, and provides information about major prerequisites as well as criteria for departments that screen students. In conjunction with the academic departments and the Office of the Registrar, the college advising offices certify graduation and generally facilitate students’ college academic adjustment to the university.

Moreover, college academic advisors are available to counsel students about educational alternatives, selection of courses and majors, program changes, new academic opportunities, and special programs such as exchange programs, honors programs, outreach programs, etc.

See your college academic advisor for assistance with academic concerns or referral to appropriate academic support units.

Academic Computing Services
Help Desk
1313 Applied Physics and Mathematics,
Muir College
(858) 534-4060
Administration and Director's Office
1141–1161 AP&M
(858) 534-3ACS (3227)
http://acs.ucsd.edu/

Academic Computing Services (ACS) plays a variety of computing roles at UCSD. Among these are support of instructional computing, hardware repair, and administration of software site licenses.

Student Computing
The main function of ACS is to provide facilities for instructional computing. In addition to servers, ACS maintains over 1800 workstations of various types available across campus. These include Windows, Macintosh, and UNIX workstations located in public areas, computer labs, and libraries.

A wide variety of software is available on various platforms, including general office productivity and Web site design applications; compilers and program development tools; special purpose packages for electronic design, mechanical engineering, animation, statistics, genetic studies, and mathematics.

Beyond instructional computing, ACS provides facilities to students for popular activities such as e-mail, personal Web sites, student organization Web sites, and other network-based communications. Incoming students receive personal account information after indicating their Intent to Register.

ACS has student assistants who are available at scheduled times in computer labs to help students use the facilities. These assistants complement other forms of support such as guidance from instructors and teaching assistants, and online documentation.

ACS provides both instructional and extracurricular computing services to students through a single “personalized” account. The goal is to make computing more convenient and flexible, and to allow students to pursue academic computing interests on their own initiative.

Computer Repair and Installation
(858) 534-4057
http://cri.ucsd.edu

Computer Repair and Installation’s professional, certified, full-time staff provides the UCSD community with cost-effective, efficient hardware repair and upgrade support for most computer and printer models. Drop-off locations include AP&M 1313 and the UCSD Bookstore. For more information, email cri@ucsd.edu.

Residential Networking
(858) 534-3227
http://resnet.ucsd.edu

Students can obtain residential (dorm) network and computer support. Residential internet service is provided by a cable modem or Ethernet connection. Wireless access is available in most campus buildings and common spaces. A UCSD login is required to attach to the network.

Software Licensing and Distribution
(858) 534-9676
http://software.ucsd.edu

For enrolled students, the campus has discounted pricing agreements with major software vendors; packages are available at the UCSD Bookstore. Other instructional software available for student use is listed on the Software Distribution Web site. For more information, email software@ucsd.edu.

Instructional Web Development Center
(858) 822-3315
http://iwdc.ucsd.edu http://courses.ucsd.edu

ACS’ Instructional Web Development Center manages most course Web sites, including WebCT. The IWDC provides instructional Web site creation, development assistance, and training for faculty. The IWDC offers more extensive services non a recharge basis, including departmental and UCSD-affiliated group Web hosting and fee-for-service Web-related programming. For more information, e-mail iwdc@ucsd.edu.

Academic Enrichment Programs/Student Educational Advancement/
Student Affairs
Student Center Building B, 2nd Floor
Mail Code 0311
Dedicated to providing UCSD undergraduates with research and other academic enrichment experiences beyond the classroom.

Program Descriptions

Faculty Mentor Program
The Faculty Mentor Program offers valuable research experience to juniors and seniors who want to prepare for graduate or professional school. Participants work as research assistants to UCSD faculty members for at least ten hours per week for two quarters. Students receive four units of 199 independent study credit each quarter, attend seminars on various topics, including how to write and present a research paper, and receive graduate school and fellowship information. At the conclusion of the program, students present their research papers at the annual Faculty Mentor Program Research Symposium. Contact: Veronica Henson-Phillips, vhensonphillips@ucsd.edu, (858) 534-5791.

Health and Medical Professions Preparation Program
HMP3 assists students in their undergraduate preparation for careers in the health professions. These include medicine, dentistry, pharmacy, veterinary, public health, nursing, and others. The program provides students with activities and resources including professional seminars, review course scholarships, volunteer placement information, and mentorship opportunities. Participants have access to a Web site with information on summer and postbaccalaureate programs, upcoming conferences, health professional schools, etc. The program also serves as a clearinghouse for information about other campus resources available to the prehealth professional student. Contact: Adele Wilson, awilson@ucsd.edu, (858) 534-7579.

Summer Research Program
The Summer Research Program offers a paid, full-time research experience to students who are interested in preparing for careers in research nor university teaching. As research assistants, students work on their faculty mentor’s projects for at least thirty hours per week. Students are trained in research skills, how to write and present a research proposal or paper, and how to prepare for the Graduate Record Examination (GRE). At the conclusion of the program, students present their papers at the annual UCSD Summer Research Conference. Contact: Veronica Henson-Phillips, vhensonphillips@ucsd.edu, (858) 534-5791.

McNair Program
The McNair Program is a U.S. Department of Education initiative designed to serve low-income, first-generation college students and underrepresented minorities who are interested in pursuing a Ph.D. It is a rigorous one-year program of scholarly activities that includes participation in the Faculty Mentor Program and the Summer Research Program. In addition, participants receive training in how to write and present a scholarly paper, preparation for the GRE, and assistance with the graduate school application process. All participants have the opportunity to present a paper at a minimum of two research conferences. Contact: Dr. Tom Brown, tbrown@ucsd.edu, (858) 534-2937.

CAMP Science Program
The CAMP Science Program is funded by the California Louis Stokes Alliance for Minority Participation in Science, Engineering, and Mathematics (CAMP) grant from the National Science Foundation. This program is designed to provide support and advancement opportunities to ethnically underrepresented students who are seeking bachelor’s degrees in the sciences, mathematics, engineering, and technology. Participants in this program may attend informational and skill-building workshops, tour UCSD laboratories, local companies and research institutes, attend local and/or national conferences, participate in a book exchange program, receive a one-year student membership to a professional/scientific society, attend study break dinners and coffee with faculty and graduate student events, and are eligible to earn book scholarships. In addition, students are encouraged to participate in academic year and/or summer research, and pursue graduate school. Contact: Dr. J. Azize-Brewer, jazize-brewer@ucsd.edu, (858) 534-8839.

University of California Leadership Excellence through Advanced Degrees (UC LEADS)
The University of California Leadership Excellence through Advanced Degrees (UC LEADS) is a selective two-year research program for undergraduates majoring in science, engineering, or mathematics. Students receive stipend support for two summers of research and support for travel to conferences, membership in professional associations, and other research-related activities. UC LEADS participants work on well-defined projects under the supervision of faculty mentors. The UC LEADS experience will prepare students to be competitive applicants for admission to doctoral programs, preferably within the UC system, and eventually to assume leadership positions in society.

Undergraduate Research Conference
The UCSD Undergraduate Research Conference is an annual event where more than 100 students who have written outstanding research papers are invited to present their research. Invitation is by faculty nomination. Students present their papers at small roundtable discussions led by a faculty presider. Contact: Veronica Henson-Phillips; vhensonphillips@ucsd.edu, (858) 534-5791.

AMGEN
The UCSD Amgen Scholars Program is an eight-week, full-time research experience for undergraduates, supported by the Amgen Foundation. The objectives of the program are: to provide students with the skills to become research scholars; to stimulate students' serious consideration of graduate study; and to increase learning and networking opportunities for students committed to pursuing either a professional or academic research career in biological sciences or bioengineering. The program will take place from Monday, June 23, to Friday, August 15, 2008. Contact Cezarina Gramada, mgramada@ucsd.edu, (858) 534-9014. Additional information is available from http://amgen.org/.

Scholarships in Science, Technology, Engineering, and Mathematics (S-STEM)
The Scholarship for Science, Technology, Engineering, and Mathematics (S-STEM) program is funded through a National Science Foundation grant. At UCSD, the Divisions of Physical and Biological Sciences are offering scholarships of up to $3,000 per year (renewable up to four years) for students majoring in quantitative and interdisciplinary sciences. The primary objective of the program is to provide educational opportunities to low-income, academically talented students through scholarships that promote full-time enrollment and degree achievement in higher education. Eligible applicants will be UCSD undergraduates who are U.S. citizens, nationals, refugee aliens, or permanent resident aliens with demonstrated financial need who are enrolled full time in one of the following majors: biochemistry, bioinformatics, biophysics, computational physics, molecular biology, pharmacological chemistry, or mathematics. Special consideration will be given to Native Americans (American Indians and Alaskan Natives), African Americans, Native Pacific Islanders (Polynesians and Micronesians), and applicants with disabilities. Contact Cezarina Gramada, mgramada@ucsd.edu, (858) 534-9014. Additional information is available from http://amgen.org/.

Education Abroad Program (EAP)
International Center (corner of Gilman Drive and Library Walk)
Mail Code 0018
(858) 534-1123
http://pao.ucsd.edu
E-mail: abroad@ucsd.edu
TThe Education Abroad Program (housed in the Programs Abroad Office, along with the Opportunities Abroad Program and UC San Diego Global Seminars) provides students enrolled at
the University of California an opportunity for an intercultural experience at UC centers located in Australia/New Zealand, Africa, Asia, Europe, Latin America, and North America, while allowing normal progress toward a degree.

The program is described in detail in the “Courses, Curricula, and Programs of Instruction” section of this catalog under the “Education Abroad” heading.

International Scholar Office

(Corner of Gilman and Library Walk)
Mail Code 0018
(858) 534-3730
Fax: (858) 534-0909
http://isso.ucsd.edu

The International Scholar Office serves over 2,100 scholars annually. Most international scholars are leaders in their fields of study who come to UC San Diego in support of the university’s research and teaching mission. The director, three international scholar advisors, an immigration attorney, support staff, and outreach and volunteer coordinator make up the International Scholar Office. It provides assistance to academic departments and organized research units in their efforts to recruit, employ, and serve international faculty, researchers, and postdoctoral fellows. The International Scholar Office also provides information and advising to support departments with their plans to hire and retain international employees and scholars, preparation of petitions to U.S. Citizenship and Immigration Services, and employment authorization, in addition to those services offered directly to scholars and their dependents.

The International Scholar Office also provides services such as Form I-20/DS-2019 issuance, check-in, new student orientation, SEVIS registration, one-on-one advising, group advising, workshops, support services for complying with various I-94 statuses, support in applying for a visa, employment authorization, international travel, financial planning, health insurance, planning future activities in the United States, and advising regarding immigration, practical, or personal issues. In addition, the International Scholar Office provides advising and application support for Social Security numbers, California state drivers’ licenses, nonresident alien tax returns, as well as various immigration services and benefits.

International Student Office

(Corner of Gilman and Library Walk)
Mail Code 0018
(858) 534-3730
Fax: (858) 534-0909
http://isso.ucsd.edu

The International Student Office offers a wide array of services and programs for international students and their dependents at UC San Diego in an effort to support their legal stay in the U.S. and help them achieve their personal, academic, and professional goals. In addition, the office provides a variety of high-quality enrichment programs and cross-cultural activities designed to expand international student integration at UC San Diego and in the local community and provide opportunities for domestic students so they can obtain international experiences at home.

During the year, the International Student Office serves over 2,200 students. Most international students come to UC San Diego to enroll in degree programs. Some come as visiting students participating in the University of California Education Abroad Program, Fulbright, and other programs, and still others come to take classes, do research, and be mentored by UC San Diego faculty—experiences to take back and apply to degree programs in their home countries. The director, two international student advisors, a SEVIS Coordinator, support staff, and an outreach and volunteer coordinator make up the International Student Office. In addition, the International Student Office serves more than 100 UC San Diego academic departments and units (such as Admissions and Relations with Schools, Office of Graduate Studies, and Registrar’s Office) in their efforts to admit, enroll, and employ international students.

The International Student Office also provides services such as Form I-20/DS-2019 issuance, check-in, new student orientation, SEVIS registration, one-on-one advising, group advising, workshops, support services for complying with various I-94 statuses, support in applying for a visa, employment authorization, international travel, financial planning, health insurance, planning future activities in the United States, and advising regarding immigration, practical, or personal issues. Furthermore, the International Student Office provides advising and application support for Social Security numbers, California state drivers’ licenses, nonresident alien tax returns, as well as various immigration services and benefits.

OASIS (Office of Academic Support and Instructional Services)

Third Floor, Center Hall
Mail Code 0045
(858) 534-3760
The Office of Academic Support and Instructional Services (OASIS) provides a variety of services to maximize student performance and retention at the University of California, San Diego.

MISSION

The mission of OASIS is to assist UC San Diego students in reaching their full potential by developing an appreciation for learning. OASIS strives to facilitate learning by concentrating on learners and supporting their academic, intellectual, and personal growth at UCSD. Services are designed to assist students to develop the academic skills to excel in their subject matter at UCSD and eventually in graduate or professional school.

SERVICES

A description of services offered each quarter is available at the OASIS office on the third floor of Center Hall. All students in any of the six colleges are eligible for OASIS services. Under-represented students are strongly encouraged to use OASIS services in order to maximize their valuable contribution to UCSD.

The Academic Transition Program

The Academic Transition Program coordinates a residential Summer Bridge Program and professional and academic transition counseling for freshmen at UCSD. A variety of academic support and personal development activities are offered to facilitate a smooth transition from high school to UCSD’s fast-paced quarter system.

The Math and Science Tutorial Program

The Math and Science Tutorial Program is designed to support students in their desire to excel in mathematics and science courses. The program offers workshops for mathematics, physics, biology, and chemistry courses.

The Language and Writing Program

Students whose first language is not English are assisted in the Language and Writing Program. In addition, students doing academic work in Spanish or French language courses can participate in Language Program tutorial sessions conducted by bilingual staff. Language Program services include group or individual intensive reading and writing sessions, workshops on grammar and mechanics, and individual conferences where feedback on drafts of writing is provided.

The Student Support Services Program

The Student Support Services Program is a comprehensive U.S. Department of Education initiative designed to support the academic efforts of participating students. The program seeks to maximize the achievement and development of eligible students, particularly those who have been traditionally underrepresented due to race or ethnicity, gender, disability, and/or economic status. Student Support Services also strives to enhance each program participant’s eligibility for entrance to graduate and professional schools and to foster an institutional climate which will support the success of program participants. The program consists of intensive individual tutoring, professional counseling, peer mentoring, and various cultural enrichment activities.
The Research and Evaluation Program
Administrated jointly by the Office of the Assistant Vice Chancellor for Student Educational Advancement and OASIS, the Research and Evaluation Program maintains data about students using OASIS services and conducts research projects which examine a particular problem or issue related to OASIS services. In addition, longitudinal studies of the effect of services on student users are undertaken, such as follow-up studies on the retention of Summer Bridge students. Evaluation activities that are essential to the provision of effective services to students are also the responsibility of this program.

Education Studies 116
OASIS offers a four-unit, upper-division course that provides instruction to all OASIS student staff members on the teaching-learning process. The course is designed to balance lectures and readings with supervised, practical experience.

Opportunities Abroad Program (OAP)
International Center (corner of Gilman Drive and Library Walk) Mail Code 0018 (858) 534-1123 http://pao.ucsd.edu E-mail: abroad@ucsd.edu

The Opportunities Abroad Program (housed in the Programs Abroad Office, along with the Education Abroad Program and UC San Diego Global Seminars) facilitates participation in programs abroad sponsored by institutions other than the University of California. OAP offers a resource library and advisory services enabling UCSD students to choose study, work, internship, and educational travel abroad programs best suited to their individual needs. Programs are available for students in all majors, for periods ranging from a quarter to a full academic year. Students participating in approved academic programs abroad transfer credit back to UCSD. They receive assistance with this as well as application, financial aid, pre-departure, and reentry issues through the OAP. Special study abroad scholarships are also available. Students participating in nonacademic programs generally do not earn credit but in some instances may arrange to do so, for example, through the Academic Internship Program.

San Diego Supercomputer Center (SDSC)
Mail Code 0505 (858) 534-5000 (general inquiries) (858) 534-5100 http://www.sdsc.edu

Over the past two decades, the San Diego Supercomputer Center (SDSC) has enabled science and engineering discoveries through advances in computational science and high-performance computing. Data is an overriding theme in SDSC activities. By developing and providing data cyberinfrastructure, the center acts as a strategic resource to science, industry, and academia, offering leadership in the areas of data management, grid computing, bioinformatics, geoinformatics, and high-end computing.

The mission of SDSC is to extend the reach of the scientific community by providing data-oriented technology resources above and beyond the limits of what is available in the local laboratory, department, and university environment. SDSC is an organized research unit of UC San Diego. Staff includes scientists, technologists, software developers, and support personnel.

Over the years, SDSC has served more than 10,000 researchers at 300 academic, government, and industrial institutions in the United States and around the world. Today, these scientists and engineers increasingly rely on the availability of integrated data cyberinfrastructure tools such as hardware, software, and human support to drive research and education. Cyberinfrastructure provides a broad and useful spectrum of integrated technologies to support increasingly complex, data-intensive, and collaborative scientific endeavors.

When an application or research project's technological needs outgrow the capabilities of its home environment, cyberinfrastructure extends the reach of the scientist by providing needed storage, high-speed networking, and preserving high-performance computing, and other resources remotely. SDSC provides both the tools and the facilities that integrate a user's home environment with a high-end, resource-rich remote environment. Users can take advantage of SDSC's visualization, interdisciplinary expertise, and other resources to extend their home environments and accomplish their goals.

To meet the modern scientist's and engineer's extreme data needs, the center provides an integrated set of software and user services including:

- An internationally renowned environment for data management, mining, curation, analysis, visualization, access and preservation, as well as leadership-class storage technologies
- A broad spectrum of software tools, portals, workbenches, and packages integrated to enable users to develop and deploy complex applications
- Professional user services that enable users to make the most out of cutting-edge hardware, software, and information resources
- A range of collaboration vehicles for working with partners on strategic and community applications, data collections, and projects
- An advanced cyberinfrastructure laboratory that provides an environment for designing, developing, and testing software and hardware systems at scale

- Data Central, a computational and storage infrastructure for community data collections. The Data Central team helps researchers from a wide variety of scientific domains to manage, mine, analyze, publish, and share datasets

Along with these tools, SDSC also offers users full-time support including 24-hour helpdesk services, code optimization, training, portal development, and a variety of other services.

SDSC was founded in 1985 with a $170 million grant from the National Science Foundation's Supercomputer Centers program. From 1997 to 2004, SDSC extended its leadership in computational science and engineering to form the National Partnership for Advanced Computational Infrastructure (NPACI), teaming with approximately forty university partners around the country.

The demanding research problems that are being tackled by the scientists using SDSC's cyberinfrastructure tools are numerous and diverse. A few key programs focus on understanding the origin of the universe, visualizing earthquakes, providing data management for disaster recovery organizations, modeling proteins, simulating the human nervous system, and predicting climate changes.

Cyberinfrastructure Resources
SDSC is launching a wide-ranging project called the Triton Resource, a high-impact massive data analysis and preservation system that will accelerate innovation and discovery through the use of leading-edge research cyberinfrastructure at SDSC. The Triton Resource will provide supercomputing capabilities in three key areas: a large-scale disk storage facility, a data analysis facility for petascale research, and a shared research cluster. These will be connected via a high-speed 10-gigabit network already in place at the UC San Diego campus. The three prongs of Triton consist of:

- Data Oasis, a high-performance storage system, which will assist in the practical manipulation of data across high-bandwidth paths to researchers throughout UC San Diego and the UC system. This system will store, manage, and preserve the deluge of data from research instruments and experiments that forms the basis for future generations of research.
- Petascale Data Analysis Facility, capable of analyzing data from petascale computers, in which one petalop of compute power equals one quadrillion calculations per second. That is the equivalent of having about 100,000 laptops to create simulations at a level of detail or scope previously not possible for scientists.
- Condo Cluster, a scalable, shared resource or group of linked computers equipped with standard compute nodes but enhanced memory capability. The cluster may be configured to
operate in a standard batch mode or be set up to allow users to run customized software stacks at scale, with full connectivity to large-scale storage.

SDSC’s new “green” data center, launched during a new building addition dedication in October 2008, is equipped to house colocation servers for UC San Diego and UC researchers and academic units. The 5,000 square-foot data center, which augments the center’s previous 13,000 square-foot data center, contains the latest energy-efficient technologies and is managed by a staff of professionals on a 24-7 basis. Other key features of the new building addition include a state-of-the-art visualization center, high-tech conference room, and an OptiPortal, used by SDSC’s chief scientific officer Michael Norman to visualize results from cosmology simulations on the cutting-edge petascale machines.

The center also is a founding member of and serves as a data-intensive site lead in the National Science Foundation-funded TeraGrid, a multiyear effort to build and deploy the first national-scale grid infrastructure for open scientific research. The center’s supercomputing resources, which include a 4.1 teraflop Linux cluster, are part of the national TeraGrid distributed system.

At SDSC, data storage, management, and analysis are paramount. The center houses more than 3 petabytes of online disk storage as well as 36 petabytes of archival tape storage capacity, the largest data storage installation of any educational institution in the world. SDSC also is partnering with UCSD Libraries, the National Center for Atmospheric Research, and the University of Maryland in a data-preservation project called Chronopolis, a geographically distributed data grid that supports the long-term management, stewardship, and access to digital collections. The system incorporates trust and reliability through replication, service-level agreements, monitoring, and rule-based systems.

Research Allocations, Resources, and Support
SDSC provides access to its vast array of data and computational resources and services for all UC researchers with a need for leading-edge research cyberinfrastructure. SDSC offers the foundation for custom cyberinfrastructure capabilities defined by UC-led activities. Any qualified UC researcher can request access to these resources. Some services are available free of charge and others via campus recharge.

All researchers with access to SDSC’s resources are supported by SDSC’s consulting staff, available online (http://www.sdsc.edu/us/consulting), by phone, or by e-mail: 9:00 a.m. to 5:00 p.m., Monday through Friday. Researchers and students with accounts are welcome to attend SDSC’s periodic training workshops (http://www.sdsc.edu/us/training).

For more information and to apply, visit the SDSC Web site at www.sdsc.edu or contact opportunities@sdsc.edu.

Additional Opportunities for the Campus Community
SDSC offers the following additional opportunities for UCSD faculty, staff, and students:

- Access to high-performance computers through UCSD classes—Many UCSD classes make use of the SDSC resources, providing a hands-on way to learn about high-performance computing. Check class listings for biology, chemistry and biochemistry, computer science and engineering, mechanical and aerospace engineering, Scripps Institution of Oceanography, and UC San Diego Extension.
- Seminars—SDSC hosts a wide variety of seminars on topics of interest to the high-performance computing and computational science community. Most are open to the UCSD community (http://www.sdsc.edu/CSSS).
- Publications—SDSC, with Calit2 and the Jacobs School of Engineering, is launching Cyberlink, a free e-newsletter focused on the latest cyberinfrastructure news and events at UC San Diego. For subscriptions, please visit http://www.sdsc.edu/news/subscribe.html.
- Part-time and full-time employment—SDSC posts part-time and full-time professional job openings at the UCSD Career Services Center or see http://www.sdsc.edu/about/Careers.html. Typical jobs are in research programming support, scientific writing, computer operations, and reception work.
- Tours—SDSC offers tours upon request. Special-interest tours for education and industry groups and others can be arranged by contacting tours@sdsc.edu.

Additional information about SDSC can be obtained from the SDSC Web site (http://www.sdsc.edu) or by calling SDSC at (858) 534-5000.

UC San Diego Extension—Extended Studies and Public Programs
http://extension.ucsd.edu
UCSD Campus
9600 North Torrey Pines Road
Mail Code 1076H
(858) 534-3400
E-mail: unex-reg@ucsd.edu
Fax: (858) 534-8527
UC San Diego Extension is contributing to the health and vitality of the San Diego region through professional education and training and high-profile programs focused on cultural enrichment and regional economic development.

This integrated approach to improving the quality of life in San Diego and beyond helps build a globally competitive talent pool, accelerates economic growth, and fosters community-building conversations.

For students interested in lifelong learning, Extension offers more than fourteen areas of study in fields ranging from the life sciences and engineering to arts and business leadership. Course work may be pursued across San Diego, online, at work, and overseas. A variety of delivery formats are available including individual courses, certificates, and lecture series.

Extension’s outreach programs are designed to improve the region’s economy through entrepreneurial development, research, public forums, and civic conversations. Programs include Global CONNECT, San Diego Dialogue, and UCSD-TV.

To learn more, visit our Web site at http://extension.ucsd.edu—where there’s always something new®.

Continuing Education: Areas of Study
Art, Music, and Photography
Courses and workshops offered in art history, drawing, mixed media, painting, film, digital photography, harmonics, guitar, piano, and the annual UCSD Jazz Camp. For more information, call (858) 964-1051.

Biological, Pharmaceutical, and Marine Sciences
Courses and intensive programs offered in computer-aided drug design, medicinal chemistry, computational biology and bioinformatics, drug discovery and development, regulatory affairs, quality assurance and control, biotechnology manufacturing, proteomics, microarrays, and biomedical product development. For more information, call (858) 882-8027.

Business
Courses offered in accounting, business management, communication, enterprise management, facilities management, finance, fraud examination, fundraising and development, human resources management, international business, marketing, meeting management, project management, purchasing and supply management, real estate, and urban planning. For more information, call (858) 882-8000.

Digital Media and Web Design
Courses offered in computer-aided design, graphic design, and multimedia and Web site design and development. An eighteen-month daytime or twenty-four-month evening program is also available for digital design, Web development, multimedia, marketing practices, and portfolio creation. Internships available. For more information, call (858) 622-5739.
Education
State-approved credential programs offered in Adult Education/Vocational Education, as well as state-approved certificate programs in Cross-Cultural Language and Academic Development (CLAD), Reading and Education of the Gifted and Talented (GATE). Certificate programs and supplementary authorizations courses are offered for Teaching Mathematics and Science. Additional certificates are Teaching English to Speakers of Other Languages (TESOL), Community College Instructor, and Educational Therapy. For more information, call (858) 964-1045.

Engineering
Courses offered in communications engineering, wireless communications, RF engineering, network technologies, embedded computer engineering, systems engineering, semi-conductor design, VLSI digital design, CDMA engineering, and SensorNets. Also, certificate programs in New Product Development, Lean Enterprise, Six Sigma, Green/Black Belt, and Professional Engineering Reviews. For more information, call (858) 622-5740.

English Language Studies
Courses and workshops offered in academic writing, intermediate business writing for non-native speakers, conversation improvement, grammar/vocabulary building, pronunciation and fluency, and accent reduction. For more information, call (858) 534-0049.

Foreign Languages and Travel Study
Courses offered in Arabic, Chinese (Mandarin), French, German, Italian, Japanese, Korean, Persian, Portuguese, Russian, Spanish, and translation and interpretation. Short-term Spanish language immersion programs abroad are available for adults. For more information, call (858) 964-1050.

Health Care and Behavioral Sciences
Courses offered in clinical trials, health care leadership and management, evidence based medicine, medical coding, emergency department nursing, case management, nurse re-entry program, legal nurse consulting, fitness instruction, and lactation education. In behavioral sciences courses offered in alcohol and drug abuse counseling, art therapy, gerontology, and play therapy. For more information, call (858) 964-1010.

Humanities and Writing
Courses offered in copyediting, creative writing, feature writing, history, politics and culture, literature, technical communication, and theatre. Special programs such as Revelle Forum at the Neurosciences Institute and UCSD Jazz Camp round out a diverse and unique set of offerings in the San Diego area. For more information, call (858) 964-1051.

Law
Courses offered in bankruptcy law, business law, domestic relations law, civil litigation, evidence law, California litigation procedures, and law office procedures. Also offered are an ABA-approved paralegal program and a Professional Certificate in Intellectual Property. For more information, call (858) 882-9008.

Leadership and Management Development
For experienced managers taking on new levels of responsibility, programs include the Leadership and Management Program for Technology Professionals (LAMP), Healthcare Executive Leadership Program (HELP), and the Executive Program for Scientists and Engineers (EPSE). Entrepreneurs and others will find of interest courses in biotech business development, writing business plans, financing start-ups, IT governance, business process optimization and ERP essentials, six sigma, lean enterprise, and global supply chain management programs. For more information, call (858) 964-1336.

Occupational Health and Safety
Courses offered through the OSHA Training Institute in occupational health and safety for general industry and construction: hazardous materials, respiratory protection, fall arrest systems, industrial hygiene, ergonomics, and more. A professional certificate in Occupational Health and Safety is also available. For more information, call (858) 964-1054.

Technology
Courses offered in data management and analysis, software engineering, data warehousing, biological database design, data modeling, data mining, security engineering, Web analytics, Web services, Oracle, Microsoft Access, networking, BioJava, Perl for bioinformatics, C/C++, C#, J2EE, Java, Visual Basic, UNIX/Linux, and .NET. For more information, call (858) 622-5755.

How to Enroll
Online: http://extension.ucsd.edu/registration
By phone: (858) 534-3400

In person:
La Jolla
9600 N. Torrey Pines Road, Bldg. C
La Jolla, CA 92039
Mission Valley
404 Camino Del Rio South
Suite 102
San Diego, CA 92108
Rancho Bernardo
11770 Bernardo Plaza Court
Suite 270
San Diego, CA 92128
Sorrento Mesa
AT&T Wireless Building
6925 Lusk Blvd.

San Diego, CA 92121

Concurrent registration: Permits individuals who are not officially matriculated UCSD students to enroll for credit in regular UCSD courses. Offered on a space-available basis with the approval of the course instructors. For more information, call (858) 534-3400.

Complimentary enrollment: UC San Diego Extension offers a limited number of complimentary enrollments to full-time UCSD students who may enroll in one course free of charge up to a set dollar limit (students must pay anything over that amount) on a first-come, first-served basis. For more information, call (858) 534-3400.

Community and Regional Economic Development

Academic Connections
http://academicconnections.ucsd.edu
Academic Connections is a summer residential program that provides high school students with access to the resources of a research university. This program gives motivated students the opportunity to explore different fields of study, pursue their interests, and better prepare for a university experience.

Global CONNECT
http://globalconnect.ucsd.edu
Global CONNECT links and engages networks of individuals and organizations committed to building international technology-based enterprises. Global CONNECT’s focus is on the role of research institutions, regional incubators, and initiatives that support innovation and entrepreneurship. Global CONNECT is active in three areas: research and analysis on the dynamics of regional innovation, the provision of technical assistance to regions interested in developing technology commercialization programs, and education and training in areas essential to science-based business clusters. Global CONNECT manages a membership network of more than forty regions from around the globe. The membership shares best practices through international meetings, business-to-business activities, and a Web site.

Helen Edison Lecture Series
http://helenedison.ucsd.edu
The Helen Edison Lecture Series presents free public lectures on issues advancing humanitarian purposes and objectives. Past speakers have included Al Gore, Muhammad Yunus, John Kenneth Galbraith, Noam Chomsky, Luis Valdez, Toni Morrison, Carlos Fuentes, and Robert McNamara.

LAUNCH
http://extension.ucsd.edu/launch
Undergraduates can jumpstart their transition into the workplace with LAUNCH—a new educational offering designed by UC San Diego Extension. Ambitious students earn a certificate in their field of choice while working with an expert career coach to help land a first job upon graduation. Free information sessions offered year round.

San Diego Dialogue
http://www.sandiegodialogue.org
The San Diego Dialogue is a center of research on cross-border economic and social issues, as well as a convener of community forums on issues shaping the San Diego-Baja California region. The Dialogue also addresses issues related to infrastructure and public policy and provides the kind of technical assistance, education, and training that helps improve our regional futures.

A primary focus of the San Diego Dialogue is the Cross-Border Innovation and Competitiveness Initiative. Its focus is to help the region become more globally competitive in key science and technology sectors by leveraging cross-border assets and capabilities. Areas of focus include: the biomedical industry, software, semi-conductor manufacturing, marine biotechnology, and automobile and aerospace manufacturing.

UC Professional Development Institute
http://ucpdi.ucsd.edu
The UC Professional Development Institute (UCPDI) is a leader in delivering standards-based professional development institutes and training materials focused on the needs of K–12 English learners. UCPD’s primary goal is to improve and accelerate student achievement. UCPDI is one of only two providers approved by the state of California to offer standards-based intervention programs for English learners.

UCSD Economics Roundtable
http://econ.ucsd.edu/roundtable
The UCSD Economics Roundtable is a forum for more than 2,000 San Diego business and community leaders to exchange ideas and information with world class economists and financial experts. The UCSD Economics Roundtable has hosted several prominent guests including Ben Bernanke, Board of Governors of the Federal Reserve System, and Robert Shiller, professor of economics at Yale University.

Osher Lifelong Learning Institute
http://olli.ucsd.edu
The Osher Lifelong Learning Institute (OLLI) rekindles the zest for life for retired San Diego residents. OLLI is a membership organization that inspires conversations between interesting people about stimulating topics, offering twenty different programs each quarter. Subjects include archaeology, science, tai chi, computing, live musical performances, literature, foreign languages, and master courses and lectures from UCSD faculty members.

UCSD-TV
http://www.ucsd.tv
UCSD-TV, the only broadcast television station operated by the University of California, is an Emmy® winning, noncommercial station that extends the resources of the university to the greater San Diego community and partners extensively with regional civic, cultural, and arts institutions in programming. UCSD-TV broadcasts on UHF Channel 35, Cox Communications, and Time Warner Cable. Programs from UCSD-TV and other University of California campuses are broadcast nationwide on UCTV and on demand.

UC San Diego Global Seminars (GS)
International Center (corner of Gilman Drive and Library Walk)
Mail Code 0018
(858) 534-1123
http://pao.ucsd.edu/pao/GSHome.htm
E-mail: globalseminar@ucsd.edu

UC San Diego Global Seminars are five-week-long study abroad experiences led by a UC San Diego professor. They are offered during summer session. Most seminars take place during summer session I, but some may be offered during summer session II. Students enroll in two courses for a total of eight UC San Diego units. Class sizes are between fifteen and thirty students, giving students excellent opportunities for interaction with some of the best professors at UC San Diego. All courses are taught in English, but several programs include elementary language instruction to help students navigate the local community. The Programs Abroad Office will assist students with advising, application, financial aid, pre-departure orientation, and reentry issues. Special study abroad scholarships are available. For more information, consult the UC San Diego Global Seminars section of the Programs Abroad Web site at: http://pao.ucsd.edu/pao/GSHome/htm.

The UCSD Libraries
http://libraries.ucsd.edu
The UCSD Libraries, a campuswide network of libraries, support the university’s mission of research, instruction, public service, and patient care by providing access to rich and deep collections, and by offering a variety of services. The libraries are those found within the Geisel Library building: the Arts Library, the Mandeville Special Collections Library, the Science & Engineering Library, and the Social Sciences & Humanities Library. And those elsewhere: the Biomedical Library, the Center for Library & Instructional Computing Services (CLICS), the International Relations & Pacific Studies Library, the Medical Center Library, and the Scripps Institution of Oceanography Library. The Libraries serve as physical and virtual centers for study, reading, and scholarship at UCSD.

Their collections and services support undergraduate and graduate instructional programs, as well as advanced research. While each library may have varying rules and varying hours, all are open to all members of the UCSD community. Most libraries extend hours during final exam periods.

The Libraries’ Web site offers access to information about the Libraries and to digital services and collections, including the online catalog, electronic journals, e-books, databases, and materials assigned for courses. New resources and services are added continually. The Libraries have an ongoing commitment to acquiring and offering materials in digital form. For materials not found at UCSD, the Libraries offer several quick and easy ways to borrow materials from other UC campuses and other universities.

Research assistance is available online and at each of the campus libraries and is designed to assist students and faculty with their course needs and research activities. Through their instruction and outreach programs, the Libraries offer a variety of orientation and instructional opportunities intended to help students succeed in their academic and personal pursuits.

Volumes ........................................ 3,372,785
Periodical and other serial publications received
Total ........................................ 14,457
Digitized collections .................................. 130
E-books ........................................... 231,216
Maps .............................................. 114,780
Microforms .......................................... 3,309,102
Audio and video materials .......................... 144,225
Slides and other pictorial items ................. 318,820

Arts Libraries
West Wing, Geisel Library
(858) 534-4811
http://artslib.ucsd.edu/

The Arts Library provides collections, services, and facilities in support of the study and teaching of the arts, including film, music, visual arts, photography, and architecture. Arts Library holdings are rich in traditional print materials—such as books, periodicals, and musical scores—a full range of reference tools, and electronic resources. Various media collections, including sound (LP, CD, tape), digital images, moving-image materials (video, DVD, 16 mm film), and licensed resources, such as ARTstor (digital images) and digital audio databases, have been acquired. Our collections total more than a half-million items. The Arts Library offers traditional services, such as research assistance and on-site listening and viewing facilities, and unique services, such as digital reserves, which provide students with 24-7 access to Web-based sound and selected moving-image content in support of their course work.
The Mandeville Special Collections Library

The Mandeville Special Collections Library houses rare books, manuscripts, archives, original art, and other primary materials (250,000 books, 32 million manuscripts), which support specialized UCSD research and instructional programs. Areas of strength include experimental American poetry, the Spanish Civil War, Baja California, early voyages of exploration to the Pacific, modern science, Melanesian anthropology, California history, Dr. Seuss, and the history of UCSD. Students are encouraged to use the collections for their academic endeavors.

Science & Engineering Library (S&E)

S&E Library print and online resources support research and teaching astronomy, biochemistry and chemistry, bioengineering, computer science, engineering, mathematics, nanoengineering, and physics. Computers, wireless Internet access, group study rooms, a presentation practice room, and a scanner are available. S&E librarians have expertise in finding numeric property data, standards, patents, and other science and technology information.

Scripps Institution of Oceanography Library

Scripps Institution of Oceanography Library is one of the largest marine science libraries in the world. It has outstanding collections in marine biology, oceanography, climatology, and marine technology, and also specializes in geology, geophysics, and zoology.

Social Sciences & Humanities Library

The Social Sciences & Humanities Library (SSHL) provides services and collections to support the teaching and research of students and faculty in the social sciences and humanities disciplines. Services and collections are designed for all levels, from first-year students to seasoned scholars. The library provides a complete range of public services, including reference and research support, and print and electronic reserves for courses in the social sciences and humanities. The library has study spaces for students on quiet floors, in group study rooms, and open seating areas for discussion and collaboration. There is a Data & GIS Lab and computers for research and general use. Collections comprise 1.5 million printed volumes; San Diego, California, and U.S. government information; maps; geographic and numeric data; social science databases; and full-text electronic resources.

Career Services Center

The Career Services Center (CSC) helps students and alumni with career-related concerns and offers a wide range of programs and services throughout the year. Online registration at http://career.ucsd.edu through Port Triton is required to use the center.

Exploring Career Options: Career advisors meet one-on-one with students to guide them through the phases of career development. Self-assessment tools, panel presentations, occupational resources, and networking programs are available to help students explore career options and determine career goals. CSC’s career library features career books, CDs, and videos, as well as computers for accessing career information on the Internet.

Internship Resources: All students are encouraged to gain practical work experience through internships. CSC is a one-stop shop for internship resources, information, and opportunities. Services include advising, workshops, internship listings, and the Internship SuperSite at http://career.ucsd.edu. The internship library includes internship directories, career-specific internship books, and computer stations to help students find local, regional, and national internships, including the UCDC Program in Washington, D.C.

Graduate and Professional School Preparation and Admission: All students considering an advanced degree in any field after graduation from UCSD should visit CSC for advice and information on schools, admission requirements, applications,
Recommendation letters, tests, essays, fellowships, and interviews. Advisors assist students interested in any field of professional and graduate education, including medicine, law, business, teaching, and other health fields. Resources include over 2,000 professional and graduate school catalogs, directories, and brochures. Recruiters from across the country attend CSC’s Professional and Graduate School Info Fair and Law School Info Fair each fall.

Job/Internship Listings: CSC lists thousands of internships and part-time and full-time job listings year-round on Port Triton, including on-campus and off-campus work-study and non-work-study jobs. To access the listings, you must: 1) be currently enrolled at UCSD; or newly enrolled and have returned the UCSD Statement of Intent to Register; and 2) complete the online registration at http://career.ucsd.edu. Students are required to update their registration each academic year.

Job Search Preparation and Networking:
Services include job search programs, resume and curriculum vitae critiques, and practice interview workshops. Professional association and networking contacts are available for job search advice and career information. CSC presents networking events throughout the year to connect students with professionals.

Job Fairs and On-Campus Interviewing: CSC presents the Triton Fall, Winter, and Spring Job and Internship Fairs each year featuring recruiters from a variety of organizations. Recruiters also conduct interviews on campus at CSC for career positions and internships.

Graduate Student Services: CSC offers special workshops and resources for master’s and Ph.D. students seeking academic or nonacademic careers. Resources include job search handbooks and a UCSD alumni contact list of nearly 700 Ph.D. recipients.

Alumni Services: University of California alumni are eligible to use CSC programs and services. Alumni registration fee required.

Online Resources: The CSC Web site features extensive resources and links, in-depth information, and easy-to-print publications for UCSD students, alumni, faculty, staff, parents, and recruiters.

Calendar of Events: CSC offers a variety of information sessions, group workshops, and special presentations. A quarterly calendar is available online and at CSC.

For more information and building hours, call (858) 534-3750 or go to http://career.ucsd.edu.

College Dean of Student Affairs’ Offices
Revelle, Mail Code 0321, (858) 534-3492 http://revelle.ucsd.edu
Muir, Mail Code 0106, (858) 534-3587 http://muir.ucsd.edu
Marshall, Mail Code 0509, (858) 534-4390 http://marshall.ucsd.edu
Warren, Mail Code 0422, (858) 534-4731 http://warren.ucsd.edu
Roosevelt, Mail Code 0546, (858) 534-2237 http://roosevelt.ucsd.edu
Sixth College, Mail Code 0054, (858) 822-5953 http://sixth.ucsd.edu

The offices of the college deans of student affairs perform many functions. They provide support, advice, counseling, and referral for students and parents in many areas including commuter, transfer, and residential matters. The deans’ offices develop and coordinate activities such as Orientation, Welcome Week, commencement; leadership and co-curricular learning opportunities; decisions about remaining in or withdrawing from school; college disciplinary matters; involvement in student governments; community service/volunteer opportunities; planning social, educational and cultural activities; assisting students with disabilities; and assisting in hearing procedures regarding grievances.

Contact your college dean of student affairs’ office for assistance, particularly if you do not know which university office or resource would best be able to assist you with your problem or concern.

Counseling and Psychological Services (CAPS)
Central Location:
190 Galbraith
Mail Code 0304
(858) 534-3755 http://caps.ucsd.edu

Counseling and Psychological Services (CAPS) provides professional assistance with a wide array of personal difficulties that may interfere with academic success. Specific concerns for which students often seek assistance include loneliness and isolation, homesickness, parent/family/partner conflict, difficulty studying, concentrating or test-taking, challenges in interpersonal relations and communication, educational/career concerns, identity issues, sexuality, depression, and anxiety. Students often consult with counselors when experiencing a variety of life issues, transitions, or emotional situations. In order to enhance the UC San Diego student experience, Counseling and Psychological Services professionals also offer consultation to the university at large regarding a wide range of student issues.

Individual counseling, psychotherapy, marriage or relationship counseling, family sessions, and many issue-focused groups are provided to support the emotional and social growth of students. During the course of a year, special forums, psychotherapy groups, support groups, and psycho-educational groups are offered to students according to their needs and the demand for services. Listings are posted quarterly on the Web site.

CAPS is geared toward developing a positive and robust mental health climate in the university community. The emphasis is on helping students maintain healthy lifestyles so that they may enjoy a sense of wellness, express themselves with confidence, manifest their creativity and productivity, manage stress successfully, and engage in interpersonal relations as they achieve their career goals.

CAPS staff are clinical and counseling psychologists and psychologists-in-training. Student peer counselors present programs concerning a variety of topics to student groups throughout the year. In order to provide greater accessibility, the service has offices in all colleges, the Women’s Center, Center for Student Involvement, in addition to the central location at Galbraith Hall. Services are available to any currently enrolled undergraduate or graduate student, and appointments can be arranged by contacting the central office. The counseling relationship is private and confidential.

Dining Services
Administration: The Loft above Café Ventanas
Eleanor Roosevelt College
Mail Code 0313
(858) 534-7587 http://hdh.ucsd.edu

Students, faculty, staff, and members of the public are welcome at all UC San Diego Dining Services restaurants. Ten locations serve a variety of high-quality and ethnically diverse food. Each offers a comfortable dining atmosphere with unique menus and convenient hours ranging from 7:00 a.m. to 1:00 a.m. Sample menus are online at http://hdh.ucsd.edu/diningservices.

UCSD’s college residence program includes housing space and a Dining Plan, which can be used at any Dining Services location.

Triton Cash, the campus debit account, offers an easy and secure way to shop and dine at over forty locations, on and off campus. For more information, go to http://hdh.ucsd.edu/tritoncash.

Students use their official UC San Diego Campus Card to access the Dining Plan and Triton Cash.

Disabilities, Office for Students with (OSD)
202 University Center
Voice: (858) 534-4382
TDD: (858) 534-9709
Fax: (858) 534-4650
http://osd.ucsd.edu

The Office for Students with Disabilities (OSD) is a department within Academic Affairs and is
responsible for facilitating reasonable accommoda-
dations for students with documented disabilities.
Students who request accommodations at UC
San Diego need to register with OSD prior to the
receipt of services. OSD encourages students to
plan ahead for accommodations by
• Submitting medical documentation to OSD
  that substantiates the functional limitations of
  the health condition(s) that accommodations
  are being requested for;
• Acquiring a copy of the medical documenta-
tion guidelines for each condition to ensure
  an understanding of what documentation is
  required by OSD;
• Meeting with a Disability Specialist to engage
  in the interactive process of exploring reason-
able accommodations and services, given the
  requirements of the academic program;
• Obtaining an Authorization for
  Accommodation (AFA) letter from OSD each
  quarter or period of study to provide a basis
  of communication for an individual’s eligibility
  for accommodations;
• Discussing the eligible accommodations
  listed on the AFA with each faculty member;
  departmental liaison, advisor, or campus
  member leading the course or activity to form
  an understanding of how the accommodations
  will be provided each quarter;
• Understanding how to appeal decisions re-
garding accommodation determinations, and
  the provision of services in a timely manner.
OSD is also a resource for faculty and staff dur-
ing the accommodation process and welcomes
the opportunity to discuss academic issues, such
as:
• When and how to refer students requesting
  classroom and exam modifications due to
  medical reasons;
• Accommodations listed on the AFA;
• Confidentiality of disability-related
  information;
• How classroom and exam accommodations
  can be delivered;
• Note-taker training;
• Working with interpreters and captionists in
  the classroom;
• How the competencies of academic programs,
  majors, and minors impact the provision of
  accommodations;
• General information about accommodations
  and services due to disabilities.

Policies and procedures for and about students
with disabilities, ranging in topic from accom-
modation requests to appeals, are located in a
number of areas, including
• Office for Students with Disabilities (OSD) and
  its Web site at http://osd.ucsd.edu;
• Academic Senate and its Web site at http://
  www-senate.ucsd.edu/manual/appendices/
  app3.htm;
• Persons with Disabilities link from the UC San

Ethics and Spirituality, The
Center for
Building 201 University Center
Mail Code 0081
(858) 534-2521
The Center for Ethics and Spirituality promotes
dialogue on moral, ethical, spiritual and theologi-
cal issues, questions, and concerns. Professional
staff provides secular consultation, counseling,
and education for the campus community.

Financial Aid
All financial assistance for undergraduate and
medical students and need-based aid for graduate
students is administered by the Financial Aid
Office (FAO). Information relating to graduate
student support in the form of fellowships and
assistantships is presented in the catalog section
entitled “Graduate Studies.”
The Financial Aid Office, which also includes
the Undergraduate Scholarship Office and the
Office of Veterans’ Affairs, is located in the Student
Services Center, Third Floor North, 9500 Gilman
Dr., Mail Code 0013, La Jolla, CA 92093-0013,
and can be contacted at the phone numbers below.
Financial Aid Office ............... (858) 534-4480
Veterans Affairs .................. (858) 534-4480
Scholarship Office ............... (858) 534-3263
Health Sciences Financial Aid . . (858) 534-4664

Our e-mail addresses are: finaid@ucsd.edu,
 scholarships@ucsd.edu, vao@ucsd.edu (Veterans
Benefits).

Other information about our services and
programs is available on our Web site: http://
fao.ucsd.edu.

Applications and requests for information
should be addressed to the Financial Aid Office,
9500 Gilman Drive, Mail Code 0013, La Jolla, CA
92093-0013.

No student should leave the university for
financial reasons before exploring all possible
avenues of assistance with a Financial Aid Office
counselor. All information contained herein is
intended to serve as a general guide and is subject
to change due to new and revised federal, state, and
University of California regulations and procedures.

Applying for Financial Aid
A student is eligible for financial aid if she or he
1. Is a United States citizen or eligible noncitizen.
2. Has a valid Social Security number.
3. Is not in default on a federal student loan or has
   made satisfactory arrangements to repay it.
4. Does not owe money back on a federal student
   grant or has made satisfactory arrangements to
   repay it.
5. Is registered with Selective Service (males at
   least eighteen years old, unless not required).
6. Is enrolled at UCSD (minimum of six units per
   quarter) in a degree or certificate program.
   Limited status students (non-degree/non-
   certificate) enrolled in a course of study
   necessary to be accepted in a degree or
   certificate program are only eligible for one
   year of Federal Stafford Loan(s). After one year,
   these limited status students are not eligible for
   any financial aid funding.
7. Is making satisfactory academic progress for
   financial aid recipients.

Students must maintain Satisfactory Academic
Progress as a condition for maintaining eligibility
for financial aid. For UC San Diego undergraduate
financial aid recipients the standards are thirty-six
units (or an average of twelve units per quarter for
full-time enrollment) and an overall grade-point
average of 2.0 during the current academic year
and the following summer (similar unit require-
ments apply to graduate students who must
maintain a 3.0 minimum GPA). Undergraduate
students are considered for all financial aid
sources up to their fifth year of college attendance
(except for Cal Grants) and limited funding up to
their sixth year. For graduate student duration
requirements and for more detailed informa-
tion on UCSD’s Satisfactory Academic Progress
standards for students enrolled full-time in a
degree program, please see our Web site at http://
fao.ucsd.edu. For policy information on approved
part-time status students, limited status and
extension students, please contact the Financial
Aid Office.

For evaluation of financial need, all applicants
must submit a Free Application for Federal Student
Aid (FAFSA) and, if requested, copies of the 2008
federal income tax returns, and any other required
documents. The FAFSA form should be filed by
March 2, 2009, the UCSD priority filing date, with
the appropriate processing agency and must
indicate the University of California, San Diego
(list Federal School Code 001317) to receive a
processed copy of the FAFSA. Late applicants will
be considered for limited aid. All supporting docu-
ments must be submitted and all processing holds
must be cleared by the student by May 1, 2009,
for the purpose of University Grant, Work Study,
Federal Perkins Loan, or University Loan.

Receiving Financial Aid
UC financial aid for students with demonstrated
financial need is funded by a combination, or
“package”, of gift and self-help aid. Grants and

CAMPUS SERVICES AND FACILITIES 93
scholarships are awards that do not have to be repaid. Self-help aid may consist of a loan, which does not have to be repaid, or a work-study award, earned by working a part-time job while attending school, or a combination of both. UCSD ensures that students in similar circumstances receive similar packages. Grant funds are directed to the most needy students. Students who are nonresidents of California should note that need-based financial aid funds are not sufficient to meet the additional cost of nonresident tuition ($20,021 during 2008–09). The family should be prepared to provide this amount from their own personal resources or educational loan programs. The various types of aid and programs which may be included in need-based packages are listed below:

Federal Pell Grant
The Federal Pell Grant program is designed to provide financial assistance to undergraduates attending postsecondary educational institutions. Amounts range from $976 to $5,356 for 2009–10.

Federal Academic Competitiveness Grants (ACG)
ACG awards are for first or second year full-time undergraduate students who have completed a rigorous secondary school program of study. Second year students must have at least a 3.0 GPA as of the end of his or her first academic year of undergraduate study.

University of California Grant Program
The University of California Grant Program provides grants to undergraduate and graduate students.

Federal Science and Mathematics Access to Retain Talent (SMART) Grants
SMART grants are available to third or fourth year full-time undergraduate students with at least a 3.0 GPA, pursuing a major in physical, life, or computer sciences, mathematics, technology, engineering, or a critical foreign language.

Federal Supplemental Educational Opportunity Grant (SEOG)
SEOG awards are federally funded and are available only to undergraduates. Awards may range from $100 to $4,000 per academic year.

Cal Grants (Undergraduate)
Cal Grants are awarded by the California Student Aid Commission to undergraduate California residents. All resident applicants for UCSD aid are required to apply for a Cal Grant. To be considered as a new recipient, the FAFSA and the GPA Verification Form must be postmarked on or prior to March 2, 2009. Current recipients must file a FAFSA each year to have their awards renewed.

Work-Study
Federal and state work-study awards are employment programs that provide funds for student employment by the university or by public and private profit/nonprofit organizations. The work-study program provides experience in many fields, including experimental sciences, library work, recreation, computer sciences, peer counseling, and office work. Pay ranges from minimum wage and above. Job listings and referrals are provided through the Career Services Center.

Federal Perkins Loans
This loan carries a 5 percent interest rate. Students begin paying both the principal and the interest nine months after ceasing to be enrolled at least half-time.

University Loans
This loan is available to undergraduate students demonstrating financial need. Repayment of both the principal and the 5 percent fixed interest begins nine months after ceasing to be enrolled at least half-time.

Federal Subsidized Stafford Loans
The annual maximum allowed during the first year of undergraduate study is $3,500. Sophomores can borrow an annual maximum of $4,500, and the yearly limit for juniors and seniors is $5,500, with an undergraduate cumulative maximum of $23,000. Graduate students may borrow up to $8,500 per academic year with an aggregate sum up to $65,000, including the amount borrowed as an undergraduate. The interest rate is fixed at 5.6 percent for loans disbursed on or after July 1, 2009.

The federal government pays (subsidizes) the interest on the student's behalf during in-school (enrolled in six units or more), grace, and authorized deferment periods. Repayment of principal and interest begins six months after the borrower leaves school or ceases to be enrolled as a half-time student.

Federal Unsubsidized Stafford Loans
Students who do not have financial need eligibility for the maximum Federal Stafford Loan may borrow under this program. The annual maximum and interest rate are the same as the Subsidized Stafford Loan. Dependent undergraduates may borrow an additional $2,000. Independent undergraduates may borrow an additional $4,000 to $5,500 annually; graduate students may borrow an additional $12,000 annually. The maximums include amounts borrowed under the Federal Stafford Loan program. Aggregate maximums are $31,000 for dependent undergraduates, $57,500 for independent undergraduates, and $138,500 for graduate students. The interest is not paid on the student's behalf. Interest begins accruing immediately after disbursement, but payment of principal and interest may be deferred until six months after ceasing to be enrolled for six units or more. The amount borrowed cannot exceed the cost of education minus other financial aid resources (including other need-based loans).

Federal PLUS Loans for Parents
Parents of dependent undergraduate students are eligible to borrow under this program if they have no adverse credit history and meet program eligibility requirements. The interest rate for this loan is fixed at 8.5 percent. Parents are eligible to borrow up to the cost of education minus other financial aid (including other loans). The first payment is due within sixty days after disbursement by the lender.

Federal PLUS Loan for Graduate and Professional Students
Students registered in graduate and professional programs are eligible to borrow under this federal loan program if they have no adverse credit history and meet other program eligibility requirements. The interest rate for the loan is fixed at 8.5 percent. Students can borrow up to the cost of education minus other financial aid (including other loans). Students should first apply for the Federal Stafford Subsidized and Unsubsidized Loans before applying for the Grad PLUS.

Summer Session Financial Aid
Limited financial aid is available for UCSD students who qualify and enroll in Summer Session at UCSD or other UC campuses. In addition to the FAFSA, a Summer Session application must be completed. Types of aid include a limited amount of grants and loans. More information on Summer Session financial aid is available at http://fao.ucsd.edu.

Triton Registration Installment Plan (TRIP)
The UCSD Triton Registration Installment Plan (TRIP), administered by the Student Business Services (SBS), is a monthly payment arrangement and is available for students who desire an alternative method of financing their registration fees on a short-term basis. All students in good financial and academic standing are eligible for the program, except for those students whose financial aid or graduate support will pay their registration fees by the quarterly registration fee due date. A prerequisite to applying for the program is enrollment for the term. The TRIP allows registration fees to be paid in up to three installments each quarter. On a three-month plan, the first payment is required by the quarterly registration due date. The remaining payments are itemized on the student’s next two monthly UCSD Billing Statements. There is a $30 nonrefundable quarterly fee that must be submitted with the application to the Billing Services unit of the Student Business Services Office. This fee is strictly used to offset the costs of the program. For further information, please contact the Billing Services Unit at (858) 534-6806, or online at: http://sbs.ucsd.edu.

Short-Term Emergency Loans
The limited emergency loan funds, administered by the Financial Aid Office, are loaned in small amounts to help students in critical short-term...
emergencies, and usually must be repaid within thirty days. There currently is a service charge of $20 per emergency loan, and students must be enrolled in at least six units. Registration fees must be paid prior to applying. Applications and further information are available from the Financial Aid Office.

Federal Tax Credits
Two federal tax credits may benefit you or your parents, if the grants and scholarships you receive do not fully cover your fees. Both tax credits are tied to the tuition and fees paid for college.

The Hope Scholarship Credit (up to $1,500) is available for the first two years of at least half-time enrollment in postsecondary education.

The Lifetime Learning Credit (up to $1,000 per tax year) is available for postsecondary enrollment at any level.

To find out more about these tax credits, consult your tax advisor or visit the U.S. Dept. of Education Web site www.ed.gov/offices/OPE/PPI/HOPE and the “Where Do You Want to Go” section on TritonLink.

Graduate Financial Assistance
See catalog section titled “Graduate Studies” for additional types of financial assistance available to graduate students.

The Undergraduate Scholarship Program
The purpose of the Undergraduate Scholarship Program at UCSD is to recognize outstanding achievement, to encourage academic excellence, and to offer support to meritorious students.

Scholarships are awarded on a competitive basis by the UCSD Faculty Committee on Undergraduate Scholarships and Honors. Merit scholarships are awarded on the basis of academic excellence. Restricted scholarships are awarded based on one or more additional criteria or restrictions such as financial need, study in a particular major, or leadership. Students who are awarded scholarships restricted by financial need must file a Free Application for Federal Student Aid (FAFSA) in order to receive the award. Additionally, Undergraduate Research Scholarships are offered to current students which enable them to pursue special studies and projects under faculty supervision.

Scholarship Donors
UCSD is actively engaged in developing new scholarship opportunities. Many of these awards were established through the generous support of individual donors, foundations, businesses, and community organizations. Every gift toward undergraduate scholarships is appreciated and appropriately recognized. Further information about supporting scholarships at UCSD may be obtained from Kim Signoret-Paar, Director of Student Affairs Development. Ms. Signoret-Paar may be reached at (858) 822-1536 or kspaar@ucsd.edu. Her address is 9500 Gilman Drive # 0937, La Jolla, CA 92039-0937.

Scholarship Information

Scholarship Office Address
The Scholarship Office is part of the UCSD Financial Aid Office and is located in Student Services Center, 401 University Center, Third Floor North, 9500 Gilman Dr., Mail Code 0013, La Jolla, CA 92039-0013, at the corner of Gilman Drive and Myers Drive. Office hours are from 8:00 a.m. to 4:30 p.m., Monday, Wednesday, and Friday; Tuesdays and Thursdays open 10:00 a.m. to 4:30 p.m. For additional information regarding the scholarship program, contact the Scholarship Office at scholarships@ucsd.edu or (858) 534-3263.

How to Apply for Scholarships

Entering Students
The University of California Application for Undergraduate Admission and Scholarships is also used to apply for the UCSD Regents and other entering freshmen undergraduate scholarships. No other paperwork is required. The application is submitted in November for the following academic year. Because scholarships are awarded to entering students on a very competitive basis, students should carefully comply with instructions on the UC Application for Undergraduate Admission and Scholarships to ensure full consideration for all eligible scholarships. Entering students who receive a scholarship from UCSD will be notified in writing by April 1. We regret that we are unable to mail denial notification letters to other applicants.

Current UCSD Students
Current UCSD students apply for scholarships annually during winter quarter for the following fall quarter by filing the UCSD Continuing Student Scholarship Application. This application is available online via TritonLink in December and is due in February. Current students who receive a scholarship from UCSD will be notified in writing by early June. Students who do not receive an award will not be notified due to the large volume of applications.

UCSD Undergraduate Scholarships

The scholarships listed below are generally available at UCSD. Although every effort is made to present the most accurate information, this listing is subject to change due to federal, state, and university funding limitations, and changes in policy or law.

Entering Freshman Awards
Regents Scholarship: The Regents Scholarship is the most prestigious scholarship awarded to outstanding entering freshmen on the basis of academic achievement. This scholarship is offered to entering freshmen for four undergraduate years. If a student is offered the Regents Scholarship and has financial need, the student will receive additional scholarship and/or grant funds up to the amount of demonstrated need for four undergraduate academic years, excluding non-resident tuition costs. Entering freshmen applying in the 2009–10 academic year without documented financial need will receive a four-year honorarium of $8,000, paid at $2,000 per year for the four years of their undergraduate appointment at UCSD. Entering freshmen apply for the Regents Scholarship through the admissions application. UCSD Regents Scholars are also eligible for certain undergraduate privileges and recognitions such as preferred class enrollment, extended housing benefits for four years (providing housing deadlines are met); UCSD college of choice at time of admission, extended student library privileges, honors program at select colleges; the Regents Freshman Research Initiative, and the Academic Enrichment Faculty Mentor Program.

Chancellor’s Scholarship: Awarded to outstanding entering freshmen on the basis of academic achievement, and other factors, which may include financial need, extracurricular and community activities, educational environment, and first-generation college attendance. As a Chancellor’s Scholar, students will receive the following undergraduate benefits: Extended housing benefits (provided housing deadlines are met) and priority registration for four years as a UCSD undergraduate scholar; extended library privileges; participation in the Academic Enrichment Faculty Mentor Program, and the Emeriti Mentoring Program. This is a four-year undergraduate award, up to $20,000, paid in the amount of up to $5,000 annually.

The following scholarships are part of the Chancellor’s Scholarship Program:

Albert C. and Elisabeth L. Boyer Scholarship
Ernest N. Carter Hispanic Scholarship for Engineers
Hispanic Scholarship Council Scholarship
Charmaine and Maurice Kaplan Scholarship
Logan L. Page Scholarship
Elizabeth Stupp Kohl Scholarship for Women Engineers
Madge E. Lawhead Scholarship
S. Falck Nielsen Scholarship
Gerald and Inez Grant Parker Foundation Scholarship
Maree Gill Scholarship
Rose Foundation Scholarship
Shimotori Memorial Scholarship
Justin D. Smith Family Scholarship
Ludwig and Ada Strauss Scholarship
Woolley Family Scholarship
Alternative Break Scholarship: Awarded to students participating in the Alternative Break Program with priority for those with demonstrated financial
need. This is a one-year award and the amount varies.

James Avery Scholarship: Awarded to an African-American student pursuing studies in the performing or visual arts, with a preference for students enrolled in Thurgood Marshall College. This is a four-year award up to $4,000, paid in the amount of up to $1,000 annually.

Black Alumni Scholarship: Awarded to entering African-American students based on academic merit. This is a four-year award up to $4,000, paid in the amount of up to $1,000 annually.

Clayton H. Brace Scholarship: Awarded to an entering student with an interest in communications. This is a one-year award. The award amount varies.

CREATE Undergraduate Scholarship: Awarded to entering freshmen who have graduated from a San Diego high school participating in the UCSD CREATE program. The amount and term of the award varies.

Herbert Greenberg Memorial Scholarship: Awarded to entering freshmen based on academic merit and demonstrated financial need. The award amount and term varies.

Kelly J. Kolozsi Scholarship: This outside agency scholarship is awarded to students in the following priority: (1) Graduates of Menlo Atherton High School; (2) graduates of a high school in the Sequoia Union High School District. Preference is given to students diagnosed with a learning disability. This is a one-year award. The award amount varies. The recipients are chosen by the Kolozsi Scholarship Selection Committee.

Ledell Family Scholarship: Awarded to entering freshmen based on academic merit. This is a four-year award up to $10,000, paid in the amount of up to $2,500 annually.

McFarland Scholarship: Awarded to Native-American entering freshmen based on academic merit. This is a four-year award up to $10,000, paid in the amount of up to $2,500 annually.

Dr. A.R. Moossa Scholarship: Awarded to pre-medical students who plan a career as a physician, have financial need, and are full-time students with at least a 3.0 GPA. This is a four-year award up to $8,000, paid in the amount of up to $2,000 annually.

National Merit University-Sponsored Scholarships: Entering students: As of fall 2006, UCSD no longer sponsors entering freshmen National Merit Scholarships.

Sheila Owens-Collins Scholarship: Awarded to an African-American student pursuing studies in the life sciences. This is a four-year award up to $4,000, paid in the amount of up to $1,000 annually.

George Parker Memorial Scholarship: Awarded based on financial need to students who were orphaned for at least three years prior to the age of eighteen, and/or who were raised in foster care for at least three years immediately prior to the age of eighteen. Students must show evidence of orphan or foster care status. This is a renewable award, paid in the amount of up to $2,000 annually.

Mary Pillot Scholarship: Awarded to meritorious graduates of San Jose High School Academy, as nominated by the high school principal. This is a one-year award up to $500.

Preuss School Scholarships at UCSD: Awarded to students of the UCSD Preuss School who have been admitted to UCSD, and who have high financial need. The award amount and term varies. The following scholarships are part of Preuss School Scholarship Program:

- Jack in The Box Scholarship
- Janice and Steven Chaffin Endowed Scholarship
- Hispanic Scholarship Council Scholarship
- Herbert and Renita Greenberg Scholarship
- Rebecca E. Lytle Scholarship
- Preuss School Scholarship at UCSD Fund
- Ray and Betty Ramseyer Scholarship: Awarded to an entering student with an interest in the social sciences. This is a four-year award up to $4,000, paid in the amount of up to $1,000 annually.
- Roger and Ellen Revelle Scholarship: Awarded to entering freshmen based on academic merit. This is a four-year award up to $10,000, paid at up to $2,500 annually.

UC San Diego Athletic Scholarship: Awarded to UCSD Intercollegiate Student-Athletes, upon approval by the Intercollegiate Athletics Department, who meet additional required academic criteria. Entering student-athletes meet the academic criteria upon admissions. Renewal requires a cumulative UC GPA of 2.50 for sophomores, 2.60 for juniors, and 2.70 for seniors, and continued participation in Intercollegiate Athletics. This is a one-year $500 award that is renewable up to five years.

Mary S. and Joseph W. Watson Scholarship: Awarded to entering freshmen with financial need from San Diego or Imperial Counties, with preference given as follows: Students whose K–12 education has been in aforementioned counties, first generation college students, not receiving other privately funded UCSD scholarships, majoring in physical sciences or arts and humanities. This is a four-year award up to $8,000, paid in the amount of up to $2,000 annually.

Aliene Huangani Wong Scholarship: Awarded to entering freshmen from Hawaii, with a preference for students majoring in science or engineering. This is a four-year award up to $10,000 per year.

Awarded to Students Transferring from Community Colleges

Engelhorn Family Scholarship: The Engelhorn Family Scholarships are awarded to transfer students who are participants in the UniversityLink program, have high financial need, with a preference for students who are first-generation college students. This is a two-year award, paid in the amount of up to $2,000 annually.

Current Student Awards

Alumni Leadership Scholarship: Awarded to full-time students who will be juniors in 2009–10, with a 3.0+ GPA, demonstrated financial need, and demonstrated campus or community leadership during UCSD undergraduate years. This is a two-year award up to $2,000 annually.

In addition to the above scholarships, other Alumni Leadership Scholarships have been made possible by individual donors. These endowed scholarships may have special criteria. Please see the scholarship Web site for more information:

- Bay Area Alumni Scholarship
- Bruten Family Scholarship
- Gregory T. Bryan Scholarship
- Cambon Family Scholarship
- Dottie Conway Memorial Scholarship
- William M. Fitzmaurice, ’79, Scholarship
- Hajim Family Scholarship
- Kevin T. Hart Memorial Scholarship
- Violet and Matthew N. Lehrer, ’91, Scholarship
- Joseph H. Lima, ’87, Scholarship
- Marchick-Rallo Scholarship
- Karen Moraghan, ’81, Scholarship
- Nelson Family Scholarship
- Stephen M. O’Leary, ’84, Memorial Scholarship
- Patricia Ordonez Valva, ’92, Memorial Scholarship
- Philip R. and Pamela Fadem Palisoul, ’72, Family Scholarship
- Vickerman/Munoz Family Scholarship
- Walsh Chacon Malone Scholarship
- C. Robert Waltell Memorial Scholarship
- Waxman Family Scholarship
- Christopher B. Arrott—Gay, Lesbian, and Bisexual Scholarship: Awarded to gay, lesbian, or bisexual undergraduate students with a record of active service and involvement in the gay, lesbian, and bisexual community. This is a one-year award up to $1,000.
- Charles and Clara Ash Scholarship: Awarded to students with demonstrated financial need. This is a one-year award. The award amount varies.
- BAE SYSTEMS Scholarship: Awarded to full-time students who are seniors in the 2009–10 academic year, with a 3.2+ GPA, majoring in computer science, applied mathematics, computer or electrical engineering with a computer sciences emphasis, are U.S. citizens and plan to pursue a career in computer science in San Diego. This is a one-year award up to $5,000.
- Errett Bishop Scholarship: Awarded to upper division mathematics majors with financial need. Preference given to 2009–10 graduating seniors. The award amount varies up to $3,000.
- The Darcy C. and Robert Bingham Scholarship: Awarded to full-time students who are in good
information submitted on their 2009–10 FAFSA students who will be seniors in 2009–10, with Scholarships:

**Boeing Engineering Scholarship:** Awarded to full-time students majoring in electrical engineering, mechanical engineering, aerospace engineering, computer science, or computer engineering, who have demonstrated high financial need. This is a one-year award up to $2,000.

**Kenneth Bowers Scholarship for CSE:** Awarded to seniors majoring in Computer Science Engineering, with a 3.0+ GPA. Preference given to financial need students who have knowledge and/or experience with the UCSD Pascal application. This is a one-year award up to $2,000.

**Braille Transcribers Guild:** Awarded to students who are legally blind, or have substantial, uncorrectable vision loss, registered with the UCSD Office for Students with Disabilities. This award amount and term vary.

**CK and Jenny Cheng CSE/ECE Scholarship:** Awarded to undergraduates majoring in computer science and engineering or electrical and computer engineering at the UCSD Jacobs School of Engineering, based on academic merit. The scholarship is a one-year award of approximately $300.

**Cohu, Inc.-James W. Barnes Scholarship:** Awarded to full-time current undergraduate students majoring in mechanical, electrical, computer engineering or computer science, with a 3.0+ GPA. This is a one-year award up to $2,000.

**Thomas E. Curtis Scholarship:** Awarded to juniors or seniors in the 2009–10 academic year, majoring in the fields of biology, chemistry, or physics, who also demonstrate interest in the larger world around them, with leadership-level involvement outside the classroom, and have a minimum 2.75 GPA. This is a one-year award. The award amount varies, up to $2,000.

**Brython P. Davis Scholarship:** Awarded to current students whose parent or is a regular member of the U.S. Navy or Marine Corps. This is a one-year award. The award amount varies.

**Richard L. and Fern W. Erion and Laidlaw-Erion Scholarships:** Awarded to full-time UCSD students who will be seniors in 2009–10, with demonstrated financial need, as determined by information submitted on their 2009–10 FAFSA. The award amount varies, up to $2,000.

**Klara D. Eckart Scholarship:** Awarded to current students in the fields of computation, mathematics, or physics. This is a one-year award. The award amount varies, up to $1,000.

**The Willis and Jane Fletcher Foundation and P and G Company Scholarship:** This outside agency scholarship is awarded to a graduate of a San Diego County high school with demonstrated financial need. This is a one-year award up to $2,500.

**Marye Anne Fox and James Whitesell Scholarship:** Awarded to students majoring in natural sciences or engineering. Preference given to students with financial need, and who are dependents of UCSD employees. This is a one-year award and the amount varies.

**Joye Haddad Memorial Scholarship:** Awarded to students who have been diagnosed with cancer, with Acquired Immune Deficiency Syndrome, with AIDS-related conditions, or to students with physical disabilities. This is a one-year award up to $1,000.

**E. Coke Hill Scholarship:** Awarded to students with demonstrated financial need. This is a one-year award. The award amount varies.

**I Pledge Student Scholarship:** This scholarship was established by the UCSD Student Foundation and paid for by current students through quarterly donations. Awarded to continuing students who have demonstrated a commitment to building the UCSD community. This is a one-year award up to $2,000.

**Irvine Memorial Scholarship:** Awarded to students based on academic merit. This is generally a one-year award. The award amount varies.

**Jeffrey R. Leifer Scholarship:** Awarded to current students who have demonstrated financial need and academic merit, are the first generation in their family to attend college, and graduated from California high schools that historically are underrepresented at UC campuses. This scholarship has been established through the generous contributions of Jeffrey R. Leifer. As a student at UCSD, he served as associated student body president and founded International Student Pugwash, a worldwide organization dedicated to issues surrounding ethics, technology, and society. This is a one-year award and the amount varies, up to $1,000.

**Alice Marriott Scholarship:** Awarded to students with demonstrated financial need. This is a one-year award. The award amount varies.

**Thurgood Marshall College Scholarship:** Awarded to students enrolled in Marshall College who have a 3.2 GPA by the end of spring quarter, and have completed a minimum of seventy-two graded quarter units. Transfer students need thirty-six graded UCSD units with a 3.2 GPA and 3.5 cumulative GPA in advanced standing work. Seniors who apply should have a minimum of thirty-six units remaining to be completed in the academic year the scholarship is awarded with a minimum 3.2 cumulative GPA. This is a one-year award up to $1,800.

**Mary and Marshall—Gay and Lesbian Scholarship:** Awarded to gay and lesbian students with a record of active service and involvement in the gay, lesbian, and bisexual community. This is a one-year award. Preference will be given to students with financial need. The award amount is up to $1,000. Recipients may reapply.

**Michael Miller Engineering Scholarship for Transfer Students:** Awarded to undergraduate transfer students who are majoring in engineering, have a 3.0+ GPA, and demonstrated financial need. This is a one-year award up to $2,500.

**LaVerne Noyes Scholarship:** Awarded to current students who have demonstrated financial need and are descendants of U.S. World War I Veterans (defined as four months of service in the U.S. military prior to November 11, 1918). This is a one-year award. The award amount varies.

**George Parker Memorial Scholarship:** Awarded based on financial need to students who were orphaned for at least three years prior to the age of eighteen, and/or who were raised in foster care for at least three years immediately prior to the age of eighteen. Students must show evidence of orphan or foster care status. This is a renewable award, paid in the amount of up to $2,000 annually.

**Tracee Parsons Scholarship for UCSD LGBT Students in Math and Science:** Awarded to current gay, lesbian, bisexual, and/or transgender undergraduate students based on academic merit, financial need, and demonstrated commitment to the fields of math and/or science. This is a one-year award up to $1,000.

**Cheryl Renee Persky Memorial Scholarship:** Awarded to electrical engineering or computer science majors. This is a one-year award and the amount varies.

**Sven Peterson Memorial Scholarship:** Awarded to a current freshman or sophomore, UCSD Warren College student, enrolled full-time, majoring in an area other than engineering or life sciences. The recipient must have been placed on the college provost’s honors list at least one quarter during his or her academic career in advance of applying for the award and must maintain a 3.0 cumulative GPA. The award amount varies.

**Tenie Remmel Memorial Scholarship:** Awarded based on academic merit and demonstrated financial need to a full-time student in the Division of Physical Sciences. This is a one-year award of up to $1,000.

**Gary C. Reynolds Scholarship:** Awarded to students who will be juniors or seniors in 2009–10, who are mathematics-computer science majors, who show exceptional promise for making future contributions in their field of study. The amount of this award varies up to $2,000.
Elizabeth W. Russell Scholarship: Awarded to students who will be juniors or seniors in 2009–10 who are pursuing studies in studio art, art history, or art criticism/theory. The award amount varies.

SAGA Scholarship: Awarded to juniors, seniors, or fifth-year seniors, in 2009–10, with financial need, 3.0+ GPA, a U.S. citizen or permanent resident, open to majors in science and technology, and who work twenty or more hours a week, with a preference for first generation college students (not required). This is a one-year scholarship up to $4,000 for full-time summer internship and professional skills training.

Senior Gift Scholarship: This scholarship was established by UCSD graduating seniors to recognize outstanding seniors, or senior transfer students, who have qualified for financial aid and have demonstrated the philanthropic spirit through community service. This is a one-year award up to $1,000.

Malcolm R. Stacey Memorial Scholarship: Awarded to Jewish students in the following priority: 1) undergraduate who is an orphan and preparing for graduate study in aeronautical engineering, 2) undergraduate in the field of aeronautical engineering, 3) a student in the division of engineering, and 4) a student in any field of study. This is a one-year award. The award amount varies.

William H. Stout Scholarship: Awarded to students based on academic merit. This is a one-year award. The award amount varies.

Russ Ty—Gay and Lesbian Scholarship: Awarded to gay and lesbian students based on academic merit and financial need. This is a one-year award. The award amount is a maximum of $1,000.

UC San Diego Athletic Scholarship: Awarded to UCSD Intercollegiate Student-Athletes, upon approval by the Intercollegiate Athletics Department, who meet additional required academic criteria. Entering student-athletes meet the academic criteria upon admissions. Renewal requires a cumulative UC GPA of 2.50 for sophomores, 2.60 for juniors, and 2.70 for seniors, and continued participation in Intercollegiate Athletics. This is a one-year $500 award that is renewable up to five years.

UCSD Faculty-Staff Employee Dependent Scholarship: Awarded to students with a 3.0+ GPA, demonstrated financial need, who are daughters or sons of university employees. This is a one-year award and the amount varies.

UCSD LGBT Resource Center Undergraduate Scholarship: Awarded to UCSD gay, lesbian, bisexual, and/or transgender students based on merit, need, and significant experience with issues related to sexual orientation and gender identity. This is a one-year award up to $1,000.

UCSD Town and Gown Scholarship: Awarded to full-time 2009–10 juniors or seniors with a 3.4+ GPA, demonstrated financial need, and exceptional promise for making future contributions in public or community service (including but not limited to foreign affairs, medicine, social service, political science). This is a one-year award up to $5,000.

UJIMA Black History Month Scholarship, in honor of Mary and Joseph Watson: Awarded to students with an African American Studies minor in the performing arts and humanities and/or the social and natural sciences. This is a one-year award up to $500.

Visual Arts Endowment Scholarship: Awarded to full-time current students, with the intent to support talented undergraduates majoring in visual arts. This is a one-year award up to $4,000.

Robert and Pat Whalen Military Transfer Scholarship: Awarded to transfer students who have served in the U.S. Armed Forces as enlisted or non-commissioned officers, have financial need, and are majoring in engineering. Preference given to those who have transferred to UCSD through Transfer Admission Guarantee (TAG) or UniversityLink. This is a one-year award and the amount varies.

If you have any questions regarding graduate scholarships, they should be directed to the Office of Graduate Studies at (858) 534-3555.

Undergraduate Research Scholarships

These special awards are for current undergraduate students who wish to engage in special studies or research projects under faculty supervision. The work must be above and beyond the normal course of study. The subject matter does not have to be related to the student’s major, minor, or other course work. These are one-year awards; however, a student may submit a new application each year for consideration. Awards are up to $3,500 one-year scholarships.

Applications are available from the UCSD Financial Aid Office in February and are due in April. Winners are notified by the middle of June. All recipients are required to submit a brief final summary report, including details of how the funds were used. Also, the sponsoring faculty member must submit a review and appraisal of the results of the project.

Amylin Pharmaceuticals Research Scholarship will give consideration to juniors or seniors in 2009–10, majoring in biological sciences or bioengineering who submit projects related to diabetes. The award is up to $3,000.

Biological Sciences Eureka! Scholarship promotes engagement in basic and translational biology by facilitating students’ participation in research opportunities both at the UC San Diego campus and at research facilities on the San Diego mesa. Students must be juniors or seniors in 2009–10 with a declared major in the Division of Biological Sciences. Successful proposals will show evidence that the scholarship will provide the students with an opportunity to have a significant research experience. The award is up to $3,500.

David Marc Belkin Memorial Research Scholarship will give preference to those proposals designed to pursue special studies and projects in the general areas of environmental and ecological issues. The award amount varies up to $3,000.

Julia Brown Research Scholarship: Awarded to juniors or seniors in the 2009–10 academic year, whose career objectives are in health-care medicine, medical research, pharmacy, pharmaceutical sciences, or public health. Preference is given to students with extenuating circumstances or financial need. This is a one-year award up to $3,500.

Chancellor’s Research Scholarship will give consideration to proposals regardless of project topic. The award is up to $3,000.

Dynes/Hellman Research Scholarship will give preference to those proposals designed to pursue special studies and projects in physics. The award is up to $3,000.

David Jay Gambee Memorial Research Fellowship will give preference to proposals which involve the student as an active citizen in university governance, the local community, or national and international affairs. Also receiving preference are proposals which lead to a heightened awareness of the relationship between environment and society. Service in the community through volunteer activities or participation in programs related to the Institute on Global Conflict and Cooperation is encouraged. The award varies up to $3,000.

Doris A. Howell Foundation Research Scholarship will give consideration to juniors or seniors in the 2009–10 academic year whose proposals are designed to improve the physical, mental, spiritual and behavioral health, and/or well-being of women, with a preference given to applications that study the prevention of disease such as diabetes, obesity, cancer, etc. Proposals may encompass all areas related to women’s health including biological, medical, cultural, economic, behavioral, psycho-social, or cross-cultural influences. The essay must describe how the project specifically addresses women’s health or well-being. The Howell Foundation for Research in Women’s Health is a not-for-profit spin-off of Soroptimist International of La Jolla. The award is up to $3,000.

Mary Louise and Charlie Robbins Endowed Scholarship will give preference to those proposals designed to pursue special studies and projects in marine sciences. The award is up to $3,000.

Warren College Undergraduate Research Scholarship was established to encourage outstanding UCSD Warren students of all majors to engage in scholarly research. U.S. citizenship is not required. Up to five scholarships are awarded annually. The award is up to $1,000.
Scholarships for Study Abroad

UCSD students study abroad through the UC Education Abroad Program (EAP), the UCSD Opportunities Abroad Program (OAP), and the UCSD Global Seminars (GS). In addition to the UCSD scholarships listed above, study abroad students may also qualify for special awards restricted to EAP, OAP, and GS participants. All of the scholarships listed below require a separate application through the International Center, unless otherwise indicated.

For more information about these scholarships and other outside opportunities for study abroad, contact the Programs Abroad Office at the International Center at (858) 534-1123 or via e-mail to: abroad@ucsd.edu.

Betty Tate International Scholarships: Awarded based on financial need and students must have a minimum 2.8 GPA.

Chris Borton Memorial Study Abroad Scholarships: Awarded on the basis of academic merit and without consideration of financial need.

EAP Scholarships: Awarded primarily on the basis of financial need.

Global Seminars Scholarships: Awarded to students participating in UCSD’s Global Seminars. Awarded primarily on the basis of financial need.

Eleanor Roosevelt College (ERC) Scholarships: Awarded to ERC students with financial need. Applicants should apply through ERC.

Ernest Mort International Scholarship for Revelle: Awarded to Revelle students studying abroad.

fliesbach International Study Scholarship: Awarded to students majoring in visual arts, anthropology, theatre, or dance.

Friends of the International Center: Awarded predominantly on academic merit, with some consideration of financial need.

Judaic Studies Scholarship: Awarded to students bound for Israel, with preference given to students with a major or minor in Judaic studies. Applicant should apply through the Department of Judaic Studies.

Stephen P. L’Italien Jr. Memorial Scholarship: Awarded to LGBT students studying abroad. Applicants should apply through the LGBT Resource Center.

Study Abroad Scholarships: Awarded to entering freshmen to be used on any of UCSD’s recognized credit-earning study abroad programs, enrolled in at least eight credits. The award is based upon need, and is $1,000. Awards not used on UCSD’s recognized programs will be forfeited.

So Family Endowed Undergraduate Scholarship: Awarded to students going to China, Hong Kong, and/or Taiwan.

Internship Programs

University of California President’s Washington D.C. Scholarship: Awarded to students on internship in Washington D.C. with financial need and a 3.0 GPA. Applicants should apply through the Academic Internship Program Office: (858) 534-4355 or the UC/DC Program Office: (858) 534-2705.

Intergroup Relations Program

Price Center East, Level 3 (858) 534-6708 Mail Code 0078 http://irp.ucsd.edu

The Intergroup Relations Program serves as an intergroup relations resource center for the UC San Diego campus providing programs and services relating to hate/bias prevention, mediation of student intergroup conflict, and issues that affect campus climate.

We achieve our mission through the following methods: education, problem resolution, campus climate assessment, and collaboration with UCSD departments and other universities.

International Center

(Corner of Gilman Drive and Library Walk) Mail Code 0018 (858) 534-3730 Fax: (858) 534-0909 Facility reservation: (858) 534-6442 http://icenter.ucsd.edu

The International Center assists U.S. students going abroad, as well as international students, scholars, and families, and facilitates interaction among all UCSD students, faculty, and staff with international interests. The International Center’s mission is to support students in exchange and education, and to:

- Provide the UCSD community with experiences that foster global perspectives, cross-cultural competence, and appreciation for diversity.
- Support UCSD international students, scholars, and study abroad participants with services that enhance the quality of their intercultural experience and contribute to their academic success.
- Facilitate UCSD’s participation in global scholarship and international educational exchange.

The International Center is made up of four distinct offices: the Programs Abroad Office (PAO); the International Student Office; the International Scholar Office; and the Dean’s Office. Each office has its own focus.

PAO serves the needs of all UCSD students. It helps those thinking about study abroad to learn about the options available, and it guides students through the process of applying to a program, going abroad, and returning. Orientation and advising are offered at every step of the way.

The International Student and Scholar Offices focus on the needs of all international students and scholars at UCSD. They provide services to help internationals navigate the regulatory maze all the way through completion of the program, from getting a visa and complying with I-94 regulations to getting employment authorization, paying taxes, and traveling internationally.

Also, the Friends of the International Center is a dedicated group of community volunteers who work with staff to create programs and outreach activities to support our students and scholars in their efforts to succeed, and to enrich the experiences of internationals and their dependents while at UCSD. Among some of the most successful outreach and volunteer programs at the International Center are the Friday Cafés, the Friends Resale Shop (raising approximately $20,000 annually for international education scholarships), language tutoring, Wednesday Morning Coffee (for spouses), the energetic International Club, and many, many others.

Housing

Commuter Student Services

Commuter Student Services provides off-campus housing information and resources for commuter students. The university is located in the midst of a resort area that results in relatively high rent in the coastal towns of San Diego County: Del Mar and Solana Beach to the north of campus, La Jolla and Pacific Beach to the south. A general rule of thumb: The closer to the beach, the higher the rent. Commuter Student Services provides the UCSD Off-Campus Housing Directory, a free resource of rental and roommate listings posted by landlords and roommates exclusively for the UC San Diego community. The listings include individual houses, apartments, and condos, as well as roommates, rooms in private homes, and work-exchange situations. You must have a current UC ID card or official Letter of Acceptance to view online rental contacts. The office also provides helpful landlord/tenant materials such as sample leases, room rental agreements, and tenant request forms. Computers and a courtesy phone for local calling are available. Bus schedules, free-zone maps, and bus stickers are also available.

Commuter Student Services supports commuters withquarterly off-campus housing workshops, special presentations, and a variety of community-building events. The Commuter Lounge is open twenty-four hours a day and includes vending machines, a kitchenette, board games, and magazines. The Commuter Student Services Web site allows for twenty-four-hour access to the resources offered, including the online rental listings and downloadable landlord/tenant forms. Services are available to registered students, staff, faculty, and alumni of the University of California.
only. Commuter Student Services is conveniently located on the first level of Price Center East near the campus transportation hub. For further information contact:

Undergraduate Residential Housing

Each college houses students in residence halls and/or apartments that are part of a unique housing system on campus. While facilities at each college are occupied primarily by students registered at that college, students from other colleges may also be residents.

Residence Halls and Apartments

Residence halls are arranged in suites of eight to eleven students who share a study/living room and restroom facilities. Apartments are self-contained units with kitchens, bathrooms, living areas, and combinations of two, three, or four bedrooms. Typically four to five students share an apartment. While incoming freshmen are generally assigned space in residence halls, high demand for on-campus housing has resulted in the assignment of apartment spaces for many incoming freshmen. Rooms are furnished and provide ample space for effective studying, sleeping, and storing of personal belongings, books, and clothes.

Each Residence Life Office makes specific room assignments in early September when the majority of spaces are filled. Housing, Dining, Hospitality (HHD) Administrative Services Office administers all other details related to housing contracts.

General Information for Incoming Freshmen

The Living on Campus Housing Application Instructions Information Brochure was mailed in mid-March to all who were admitted to UC San Diego. Only online applications were accepted and students were given instructions on how to apply for on-campus housing via TritonLink. To be eligible for on-campus housing, the Housing Application and the Statement of Intent to Register form must have been received by the specified deadline dates. The priority system for room assignment is explained in the Living on Campus Housing Brochure.

Housing application deadline for fall 2009–10 was May 1, 2009, for incoming freshmen.

The HHD Administrative Services Office recommends that freshmen who were not offered housing by the first of June, call (858) 534-4010 for further information.

General Information for Transfer Students

The Village at Torrey Pines—Transfer Student Facility

The Village at Torrey Pines Housing, which has advanced due to UC San Diego’s commitment to incoming transfer applicants, will house more than 1,000 students beginning in fall quarter of 2009. This newest community is located on the main campus’s northern neighborhood, within a short walking distance of the Pangea and Hopkins parking structures, and borders the Eleanor Roosevelt College neighborhood.

The community consists of a combination of seven three- to five-story buildings and one fourteen-story tower. The community includes 202 apartment-style units consisting of two, three, or four bedrooms. Each apartment has a living-dining-kitchen area, shared bathrooms, and storage, and each is furnished to provide ample space for effective studying, sleeping, and storing of personal belongings, books, and clothes. The community also includes residential and common spaces such as laundries, meeting spaces, and administrative offices. Retail space, including a café and a UC San Diego Bookstore annex, are placed on-site, as well as complementary outdoor spaces that have been developed to accommodate a variety of activities for residents.

The Village at Torrey Pines also has a sustainable focus with a project goal of achieving Green Building Council Silver rating equivalency. This will be accomplished through energy-efficient building methods and materials, sustainable landscape design, and energy-efficient lighting.

For more information please view the Housing Web site: http://hhd.ucsd.edu/thevillage or e-mail the village@ucsd.edu.

Due to high demand, wait-listed students may not be offered on-campus housing. For the best selection of housing closest to campus, contact the UC San Diego Commuter Student Services Office. Web site: http://offcampushousing.ucsd.edu; e-mail: offcampushousing@ucsd.edu

Associated Residential Community Housing (ARCH) (OFF-CAMPUS)

The UC San Diego ARCH Team operates several housing complexes in an effort to provide the highest level of flexibility when selecting your residence.

Mesa Residential Apartments (located minutes off campus) are designed to house single graduate or medical students, couples with or without children, and single parents. Residents must be enrolled full-time in a degree-granting program or Education Studies. The Mesa Residential Apartments offer unfurnished one-, two-, and three-bedroom units. Each unit features carpeting, blinds/drapes, range/oven, and refrigerator. In addition, apartments are pre-wired for cable television and feature private patios or balconies.

Gas and water are included in rent. Residents are required to pay for electricity. The community is a parklike setting, and amenities include community rooms, coin-operated laundry rooms, co-op garden plots, storage space for each apartment, ample parking, playgrounds for children, and an outdoor sports area, providing courts for tennis, basketball, and volleyball.

One Miramar Street is UC San Diego’s newest graduate student housing community, which opened in 2007. It is designed to house unmarried graduate and medical students without children, and undergraduate couples. Residents must be enrolled full-time in a degree-granting program, or participating in Education Studies. One Miramar Street comprises 403 two-bedroom apartments with two single rooms and a shared living/dining/kitchen area. This new development is close to campus, includes an on-site programming space, central mailroom, and laundry facilities. Most of the two-bedroom units include patios, balconies, and impressive views of La Jolla.

Coast Apartments community consists of 106 apartments within eleven buildings on eleven and a half acres. Coast Apartments is a two-story walk-up garden community consisting of wood frame construction and composite roofs laced with pebbles.

Apartment interior features include: front patio, private balcony, carpet, blinds, range, refrigerator, cable television, and Ethernet connections. The community offers free parking, bicycle racks, a laundry facility, picnic tables, a community room, and beautifully sculptured landscaping where the relaxed atmosphere of coastal living can be enjoyed.

Coast Apartments complex is designed to house graduate and medical students without children, and undergraduate couples. Residents must be enrolled full-time in a degree-granting program or Education Studies. Roommates must also meet these eligibility requirements.

Single Graduate Housing (On Campus)

Single Graduate Apartments (located on the Warren Campus) are designed to house single graduate and medical students without children. Residents must be enrolled full-time in a degree-granting graduate or medical course of study, or participating in Education Studies. Single Graduate Apartments all have four single bedrooms and a shared living room, dining room, kitchen, and bath area. Units are fully furnished with the exception of personal linen and cooking utensils. All utilities are included in the rental rate. All units have cable TV included at no extra charge and optional connections to the campus computer system for a fee. All spaces are available...
on a twelve-month lease. This is a nonsmoking facility.

NOTE: All policies and procedures concerning the operation of Associated Residential Community Housing, the eligibility for housing, and the application process are subject to change without notice.

For more detailed information on any of the above housing facilities and/or to apply, please visit our Web site: http://hds.ucsd.edu/housing/.

Recreation

RIMAC
Mail Code 0529
(858) 534-4037
http://recreation.ucsd.edu

Campus Recreation provides UC San Diego students with quality recreation programs. They are designed to meet leisure-time needs and interests through on-campus programs offering clubs, intramural sports, recreation classes, outings, and a myriad of activities and special event programming. Our goal is to provide opportunities promoting a lifetime of health-conscious options.

Facilities

- RIMAC with arena, gymnasium, weight room, racquetball and squash courts, and equipment room.
- Main and Recreation Gymnasium
- Main Gym Weight Room
- Indoor 25-Yard Natatorium Pool and Spa
- Outdoor 50-Meter Canyonview Pools and Spa
- Outback Indoor Climbing Center
- UCSD Challenge Course
- Tennis Courts
- Playing Fields
- Canyonview Weight Room
- Golf Driving Range
- Mission Bay Aquatics Center
- Spanos Training Facility with weight training equipment, martial arts studio, and trainers’ facility
- Running and Jogging Track
- Par Courses
- Sand Volleyball Courts
- Outback Adventures equipment rentals

- Outback Adventures Gear Shop, Price Center

Intramural Sports

Intramural Sports Program at UCSD is a balanced blend of team and individual sports activities that are designed to meet the diverse needs of the campus community. Sports offered include flag football, floor hockey, tennis, basketball, softball, soccer, bowling, volleyball, tube waterpolo, badminton, and dodgeball.

Recreation Clubs

Recreation Clubs are special-interest activity clubs open to the entire campus community. The clubs are designed to bring together people with common interests. Students may join or begin new recreation clubs and participate in the workouts, meetings, social gatherings, and special events that are part of the RecClub structure.

Sport Clubs

Sport Clubs are those teams that compete on an intercollegiate basis but without many of the restrictions of the formal Intercollegiate Athletic Teams. The clubs offer students the opportunity to become involved in somewhat less traditional competitive sports, while still enjoying the travel to and competition against other institutions. Teams include badminton, dance sport, dance team, triathlon, equestrian, waterski, cycling, lacrosse, sailing, surfing, rugby, alpine ski/snowboard racing, ice hockey, roller hockey, soccer, table tennis, volleyball, water polo, and ultimate disc.

Recreation Classes

Recreation classes provide students and the university community an opportunity for noncredit, nongraded instruction in a range of physical and leisure activities. The program includes professional instruction in everything from games (billiards to poker); aquatics (swimming, surfing, scuba diving); dance (ballet, ballroom, hip hop to tango); fitness (indoor cycling, cardio and conditioning, Pilates, weight training); martial arts (aikido, karate to tai chi); mind, body, spirit (meditation to yoga); sports (archery, fencing, gymnastics to tennis) and more.

Outback Adventures

Outback Adventures (outdoor recreation program) is a passport to adventure and the great outdoors. The program offers fun, full-service trips (transportation, meals, instruction, equipment) in backpacking, rock climbing, canoeing, kayaking, surfing, and other outdoor pursuits. The Outback Adventures director will also arrange customized trips. In addition, the program offers instructional workshops, a resource library of maps and park information, and a camping and outdoor equipment rental service that includes downhill skiing and snowboard equipment, camping equipment, and game equipment. Outback also runs the indoor climbing center, with facilities for beginning to advanced climbers, rentals, and instruction as well as the UCSD Challenge Course, offering leadership and team-building workshops.

Outback Adventures Gear shop, at the Price Center, offers outdoor gear (from backpacks to snowboards and surfboards) for rent and for sale.

Aquatics

UCSD Campus Recreation Aquatics encompasses a wide range of aquatic activities. Student users can participate in competitive and training programs in swimming and water polo. Masters Programs in swimming, running, and triathlon provide an intensive competitive and training experience. Special events scheduled throughout the year range from student social activities to international team competitions. Additionally, an extensive recreational lap swim program is maintained to accommodate daily users from the campus and community.

Informal Recreation

Informal recreation provides individuals and groups of students the opportunity to make use of any and all of the physical activity facilities at UCSD. From jogging on the par course to shooting hoops in the gym, or playing racquetball in RIMAC, "open rec" time allows students to develop their own leisure activities.

Mission Bay Aquatic Center

Located on Santa Clara Point in Mission Bay, this facility and its programs provide students with an exclusive opportunity to participate in all aspects of aquatic recreation. From highly structured classes to equipment rentals, MBAC is a “first class” operation. (858) 488-1036.

Personal Wellness

Our weight room and Personal Wellness programs offer free student small-group personal-wellness programs and personalized comprehensive fitness programs to sixty students each quarter. Other small-group programs, including Personal Athlete and Weight Loss Solutions, are also offered, as well as nutrition counseling, personal fitness assessments, personal training, and massage therapy.

Intercollegiate Athletics at UCSD

http://UCSDTritons.com

The UC San Diego Athletic Department sponsors a broad base of men’s and women’s intercollegiate sports, which promote the pursuit of excellence, strength of character, teamwork, ethical conduct, and diversity, as well as other less competitive sport teaches. UCSD has competed at the NCAA Division II level since 2000, and most teams now compete in the California Collegiate Athletic

Care, Inc. (AAAHIC). Our purpose is to promote
and preserve the health and well-being of all
registered students so that they may pursue their
academic goals. Our staff of physicians, nurse
practitioners, registered nurses, medical assistants,
health educators, and other medical profession-
als is committed to helping students maintain
healthy lifestyles. SHS is conveniently located
along Library Walk west of the Price Center and
south of Geisel Library. For more information
about our services, access our Web page at http://
studenthealth.ucsd.edu.

General medical appointments are provided
for a minimal fee to all registration-paying stu-
dents during the academic quarters. There is a $15
access fee for urgent care and first aid for students
enrolled in the Student Health Insurance Plan
(SHIP) and a $25 access fee for those not enrolled
in SHIP. Summer access to SHS is at no additional
charge for students enrolled in SHIP. Continuing
students not enrolled in SHIP are charged a sum-
er health fee to access Student Health Service.
Reduced fees are charged for pharmaceuti-
cals, contraceptives, travel immunizations,
and laboratory tests sent to our reference lab. If you
are enrolled in SHIP, many fees are covered. There
is a $15 co-payment for lab and a $25 co-payment
each for X-ray, specialty appointments, and
nutrition counseling for students without SHIP.
A vision clinic is available at modest fees and offers
eye glasses, designer frames, lenses, sunglasses,
contacts, and eye exams. Students enrolled in
SHIP are eligible for additional discounts.
Although undergraduate, graduate, medical,
and international students may have unlimited
visits with SHS, students requiring medical or
surgical care from practitioners, hospitals, or
clinics other than SHS should be prepared to assume
the cost of such care. SHIP provides benefits for
ambulance, emergency room, hospitalization,
most outpatient services, surgery, and major
medical expenses with a written SHS referral
(applies when the student is within a 100-mile radius
of UCSD; outside the 100-mile radius a referral
is not needed for services). SHIP also includes
benefits for a dental plan, pharmaceuticals, and
discounts at the SHS Vision Clinic. The cost for
SHIP is factored into grants, loans, and work-
study programs offered to students who receive
financial assistance. The fee for SHIP is paid by
the university for graduate and professional students
holding academic appointments of 25 percent
or more.

Students covered by private health insurance
that meets university waiver criteria can opt out of
SHIP by completing the waiver application online
through TritonLink prior to posted deadlines.
Waivers are processed each academic year. For
additional changes, requests, and information,
contact the Student Health Insurance office.
All registration-paying students are automatically
enrolled in SHIP unless approved for a health-fee
waiver. The campus-based insurance plans do
not replace the primary medical care and referral
services provided by the Student Health Service.

Brochures describing the Student Health
Insurance Plan, limitations, exclusions, and open
enrollment periods are available at Student Health
Service and through the SHS Web page at http://
studenthealth.ucsd.edu. The insurance coordina-
tors are available to assist students with any
questions at (858) 534-2124.

Student Legal Services
Student Services Center (SSC), Room 527
Mail Code 0034
(858) 534-4374
E-mail: sls@ucsd.edu
http://sls.ucsd.edu

Student Legal Services (SLS) provides free,
confidential counseling, education, and referrals
on all types of legal matters to registered
undergraduate, graduate, and professional UC
San Diego students and student organizations,
both individually and in group settings. SLS
offers weekly preventive legal education clinics
on landlord-tenant issues and other legal topics
throughout the year, as well as specially tailored
workshops by request for residential halls and
student groups. SLS operates the "Discover the
Law" program, consisting of a series of legal
education workshops in which participants may
earn a certificate of accomplishment. SLS also
sponsors the "Tax Outreach Program," in which
student volunteers are trained to promote access
to resources and assistance to taxpayers for filing
state and federal tax returns. Additionally, SLS
advises the on-campus pre-law chapter of Phi
Alpha Delta International legal fraternity and of-
fers student intern and mentoring opportunities.

Student Policies
and Judicial Affairs
Student Services Center (SSC), Room S10
Mail Code 0048
(858) 534-6225
http://ugr8.ucsd.edu/judicial

CAMPUS SERVICES AND FACILITIES
Student Policies and Judicial Affairs (SP&JA) consists of the administration of student judicial affairs, which includes campuswide coordination of student conduct, including graduate students, monitoring of compliance requirements, with applicable federal and state laws, and university policies and campus regulations, such as Right to Privacy as it affects students. In addition, the director also serves as the liaison to campus counsel and UC general counsel for Student Affairs and other student-related legal matters and policy questions, and provides advice and recommendations for their disposition. Other programs encompassed by SP&JA include the Office of Student Legal Services (SLS), Office of Student Conduct (OSC), and the Community Law Project (CLP).

Sexual Assault & Violence Prevention Resource Center

Fifth Floor, Student Services Center  
(858) 534-5793  
http://sarc.ucsd.edu  
E-mail: sarc@ucsd.edu

The Sexual Assault & Violence Prevention Resource Center (SARC), established in 1988, is the primary resource for educational programs on rape, sexual assault, and interpersonal violence prevention for UCSD students. SARC co-sponsors the R.A.D. (Rape Aggression Defense) self-defense workshops with the Police Department and the Women’s Center. In addition, SARC offers: (1) crisis intervention for student victims of rape, sexual assault, dating violence, and stalking, (2) accommodation through the police, hospital, and judicial process, and (3) confidential counseling for student victims, family, and friends. If a sex offense occurs, staff explains the victim’s options to report to law enforcement and/or student judicial affairs and to utilize other resources, i.e., medical assistance, campus and community counseling, and student services.

University Centers

The facilities, services, and programs of University Centers (Price Center and Student Center) at UC San Diego complement the teaching and research functions of the university. University Centers brings the campus community together through its many services and programs, enhancing the college experience outside the classroom or lab.

Price Center

Mail Code 0076  
Administration office: (858) 822-4987  
http://universitycenters.ucsd.edu

The recent expansion and renovation of Price Center has transformed the heart of campus and brings students, faculty, staff, and the entire university community together. One of two student unions on campus, Price Center is home to a variety of restaurants and services geared to the needs of students. The vibrant Plaza Food Court brings you quick-service standards including Subway, Rubio’s Baja Grill, Tacone Wraps, Panda Express, and Jamba Juice. You can also enjoy fresh tossed pizza and a pitcher of your favorite microbrew at Round Table Pizza, or pull up a seat at Shogun of La Jolla’s sushi bar. The Atrium Food Court boasts a variety of dining options including Bombay Coast Indian Tandoor & Curry Express, Burger King, Santorini Greek Island Grill, and Tapioca Express. Whether you’re looking for a place to meet friends, study, or relax, the options are almost limitless, especially with the addition of late-night dining and activities, and a twenty-four-hour zone. Comfortable lounges, study rooms, indoor and outdoor spaces, and inviting coffee shops invite you to relax and linger. When you need a break from studying, check out an up-and-coming performer at The Loft, a performance crossroads and social lounge, catch the latest blockbuster movie at the Dolby Digital sound-equipped movie theater, or play a few rounds of pool or videogames in the GameRoom. Fifteen state-of-the-art conference and meeting rooms are available for use by the campus community. Professional catering and high-tech audio and visual services can also be arranged. Two ballrooms and a dance studio allow for major exhibits, conferences, meetings, concerts, and dances throughout the year. Services and retail venues located in Price Center include ATMs, UCSD Bookstore, Imprints (a copy and technology center), UCSD Postal Center, a Ticketmaster outlet, flower stand, and a grocery market. Price Center is home to many student organizations and the One Stop, which makes it easy for student organizations to plan and implement events. With their offices in Price Center, Associated Students, Center for Student Involvement, Cross-Cultural Center, and UCSD Alumni Association bring a sense of community to the Price Center and provide the campus with a place to belong. In addition, Express to Success, Commuter Student Services, and University Events Office are all conveniently located at Price Center.

Student Center

Student Center  
Mail Code 0323  
Administration office: (858) 534-8929  
http://universitycenters.ucsd.edu

Nestled in a eucalyptus grove, the wood exterior of Student Center stands in contrast to the modern Jerusalem stone façade of Price Center. The casual atmosphere and unique blend of services make Student Center a special place. The main building is home to UCSD’s student cooperatives: The General Store, Groundwork Books, and the Food Co-op. UCSD’s The Guardian newspaper, KSDT radio station, and SRTV are located here along with several student organizations and alternative campus media. Student Center is a popular study spot with an inviting lounge and fireplace, comfortable outdoor study areas, TreeHouse Computer Lounge, and academic services such as A.S. Soft Reserves and A.S. Lecture Notes. The Women’s Center and LGBT Resource Center provide events, services, and special programs. There are also conference/meeting rooms, three ATMs, and the UCSD BikeShop, which sells, repairs, and maintains bikes and bike accessories. Next to the main building is The Stage at the Pub where dances, concerts, and many other events occur. The Stage is connected to Porter’s Pub, which serves lunch, dinner, and microbrew beer. Students, faculty, staff, alumni, and community members learn the art of neon, pottery, glass blowing, and other crafts in classes offered at the Crafts Center. Nearby, specialty coffees, light cuisine, and an occasional musical performance are served up in the patio setting of the Grove Cafe, one of the most serene places on campus. Just south of the Student Center on the Revelle campus is the Ché Café. The Ché is a student-run cooperative serving a vegan menu at very affordable prices and is home to a variety of all-ages concerts, lectures, and performances.

Student Information Center (EDNA)

Price Center  
Mail Code 0076  
Administration Office: (858) 534-3362 (EDNA)  
http://universitycenters.ucsd.edu

Located in Price Center East Atrium, adjacent to the north entrance, EDNA Information Services assists the campus community by providing information and a variety of other services benefiting the students, faculty, and the general public.

Center for Student Involvement

Price Center East, Level 3  
Mail Code 0078  
(858) 534-0501  
http://getinvolved.ucsd.edu

The Center for Student Involvement strongly supports the notion that the university must provide learning experiences for students both within and outside the classroom. Volunteering in the community and participating in leadership workshops, seminars, conferences, and in any of more than 400 student organizations are integral parts of the university experience. With so many organizations and activities to choose from, there is bound to be something that sparks individual interest. If not, students can start their own organization. Registration for student organizations begins in the fall and continues throughout the academic year, and the advisors can assist with selecting an organization or with starting one.

In addition, leadership seminars are organized to help strengthen the leadership potential of students. Listed below are some of the training programs scheduled each year:
Improving interpersonal skills
Public relations
Interviewing techniques
Fund raising
Team building
Running effective meetings
Time management
Careers in student affairs
Budget management
Motivation
Stress management
Ethics
Publicity/advertising
Recruiting volunteers
Diversity

We invite students to stop by the Center for Student Involvement on Level 3 of Price Center East to learn more about student organizations, Greek life, community service, and leadership opportunities!

Student Governments

Associated Students
Fourth Floor, Price Center
Mail Code 0077
AS: (858) 822-3553
Hours: 8:00 a.m.–4:30 p.m. Monday–Friday
http://as.ucsd.edu

Graduate Student Association
Student Center A
First Floor, Room 132
Mail Code 0353
GSA: (858) 534-6504
Hours: 9:00 a.m.–5:00 p.m., Monday–Friday
http://gsa.ucsd.edu

The Associated Students (AS) and the Graduate Student Association (GSA) provide students with practical leadership experience in the areas of programming, financial planning, lobbying, and in the development of programs and services that are designed to meet the students’ needs. The Associated Students (AS) operates AS Lecture Notes, AS Soft Reserves, AS Challenge Course, AS Volunteer Connection, AS Undergraduate Scholarly Grants, AS Safe Ride, AS Academic Success Program, AS SRTV, KS DT Radio, Grove Caffe, and the Holiday Airport Shuttle. The AS has an official liaison with the AS Student Initiated Outreach and Recruitment Commission (SIORC), AS Alliance, AS Women’s Commission, AS Triton Tide, All-Campus Commuter Board, and the AS All-Campus Transfer Student Association. The AS also sponsors a wide variety of programming events including speakers, concerts, and festivals.

The GSA takes a proactive stance on graduate concerns in the areas of housing, TA/RA work-related issues, mandatory health insurance, student fees, and legislative issues. The Student Government staff works with the AS and the GSA in providing logistical, accounting, and programmatic advice.

The AS and GSA both have opportunities for student involvement. They appoint students to various campuswide committees, some of which include topics in transportation, admissions, TA development, and student judicial/hearing boards. For a complete listing, see the respective Web sites. Additionally, both AS and GSA provide funding opportunities for student groups.

The student leaders and staff of the AS, the GSA, and the Student Government Services office encourage you to get involved and take part in the many leadership opportunities available at UCSD.

University Events Office

Mail Code 0077
(858) 534-4090
http://ueo.ucsd.edu

The University Events Office (UEO) is a multifaceted professional arts and events organization of UC San Diego with an outstanding reputation for bringing national and internationally recognized artists to the campus and local community. Our performances and events offer exceptional opportunities for discovery and participation in a variety of artistic disciplines that reflect our culture and challenge our understanding of the world. The University Events Office programs and services include:

- ArtPower! at UC San Diego featuring music, dance, film, and spoken word
- The Loft performance lounge
- University-wide cultural celebrations
- UCSD Box Office
- Concert and event planning
- A.S. programming advising/event management
- Campus performance agreement management
- Campus music licensing

As a central campus resource for events, UEO serves as the advisor to the Associated Students (AS) Programming Office. UEO also advises campus event planners on budgeting, marketing, negotiation, and contracting, and provides production planning and technical assistance for major campus events.

The University Events Office is a department of Student Affairs.

ArtPower! at UC San Diego

Mail Code 0077
(858) 534-TIXS
http://artpower.ucsd.edu

ArtPower! at UC San Diego builds creative experiences in music, dance, film, exhibition, and food for our collective pleasure and inspiration. We engage diverse audiences through vibrant, challenging, multidisciplinary performances by emerging and renowned international artists. Through extensive partnerships, ArtPower! provides exciting opportunities for research, participation, and creation of new work, igniting powerful dialogue between artists, students, scholars, and the community.

Performing Arts

The university’s critically acclaimed performing arts season features artists of national and international renown in music, dance, and spoken word. Performances by Batsheva Dance Company, Pacifica Quartet, Emerson String Quartet, and Laurie Anderson have provided art power to UCSD.

Film

The ArtPower! film is an eclectic mix of film experiences that challenges and inspires audiences to explore film-going in a whole new way by focusing on interaction with innovative filmmakers, preshow music, film and food pairings, outdoor screenings, and much more.

ArtPower! is a program of the University Events Office.

The Loft at UC San Diego

Mail Code 0077
(858) 534-TIXS
http://theloft.ucsd.edu

The Loft at UC San Diego is a performance lounge and social crossroads where emerging art and pop culture collide. The Loft is an experiment and platform for innovative, left-brained UCSD students and artists. We fuse tastes, visuals, sound, and performance in an ever-changing experience. The Loft favors self-will, contrast, and alternative culture, intends to create good food, art, and nightlife for our collective pleasure and inspiration.

The Loft is a program of the University Events Office.

UCSD Box Office

Mail Code 0078
(858) 534-TIXS
http://boxoffice.ucsd.edu

The UCSD Box Office provides the UCSD and San Diego communities with full-service ticketing to arts and entertainment events on and off campus. Tickets to ArtPower! performances, rock/pop concerts, amusement park tickets, and a host of other activities are available for purchase at the Box Office in person, by phone, or online.

The UCSD Box Office is a program of the University Events Office.

Veterans Affairs

Located in the Financial Aid Office
Student Services Center, Third Floor North
Mail Code 0013
Eligibility

The following persons may be eligible for veterans’ educational benefits:

**Chapter 30**
Persons who entered active duty for the first time after June 30, 1985, and served continuously for three years.

**Chapter 31**
Persons who have a service-connected disability.

**Chapter 33**
Persons who served at least ninety days on active duty after September 10, 2001, and are still on active duty or were honorably discharged.

**Chapter 1606**
Persons who have a six-year obligation to serve in the Selected Reserve signed after June 30, 1985.

**Chapter 1607 or Reserve Educational Assistance Program (REAP)**
A new education benefit available to certain reservists who were activated for at least ninety days on or after September 11, 2001.

**College Fee Waiver**
California Veterans’ Dependents College Fee Waiver Program: A student who is the child of a deceased veteran or veteran with a service-connected disability may receive a waiver of the state-mandated registration and educational fees. Eligibility is determined by individual county Veterans’ Services Offices.

**VA Contact Information**

**Chaper Benefits:** Forms and application information are available on our Web site. For more eligibility information, to obtain an application online, or to locate your county’s Veterans Services Office, go to http://www.gibill.va.gov/.

**College Fee Waiver:** For eligibility information, obtain an application online, or to locate your county’s Veterans Services Office, go to http://www.cavcso.org/.

**Other Services and Programs**

**UCSD Alumni Association**
Price Center East, Third Floor
Mail Code 0083
(858) 534-3900
E-mail: alumni@ucsd.edu
http://www.alumni.ucsd.edu

Established in 1964 by a group of dedicated graduates, the UCSD Alumni Association has grown to represent more than 127,000 alumni worldwide. The Alumni Association’s mission is to foster a lifelong, mutually beneficial relationship of alumni and students with the university. To that end, the Alumni Association works to provide alumni with continued access to the resources of the university, to communicate UC San Diego news and happenings, and facilitate a dynamic network for alumni and student interaction through a rich variety of educational, career, and social programs and events.

Highlighting the Alumni Association’s annual programming calendar are three signature events: Homecoming in October, Young Alumni Reunion in February, and Alumni Weekend in June. Additionally, the Alumni Association hosts such ongoing programs as UCSD Near You, which brings the university’s outstanding faculty and alumni together with fellow graduates, parents, and friends across the country; regional alumni chapter events; Career Networking Nights; and a host of other opportunities to help tap into the Triton alumni network.

The Alumni Association awards undergraduate scholarships, assists the university with legislative advocacy, and recognizes outstanding alumni, faculty, and students at the annual Alumni Awards for Excellence ceremony. The Alumni Association also publishes its award-winning magazine, @UCSD, three times a year and the CampusLoop e-newsletter monthly. It also hosts an active online community through numerous social and professional networking communities.

The Alumni Association provides current students access to the alumni network as a resource for career, social, and community connections through such programs as Student Achievement Guided by Alumni (SAGA), a leadership development and mentoring program; the UCSD Student Foundation, an organization dedicated to promoting student philanthropy; and the Order of the Tritons, a group of volunteer student ambassadors for campus and alumni events. In addition, the Alumni Association provides financial support for student organizations and activities.

UCSD students and graduates who are members of the Alumni Association receive access to numerous benefits and campus discounts, networking and volunteer opportunities, educational travel programs, a subscription to all alumni publications, and special member rates for campus, UC San Diego Extension, and community activities.

A majority of the staff is represented by UCSD alumni who take great pride in serving as the guardians of tradition and providing fellow alumni with opportunities for continued engagement with the university through leadership, advocacy, service, and philanthropy.

**Art Galleries**

**University Art Gallery**
Mandeville Center, Room 101
Mail Code 0327
(858) 534-2107
http://uag.ucsd.edu

The University Art Gallery presents exhibitions that integrate contemporary art into the life of the university; exhibits and interprets art as an educational resource for the academic community; and serves as a laboratory for linking visual art with the issues of postmodern society, as an innovator in originating and shaping the contemporary arts agenda, and as a platform for the advancement and outreach of the university in visual arts creativity.

Gallery hours are from 11:00 a.m. to 5:00 p.m., Tuesday through Sunday. The gallery is closed Mondays and university holidays. There is no admission charge.

**Mandeville Annex Gallery**
Mandeville Center, Room B-118
Mail Code 0327
(858) 534-2107
http://uag.ucsd.edu

The Mandeville Annex Gallery is for Visual Arts undergraduate art exhibitions. A new exhibition is mounted each week of the quarter except during summer. Included in the exhibition schedule are individual, group, and class shows. Gallery hours are from 12:00 noon to 5:00 p.m., Monday through Friday. There is no admission charge.

**Visual Arts Graduate Gallery**
Visual Arts Facility, Room 309
Mail Code 0084
http://visarts.ucsd.edu

The six-building complex houses the Visual Arts Graduate Gallery. First-year review shows and M.F.A. exhibitions are mounted each week of the quarter except during summer. Gallery hours are from 12:00 noon to 5:00 p.m., Monday through Friday. There is no admission charge.

**Child Development Center**
Mail Code 0962
(858) 552-2500
http://child.ucsd.edu
The UCSD Early Childhood Education Center (ECEC) serves the children of students, staff, faculty, and the community at large. Age requirements are three months old through kindergartens. State subsidy is available for income-eligible staff and full-time students on a limited basis. Only full-time enrollment is offered, 7:30 a.m. to 5:00 p.m., Monday through Friday. Breakfast, lunch, and afternoon snack are included in the cost. For further information or a visit, call ECEC’s Main office at (858) 246-0900 between 7:30 a.m. and 5:00 p.m.

UC San Diego offers part-time child care to UCSD affiliates at the Mesa Child Care Center. The center offers two half-day sessions on weekdays: morning (8:00 a.m. to 12:00 noon) or afternoon (1:00 to 5:00 p.m.). Age requirements are two-and-a-half to five years old. For further information or a visit, call ECEC’s Main office at (858) 246-0900 between 7:30 a.m. and 5:00 p.m.

As an alternative, the Infant Toddler Referral Program aids campus families in locating licensed home-care providers for children from six weeks through preschool ages. For assistance, call (858) 246-0900 during office hours or leave a recorded message for a return call.

Crafts Center

Mail Code 0338
(858) 534-2021
http://www.crafts.ucsd.edu

Located in the center of the campus, the Crafts Center offers studio and art/crafts instructional facilities in ceramics, photography, jewelry, drawing, neon, glassblowing, and other crafts. The center provides personal enrichment and creative educational opportunities to individuals wishing to develop artistic skills in an active studio-classroom situation.

The Grove Gallery is a part of the center, and offers ongoing exhibits of contemporary crafts and ethnic arts. The Grove Gallery Store sells an international selection of handmade crafts and other decorative accessories.

Registration for Crafts Center activities takes place the first week of every quarter at the center. Specific classes, schedules, and course fees information can be obtained by calling (858) 534-2021 or http://www.crafts.ucsd.edu.

UCSD Cross-Cultural Center

Mail Code 0053
Second Floor, Price Center East
(858) 534-9689,
Fax: (858) 822-0173
E-mail: ccccenter@ucsd.edu
http://ccc.ucsd.edu

Established in May of 1995, the UCSD Cross-cultural Center (CCC) functions as a campus community center committed to creating space for dialogue while also maintaining an environment conducive to the recruitment and retention of students, staff, and faculty from underrepresented backgrounds.

The CCC offers programs and services specifically designed to reflect UCSD’s commitment to excellence, scholarship, and community through cross-cultural interactions. The center’s focus areas include: faculty, staff, and student exchanges, educational materials and resources, student outreach and retention activities, speakers, film series, community outreach, support and discussion groups, and leadership development.

Imprints

http://imprints.ucsd.edu

UC San Diego Print and Document Services

Four locations on campus provide self-serve copies, full-color copies, fax service, posters, supplies, laminating, large-format banners and signs, plus a large variety of other printing and binding services. In addition to standard services, computer workstations are available on a rental basis with both black-and-white and color laser printer options. Self-serve photo printing and passport photo service are available at select Imprints locations. Extended hours are available throughout the year at Price Center Imprints.

Campus Locations:
• Campus Services Complex, Building A, (858) 534-3020
• Geisel Library, Main Floor (858) 534-2534
• Price Center, Upper Level (858) 822-4422
  (open evenings and weekends)
• Student Services Center, Ground Level (858) 534-7050

Triton Cash, Library photocopy card, cash, and check payment accepted. Visa and MasterCard accepted at Price Center, Student Services Center, and Geisel Library locations.

Transportation Services

Located in the Gilman Parking Structure
Mail Code 0040
(858) 534-4223
http://parking.ucsd.edu

Transportation Services sponsors a variety of programs and services to help students living at UC San Diego without cars. An extensive free shuttle network covers the campus and serves several off-campus locations. For students traveling during breaks, Transportation Services offers free holiday shuttle service to the airport. For information, route maps, or schedules, visit http://parking.ucsd.edu or call (858) 534-RIDE.

Transportation Services offers several money-saving alternative transportation programs for commuting students. Carpool, vanpool, rail, bicycle, and free transit programs feature additional incentives, including limited free emergency rides home and complimentary parking. For program details, call Commute Solutions at (858) 534-RIDE.

If you choose to bring a car to campus, be aware that a parking permit is required on UCSD property on weekdays, 7:00 a.m. to 11:00 p.m., unless otherwise posted. Parking permits can be purchased online by accessing TritonLink or at the Parking Office, (858) 534-4223.

Student spaces are designated by yellow squares; student “S” parking permits are valid in these yellow spaces at all times. After 4:30 p.m. weekdays, all UCSD permits are upgraded and become valid in spaces marked with green “B” or red “A” squares, and no fee is required at metered spaces. Permits are not required on campus Saturday and Sunday, unless otherwise posted.

Student permits are never valid in spaces marked “A” Permit Required, 24 Hours a Day, 7 Days a Week, or in any other 7/24 parking space.

Transportation Services offers a free Motorist Assistance Program, which provides battery jumps, lockout assistance, flat tire inflation, or gas for drivers stranded on campus. For assistance, call (858) 534-8108.

If you have questions about Transportation Services, purchasing a permit, or parking at UCSD, please call (858) 534-4223, visit http://parking.ucsd.edu, or stop by the Parking Office, located in the Gilman Parking Structure (entrance on Russell Lane).

Student Mail Services

Campus Services Complex, Bldg. A
Mail Code 0047
(858) 534-7098

The Student Mail Services provides Monday through Friday distribution of mail to resident students during the academic year. Hours of operation are 8:00 a.m. to 4:00 p.m. Stamps and various other U.S. Postal commodities can be purchased.

The UCSD Bookstore

http://bookstore.ucsd.edu

Located in the Price Center Complex
9500 Gilman Drive
La Jolla, CA 92093-0008

Monday–Friday 8:00 a.m.–6:00 p.m.
Saturday and Sunday noon–5:00 p.m.

For holidays, summer hours, and extended hours at the beginning of each quarter, please see: http://bookstore.ucsd.edu/hours.htm

All numbers area code 858

General Information ...............534-READ (7323)
Birch Aquarium Bookshop ..............534-8753
Faculty should submit their adoptions before ucsd.edu/books/textbooks/coursematerials.htm. through the various academic departments, or can submit adoptions directly to the Course (“adoptions”) for the upcoming quarter. Faculty to faculty requesting course materials information index.htm. The look-up/purchase feature is activated for each term. For graduate books online. Located on our web site, this feature is for in-store pickup only. Extension books can also be ordered online at http://bookstore.ucsd.edu/books/extension/index.htm. Extension course materials ordered via the Web may be shipped, held for pick-up inside the Bookstore, or delivered for pick-up at the Mission Valley, North County, and Sorrento Mesa Extension centers.

Online Look-Up
Undergraduate, graduate, and Extension course materials lists, along with prices and availability, may be viewed online the same day they are entered into the Bookstore's database once the feature is activated for each term. For graduate and undergraduate classes, within the Schedule of Classes on UCSD's TritonLink, click on the red book icon for the desired section. For Extension course materials lists, use the look-up/purchase feature at http://bookstore.ucsd.edu/books/extension/index.htm.

Faculty
Each quarter, the UCSD Bookstore sends a memo to faculty requesting course materials information ("adoptions") for the upcoming quarter. Faculty can submit adoptions directly to the Course Materials Department at the UCSD Bookstore, through the various academic departments, or via the Bookstore's Web site at http://bookstore.ucsd.edu/books/textbooks/coursematerials.htm. Faculty should submit their adoptions before the quarterly deadline to ensure that the course materials can be stocked before classes begin. Information about and links to other campus instructional support services (library eReserves, course Web pages, AS Soft Reserves, Imprints, etc.), are at http://coursematerials.ucsd.edu/.

Textbook Reservation Service (TRS)
At the beginning of every fall quarter, the UCSD Bookstore offers a convenient and free textbook reservation service (TRS). Beginning mid-June, students can submit reservations via the Bookstore's Web site at http://bookstore.ucsd.edu/trs.

Custom Course Materials
As part of the UCSD Bookstore's mission to serve the UCSD community as an essential academic resource, the course materials department provides custom-printed course materials, including course readers, out-of-print and out-of-stock books, journal and newspaper articles, syllabi, anthologies, lab manuals, and original works. To ensure compliance with legal requirements involving reproduced printed materials, the Bookstore secures all necessary copyright permissions. Faculty should submit adoptions for custom-printed materials along with their other adoption requests.

Digital Course Content
Acting in concert with other instructional support departments on campus, the Bookstore can assist faculty in locating digital materials and making them available to UCSD students.

Textbook Buy-Back
During the first week and finals week of each quarter, the UCSD Bookstore provides a buy-back service allowing students to sell their textbooks for cash. If a title is being used in the upcoming term, students may receive up to half the new price of the book.

Book Information
The book information department's experienced staff of booksellers can help find just the right book from among the impressive selection of general, technical, scientific, and medical books stocked at the UCSD Bookstore. Booksellers can also research any title that is in print in the United States by accessing databases that contain information on hundreds of thousands of additional titles. They are happy to special order books that are not available in the store and receive them quickly too. Ask about rush order service. In addition to offering in-store service, booksellers take orders and answer inquiries via phone, fax, and e-mail and can assist with searching for books and placing orders on their Web site: http://bookstore.ucsd.edu, which shows availability of more than 140,000 titles contained in their database. To search for and order from more titles, the Bookstore offers two additional Web sites: BookSense, for trade and technical books and the UCSD medical Web store for medical books (http://webmedbooks.com/ucsd).

General, Scientific, and Technical Books
The general, scientific, and technical department contains books from hundreds of different publishers. To support the academic mission of the university, a wide array of academic disciplines in the arts and humanities, social sciences, languages, mathematics, science, and engineering are represented. Strong general interest sections in categories such as fiction, travel, reference, and children's books complete the selection. Find excellent values in the bargain books section and on discounted bestsellers. All regularly priced general, scientific, and technical books are discounted 10 percent during “Happy Hours” from 4:00 p.m. close every Wednesday. Check availability of titles in the store online at http://bookstore.ucsd.edu. The home page provides the opportunity to order any title that is still in print, and explore their partner stores, BookSense for trade and technical books, and the UCSD Medical Web store for discounted medical books.

Medical Books and Instruments
The UCSD Bookstore is proud of its partnership with the medical community at the university and in the San Diego area. It has long been recognized as the primary resource for an up-to-date, comprehensive selection of medical books and instruments. In the store, find medical textbooks for the UCSD School of Medicine and UCSD School of Pharmacy along with more than 5,500 reference titles in nearly one hundred medical categories. A large selection of medical instruments is available along with lab coats, clinical jackets, scrubs, and unique medical gift items. All regularly priced medical books and instruments are discounted 5 percent during “Happy Hours” from 4:00 p.m.–close every Wednesday. For a larger selection of medical titles, search the UCSD Medical Web store accessed from the home page (http://webmedbooks.com/ucsd). This Web site features more than 90,000 titles and offers up to a 5 percent discount on medical and nursing books as well as medical supplies and instruments.

Faculty Authored Books
The UCSD Bookstore is pleased to display and sell recent publications authored by UCSD faculty. Inside the bookstore find books shelved in a special Faculty Author section and in the categori- section that applies. Look for a selection of recently published titles on display at the Faculty Club. Faculty members with a new book they would like the UCSD Bookstore to stock should contact the store using one of these methods: (858) 534-3149; (800) 520-7323; http://bookstore.ucsd.edu/friends/faculty/authorequestform.htm.
Gifts and Clothing
Visit the gifts and clothing department and discover an exciting selection of UCSD insignia merchandise, as well as seasonal, trendy, and everyday clothing and gift merchandise. You can shop for bath and body products as well as home décor, jewelry, and sandals. While in the store or online, check out the alumni, parent, and graduation sections. In-store events for this department include the spring break sale, grad fair, and holiday sale, all of which bring a mini mall shopping experience to campus. Shop online: http://bookstore.ucsd.edu/clothing, or call to find out about the latest arrivals, custom insignia orders, and quantity discounts (800) 520-7323 (READ).

Supplies: School, Art, Office, and Residence Halls
The bookstore caters to UCSD’s office, school, art, and residence hall supply needs as well as professor required art, engineering, and lab supplies. Students living in the residence halls have a selection of linens, towels, shower caddies, picture hangers, trash cans, white/cork boards, extension cords, T.V. cables, batteries, and much more to get their rooms set up in style. Call (858) 534-3786 for a copy of the Super Catalog featuring over 30,000 office, art, school, and residence hall supplies. Special orders are easy to place and usually arrive within one to two days. For some of the most common supplies, shop online: http://bookstore.ucsd.edu/supplies. Custom orders and quantity discounts are available.

Electronics
Brand name calculators, CD players, and voice recorders such as Hewlett Packard, Texas Instruments, Sharp, Sony, and Panasonic are always in stock at the bookstore. This department is full of fun and useful gadgets and accessories.

Computers
The extremely knowledgeable staff of the UCSD Bookstore Computer Store is available to assist you with information regarding the latest in Apple, Dell, Sony, Lenovo, and Toshiba computers and accessories, as well as monitors, printers, projectors, digital cameras, peripherals, and supplies. Educational pricing is offered for full-time UCSD students, extension students (certificate courses), faculty, and staff. They provide Macintosh and Windows software licensing. Special orders are encouraged for products that are not in stock. Visit their extensive Web site http://bookstore.ucsd.edu/computers or call (858) 534-4291.

Computer Repair
The UCSD Bookstore Computer Store works in conjunction with UCSD Academic Computing Services to provide authorized in-warranty repair for Apple, Dell, and Lenovo computers. The bookstore is a convenient drop-off point offering extended and weekend hours. They also repair most out-of-warranty computers. They do not repair out-of-warranty monitors. The average repair time is ten working days.

Special Orders
Books, gifts, clothing, office and art supplies, medical instruments, computer hardware and software can be special ordered at any time. Call us to request a personal shopper (858) 534-7323 (READ).

Birch Aquarium at Scripps Bookshop
2300 Expedition Way
La Jolla, CA 92039-0207
Monday–Sunday 9:30 a.m.–5:00 p.m.
(858) 534-8753
(Closed Thanksgiving Day, Christmas Day, and New Year’s Day)
The Aquarium Book and Gift Shop has been operated by the UCSD Bookstore since August 1994. Its goal is to support the education and community service missions of the Scripps Institution of Oceanography and the Birch Aquarium at Scripps. The bookshop has an exciting selection of educational books concerning the geological, biological, and physical sciences and how they interact with the sea. A dazzling variety of children’s books and educational toys are available to children of all ages who have interest in the ocean and its marine life. Other popular items are guides to scuba diving and snorkeling, tide pool guides, San Diego tourist guides, and maps. The bookshop’s selection of souvenirs and gifts is fun-loving with a wide-ranging selection of T-shirts, sweatshirts, postcards, calendars, DVDs, stuffed animals, jewelry, and lots more. Visit the Web store at http://bookstore.ucsd.edu/aquarium.

Sunshine Market
Monday–Friday 7:00 a.m.–9:00 p.m.
Saturday 9:00 a.m.–7:00 p.m.
Most Sundays 11:00 a.m.–7:00 p.m.
Visit the Sunshine Market for all your favorite groceries including frozen, microwavable, and packaged meals, hot soups, hot dogs, snacks, soda, fresh sandwiches and salads, juice, coffee, tea, ice cream, sandwiches, donuts, candy, international foods and snacks, health and personal products, cleaning supplies, and household essentials. The Sunshine Market stocks fresh fruit and vegetables as well as a large selection of organic and fair-trade products. On-site digital film development is available as well. Join the Coffee Club (buy ten cups, get the eleventh cup free)! You may purchase scantrons, blue books, batteries, daily newspapers, and munchies when everything else is closed on campus. Established in April 1979 as an auxiliary operation of the UCSD Bookstore, the Sunshine Market is located in the Price Center east, atrium, level 1.

Perks Coffee Shop
Monday–Thursday 7:00 a.m.–7:00 p.m.
Friday 7:00 a.m.–6:00 p.m.
Saturday and Sunday noon–5:00 p.m.
During your visits to Perks you’ll find a full espresso and drip menu serving Barefoot Roasters Artesian coffee which is 100% organic and fairly traded. They serve up all your other favorite beverages along with a delicious assortment of pastries, cookies, muffins, daily soup specials, organic sandwiches, salads, and wraps. Join the Coffee Club (buy ten cups, get the eleventh cup free)! Opened in July of 2007, Perks is located inside the UCSD Bookstore on the ground floor off of Lyman Lane and across from the administration complex. Perks offers comfortable outdoor seating under the trees and inside near their fireplace lounge. Books and a magazine/newsstand complete this cozy, home-away-from-home space where you may “Relax.Connect.Caffeinate.Repeat” with your friends, family, and colleagues.

Return/Refund Policy
The UCSD Bookstore strives for complete customer satisfaction. Should any product you select from the UCSD Bookstore fail to meet your expectations, they will respond to your concern and assist you in an exchange, refund, or credit whenever possible within the guidelines that apply to their specific merchandise categories.
• All categories of refundable merchandise require an original receipt to obtain a refund.
• Undergraduate, graduate, Extension, School of Medicine, and Skaggs School of Pharmacy and Pharmaceutical Sciences course materials must meet the conditions and timeframes printed on the reverse side of the receipt.
• General interest, technical, and medical books may be returned for refund, exchange, or credit within fourteen days if they are in resalable condition and are among the titles currently carried in the UCSD Bookstore.
• NON-RETURNABLE ITEMS: Medical instruments, medical and other testing books (MDTEST and REFEXM), magazines, clearance books and merchandise, bargain books, greeting cards, food and drink, health and beauty products, plants, rain gear, parking permits, phone cards, and undergarments; course materials with broken software seals and/or exposed access codes, opened materials designated with an X before the title, School of Medicine and Skaggs School of Pharmacy and Pharmaceutical Sciences syllabi, and all mini-block materials.
• Computer hardware and software refund policies are available in the Computer Store.
• Clothing, gifts, school and office supplies may be returned for refund within 14 days of purchase. Items can be exchanged or returned
for store credit if the items are in resalable condition with original packaging and/or tags.

- For Supply Department electronics, original packaging and cash register receipt are required for refund or exchange. Calculators and voice recorders may be returned for full refund or store credit within fourteen days of purchase if they are unopened and in resalable condition. Refunds will not be given for opened calculators or voice recorders. Exceptions: Defective calculators or voice recorders may be exchanged for same or upgraded model within fourteen days of purchase. Defective merchandise is subject to inspection by bookstore staff.

**UCSD Postal Center**

Price Center East, Room 1502
Mail Code 0047
(858) 822-0669

The Price Center Postal Center is a retail operation operated by the university. Stamps and mailing supplies may be purchased and mailed at this location. Shipping services and private mail boxes for rent are also available. The hours of operation during the academic year are Monday to Friday, 8:30 a.m. to 6:00 p.m., and Saturdays, 9:00 a.m. to 2:00 p.m.

**University Police Department**

Campus Services Complex, Bldg. B
Mail Code 0017
EMERGENCY, DIAL 9-1-1 or (858) 534-4357
Business, (858) 534-4357
http://police.ucsd.edu

The UCSD Police Department protects life and property through the enforcement of local, state, and federal laws. The police department strives for a safe campus environment, where the educational and research pursuits of the university can be realized.

The Police Department provides continuous twenty-four-hour-a-day police patrol to protect the campus community, along with the dispatching of emergency fire and ambulance services.

In addition, student residential areas are provided with additional security with on-site residential security officers (RSOs) during the evening and early morning hours.

**Clery Campus Crime Report**

For information concerning campus crime statistics, crime reporting, policies and practices pertaining to campus security, and/or crime prevention tips, please visit the UCSD Police Department’s Web site—Crime/Victim Information located at http://www.police.ucsd.edu.

**Crime Prevention Program**

(858) 534-3644

The Police Department’s Crime Prevention Program offers a variety of information to the campus community on crime prevention methods. Pamphlets and informative seminars are available.

**Community Service Officer Program**

(858) 534-9255

CSOs are students employed by the UCSD Police Department. They provide a variety of services related to crime prevention and campus safety. One of the services is the safety ESCORT program, which is available every evening from 5:00 p.m. to 1:00 a.m. They also provide security for campus events and facilities. For more information contact the program coordinator at (858) 822-1130.

**Lost and Found**

(858) 534-4361

The Police Department serves as a central repository for lost and found articles. Lost and found items should be taken to the police station. The station is open twenty-four hours daily, p.m., and Saturdays, 9:00 a.m. to 2:00 p.m.
Research at UC San Diego

Organized Research Units (ORUs) are academic units the University of California has established to provide a supportive infrastructure for interdisciplinary research complementary to the academic goals of departments of instruction and research. The functions of ORUs are to facilitate research and research collaborations; disseminate research results through research conferences, meetings, and other activities; strengthen graduate and undergraduate education by providing students with training opportunities and access to facilities; seek extramural research funds; and carry out university and public service programs related to ORUs' research expertise. The senior staff of these units are faculty members in related academic departments. Institutes and centers currently in operation at UC San Diego are described below.

In addition, the university is formally and informally affiliated with various private research organizations such as the Institute of the Americas, the Salk Institute for Biological Studies, Howard Hughes Medical Institute, Ludwig Institute for Cancer Research, and the Burnham Institute.

University-wide Institutes/ Organized Research Units

The Institute of Geophysics and Planetary Physics (IGPP) was established in 1960 and named the Cecil H. and Ida M. Green IGPP in 1994. It is a multicampus research unit of the University of California, headquartered at UC Riverside, with branches at UCSD, UCI, UCLA, UCSC, as well as Los Alamos and Lawrence Livermore National Laboratories. The present facility includes the Roger and Ellen Revelle Laboratory and the Judith and Walter Munk Laboratory. Present research concentrates on the study of crustal dynamics by measurements of gravity, tilt, displacement, and strain in both continental and oceanic environments; of regional seismicity and linear and nonlinear earthquake and explosion source mechanisms; of the variability of the Earth's geomagnetic field and its generation by the geodynamo; of the spherical and aspherical structure of the Earth by measurements of free oscillations, surface waves, and travel times; of seafloor tectonics using marine geophysical methods; of linear and nonlinear theoretical and computational fluid dynamics; of the variable mesoscale structure of the oceans and global ocean warming by acoustic tomography; of the structure of the oceanic crust and lithosphere by seismic and electromagnetic measurements on the ocean bottom and at the ocean's surface through seismic multichannel methods; of sea-floor and planetary topography and gravity using satellite methods; of nonlinear dynamics applied to geomorphology; and of tides, waves, turbulence, and circulation in the oceans; of surface change caused by tectonic activity, or climate change using satellite Interferometric Synthetic Aperture Radar (InSAR), as well as airborne and spaceborne laser altimetry. The institute operates a global network of some forty broadband seismometers, the IDA (International Deployment of Accelerometers) Array, with ten of these stations in the former Soviet Union, which are telemetered by satellite to the institute; a crustal strain and seismic observatory at the Cecil and Ida Green Pifion Flat Observatory near Palm Springs; a scientific wireless network in California with SDSC, the High Performance Wireless Research and Education Network (HPWREN); a southern California network of Global Positioning System (GPS) satellite geodetic sites operated by the Scripps Orbit and Permanent Array Center (SOPAC) and the California Spatial Reference Center (CSRC); an acoustic network in the Pacific for measuring ocean temperature variability; a modern 3D data visualization facility; a 5m, X-band satellite receiving antenna for satellite remote sensing; a national Ocean Bottom Seismograph Instrument Pool (OBSIP); and telemetered seismic arrays in Kirghizia, and two locations in California. The institute does not grant degrees, but makes its facilities available to graduate students from various departments who have chosen to write their dissertations on geophysical problems. Undergraduate students are involved in independent research projects and as laboratory assistants. Members of the institute staff now hold joint appointments with the Departments of the Scripps Institution of Oceanography and Mechanical and Aerospace Engineering. Support for visiting scholars and grant matching funds is provided through an endowment to the Cecil and Ida Green Foundation for the Earth Sciences.

The University of California Institute on Global Conflict and Cooperation (IGCC) is a multicampus research unit serving all ten UC campuses and the UC-managed Lawrence Berkeley, Lawrence Livermore, and Los Alamos National Laboratories. IGCC is based at the Graduate School of International Relations and Pacific Studies (IR/PS) at UCSD, whose faculty provides IGCC's leadership. IGCC's mission to educate the next generation of international problem-solvers and peacemakers is carried out through teaching activities, research, and public service opportunities. Scholars and researchers from inside and outside the UC system, government officials, and students from the United States and abroad have participated in IGCC projects.

IGCC's initial research focused on averting nuclear proliferation through arms control and confidence-building measures between the superpowers. Since then, its research program has diversified to encompass several broad areas of inquiry: regional relations, international environmental policy, ethnic conflict, terrorism, and international trade and policy issues. In addition, receipt of a prestigious NSF award in 2002 for a program to train the next generation of nuclear policy experts has lead to a rekindling of interest in research on traditional security issues.

IGCC supports UC research and teaching through its annual fellowship and grant cycle. IGCC's development office provides an additional resource for UC faculty seeking foundation funding for their projects. IGCC also serves as a liaison between the academic and policy communities through its Washington, D.C., office, located in the UC Washington Center (UCDC). The Washington, D.C., office administers a graduate internship program in international affairs and hosts the IGCC Foreign Policy Fellow. Interns and fellows are placed with governmental and nongovernmental organizations involved in international policy. The Washington office also sponsors policy seminars to showcase UC faculty research results and to provide opportunities for interaction between professors and policymakers.

IGCC receives its primary support from the Regents of the University of California and the UC Office of the President (Office of Research). Additional funding has been provided by the U.S. Departments of Energy, State, and Defense, the U.S. Institute of Peace, the National Science Foundation, the Japan-U.S. Friendship Commission, and Japan's National Institute for Research Advancement (NIRA). IGCC has also received important support from foundations such as the Japan Foundation Center for Global Partnership (CGP), the Carnegie Corporation of New York, The John D. and Catherine T. MacArthur Foundation, the William and Flora Hewlett Foundation, the Markle Foundation, the Smith Richardson Foundation, the Ocean Foundation, and the Rockefeller Foundation.

For more information about IGCC and its research programs, including full-text publications and downloadable POLICYPacks, visit the IGCC Web site at http://www.igcc.ucsd.edu. IGCC publications can also be downloaded from the
The White Mountain Research Station (WMRS) was established as a UC multicampus research unit in 1950 to support high-altitude research. The station includes four laboratory facilities located over a 3,000m (10,000 vertical ft.) altitude transect, ranging from the floor of the Owens Valley to White Mountain at over 14,000 feet above sea level. Located on the western edge of the Great Basin, WMRS also provides access to three major biogeographic regions (Sierra Nevada and White/inyo montane, Mojave desert, and Great Basin desert), and geologically rich and diverse field sites. WMRS has evolved into a major multidisciplinary research and teaching institution in eastern California, and hosts programs in archaeology and anthropology, atmospheric and space sciences, biological and medical sciences, ecology, conservation and natural resource management, geological, hydrological, and earth sciences.

WMRS facilities include: (1) Owens Valley Laboratories with classrooms, offices, dormitories, and food services for up to seventy people outside the Sierra resort town of Bishop, (2) a newly renovated lodge, cabins, classrooms, and laboratories for fifty people in the Bristlecone pine forest at Crooked Creek (3,094m altitude) (3) the Nello Pace Laboratory and Mount Bardocoff facilities (3,801m altitude), which can house thirty-five people, and (4) the 450-square-foot Summit Laboratory on White Mountain peak (4,342m altitude), making it the highest research lab in North America.

All of the laboratories are linked by a high-speed wireless internet connection providing instant access between campus-based laboratories and remote-sensing projects in the field. The Owens Valley Laboratory includes a modern molecular biology and genetics laboratory used to study adaptations to the environment and management of the majestic—but endangered—Bighorn sheep. A geographic information system (GIS) laboratory that houses the USGS-funded “Eastern Sierra Geospatial Data Clearinghouse” is used by scientists and government agencies for natural resource research and policy decisions. WMRS also hosts a Center for Astrophysics and Cosmology at Barcroft and “The Deepest Valley Interagency Plant Propagation Center.”

WMRS hosts more than 5,000 users from over 100 institutions per year for research, teaching, and conferences. Research occurs year-round with access to the high-altitude labs at Barcroft via snowmobile. Summer is the busiest time at WMRS, with undergraduate internships, graduate students supported by WMRS Fellowships in residence, plus students and faculty from other universities around the world. Educational uses include several geology field courses and a NSF-funded Research Experience for Undergraduates program. WMRS sponsors professional and postgraduate training courses, annual professional society meetings, a community lecture series, an annual Open House at Barcroft in August, and offers published proceedings from symposia on the environmental science in the region. For more information, please see http://www.wmrs.edu or call the scheduling coordinator at (760) 873-4344 for reservations.

Campuswide Institutes

The AIDS Research Institute (http://ari.ucsd.edu). In 1996, the AIDS Research Institute (ARI), an Organized Research Unit (ORU) was established by the Regents of the University of California to coordinate the diverse HIV/AIDS research and clinical activities on the UCSD campus. The mission of the institute, housed within the School of Medicine at UCSD, is to become a regional resource for HIV/AIDS research and information in the San Diego area. UCSD faculty have made major advances in our understanding of how the virus works, how it causes disease, how to treat HIV infection and its complications, and the impact of HIV infection on nationwide health and healthcare costs. In addition to the 145 faculty members from twenty-three departments, UCSD programs in HIV/AIDS are internationally recognized for their contributions to science and patient care. UCSD is ranked among the top ten AIDS programs in the country.

ARI programs include:

- The Center for AIDS Research (CFAR)
- The Adult AIDS Clinical Trials Group (ACTU)
- The Adult AIDS Clinical Trials Network Leadership Group
- The Pediatric AIDS Clinical Trials Group (PACTG)
- The California NeuroAIDS Tissue Network (CNTN)
- The Special Infectious Disease Clinic of the VA San Diego Healthcare System
- The Acute Infection and Early Disease Research Program (AIEDRP)
- The California Collaborative Treatment Group (CCTG)
- The HIV Neurobehavioral Research Center (HNRC)
- The Southern California Primary Infection Program
- The HIV Costs and Services Utilization Study (HCSUS)
- The VA Quality Enhancement Research Initiative for HIV (QUERI-HIV)
- The San Diego AIDS Education and Training Center (AETC)
- The Owen Clinic, which provides primary health care services
- The Antiviral Research Center (AVRC), which conducts clinical trials
- The UCSD Mother, Child, and Adolescent Program

The institute sponsors seminars and workshops and offers developmental grants to new investigators in the area of human immunodeficiency virus (HIV) and acquired immune deficiency syndrome (AIDS) related research. Together with research and development, the ARI is fully committed to serve as a community resource for information and assistance regarding infection, treatment, and education in HIV/AIDS. We are here to serve as the regional resource for all aspects pertaining to HIV/AIDS and, as a leader in research and education, to treat the infected and prevent the spread of further disease.

The California Institute for Telecommunications and Information Technology (Calit2) (http://www.calit2.net), an organized research unit, conducts research on the future of telecommunications and information technology and how these technologies will transform a range of applications important to the economy and citizens’ quality of life. These application areas include: environment and civil infrastructure, intelligent transportation, digitally enabled genomic medicine, new media arts, and disaster response.

Calit2, a partnership between UCSD and UCI, is one of four institutes established in December 2000 through the California Institutes for Science and Innovation (Cal ISI) initiative. It is funded by a state capital grant, federal research grants, industry, and foundations.

Calit2 units faculty, students, and industrial and community partners into multidisciplinary teams with expertise drawn from two dozen academic departments at both campuses. These teams integrate individuals’ deep expertise to enable larger-scale studies than those typically led by single investigators.

Emerging technologies are prototyped in the context of Calit2 “living laboratories,” pushing traditional research one step beyond scholarly publication to building and testing integrated systems under real-world conditions on and beyond the two participating campuses. Research professionals leading California telecommunication, computer, software, and applications companies are active partners in the more than fifty projects supported by Calit2.

The institute’s goal is to develop technology approaches that will benefit society and spur the state’s economic development, building on the explosive growth in bandwidth and connectivity provided by the wired and unwired Internet. Two new facilities constructed at UCSD and UCI feature unique capabilities, shared resources, extreme bandwidth, and reconfigurable space.

The 215,000-square-foot facility at UCSD, completed in the summer of 2005, is home to a wide range of projects at the intersection of science, engineering, and the arts. The building is
a physical manifestation of this multidisciplinary research agenda: It includes clean rooms for nanofabrication, digital theatres in a range of sizes and capabilities to support new media arts and scientific visualization, test and measurement labs for circuit design, smart spaces for experiments in augmented reality, transmission and networking testbeds for wireless and optical communications experiments, and labs for designing systems on a chip. The building juxtaposes people and programs in uncommon proximity to maximize the potential benefit arising from experts in different disciplines working together.

A 120,000-square-foot building dedicated at UC in November 2004 is equipped throughout with high-speed wireless Internet access, a Voice-over-IP phone system, and customized ad-hoc in-house networks. In addition, in a collaborative effort with the U.S. Geological Survey, the facility employs more than forty seismic sensors to measure ground and building motion with the same system. The facility also boasts a 3,700-square-foot clean room, a large-scale visualization laboratory, and labs for network research, optical devices, nanotechnology measurement, and media arts.

Calit2 has developed research and education partnerships with academic and industrial leaders in telecommunications and information technology across the nation and around the world, including Europe, North and South America, the Pacific Rim, and Southeast Asia. Calit2 is helping prepare students for the global workplace of the twenty-first century by supporting summer internships with researchers in Australia, Japan, Taiwan, China, and Thailand, and recently signed an e-learning collaborative agreement with India.

Calit2 has also established a global dedicated optical network with partners in the U.S., Netherlands, Japan, and Korea, which allows real-time collaboration between faculty and students in multiple research laboratories.

Through Calit2, students complement their coursework by working on large-scale, multidisciplinary, team-oriented projects that conduct research, establish prototype technologies, and test those technologies in the field. The experience they gain makes them especially valuable to potential employers, including Calit2 industrial and community partners.

The UCSD Salk Center for Academic Research and Training in Anthropogeny (CARTA) was established to address some of the oldest questions in the world: “where did we humans come from, and how did we get here?” To help answer these questions from a scientific perspective, a multidisciplinary group of researchers at the University of California, San Diego, along with colleagues at the Salk Institute for Biological Studies in La Jolla, have founded a center to formally explore the origins of humanity and the many facets of what makes us human.

CARTA is based on ongoing efforts dating back more than ten years, and coordinated in the past by the UCSD Project for Explaining the Origin of Humans, which is the definition of “anthropogeny.” Definitive answers regarding human origins are most likely to come from discussions and studies that bring together a wide variety of approaches in the biological, biomedical, and social sciences, as well as aspects of the arts and humanities, with important input from the physical, chemical, and computing sciences. CARTA is “transdisciplinary,” meaning that it transcends or goes beyond traditional disciplines and builds bridges between them. In doing so, we are more likely to succeed, by working beyond the confines of individual disciplines and looking at knowledge about human origins as a broad-based continuum. The goals of CARTA are essentially scholarly (academic) and range from understanding more about human and primate genetics and evolution to advancing knowledge in areas such as language, communication and cognition, and human society and culture.

Activities of CARTA include the organization of regular international symposia, developing an online Museum of Comparative Anthropogeny; organizing ethical access to resources for great ape research; development of a Library of Anthropogeny, stewardship of electronic databases, serum and skeletal collections donated by the Primate Foundation of Arizona; facilitating a graduate elective course and specialization track on human origins at UCSD, the teaching of evolutionary principles at the School of Medicine; and, development of a peer-reviewed journal, among others. Support for IT infrastructure and informatics is being provided by the San Diego Supercomputer Center and Calit2. The CARTA Web site URL is http://carta.anthropogeny.org.

The Institute of Engineering in Medicine (IEM) (http://iem.ucsd.edu/) was established in July 2008 at UCSD to bring together outstanding faculty in the Jacobs School of Engineering (JSEOE), School of Medicine (SOM), and Skaggs School of Pharmacy and Pharmaceutical Sciences (SSPPS), as well as other units, for interdisciplinary research and education at the interface of engineering and medicine for the improvement of health care. IEM consists of a network of faculty, students, staff, and partners both within and outside of the University of California. Currently the institute has more than 100 participating faculty members and twenty industry members.

The mission of IEM is to synergize the unique strengths at UCSD for the integration of engineering principles and novel technologies with biomedical and translational research, with the ultimate goal of improving health care delivery and enhancing the health and quality of life of humankind.

Research in the Institute of Engineering in Medicine focuses on the convergence of science, technology, and disease by applying an engineering approach to medicine. The four initial disease focus areas are cancer, cardiovascular diseases, metabolic disorders, and neurodegenerative diseases. The technology areas include imaging, genotyping/phenotyping, bioinformatics/system biology, medical devices/instrumentation, nanotechnology/nanomedicine, and stem cells.

The Institute of Engineering in Medicine works with academic departments to help develop interdisciplinary, interdisciplinary educational programs that involve many departments on the general campus, as well as industrial partners. The goal is to encourage undergraduates, graduates, as well as postdoctoral scientists, to work in areas at the interface of engineering and medicine, thus training the leaders of the next generation to drive and implement the applications of engineering and technology to health care.

The science conducted in IEM is organized into specific fields of research defined by the convergence of our broad areas of focus. Each center of research involves expert university faculty working together with industry and physicians to solve important health care problems through technological advancements. The Whitaker Center for Biomedical Engineering (WCBE) is the first such center. WCBE enhances industry-academia collaboration and interaction by fostering fruitful exchanges among WCBE members, the UCSD community, and various industry collaborators. WCBE has an Industrial Advisory Board to guide and further this cooperation. The board works closely with WCBE to enhance research collaboration, foster scientific exchange, facilitate funding opportunity, organize seminars and workshops, and facilitate student internship training and professional development. More information about WCBE is available at (http://wcbe.ucsd.edu/).

The Institute for International, Comparative, and Area Studies (IICAS) was created in 2001 to promote research on international, comparative, and cross-regional topics. Building on the substantial strengths of UCSD in international studies, IICAS coordinates and supports the research of faculty in departments, area studies programs, and the Graduate School of International Relations and Pacific Studies. It is closely associated with undergraduate and graduate education in international studies, including Eleanor Roosevelt College and the international studies major, whose program offices are housed within the institute. IICAS has three principal roles. First, it serves as a research catalyst, fostering and incubating interdisciplinary and cross-area research groups and projects. Activities have included a faculty research project on states at risk, a multiyear, interdisciplinary research workshop examining the empire-to-nation transition, and an annual lecture series on Law and Society (co-sponsored with California Western School of Law). Second, IICAS coordinates and provides services for international and area studies programs in events planning and coordination. In this role, IICAS has co-sponsored campuswide panels and seminars that address critical international issues. It also encourages new programs in international and area studies, such as the European Studies initiative.

Third, the IICAS director and Advisory Committee
advise the senior vice chancellor for Academic Affairs on campus priorities and appointments in international studies. IICAS’ Office for International Academic Exchange and Protocol (IAEPS) provides campuswide services in support of UCSD’s international contacts, including international visitors, requests for affiliation agreements, and collaborative international research projects.

The **Institute for Neural Computation (INC)**. The institute’s research projects are directed at understanding the modes of functioning of nervous systems through direct observation, experimental investigation, and modeling of neural structures; uncovering cognitive principles through psychological experimentation and parallel distributed-processing models; applying neural computation to the solution of major technological and scientific problems; and ultimately building a new generation of massively parallel computers based on the principles of neural computation. The central premise of INC is that diverse research efforts cannot be adequately achieved independently; instead significant progress will come through the joint efforts of researchers in the relevant disciplines, including neuroscience, philosophy, psychology, cognitive science, physics, mathematics, economics, electrical and computer engineering, computer science and engineering, radiology, and linguistics.

Faculty from the UCSD Departments of Biology, Computer Science and Engineering, Cognitive Science, Economics, Philosophy, Neurosciences, and Radiology, and the Salk Institute for Biological Studies are actively involved in the institute’s activities. The institute has a training program in cognitive neuroscience, an active visitors program and an industrial affiliates program with ongoing joint research projects. The institute sponsors a seminar series, the annual Rockwood Memorial Lecture, and several scientific workshops and conferences annually.

The goal of the Swartz Center for Computational Neuroscience, an off-campus lab of INC, is to observe and model how functional activities in multiple brain areas interact dynamically to support human awareness, interaction, and creativity. Research in the center involves development of computational methods and software, experimental methods and equipment; collection and analysis of human cognitive experiments; and collaborations to analyze data collected by other groups in such experiments.

The Machine Perception Laboratory, another activity of INC, seeks to gain insights into how the brain works by developing embodied systems that solve problems similar to those encountered by the brain. The lab focuses on systems that perceive and interact with humans in real time using natural communication channels (e.g., visual, auditory, and tactile information). To this effect lab personnel are developing perceptual primitives to detect and track human faces and to recognize facial expressions. Developing such systems requires a multidisciplinary approach that combines mathematical modeling, machine learning techniques, computational modeling of brain function, and behavioral experiments. Applications include personal robots, automatic tutoring systems, and automatic assessment of affective disorders.

Other projects include research on human movement disorders, automatic speech recognition, autism, social cognition, how sensory information is represented in the cerebral cortex, how memory representations are formed and consolidated during sleep, and how visuomotor transformations are adaptively organized.

The **Institute for Nonlinear Science (INLS)** promotes interdisciplinary research and graduate education in the development and application of contemporary methods in the study of nonlinear dynamical systems. Using a common mathematical language, faculty and students from disciplines as diverse as physics, mathematics, oceanography, biology and neuroscience, mechanical and electrical engineering, and economics pursue the implications of generic characteristics of nonlinear problems for their subjects. Each year the institute sponsors several long- and short-term senior visitors from the University of California and elsewhere and provides, through funds from external funding agencies, support for approximately ten graduate students to work on Ph.D. dissertations concerned with nonlinear prob-lems. Also associated with INLS are approximately twenty full-time research scientists and postdoctoral researchers.

The core of INLS activities is composed of (1) joint research among faculty and students across disciplinary lines and (2) lecture series and working seminars designed to convey recent research progress and to stimulate new investigations. Through contracts with external agencies INLS supports experimental, numerical, and theoretical studies of nonlinear dynamics and chaos in neurophysiology, investigations in nonlinear fluid dynamics and pattern formation, studies (jointly with the University of California, Los Angeles and Stanford University) of applications of chaos in communications, as well as in the nonlinear dynamics of granular materials.

INLS has developed joint research programs with universities, research institutes, and commercial companies in areas of common interest. It actively works with colleagues at UCLA, Stanford, Cal Tech, Argonne National Laboratory, ST Microelectronics, Time Domain Inc., and Randle Corporation. These affiliations provide new research horizons and realistic opportunities for technology transfer.

**Institute for Pure and Applied Physical Sciences (IPAPPS)** is an interdisciplinary research unit that brings together faculty and researchers in physics, chemistry, engineering, and Scripps Institution of Oceanography. The institute is concerned with fluids and materials. Specific subjects of research include superconductivity, ferromagnetism, semiconductor heterostructures, solid surfaces, plasma physics, hydromagnetics, turbulence, fluid mechanics, laser physics, and numerical analysis.

Within IPAPPS is the Center for Interface and Materials Science (CIMS), which emphasizes interdisciplinary collaborative research on the properties of surfaces, thin-layered composites, and novel materials, as well as their technological applications. With centralized space and equipment, CIMS brings together faculty and research staff from the Departments of Physics, Applied Mechanics and Engineering Sciences, Chemistry and Biochemistry, Electrical and Computer Engineering, and the Scripps Institution of Oceanography.

The **Kavli Institute for Brain and Mind (KIBM)** is a virtual environment unhampered by disciplinary boundaries, providing scientists with opportunities for effective interdisciplinary integration of research and knowledge. KIBM will transcend traditional disciplinary barriers to foster new discourse among scientists, accelerating discoveries about the connections between mechanism and behavior.

KIBM’s mission is to support research that furthers our understanding of the origins, evolution, and mechanisms of human cognition, from the brain’s physical and biochemical machinery to the experiences and behaviors called the mind. KIBM leverages UCSD’s preeminence in such fields as neuroscience, biology, cognitive science, psychology, and medicine, along with the extensive resources of the broader La Jolla scientific community, to extend its position as the pacesetter in brain-mind research and education, and as a vibrant hub for dissemination of its discoveries to advance science and benefit humankind.

To achieve its mission, KIBM provides funding for innovative research to focus on ideas that bridge different levels of organization of brain and mind, and for distinguished scientists to visit San Diego to broaden our interdisciplinary research on brain-mind issues.

Faculty from UCSD’s Departments of Neurobiology, Cognitive Science, Neuropsychology, Neuroscience, Philosophy, Psychiatry, Psychology, and Radiology; and scientists from the Salk Institute for Biological Studies, the Neurosciences Institute, and The Scripps Research Institute participate in KIBM research, lectures, and workshops.

The **Sam and Rose Stein Institute for Research on Aging (SIRA)** is an ORU committed to the development of the latest advances in biomedical and behavioral science knowledge, and their application to issues of successful (healthy) aging and the prevention and reduction of the burden of disability and disease in late life. Established in 1983 as the first ORU on aging within the University of California system, the unit consists of more than 120 faculty members with outstanding track records in research and encompassing a wide range of expertise. These faculty members represent multiple departments within the UCSD School of Medicine, ranging from bioengineering and family and preventive medicine to...
neurosciences and psychiatry. Over the past two decades, SIRA has made major contributions to research, research training, and dissemination of information to the San Diego, national, and international community in geriatrics and gerontology. It has funded more than seventy-five pilot grants for junior faculty during critical stages of their careers, and funded more than 100 undergraduate and medical students interested in aging research. In 2005, SIRA was awarded a grant from the National Institute on Aging (NIA) to conduct summer research training of medical students from around the country, with a focus on healthy aging. In this program, students are paired with experienced scientists from UCSD and provided an opportunity to conduct hands-on research by pursuing basic science, clinical, or health services projects. In addition, SIRA has also recently targeted its pilot grant awards to junior faculty pursuing research projects pertaining to successful aging. Along with its Web site (http://sira.ucsd.edu), SIRA publishes a monthly newsletter, Successful Aging, which is distributed to more than 2,000 individuals and organizations. The monthly SIRA Public Lecture Series has resulted in over 250 public lectures provided by SIRA faculty on topics of interest to the general public, with the lectures also broadcast on UCSD-TV. SIRA Grand Rounds and Geriatric Journal Club further enhance the multiple venues provided to educate professionals and the general public on age-related topics. Under the leadership of Dilip Jeste, M.D., director of SIRA since 2003, SIRA has launched comprehensive, longitudinal, bio-psycho-social studies of successful (or healthy) aging. Scientists at SIRA believe that studying health and well-being and how and why people age without significant mental, physical, or social impairment should be at least as important as studying why people become ill. In the coming years, SIRA will strive to become a national and international resource on successful aging and impact people’s ability to age well. For more information, contact us at (858) 534-6299 or steinsteinstitute@ucsd.edu or visit our Web site at http://sira.ucsd.edu.

Centers

The Rebecca and John Moores UCSD Cancer Center (CC), active in the fight against cancer since 1979, is a National Cancer Institute-designated Comprehensive Cancer Center. The specific goals of the Cancer Center are to enhance the present level of basic research, increase collaborative research, increase the application of basic science to solve clinical problems through translational research, disseminate new knowledge to oncology professionals and scientists in the San Diego community, enable the biomedical industry to transfer new technology to the clinical setting, develop a strong effort in cancer prevention and control, and educate and train undergraduate and postgraduate physicians, and basic scientists.

Under the auspices of a Cancer Center Support Grant from the National Cancer Institute, there are seven active program areas within the Cancer Center. These include Cancer Biology, Cancer Genetics, Cancer Prevention and Control, Cancer Pharmacology, Cancer Symptom Control, Translational Oncology, and Viral Malignancy. Shared resources at the Cancer Center include biostatistics, clinical trials, data compilation and analysis, digital imaging, DNA sequencing, flow cytometry, histology and immunohistochemistry, microarray, molecular pathology, nutrition, radiation medicine, and transgenic mouse.

Research and educational grants support the training of postdoctoral fellows and medical students. The Clinical Trials Office coordinates clinical research trials involving cancer patients at UCSD and is the focal point for a large Oncology Outreach Network, which provides state-of-the-art protocol treatment opportunities for patients in a broad geographic area. Patient care activities of the Cancer Center are located in the Combined Oncology Clinic at the Theodore Gildred Facility and in UCSD Medical Center, both located in Hillcrest, and at the Oncology Clinic of the Perlman Ambulatory Care Center and in UCSD Thornton Hospital, both located in La Jolla. Basic research activities of the Cancer Center are carried out at a variety of other locations on or adjacent to the La Jolla campus. Total membership of the Cancer Center exceeds 260 laboratory investigators and clinical physicians from twenty-two academic departments. The research funding for Cancer Center members exceeds $180 million.

The Center for Astrophysics and Space Sciences (CASS) is an interdisciplinary research unit established in 1979. The center brings together academic and research staff from the Departments of Physics, Chemistry and Biochemistry, and Electrical and Computer Engineering. Research is conducted in the scientific areas of theoretical cosmology, computational astrophysics, observational cosmology, interstellar medium, star formation; solar observational and theoretical studies; X-ray and gamma-ray astrophysics; experimental and theoretical magnetospheric and space plasma physics; and cosmochemistry, including the chemistry of interstellar matter.

CASS provides a jointly shared facility which has office, laboratory, and computer space to enhance the interchange of expertise. Researchers in CASS have access to many University of California observing facilities, including the 2 Keck 10m telescopes, Lick Observatories, and Keck Telescopes, and have contributed experiments to many major NASA space missions including the Hubble Space Telescope and the Rossi X-Ray Timing Explorer. Associated with CASS are seventeen faculty, about twenty-five Ph.D.-level research staff, twelve graduate students, and thirty technical and administrative support personnel.

The center’s facilities, faculty, and research staff are available to graduate students in the Departments of Physics, Electrical and Computer Engineering, and Chemistry and Biochemistry who have chosen to write their dissertation on subjects of research encompassed by CASS. Graduate and undergraduate courses in astrophysics, astronomy, and space sciences are developed and taught by the academic staff of CASS. The total yearly budget is about $5 million, mostly from federal funding sources.

The Center for Comparative Immigration Studies (CCIS) is an interdisciplinary, multinational research and training program devoted to comparative work on international migration and refugee movements. Its primary missions are to conduct comparative (especially cross-national) and policy-oriented research, train academic researchers, students, and practitioners, and disseminate research conducted under its auspices to academics, policymakers, and NGOs through research seminars, conferences, publications, the Internet, and the mass media. CCIS seeks to illuminate the U.S. immigration experience through systematic comparison with other countries of immigration, particularly in Europe and the Asia-Pacific region.

The center promotes research in the following areas: (1) the causes, dynamics, and consequences (economic, political, and sociocultural) of international migration, including low-skilled and high-skilled migrant workers and refugees; (2) the determinants and outcomes of laws and policies to regulate immigration and refugee flows; (3) transnational relationships (economic, political, cultural, ethnic) between immigrant sending and receiving countries; (4) the impact of international migration on citizenship, national identity, and ethnic relations; (5) immigrant rights, advocacy, and social services; (6) immigrant political mobilization and participation; (7) the socioeconomic, political, and cultural interactions of immigrants with native-born residents of receiving countries.

CCIS hosts visiting predoctoral and postdoctoral research fellows, and conducts an annual field research project on Mexican migration to the United States. The center has an active publications program consisting of monographs, anthologies, and working papers. Funding is provided by the University of California, private foundations, and international agencies.

A number of graduate research assistantships are available. Applications for graduate study in any of the disciplines covered by CCIS should be directed to the academic department in which graduate study is to be undertaken.

The Center for Energy Research (CER) was established to help create solutions to the growing challenges of energy supply and utilization in our society. The center exists to facilitate, coordinate, and promote energy research and education. It accomplishes these goals by providing resources and administrative support to researchers, assistance with business development, event hosting, publicity, outreach, and educational activities. Approximately ninety-four faculty, staff,
and students are affiliated with CER. The goals of CER are complementary to academic departments of instruction and research with an emphasis on bridging the various disciplines related to energy research on the campus. Emphasis is currently on combustion and fusion energy research. CER will also provide a vehicle for developing other dimensions of energy research, including energy policy research. The specific goals of CER are: (1) to provide an interdepartmental coordinating function for energy research groups and projects at UCSD, (2) to enhance the prospects of extramural research funding involving interdepartmental and multidisciplinary collaborations in energy research, (3) to promote the visibility of energy topics in undergraduate and graduate programs at UCSD, (4) to provide a mechanism for interacting with other institutions involved in energy research with particular attention to potential industry partners, and (5) to promote the visibility of energy research at UCSD to potential sponsors and funding agencies.

A number of graduate research assistantships are available. Applications for graduate study in any of the disciplines covered by CER should be directed to the academic department in which graduate study is to be undertaken. The Center for Human Development (CHD) is an interdisciplinary, research-centered unit designed to meet the growing needs for interdisciplinary exchange on issues related to human development. The goal of CHD is to provide a forum for interdisciplinary exchange that creates a dialogue between members of diverse disciplines. The center is organized around five structurally distinct components, but with integrated functions. Each function is designed to serve a specific set of needs and to make unique contributions to the larger enterprise. These components are the following: (1) research support and infrastructure, (2) enrichment of human development's instructional counterparts—the undergraduate Human Development Program and a proposed interdisciplinary graduate program, (3) dissemination activities focused on but not limited to local community needs, (4) public policy analysis, and (5) assessment activities. In addition, the center serves as a focal point for research, evaluation, and assessment activities associated with the campus-wide Center for Research in Educational Equity, Assessment, and Teaching Excellence (CREATE).

The Clinical Investigation Institute (CII) was approved as an organized research unit (ORU) in 2004 and has made considerable progress developing the infrastructure needed to support clinical research at UCSD.

Gary S. Firestein, M.D., professor of medicine and chief of the Division of Rheumatology, Allergy and Immunology and dean of Translational Medicine at the UCSD School of Medicine, has been named founding director. CII integrates disease-oriented research with fundamental biology, biotechnology, and physician-scientist training. The institute focuses on three goals:

- Facilitating the translation of fundamental biology into novel therapies, with an emphasis on proof-of-concept clinical trials that use novel biomarker and imaging endpoints.
- Promoting research into the pathogenesis, diagnosis, treatment, genetics, epidemiology, and natural history of disease.
- Providing education and training opportunities in clinical investigation.

Because of its strong scientific foundation, the UCSD School of Medicine is utilizing its expertise in translational research, especially proof-of-concept studies using biomarker or imaging assessments rather than traditional clinical endpoints. This approach leverages the talents of the UCSD faculty and provides opportunities to streamline drug development. The Skaggs School of Pharmacy and Pharmaceutical Sciences plays a critical role by expanding these investigative efforts to include careful evaluation of pharmacogenomics as well as the biological effects of treatment. Using this model, UCSD is well positioned to be a leader in the development of aggressive, innovative treatments that will have an impact on our patients.

For more information on CII, visit our Web site at http://cii.ucsd.edu.

The Center for Iberian and Latin American Studies (CILAS) coordinates and promotes Latin American and Iberian research and service activities for faculty and students in all departments at the university and outreach programs for the San Diego community. It sponsors multidisciplinary colloquia, conferences, projects and publications, collaborations and exchanges with Latin American institutions, as well as library expansion. CILAS has launched several new initiatives in the areas of culture and violence, natural resources and indigenous peoples, globalization from below, and new forms of citizenship, that are linked to several publication agreements over the next years. The center also hosts visiting professors from Latin America and visiting scholars from Spain and Latin America. The center awards grants and fellowships each year to promising graduate students.

The Center for Magnetic Recording Research (CMRR) (http://cmrr.ucsd.edu) is an organized research unit whose mission is to advance the science and technology that will serve as the foundation for the information-storage devices, systems, and applications of the future. This mission is achieved in partnership with private foundations, industrial and government sponsors, through the combination of an ambitious research agenda that reflects a shared vision of the participating organizations, and a research-driven program of education and professional training for the future leaders in information-storage technology. CMRR draws upon the wide range of intellectual interests and resources at UCSD, with participating faculty from departments in the Jacobs School of Engineering, the Division of Physical Sciences, and the Graduate School of International Relations and Pacific Studies, as well as researchers in the UCSD Materials Science and Engineering Program, the San Diego Supercomputer Center, and the California Institute for Telecommunications and Information Technology (Calit2).

The center supports five endowed professorial chairs. Research programs address fundamental problems in nanoscale storage technology, including recording physics and micromagnetics, nano-patterned magnetic materials and structures, mechanical interfaces and tribology, servo control systems, signal-processing techniques, and error-control coding. Related projects explore storage mechanisms based upon novel nanostructures, optical holography, and spintronic materials. System-level research topics include object-based storage paradigms, “intelligent” storage devices, and data security.

Graduate and undergraduate student researchers, postgraduate researchers, professional scientists, and visiting scholars representing international academic institutions and industrial laboratories contribute to a research and educational environment that is dynamic and varied.

As part of the center’s mission to educate future leaders in the vital information-storage industry, faculty members teach specialized classes at the undergraduate and graduate levels that train students in the theoretical methods and experimental techniques underlying advanced magnetic recording technology. Real-world research opportunities are also available to students through academic-year and summer internships with selected sponsors. In addition, the center contributes to the continuing education of professionals in the storage industry through regular seminars, research reviews, and focused workshops.

CMRR also supports a world-class information center for information-storage technology that provides a range of services to sponsors, resident researchers, and students. These services include licensed database searching, patent searching, document retrieval, and expedited access to proprietary technical resources.

The Center for Molecular Agriculture (CMA) promotes research and education in plant genetics and plant molecular biology with an eye to the application of that research to the improvement of crops. Crop improvement cannot any longer rely exclusively on traditional plant breeding methods but requires the application of new technologies that include but are not limited to genetics and genomics, informatics, molecular gene isolation, and plant transformation. CMA brings together researchers from UCSD and the Salk Institute and is a resource for the entire San Diego community. It provides a focal point for interaction with the local and statewide agricultural biotechnology industry. The center wishes to play an active role in the debate about the safe cultivation and use of genetically modified crops.
The Center for Networked Systems (CNS) was formally established as an organized research unit at UCSD in 2005. CNS is pursuing a portfolio of large and small multidisciplinary projects designed to develop key technologies and frameworks for networked systems. Each project attacks a critical technical problem or framework and all contribute to our technical capability to build robust, secure, manageable, and open networked systems. CNS combines its research talents and strengths in partnership with key industrial leaders—achieving the critical mass and relevant focus necessary to accelerate research progress and create key technologies, framework, and systems understanding for robust, secure networked systems and innovative new applications. CNS is focusing its initial efforts in four key research areas:

- Robustness: Understanding networked system properties that enable flexible connection (composition) and sharing of networks, grids, and networked system applications while ensuring predictable performance, reliability, quality, and efficiency.
- System and Application Security: Technologies and architectures that enable applications and networked systems to be secured or protected against unauthorized use, observation, or denial of service.
- Manageability: Technologies and architectures that reduce the effort required to understand, design, operate, use, and administer networked systems.
- Application/End-User Quality: Technologies and architectures that provide both capabilities and understanding of application performance and end-user quality of experience, particularly in large-scale and open systems.

The Center for Research in Biological Systems (CRBS) is an organized research unit that exists to provide human resources, high-technology equipment, and administrative services to researchers engaged in fundamental research on cell structure and function relationships, particularly those involved in central nervous system processes, cardiovascular networking, and muscular contraction. CRBS scientists investigate these processes through invention, refinement, and deployment of sophisticated technologies, especially

- High-powered electron microscopes that reveal three-dimensional cell structures
- State-of-the-art X-ray crystallography and magnetic resonance analysis that provide detail on protein structures at high resolution
- Laser-scanning and Confocal light microscopes that reveal molecules tagged with fluorescent markers as they traffic within cells and pass transfer signals within and between cells
- High-performance computing and grid-based integration of distributed data

CRBS facilitates an interdisciplinary infrastructure in which people from biology, medicine, chemistry and biochemistry, and physics can work with those from computer science and information technologies in collaborative research. CRBS researchers share interests in the study of complex biological systems at many scales, from the structures of enzymes, proteins, and the body’s chemical communications network at atomic and molecular levels, to an organism’s physiology, strength, and support at cellular and tissue levels.

The CRBS infrastructure integrates resources for high-performance computing, visualization and database technologies, and the grid-integration of large amounts of archival storage data. The California Institute for Telecommunications and Information Technology (Calit2) and the San Diego Supercomputer Center (SDSC) are collaborators in simulating the activity of biological systems, analyzing the results, and organizing the growing storehouse of biological information.

The aims of CRBS researchers are met in interdisciplinary research activities of major federally funded efforts that are presently the heart of CRBS:

- BIRN, the Biomedical Informatics Research Network, http://www.nbirn.net, tests new modes of large-scale biomedical science. BIRN builds infrastructure and technologies to enable large-scale biomedical data mining and refinement.
- NCMIR, the National Center for Microscopy Imaging Research, http://ncmir.ucsd.edu, specializes in the development of technologies for improving the understanding of biological structure and function relationships spanning the dimensional range from 5nm3 to 50µm3.
- NBCR, the National Biomedical Computation Resource, http://nbcrr.ucsd.edu, conducts, catalyzes, and advances biomedical research by harnessing, developing, and deploying forefront computational, information, and grid technologies.
- JCSG, the Joint Center for Structural Genomics, http://www.jcsg.org, creates new technologies to drive high-throughput structure determination. The Bioinformatics Core at UCSD is responsible for target selection, sample tracking, information management, structure validation and deposition, and poststructural analysis. Through these functions, the group provides the integrated informatics backbone required for the successful operation of JCSG.

CRBS researchers also have significant roles in collaborations with

- PRAGMA, Pacific Rim Applications and Grid Middleware Assembly, establishes sustained collaborations and advances the use of grid technologies in applications throughout the Pacific region to allow data, computing, and other resource sharing.
- Optiputer, http://www.optiputer.net, involves the design and development of an infrastructure to integrate computational, storage, and visualization resources over parallel optical networks using lambda switching communication mechanisms.

CRBS is an entity evolving as research evolves. It was established in 1996 to involve researchers from disciplines across UCSD, the School of Medicine, the Salk Institute for Biological Studies, Calit2, and SDSC, including bioengineering, biology, chemistry, computer science, mathematics, neurosciences, pharmacology, psychiatry, and physics, and forges interactions with biotechnology and biocomputing companies for technology transfer. Interaction, collaboration, and multiscale research produce new perspectives, reveal fruitful research topics, lead to the development of new technologies and drugs, and train a new generation of researchers in biological systems.

The Center for Research in Computing and the Arts (CRCA) is an organized research unit of UCSD whose mission is to facilitate the creation of new forms of art that arise out of the developments of digital technologies. Current focus areas include networked multimedia, virtual reality, computer-spatialized audio, and live performance techniques for computer music and graphics.

As the University of California’s oldest arts research center, CRCA pursues innovative approaches to the arts, crossing disciplinary boundaries with the humanities, engineering, and the sciences. Faculty members devise new modes of artistic practice through their liaison with international cultural institutions, high-tech industries, and interdisciplinary collaborations.

CRCA provides the support framework for a broad range of approaches to artistic, scholarly, and technological development that is at the basis of our digitally transformed culture. We actively encourage the investigation of what constitutes the potent cultural acts of our time and the viable mechanisms that should be engaged to create them. More information about the center, its researchers, public events, and the process for engagement, can be found at http://crca.ucsd.edu.

The Center for Research in Language (CRL) emphasizes the combination of theoretical and experimental approaches to language study. The research is interdisciplinary and draws upon the fields of cognitive science, communication, communication disorders, computer science, human development, linguistics, neurosciences, psychology, and radiology.

The center’s facilities accommodate laboratory and lecture rooms, computer science, computer science, human development, linguistics, neurosciences, psychology, and radiology.

The center’s facilities accommodate laboratory research projects by the faculty and graduate students; facilities include a number of high-performance work stations, a computer laboratory, extensive equipment for audio recording.
and analysis, and equipment for psycholinguistic experimentation.

Current research projects include studies of language and cognitive development in children; language impairment in children and adults; word and sentence processing in bilinguals; studies of American Sign Language; cross-linguistic studies of language structure; development of neurally inspired parallel processing models of speech perception; first-language acquisition; cross-linguistic comparisons of language acquisition and aphasia; research on the integration of grammatical analyses and theories; a project to collect large-scale text corpora in electronic form; and a study of expectancy generation in sentence processing. The center administers an NIH pre- and postdoctoral training grant, ‘Language, Communication and the Brain.’ CRL has also entered into several institutional agreements with research institutions in Europe, Asia, and the Americas, providing for the exchange of personnel and support for projects of mutual interest. An ongoing workshop series presents a broad range of experimental approaches to the study of language. The center publishes a monthly electronic newsletter.

The project brings together faculty and research staff from the UCSD Departments of Cognitive Science, Human Development, Neurosciences, Psychology, and Radiology; the San Diego State University Departments of Psychology and the School of Speech and Hearing Sciences; and the Salk Institute for Biological Studies.

The Glycobiology Research and Training Center (GRTC) seeks to facilitate and enhance research on the structure, distribution, and function of glycans. These are often found covalently attached glycans. These are often found distributed in nature. All cells and many proteins

optimal position to modulate or mediate events in cell-cell and cell-matrix interactions that are crucial to the development and function of complex multicellular organisms. They can also mediate interactions between organisms (e.g., between host and parasite). Simple rapidly turning-over protein-bound glycans are also abundant in the nucleus and cytoplasm, where they appear to serve as regulatory switches. The development of a variety of new technologies for exploring the structures of these glycans has recently opened up this new frontier of molecular biology.

GRTC (http://grtc.ucsd.edu) seeks to foster interactive research in glycobiology by coordinating the availability of state-of-the-art instrumentation and expertise in the structural analysis of glycans through a Glycotechnology Core Resource (http://glycotech.ucsd.edu), increasing intellectual and collaborative interactions by organizing symposia, joint programs and seminars, coordinating joint applications for extramural support, improving access to relevant informatics, and facilitating the transfer of basic glycobiology research to practical applications. The center also strongly emphasizes graduate, postgraduate, and medical student education in glycobiology, including contributions by the faculty to core curricula, as well as to elective courses and journal clubs.

The San Diego Supercomputer Center (SDSC) has enabled science and engineering discoveries through advances in computational science and high-performance computing for the past two decades. Data is an overriding theme in SDSC activities. By developing and providing data cyberinfrastructure, the center acts as a strategic resource to science, industry, and academia, offering leadership in the areas of data management, grid computing, bioinformatics, geoinformatics, and high-performance computing. The mission of SDSC is to extend the reach of the scientific community by providing data-oriented technology resources above and beyond the limits of what is available in the local laboratory, department, and university environment. SDSC is an organized research unit of UCSD with a staff of scientists, software developers, and support personnel, primarily funded by the National Science Foundation (NSF). Two key SDSC projects include the Geoscience Network (GEON) and the Science Environment for Ecological Knowledge (SEEK). GEON weaves together separate informational strands into a unified fabric that enables the discovery of data relationships within and across Earth science disciplines.

SEEK uses SDSC’s computational science resources to provide the computational and data-management components of UCSD’s strong environmental informatics program. Reflecting the dramatic increase in humankind’s ability to change the environment, the study of environmental informatics is increasingly critical to California. SDSC and UCSD are building and supporting a program that spans scales from the molecular level to entire populations, accurately modeling the impact of population on the environment.

In addition, SDSC pursues data management activities such as digital library initiatives, data-system standardization, and opportunities to impact large-scale data mining, analysis, and knowledge synthesis with academic, federal, and commercial partners. SDSC’s high-end computing unit is leading a national effort to understand and deploy the most capable computational environments and to make those environments easily accessible and usable by scientific communities—locally, nationally, and globally. SDSC maintains leadership in critical strategic capabilities, including chemistry, parallel applications and performance modeling, scientific visualization, and increasing collaborations with the social sciences.

Researchers involved in SDSC’s integrative biosciences area are developing projects to understand how cellular behavior emerges from the molecular level, how tissue behavior emerges from the cellular level, and so on up to the level of the organism. SDSC is collaborating in this area with the UCSD School of Medicine, the Center for Research in Biological Structure, The Scripps Research Institute, the Salk Institute for Biological Studies, and local biotech and pharmaceutical companies. SDSC also is focusing on large-scale collaborative bioscience projects worldwide using an infrastructure based on high-performance computation and analysis of massive amounts of data.

Major academic researchers around the country use the powerful computing resources at SDSC to make breakthroughs in diverse areas of science—from astronomy and biology to chemistry and particle physics.

SDSC’s state-of-the-art computational resources and support include DataStar, a 15.7 teraflops (trillion floating point operations per second) supercomputer with a total shared memory of seven terabytes. DataStar is among the top supercomputers in the world. DataStar is used by researchers in academia and industry to conduct large-scale, data-intensive scientific research applications that involve extremely large data sets or have stressful input/output requirements.

SDSC collaborates with eight partners—including the National Center for Supercomputing Applications at the University of Illinois, Argonne National Laboratory, the Center for Advanced Computing Research at the California Institute of Technology, and the Pittsburgh Supercomputing Center—in the TeraGrid project. This multiyear effort builds and maintains the world’s most powerful and comprehensive distributed computational infrastructure for open scientific research. The TeraGrid integrates more than 110 teraflops of computing power through a cross-country network backbone that operates at 40 gigabits per second. The storage facilities at SDSC alone include more than one petabyte of high-speed disk and six petabytes of archival storage capacity,
one of the world’s largest academic storage installations.

SDSC hosts huge digital collections, including visualizations of earthquake simulations, disaster-recovery records, astronomical images from the 2-Micron All Sky Survey, images from the Art Museum Image Consortium, Chinese text from the Pacific Rim Digital Library Alliance, and tomographic images of the human brain. The data technology is also being used to prototype persistent digital archives for the National Archives and Records Administration and other government agencies with huge data archives.

The Cooperative Association for Internet Data Analysis (CAIDA) at SDSC engages Internet providers, vendors, and users in engineering and technical collaborations to promote a more robust, scalable Internet infrastructure. CAIDA works with the community to develop and transfer tools and technologies that provide engineering and other insights relating to the operation and evolution of the Internet infrastructure. CAIDA works with providers and researchers to refine Internet traffic metrics, foster shared research environments, and encourage the development and testing of advanced networking technologies.

SDSC’s Applied Network Research group is currently conducting two Internet research projects. The first involves the National Laboratory for Applied Network Research (NLANR), an NSF-supported collaboration to provide technical, engineering, and traffic analysis support for NSF’s High-Performance Connections sites and the nation’s high-performance network infrastructure.

The second activity of the Applied Network Research group is the High-Performance Wireless Research and Education Network (HPWREN), a collaboration with SIO that created a noncommercial, prototype, high-performance, wide-area wireless network in San Diego County.

Projects

The goal of the African and African-American Studies Research Project (AAASRP) is to facilitate faculty, postgraduate, and graduate research in the areas of Africa and African diaspora studies in the social sciences and the humanities, and to foster the comparative, cross-national, and interdisciplinary dimensions of research, with a core group of scholars drawn from several fields in the social sciences and humanities. These research efforts are linked directly to larger local and international community concerns.

The project sponsors visiting scholars, focused research groups, a seminar, and symposia. Faculty from seven university departments are involved. The project oversees the African Studies Minor. The project is also part of the UC Systemwide Consortium of African Studies Programs and the national Association of African Studies Programs. It provides the basis for the establishment of an organized research unit on African and African-American Studies at a later time. For more information, contact the AAASRP office at (858) 822-0265.

The Project for Explaining the Origin of Humans is a broad-based multidisciplinary coalition of investigators in the La Jolla area (from UCSD as well as institutions from the surrounding area and around the world) who are interested in defining and explaining the evolutionary origins of humans and in generating testable hypotheses and new agendas for research regarding this matter. Areas of current interest include primate genetics and evolution, paleoanthropology and hominid origins, mammalian and primate neurosciences, primate biology and medicine, the roles of nature and nurture in language and cognition, human and primate society and culture, comparative primate reproductive biology, geographic, environmental and climatic factors in hominid evolution, as well as general theories for explaining humans. The group includes UCSD faculty from the Departments of Anthropology, Biology, Chemistry and Biochemistry, Cognitive Science, Linguistics, Medicine, Neurosciences, Scripps Institution of Oceanography, Pathology, and Psychology. A listing of participants can be found at http://origins.ucsd.edu.

The Project for Econometric Analysis (PEA) is concerned with the analysis of economic and financial data and with techniques for modeling relationships between economic variables and testing economic theories. As economic variables have properties not generally found in other fields, standard procedures from mainstream statistics are often not appropriate. The field of econometrics has been developed to deal with these issues. Its importance is indicated by its effect on the methodologies in other social sciences, such as political science and empirical history, and the fact that several Nobel Prize winners in economics have been econometricians. In fact, the 2003 Nobel Prize in economics was awarded to Clive Granger and Robert Engle, two of the founders of PEA.

The Project for Econometric Analysis supports the work of an active group of researchers and provides opportunities for productive interaction among faculty and students. Areas of active research include financial econometrics, nonlinear time series modeling, properties of neural network models, the theory of economic forecasting and various actual applications including evaluations of models and forecasts in finance and economics. PEA allows links with workers from other universities in this and other countries. In 2000–01 and 2001–02 the project had visitors from Europe, Asia, North America, and Australia; some were senior and some were pre- and postdoctoral students. Faculty members and graduate students associated with the project presented their research at workshops and conferences worldwide. In addition, PEA facilitates the submission of grant proposals to outside agencies.

The Project in Geometry and Physics (PGP), established in 1987, provides opportunities for increased collaboration between mathematicians and physicists. The project hosts several scientific meetings each year and also sponsors a number of research seminars with distinguished scientists from inside and outside the UCSD community.

The Project on International Affairs (PIA) is one of the international programs within the Institute on International, Comparative, and Area Studies, focusing on economic and political interactions between states. The project serves to promote interdisciplinary research on international politics and international economics; disseminate current research to UCSD faculty and students; provide a multidisciplinary focal point for research and programming; and enhance campus and community understanding of international political and economic affairs.

The Project on Responsible Conduct of Research Education (RCR Education Project) was created in 2003 to promote RCR education both at UCSD and nationally. To achieve this goal, the RCR Education Project facilitated the formation of the Responsible Conduct of Research Education Committee (RCREC), a special interest focus for the Association for Practical and Professional Ethics. RCREC provides leadership to the research community in promoting education in the responsible conduct of research.

The RCR Education Project and RCREC are intended to be a broad-based coalition, representing medical, social, and behavioral research, and public and private institutions. Through these collaborations, the RCR Education Project will lay the foundations for RCREC to advance programs of RCR education, develop RCR education standards, certify or identify programs that meet those standards, facilitate the exchange of RCR education programs among research institutions, and develop outcome measures to evaluate the success of the endeavor. Specific objectives of RCREC are to: 1) promote RCR education as a central responsibility for any institution involved in research; 2) develop clear definitions for RCR education, including goals, standards, competencies, and methods for evaluating the effectiveness of programs; 3) assist institutions, RCR programs, and investigators in identifying and developing RCR education curricula and resources; 4) facilitate discussion and collaboration among federal agencies, public and private research institutions and organizations, professional societies, and businesses in developing, coordinating, and sharing new and existing RCR educational programs within the research community; and (5) identify and overcome barriers to fulfilling RCR educational needs and requirements.

The Public Policy Research Project was established to facilitate interdisciplinary research and educational opportunities in public policy and business-government interaction. Through conferences, focused research groups, and lecture series, the project acts as a catalyst for interaction.
among economists, political scientists, moral philosophers, historians, cognitive scientists, anthropologists, and sociologists. The project supports programs that: (1) help faculty obtain funding that are engaged in policy-related research, (2) conduct research apprenticeships for doctoral students working on research projects dealing with issues and processes of public policy, and (3) provide technical support and arrange faculty-proposed conferences within the scope of the project’s mission statement.

**Natural Reserve System (NRS)**

The **Natural Reserve System (NRS)** was founded to establish and maintain significant examples of California’s diverse ecosystems and terrain. These reserves are used for teaching and research in all disciplines, from geology and environmental sciences to anthropology and art. Faculty and students of the University of California and other institutions are encouraged to use any of the thirty-four reserves in the system for serious academic pursuits. The San Diego campus administers the following four reserves:

**Dawson Los Monos Canyon Reserve:** This 218-acre reserve is located in the cities of Carlsbad and Vista in north coastal San Diego County. Its young, stream-cut valley contains a year-round creek with precipitous north- and south-facing slopes. The major habitat types are Southern Riparian Woodland, Diegan Coastal Sage Scrub, Perennial Coastal Stream, Coast Live Oak Woodland, Mixed Grassland of native bunchgrass and introduced annuals, and South Coastal Mixed Chaparral. This area is also of unique and significant historical and archaeological value. A small field station provides opportunities for small laboratory classes, overnight stays, and on-site research.

**Elliott Chaparral Reserve:** Located ten miles to the east of campus, this 107-acre reserve, adjacent to the large expanse of Marine Corps Air Station Miramar that is undeveloped, features Chamise Chaparral typical of the Southern California coastal plain and a large stand of mature planted eucalyptus. It is readily available during a normal three-hour lab period or for term paper-length field studies as well as for more lengthy projects.

**Kendall-Frost Mission Bay Marsh Reserve:** This sixteen-acre reserve, together with the city of San Diego’s contiguous Northern Wildlife Preserve, constitute the last remaining forty acres of tidal salt marsh on Mission Bay and one of the few such wetlands remaining in Southern California. It is recognized for the habitat it provides for several rare and endangered birds including the light-footed clapper rail, Belding’s savannah sparrow, and the California least tern, as well as many resident and migratory shorebirds and waterfowl, and several fish species. An on-site trailer houses limited residential and laboratory facilities, and extensive facilities exist within ten miles on the UCSD main campus and at the Scripps Institution of Oceanography. There are opportunities for studying restoration ecology of upland and tidal habitats.

**Scripps Coastal Reserve:** This reserve consists of disjunct shoreline and cliff-top (or “knoll”) portions. The shoreline part consists of the 67-acre San Diego Marine Life Refuge extending seaward 1,000 feet from the high tide line, and surrounding the Scripps Institution of Oceanography (SIO) Pier. Habitats include sandy beach and submerged plain, to 60 feet below mean lower low water, seasonally exposed cobble beach, rocky reef, pier pilings, and upper submarine canyon ledges. Habitats of the clifftop knoll and canyons include coastal sage scrub, maritime succulent scrub, southern coastal mixed chaparral, and disturbed grassland. The latter is particularly suitable for ecological restoration experiments. This reserve is enhanced by the availability of the laboratories and facilities of adjacent SIO and the main UC San Diego campus.

Degree Programs

The school offers its M.B.A. degree program in several formats to accommodate the educational needs of a broad range of students. These formats include a full-time M.B.A. program and the FlexMBA, specifically designed for working professionals and offered in FlexWeekend and FlexEvening formats.

The school’s M.B.A. program emphasizes the business issues faced by innovation-driven organizations, with a particular interest in science- and technology-driven innovation and change. It provides a thorough grounding in the fundamentals of business and management in a global environment and builds on this with a distinctive curriculum focused on the implications of management principles and business realities for organizations driven by innovation. Special emphasis is placed on the ways in which ideas and innovations move into the marketplace.

The school’s M.B.A. program enables students to develop:

- knowledge of business fundamentals and their application to real-world situations
- analytical skills for evaluating information and making rigorous decisions
- an understanding of organizations and the skills essential to collaborating with and managing people effectively
- an integrated understanding of the complex global, technological, and governmental environments in which organizations operate
- advanced abilities to assess the implications of cutting-edge scientific and technological developments for business and to move ideas from development to the marketplace
- effectiveness in communication, collaboration and teamwork, and leadership
- a commitment to ethical behavior and to integrity in business practice

The FlexEvening and FlexWeekend M.B.A. formats are designed to meet the educational needs of working professionals who have gained or anticipate gaining managerial or leadership roles in their organizations. The full-time M.B.A. is designed for those in early or mid-career seeking career growth or change.

Faculty

Under the leadership of founding Dean Robert S. Sullivan, the Rady School is attracting faculty members who are world-renowned experts in their respective fields. Information on faculty is available on the school’s Web site.

For further information, refer to the Rady School of Management Web site at http://rady.ucsd.edu or contact M.B.A. Admissions at (858) 534-0864 or by e-mail at MBAAdmissions@ucsd.edu.
The faculty of the School of Medicine is committed to nurturing and reinforcing the attributes that are important in the making of a doctor—dedication, compassion, and intellectual curiosity.

The goal of the medical school curriculum, clinical experience, and faculty-student interactions is to develop well-trained, scientifically informed, and conscientious physicians prepared for the changing conditions of medical practice and continuing self-education. Students acquire understanding of the basic medical sciences and clinical disciplines and are encouraged to choose their own areas of interest for eventual development into careers in the broadly diversified medical community. Required course offerings are designed to provide students with a strong foundation upon which any medical specialty can be built.

The School of Medicine accepted its charter class in 1968. The founding faculty drew upon the strength of UC San Diego's existing basic science departments rather than recreating such departments for the new school. Today this unique relationship continues with faculty from campus departments joining faculty from the School of Medicine's fourteen departments in teaching the core courses in medicine. Both preclinical and clinical courses are taught by UCSD faculty physicians who also have active patient caseloads. Courses are continually evaluated and updated by interdisciplinary course committees.

An honors, pass, fail grading system puts the emphasis on mastering the knowledge, skills, and behaviors that students need to practice medicine. The honors grade is not used in the first quarter of year one (only) to allow students to make a smooth and lower-pressure transition to medical school. The honors grade is not used to rank the class numerically but to acknowledge students who have demonstrated superior academic performance. Students receive individual narrative evaluations written by the faculty.

Students at the UCSD School of Medicine are encouraged to explore a variety of clinical, laboratory, and community-based experiences.

UCSD facilities are the main sites for clinical education and are licensed for 530 beds. The majority of UCSD inpatients are admitted at UCSD Medical Center-Hillcrest, where a number of Regional Care Centers are located, including San Diego and Imperial Counties' only Level I Trauma Center and Burn Center. The UCSD Ambulatory Care Center is located across the street from the hospital tower.

In July 1993, a 120-bed general medical-surgical hospital, The John M. and Sally B. Thornton Hospital, opened at UCSD Medical Center-La Jolla which is located on the La Jolla campus. Adjacent to the Thornton Hospital is the Perlman Ambulatory Care Center, the Moores Cancer Center, and the Shiley Eye Center.

The Veterans Affairs Medical Center, located adjacent to the School of Medicine campus in La Jolla, also is an important training site. The UCSD School of Medicine's partnership with Children's Hospital and Health Center enables students to treat a significant number of the region's most interesting and complex pediatric patients.

Outpatient experiences include private medical practice, community clinics, and home visitation programs. Students see patients in many of San Diego's hospitals and outpatient facilities, as well as in some of the disadvantaged neighborhoods of San Diego and Baja California, Mexico.

In all of their clinical experiences, UCSD medical students have an opportunity to see how physicians work as a team with physician assistants, nurses, nurse practitioners, laboratory technicians, social workers, physical and occupational therapists, pharmacists, and other health care professionals to provide health care.

There are many opportunities for students to participate in cutting-edge research in laboratories of UCSD School of Medicine researchers, as well as in the laboratories of scientists from the general UCSD campus, the Veterans Affairs Medical Center, the Salk Institute, The Scripps Clinic and Research Foundation, and some of the many private biomedical research companies in the region.

The medical school curriculum provides flexibility so that the individual needs and goals of each student can be met. The curriculum is divided into two major components: the core curriculum and the elective programs.

Elective opportunities constitute a substantial portion of classes during the first two years and close to 50 percent during the last two years. The core curriculum of the first two years is designed to provide each entering student an essential understanding of the fundamental disciplines underlying modern medicine. The core curriculum of the last two years is composed of the major clinical specialties taught in hospital settings, outpatient situations, and relevant extended-care facilities.

A Medical Scientist Training Program provides the opportunity for a limited number of students to earn both the M.D. and Ph.D. degrees over a six- to seven-year period of study.

The School of Medicine cooperates with the San Diego State University Graduate School of Public Health (SDSU-GSPH) in assisting interested students who wish to pursue a master's degree in public health (M.P.H.) while enrolled in medical school. Students can also receive an M.P.H. at other schools of public health, although a formal agreement exists only with the SDSU-GSPH.

The UCSD School of Medicine and the Department of Family and Preventive Medicine jointly offer a master of advanced studies (M.A.S.) in the leadership of healthcare organizations. The degree program permits a student to complete the doctor of medicine (M.D.) curriculum and studies leading to a master's degree in the leadership of healthcare organizations in a total of five years.

Each student is expected to develop an individualized independent study project in conjunction with a faculty member and to describe it in writing.

Freshman student enrollment is 134, and a total of 574 medical students were enrolled in 2008–09.

Selection Factors

Selection is based upon the nature and depth of scholarly and extracurricular activities undertaken, academic record, performance on the MCAT, letters of recommendation, and personal interviews.

The Admissions Committee gives serious consideration only to those applicants with above average GPA values and MCAT scores. The School of Medicine is seeking a student body with a broad diversity of backgrounds and interests reflecting our diverse population.

A complete catalog and information on the foregoing programs are available on the school's Web page http://meded.ucsd.edu/catalog/.

For additional information about the UCSD School of Medicine and its programs, write or call:

Programs for Prospective Medical Students

UCSD offers no special premedical major. An undergraduate student considering medicine as a career may choose any major or concentration area leading to the bachelor's degree, provided that he or she elects those additional courses which the medical school of his or her choice may require for admission. Admission requirements differ among medical schools, but most desire a solid foundation in the natural sciences–biology, chemistry, physics, mathematics–and a broad background in the humanities, social sciences, and communication skills. A premedical/dental advisory program is available through the campuswide Career Services Center.

Master of Advanced Studies (MAS) in Leadership of Healthcare Organizations

The UCSD Department of Family and Preventive Medicine in the School of Medicine offers a Master of Advanced Studies (MAS) in the Leadership of Healthcare Organizations. The degree is designed to meet the needs of health care professionals who have clinical and executive or management responsibilities. All courses will be held in the late afternoon, evenings, and weekends for the convenience of working professionals. Extension's EdVantage provides administrative support for the program. Further information on the degree program may be obtained by contacting UCSD.

The newest health sciences professional school on the UC San Diego campus is the Skaggs School of Pharmacy and Pharmaceutical Sciences. Approved by the Regents in Summer 2000, the charter class of students was enrolled in fall 2002 and graduated in June 2006. The school provides an innovative curriculum dedicated to educating future pharmacy practitioners to provide the pharmaceutical care needs of our growing and increasingly diverse society. The goal of the doctor of pharmacy curriculum is to prepare students to be leaders in the profession of pharmacy and to provide them with the tools to practice effectively in a wide variety of currently existing and potential roles in academia, hospitals and clinics, long-term facilities and home care, government, health policy, the pharmaceutical industry, and innovative community pharmacy practice settings. It is expected that the emerging fields of pharmacogenomics and bioinformatics will have a profound influence on the future practice of pharmacy, and that graduates of the UCSD Skaggs School of Pharmacy and Pharmaceutical Sciences will be in an excellent position to bring these advances to the patient care setting.

The Skaggs School of Pharmacy and Pharmaceutical Sciences currently enrolls sixty students in each class. The recently completed Pharmaceutical Sciences Building and Health Sciences Education Center house the administrative, teaching, and research facilities of the school.

Rather than duplicate existing departments on the UCSD campus and in the School of Medicine, the faculty of the school draw upon the strengths of the basic and biomedical science departments that have provided an outstanding education to undergraduate, graduate, and medical students for more than thirty years. Faculty from campus departments and the School of Medicine join Skaggs School of Pharmacy and Pharmaceutical Sciences faculty in teaching the preclinical courses in the curriculum. Clinical faculty, who are active practitioners in a variety of medical center, community, and industry locations, provide both classroom instruction as well as student guidance during advanced pharmacy practice clinical experiences.

The curriculum is dynamic, under constant review, and using faculty and student input, updated by interdisciplinary faculty committees. Presently, the four-year curriculum leading to the doctor of pharmacy degree is designed as follows:

The San Diego region ranks third in the nation in the development of new biotechnology and
the school is developing relationships with this burgeoning biotechnology industry as well as with the pharmaceutical industry on the La Jolla mesa. There are advanced practice and research experiences available to students in these exciting new areas of practice.

The common required and elective coursework taken by pharmacy and medical students, and advanced practice clinical experiences, where medical and pharmacy students work closely together, have been created to foster the development of cooperation between the professions as well as to develop an appreciation for the unique roles that each professional provides in the care of patients.

**Selection Factors**

The Admissions Committee seeks a diverse pool of applicants who have demonstrated strong academic ability in both the required prerequisite coursework and in their entire academic career, and who have a wide breadth of extracurricular interests. In addition, the committee selects applicants for matriculation who have demonstrated the personal qualities of intelligence, maturity, integrity, and dedication to the ideal of service to society, and who are best suited for meeting the educational goals of the school. The ability to express oneself clearly in both oral and written English is essential. The School of Pharmacy and Pharmaceutical Sciences is committed to admitting students with diverse cultural, economic, and social backgrounds. Although grade-point average is an important factor, it is not the sole criterion for acceptance. In addition to intellectual and academic competence, the Admissions Committee considers communication skills, leadership ability, community service, and health care-related experience. Preference for admission is afforded to California residents when all other selection factors are equal, and consideration at that juncture is given only to applicants who are either United States citizens or permanent residents.

All students are enrolled in the full-time, four-year professional program leading to the doctor of pharmacy degree (Pharm.D.). No students in advanced standing, transfer students from other schools of pharmacy, or part-time students are accepted. All students enter at the first-year level.

The faculty of the Skaggs School of Pharmacy and Pharmaceutical Sciences has implemented a seven-year B.S./Pharm.D. program for UCSD undergraduates and a Pharm.D./Ph.D. program. Information on each of these programs is available on the School of Pharmacy Web site.

For additional information about the UCSD Skaggs School of Pharmacy and Pharmaceutical Sciences, visit the school Web site, write, call, or e-mail:

Scripps Institution of Oceanography

For more than a century, Scripps Institution of Oceanography has been dedicated to providing exceptional educational opportunities. Scripps’ excellence in scientific research is accompanied by its leadership in education, with undergraduate and graduate courses in a variety of marine and earth science disciplines.

Scripps is one of the oldest, largest, and most important centers for marine and earth science research, education, and public service in the world. Its preeminence in marine and earth sciences is reflective of its excellent programs, distinguished faculty and research scientists, and outstanding facilities.

Scripps was founded in 1903 as an independent biological research laboratory, which became an integral part of the University of California in 1912. At that time, the laboratory was given the Scripps name in recognition of donors Ellen Browning Scripps and E. W. Scripps.

In all, Scripps occupies fifty-five buildings on 170 acres along the Pacific coastline below the mesa on which the UC San Diego main campus is located. The institution enrolls more than 220 graduate students, and has over 1,200 staff. Annual expenditures exceed $160 million.

Research at Scripps encompasses physical, chemical, biological, geological, and geophysical studies of the oceans. Among the hundreds of research programs that may be under way at any one time are studies of air-sea interaction, climate prediction, earthquakes, the physiology of marine animals, marine chemistry, beach erosion, the marine food chain, the ecology of marine organisms, the geological history of the ocean basins, and the multidisciplinary aspects of global change and the environment.

Scripps operates four ships and one floating instrument platform in support of oceanographic research programs conducted by Scripps researchers and oceanographers from other institutions throughout the world. Cruises range from local, limited-objective trips to far-reaching expeditions in the world’s oceans.

Investigations supported by contracts and grants, primarily federal, cover a wide latitude of marine research. Scripps is organized into three research administrative sections: biology, earth sciences, and oceans and atmosphere. The three sections are composed of smaller disciplinary and multidisciplinary research units: the Climate, Atmospheric Science, and Physical Oceanography Division, Geosciences Research Division, Integrative Oceanography Division, Marine Biology Research Division, Marine Physical Laboratory, Center for Marine Biotechnology and Biomedicine, Center for Marine Biodiversity and Conservation, Center for Observations, Modeling, and Prediction at Scripps, the Scripps Genome Center, and the La Jolla laboratory of the University of California’s Cecil H. and Ida M. Green Institute of Geophysics and Planetary Physics.

Other specialized groups are also located on campus. The California Sea Grant College Program, a systemwide program with thirty to fifty projects and approximately forty trainees supported on California campuses and in several specialized research units, is headquartered at Scripps. The Southwest Fisheries Science Center (SWFSC), located near the Scripps campus, is one of thirty major laboratories and centers operated by the National Marine Fisheries Service, a component of the National Oceanic and Atmospheric Administration of the U.S. Department of Commerce. Also, the Inter-American Tropical Tuna Commission is colocated at SWFSC.

A ship operations and marine technical support unit provides essential services and facilities to all research units of the institution.

Birch Aquarium at Scripps provides a wide variety of educational courses in the marine sciences for students from primary grades to high school level. UCSD students may become involved in work-study programs or serve as volunteers or aquarist trainees. A limited number of students can be accommodated for a four-unit course in independent study by arrangement with a faculty member and the aquarium director. Aquarium staff also teach a UCSD graduate/undergraduate course called Communicating Ocean Sciences to Informal Audiences (COSIA) once each academic year. The Aquarium facility’s resources include a natural habitat groupings of marine life from local and Gulf of California waters; many of these marine groups are on display in the aquarium. The museum exhibits present basic oceanography and earth science concepts and explain research undertaken at Scripps. The aquarium is open from 9:00 a.m. to 5:00 p.m. daily.

Scripps’ educational program includes undergraduate and graduate education. Approximately ninety professors are complemented by an academic staff of more than 200 scientists, many of whom have a regularly scheduled role in the instructional program. Scripps offers an undergraduate degree (B.S.) in earth sciences, a contiguous B.S./M.S. degree in earth sciences, and an interdisciplinary minor in marine science.

In addition, the Scripps Center for Marine Biodiversity and Conservation, in cooperation with UC San Diego’s Extended Studies and Public Programs, has established a program leading to a master of advanced studies in marine biodiversity and conservation.

Many Scripps scientists also teach courses in undergraduate programs such as biology, engineering, and environmental systems. Scripps’ graduate program has grown hand in hand with the research programs. Graduate students are typically admitted as candidates for a Ph.D. degree. All educational activities are located in the Scripps Department. Graduate educational programs are divided into eight curricular groups: biological oceanography, physical oceanography, marine biology, geological sciences, marine chemistry and geochemistry, geophysics, climate sciences, and applied ocean sciences.

Graduate students enter oceanography with extremely varied interests and backgrounds—naturalists, explorers, engineers, and theorists from the United States and many foreign countries. One thing they have in common, however, is that they come to Scripps with a very strong understanding of science. Most students select positions as research assistants when they enter the program—a practice that not only gives them an early involvement with research, but also provides salaries. The student-faculty ratio at Scripps is about two to one; consequently, classes are small, and the student has the opportunity to work closely with his or her thesis advisor. Oceanography and earth sciences are interdisciplinary fields that allow for informal exchange and interaction on a variety of levels.

While at Scripps, students have for their use some of the nation’s most sophisticated and complete special laboratories and facilities for oceanographic and earth science studies covering a wide range of disciplines from biology and physiology to geophysics and atmospheric sciences. The Hydraulics Laboratory features a 90-foot stratified flow channel and a 150-foot wind-wave channel, and the Unified Laboratory Facility has scanning electron microscopes and other high-precision instruments. Among the many computer resources is access to the San Diego Supercomputer Center. The Scripps Library is the University of California’s major collection of marine science materials, with outstanding collections in oceanography, marine biology, and marine technology. It also specializes in atmospheric sciences, fisheries, geology, geophysics, and zoology. The various marine life and geological specimens housed at Scripps comprise a vast “library” available for scientific studies both within Scripps and at other institutions. Two underwater research areas that are part of the UC Natural Reserve System are adjacent to the Scripps campus. During a student’s tenure at Scripps, he
or she will have the opportunity to go to sea on any of Scripps’ four research vessels as well as those from other oceanographic institutions.

The combination of a large scientific staff and extensive facilities at Scripps provides an extraordinary opportunity for each student to enjoy close contact with existing oceanographic concepts and active participation in research.

See “Scripps Institution of Oceanography” in “Courses, Curricula, and Programs of Instruction” for further details on study programs, requirements, degrees, and courses.

The Graduate School of International Relations and Pacific Studies (IR/PS), at the University of California, San Diego, was created in 1986 as the University of California’s only professional school of international affairs. The school is unique in its geographical focus on the Pacific (the Americas and Asia). IR/PS is the only professional program in the United States to concentrate exclusively on the diverse political and economic systems of this region.

The school’s programs have been developed in response to the increasing importance of the Pacific in global economic and political affairs. When IR/PS was founded, the globe was still locked in the Atlantic-centric world of the cold war. Today, we see the emergence of nations such as China, Brazil, Korea, Singapore, and Mexico as important players in a globalized world. As a result, professionals who can understand and work in complex international environments are needed in both the public and private sectors. While previously looking to Europe as the site of its primary commercial, financial, and strategic interests, the United States is now shifting its attention westward toward the Pacific—a likely source of both extraordinary prospects and substantial challenges in this century.

The school’s primary objectives are to prepare students with an interest in these regions for positions of leadership in business, government, diplomacy, public service, and other fields; to serve as a center of excellence for research on regional economic, political, social, and security issues; and to promote dialogue on Pacific region issues of common concern.

1. The degree programs provide students with professional training for careers in international affairs and management, including jobs in industry, government, international organizations, foundations, academia, and research institutes. Students receive broad training across professional areas, enabling those seeking careers in government to appreciate the interests of the private sector and those planning business careers to understand decision-making in public organizations. The program combines core course work in applied social sciences with professional subjects, language training classes, and regional studies to provide students with the skills and knowledge to work effectively in the Pacific region.

2. IR/PS serves as a center for research on issues of common concern to the nations of the Pacific. Since the region has become a focal point of economic and security relations, the demand for information and research centered on this dynamic region has increased. Consequently, IR/PS is home to several renowned research institutes and programs, including the Institute on Global Conflict and Cooperation, the Center for U.S.-Mexican Studies, the Center on Pacific Economies, and the Global Information Industries Center. In addition, the school supports collaborative relationships within the UCSD community by partnering with institutions such as Scripps Institution of Oceanography, and the Institute of the Americas.

3. As part of the University of California system, IR/PS plays an important role in developing public awareness and understanding of the Pacific region. Programs of public outreach, including visiting lecturers, research seminars, and roundtable discussions, add to the information available to citizens and interest groups about international issues that affect their lives.

Degree Programs

The degrees offered by the school include a professional Master of Pacific International Affairs (M.P.I.A.); a Master of Advanced Studies in International Affairs (M.A.S.-I.A.); a Doctor of Philosophy (Ph.D.) in Political Science and International Affairs offered jointly with the Department of Political Science and a Doctor of Philosophy (Ph.D.) in Economics and International Affairs offered jointly with the Department of Economics; and a Bachelor of Arts/ Master of International Affairs (B.A./M.I.A.) offered jointly with the International Studies Program. Training emphasizes international relations, economics and management, public policy, country and regional studies, and languages of the region.

The B.A./M.I.A. and M.P.I.A. programs are distinctive in several ways. The programs

1. Expose students to the perspectives of both private business and public policymaking.

2. Offer specialized training in international politics, economics, management, environmental policy, public policy, and international development.

3. Provide language training necessary for professionals specializing in the countries of the Pacific.
4. Require students to focus their studies on the politics, culture, economics, and language of one Pacific country or region.

5. Create a laboratory for comparative analysis of economic management, foreign relations, policymaking, and development in the diverse nations of the Pacific.

The M.A.S. program is designed for midcareer professionals who seek specialized and advanced training in the field of international affairs. The program will complement their professional experience and prepare them to assume senior leadership positions in their fields. The program:

1. Exposes students to the perspectives of both private business and public policymaking.

2. Offers specialized training in international security, international political economy, and international public policy.

3. Creates a laboratory for comparative analysis of economic management, foreign relations, policymaking, and development in the diverse nations of the Pacific.

The Ph.D. in International Affairs is offered only in conjunction with the Ph.D. in political science. The Ph.D. program is designed for students who seek a rigorous training in a discipline along with a specialization in a specific policy area and regional expertise. Ph.D. students are required to demonstrate knowledge of a language linked to their regional specialization.

The master's and Ph.D. programs are distinct and separate. There is little overlap in the structure or requirements of the programs because their objectives are very different. The M.P.I.A. and M.A.S.-I.A. programs provide professional training for graduates who will pursue or further their international careers in management, government, and other fields. The doctoral program offers an academic education to a small number of students who will pursue international careers requiring advanced research capabilities at universities, corporations, government agencies, consulting firms, or other research organizations.

However, the M.P.I.A., M.A.S.-I.A. and doctoral programs do share a common intellectual framework. Both the master's and Ph.D. curriculums are designed to bring the theories, methods, and insights of various disciplines together to analyze policy issues of the Pacific and to blend the perspectives of public policy makers and private managers. The same faculty members teach and advise students in both programs.

Midcareer and other executive certificate programs are also offered by IR/PS. In particular, the Global Leadership Institute (GLI) is designed for working professionals seeking additional study in international management, international relations, and comparative public policy. Participants in the program spend up to one academic year at IR/PS. Under the auspices of the program, associates have the opportunity to further internationalize their knowledge and experience as well as enhance their professional development in such areas as finance, accounting, quantitative methods, econometrics, and long-range strategic planning. The program of study is tailored to individual interests under the guidance of the program's director and faculty advisors.

The Faculty

IR/PS has attracted an interdisciplinary faculty from such fields as economics, international relations, comparative politics, public policy, and linguistics. The various programs draw upon and contribute to research which focuses on the regions of the Pacific and on major issues that affect the region.

IR/PS places special emphasis on research in and teaching of topics of particular importance to the program. These topics currently include:

1. Studies of the Pacific as a system, including the interaction of the countries and regions within it (e.g., Latin American–Japanese economic relations, U.S. relations with both East Asia and Latin America, and the placement of the Pacific in the global system of international relations, both contemporary and historical).

2. Studies in international economics, management, and finance, including such subject areas as international competition, comparative industrial organizations, international trade and development, industrial relations, technological innovation, international financial structures, policies, institutions, and historical patterns of development.

3. Comparison of the trajectories of socioeconomic development among the countries of Asia and Latin America, including the exploration of differences and similarities in state-society relations, culture, entrepreneurship, linkage to the global economy, and geopolitical position.

4. Comparative analysis of patterns of policymaking in the countries of the Pacific region to understand how different governmental structures, economic systems, and social group interests shape the policy process and influence policy choices in such areas as budget allocation, regulation of industry, and foreign trade.

For further information, contact the Office of Admissions, Graduate School of International Relations and Pacific Studies, UC San Diego, 9500 Gilman Drive, La Jolla, CA 92039; (858) 534-5914, e-mail: irps-apply@ucsd.edu, Web site: http://irps.ucsd.edu.
Faculty are listed by their name, title, department, and college or school.

A

Abarbanel, Henry D. I., Professor, Physics, Revelle
Abrajano, Marisa A., Assistant Professor, Political Science, Warren
Abramson, Ian S., Professor, Mathematics, Muir
Acampora, Anthony, Professor Emeritus, Electrical and Computer Engineering, Revelle
Ackerman, Farrell, Professor, Linguistics, Marshall
Adams, Joseph A., Associate Professor, Pharmacology, School of Medicine
Adler, Amy, Associate Professor, Visual Arts, Revelle
Adler, Steven, Professor/Provost, Theatre and Dance/Warren, Roosevelt
Agler, Jim, Professor, Mathematics, Muir
Agnew, Duncan C., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Ahluwalia, Davinder P., Professor, Ethnic Studies, Marshall
Alac, Morana, Assistant Professor, Communication, Revelle
Alexander, Amy J., Associate Professor, Visual Arts, Marshall
Alexander, Nicholas M., Professor Emeritus, Pathology, School of Medicine
Algaze, Guillermo, Professor, Anthropology, Roosevelt
Ali, Sayed Nageeb, Assistant Professor, Economics, Sixth
Allen, Eric, Assistant Professor, Scripps Institution of Oceanography/Biological Sciences—Molecular Biology, Scripps Institution of Oceanography/Muir
Allison, Henry E., Professor Emeritus, Philosophy, Revelle
Allison, William S., Professor Emeritus, Chemistry and Biochemistry, Muir
Almutairi, Adah, Assistant Professor, Skaggs School of Pharmacy and Pharmaceutical Sciences, Skaggs School of Pharmacy and Pharmaceutical Sciences
Aluwihare, Lihini I., Associate Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Alvarez, Luis, Associate Professor, History, Sixth
Alvarez, Robert R., Professor, Ethnic Studies, Roosevelt
Amir, On, Assistant Professor, Rady School of Management, Rady School of Management
Anagnostaras, Stephan, Assistant Professor, Psychology, Warren
Anagnostopoulos, Georgios H., Professor, Philosophy, Warren
Ancoli-Israel, Sonia, Professor-in-Residence, Psychiatry, School of Medicine
Anderson, Donald W., Professor Emeritus, Computer Science and Engineering/Mathematics, Muir
Anderson, Michael, Lecturer (PSOE), Physics, Sixth
Anderson, Norman H., Professor Emeritus, Psychology, Muir
Anderson, Victor C., Professor Emeritus, Electrical and Computer Engineering/Scripps Institution of Oceanography, Scripps Institution of Oceanography/Muir
Andreoni, James R., Professor, Economics, Marshall
Anstis, Stuart, Professor, Psychology, Roosevelt
Antin, David A., Professor Emeritus, Visual Arts, Muir
Antin, Eleanor, Professor Emerita, Visual Arts, Muir
Antonovics, Kate, Lecturer (PSOE), Economics, Muir
Appelbaum, Mark, Professor, Psychology, Sixth
Arias-Castro, Ery, Assistant Professor, Mathematics, Warren
Armantrout, Rae, Professor, Literature, Warren
Armi, Laurence, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Armour, Jon Christopher, Lecturer (SOE), Biological Sciences—Neurobiology, Revelle
Arneson, Richard J., Professor, Philosophy, Marshall
Arnold, James R., Professor Emeritus, Chemistry and Biochemistry, Revelle
Aroyan, Raffi V., Professor, Biological Sciences—Cell and Developmental Biology, Marshall
Aron, Adam R., Assistant Professor, Psychology, Marshall
Arovos, Daniel P., Professor, Physics, Revelle
Arrehnius, Gustaf, Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Arvaniti, Amalia, Associate Professor, Linguistics, Warren
Arya, Guarav, Assistant Professor, Mechanical and Aerospace Engineering, Roosevelt
Asaro, Robert J., Professor, Structural Engineering, Revelle
Asbeck, Peter M., Professor, Electrical and Computer Engineering, Marshall
Atkinson, Richard C., Professor/Chancellor Emeritus/UC President Emeritus, Psychology/Cognitive Science, Marshall
Attiyeh, Richard E., Professor Emeritus, Economics, Revelle
August, Terrence W., Assistant Professor, Rady School of Management, Rady School of Management
Azam, Farooq, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography

B

Backus, George E., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Bada, Jeffrey L., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Baden, Scott B., Professor, Computer Science and Engineering, Sixth
Bafna, Vineet, Associate Professor, Computer Science and Engineering, Warren
Bailey, Frederick G., Professor Emeritus, Anthropology, Muir
Baird, Stephen M., Professor of Clinical Pathology Emeritus, Pathology, School of Medicine
Baker, Dewleen G., Associate Professor-in-Residence, Psychiatry, School of Medicine
Baker, Timothy S., Professor, Biological Sciences—Molecular Biology/Chemistry and Biochemistry, Roosevelt
Bakovic, Eric, Associate Professor, Linguistics, Muir
Balzano, Gerald J., Associate Professor, Music, Sixth
Bandaru, Prabhakar, Associate Professor, Mechanical and Aerospace Engineering, Sixth
Bank, Randolph E., Professor, Mathematics, Warren

Bellare, Mihir, Professor, Computer Science and Engineering, Muir
Belongie, Serge J., Associate Professor, Computer Science and Engineering, Muir
Bender, Edward A., Professor Emeritus, Mathematics, Muir
Benirschke, Kurt, Professor Emeritus, Reproductive Medicine/Pathology, School of Medicine
Benson, Andrew A., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Benson, David J., Professor, Structural Engineering, Marshall
Berg, Darwin K., Professor, Biological Sciences—Neurobiology, Warren
Berger, Wolfgang H., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Berkowitz, Ami E., Professor Emeritus, Physics, Warren
Berman, Eli, Associate Professor, Economics, Sixth
Berman, Francine D., Professor, Computer Science and Engineering, Sixth
Berman, Ronald S., Professor, Literature, Muir
Bertram, H. Neal, Professor Emeritus, Electrical and Computer Engineering, Revelle
Betts, Julian, Professor, Economics, Marshall
Bewley, Thomas R., Associate Professor, Mechanical and Aerospace Engineering, Sixth
Bier, Ethan, Professor, Biological Sciences—Cell and Developmental Biology, Sixth
Biernacki, Richard, Associate Professor, Sociology, Roosevelt
Biess, Frank P., Associate Professor, History, Warren
Bigby, Timothy D., Professor of Clinical Medicine, Medicine, School of Medicine
Binder, Amy, Associate Professor, Sociology, Marshall
Bitmead, Robert R., Professor, Mechanical and Aerospace Engineering, Warren
Blair-Loy, Mary, Associate Professor, Sociology, Sixth
Blanco, John D., Associate Professor, Literature, Muir
Blanco-Aguinaga, Carlos, Professor Emeritus, Literature, Marshall
Blantz, Roland C., Professor, Medicine, School of Medicine
Bloos, Colin M., Professor Emeritus, Pathology, School of Medicine
Blumberg, Rae L., Professor Emerita, Sociology, Marshall
Boateng, Akosua Boatema, Assistant Professor, Communication, Muir
Bohn, Roger E., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Bond, F. Thomas, Professor Emeritus, Chemistry and Biochemistry, Revelle
Borgo, David, Associate Professor, Music, Warren
Bosq, Gerry R., Professor, Medicine, School of Medicine
Both, Andrei, Professor, Theatre and Dance, Marshall
Boulanger, Lisa, Assistant Professor, Biological Sciences—Neurobiology, Muir
Bourne, Philip E., Professor, Pharmacology, School of Medicine
Bowles, Kenneth L., Professor Emeritus, Computer Science and Engineering, Muir
Brace, Robert A., Professor Emeritus, Reproductive Medicine, School of Medicine
Bradbury, Jack W., Professor Emeritus, Biological Sciences—Ecology, Behavior, and Evolution, Muir
Braff, David L., Professor, Psychiatry, School of Medicine
Branson, James G., Professor, Physics, Marshall
Braswell, Geoffrey E., Associate Professor, Anthropology, Revelle
Bratton, Benjamin, Associate Professor, Theatre and Dance, Sixth
Brenner, Suzanne A., Associate Professor, Anthropology, Warren
Bridges-Kronick, Amy, Professor, Political Science, Marshall
Briggs, Steven P., Professor, Biological Sciences—Cell and Developmental Biology, Revelle
Brink, David O., Professor, Philosophy, Muir
Britton, Karen T., Professor-in-Residence Emerita, Psychiatry, School of Medicine
Brodkey, Linda, Professor, Literature, Warren
Brody, Stuart, Professor, Biological Sciences—Molecular Biology, Muir
Brown, Barry Alan, Associate Professor, Communication, Sixth
Brown, Gregory, Professor-in-Residence, Psychiatry, School of Medicine
Brown, Joan Heller, Professor, Pharmacology, School of Medicine
Brown, Kevin M., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Brown, Sandra A., Professor, Psychology/Psychiatry, Marshall/School of Medicine
Brown, Sheldon G., Professor, Visual Arts, Sixth
Brown, Willie C., Associate Professor Emeritus, Biological Sciences—Cell and Developmental Biology, Marshall
Broz, J. Lawrence, Associate Professor, Political Science, Revelle
Brueckner, Keith A., Professor Emeritus, Physics, Revelle
Brunton, Laurence L., Professor, Pharmacology/Medicine, School of Medicine
Brydges, Stacey, Lecturer (PSOE), Chemistry and Biochemistry, Muir
Bryson, Norman, Professor, Visual Arts, Muir
Buckingham, Michael J., Professor, Marine Physical Laboratory, Scripps Institution of Oceanography
Buckley, Steven, Associate Professor, Mechanical and Aerospace Engineering, Muir
Buckwalter, James F., Assistant Professor, Electrical and Computer Engineering, Roosevelt
Bunch, James R., Professor, Mathematics, Warren
Burbidge, E. Margaret, University Professor Emerita, Center for Astrophysics and Space Sciences, Revelle
Burbidge, Geoffrey R., Professor Emeritus, Physics, Revelle
Burkart, Michael D., Associate Professor, Chemistry and Biochemistry, Warren
Burkhard, Walter A., Professor, Computer Science and Engineering, Warren
Burr, Anthony Ivan, Assistant Professor, Music, Marshall
Burrett, Alan, Acting Professor, Theatre and Dance, Sixth
Burton, Ronald S., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Buss, Samuel R., Professor, Mathematics, Roosevelt
Butler, Madeline, Lecturer (PSOE), Biological Sciences—Neurobiology, Revelle
Butov, Leonid, Professor, Physics, Warren
Bynum, Sarah Shun-lien, Associate Professor, Literature, Marshall

Forbes (Januszewski), Silke I., Assistant Professor, Economics, Warren
Forbes, Camille, Assistant Professor, Literature, Sixth
Forbes, Douglass Jane, Professor, Biological Sciences—Cell and Developmental Biology, Muir
Ford, Joseph, Professor, Electrical and Computer Engineering, Muir
Forman-Barzilai, Fonna, Assistant Professor, Political Science, Sixth
Fortes, P. A. George, Associate Professor, Biological Sciences—Neurobiology, Marshall
Fowler, James H., Associate Professor, Political Science, Sixth
Fox, Marye Anne, Professor/Chancellor, Chemistry and Biochemistry/UC San Diego, Roosevelt
Francheschetti, Massimo, Associate Professor, Electrical and Computer Engineering, Roosevelt
Frank, Ross H., Associate Professor, Ethnic Studies, Sixth
Frankel, Theodore T., Professor Emeritus, Mathematics, Revelle
Franks, Peter J. S., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Fredkin, Donald R., Professor Emeritus, Physics, Revelle
Freedman, Michael H., Professor Emeritus, Mathematics, Revelle
French, Kathleen A., Lecturer (SOE), Biological Sciences—Neurobiology, Revelle
Frenk, Margit, Professor Emerita, Literature, Marshall
Freund, Yoav S., Professor, Computer Science and Engineering, Roosevelt
Fricker, Helen A., Associate Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Friedman, Jonathan A., Professor, Anthropology, Sixth
Friedman, Richard E., Professor Emeritus, Literature, Muir
Friedmann, Theodore, Professor, Pediatrics, School of Medicine
Frieman, Edward A., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Fu, Xiang-Dong, Professor, Cellular and Molecular Medicine, School of Medicine
Fujitani, Takashi, Associate Professor, History, Roosevelt
Fuller, George M., Professor, Physics, Roosevelt
Fullerton, Eric, Professor, Electrical and Computer Engineering, Marshall
Fung, Yuan-Cheng B., Professor Emeritus, Bioengineering, Revelle

G
Gaasterland, Terry, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Galambos, Robert, Professor Emeritus, Neurosciences, School of Medicine
Galasko, Douglas, Professor-in-Residence, Neurosciences, School of Medicine
Gallaccio, Anya S., Professor, Visual Arts, Muir
Gallant, Thomas W., Professor, History, Muir
Gallo, Richard, Professor, Medicine/Pediatrics, School of Medicine
Galperin, Michael, Assistant Professor, Chemistry and Biochemistry, Roosevelt
Galton, Ian, Professor, Electrical and Computer Engineering, Muir
Gan, Wee Teck, Associate Professor, Mathematics, Warren
Ganiats, Theodore G., Professor, Family and Preventive Medicine, School of Medicine
Garsia, Adriano M., Professor, Mathematics, Revelle/School of Medicine
Gartzke, Erik A., Associate Professor, Political Science, Sixth
Gates, Kelly A., Assistant Professor, Communication, Sixth
Gee, Jeffrey, Professor-in-Residence, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Geiduschek, E. Peter, Professor Emeritus, Biological Sciences—Molecular Biology, School of Medicine/Roosevelt
Geiger, Eric A., Lecturer (PSOE), Theatre and Dance, Muir
Gentner, Timothy Q., Assistant Professor, Psychology, Sixth
George, Nadine A., Associate Professor, Theatre and Dance, Roosevelt
George, Rosemary M., Associate Professor, Literature, Roosevelt
Gere, Catherine M., Assistant Professor, History, Muir
Gerwick, William, Professor, Skaggs School of Pharmacy and Pharmaceutical Sciences/Scripps Institution of Oceanography
Getoor, Ronald K., Professor Emeritus, Mathematics, Revelle/School of Medicine
Geyer, Mark A., Professor-in-Residence, Psychiatry, School of Medicine
Ghiara, Jayant, Lecturer (PSOE), Biological Sciences—Cell and Developmental Biology, Marshall
Ghosh, Anirvan, Professor, Biological Sciences—Neurobiology, Sixth
Ghosh, Gourisankar, Professor, Chemistry and Biochemistry, Revelle
Ghosh, Partho, Professor, Chemistry and Biochemistry, Roosevelt
Gianneschi, Nathan C., Assistant Professor, Chemistry and Biochemistry, Sixth
Gibson, Carl H., Professor, Mechanical and Aerospace Engineering/ Scripps Institution of Oceanography, Revelle/Scripps Institution of Oceanography
Gibson, Clark, Professor, Political Science, Muir
Gieskes, Joris M.T.M., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Gilbert, J. Freeman, Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Gill, Gordon N., Professor Emeritus, Medicine/Cellular and Molecular Medicine, School of Medicine
Gill, Philip E., Professor, Mathematics, Marshall
Gille, Sarah T., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Gillin, Francis D., Professor-in-Residence Emerita, Pathology, School of Medicine
Gillman, Michael E., Professor Emeritus, Biological Sciences—EcoSystems, Behavior, and Evolution, Muir
Glaser, Amelia, Assistant Professor, Literature, Sixth
Glass, Christopher K., Professor, Medicine, School of Medicine
Gleson, Joseph, Associate Professor, Neurosciences, School of Medicine
Gneezey, Uri, Professor, Rady School of Management, Rady School of Management
Goddard, Joseph D., Professor, Mechanical and Aerospace Engineering, Sixth
Golan, Tal, Associate Professor, History, Warren
Goldberger, Marvin, Professor Emeritus, Physics, Warren
Golden, James W., Professor, Biological Sciences—Molecular Biology, Muir
Golden, Susan, Professor, Biological Sciences—Molecular Biology, Roosevelt
Goldfarb, Brian D., Associate Professor, Communication, Revelle
Goldman, Harvey S., Professor, Sociology, Revelle
Golodrath, Ananda, Assistant Professor, Biological Sciences—Molecular Biology, Marshall
Goldstein, Lawrence S., Professor, Cellular and Molecular Medicine, School of Medicine
Goldstein, Paul S., Associate Professor, Anthropology, Revelle
Goodall, Grant, Professor, Linguistics, Warren
Goodblatt, David, Professor, History, Muir
Goodkind, John M., Professor, Physics, Revelle
Gordon, Nora, Assistant Professor, Economics, Roosevelt
Gordon, Roger H., Professor, Economics, Warren
Gorin, Jean-Pierre, Professor, Visual Arts, Marshall
Gorman, Michael R., Professor, Psychology, Roosevelt
Gough, David A., Professor, Bioengineering, Marshall
Gould, Robert J., Professor Emeritus, Physics, Revelle
Goulian, Mehran, Professor Emeritus, Medicine, School of Medicine
Gourevitch, Peter A., Professor, Graduate School of International Relations and Pacific Studies/Political Science, Graduate School of International Relations and Pacific Studies/Roosevelt
Govil, Nitin P., Assistant Professor, Communication, Roosevelt
Graff Zivin, Joshua S., Associate Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Graham, Fan Chung, Professor, Mathematics/CSE, Muir
Graham, Ronald L., Professor, Computer Science and Engineering, Sixth
Granger, Clive W.J., Professor Emeritus, Economics, Warren
Granholm, Eric L., Professor-in-Residence, Psychiatry, School of Medicine
Grant, Igor, Professor, Psychiatry, School of Medicine
Green, Allyson, Professor, Theatre and Dance, Sixth
Green, Melvin H., Professor Emeritus, Biological Sciences, Revelle
Greenstein, Jack M., Associate Professor, Visual Arts, Muir
Griest, Kim, Professor, Physics, Roosevelt
Grinstein, Benjamin, Professor, Physics, Muir
Griswold, William G., Professor, Computer Science and Engineering, Sixth
Grossman, Alexander, Associate Professor, Physics, Warren
Gross, Mark W., Professor, Mathematics, Revelle
Groves, Philip M., Professor Emeritus, Psychiatry/Neurosciences, School of Medicine
Groves, Theodore, Professor, Economics, Revelle
Grush, Rick, Professor, Philosophy, Sixth
Guatelli, John, Professor, Medicine, School of Medicine
Guest, Clark C., Associate Professor, Electrical and Computer Engineering, Warren
Gupta, Rajesh, Professor, Computer Science and Engineering, Warren
Gusfield, Joseph R., Professor Emeritus, Sociology, Muir
Gutierrez, David G., Professor, History, Marshall
Guy, Nancy, Associate Professor, Music, Roosevelt
Guza, Robert T., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography

H
Haas, Richard H., Professor, Neurosciences/Pediatrics, School of Medicine
Haff, Leonard R., Professor Emeritus, Mathematics, Marshall
Haggard, Stephan M., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Hajnal, Zoltan L., Associate Professor, Political Science, Marshall
Halkin, Hubert, Professor Emeritus, Mathematics, Revelle
Halleck, DeeDee, Professor Emerita, Communication, Warren
Hallin, Daniel C., Professor, Communication, Marshall
Halov, Nikolay, Assistant Professor, Rady School of Management, Rady School of Management
Halm, Shelley, Professor, Neurobiology, Warren
Halter, Christopher P., Lecturer (SOE), Education Studies, Warren
Hamburger, Bruce, Associate Professor, Medicine, School of Medicine
Hamilton, Bruce, Associate Professor, Medicine, School of Medicine
Hamilton, James D., Professor, Economics, Roosevelt
Hampton, Randolph, Professor, Biological Sciences—Cell and Developmental Biology, Sixth
Hanna, Mark G., Assistant Professor, History, Revelle
Hansen, Lawrence A., Professor, Pathology/Neurosciences, School of Medicine
Hanson, Gordon, Professor, Graduate School of International Relations and Pacific Studies/Economics, Graduate School of International Relations and Pacific Studies/Warren
Hanson, Michael, Assistant Professor, Communication, Revelle
Hardimon, Michael, Associate Professor, Philosophy, Marshall
Harel, Guershon, Professor, Mathematics, Marshall
Harkins, Edwin L., Jr., Professor Emeritus, Music, Muir
Harper, Elvin, Professor Emeritus, Chemistry and Biochemistry, Marshall
Harris, Christine, Associate Professor, Psychology, Revelle
Harris, Jeffrey P., Professor, Surgery, School of Medicine
Harrison, Helen M., Professor Emerita, Visual Arts, Roosevelt
Harrison, Newton A., Professor Emeritus, Visual Arts, Roosevelt
Hartoumi, Valerie A., Associate Professor, Communication, Muir
Hastings, Philip A., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hasty, Jeffrey, Associate Professor, Bioengineering, Marshall
Haubrich, Richard A., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hauger, Richard L., Professor-in-Residence, Psychiatry, School of Medicine
Haviland, John B., Professor, Anthropology, Roosevelt
Havis, Allan, Professor/Provost, Theatre and Dance/Marshall, Muir
Hawkins, James W., Professor Emeritus, Scripps Institution of Oceanography, Revelle/Scripps Institution of Oceanography
Haxo, Francis T., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hayashi, Masaki, Professor Emeritus, Biological Sciences—Cell and Developmental Biology, Revelle
Haydu, Jeffrey M., Professor, Sociology, Roosevelt
Haygood, Margo G., Professor Emerita, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Haymet, Anthony, Professor/Vice Chancellor/Dean, Scripps Institution of Oceanography/Marine Science, Scripps Institution of Oceanography
Heaton, Robert K., Professor, Psychiatry, School of Medicine
Hedrick, Stephen M., Professor, Biological Sciences—Molecular Biology/Cellular and Molecular Medicine, Sixth/School of Medicine
Hegemier, Gilbert A., Professor, Structural Engineering, Revelle
Heinrich, Larissa N., Associate Professor, Literature, Sixth
Helinski, Donald R., Professor Emeritus, Biological Sciences—Molecular Biology, Marshall
Heller, Michael J., Professor, Nanoengineering/Bioengineering, Revelle
Helstrom, Carl W., Professor Emeritus, Electrical and Computer Engineering, Muir
Helton, J. William, Professor, Mathematics, Marshall
Henaff, Marcel, Professor, Literature, Warren
Hendershot, Myrl C., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hendrickson, David N., Professor, Chemistry and Biochemistry, Muir
Herbst, Matthew T., Lecturer (SOE), Making of the Modern World, Roosevelt
Hermann, Thomas C., Assistant Professor, Chemistry and Biochemistry, Sixth
Hernandez-Reguant, Ariana, Assistant Professor, Communication, Roosevelt
Hertz, Deborah, Professor, History, Revelle
Hertz, Richard K., Associate Professor, Mechanical and Aerospace Engineering, Warren
Hessler, Robert R., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Heyman, Gail D., Professor, Psychology, Warren
Hildebrand, John A., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hilliard, Steven A., Professor, Neurosciences, School of Medicine
Hilton, David R., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hirsch, Jorge E., Professor, Physics, Revelle
Hock, Louis J., Professor, Visual Arts, Sixth
Hodgkiss, William S., Jr., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Hoffmann, Alexander, Associate Professor, Chemistry and Biochemistry, Marshall
Hofmann, Alan F., Professor Emeritus, Medicine, School of Medicine
Hofstetter, Caroline, Lecturer (SOE), Education Studies, Revelle
Hogar, Anne, Professor, Mechanical and Aerospace Engineering, Warren
Hollan, James D., Professor, Cognitive Science, Revelle
Holland, John J., Professor Emeritus, Biology, Warren
Holland, Nicholas D., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography/Revelle
Holst, Michael J., Professor, Mathematics, Warren
Holway, David A., Associate Professor, Biological Sciences—Ecology, Behavior, and Evolution, Muir
Horwitz, Robert B., Professor, Communication, Marshall
Hoshi, Takeo, Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies/Roosevelt
Hoston, Germaine A., Professor, Political Science, Revelle
Houston, Alan C., Professor, Political Science, Roosevelt
Howden, William E., Professor, Computer Science and Engineering, Muir
Howe, Fanny Q., Professor Emerita, Literature, Warren
Howell, Stephen B., Professor, Medicine, School of Medicine
Hu, Ping C., Lecturer (SOE), Emerita, History, Revelle
Hu, Te C., Professor Emeritus, Computer Science and Engineering, Warren
Huang, Xiaohua, Assistant Professor, Bioengineering, Revelle
Huber, David E., Assistant Professor, Psychology, Marshall
Huerta, Jorge A., Professor, Theatre and Dance, Marshall
Hughes, Judith M., Professor, History, Roosevelt
Humphries, Tom L., Associate Professor, Education Studies/Communication, Marshall
Hunefeldt-Frode, Christine F., Professor, History, Marshall
Hutchins, Edwin L., Jr., Professor, Cognitive Science, Marshall
Hutchinson, Tara C., Associate Professor, Structural Engineering, Muir
Hwa, Terence T., Professor, Physics, Revelle

I/
Ideker, Trey, Associate Professor, Bioengineering, Warren
Ierley, Glenn R., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Iizuka, Naomi H., Professor, Theater and Dance, Muir
Imada, Adria L., Assistant Professor, Ethnic Studies, Revelle
Impagliazzo, Russell, Professor, Computer Science and Engineering, Marshall
Inman, Douglas L., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Insel, Paul A., Professor, Pharmacology/Medicine, School of Medicine
Intaglietta, Marcos, Professor, Bioengineering, Revelle/School of Medicine
Intriligator, Kenneth, Professor, Physics, Muir
Irigui-Madoz, Vicente J., Professor of Clinical Neurosciences, Neurosciences, School of Medicine
Irons, Peter H., Professor Emeritus, Political Science, Marshall
Isaacson, Jeffry S., Associate Professor, Neurosciences, School of Medicine
Isfahani-Hammond, Alexandra, Associate Professor, Literature, Sixth

J
Jackson, Gabriel, Professor Emeritus, History, Revelle
Jackson, Jeremy, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Jacobsen, Mark R., Assistant Professor, Economics, Sixth
Jacobson, Gary C., Professor, Political Science, Marshall
Jain, Ramesh C., Professor Emeritus, Electrical and Computer Engineering/Computer Science and Engineering, Roosevelt
James, Luther, Associate Professor Emeritus, Theatre and Dance, Muir
Jamora, Colin, Assistant Professor, Biological Sciences—Cell and Developmental Biology, Warren
Javidi, Tara, Assistant Professor, Electrical and Computer Engineering, Sixth
Jed, Stephanie H., Associate Professor, Literature, Muir
Jenik, Adrienne, Associate Professor, Visual Arts, Sixth
Jenkins, Elizabeth, Professor, Physics, Muir
Jenkins, Janis H., Professor, Anthropology, Sixth
Jennings, Patricia, Professor, Chemistry and Biochemistry, Roosevelt
Jensen, Henrik, Associate Professor, Computer Science and Engineering, Muir
Jernigan, Terry L., Professor-in-Residence, Psychiatry/Radiology, School of Medicine
Jeste, Dilip V., Professor-in-Residence, Psychiatry, School of Medicine
Jetz, Walter, Associate Professor, Biological Sciences—Ecology, Behavior, and Evolution, Muir
Jhala, Ranjit, Assistant Professor, Computer Science and Engineering, Roosevelt
Jin, Sungho, Professor, Mechanical and Aerospace Engineering, Sixth
Jin, Yishi, Professor, Biological Sciences—Neurobiology, Revelle
Johnson, Catherine L., Associate Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Johnson, Chalmers, Professor Emeritus, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies/Roosevelt
Johnson, Monte, Assistant Professor, Philosophy, Muir
Johnson, Randall S., Professor, Biological Sciences—Molecular Biology, Sixth
Johnson, Sara E., Assistant Professor, Literature, Roosevelt
Johnson, Tracy, Assistant Professor, Biological Sciences—Molecular Biology, Revelle
Jones, Barbara, Professor Emerita, Physics, Muir
Jones, Walton, Professor Emeritus, Theatre and Dance, Muir
Jordan, David K., Professor Emeritus, Anthropology, Warren
Joseph, Simpson, Associate Professor, Chemistry and Biochemistry, Roosevelt
Judd, Lewis L., Professor, Psychiatry, School of Medicine
Jules-Rosette, Bennetta W., Professor, Sociology, Muir

K
Kadonaga, James T., Professor, Biological Sciences—Molecular Biology, Revelle
Kagnoff, Martin F., Professor Emeritus, Medicine/Pediatrics, School of Medicine
Kahler, Miles E., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies/Roosevelt
Kahng, Andrew B., Professor, Computer Science and Engineering/Electrical and Computer Engineering, Revelle
Kalleres, Dayna, Assistant Professor, Literature, Revelle
Kamps, Mark P., Professor, Pathology, School of Medicine
Kane, Alex, Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies/Roosevelt
Kaplan, Sara C., Assistant Professor, Ethnic Studies, Marshall
Karin, Michael, Professor, Pharmacology, School of Medicine
Karin, Sidney, Professor-in-Residence Emeritus, Computer Science and Engineering, Warren
Karis, Alick, Professor, Music, Warren
Karten, Harvey J., Professor, Neurosciences/Psychiatry, School of Medicine
Kartik, Navin, Assistant Professor, Economics, Muir
Kastner, Miriam, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography/Muir
Kastner, Ryan, Associate Professor, Computer Science and Engineering, Revelle
Kaushansky, Kenneth, Professor, Medicine, School of Medicine
Kay, Steve A., Professor/Dean, Biological Sciences—Cell and Developmental Biology, Roosevelt
Kayali, Hasan, Associate Professor, History, Roosevelt
Kears, David R., Professor Emeritus, Chemistry and Biochemistry, Revelle
Keating, Brian, Assistant Professor, Physics, Muir
Keeling, Ralph F., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Kehler, Andrew, Professor, Linguistics, Roosevelt
Kelly, Carolyn J., Professor-in-Residence, Medicine, School of Medicine
Kelner, Michael J., Professor, Pathology, School of Medicine
Keltsoe, John R., Jr., Professor, Psychiatry, School of Medicine
Kennel, Charles F., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Kernell, Samuel H., Professor, Political Science, Warren
Kester, Grant, Associate Professor, Visual Arts, Roosevelt
Kheshti, Roshanak, Assistant Professor, Ethnic Studies, Sixth
Kiger, Amy, Assistant Professor, Biological Sciences—Cell and Developmental Biology, Roosevelt
Kim, Hyonny, Associate Professor, Structural Engineering, Muir
Kim, Judy E., Assistant Professor, Chemistry and Biochemistry, Sixth
Kim, Young-Han, Assistant Professor, Electrical and Computer Engineering, Revelle
Kips, Thomas J., Professor, Medicine, School of Medicine
Kirkland, Theo N., III, Professor-in-Residence, Pathology/Medicine, School of Medicine
Kirkpatrick, Susan, Professor Emerita, Literature, Muir
Kirsh, David J., Professor, Cognitive Science, Sixth
Kitchloo, Nitya, Associate Professor, Mathematics, Roosevelt
Klatch, Rebecca E., Professor, Sociology, Marshall
Klein, Rachel, Associate Professor, History, Warren
Kleinfeld, David, Professor, Physics, Warren
Kleissl, Jan, Assistant Professor, Mechanical and Aerospace Engineering, Marshall
Kluender, Robert E., Associate Professor, Linguistics, Sixth
Knoelton, Nancy, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Kobayashi, Yoshihisa, Assistant Professor, Chemistry and Biochemistry, Revelle
Kohn, Joshua R., Professor, Biological Sciences—Ecology, Behavior, and Evolution, Warren
Kokotovic, Milos, Associate Professor, Literature, Muir
Ko, Edward, Professor, Neurosciences, School of Medicine
Komives, Elizabeth A., Professor, Chemistry and Biochemistry, Roosevelt/School of Medicine
Komunjer, Ivana, Assistant Professor, Economics, Revelle
Koncni, Vladimir J., Professor, Psychology, Muir
Kontje, Todd C., Professor, Literature, Marshall
Koo, Garrett, Professor, Neurosciences, School of Medicine
Koo, Edward, Professor, Neuroscience, School of Medicine
Kooymen, Gerald L., Professor-in-Residence Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Kosmatka, John B., Professor, Structural Engineering, Warren
Kousser, Thaddeus B., Associate Professor, Political Science, Muir
Krasheninnikov, Sergei, Professor, Mechanical and Aerospace Engineering, Muir
Krause, Lawrence B., Professor Emeritus, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies/Roosevelt
Krauss, Ellis S., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Kraut, Joseph, Professor Emeritus, Chemistry and Biochemistry, Revelle
Kreutz-Delgado, Kenneth, Professor, Electrical and Computer Engineering, Warren
Kriegman, David, Professor, Computer Science and Engineering, Warren
Kripke, Daniel M., Professor-in-Residence Emeritus, Psychiatry, School of Medicine
Krishnan, Viswanathan, Professor, Rady School of Management, Rady School of Management
Kristan, William B., Jr., Professor, Biological Sciences—Neurobiology, Marshall
Kronick, Richard G., Professor, Family and Preventive Medicine, School of Medicine
Krstic, Miroslav, Professor, Mechanical and Aerospace Engineering, Muir
Krueger, Ingolf, Assistant Professor-in-Residence, Computer Science and Engineering, Warren
Krysi, Peter, Associate Professor, Structural Engineering, Muir
Ku, Walter H., Professor Emeritus, Electrical and Computer Engineering, Revelle
Kube, Paul R., Lecturer (SOE), Computer Science and Engineering, Sixth
Kubiak, Clifford P., Professor, Chemistry and Biochemistry, Warren
Kuczynski, Ronald T., Professor-in-Residence, Psychiatry, School of Medicine
Kuester, Falko, Associate Professor, Structural Engineering, Sixth
Kulik, James A., Professor, Psychology, Warren
Kummel, Andrew C., Professor, Chemistry and Biochemistry, Muir
Kuo, Jane, Lecturer (PSOE), History, Sixth
Kuperman, William A., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Kutas, Marta, Professor, Cognitive Science, Muir
Kuti, Julius G., Professor, Physics, Marshall
Kwak, Nancy H., Assistant Professor, History, Muir
Kyte, Jack E., Professor Emeritus, Chemistry and Biochemistry, Warren

Lake, David A., Professor, Political Science, Marshall
Lakoff, Andrew, Associate Professor, Sociology, Warren
Lakoff, Sanford A., Professor Emeritus, Political Science, Warren
Lal, Devendra, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Lampert, Lisa, Associate Professor, Literature, Revelle
Lampland, Martha, Associate Professor, Sociology, Roosevelt
Lanckriet, Gert, Assistant Professor, Electrical and Computer Engineering, Sixth
Landry, Michael R., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Lane, Thomas A., Professor, Pathology, School of Medicine
Langacker, Ronald W., Professor Emeritus, Linguistics, Revelle
Lanza di Scalea, Francesco, Associate Professor, Structural Engineering, Roosevelt
Larson, Lawrence, Professor, Electrical and Computer Engineering, Roosevelt
Larson, Philip C., Professor, Music, Roosevelt
Lasheras, Juan C., Professor, Mechanical and Aerospace Engineering, Marshall
Lau, Silvanus S., Professor, Electrical and Computer Engineering, Muir
Lauga, Eric, Assistant Professor, Mechanical and Aerospace Engineering, Sixth
Lawder, Standish D., Associate Professor Emeritus, Visual Arts, Warren
Lawson, Mark A., Assistant Professor-in-Residence, Reproductive Medicine, School of Medicine
Le, Dzung The, Associate Professor of Clinical Pathology, Pathology, School of Medicine
Lee, Edward N., Professor Emeritus, Philosophy, Revelle
Lee, Jin-Kyoung, Associate Professor, Literature, Warren
Lee, Sing H., Professor Emeritus, Electrical and Computer Engineering, Muir
Leffert, Hyam L., Professor, Pharmacology, School of Medicine
Lehmann, Bruce N., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Leichter, James, Associate Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Leer, Seth, Professor/Dean, Literature/Arts and Humanities, Muir
Lerner, Sorin, Assistant Professor, Computer Science and Engineering, Roosevelt

Magde, Douglas, Professor, Chemistry and Biochemistry, Warren
Malesky, Edward, Assistant Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Manaster, Alfred B., Professor Emeritus, Mathematics, Revelle
Mandler, George, Professor Emeritus, Psychology, Muir
Mandler, Jean M., Professor Emerita, Cognitive Science, Revelle
Mangolte, Babette M., Professor, Visual Arts, Roosevelt
Manohar, Aneesh V., Professor, Physics, Marshall
Manoury, Philippe, Professor, Music, Revelle
Manovich, Lev, Professor, Visual Arts, Sixth
Maple, M. Brian, Professor, Physics, Revelle
Mares, David R., Professor, Political Science, Muir
Marino, John A., Associate Professor, History, Sixth
Mariscal, George L., Professor, Literature, Warren
Markenscoff, Xanthippe, Professor, Mechanical and Aerospace Engineering, Revelle
Markow, Theresa A., Professor, Biological Sciences—Ecology, Behavior, and Evolution, Muir
Marsden, Alison L., Assistant Professor, Mechanical and Aerospace Engineering, Marshall
Marshall, Margaret C., Senior Lecturer (SOE), Theatre and Dance, Sixth
Marth, Jamey D., Professor, Cellular and Molecular Medicine, School of Medicine
Martí, Kurt, Professor Emeritus, Chemistry and Biochemistry, Revelle
Martin, Isaac, Assistant Professor, Sociology, Warren
Martinez Diaz, Sonia, Assistant Professor, Mechanical and Aerospace Engineering, Roosevelt
Martin-Cabrera, Luis, Assistant Professor, Literature, Revelle
Martz, Todd R., Assistant Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Marzullo, Keith, Professor, Computer Science and Engineering, Marshall
Masek, George E., Professor Emeritus, Physics, Revelle
Maslah, Eliezer, Professor, Neurosciences/Pathology, School of Medicine
Masouredis, Serafeim P., Professor Emeritus, Pathology, School of Medicine
Masry, Elias, Professor, Electrical and Computer Engineering, Muir
Masters, T. Guy, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Mathieu-Costello, Odile, Professor-in-Residence Emerita, Medicine, School of Medicine
May, Suzanne, Associate Professor, Family and Preventive Medicine/Biological Sciences—Neurobiology, School of Medicine
Mayberry, Rachel, Professor, Linguistics, Sixth
McCammon, James Andrew, Professor, Chemistry and Biochemistry/Pharmacology, Revelle/School of Medicine
McCubbins, Mathew D., Professor, Political Science, Marshall
McCulloch, Andrew D., Professor, Bioengineering, Muir
McDonald, Marianne, Professor, Theatre and Dance, Revelle
McEneaney, William M., Professor, Mechanical and Aerospace Engineering/Mathematics, Warren
McGinnis, William J., Professor, Biological Sciences—Cell and Developmental Biology, Marshall
McGowan, John A., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Mcllwain, Carl E., Professor Emeritus, Physics, Revelle
Mcintosh, Craig, Assistant Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
McKenzie, Craig R.M., Professor, Psychology/Rady School of Management, Revelle/Rady School of Management
McKittrick, Joanna M., Professor, Mechanical and Aerospace Engineering, Warren
McMorris, Trevor C., Professor Emeritus, Chemistry and Biochemistry, Marshall
McMurria, John R., Assistant Professor, Communication, Muir
McNeal, Keith E., Assistant Professor, Anthropology, Warren
Meade, Everard, Assistant Professor, History, Marshall
Medvetz, Thomas, Assistant Professor, Sociology, Revelle
Meeker, Michael E., Professor Emeritus, Anthropology, Revelle
Mehan, Hugh B., Jr., Professor, Sociology, Marshall
Mel, Stephanie, Lecturer (PSOE), Biological Sciences—Molecular Biology, Muir
Mellon, Pamela L., Professor, Reproductive Medicine/Neurosciences, School of Medicine
Melville, W. Kendall, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Mendis, D., Assocaite Professor, Electrical and Computer Engineering, Muir
Metzger, Thomas A., Professor Emeritus, History, Muir
Meyer, David A., Professor, Mathematics, Revelle
Meyer, Ursula, Senior Lecturer (SOE), Theatre and Dance, Warren
Meyers, Marc A., Professor, Mechanical and Aerospace Engineering, Revelle
Micciancio, Daniele, Associate Professor, Computer Science and Engineering, Marshall
Micou, Melissa, Lecturer (PSOE), Bioengineering, Marshall
Middleman, Stanley, Professor Emeritus, Mechanical and Aerospace Engineering, Warren
Miller, Arnold L., Professor Emeritus, Neurosciences, School of Medicine
Miller, David, Assistant Professor, Economics, Sixth
Miller, David R., Professor Emeritus, Mechanical and Aerospace Engineering, Revelle
Mills, Stanley E., Professor Emeritus, Biological Sciences—Cell and Developmental Biology, Muir
Milstein, Laurence B., Professor, Electrical and Computer Engineering, Warren
Minster, Jean-Bernard H., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Mitchell, Allan, Professor Emeritus, History, Roosevelt
Miyai, Katsumi, Professor, Pathology/Medicine, School of Medicine
Miyoshi, Masao, Professor Emeritus, Literature, Marshall
Mizisin, Andrew P., Professor, Pathology, School of Medicine
Molina, Mario, Professor, Chemistry and Biochemistry, Warren/Scripps Institution of Oceanography
Molina, Natalia M., Associate Professor, Ethnic Studies, Marshall
Molinski, Tadeusz, Professor, Chemistry and Biochemistry/Skaggs School of Pharmacy and Pharmaceutical Sciences, Sixth/Skaggs School of Pharmacy and Pharmaceutical Sciences
Montal, S., Professor, Biological Sciences—Neurobiology, Revelle
Monteón, Michael P., Professor, History, Marshall
Montrose, Louis A., Professor, Literature, Revelle
Mookherjea, Shayan, Associate Professor, Electrical and Computer Engineering, Warren
Moore, Bradley S., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Moore, F. Richard, Professor, Music, Revelle
Moore, James J., Associate Professor, Anthropology, Warren
Moore, John C., Professor, Linguistics, Muir
Mosshammer, Alden A., Professor Emeritus, History, Revelle
Muendler, Marc-Andreas, Assistant Professor, Economics, Revelle
Mukerji, Chandra, Professor, Communication, Marshall
Muller, Ulrich F., Assistant Professor, Chemistry and Biochemistry, Marshall
Munk, Walter H., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography/Warren
Murakami, Hidenori, Professor, Mechanical and Aerospace Engineering, Revelle
Muralidharan, Karthik, Assistant Professor, Economics, Sixth
Murphy, Thomas W., Jr., Assistant Professor, Physics, Sixth
Murre, Cornelis, Professor, Biological Sciences—Molecular Biology, Sixth
Myers, Robert R., Professor Emeritus, Anesthesiology/Pathology, School of Medicine
Myles, Eileen, Professor Emerita, Literature, Marshall

Najmabadi, Farrokh, Professor, Electrical and Computer Engineering, Roosevelt
Nakagawa, Terunga, Assistant Professor, Chemistry and Biochemistry, Sixth
Naoi, Megumi, Assistant Professor, Political Science, Revelle
Narruki, Susan M., Professor, Music, Warren
Naughton, Barry J., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Négyesy, János, Professor, Music, Muir
Netkin, Dana, Associate Professor, Philosophy, Roosevelt
Nelson, Leif D., Assistant Professor, Rady School of Management, Rady School of Management
Nemat-Nasser, Siavouche, Associate Professor, Chemical and Aerospace Engineering, Revelle
Nesbitt, Muriel N., Lecturer (SOE), Biological Sciences—Neurobiology, School of Medicine/Warren
Nesterenko, Vitali, Professor, Mechanical and Aerospace Engineering, Roosevelt
Newman, William A., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Newmark, Leonard D., Professor Emeritus, Linguistics, Revelle
Newsome, Elizabeth, Associate Professor, Visual Arts, Revelle
Newton, Alexandra, Professor, Pharmacology, School of Medicine
Ng, Kwai, Assistant Professor, Sociology, Warren

Olfe, Daniel B., Professor Emeritus, Mechanical and Aerospace Engineering, Revelle
O’Neill, Thomas M., Professor, Physics, Warren
Onuchic, José N., Professor, Physics, Muir
Opella, Stanley J., Professor, Chemistry and Biochemistry, Muir
Oprea, Dragos N., Assistant Professor, Mathematics, Roosevelt
O’Quigley, John, Professor Emeritus, Mathematics, Muir
Orailoglu, Alex, Professor, Computer Science and Engineering, Revelle
Orcutt, John A., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Oreskes, Naomi, Professor/Provost, History/Sixth College, Sixth
Orlitsky, Alon, Professor, Electrical and Computer Engineering, Marshall
Orloff, Marshall J., Professor Emeritus, Surgery, School of Medicine/Muir
Ortiz-Torres, Ruben, Professor, Visual Arts, Roosevelt
Oxman, Michael N., Professor Emeritus, Medicine/Pathology, School of Medicine
Ozyurek, Esra, Associate Professor, Anthropology, Roosevelt

Paar, Hans P., Professor, Physics, Roosevelt
Padden, Carol A., Professor, Communication, Sixth
Padoan, Paolo, Associate Professor, Physics, Warren
Palenik, Brian, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Palsson, Bernhard O., Professor, Bioengineering, Warren
Papakonstantinou, Yannis, Professor, Computer Science and Engineering, Roosevelt
Papen, George, Professor, Electrical and Computer Engineering, Sixth
Parish, Steven, Professor, Anthropology, Roosevelt
Park, Kyong, Associate Professor, Visual Arts, Sixth
Park, Lisa, Associate Professor, Ethnic Studies, Muir
Parker, Robert L., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Parra, Max, Associate Professor, Literature, Marshall
Parrish, Michael E., Professor, History, Muir
Pashler, Harold E., Professor, Psychology, Muir
Pasler, Jann C., Professor, Music, Roosevelt
Pasquale, Joseph C., Professor, Computer Science and Engineering, Marshall
Pasquinelli, Amy, Assistant Professor, Biological Sciences—Molecular Biology, Marshall
Pastor, Jennifer, Associate Professor, Visual Arts, Sixth
Patrick, Gentry, Assistant Professor, Biological Sciences—Neurobiology, Marshall
Patterson, Patricia A., Professor Emerita, Visual Arts, Muir
Patterson, Patrick H., Assistant Professor, History, Roosevelt
Paturi, Ramamohan, Professor, Computer Science and Engineering, Warren
Pearce, Roy Harvey, Professor Emeritus, Literature, Roosevelt
Pedersen, David E., Assistant Professor, Anthropology, Marshall
Penn, Nolan E., Professor Emeritus, Psychiatry, School of Medicine
Penner, Stanford S., Professor Emeritus, Mechanical and Aerospace Engineering, Revelle
Perlmutter, David M., Professor Emeritus, Linguistics, Revelle
Perrin, Charles L., Professor, Chemistry and Biochemistry, Revelle
Peterson, Laurence E., Professor Emeritus, Physics, Revelle
Petrovich, Victoria, Associate Professor, Theatre and Dance, Roosevelt
Pevzner, Pavel A., Professor, Computer Science and Engineering, Marshall
Phillips, David P., Professor, Sociology, Revelle
Pickowicz, Paul G., Professor, History, Muir
Pillus, Lorraine, Professor, Biological Sciences—Molecular Biology, Revelle
Pilz, Renate B., Professor-in-Residence, Medicine, School of Medicine
Piñeda, Jaime A., Associate Professor, Cognitive Science, Roosevelt
Pinkel, Robert, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Piñón, Ramón, Jr., Associate Professor Emeritus, Biology, Marshall
Plant, Rebecca, Assistant Professor, History, Muir
Plantamura, Carol, Professor Emerita, Music, Revelle
Pogliano, Joseph, Assistant Professor, Biological Sciences—Molecular Biology, Warren
Pogliano, Kit, Professor, Biological Sciences—Molecular Biology, Roosevelt
Politis, Dimitris, Professor, Mathematics, Roosevelt
Pomeroy, Earl, Professor Emeritus, History, Warren
Pomeroy, Robert S., Lecturer (PSOE), Chemistry and Biochemistry, Sixth
Poole, Keith T., Professor, Political Science, Sixth
Popescu, Cristian, Associate Professor, Mathematics, Revelle
Popkin, Samuel L., Professor, Political Science, Marshall
Porter, Lisa, Associate Professor, Theatre and Dance, Revelle
Posakony, James W., Professor, Biological Sciences—Cell and Developmental Biology, Marshall
Poster, Nancy G., Associate Professor, Anthropology, Roosevelt
Powell, Frank L., Jr., Professor, Medicine, School of Medicine
Powell, Henry C., Professor, Pathology, School of Medicine
Pozrikidis, Constantine, Professor Emeritus, Mechanical and Aerospace Engineering, Muir
Prather, Kimberly A., Professor, Chemistry and Biochemistry/Scripps Institution of Oceanography, Muir/Scripps Institution of Oceanography
Prestockt, Jeremy G., Associate Professor, History, Roosevelt
Price, Paul A., Professor, Biological Sciences—Molecular Biology, Muir
Printz, Morton P., Professor Emeritus, Pharmacology, School of Medicine
Propp, William H., Professor, History, Muir
Provence, Michael, Associate Professor, History, Sixth
Puckette, Miller S., Professor, Music, Sixth
Q
Qiao, Yu, Associate Professor, Structural Engineering, Sixth
Quest, Kevin B., Professor, Electrical and Computer Engineering, Warren
R
Rabin, Jeffrey M., Professor, Mathematics, Revelle
Radcliff, Pamela B., Associate Professor, History, Roosevelt
Radic, Stojan, Professor, Electrical and Computer Engineering, Revelle
Rahimi, Babak, Assistant Professor, Literature, Roosevelt
Ramachandran, Vilayanur S., Professor, Psychology, Marshall
Ramanathan, Ramachandra, Professor Emeritus, Economics, Revelle
Ramanathan, Veerabhadran, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Ramey, Garey, Professor, Economics, Warren
Ramey, Valerie A., Professor, Economics, Marshall
Ramsey, Claire, Associate Professor, Education Studies, Sixth
Randel, Fred V., Associate Professor Emeritus, Literature, Sixth
Rao, Bhaskar D., Professor, Electrical and Computer Engineering, Warren
Rao, Ramesh, Professor, Electrical and Computer Engineering, Sixth
Rapaport, David H., Professor, Surgery, School of Medicine
Rapaport, Samuel I., Professor Emeritus, Medicine/Pathology, School of Medicine
Rauch, James E., Professor, Economics, Marshall
Raymer, Keith, Professor, Psychology, Sixth
Rearden, C. Anne, Professor Emerita, Pathology, School of Medicine
Rebeiz, Gabriel, Professor, Electrical and Computer Engineering, Sixth
Reed, Sharon L., Professor, Pathology/Medicine, School of Medicine
Reid, Joseph L., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Reid, Roddy, Professor, Literature, Muir
Schaede, Ulrike, Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Schane, Sanford A., Professor Emeritus, Linguistics, Roosevelt
Scheffler, Immo E., Professor, Biological Sciences—Molecular Biology, Revelle
Schick, Steven E., Professor, Music, Sixth
Schkade, David, Professor, Rady School of Management, Rady School of Management
Schmid-Schoenbein, Geert W., Professor, Bioengineering, Muir
Schmidt, Robert J., Professor, Biological Sciences—Cell and Developmental Biology, Warren
Schneewind, Sarah, Associate Professor, History, Sixth
Schneider, Alan M., Professor Emeritus, Mechanical and Aerospace Engineering, Warren
Schneider, Jerry A., Professor Emeritus, Pediatrics, School of Medicine
Schoeninger, Margaret J., Professor, Anthropology, Marshall
Schrauzer, Gerhard N., Professor Emeritus, Chemistry and Biochemistry, Revelle
Schreiber, Darren, Assistant Professor, Political Science, Warren
Schreibman, Laura E., Professor, Psychology, Warren
Schroeder, Julian I., Professor, Biological Sciences—Cell and Developmental Biology, Warren
Schuckit, Marc A., Professor, Psychiatry, School of Medicine
Schudson, Michael S., Professor, Communication, Marshall
Schuller, Ivan K., Professor, Physics, Revelle
Schultz, Sheldon, Professor Emeritus, Physics, Marshall
Schurgers, Curt, Assistant Professor, Electrical and Computer Engineering, Sixth
Schwartz, Theodore, Professor Emeritus, Anthropology, Muir
Schweinsburg, Jason R., Associate Professor, Mathematics, Roosevelt
Sclater, John G., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Scull, Andrew T., Professor, Sociology, Roosevelt
Sebald, Anthony V., Associate Professor Emeritus, Electrical and Computer Engineering, Marshall
Seible, Frieder, Professor/Dean, Structural Engineering/Jacobs School of Engineering, Marshall
Sejnowski, Terrence J., Professor, Biological Sciences—Neurobiology, Muir
Selverston, Allen I., Professor Emeritus, Biological Sciences—Neurobiology, Warren
Semendeferi, Katerina, Associate Professor, Anthropology, Marshall
Send, Uwe, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Serlin, David H., Associate Professor, Communication, Warren
Seshadri, Kalyanasundaram, Professor, Mechanical and Aerospace Engineering, Marshall
Severinghaus, Jeffrey, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Shacham, Hovav, Assistant Professor, Computer Science and Engineering, Muir
Shadwick, Robert E., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Shafir, Gershon, Professor, Sociology, Roosevelt
Shah, Nayan B., Associate Professor, History, Warren
Sham, Lu Jeu, Professor, Physics, Warren
Shank, Adele E., Professor Emerita, Theatre and Dance, Marshall
Shank, Theodore J., Professor Emeritus, Theatre and Dance, Revelle
Shapiro, Vitali, Professor Emeritus, Electrical and Computer Engineering/Physics, Roosevelt
Sharma, Vivek A., Professor, Physics, Muir
Sharpe, Michael J., Professor Emeritus, Mathematics, Muir
Shearer, Peter M., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Shen, Kuiyi, Professor, Visual Arts, Roosevelt
Shenk, Norman AI, Lecturer (SOE) Emeritus, Mathematics, Revelle
Sher, Gila, Professor, Philosophy, Warren
Shevelow, Kathryn, Associate Professor, Literature, Muir
Shing, Benson, Professor, Structural Engineering, Marshall
Shirk, Susan L., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Shor, George G., Jr, Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Shpyrko, Oleg, Assistant Professor, Physics, Sixth
Shragge, Abraham, Lecturer (PSOE), Marshall, Marshall
Shu, Frank Hsia-San, Professor, Physics, Roosevelt
Shugart, Matthew F., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Shuler, Kurt E., Professor Emeritus, Chemistry and Biochemistry, Revelle
Siegel, Paul, Professor, Electrical and Computer Engineering, Roosevelt
Silva, Denise Ferreira da, Associate Professor, Ethnic Studies, Marshall
Silva, Ernest R., Professor, Visual Arts, Warren
Silva, Gabriel, Assistant Professor, Bioengineering, Sixth
Silverman, Gregg J., Professor-in-Residence, Medicine, School of Medicine
Simon, Elizabeth, Lecturer (PSOE), Computer Science and Engineering, Sixth
Singer, S. Jonathan, University Professor Emeritus, Biological Sciences—Cell and Developmental Biology, Revelle/School of Medicine
Sinha, Amitabha, Professor, Chemistry and Biochemistry, Warren
Sinha, Sunil, Professor, Physics, Roosevelt
Skelton, Robert E., Professor, Mechanical and Aerospace Engineering, Roosevelt
Skretny, John D., Professor, Sociology, Warren
Slantchev, Branislav L., Assistant Professor, Political Science, Roosevelt
Small, Lance W., Professor, Mathematics, Revelle
Smallwood, Dennis E., Associate Professor Emeritus, Economics, Warren
Smarr, Janet, Professor, Theatre and Dance, Revelle
Smarr, Larry, Professor, Computer Science and Engineering, Roosevelt
Smith, Cauleen, Assistant Instructor, Visual Arts, Marshall
Smith, Donald R., Professor Emeritus, Mathematics, Revelle
Smith, Douglas E., Associate Professor, Physics, Roosevelt
Smith, Douglas W., Professor Emeritus, Biological Sciences—Molecular Biology, Muir
Smith, Jennifer E., Assistant Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Smith, Laurie G., Associate Professor, Biological Sciences—Cell and Developmental Biology, Roosevelt
Smith, Peter H., Professor, Political Science, Marshall
Smith, Susan L., Associate Professor/Provost, Visual Arts/Muir, Muir
Snaith, Yolande, Professor, Theatre and Dance, Muir
Snoeren, Alex, Associate Professor, Computer Science and Engineering, Roosevelt
Sobel, Joel, Professor, Economics, Revelle
Solis, Faustina, Professor Emerita, Family and Preventive Medicine, School of Medicine
Sollberger, Harvey, Professor, Music, Muir
Somero, George N., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Somerville, Richard C. J., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Song, Bang-Sup, Professor, Electrical and Computer Engineering, Warren
Sorensen, Harold W., Professor Emeritus, Mechanical and Aerospace Engineering, Revelle
Sorkin, Linda S., Professor, Anesthesiology, School of Medicine
Souviney, Randall J, Senior Lecturer (SOE), Education Studies, Marshall
Spector, Deborah H., Professor, Biological Sciences—Molecular Biology, School of Medicine/Roosevelt
Spector, Stephen A., Professor, Pediatrics, School of Medicine
Spiro, Melford E., Professor Emeritus, Anthropology, Muir
Spitzer, Nicholas C., Professor, Biological Sciences—Neurobiology, Muir
Springer, Anna Joy, Assistant Professor, Literature, Sixth
Squire, Larry R., Professor, Psychiatry/Neurosciences/Psychology, School of Medicine/Warren
Stalbaum, Brett, Lecturer (PSOE), Visual Arts, Sixth
Stark, Harold M., Professor, Mathematics, Muir
Starr, Ross M., Professor, Economics, Warren
Stasch, Rupert S., Associate Professor, Anthropology, Warren
Steiger, Rand, Professor, Music, Sixth
Steinbach, Haim, Professor, Visual Arts, Muir
Steinberg, Daniel, Professor Emeritus, Medicine, School of Medicine
Steinmetz, Phel, Associate Professor, Visual Arts, Sixth
Sterbenz, Jacob, Assistant Professor, Mathematics, Sixth
Stern, Lesley, Professor, Visual Arts, Roosevelt
Stevens, Jane, Associate Professor, Music, Revelle
Stevens, Laura, Lecturer (PSOE), Mathematics, Sixth
Stiles, Joan, Professor, Cognitive Science, Muir
Storms, Lowell H., Professor-in-Residence Emeritus, Psychiatry, School of Medicine
Stramski, Dariusz, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Streeby, Shelley, Associate Professor, Literature, Roosevelt
Stroll, Avrum, Professor Emeritus, Philosophy, Revelle
Strom, Kaare, Professor, Political Science, Roosevelt
Strong, Tracy B., Professor, Political Science, Roosevelt
Strum, Shirley C., Professor, Anthropology, Revelle
Subramani, Suresh, Professor, Biological Sciences—Molecular Biology, Warren
Subramaniam, Shankar, Professor, Bioengineering, Roosevelt
Sugihara, George, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Suhl, Harry, Professor Emeritus, Physics, Revelle
Sullivan, Robert S., Professor/Dean, Rady School of Management, Rady School of Management
Sun, Yixiao, Assistant Professor, Economics, Roosevelt
Sung, Lanping Amy, Associate Professor, Bioengineering, Warren
Surko, Clifford M., Professor, Physics, Marshall
Swanson, Robert A., Professor Emeritus, Physics, Revelle
Swanson, Steven, Assistant Professor, Computer Science and Engineering, Revelle
Swartz, Marc J., Professor Emeritus, Anthropology, Muir
Swerdlow, Neal R., Professor, Psychiatry, School of Medicine
Sworder, David D., Professor, Electrical and Computer Engineering, Revelle

T
Talbot, Jan B., Professor, Mechanical and Aerospace Engineering, Muir
Talke, Frank E., Professor, Mechanical and Aerospace Engineering, Warren
Talley, Lynne D., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Tanaka, Stefan, Professor, History, Roosevelt
Tarin, David, Professor, Pathology, School of Medicine
Tartakovsky, Daniel M., Professor, Mechanical and Aerospace Engineering, Marshall
Tauber, Michael, Assistant Professor, Chemistry and Biochemistry, Marshall
Taur, Yuan, Professor, Electrical and Computer Engineering, Warren
Tauxe, Lisa, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Tay, William Shu-Sam, Professor Emeritus, Literature, Roosevelt
Taylor, Michael B., Assistant Professor, Computer Science and Engineering, Marshall
Taylor, Palmer W., Professor/Dean, Pharmacology/Pharmacy, School of Medicine/Skaggs School of Pharmacy and Pharmaceutical Sciences
Taylor, Susan S., Professor, Chemistry and Biochemistry/Pharmacology, School of Medicine
Tebo, Bradley M., Professor-in-Residence Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Tejada, Roberto, Associate Professor, Visual Arts, Marshall
Telyukova, Irina, Assistant Professor, Economics, Sixth
Terras, Audrey A., Professor, Mathematics, Revelle
Terry, Robert D., Professor Emeritus, Neurosciences/Pathology, School of Medicine
Tesler, Glenn P., Assistant Professor, Mathematics, Warren
Tezcan, F. Akif, Assistant Professor, Chemistry and Biochemistry, Marshall
Theodorakis, Emmanouil, Professor, Chemistry and Biochemistry, Muir
Thiemens, Mark H., Professor/Dean, Chemistry and Biochemistry/Physical Sciences, Marshall
Thiess, Frank B., Senior Lecturer (SOE) Emeritus, Mathematics, Marshall
Thomas, Ronald G., Professor, Family and Preventive Medicine/Neurosciences, School of Medicine
Thorpe, Charles R., Associate Professor, Sociology, Revelle
Ticho, Harold K., Professor Emeritus/Vice Chancellor Emeritus, Physics/Academic Affairs, Marshall
Timmer, C. Peter, Professor Emeritus, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Timmerman, Allan, Professor, Economics, Muir
Todd, Michael, Associate Professor, Structural Engineering, Muir
Todorov, Emanuel, Associate Professor, Cognitive Science, Roosevelt
Tosaka, Yasu-Hiko, Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies/Roosevelt
Tokuyasu, Kiyotaru, Professor-in-Residence Emeritus, Biological Sciences—Cell and Developmental Biology, Revelle
Tolley, Clinton, Assistant Professor, Philosophy, Sixth
Tompa, Gabor, Professor, Theatre and Dance, Sixth
Tonkovich, Nicole, Associate Professor, Literature, Muir
Tor, Yitzhak, Professor, Chemistry and Biochemistry, Sixth
Trauernicht, Doris A., Professor, Neurosciences/Pediatrics, School of Medicine
Traver, David, Assistant Professor, Biological Sciences—Cell and Developmental Biology, Revelle
Trigilio, Michael J., Lecturer (PSOE), Visual Arts, Warren
Trivedi, Mohan, Professor, Electrical and Computer Engineering, Warren
Troemel, Emily R., Assistant Professor, Biological Sciences—Cell and Developmental Biology, Warren
Trogler, William C., Professor, Chemistry and Biochemistry, Revelle
Troupe, Quincy, Professor Emeritus, Literature, Marshall
Truant, Cynthia M., Associate Professor, History, Roosevelt
Tsien, Roger K., Professor, Pharmacology/Chemistry and Biochemistry, School of Medicine/Revelle
Tsuang, Ming T., University Professor, Psychiatry, School of Medicine
Tu, Charles W., Professor, Electrical and Computer Engineering, Roosevelt
Tukey, Robert H., Professor, Pharmacology/Chemistry and Biochemistry, School of Medicine/Marshall
Tullsen, Dean, Professor, Computer Science and Engineering, Warren
Turetzky, Bertram J., Professor Emeritus, Music, Muir
Turner, Christina L., Associate Professor, Sociology, Roosevelt
Turner, Eric E., Professor-in-Residence, Psychiatry, School of Medicine
Tuszynski, Mark H., Professor, Neurosciences, School of Medicine
Tynan, George, Professor, Mechanical and Aerospace Engineering, Muir
Tytler, David R., Professor, Physics, Muir
V
Vacquier, Victor, Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Vacquier, Victor D., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Vahdat, Amin, Associate Professor, Computer Science and Engineering, Revelle
Valkanov, Rossen, Associate Professor, Rady School of Management, Rady School of Management
Van Den Einde, Yael Dahlia, Lecturer (PSOE), Structural Engineering, Muir
Van Young, Eric, Professor, History, Roosevelt
Vardy, Alexander, Professor, Electrical and Computer Engineering/Computer Science and Engineering, Warren
Varghese, George, Professor, Computer Science and Engineering, Muir
Varghese, Shyni, Assistant Professor, Bioengineering, Muir
Variki, Ajit P., Professor, Medicine/Cellular and Molecular Medicine, School of Medicine
Varni, James W., Professor-in-Residence Emeritus, Psychiatry, School of Medicine
Vasconcellos, Nuno, Associate Professor, Electrical and Computer Engineering, Roosevelt
Vasquez, Olga A., Associate Professor, Communication, Marshall
Vecchio, Kenneth S., Professor, Mechanical and Aerospace Engineering, Roosevelt
Vehrencamp, Sandra L., Professor Emerita, Biological Sciences—Ecology, Behavior, and Evolution, Muir
Verdicchio, Pasquale, Associate Professor, Literature, Sixth
Vernon, Wayne, Professor Emeritus, Physics, Revelle
Verstraete, Jacques B., Assistant Professor, Mathematics, Roosevelt
Vianu, Victor D., Professor, Computer Science and Engineering, Marshall
Vinnet, Joseph M., Associate Professor, Medicine, School of Medicine
Viterbi, Andrew J., Professor Emeritus, Electrical and Computer Engineering, Warren
Voelker, Geoffrey, Associate Professor, Computer Science and Engineering, Muir
W
Wadsworth, Adrian R., Professor, Mathematics, Warren
Wagner, Arthur, Professor Emeritus, Theatre and Dance, Muir
Wagner, Peter D., Professor, Medicine, School of Medicine
Wahlen, Martin, Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Waisman, Carlos H., Professor, Sociology, Marshall
Walk, Cynthia, Associate Professor Emerita, Literature, Roosevelt
Wallach, Nolan R., Professor, Mathematics, Roosevelt
Wallack, Jessica, Assistant Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Walter, Barbara F., Professor, Graduate School of International Relations and Pacific Studies, Graduate School of International Relations and Pacific Studies
Walter, Gernot F., Professor Emeritus, Pathology, School of Medicine
Wang, Delli, Assistant Professor, Electrical and Computer Engineering, Roosevelt
Wang, Jean Yin Jen, Professor, Biological Sciences—Molecular Biology, School of Medicine/Roosevelt
Wang, Jing, Assistant Professor, Biological Sciences—Neurobiology, Roosevelt
Wang, Joseph, Professor, Nanoengineering, Revelle
Wang, Wei, Assistant Professor, Chemistry and Biochemistry, Sixth
Ward, John F., Professor Emeritus, Radiology, School of Medicine
Wasserman, Stephen L, Professor, Medicine, School of Medicine
Wasserman, Steven A., Professor, Biological Sciences—Cell and Molecular Biology, Sixth
Wastal, Carrie, Lecturer (PSOE), Muir
Waters, Les, Professor Emeritus, Theatre and Dance, Roosevelt
Watkins, Eric, Professor, Philosophy, Revelle
Watson, Joel, Professor, Economics, Muir
Watson, Joseph W., Professor Emeritus, Chemistry and Biochemistry, Marshall
Watson, Kenneth M., Professor Emeritus, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Wavrlik, John J., Associate Professor Emeritus, Mathematics, Muir
Wayne, Don E., Associate Professor, Literature, Muir
Weare, John H., Professor, Chemistry and Biochemistry, Revelle
Webster, Nicholas J. G., Professor-in-Residence, Medicine, School of Medicine
Weinberger, Leor S., Assistant Professor, Chemistry and Biochemistry, Muir
Weinkove, Benjamin, Associate Professor, Mathematics, Sixth
Weiss, Ray F., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Weizman, Haim, Lecturer (PSOE), Chemistry and Biochemistry, Marshall
Welchman, John C., Professor, Visual Arts, Muir
Wenkert, Ernest, Professor Emeritus, Chemistry and Biochemistry, Revelle
Wenzl, Hans G., Professor, Mathematics, Marshall
Werner, Bradley T., Professor, Scripps Institution of Oceanography, Scripps Institution of Oceanography
Wesling, Donald T., Professor Emeritus, Literature, Roosevelt
Wesling, Megan E., Assistant Professor, Literature, Roosevelt
West, John B., Professor, Medicine, School of Medicine
Westman, Robert S., Professor, History, Muir
Wheeler, John C., Professor Emeritus, Chemistry and Biochemistry, Revelle
White, Halbert L., Professor, Economics, Revelle
White, Michelle J., Professor, Economics, Roosevelt
Whitehead, Mark C., Professor, Surgery, School of Medicine
Whitesell, James K., Professor, Chemistry and Biochemistry, Warren
Wickramasekera, Neshan, Assistant Professor, Mathematics, Sixth
Widener, Daniel, Assistant Professor, History, Sixth
Wieder, Harry H., Professor-in-Residence Emeritus, Electrical and Computer Engineering, Muir

Zivin, Justin A., Professor, Neurosciences, School of Medicine
Zou, Yimin, Associate Professor, Biological Sciences—Neurobiology, Sixth
Zuker, Charles, Professor, Biological Sciences—Neurobiology/Neurosicences, Revelle/School of Medicine
Zuniga, Elina, Assistant Professor, Biological Sciences—Molecular Biology, Muir
Key to Course Listings

Courses numbered 1 through 99 are lower-division courses and are normally open to freshmen and sophomores. Courses numbered 100 are Freshman Seminars.

Courses numbered 100 through 199 are upper-division courses and are ordinarily open only to students who have completed at least one upper-division course in the given subject, or six quarters of college work.

Courses numbered 200 through 299 are graduate courses and are ordinarily open only to students who have completed at least eighteen upper-division units basic to the subject matter of the course.

Courses numbered 300 through 399 are professional courses, which are specifically designed for teachers or prospective teachers.

Courses numbered 400 through 499 are other professional courses.

Sample Course Listing:

100 [see above] Title of Course (4) [number of quarter hours or units of credit]
Course Description. Prerequisites: [listed]. (F) [Quarter the quarter hours or units of credit]

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

197. Academic Internship Program (4, 8, 12)
Individual placements for field learning which are integrated with academic programs will be developed and coordinated by the program. A written contract involving all parties will include learning objectives, a project outline, and means of supervision and progress evaluation, and must be received prior to the beginning of the internship. Consent of faculty advisor and program chair required for all. Prerequisites: ninety units completed; 2.5 minimum cumulative GPA; at least two upper-division courses, preferably in a related field, completed by date of application; departmental stamp.

197PR. Academic Internship Program—PRIME Program (1)
Funded by an NSF grant, the summer-only PRIME Program places students in internships for field learning experience in Pacific Rim countries. Students must go through a written application and interview selection process. A written contract (required prior to start of internship) will include learning objectives, project outline, and means of supervision and evaluation. Prerequisites: ninety units completed; 2.5 minimum cumulative GPA; at least two upper-division courses, preferably in a related field, completed by date of application; departmental stamp.

THE MINOR

The African American Studies Minor is an interdisciplinary minor which is designed to lead to an understanding of the experiences of African Americans. The Core Requirement sets the stage for the formation and codification of an African American intellectual and political tradition into the twentieth century. The History and Context selection of courses focuses on the formation of identity through the lens of history and media. Politics and Society involves students in an investigation of the context between that forming identity and the social systems of urbanization, politics, and class stratification. Representation and Voice courses provide for a selection of performing and fine arts experiences as representations of African American culture.

CORE COURSES
(Choose ONE COURSE from the list below)

HILD 7A: Race and Ethnicity in the United States (4)
Lten 27: Introduction to Afro-African Literature (4)

HISTORY AND CONTEXT
(TWO COURSES selected from list below)

ETHN 105/USP 104: Ethnic Diversity and the City (4)
ETHN 140: Language and American Ethnicity (4)
ETHN 151: Ethnic Politics in America (4)
ETHN 152: Law and Civil Rights (4)
ETHN 163: Leisure in Urban America (4)
ETHN 164/MUS 153: African Americans and the Mass Media (4)
ETHN 165: Sex and Gender in African American Communities (4)
ETHN 166: The Black Press and Social Change (4)
ETHN 184: Black Intellectuals in the Twentieth Century (4)
ETHN 187: Black Nationalism (4)
HIUS 134: From Be Bop to Hip Hop: African American Cultural History Since 1945 (4)
HIUS 135B/ETHN 170B: Slavery and the Atlantic World (4)
HIUS 138/ETHN 167: African American History in War and Peace: 1917–Present (4)

African American Studies Minor

OFFICE: Thurgood Marshall College, Administration Building, Room 120

AFFILIATED FACULTY
Boatema Boateng, Assistant Professor, Communication
David Borgo, Associate Professor, Music
Robert Cancel, Associate Professor, Literature

Dennis Childs, Assistant Professor, Literature
Anthony Davis, Professor, Music
Zeinabu Davis, Professor, Communication
Fatima El-Tayeb, Assistant Professor, Literature
Ivan Evans, Associate Professor, Sociology
Camille F. Forbes, Assistant Professor, Literature
Nadine George, Associate Professor, Theatre and Dance
Michael Hanson, Assistant Professor, Communication
Sara Johnson, Assistant Professor, Literature
Bennetta Jules-Rosette, Professor, Sociology
Cecil Lytle, Professor Emeritus, Music
Gabriel Mendes, Assistant Professor, Ethnic Studies
Denise Ferreira da Silva, Associate Professor, Ethnic Studies
Cauleen Smith, Acting Associate Professor, Visual Arts
Pat Washington, Lecturer, Ethnic Studies
Megan Wesling, Assistant Professor, Literature
Daniel Widener, Assistant Professor, History
Winifred Woodhull, Associate Professor, Literature
African Studies Minor

OFFICE: 135 Social Science Building

African studies is an interdisciplinary minor that covers African topics and issues through a coordinated set of courses offered in the Departments of Anthropology, Communication, Ethnic Studies, History, Literature, Music, Political Science, Sociology, Theatre and Dance, and Visual Arts. In addition to the offerings at UC San Diego, opportunities for further study in Africa and Europe are available through the University of California Education Abroad Program, with programs in Ghana and South Africa as well as at the National University of Côte d’Ivoire, the Université de Paris V, the Université de Bordeaux II, and study abroad programs offered through other U.S. universities.

A number of African languages are available through the UCSD Department of Linguistics. Students may take independent study units and tutorials with faculty in the program to learn the languages of their respective areas of interest. In addition, students are encouraged to participate in special seminars and presentations offered annually by the African and African-American Studies Research Project. Students may take the seminars for credit by signing up for a 188/199 with a qualified African studies professor. A minor in African studies consists of seven total courses. Students may take no more than four courses in any one department. Also, a minimum of one course each from of the following three groups is required: Group A—Traditional Cultures and Premodern Africa, Group B—African Society and Politics, and Group C—African Expressive Culture.

The African studies minor provides students with a broad background in African history, societies, culture, and politics. Please contact Professor Bennetta Jules-Rosette in the Department of Sociology (Social Science Building, Rm. 471), (858) 534-4790 or the African Studies Office at (858) 822-0265 for more information. Quarterly course offerings are subject to change. Interested students should consult the program faculty for an up-to-date list.

GROUP A: TRADITIONAL CULTURES AND PREMODERN AFRICA

ANRG 104. Traditional African Societies and Cultures (4)
Com/Cul 118. Oral History (4)
Ethnic Studies 142. Languages of Africa (4)
HIAF 110. History of Africa to 1880 (4)
HIAF 120. History of South Africa (4)
HUIS 135. Slavery and the Atlantic World (4)

GROUP B: AFRICAN SOCIETY AND POLITICS

ANGN 183. Chiefdoms, States, and the Emergence of Civilizations (4)
Com/Cul 179. Colonialism and Culture (4)
Ethnic Studies 157. Ethnic Conflict in the Third World (4)
HIAF 111. Modern Africa since 1880 (4)
HIAF 130. African Society and the Slave Trade (4)
HIAF 140. Economic History of Africa (4)
Political Science 132A. Political Modernization Theory (4)
Political Science 135A. Ethnic Conflict in the Third World (4)
Political Science 1368. Comparative Politics and Political Culture (4)
Soc/C 148C. Power, Culture, and Social Revolt (4)
Soc/D 188A. Community and Social Change in Africa (4)
Soc/D 188J. Change in Modern South Africa (4)

GROUP C: AFRICAN EXPRESSIVE CULTURE

Com/Cul 127. Folklore and Communication (4)
Com/Cul 146. Culture and Thought (4)
Com/Cul 179. Colonialism and Culture (4)
LTGN 130. Novel and History in the Third World (4)

Anthropology stands at the nexus between the social sciences, biological sciences, and humanities. It is dedicated to understanding the worldwide diversity of social institutions and cultural traditions, past and present, as well as to studying our nearest nonhuman relatives. Because there is increasing awareness of the importance of anthropological factors in domestic and international relations, as well as in a number of health-related fields, a bachelor’s degree in anthropology has become accepted as a valuable preparation for careers in law, medicine, business, government, education, and various areas of public service. Anthropology majors can qualify for a California teaching credential from UC San Diego through the Education Studies program. The department offers a full range of courses in archaeology, as well as in biological, social, cultural, psychological, political, and linguistic anthropology. Courses include offerings that focus on specific societies or regions of the world—especially Latin America, Asia, and Oceania—as well as more theoretically oriented topics. The department offers undergraduate major and minor programs, a senior thesis program, an undergraduate internship program, and a graduate program leading to the doctoral degree. Students also may enroll in archaeological field school and study-abroad programs in the Middle East and Latin America.

THE UNDERGRADUATE PROGRAM

LOWER-DIVISION
Lower-division offerings in anthropology are concentrated in the core series: ANTH 1, 2, 3. These courses are designed to provide a comprehensive orientation to the ideas and methods of anthropological investigation and a familiarity with case materials from a number of different societies (ANTH 1), prehistoric eras (ANTH 2 and ANTH 3), and historical periods (ANTH 3).

Students who intend to major or minor in archaeological anthropology are advised to take ANTH 3. Students who intend to major or minor in biological anthropology must take ANTH 2 (or the equivalent), which is prerequisite for most upper-division biological anthropology courses.

ANTH 23, which may not be offered every year, satisfies the campuswide requirement for a course in American Cultures.

Students who have already completed ANTH 103 (or the older sequence ANPR 105, 106, and 107) may not receive academic credit for ANTH 1.

Other lower-division courses are offered from time to time and will vary from year to year.

UPPER-DIVISION
The Department of Anthropology offers many general interest and specialized courses at the upper-division level. In addition to satisfying the requirements of the anthropology major, many of these may satisfy the requirements of other majors.

THE MINOR
Students may choose a minor in anthropological archaeology, biological anthropology, or sociocultural anthropology. Each consists of seven anthropology courses. At least five of these courses must be upper-division, and at least four should be taken at UCSD. Transfer credits from other anthropology departments are usually accepted. Education Abroad Program credits are acceptable at the discretion of the undergraduate advisor.

THE MAJOR
To receive a B.A. degree with a major in anthropology, the student must meet the requirements of Revelle, John Muir, Thurgood Marshall, Earl Warren, Eleanor Roosevelt College, or Sixth College. Additionally, the student must meet the following requirements of the Department of Anthropology:

1. A minimum of twelve four-unit upper-division courses in the Department of Anthropology must be completed.

2. The undergraduate core ANTH 101, 102, and 103 (or the now defunct sequence ANPR 105, 106, and 107) must be completed (included as three of the twelve courses required under #1, above). All or some of the courses in this sequence are prerequisites for some other upper-division courses. This sequence consists of

- 101 Foundations of Social Complexity
- 102 Humans Are Cultural Animals
- 103 Sociocultural Anthropology

3. No courses taken in fulfillment of the above requirements may be taken on a Pass/Not Pass (P/NP) basis. [An exception is made for some courses accepted from other schools and for one independent study course (199), or one directed group study course (198), and a combination of one internship seminar (ANBI 187A, C or ANTH 187B) with the corresponding academic internship project (AIP 197). However, this exception does not extend to ANTH 101, 102, or 103, or to transfer credits accepted in lieu of them. These must be taken for a letter grade.]

4. For the B.A. degree, a minimum average of 2.0 is required, both as an overall average in all anthropology courses and in the ANTH 101, 102, and 103 sequence (or the defunct ANPR 105, 106, and 107 sequence) considered separately.
5. At least seven of the upper-division courses submitted for the major must be taken at UCSD. The seven normally must include ANTH 101, 102, and 103 (or the older sequence ANPR 105, 106, and 107). A transfer course may be accepted in lieu of one of these core courses if, in the opinion of the director of Undergraduate Studies, the content is substantially the same. In no case will transfer credit be accepted in lieu of more than one of these courses.

6. All undergraduate majors in anthropology must satisfy the requirements of at least one of the three concentrations—anthropological archaeology, biological anthropology, and sociocultural anthropology—described below.

THE MAJOR IN ANTHROPOLOGY WITH CONCENTRATION IN ARCHAEOLOGY

The department offers a B.A. degree in anthropology with concentration in archaeology. A minimum of at least twelve upper-division courses in archaeology are required. Specifically, this degree requires

1. The Anthropology Core Sequence: ANTH 101, 102, and 103 (or the now defunct ANPR 105, 106, and 107 sequence)
2. The Archaeology Concentration Requirement: ANAR 111 (previously ANGR 181)
3. Three additional four-unit upper-division courses with the prefix ANAR
4. Five additional four-unit, upper-division elective courses within the Department of Anthropology

Some students may elect to take field-school courses such as ANAR 194 or study-abroad courses in archaeology that are more than four units. In these cases, the total number of units for such courses will be applied to the satisfaction of archaeology requirements #3 and #4. For example, a twelve-unit field-school course with the ANAR prefix may be used to satisfy requirement #3 or to partially satisfy requirement #4.

Students majoring in anthropological archaeology are encouraged to take the field-school ANAR 194.

THE MAJOR IN ANTHROPOLOGY WITH CONCENTRATION IN BIOLOGICAL ANTHROPOLOGY

The department offers a B.A. degree in anthropology with concentration in biological anthropology. A minimum of at least twelve upper-division courses within and beyond anthropology are required. Specifically, this degree requires:

1. The Anthropology Core Sequence: ANTH 101, 102, and 103 (or the now defunct ANPR 105, 106, and 107 sequence).
2. The Biological Anthropology Concentration Requirement: ANBI 111.
3. Three additional four-unit upper-division courses with the prefix ANBI.
4. Five additional four-unit, upper-division elective courses. At least one of these five electives must be taken from an approved list of biology courses. This list is available from the undergraduate coordinator in the Department of Anthropology. Each of the remaining four electives is to be drawn from that list or must be an upper-division anthropology course.

THE MAJOR IN ANTHROPOLOGY WITH CONCENTRATION IN SOCI CULTURAL ANTHROPOLOGY

The department offers a B.A. degree in anthropology with concentration in sociocultural anthropology. A minimum of at least twelve upper-division courses in anthropology are required. Specifically, this degree requires

1. The Anthropology Core Sequence: ANTH 101, 102, 103 (or the now defunct ANPR 105, 106, and 107 sequence)
2. The Sociocultural Concentration Requirement: Any three of the following six course options:
   - ANSC 120. Anthropology of Religion (previously ANGR 120)
   - ANSC 121. Psychological Anthropology (previously ANPR 107)
   - ANSC 122. Language in Society (previously ANGR 149)
   - ANSC 123. Political Anthropology (previously ANGR 151)
   - ANSC 124. Cultural Anthropology (previously ANPR 106)
   - ANSC 125. Gender, Sexuality, and Society (previously ANGR 125)
3. One additional ANSC course focusing on a particular region, country, or religion (e.g., Indigenous Peoples of Latin America, Modernity in Brazil, Global Islam)
4. Five additional four-unit upper-division elective courses within the Department of Anthropology.

SENIOR THESIS PROGRAM

The senior thesis is prepared during two successive quarters of ANTH196, senior thesis research, and is counted as two of the twelve upper-division courses required for a major. Students are admitted to the program by invitation of the faculty. Under normal circumstances, eligibility for the program requires the student (1) to have completed eight upper-division courses, including the core sequence, and (2) to have achieved grade point averages of at least 3.6 both overall and in the anthropology major by the end of the junior year. Some of these requirements may be waived by vote of the faculty. During the first quarter of the program (fall quarter), students select their research topic and write a preliminary paper. Those who receive a B+ or better will be invited to continue in the program and complete a thesis on the chosen topic by the end of the winter quarter. The thesis will be evaluated by a committee consisting of the thesis advisor and one other faculty member appointed by the department chair in consultation with the thesis coordinator. The thesis advisor has the sole responsibility for the grade the student receives in the winter quarter. The reading committee advises the faculty on the merit of the thesis for departmental honors. A senior thesis is required in order to be considered for department honors at commencement.

Students who wish to be considered for the Senior Thesis Program should notify the department’s undergraduate advisor by the second week of the spring quarter prior to the senior year.

INTERNSHIP PROGRAM

The department sponsors an internship program that allows students to gain academic credit for supervised work in the Museum of Man, the San Diego Zoo, or the Wild Animal Park. The three tracks of the program allow internship experience in (1) biological anthropology, (2) ethnology and archaeology at the museum, or (3) primate behavior and conservation at the Zoo or Wild Animal Park. A combination of on-campus and on-site supervision makes these courses intellectually provocative but practical and applied. They are an especially valuable complement to a major or minor in anthropology. One four-unit internship (AIP 197) taken with the corresponding two-unit internship seminar (ANBI 187A, C and ANTH 187B) can be counted as one of the twelve upper-division courses for the anthropology major or minor. Applications to these programs are accepted during the first seven weeks of the quarter before the one in which the internship is to be done.

ACADEMIC ENRICHMENT PROGRAMS

FACULTY MENTOR PROGRAM

The program offers research experience to any junior or senior with a GPA of 2.7 or higher who wants to prepare for graduate or professional school. Participants work as research assistants to UCSD faculty members during the winter and spring quarters. Students present their research papers at the Faculty Mentor Research Symposium at the conclusion of the program in the spring.

SUMMER RESEARCH PROGRAM

The program offers full-time research experience to underrepresented (i.e., minorities, women, and low-income, first-generation college) students who are interested in preparing for careers in research or university teaching. Juniors and seniors who have a 3.0 GPA or above and plan to attend graduate or professional school are eligible to participate.

EDUCATION ABROAD PROGRAM

One of the best ways to understand the concept of culture is to live in a different culture for a time. Anthropology majors are encouraged to participate in the UC Education Program (EAP) or UCSD’s Opportunities Abroad Program (OAP). Students considering this option should discuss their plans with the faculty undergraduate advisor before going abroad, and courses taken abroad must be approved for credit to the major by the advisor upon return. More information on EAP and OAP is provided under “Education Abroad Program” in the UC San Diego General Catalog. Interested students should contact the EAP staff in the International Center.
THE GRADUATE PROGRAM

The Department of Anthropology offers graduate training in sociocultural (including psychological and linguistic) anthropology, anthropological archaeology, and biological anthropology. The graduate program is designed to provide the theoretical background and the methodological skills necessary for a career in research and teaching anthropology at the university level, and for the application of anthropological knowledge to contemporary problems. It is assumed that all students enter with the goal of proceeding to the doctoral degree.

Admission to the graduate program occurs in the fall quarter only.

Any decision to waive a requirement for either the master’s degree or the Ph.D. must be made by a majority of the faculty.

GRADUATE ADVISING

One member of the departmental faculty functions as the graduate advisor and is referred to as the director of graduate studies. The role of graduate advisor is to inform students about the graduate program, to approve individual registration forms, and to give assistance with respect to administrative matters.

FIRST-YEAR MENTORS

Each first-year student is assigned a faculty mentor in the student’s subdiscipline. Students are encouraged to meet regularly with their mentors for course planning and guidance in meeting specific requirements and recommendations for their subdiscipline.

After completion of the requirements for the master’s degree, the chair of the student’s doctoral committee serves as the student’s major advisor.

EVALUATION

In the spring of each year, the faculty evaluate each student’s overall performance in course work, apprentice teaching, and research progress. A written assessment is given to the student after the evaluation. If a student’s work is found to be inadequate, the faculty may determine that the student should not continue in the graduate program.

THE MASTER OF ARTS DEGREE

Students entering the doctoral program must complete a master’s degree before continuing toward the doctorate. Entering students who already have a master’s degree in anthropology are not permitted by university regulations to receive a second social science or related-field master’s degree, but are required by the department to complete the requirements for the master’s degree. Rare exceptions may be made on a case-by-case basis by the consent of the majority of the faculty and approval of the Office of Graduate Studies.

REQUIREMENTS FOR MASTER’S DEGREE

Required Courses

ANTH 230. Departmental Colloquium (4 quarters, 1 unit each)
ANTH 281A-B. Introductory Seminars (1 unit each)
ANTH 295. Master’s Thesis Preparation (1–12 units)

Four core courses, as specified in the following sections.

Core Course Offerings

Six core courses are offered in the graduate program in anthropology:

ANTH 280A. Core Seminar in Social Anthropology (4 units)
ANTH 280B. Core Seminar in Cultural Anthropology (4 units)
ANTH 280C. Core Seminar in Psychological Anthropology (4 units)
ANTH 280D. Core Seminar in Anthropological Archaeology (4 units)
ANTH 280E. Core Seminar in Biological Anthropology (4 units)
ANTH 263. The Anthropology of Language and Discourse (4 units)

Note: Although not in the 280 series, ANTH 263 is a core seminar. It is also open to graduate students from other departments, with instructor’s permission. It may be offered in alternate years.

ANTH 280A, 280B, 280C, and 263 are all core courses within the Sociocultural track. ANTH 280D and 280E are core courses in, respectively, the anthropological archaeology and biological anthropology tracks.

All students must take at least four of these six core courses by the end of their second year in the program (and preferably during the first year) as a requirement for receiving the master’s degree or for equivalent advancement in the program. The subfields specify particular choices among these core offerings for the students admitted to their respective tracks, as detailed below. The department strongly encourages all students in all subfields to take additional core courses as elective seminars to complete their program.

Anthropological Archaeology core requirements:

280D (Anthropological Archaeology); and
280E (Biological Anthropology); and
Two of the remaining four core courses in anthropological archaeology, selected in consultation with the student’s assigned mentor.

Biological Anthropology core requirements:

280E (Biological Anthropology); and
280D (Anthropological Archaeology); and
Two of the remaining four core courses in anthropological archaeology, selected in consultation with the student’s assigned mentor.

Sociocultural Anthropology, Psychological Anthropology, and Linguistic Anthropology

All students in sociocultural anthropology and its allied fields of psychological and linguistic anthropology will take at least four core courses, selected as follows and with the consent of the individual student’s faculty mentor. Students identifying two or more areas of concentration must satisfy the requirements of each of these areas.

Core requirements for students in the General Sociocultural track:

280A (Social Anthropology); and
280B (Cultural Anthropology); and
280C (Psychological Anthropology) or
263 (The Anthropology of Language and Discourse); and
280D (Anthropological Archaeology) or
280E (Biological Anthropology).

Core requirements for students in the Psychological Anthropology track:

280C (Psychological Anthropology); and
280D (Anthropological Archaeology) or
280E (Biological Anthropology); and
Two of the following:
280A (Social Anthropology),
280B (Cultural Anthropology),
263 (Anthropology of Language and Discourse).

Core requirements for students in the Linguistic Anthropology track:

263 (Anthropology of Language and Discourse); and
280D (Anthropological Archaeology) or
280E (Biological Anthropology); and
Two of the following:
280A (Social Anthropology),
280B (Cultural Anthropology),
280C (Psychological Anthropology).

Master’s Thesis

Students must complete a master’s thesis or master’s thesis equivalency project of a length, format, and scope to be approved by the student’s M.A. committee and the director of graduate studies. The M.A. thesis must be at least 8,000 words in length and generally should not exceed 10,000 words. Students must have completed three quarters of course work in order to begin writing a master’s thesis. By the end of the spring quarter of the student’s first year, he or she will form a master’s committee in consultation with the director of graduate studies and first-year faculty mentor.

Students will submit a draft of the master’s thesis or master’s thesis equivalency project by the first day of winter quarter of their second year. Students may revise the master’s thesis or master’s thesis equivalency project in the winter quarter. Students will register for four credit hours of ANTH 295 (master’s thesis preparation) in the fall quarter of their second year. Upon consultation with the M.A. committee and director of graduate studies, an additional four credits of ANTH 295 may be taken in winter for revisions. Successful completion of the master’s thesis or master’s thesis equivalency will determine whether an M.A. degree is awarded, where applicable, and weigh significantly in second-year student evaluations.

Elective Courses

Four elective, letter-grade courses are required. These courses can be undergraduate or graduate seminars. At least two of these elective courses must be within the anthropology department. Other
THE DOCTORAL DEGREE

Continuation in the doctoral program is granted to students who have satisfactorily completed the master’s program and who have completed courses and the master’s thesis at a level of excellence that indicates promise of professional achievement in anthropology.

REQUIREMENTS FOR DOCTORAL DEGREE

1. Required Courses

In order to achieve candidacy, students must complete two additional letter-grade electives beyond the four required for the master’s degree.

2. Research Methods

Students are required to develop a plan for their training in research methods and present it to the anthropology department faculty on their proposed dissertation committee in the spring quarter of their second year.

3. Apprentice Teaching

In order to acquire teaching experience, each student is required to serve as a teaching assistant for at least one quarter anytime during the first four years of residency. This experience may take place either in our department or in any teaching program on campus. The relevant course in the anthropology department is ANTH 500: Apprentice Teaching, taken for four units and S/U grade. Upon petition, this requirement may be waived by the anthropology faculty.

4. Foreign Language

Unless a student is planning on fieldwork in English-speaking areas, knowledge of one or more foreign languages may be essential for the successful completion of a Ph.D. in anthropology at UCSD. Students will determine specific language requirements for their degree in consultation with the faculty and their doctoral committee.

5. Formation of the Doctoral Committee

All students must choose the chair of their doctoral committee by the end of their second year. They must choose two more internal members of the doctoral committee by the end of the fall quarter of their third year. In consultation with the chair of the doctoral committee, two faculty members from outside the department (one of whom must be tenured) should be added to the committee by the end of the winter quarter of the third year.

Anthropologists in other departments who are identified by the faculty may serve as either inside members or outside members of the committee. However, there must be at least two inside members from within the department, and only one outside member may be an anthropologist. The final composition of the committee is approved by the Office of Graduate Studies. The chair of the doctoral committee serves as the student’s advisor for the remainder of the student’s program.

6. The Fieldwork Proposal

Advancement to candidacy will be based on the submission of two to three position papers and a research proposal. The position papers are intended as a way for students to demonstrate competence in particular areas of theory, methods, and/or regional studies that are significant to the dissertation research project. The number of the position papers and the specific topics they address are to be formulated in consultation with the student’s committee chair and, as appropriate, with other members of the student’s dissertation committee. It is expected that the position papers will amount to some fifty to sixty pages and that the research proposal will be in the twenty- to thirty-page range. Students should enroll in directed reading courses (ANTH 298) during the quarters in which they are writing the position papers. Additionally, students should also enroll in ANTH 296 during the quarters in which they are writing their dissertation research proposal. A maximum of three quarters is allowed for the preparation of both the position papers and proposal. The position papers, research proposal, and oral examination for advancement to candidacy must be completed no later than the end of the spring quarter of the student’s fourth year.

7. Advancement to Candidacy

Advancement to doctoral candidacy must take place no later than the end of the spring quarter of the fourth year. This requires the successful completion of all course work requirements, the position papers, the dissertation research proposal, and an oral qualifying examination administered by the student’s committee. The proposal and position papers must be turned into the student’s committee at least three weeks prior to the examination.

Upon petition, students may advance to candidacy as early as the spring quarter of the third year, if all candidacy requirements noted earlier have been satisfied by that time. This requires the agreement of the graduate advisor, the student’s dissertation advisor, and other members of his or her committee.

Successful completion of this examination marks the student’s advancement to doctoral candidacy. These exams will be open to the extent that university regulations allow.

8. Dissertation and Dissertation Defense

Upon completion of the dissertation research project, the student writes a dissertation that must be successfully defended in an oral examination conducted by the doctoral committee and open to the public. This examination may not be conducted earlier than three quarters after the date of advancement to doctoral candidacy. A full copy of the student’s dissertation must be in the hands of each of the student’s doctoral committee members four weeks before the dissertation hearing. An abstract of the student’s dissertation must be in the hands of all faculty members ten days before the dissertation defense. It is understood that the edition of the dissertation given to committee members will not be the final form, and that the committee members may suggest changes in the text at the defense. Revisions may be indicated, requiring this examination to be taken more than once. Acceptance of the dissertation by the university librarian represents the final step in completion of all requirements for the Ph.D.

9. Time Limits

Precandidacy status is limited to four years. Candidates for the doctorate remain eligible for university support for eight years. Instructional support (teaching assistantships, readerships, and tutors) is limited to six years (eighteen quarters). The doctoral dissertation must be submitted and defended within nine years. This is in accordance with university policy. Normative time, which is the expected time to complete all requirements for the Ph.D., is six years for anthropology students.

10. Additional Requirements for the Ph.D. in Anthropological Archaeology

Prior to receiving the Ph.D., anthropological archaeology students must complete a minimum total of fifty-six units (the equivalent of fourteen four-unit courses) of formal classroom/seminar courses. Students must choose all courses in consultation with their faculty advisor, who will be assigned during the first quarter. Archaeology students must take at least two sociocultural area or topical courses (upper-division or graduate) or two advisor-approved courses in other social science or humanities departments that are relevant to their regional or theoretical focus of study. Each archaeology student must take at least one 200-level course focusing on cultures of the Old World and one 200-level course focusing on cultures of the New World. Students of anthropological archaeology are required to take at least one course in a modern or ancient language, or at least one course in linguistics. If offered, students must take ANTH 286 (Topics in Anthropological Archaeology). Anthropological archaeology students are required to take at least one course in quantitative methods (statistics or GIS). Because archaeology is closely allied to various earth and biological sciences, students are required to take at least one course in either of these fields that is relevant to their interests. Finally, graduate students in anthropological archaeology are expected to seek and obtain archaeology field and laboratory training. This requirement may be fulfilled by working with the anthropological archaeology track faculty in the Department of Anthropology or with archaeologists at other institutions.

INTRODUCTION TO REQUIRED CORE COURSES

ANTH 280A. Core Seminar in Social Anthropology. Core seminar focuses on individual action and social institutions.

ANTH 280B. Core Seminar in Cultural Anthropology. Core seminar focuses on personal consciousness and cultural experience.

ANTH 280C. Core Seminar in Psychological Anthropology. Core seminar focuses on motives,
values, cognition, and qualities of personal experience.

ANTH 280D. Core Seminar in Anthropological Archaeology. Integral part of the training for graduate students focusing on anthropological archaeology. It is one of a set of core anthropology courses available to graduate students; required of anthropological archaeology students but open for students in other subfields.

ANTH 280E. Core Seminar in Biological Anthropology. This seminar will examine the central problems and concepts of biological anthropology, laying the foundation for first-year graduate students in biological anthropology as well as providing an overview of the field for graduate students in other areas of anthropology.

ANTH 281A-B. Introductory Seminars. These seminars are held in the first two quarters of the first year of graduate study. Faculty members will present an account of their current research and interests. When appropriate, a short preliminary reading list will be given for the particular lecture.

ANTH 263. Anthropology of Language and Discourse. Examines the theoretical and methodological foundations and principal research questions of linguistic anthropology, providing the fundamentals for graduate study in this area. Required for students specializing in linguistic anthropology, and open to other students. PREREQUISITE: graduate standing in anthropology or consent of instructor.

NOTE: Not all anthropology courses are offered every year. Please check the quarterly UCSD Schedule of Classes issued each fall, winter, and spring, for specific courses.

THE MELANESEAN STUDIES RESOURCE CENTER AND ARCHIVE

These facilities embody the substantial interests in the Pacific Basin that are represented on the UCSD campus and the special prominence of the UCSD Department of Anthropology in the study of cultures and societies of Oceania and especially of Melanesia. In cooperation with the UCSD libraries, the Melanesian Studies Resource Center and Archive has two major projects. First, there is an ongoing effort to sustain a library collection of monographs, dissertations, government documents, and journals on Melanesia that make UCSD the premier center for such materials in the United States. Second, there is an endeavor to collect the extremely valuable unpublished literature on Melanesia, to catalog such materials systematically, to produce topical bibliographies on these holdings, and to provide microfiche copies of archival papers to interested scholars and to the academic institutions of Melanesia. This innovative archival project is intended to be a model for establishing special collections on the traditional life of tribal peoples as dramatic social change overtakes them. In the near future, anthropological research on tribal peoples will take place largely in archives of this kind. These complementary collections will support a variety of research and teaching activities and are already attracting students of Melanesia to this campus.

The Melanesian Studies Resource Center and Archive are directed by members of the Department of Anthropology faculty, in collaboration with Geisel Library.

THE ARCHAEOLOGICAL RESEARCH LABORATORY

Archaeology laboratories were established at UCSD in 1995. The present facilities are geared to the study of lithics, ceramics, biological remains, and other small finds retrieved on faculty expeditions in the old and new worlds, including Belize, Israel, Jordan, and Peru. Multimedia research, AutoCAD, and other computer-based studies are carried out in the lab. Undergraduate and graduate students are encouraged to participate in lab studies.

THE BIOLOGICAL ANTHROPOLOGY LABORATORY

The biological anthropology laboratories have twin missions in teaching research. They house collections of modern skeletal material and fossil hominid casts used for teaching both at the lab and in local outreach presentations. The primary research focus involves a large collection of histological sections and computerized images of living and postmortem human and nonhuman primate brains that were obtained through magnetic resonance scans. These are reconstructed in 3-D using state-of-the-art equipment for comparative analysis and study of the evolution of the human brain. Undergraduate and graduate student involvement in the lab is welcomed.

THE ANTHROPOLOGY OF MODERN SOCIETY FACULTY RESEARCH GROUP

The Anthropology of Modern Society is a project of graduate training and research dedicated to the critical study of modernity and its counterparts. The group is concerned with the changing nature of membership in modern society. Its participants focus on issues of citizenship and democracy; social formations in tension with the nation-state; modern subjectivities; social and religious movements; governmental rationalities and public works, transnational markets and migrations; relations of local to global processes within the current realignments of regional, national, and transnational sovereignties; and the social life of cities as making manifest these kinds of concerns. Participants are committed to reorienting anthropological theory and ethnographic practice toward such contemporary social and political problems. Guiding this project is the group’s interest in combining critical theory with a comparative and empirically grounded study of cases to constitute an anthropology of modernity.

ANTHROPOLOGY: LOWER-DIVISION

ANTH 1. Introduction to Culture (4)

An introduction to the anthropological approach to understanding human behavior, with an examination of data from a selection of societies and cultures. (Formerly known as ANLD 1.) Credit not allowed for both ANLD 1 and ANTH 1.

ANTH 2. Human Origins (4)

An introduction to human evolution from the perspective of physical anthropology, including evolutionary theory and the evolution of the primates, hominids, and modern humans. Emphasis is placed on evidence from fossil remains and behavioral studies of living primates. Prerequisite for upper-division biological anthropology courses. (Formerly known as ANLD 2.) Credit not allowed for both ANLD 2 and ANTH 2.

ANTH 3. World Prehistory (4)

This course examines theories and methods used by archaeologists to investigate the origins of human culture. A variety of case studies from around the world are examined. (Recommended for many upper-division archaeology courses.) (Formerly known as ANLD 3.) Credit not allowed for both ANLD 3 and ANTH 3.

ANTH 23. Debating Multiculturalism: Race, Ethnicity, and Class in American Societies (4)

This course focuses on the debate about multiculturalism in American society. It examines the interaction of race, ethnicity, and class, historically and comparatively, and considers the problem of citizenship in relation to the growing polarization of multiple social identities. (Formerly known as ANLD 23.) Credit not allowed for both ANLD 23 and ANTH 23.

ANTH 42. The Study of Primates in Nature (4)

Major primate field studies will be studied to illustrate common features of primate behavior and behavioral diversity. Topics will include communication, female hierarchies, protocultural behavior, social learning and tool use, play, cognition, and self-awareness. (Prerequisite for several upper-division biological anthropology courses.) (Formerly known as ANLD 42.) Credit not allowed for both ANLD 42 and ANTH 42.

ANTH 87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges. Topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. PREREQUISITES: none. (Formerly known as ANLD 87.)

ANTHROPOLOGY: UPPER-DIVISION

ANTH 101. Foundations of Social Complexity (4)

Course examines archaeological evidence for three key “tipping points” in the human career: (1) the origins of modern human social behaviors, (2) the beginnings of agriculture and village life, and (3) the emergence of cities and states. PREREQUISITE: upper-division standing. (Required for all majors in anthropology.)

ANTH 102. Humans Are Cultural Animals (4)

This class examines humans from a comparative perspective; if we ignore culture, what’s left? How do culture and biology interact? And how does biology inform cultural debates over race, sex, marriage, war, peace, etc.? NOTE: This is a core course for all anthropology majors. Students
may not receive credit for ANTH 102 and ANBI 161.) PREREQUISITE: ANTH 2 or consent of instructor.

ANTH 103. Sociocultural Anthropology (4)
A systematic analysis of social anthropology and of the concepts and constructs required for cross-cultural and comparative study of human societies. PREREQUISITE: upper-division standing. (Required for all majors in anthropology.) [Formerly known as ANPR 103.] Credit not allowed for both ANPR 105 and ANTH 103.

ANTH 187B. Intern Seminar in Ethnography and Archaeology (2)
Seminar complements students’ research in the Academic Internship Program in ethnography and archaeology at the Museum of Man. Readings and discussions focus on problems in the analysis of material culture and classifications of artifacts and site excavations. Research paper required. PREREQUISITE: upper-division standing. Consent of instructor and upper-division standing. (Required for all majors in anthropology.) [Formerly known as ARSP 187B.] Credit not allowed for both ANPR 187B and ANTH 187B.

ANTH 192. Senior Seminar in Anthropology (1)
The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in anthropology (at the upper-division level). Senior Seminars may be offered in all campus departments. Topics will vary from quarter to quarter. Senior Seminars may be taken for credit up to four times, with a change in topic, and permission of the departmental enrollment. Enrollment is limited to twenty students, with preference given to seniors.

ANTH 195. Special Topics in Anthropology (1–4)
Course gives students experience in teaching of anthropology at the lower-division level. Students, under direction of instructor, lead discussion sections, attend lectures, review course readings, and meet regularly to prepare course materials and to evaluate examinations and papers. Course not counted toward minor or major. PREREQUISITES: upper-division standing and consent of instructor and department stamp. Received grade of A in course to be taught may be counted toward lower division requirement. [Formerly known as ANPR 195.] Credit not allowed for both ANPR 195 and ANTH 195.

ANTH 196A. Thesis Research (4)
Independent preparation of a senior thesis under the supervision of a faculty member. Completion of this course with a grade of at least B- is a prerequisite to ANTH 196B. PREREQUISITES: students will be admitted by invitation of the departmental thesis supervisor. Upper-division standing or consent of instructors. Credit not allowed for both ANPR 196A and ANTH 196A.

ANTH 196B. Thesis Research (4)
Independent preparation of a senior thesis under the supervision of a faculty member. Students begin two-quarter sequence beginning in ANAR 196B. PREREQUISITE: completion of ANTH 196A with grade of B-+ or better. [Formerly known as ANPR 196B.] Credit not allowed for both ANPR 196B and ANTH 196B.

ANTH 197. Field Studies (4)
Individually arranged field studies giving practical experience outside the university. PREREQUISITES: consent of instructor and department approval required. (P/NP grades only.)

ANTH 198. Directed Group Study (2–4)
Directed group study on a topic or in a field not included in the regular departmental curriculum by special arrangement with a faculty member. PREREQUISITE: consent of instructor and upper-division standing. (P/NP grades only.) Department approval required.

ANTH 199. Independent Study (2–4)
Independent study and research under the direction of a member of the faculty. PREREQUISITE: consent of instructor. (P/NP grades only.) Department approval required.

ANTHROPOLOGY: ARCHAEOLOGY

ANAR 100. Special Topics in Anthropological Archaeology (4)
Course usually taught by visiting faculty in anthropological archaeology. Course will vary in title and content. When offered, the current description and title is found in the current Schedule of Classes and the anthropology department Web site. (Can be taken a total of four times as topics vary.) PREREQUISITE: upper-division standing or consent of instructor.

ANAR 103. Archaeology in the Holy Land (4)
The Holy Land (Israel, Jordan, Palestinian territories) represents a land bridge between Africa and Southwest Asia. Here we explore human foundations from the Paleolithic (c. 2 million years BP) to the rise of Early Bronze Age cities (ca. 3000 BCE). PREREQUISITE: upper-division standing or consent of instructor.

ANAR 111. Foundations of Archaeology (4)
(Formerly Anthropological Archaeology) As part of the broad discipline of anthropology, archaeology provides the long chronological record needed for investigating human and culture development and social change and the technologies and methods used in this field are examined. (Archaeology core sequence course.) ANTH 3 is recommended. [Formerly known as ANG 181.] Credit not allowed for both ANG 181 and ANAR 111. PREREQUISITE: upper-division standing.

ANAR 112. Ancient Urbanism (4)
The origins and development of early cities in the Old and New Worlds are compared and contrasted from an archaeological anthropological perspective. PREREQUISITE: upper-division standing.

ANAR 118. Archaeology of the UCSF Campus (4)
Our campus houses some of the earliest human settle- ments in North America. This course reviews the archaeol- ogy, climate, and environment of the sites and outlines research methodology. Focus on the lives of these early peoples. [Formerly known as ANG 108.] PREREQUISITES: upper-division standing. Consent of instructor. Credit not allowed for both ANG 108 and ANAR 118.

ANAR 119S. Archaeological Field and Lab Class (8)
The archaeological field and laboratory class will take place at Hoopa Avenue. The research is an introduction to the research design of interdisciplinary projects, the technique of data collections, the methods of excavation and post-extraction lab work. Course materials fee is required. [Formerly known as ANG 119.] PREREQUISITES: upper-division standing. Consent of instructor. Credit not allowed for both ANG 119 and ANAR 119.

ANAR 121A. Digital Archaeology: GIS Foundations (4)
Concerns modern archaeological data with Geographic Information Systems (GIS) and performing spatial analysis. Lectures and lab exercises—learn spatio-temporal analysis techniques with interactive online computer mapping. Hands-on skills with ArcView, GIS, and several lab extensions. [Formerly known as ANG 119.] PREREQUISITES: upper-division standing. Credit not allowed for both ANG 119 and ANAR 119.

ANAR 121B. Digital Archaeology: GIS Foundations (4)
This course will examine archaeological evidence for the development of societies in the South American continent. From the initial arrival of populations through the Inca period and the arrival of the Spaniards. [Formerly known as ANR 112.] Credit not allowed for both ANR 112 and ANAR 116. PREREQUISITE: upper-division standing.

ANAR 154. The Aztecs and their Ancestors (4)
Introduction to the archaeology of the ancient culture of Mexico from the early Olmec culture through the Postclassic Aztec, Tarascan, Zapotec, and Mixtec states. Agriculture; trade and exchange; political and social organization; kinship networks; religious system, ideology, and worldviews. [Formerly known as ANR 125.] Credit not allowed for both ANR 125 and ANAR 154. PREREQUISITE: Consent of instructor only.

ANAR 156. The Archaeology of South America (4)
This course will examine archaeological evidence for the development of societies in the South American continent. From the initial arrival of populations through the Inca period and the arrival of the Spaniards. [Formerly known as ANR 121.] Credit not allowed for both ANR 121 and ANAR 156. PREREQUISITE: upper-division standing.

ANAR 156-XL. The Archaeology of South America (FLD) (1)
Foreign Language Discussion. Students will exercise Spanish foreign language skills to discuss topics related to the prehistoric archaeology of South America. A basic knowledge of written and conversational Spanish is required. [Formerly known as ANR 121XL.] Credit not allowed for both ANR 121XL and ANAR 156-XL. PREREQUISITES: ANAR 156 (core- quisite). Upper-division standing or consent of instructor.

ANAR 157. Early Empires of the Andes: The Middle Horizon (4)
The civilizations of Wari and Tiwanaku built the first empires of Andean South America long before the Inca. Middle Horizon (AD 500–1000) mythohistory, urbanism, state origins, art, technology, agriculture, colonization, trade, and conquest are explored using ethnohistory and archaeological sources. [Formerly known as ANR 127.] Credit not allowed for both ANR 127 and ANAR 157. PREREQUISITE: upper-division standing or consent of instructor.

ANAR 157S. Early Empires of the Andes: The Middle Horizon (4)
The civilizations of Wari and Tiwanaku built the first empires of Andean South America long before the Inca. Middle Horizon (AD 500–1000) mythohistory, urbanism, state origins, art, technology, agriculture, colonization, trade, and conquest are explored using ethnohistory and archaeological sources. Credit not allowed for ANR 157, ANAR 157S, and ANR 127. PREREQUISITE: upper-division standing or consent of instructor.

ANAR 157-XL. The Andean Middle Horizon (FLD) (1)
Foreign Language Discussion. Students will exercise Spanish foreign language skills to discuss topics related to the Wari and Tiwanaku civilizations of South America. A
ANA 158. The Inca: Empire of the Andes (4) The history and culture of the Inca Empire of South America and its fatal encounter with the West. Archaeological excavations, accounts from the sixteenth and seventeenth centuries, and ethnographies of present-day peoples of the Andes are explored. [Formerly known as ANRG 128.] Credit not allowed for both ANRG 128 and ANAR 158. PREREQUISITE: upper-division standing or consent of instructor.

ANA 158-XXL The Inca: Empire of the Andes (FLD) (1) Foreign Language Discussion. Students will exercise Spanish foreign language skills to discuss topics related to the Inca. This is a corequisite of ANAR 158, [Formerly known as ANRG 128XL.] Credit not allowed for both ANRG 128XL and ANAR 158.XXL. PREREQUISITE: ANAR 158 (corequisite).

ANA 163. Evolution of Technology (4) [Formerly Technological Revolutions and Evolution] While not really existing outside the social order, technological systems are basic to civilization. This course examines their growth across six millennia—complex, largely indeterminate, and marked by irregular spurts of acceleration. While comparative, it concentrates on England and America. [Formerly known as ANG 163.] Credit not allowed for both ANRG 163 and ANAR 163. PREREQUISITE: upper-division standing.

ANA 170. Research Design in Anthropological Archaeology (4) This course trains students to design, implement, and conduct research in anthropological archaeology. Writing and presenting work in progress will take place in a seminar-like forum. PREREQUISITE: junior/senior standing.

ANA 181. The Archaeology of Hunters-Gatherers (4) Course examines current theoretical issues in the field of hunter-gatherer archaeology. Considerable emphasis is given to ethnographic and ethno-archaeological sources for understanding such topics as prehistoric hunter-gatherer adaptations, culture change, social organization, and intergroup interaction. [Formerly known as ANG 181.] Credit not allowed for both ANRG 181 and ANAR 181. PREREQUISITE: upper-division standing.

ANA 182. Origins of Agriculture and Sedentism (4) Varying theoretical models and available archaeological evidence are examined to illustrate the socio-evolutionary transition from nomadic hunter-gathering groups to fully sedentary agricultural societies in the Old and New Worlds. [Archaeology core course.] Credit not allowed for both ANRG 182 and ANAR 182. ANTH 2 or consent of instructor.

ANA 183. Chiefdoms, States, and the Emergence of Civilizations (4) The course focuses on theoretical models for the development of complex societies and on archaeological evidence for the development of various pre- and protohistoric states in selected areas of the Old and New Worlds. [Archaeology core course.] [Formerly known as ANG 183.] PREREQUISITE: upper-division standing.

ANA 184. The Political Economy of Early Empires (4) Archaeological and textual evidence for selected early empires of pre-Columbian America and the Ancient Near East will be used to illuminate cross-cultural similarities and differences in the ways complex pre-capitalist societies acquired, distributed, and controlled wealth. [Formerly known as ANG 184.] ANTH 3 recommended. Credit not allowed for both ANRG 184 and ANAR 184. PREREQUISITE: upper-division standing.

ANA 190. Middle East Archaeological Field School (12) The archaeological field school will take place in Jordan. It is an introduction to the design of research projects, the techniques of data collection, and the methods of excavation. Includes post-excavation lab work, study trips, and field journal. [Formerly known as ANPR 190.] Credit not allowed for both ANPR 190 and ANAR 190. PREREQUISITE: upper-division standing or consent of instructor.

ANA 194S. Summer Middle East Archaeological Field School (12) The archaeological field school will take place in Jordan. It is an introduction to the design of research projects, the techniques of data collection, and the methods of excavation. Includes post-excavation lab work, study trips, and field journal. PREREQUISITE: upper-division standing or consent of instructor.

ANA 195. Art and Architecture of Egypt (4) An examination of Egyptian art and architecture from the prehistoric period to the Graeco-Roman era. [Formerly known as ANNG 195.] Credit not allowed for both ANRG 195 and ANAR 195. PREREQUISITE: upper-division standing or consent of instructor.

ANA 196L. Stable Isotopes in Ecology (4) The stable isotopes of carbon, nitrogen, oxygen, and hydrogen in animal tissues, plant tissues, and soils indicate aspects of diet and ecology. The course will introduce students to this approach for reconstructing paleo-diet, palaeo-ecology, and paleo-climate.

ANA 198. Primate Behavioral Ecology (4) This course examines various behaviors (e.g., group formation, dispersal, parenting, coalition formation) from a comparative and evolutionary perspective. Observational methodology and analytical methods will also be discussed. Lab sections are required. Strongly recommended: BIEB 180, Introduction to Biological Anthropology, and BIEB 184, Sociobiology. PREREQUISITE: upper-division standing.

ANA 215. Biological and Cultural Perspectives on Intelligence (4) Attitudes toward other individuals (and species) are often shaped by their apparent “intelligence.” This course discusses this significance of brain size/complexity, I.Q. tests, communication in marine mammals and apes, complex behavioral tactics, and the evolution of intelligence. PREREQUISITE: upper-division standing, any one of the following: ANTH 2 or ANTH 42 or BILD 3 or consent of instructor.

ANA 217. Cognition in Animals and Humans (4) The last divide between humans and other animals is in the area of cognition. A comparative perspective to explore recent radical reinterpretations of the cognitive abilities of different primate species, including humans and their implications for the construction of evolutionary scenarios. PREREQUISITE: upper-division standing, ANTH 2 or equivalent introductory course in evolution/animal behavior, or consent of instructor.

ANA 224. Anthropology of Development (4) Course explores factors that shape human development, with a focus on biological, psychological, and social aspects of human development. Course will vary in title and content. When open, the current description and title is found in the current Schedule of Classes and the anthropology department Web site. (Can be taken a total of four times as topics vary.)

ANA 241. Advanced Principles of Human Evolution (4) Major stages of human evolution including the fossil evidence for biological and cultural changes through time. PREREQUISITE: upper-division standing, ANTH 2 or equivalent.

ANA 293. Conservation and the Human Predicament (4) (Same as BIEB 176.) Interdisciplinary discussion of the human predicament, biodiversity crisis, and importance of biological conservation. Examines issues from biological, cultural, historical, economic, social, political, and ethical perspectives emphasizing new approaches and new techniques for safeguarding the future of humans and other biophere inhabitants. PREREQUISITE: upper-division standing. ANTH 2 or consent of instructor.

ANA 295. The Evolution of Human Diet (4) The genotypes of our ancestors had agriculture or animal domestication, or neither. Our modern diet contributes to heart disease, cancers, and diabetes. This course will outline the Natural Diet of Primates and compare it with early human diets. PREREQUISITE: upper-division standing.

ANA 296. The Primate Skeleton (4) This course will compare long bones, head, and torso shape in tree-living and ground-living primates. The emphasis is on correlating locomotion with bone shapes. PREREQUISITE: ANTH 42: The Study of Primates in Nature.
ANTHROPOLOGY: SOCIOCULTURAL

ANSC 100. Special Topics in Socio-Cultural Anthropology (4)
Course usually taught by visiting faculty in socio-cultural anthropology. Course will vary in title and content. When offered, the current description and title is found in the current Schedule of Classes and the anthropology department Web site. (Can be taken a total of four times as topics vary. [Formerly known as ANGN 100].) **Prerequisite:** upper-division standing or consent of instructor.

ANSC 104. Anthropology of Fantasy (4)
A theoretical examination of the sources and relationships of public and private fantasy, based on cross-cultural studies of dreams, myths, and ritual. (Formerly known as ANSC 104.) Credit not allowed for both ANSC 104 and ANSC 104. **Prerequisite:** upper-division standing.

ANSC 108. Tourism and Global Culture (4)
This course examines structures of interaction between tourists and communities they visit. Topics addressed include authenticity, commodification, primitivism, photography, travel writing, television, stereotypes that tourists and visited peoples hold about each other, and tourism’s links to sociocultural conditions of modernity. **Prerequisite:** upper-division standing or consent of instructor.

ANSC 110. Societies and Cultures of the Caribbean (4)
This course examines societies and cultures of the Caribbean in anthropological and historical perspective. Topics include slavery, emancipation, indentureship, kinship, race, ethnicity, class, gender, politics, multiculturalism, religion, music, festivals, popular culture, migration, globalization, and tourism. (Formerly known as ANRG 110.) Credit not allowed for both ANSC 110 and ANSC 110. **Prerequisite:** upper-division standing.

ANSC 112. Linguistic Anthropology Workshop (2)
A weekly forum for presentation and discussion of work in linguistic anthropology by faculty, students, and guest speakers. **Note:** Majors may only apply eight units of approved P/NP credit toward the major, and minors may only apply four units of P/NP credit toward the minor. **Prerequisite:** upper-division standing.

ANSC 116. Languages of the Americas: Mayan (4)
An introduction to the languages and cultures of speakers of the Mayan family of languages, with emphasis on linguistic structures, ethnography, and the social history of the region. The course will concentrate on linguistic and ethnohistorical literature of a single language or sub-branch, emphasizing that of the family and region as a whole. **Prerequisite:** upper-division standing.

ANSC 117GS. Language and (Multi)Culture (4)
A critical introduction to the study of cultural patterns of thought, action, and expression, in relation to language. Topics include semiotics and structuralism, cognition and categorization, universal vs. particular, and ethnopoetics. **Prerequisite:** upper-division standing or consent of instructor.

ANSC 118. Language and Culture (4)
An introduction to the study of cultural patterns of thought, action, and expression, in relation to language. We consider comparatively semiotics and structuralism, cognition and categorization, universal vs. particular, ideologies of stasis and change, cultural reconstruction, and ethnopoetics. **Prerequisite:** upper-division standing.

ANSC 119. Gesture, Communication, and the Body (4)
The course is an introduction to a flourishing area of research that connects linguistic communication to alternate and complementary domains—manual gesticulation, the face, the body, and aspects of the “lived environment” (spaces, tools, artifacts). [Credit not allowed for both ANSC 119GS and ANSC 119.] **Prerequisite:** upper-division standing.

ANSC 119GS. Gesture, Communication, and the Body (4)
A critical examination of research on gesture and “body language” in comparative perspective, considering cognitive, interactive, and ethnographic bases of “body language” as communication, and the relationship of gesture to speech. **Prerequisite:** upper-division standing or consent of instructor.

ANSC 120. Anthropology of Religion (4)
Explores religious life in various cultures. Topics addressed include the problem of religious meaning, psychosocial aspects of religious experience, religious conversion and revitalization, contrasts between traditional and world religions, religion and social change. (Formerly known as ANSC 120.) Credit not allowed for both ANSC 120 and ANSC 120. **Prerequisite:** upper-division standing.

ANSC 121. Psychological Anthropology (4)
Interrelationships of aspects of individual personality and various aspects of sociocultural systems are considered. Relations of sociocultural contexts to motives, values, cognition, personal adjustment, stress and pathology, and qualities of personal experience are emphasized. (Formerly known as ANSC 121.) Credit not allowed for both ANSC 121 and ANSC 121. **Prerequisite:** upper-division standing.

ANSC 122. Language in Society (4)
After a brief introduction to linguistic concepts, the course covers the relations between culture and language, how languages reflect cultural change, language and social life, language and social change. (Formerly known as ANSC 122.) Credit not allowed for both ANSC 122 and ANSC 122. **Prerequisite:** upper-division standing.

ANSC 123. Political Anthropology (4)
Humans are goal seekers, some with public goals. Course considers ways goals are pursued, which are desirable, and how this pursuit is carried out at the local level with attention to the parts played by legitimacy and coercion. (Formerly known as ANSC 123.) Credit not allowed for both ANSC 123 and ANSC 123. **Prerequisite:** upper-division standing.

ANSC 124. Cultural Anthropology (4)
A web of problematic meanings lies behind social relations and institutional frameworks. This perspective plays an important role in the discussion of human affairs. Course considers the concept of culture in anthropology as a particularly forceful statement of such a perspective. (Formerly known as ANSC 124.) Credit not allowed for both ANSC 124 and ANSC 124. **Prerequisite:** upper-division standing.

ANSC 125. Gender, Sexuality, and Society (4)
How are gender and sexuality shaped by cultural ideologies, social institutions, and social change? We explore their connections to such dimensions of society as kinship and family, the state, religion, and popular culture. We also examine alternative genders/sexualities cross-culturally. (Formerly known as ANSC 125.) Credit not allowed for both ANSC 125 and ANSC 125. **Prerequisite:** upper-division standing.

ANSC 126. Childhood and Adolescence (4)
This course examines the nature of childrearing, socialization, and enculturation across cultures, and deepens our understanding of the development of personality, morality, spirituality, sexuality, emotion, and cognition. **Prerequisite:** upper-division standing.

ANSC 127. Discourse, Interaction, and Social Life (4)
The course considers how social life is constituted and negotiated through language and interaction. How do people construct meaning and order social relationships through face-to-face talk, and how do different modalities of interaction (including discourse and gesture) affect social life? **Prerequisite:** upper-division standing or consent of instructor.

ANSC 128. Culture and Emotion (4)
This course examines the diversity of emotional experience in human societies and the contribution of the study of emotion to understanding culture and human nature. **Prerequisite:** upper-division standing or consent of instructor.

ANSC 129. Meaning and Healing (4)
This course examines the nature of healing across cultures, with special emphasis on religious and ritual healing. **Prerequisite:** upper-division standing or consent of instructor.

ANSC 130. Hinduism (4)
An anthropological introduction to Hinduism, focusing on basic religious concepts and practices. Topics include myth, ritual, and symbolism; forms of worship; gods and goddesses; the roles of priest and renouncer; pilgrimages and festivals. (Formerly known as ANSC 130.) Credit not allowed for both ANSC 130 and ANSC 130. **Prerequisite:** upper-division standing.

ANSC 131. Urban Cultures in Latin America (4)
This course examines four interrelated and historically structured themes of urban culture in Latin America: the role of cities in organizing national space and society; immigration and race; modernism; and popular culture as new religion, music, and film. (Formerly known as ANSC 131.) Credit not allowed for both ANSC 131 and ANSC 131. **Prerequisite:** upper-division standing.

ANSC 132. Modernity in Brazil (4)
Construction of Brazilian modernity through four perspectives: Liberalism among slave-owning elites compared with democratic citizenship among contemporary poor, millenarian religions; construction of the urban periphery by residents; and a modernist theory (antropofagia) about Brazilian versus European culture. (Formerly known as ANSC 132.) Credit not allowed for both ANSC 132 and ANSC 132. **Prerequisite:** upper-division standing.

ANSC 133. Peoples and Cultures of the Middle East (4)
This course explores the living structures, family and gender relations, economy, and religion in the Middle East. We will especially focus on how people come to terms with recent transformations such as nationalism, literacy, globalization, and Islamism. (Formerly known as ANSC 133.) Credit not allowed for both ANSC 133 and ANSC 133. **Prerequisite:** upper-division standing.

ANSC 134. Global Islam (4)
Course aims to understand the diverse ways in which Muslims give meaning to their religion and use it as a framework to understand the world. (Formerly known as ANSC 134.) Credit not allowed for both ANSC 134 and ANSC 134. **Prerequisite:** upper-division standing.

ANSC 135. Indigenous Peoples of Latin America (4)
Indigenous peoples in the Americas have long been described and exploited, but they have also resisted and reworked the powerful forces affecting them. This course will trace this centuries-long contestation, focusing on ways anthropological representations have affected those struggles. (Formerly known as ANSC 135.) Credit not allowed for both ANSC 135 and ANSC 135. **Prerequisite:** upper-division standing.

ANSC 136. Traditional Chinese Society (4)
Course examines major institutions and culture patterns of traditional China, especially as studied through ethnographic sources. Topics include family, religion, agriculture, social mobility, and personality. (Formerly known as ANSC 136.) Credit not allowed for both ANSC 136 and ANSC 136. **Prerequisite:** upper-division standing.

ANSC 137. Chinese Popular Religion (4)
The religious world of ordinary precommunist times, with some reference to major Chinese religious traditions found in premodern Chinese history is recommended. (Formerly known as ANSC 137.) Credit not allowed for both ANSC 137 and ANSC 137. **Prerequisite:** upper-division standing.

ANSC 139. Freud, Psychoanalysis, and Culture (4)
This course examines the work of Sigmund Freud and its relevance to analysis of culture and experience in contemporary society, as well as influential works in the field of psychoanalytic anthropology. **Prerequisite:** upper-division standing or consent of instructor.

ANSC 140. Human Rights II: Contemporary Issues (4) [Same as HMRN 140.] Interdisciplinary discussion that outlines the structure and functioning of the contemporary
human rights regime, and then delves into the relationship between selected human rights protections—against genocide, torture, enslavement, political persecution, etc.—and the war in the former Yugoslavia and the early Cold War to the present. PREREQUISITE: Anthropology: upper-division or graduate standing or consent of instructor. HMNR: upper-division standing or consent of instructor.

ANSC 142. Anthropology of Latin America (4)
This course is jointed with ANTH 242. This course will examine the overlapping legacies of colonialism, the persistence of indigenous peoples and cultures, the importance of class and land reform, the effects of neoliberalism, and citizens’ efforts to promote social change in contemporary democracies. Undergraduates will be evaluated on the basis of a midterm and final; graduates will do additional reading and will write a twenty-page research paper. [Formerly known as ANGR 142.] Credit not allowed for both ANGR 142 and ANSC 142. PREREQUISITES: undergraduates: upper-division standing; graduates: graduate standing.

ANSC 160. Nature, Culture, and Environmentalism (4)
Course examines theories concerning the relation of nature and culture. Particular attention is paid to explanations of differing ways cultures conceptualize nature. Along with examples from non-Western societies, the course examines the Western environmental ideas embedded in contemporary environmentalism. [Formerly known as ANG 160.] Credit not allowed for both ANGN 160 and ANSC 160. PREREQUISITE: upper-division standing.

ANSC 161. Psychoanalysis and Religion (4)
With special attention to the relationship between theory and data, this course deals with the psychoanalytic approach to the study of religion through a close examination of key ethnographic and historical studies of religious systems and experience. [Formerly known as ANG 111.] Credit not allowed for both ANGN 111 and ANSC 161. PREREQUISITE: upper-division standing.

ANSC 162. Language, Identity, and Community (4)
This course examines the use of language difference in negotiating identity in bilingual and bidialectal communities and in structuring interethnic relations. It addresses social tensions around language variation and the social significance of language choices in several societies. [Formerly known as ANG 112.] Credit not allowed for both ANGN 112 and ANSC 162. PREREQUISITE: upper-division standing.

ANSC 163. Culture and Communication in Education (4)
(Previously titled Anthropology of Education.) The ways in which language and culture influence educational goals and processes. Cultural and sociolinguistic explanations of school failure in bilingual and biliterate communities will be examined and in structuring interpersonal relationships. It addresses social tensions around language variation and the social significance of language choices in several societies. [Formerly known as ANG 113.] Credit not allowed for both ANGN 113 and ANSC 163. PREREQUISITE: upper-division standing.

ANSC 164. The Anthropology of Medicine (4)
We examine the medical profession, the sick and the healers, and culture as communication in the medical event through aspects of medical practice and medical research of medicine as well as primitive and peasant systems. PREREQUISITE: upper-division standing.

ANSC 165. Contemporary South Asia (4)
This course explores contemporary cultural life in South Asia by examining selected works of literature, film, and ethnography. PREREQUISITE: upper-division standing.

ANSC 167. Rituals and Celebrations (4)
Examines the nature and significance of ritual. The course will examine the relationship of rituals, festivals, and popular celebrations. Topics include ritual symbolism, social and psychological aspects of ritual, life cycle rites, urban festivals, ritual theory. [Formerly known as ANG 167.] Credit not allowed for both ANGN 167 and ANSC 167. PREREQUISITE: upper-division standing.

ANSC 169. Culture and Environment: Research Seminar and Practice (4)
Examines the role of culture in the way people perceive and interact with the natural environment. Combines reading of select anthropological studies with training in ethnographic research methods. Students develop a research project and analyze data. Limit: fifteen students. PREREQUISITE: upper-division standing or consent of instructor.

ANSC 172. Life-History Seminar and Practicum (4)
Examines life-history research as a method for understanding the cultural and psychological experience of people. Combining readings of life-histories with training in life-history research methods. Students develop a life-history project, conduct interviews, and analyze data. [Formerly known as ANG 172.] Credit not allowed for both ANGN 172 and ANSC 172. PREREQUISITE: upper-division standing, ANSC 121 or concurrent enrollment in ANSC 121 and consent of instructor.

ANSC 189. The Anthropology of the End of the World: Millennium Movements Across Cultures (4)
Course focuses on historical and contemporary millenarian movements in the Western and non-Western world. Topics addressed include origins, role of prophets, conceptions of time, relation to politics, and influence on social change. Examples include Christian and non-Christian movements. [Formerly known as ANG 189.] Credit not allowed for both ANGN 189 and ANSC 189. PREREQUISITE: upper-division standing.

ANTHROPOLOGY: GRADUATE

ANTH 201. Special Topics in Anthropological Archaeology (4)
Course usually taught by visiting faculty in anthropological archaeology. Course will vary in title and content. When offered, the current description and title is found in the current Schedule of Classes on TritonLink, and the anthropology department Web site. (Can be taken a total of four times as topics vary.) [Formerly known as ANGR 201.] PREREQUISITE: graduate standing in anthropology.

ANTH 202. Olmec and Maya Archaeology (4)
Course examines the birth of Olmec and Maya civilizations in the Formative period, the rise of city states during the Early Classic, the decline of the Classic Maya, and the resurgence of the Postclassic period. [Formerly known as ANGR 202.] PREREQUISITE: graduate standing in anthropology.

ANTH 203. Four-Campus Video Conference Seminar (1) Weekly or bimonthly talks by a variety of scholars on varying analytical approaches to social sciences problems. Talks originate either at UCSD, UCLA, UCR, or UCI. Participants include graduate students and faculty from those four campuses. PREREQUISITE: graduate standing.

ANTH 205. World Third Cities: Comparative Urbanization and Social Theory (4)
This course examines how the process of World urbanization as a collision between state-sponsored development projects and insurgent practices of the poor, such as illegal housing, social movements, violence, and new citizenships. Beijing, Calcutta, and São Paulo provide comparative ethnographic and theoretical perspectives. [Formerly known as ANGR 205.] Credit not allowed for both ANGR 205 and ANTH 205. PREREQUISITE: graduate standing.

ANTH 210. Religion and Globalization (4)
Examines the worldwide resurgence of religion in the context of migration, missionization, the media, postcolonialism, and personal mobility in contemporary global culture. PREREQUISITE: graduate standing.

ANTH 211. Religion and Social Theory (4)
With special attention to the relationship between theory and data, this course deals with psychoanalytic approaches to the study of religion through a close examination of key ethnographic and historical studies of religious systems and experience. [Formerly known as ANGR 211.] PREREQUISITE: graduate standing.

ANTH 212. Advanced Topics in Biological Anthropology (4)
A critical exploration of timely and/or controversial topics in biological anthropology. Course will vary in title and content. [Formerly known as ANGR 212.] PREREQUISITE: graduate standing in anthropology.

ANTH 215. Advanced Topics in Sociocultural Anthropology (4)
A critical exploration of timely and/or controversial topics in sociocultural anthropology. Course will vary in title and content. PREREQUISITE: graduate standing.

ANTH 216. Global Pentecostalism (4)
Pentecostal and charismatic Christianity have recently expanded around the globe. This course explores the cultural and social processes facilitating their spread and examines how these kinds of Christianity shape social life, politics, gender relations, and economic practices in contemporary societies. [Formerly known as ANGR 216.] Credit not allowed for both ANGR 216 and ANTH 216. PREREQUISITE: graduate standing.

ANTH 219. Seminar in Political Anthropology (4)
The focus here is “politics,” broadly constructed, in various societies. Analysis is from the point of view of the recourses deployed by all involved, including but not limited to power, with emphasis on the role of culture and social structure. [Formerly known as ANGR 219.] PREREQUISITE: graduate standing.

ANTH 220. The Human Body in Discourse and Experience (4)
This is an interdisciplinary seminar examining the place of the body and embodiment in contemporary culture and culture theory. PREREQUISITE: graduate standing.

ANTH 221. Phenomenology of Perception (4)
This seminar will focus on a close and intensive reading of Maurice Merleau-Ponty’s masterwork, The Phenomenology of Perception. Emphasis will be placed on the relevance of this work for theory, method, and practice in the social sciences. [Formerly known as ANGR 221.] Credit not allowed for both ANGR 221 and ANTH 221. PREREQUISITE: graduate standing.

ANTH 223. Anthropological Interviewing (4)
The course teaches techniques of long-term, intensive in-field work in collaboration with an emphasis on psychodynamic inference and its usefulness in different cultural settings. [Formerly known as ANGR 223.] PREREQUISITE: graduate standing in anthropology.

ANTH 224. Advanced Topics in the Anthropology of Gender (4)
A critical analysis of ethnographic and theoretical texts focusing on the sociocultural study of gender. We will also draw on studies of gender and feminist theory from other disciplines (e.g., history, philosophy) to illuminate issues relevant to anthropology. [Formerly known as ANGR 224.] PREREQUISITE: graduate standing in anthropology or consent of instructor.

ANTH 225. Andean Prehistory: Rise of Complexity (4)
This course examines the rise of complex societies in the Andean region from the Preceramic through the rise of chiefdoms, states, and empires. Readings focus on archaeological and some ethnohistorical and ethnoarchaeological sources. PREREQUISITE: graduate standing.

ANTH 226. Ethnography of Christianity (4)
Directed to graduate students planning ethnographic work in Christian societies, this course explores variations in the interpretation and expression of Christianity using historical and ethnoarchaeological sources. [Formerly known as ANGR 226.] PREREQUISITE: graduate standing or consent of instructor.

ANTH 228. Inca Empire: Society and Statecraft (4)
This course examines the Inca’s Andean empire from its origins through the Spanish invasion. Readings include archaeological sources, ethnohistorical colonial accounts, and present-day Quecha and Aymara ethnographies. PREREQUISITE: graduate standing.

ANTH 229. Religion and Healing (4)
This seminar is an in-depth analysis of cultural meaning, lived experience, and the personal process in ritual healing, emphasizing performative/persuasive aspects of the relation between religion and health in comparative, cross-cultural perspective. PREREQUISITE: graduate standing.

ANTH 230. Department Colloquium (1) A forum to present work by faculty, students, and guests. Course will be offered quarterly. [Formerly known as ANGR 230.]
ANTH 246. Anthropology of Latin America (4) [This course is conjoined with ANSC 142.] This course will examine the overarching legacies of colonialism, the persistence of indigenous peoples and cultures, the importa
ce of class and land reform, the effects of neoliberalism, and citizens' efforts to promote social change in contemporary democracies. Undergraduates will be evaluated on the basis of midterm and final; graduates will do additional reading and will write a twenty-page research paper. [Formerly known as ANGR 142.] Credit not allowed for both ANGR 244 and ANTH 244. **PREREQUISITE:** graduate standing.

ANTH 247. Multimodal Interaction (4) Human society evolved in the context of face-to-face interaction. The course will examine methods and theoretical approaches to understanding what role, especially speech, gesture, and gaze—their mutual inte
gration, and their relevance to ethnography. [Formerly known as ANGR 247.] Credit not allowed for both ANGR 247 and ANTH 247. **PREREQUISITES:** graduate standing in anthropology or consent of instructor.

ANTH 251. Ethnographies of Modern Society (4) This seminar explores the experience and representa
tion of modernity through ethnography. Readings will highlight such issues as: the social dynamics of the city; postcoloniality; globalization and transnationalism; the politics of culture; contemporary religious movements; and gender and modernity. [Formerly known as ANGR 251.] **PREREQUISITE:** graduate standing or consent of instructor.

ANTH 252. Interrogating Neoliberalism (4) This seminar will consider the theoretical constructions and deployments of neoliberalism, which has produced an assemblage of capitalist restructuring, transformed governan
tce, and newly produced subjectivities. **PREREQUISITE:** graduate standing.

ANTH 257. Mind, Self, and Identity (4) This seminar critically examines social, cultural, and psy
chological theories of the person, and their relationship to conceptions of the person found in moral political and religious discourses. It explores the role of concepts of the person in ethnographic research. [Formerly known as ANGR 257.] **PREREQUISITE:** graduate standing in anthropology.

ANTH 258. Analytical Methods in Archaeology (4) Specialized scientific techniques are increasingly important to archaeology. This seminar examines chronometric date techniques, site-formation processes, and geoarchaeology and pedology, chemical analyses of soils, zooarchaeology, palaeoethnobotany, and how land-use strategies can be inferred from archaeological remains. [Formerly known as ANGR 258.] **PREREQUISITE:** graduate standing.

ANTH 259. Gender and Mental Health (4) This seminar in psychological/psychiatric anthropology takes a comparative approach to the study of gender and mental health. Culture and feminist theory is employed to address questions of gender in relation to various prob
lems, such as depression, anxiety, and eating disorders. **PREREQUISITE:** graduate standing.

ANTH 260. Psychodynamic Anthropology (4) The focus of the seminar will be on the relation be
tween psychodynamic models and culture and society. Reading and will write a twenty-page research paper. [Formerly known as ANGR 260.] **PREREQUISITE:** graduate standing.

ANTH 261. Audio and Video Methods in Ethnography (4) A seminar/laboratory exploration, both theoretical and practical, of iconic recording tools in ethnography, fo
cusing on graphic images, photography, and audio and video recording in both natural and semi-experimental settings, with special critical attention to epistemological and theoretical bases of ethnographic representations. **PREREQUISITE:** graduate standing in anthropology (AN 75, AN 77) or consent of instructor.

ANTH 262. New Directions in Culture, Politics, and History (4) Anthropology has long analyzed the relations between culture, economics, and politics. This seminar will ex
amine these issues through ethnographic and historical accounts, engaging contemporary theory and debates. **PREREQUISITE:** graduate standing.

ANTH 263. Anthropology of Language and Discourse (4) Examines the theoretical and methodological founda
tions and principal research questions of Linguistic Anthropology, providing the fundamentals for graduate students who wish to specialize in language and cultural forms. **PREREQUISITE:** graduate standing in anthropology or consent of instructor.
ANTH 296. Dissertation Fieldwork Proposal Preparation (4)
The student will work in cooperation with his or her departmental committee to develop a research proposal for the doctoral research project. [Formerly known as ANGR 296A/296B]. PREREQUISITE: graduate standing in anthropology and consent of departmental committee chair. (S/U grades only.)

ANTH 297. Research Practicum (1–4)
Supervised advanced research studies with individual topics to be selected according to the student’s special interests. [Formerly known as ANGR 297]. PREREQUISITE: for anthropology graduate students who have returned from their field research. (S/U grades permitted.)

ANTH 298. Independent Study (1–4)
Supervised study of individually selected anthropological topics under the direction of a member of the faculty. [Formerly known as ANGR 298]. PREREQUISITE: graduate standing. (S/U grades only.)

ANTH 299. Dissertation Research (1–12)
[Formerly known as ANGR 299]. PREREQUISITE: Ph.D. candidacy in anthropology. (S/U grades only.)

ANTH 500. Apprentice Teaching (4)
Anthropology graduate students participate in the undergraduate teaching program during one quarter anytime in the first four years of residence. Teaching may be in the anthropology department or other departments or programs on campus. Equivalent to duties expected of a 50 percent T.A. Enrollment in four units documents the Ph.D. requirement. (S/U grades only.) [Formerly known as ANGR 500]. PREREQUISITE: graduate student in anthropology.

ANTH 501. T.A.ing in Sixth College/C.A.T. (4 or 6)
Consideration and development of pedagogical methods appropriate to undergraduate teaching in the interdisciplinary Sixth College Core Sequence, Culture, Art, and Technology under supervision of Core Program faculty, with assistance of the Core Program director, associate director for the Writing Program, and the associate director of the Thematic program. (S/U grades only.) [Formerly known as ANGR 501]. PREREQUISITE: anthropology graduate student teaching for the C.A.T./Sixth College Writing Program.

The Graduate Program

Applied Ocean Science

Office: Old Scripps Building, Room 22, Scripps Institution of Oceanography

Associated Faculty

Professors
Laurence Armi, Ph.D., SIO; IGPP
Michael J. Buckingham, Ph.D., SIO; MPL
LeRoy M. Dorman, Ph.D., SIO; GRD
Carl H. Gibson, Ph.D., MAE; SIO
Robert T. Guza, Ph.D., SIO; IOD
John A. Hildebrand, Ph.D., SIO; GRD; MPL; ECE
William S. Hodkgiss, Ph.D., SIO; MPL; ECE
William A. Kuperman, Ph.D., SIO; MPL
Juan C. Lashezas, Ph.D., MAE
Paul F. Linden, Ph.D., MAE
W. Kendall Melville, Ph.D., SIO; MPL
Robert Pinkel, Ph.D., SIO; MPL
Sutana Sarkar, Ph.D., MAE
Dariusz Stramski, Ph.D., SIO; MPL
Bradley T. Werner, Ph.D., SIO; IGPP
Clinton D. Winant, Ph.D., SIO; IOD

Professors Emeriti
Douglas L. Inman, Ph.D., SIO; IOD
George G. Shor, Jr., Ph.D., SIO
Richard C.J. Somerville, Ph.D., SIO; CRD
Kenneth M. Watson, Ph.D., SIO; MPL

Associate Professors
Sarah T. Gille, Ph.D., SIO; MAE
Stefan Llewellyn-Smith, Ph.D., MAE
Keiko K. Nomura, Ph.D., MAE

Lecturers
Grant B. Deane, Ph.D., SIO; MPL
Gerald D’Spain, Ph.D., SIO; MPL
Peter Gerstoft, Ph.D., SIO; MPL
Jules S. Jaffe, Ph.D., SIO; MPL
Hee Chun Song, Ph.D., SIO; MPL
Aaron Thode, Ph.D., SIO; MPL

Associated Research Groups

Marine Physical Laboratory, MPL
Institute of Geophysics and Planetary Physics, IGPP
Geosciences Research Division, GRD
Integrative Oceanography Division, IOD
Climate Research Division, CRD
Physical Oceanography Research Division, PORD

Applied Ocean Science (AOS) is an interdepartmental Ph.D. program with a focus on the interface between ocean exploration and technology. It is administered by an interdepartmental group composed of members of the faculties of cooperating departments: the Graduate Department of the Scripps Institution of Oceanography (SIO), the Department of Mechanical and Aerospace Engineering (MAE), the Department of Structural Engineering (SE), and the Department of Electrical and Computer Engineering (ECE).

This interdepartmental curriculum combines the resources of these departments to produce oceanographers who are knowledgeable about modern engineering and instrumentation, as well as marine oriented engineering scientists who are familiar with the oceans. Since physical, chemical, geological, and biological aspects of the oceans and all forms of engineering may be involved, the curriculum provides maximum flexibility in meeting the needs of each individual student.

Candidates for admission should apply directly to one of the departments participating in the Applied Ocean Science program, listing Applied Ocean Science as an area of specialization. The choice of department should be based on the individual student’s planned area of major emphasis. Applicants will be expected to meet the admission requirements of the department to which they have applied.

The program is primarily directed toward the Ph.D. degree. However, both the candidate of philosophy and master of science degree (either Plan I, thesis, or Plan II, comprehensive examination) also
will be offered under special circumstances. Students applying for a terminal master’s program should be aware of any special requirements for the department to which they apply.

The degrees completed under this program in the Department of SIO will carry the title “Oceanography.” Those degrees completed in the other cooperating departments will have the parenthetical title “(Applied Ocean Science)” appended to the appropriate authorized title.

The students are expected to enroll in the Applied Ocean Science Seminar (SIO 208) throughout their period of residency. This seminar will make use of outside speakers, faculty members, and students in presenting various topics on applied ocean science and related fields. It provides a central forum in which all AOS students can participate. In addition to these basic requirements, the student will be subject to whatever additional requirements are prescribed by his or her department.

Course work occupies much of the first one and one-half to two years of graduate study. During this period there are numerous opportunities for students to investigate the research programs of the various research groups on the campus, and cultivate associations with professors and research groups which can provide support and guidance for thesis research in their selected field of specialization. In consultation with an adviser, students will plan a curricular path of courses which will adequately prepare them in their field of specialization. The courses may be selected from the entire catalog of courses available on the UC San Diego campus or from appropriate courses from other UC campuses and other universities.

similar to some of the foundation courses in the Au.D. program. Upon entering the program, each individual will be assessed to determine competencies/knowledge in material that would put them on par with expectations for the Au.D. program. For some of the foundation core courses offered the first year at SDSU, e.g., Audiology 705, 710, 725, students may be given credit for the courses or be required to substitute a Doctoral Special Study (Audiology 798) course for one or more of these courses to ensure competencies or remediate deficiencies if approved by the program faculty. Credit for some of the first year clinic units may also be approved based on work experience; however, a full complement of expected clinical skills must be demonstrated.

Specific Requirements for the Au.D. Degree

Upon admission to the program, each student will be assigned a faculty advisor. The faculty advisor will help the student select a program of study to meet all program requirements. The Au.D. program is a four-year program, including summer semesters after year one through three. An exact unit minimum is not specified due to the mixing of semester units (SDSU) and quarter units (UCSD) and differences in clinical hours at different settings; however, the program is approximately 134 semester-equivalent course units. All students in the Au.D. program will fulfill the following requirements. Any alternative method of fulfilling these requirements requires advanced written permission from the program directors.

Residency Requirements

After formal admission to the Au.D. program, the student must complete a minimum of course hours equivalent to one year’s full-time enrollment at each campus. The definition of residence must be in accord with the regulations of San Diego State University and the University of California, San Diego. The program is designed to be shared, as equally as possible, between the two campuses. The first year is entirely at SDSU, the second year is entirely at UCSD, and the third year will have options from both campuses. The fourth year of the program will be a full-time clinical externship at a program-approved clinic agency or site. Both campuses will share equally in the academic, clinic, and research components of the program.

Course Requirements

The program for each student will consist of prescribed set of courses, with the first year of courses entirely at SDSU and the second year of courses entirely at UCSD. The student’s faculty advisor will approve any changes to the standard curriculum.

Clinic Requirements

Each student will progress through a variety of clinical experiences involving patient assessment and management throughout their program of study. Clinic experiences will require concurrent enrollment in clinic courses appropriate for the campus in which they are doing the clinical work. These supervised clinical experiences are completed in the SDSU Audiology Clinic, UCSD Otology Clinics, and in community field sites. Clinic courses may be repeated as needed and require advisor approval prior to enrollment. Prior to the fourth year externship, each student will obtain approximately 500 hours of clinic experience. A minimum of 2,000 clinical hours is required by the end of the program.

- Preceptorship in Otology. All students will have at least one quarter of a clinical rotation with otology staff associated with UCSD. Students will accompany otology faculty during their clinics and surgeries, and receive training in one or more of the following areas: clinical otology, pre- and post-operative assessment of patients, pharmacology related to otology, design and implementation of clinical trials with balance disorders, and pediatric otology.
- Clinical Staffings. In addition, all students will be required to regularly participate in formal clinical case study/staffing experiences. At SDSU, these clinical staffings include student and faculty presentations and discussions of interesting cases seen in their clinics. At UCSD, these staffings include the Chairman’s Conference and Grand Rounds, where Au.D. students/residents and medical staff discuss otological problem cases and disorders, and the Neurotology Conference, where UCSD and community physicians, and students/residents discuss cases dealing with neurological diseases and vestibular disorders.
- Fourth-Year Externship. The fourth-year externship is a full-time clinical experience in an approved agency/site. These externships may require a competitive interview process by the agency. Externship sites may be in other parts of the country. All students in their fourth-year externship must also enroll in the online clinical seminar at SDSU each semester.

Research Practicum

Each student will spend at least two semesters or quarters participating in research being done by program faculty. Students will not be conducting independent research, but will actively participate in data collection and analysis at the discretion of the lab director. Students must enroll in the research practicum course for the appropriate campus.

Examinations

All students in the program will be evaluated at the following levels:

- First Year Evaluation. Students must have achieved a 3.0 grade point average on all core and elective courses during the first year, and have appropriate clinical skills as determined by the student’s clinic supervisors. The student’s ability to integrate the academic material and clinic procedures appropriate for the end of the first year will be assessed through a first year qualifying exam. This examination will be a written and practical examination to be taken at the end of the spring semester. The First Year Qualifying Exam may be repeated once following additional directed study by the student’s advisor. Students must pass the first year evaluation in order to enroll in second year courses.
- Second Year Evaluation. Students must have achieved a cumulative grade point average of 3.0 on all core and elective courses, and have appropriate clinical skills as determined by the student’s clinic supervisors. The student’s ability to integrate the academic and clinic procedures appropriate for the end of the second year will be assessed through a Second Year Qualifying Examination. This examination will be a written examination to be taken at the end of the spring quarter. The Second Year Qualifying Examination may be repeated once following additional directed study by the student’s advisor. Students must pass the second year evaluation in order to enroll in third year courses.
- Comprehensive Examination. At the end of the third year, and after Advancement to Candidacy (see below), the student will take a Comprehensive Examination, which has an integrative written component and a practical component involving clinical procedures. The comprehensive examination must be passed before a student can be registered for the externship.

Advancement to Candidacy

Candidates will be recommended for advancement to candidacy after successfully completing all course, laboratory rotation, and clinic requirements for Year 1 and Year 2 (with a minimum grade point average of 3.0), satisfactory performance on the first and second year evaluations, and approval of the doctoral project proposal. Students cannot enroll in the doctoral project course, take the comprehensive examination, or register for their externship until advanced to candidacy. The program’s Executive Committee recommends students eligible for advancement to candidacy to the graduate deans of both institutions.

Doctoral Project

Each student will complete an innovative doctoral project. The doctoral project can take the form of a number of different options, e.g., a research-based investigation, survey, meta-analysis, development of a clinical protocol based on published research findings, or other projects proposed by the student that are accepted by the committee. The project should be designed to allow an opportunity to demonstrate critical thinking on clinical issues. Each student will select a Doctoral Project Committee of two Au.D. program faculty (one from each campus) and a faculty member external to the program. The chair of the committee can be from either campus. The executive committee will approve each student’s Doctoral Project Committee. All doctoral projects will be written in a format approved by the student’s doctoral project committee. The student’s final written document will be approved by the student’s Doctoral Project Committee. Each student will enroll in the appropriate doctoral project course depending on the campus in which their committee chair resides.

The Doctor of Audiology (Au.D.) degree will be awarded jointly by the Regents of the University of California and the Trustees of the California State University in the names of both cooperating institutions.
Financial Support

Funding for graduate students cannot be guaranteed, although every effort will be made to provide some financial support for as many students as possible through graduate/teaching assistantships, research grants, clinical traineeships, and/or scholarships. Financial support will be awarded consistent with the policies of the two universities. Tuition and fees will be charged in accordance with the extant policies at the campus in which the student is matriculated in a given year.

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

AUD 236. Preceptorship in Neuro-Otology (2)
Observations in UCSD Otology clinic. Learn about procedures for taking histories and performing clinical examinations, patient treatment, and patient education from otologists. **PREREQUISITE:** second-year Au.D. student or consent of instructor.

AUD 255. Anatomy and Physiology of the Auditory and Vestibular Systems (4)
Detailed anatomy of the auditory and vestibular systems, including the ultra-structure, histology, and neuronal connections of the systems. In addition, physiological responses that underlie the actions of each system are described, from the cellular to the systems levels. **PREREQUISITE:** second-year Au.D. student or consent of instructor.

AUD 256. Pathophysiology of the Auditory and Vestibular Systems (4)
Physiological and anatomical substrates of auditory and vestibular disorders including influences of neurological disorders. Topics include peripheral and central disorders, congenital disorders due to infections, as well as acquired ototoxic, noise-induced, infective, autoimmune, age-associated disorders, and traumatic disorders. **PREREQUISITE:** AUD 255 or consent of instructor.

AUD 257. Ear Diseases and Treatment (3)
Differential diagnosis and treatment of auditory and vestibular disorders, audiological components of neuro-otology, as well as interactions between the audiologist and neuro-otologist in a clinical setting. **PREREQUISITE:** second-year Au.D. student or consent of instructor.

AUD 263. Physiological and Behavioral Tests of Vestibular Function (4)
Clinical evaluation of vestibular function, using techniques such as caloric and rotational electroneystagmography and posturography. The interpretation of clinical findings and implications for rehabilitative strategies will be covered. The course will include observation of testing in otology clinic settings. **PREREQUISITE:** second-year Au.D. student or consent of instructor.

AUD 264. Auditory and Vestibular Development and Genetics (3)
Embryology and functional development of the auditory and vestibular systems, from their initial appearance to adult function. Inherited disorders of these two sensory systems are also addressed, including phenotypic description and genetic basis. Genetic counseling and the potential for gene therapy are also discussed. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor.

AUD 270. Newborn Hearing Screening and Management (3)
This course describes procedures and requirements for newborn hearing screening, and the detection and clinical management of congenital auditory disorders. Observations of newborn screening in a neonatal ICU environment. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor.

AUD 271. Temporal Bone Anatomy (4)
Detailed anatomy of the temporal bone, including surgical approaches. Participation in dissecting a human cadaver temporal bone specimen, and observation of medical residents/staff learning to perform surgical drilling of temporal bone under the supervision of experienced otologic surgeons. Radiographic and magnetic resonance imaging of the temporal bone will be described and discussed. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor.

AUD 275. Intraoperative Monitoring (3)
Methods and procedures required for monitoring of evoked auditory responses in the operating room. The indications for the use of intraoperative monitoring and difficulties unique to this setting. The course will include the opportunity to observe auditory potential monitoring in the operating room. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor.

AUD 276. Cochlear Implants and Other Implantable Sensory Aids (3)
Theory and practice of cochlear implantation with focus on audiological management of patients after implantation. Current concepts regarding the activation of primary auditory neurons by electrical stimulation and indications for cochlear implantation and surgical procedures are described. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor.

AUD 284. Clinical Practice in Audiology II (1-4)
Applications of clinical procedures to patient assessment. Includes clinical observation, interaction with otologists, and supervised patient care involving diagnostics and hearing-aid evaluations in the UCSD audiology clinics. This course may be taken more than once. **PREREQUISITE:** open to second- or third-year doctoral students or consent of instructor. One quarter unit represents 3 to 4 hours per week. Must also be concurrently enrolled in AUD 291.

AUD 291. Clinical Case Studies/Staffing (1)
Presentations and discussion of clinical cases and issues related to clinical practice. Students’ clinical experiences are discussed relative to medical and audiological assessment and management. This course may be taken more than once. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor. Must be taken more than once.

AUD 296. Research Practicum (3)
Participation in specific faculty research activities. Become familiar with research methods and objectives of a faculty’s research project. Participate in data collection and analysis at the discretion of the faculty investigator. **PREREQUISITE:** second- or third-year Au.D. student or consent of instructor.

AUD 298. Independent Research (3)
Independent research on topics relevant to audiology, consisting of literature review, data collection, faculty supervision and mentoring on practical elements of research design and methodology. The course will consist of laboratory experience, focused on practical elements of research and design and methodology. **PREREQUISITE:** consent of Au.D. program advisor and consent of faculty mentor.

AUD 299. Doctoral Project (3)
Individual investigation and preparation of the doctoral project for the Au.D. degree will be performed under the supervision of an experienced research mentor. **PREREQUISITE:** advancement to candidacy in the Au.D. program.

Bioinformatics and Systems Biology Graduate Program

PROGRAM DIRECTOR: Pavel Pevzner, Professor in Computer Science and Engineering

ASSOCIATE DIRECTOR: Alexander Hoffmann, Professor in Chemistry and Biochemistry

STUDENT AFFAIRS: (858) 822-4948 bioinfo@ucsd.edu http://www.bioinformatics.ucsd.edu

PARTICIPATING FACULTY

DEPARTMENT OF BIOENGINEERING

Gaurav Arya, Assistant Professor, Nanoeengineering
Jeffrey Hasty, Associate Professor
Xiaohua Huang, Assistant Professor
Trey Ideker, Associate Professor
Andrew McCulloch, Professor
Bernhard Palsson, Professor
Shankar Subramaniam, Professor
Kun Zhang, Assistant Professor

DIVISION OF BIOLOGICAL SCIENCES

Steven Briggs, Professor, Cell and Developmental Biology
Steve Kay, Dean, Biological Sciences, Professor, Cell and Developmental Biology
Amy Kiger, Assistant Professor, Cell and Developmental Biology
William Loominis, Professor, Cell and Developmental Biology
Eduardo Macagno, Atkinson Chair, Professor, Cell and Developmental Biology, Cognizant Dean of Program
James Posakony, Professor, Cell and Developmental Biology
Milton Saier, Professor, Molecular Biology
Julian Schroeder, Professor, Cell and Developmental Biology
Inder Verma, Adjunct Professor

Biochemistry

Students wishing to major in biochemistry should refer to programs offered by the Division of Biological Sciences, which has an undergraduate major in biochemistry and cell biology, or the Department of Chemistry and Biochemistry, which has an undergraduate major in biochemistry/chemistry. Both the Division of Biological Sciences and the Department of Chemistry and Biochemistry offer graduate programs with specialization in biochemistry. Those programs are described in the biological sciences and chemistry and biochemistry sections of this catalog.
**BIOMEDICAL SCIENCES PROGRAM**

Philip Bourne, Professor, Pharmacology  
Christopher Glass, Professor, Cellular and Molecular Medicine  
Lawrence Goldstein, Professor, Cellular and Molecular Medicine/Pharmacology  
Vivian Hook, Professor, Pharmacology  
Richard Kolodner, Medicine  
Sanjay Nigam, Professor, Pediatrics  
Jerrold Olefsky, Medicine  
Bing Ren, Associate Professor, Cellular and Molecular Medicine  
Douglas Richman, Professor in Residence, Pathology  
Michael Rosenfeld, Professor, Medicine  
Palmer Taylor, Professor/Dean, School of Pharmacy and Pharmaceutical Sciences  
Ronghui (Lily) Xu, Associate Professor, Family and Preventive Medicine  
Gene Yeo, Assistant Professor, Cellular and Molecular Medicine

**DEPARTMENT OF CHEMISTRY AND BIOCHEMISTRY**

Alexander Hoffmann, Associate Professor, Program Co-Director  
Patricia Jennings, Associate Professor  
Simpson Joseph, Professor  
Andrew McCammon, Professor  
Susan Taylor, Professor  
Rager Tsien, Professor  
Wei Wang, Assistant Professor  
Lor Weinberger, Assistant Professor  
Peter Wolynes, Professor  
John Wooley, Adjunct Professor

**DEPARTMENT OF COMPUTE R SCIENCE AND ENGINEERING**

Scott B. Baden, Professor  
Vineet Bafna, Associate Professor  
Sanjoy Dasgupta, Assistant Professor  
Charles Elkan, Professor  
Pavel Pezner, Ronald R. Taylor Chair, Professor, Program Director

**MARINE BIOLOGY RESEARCH DIVISION**

Terry Gaasterland, Professor, Marine Biology Research Division

**DEPARTMENT OF MATHEMATICS**

Michael Holst, Professor  
Glenn Tesler, Assistant Professor  
Ruth Williams, Professor

**DEPARTMENT OF PHYSICS**

Terence Hwa, Professor  
José Onuchic, Professor

---

**PROGRAM FOCUS**

The Bioinformatics and Systems Biology Graduate Program draws upon the expertise of affiliated faculty from the Division of Biological Sciences; Departments of Bioengineering, Chemistry and Biochemistry, Computer Science and Engineering, Mathematics, Physics, and the Biomedical Sciences Graduate Program.

The University of California, San Diego is a premier research institution that has fostered interdisciplinary research since its inception. Specifically, bioengineering (at the interface of biology, medicine, and engineering), neuroscience (at the interface of biology and medicine), biophysics (at the interface of chemistry, biology, and physics), and cognitive science (at the interface of medicine and computer science) are all nationally ranked interdisciplinary graduate research programs. This has led to growth and innovation in many new areas of science and engineering research and the training of an exceptionally high caliber of graduate and postdoctoral students.

In recent years, bioinformatics and systems biology have been identified by the UCSD administration as two of the most important growth areas for the campus. With several recent new faculty hires, UCSD has seen a significant increase in the research activity associated with bioinformatics and systems biology—these transcend traditional disciplines.

**DEVELOPMENT OF A FIELD**

We are witnessing the birth of a new era in biology. The ability to decipher the genetic code of living organisms is dramatically changing our understanding of the natural world and promises to improve substantially the quality of human life. Understanding how genomes work requires sophisticated computer-based information handling tools (bioinformatics), and new high throughput technologies for understanding the function of genes on a genome-wide scale (functional genomics). The combination of experimental and modeling approaches to understand the functioning of genomes and cellular systems is often called systems biology.

The most pressing problem in the systems biology era will be to understand the integrated functions of thousands of genes. Dealing with this problem will require an interdisciplinary research structure dedicated to developing intellectual and human capital in bioinformatics and genome science. Due to the complexity of this new paradigm in biology, entirely new sets of tools and human resources will be necessary. Thus, future developments will be dependent upon the scientific progress at the interface of these three major disciplines—biology, engineering, and computer science. The accelerated growth of modern biology warrants revolutionary changes in academic curricula.

**PARTICIPATING DEPARTMENTS**

Each department represented in this program participates in various interdisciplinary graduate programs in addition to providing very strong intradisciplinary graduate training. One example is the La Jolla Interfaces in Science program (LJIS), a campus- and mesa-wide fellowship opportunity sponsored by the Burroughs Wellcome Fund. LJIS supports exploration of interfaces between the biological and biomedical sciences and the physical, computer, and mathematical sciences at UCSD, The Scripps Research Institute (TSRI), the Salk Institute, and the San Diego Supercomputer Center.

Bioengineering, consistently ranked among the top three programs nationally by U.S. News and World Report, has several new faculty hires in the area of bioinformatics and computational biology and has identified bioinformatics as a major area of focus.

Biological Sciences, a premier division at UCSD, will spearhead the interdisciplinary, undergraduate specialization in bioinformatics and is planning to hire new faculty in bioinformatics fields.

Biomedical Sciences, is an interdisciplinary Ph.D. program, based in the School of Medicine, with tracks in pharmacology, physiology, and cellular and molecular medicine. It will be closely linked to the planned new School of Pharmacy and Pharmaceutical Sciences. In addition to a strong computational biology presence amongst its faculty, there are plans to hire more faculty whose main interests are in computational pharmacogenomics and bioinformatics.

Chemistry and Biochemistry, the home of the Molecular Biophysics Training Grant, is highly recognized for its strong computational biology program with plans to further expand in chemo and bioinformatics areas.

Computer Science and Engineering is unique in having a critical mass of faculty whose research interests focus on biology. These faculty have very strong collaborative research interactions with biology, chemistry, and engineering researchers. CSE is currently recruiting for a senior faculty member with computational biology expertise.

Mathematics has expressed strong interest in building in the area of bioinformatics with emphasis on statistics and probability. This focus is one of fundamental importance for the future of bioinformatics, and the department is committed to both hiring new faculty and launching new courses in statistics pertinent to bioinformatics.

Physics is the home of leaders in the field of computational statistical mechanics applied to biology and provides the foundation for sophisticated modeling of complex biological systems. Physics also plans to recruit new faculty members whose research focus will be on development of information/theory-based models of biological systems.

**ADMISSIONS REQUIREMENTS**

Admission is in accordance with the general requirements of the graduate division. Candidates will have an interdisciplinary persuasion to work across computers, biology, medicine, and engineering; with an undergraduate degree majoring in any of the disciplines in biological science, physical science, computer science, mathematics, or engineering with a strong background in quantitative sciences and biology.

Admission review will be on a competitive basis based on the applicants’ undergraduate track record, Graduate Record Examination General Test (GRE) scores, and other scholastic achievements. Attention will also be given to the motivation and career plans of the applicant candidates. Special attention will be given to the qualitative and analytical section scores of the GRE. The applications will be screened and evaluated by the Admissions Committee with input from all program faculty. In addition, applicants must submit a completed UCSD Application for Graduate Admission (use major code BF75), official transcripts (English translation must accompany official transcript written in other languages), TOEFL scores of the GRE. The applications will be screened and evaluated by the Admissions Committee with input from all program faculty. In addition, applicants must submit a completed UCSD Application for Graduate Admission (use major code BF75), official transcripts (English translation must accompany official transcript written in other languages), TOEFL
scores (required ONLY for all international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English), and three letters of recommendation from individuals who can attest to the academic competence and to the depth of the candidates’ interest in pursuing graduate study.

For further admission information, students should contact the bioinformatics graduate coordinator via e-mail at bioinfo@ucsd.edu or at (858) 822-4948. You may also visit our Web site at http://www.bioinformatics.ucsd.edu.

**Curriculum**

The Bioinformatics and Systems Biology Graduate Program is organized around a formal course requirement consisting of three quarters of course work, with enrollment in four four-unit courses each quarter. One four-unit course in each quarter will be a research rotation in the laboratory of a program faculty mentor. The remaining nine courses will include four compulsory core courses and five courses to be chosen from a list of electives approved by the Course Committee.

The electives are intended to maximize the flexibility of the program, but at least one course must be chosen from the biology field and one from the computer science field. The faculty advisor(s) will pay particular attention to the academic competence and to the depth of the individual student. The faculty advisory committee will work closely with students to identify what might be lacking in a particular curriculum program.

**Core Training Courses**

- Bioinformatics I: Biological Data and Analysis Tools (Pharm 201)
- Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (BENG 202/CSE 257A)
- Bioinformatics III: Genomic Analysis (BENG 203)
- Bioinformatics IV: Statistical Methods in Bioinformatics (Math 283)

**Program Electives**

(Each student will select from five of the eight elective fields below. One must be from the biology field and one from the computer science field. For each elective, multiple course options currently available are listed).

**Elective 1: Biochemistry**

BENG 230: Biochemistry  
BIBC 100: Structural Biochemistry

**Elective 2: Data Structures**

CSE 100: Data Structures  
CSE 200: Computability and Complexity  
Math 176A: Computer Implementation of Data Structures

**Elective 3: Algorithms**

CSE 101: (also Math 188) Design and Analysis of Algorithms  
Math 175: Mathematical Software Scientific Programming

**Elective 4: Information Retrieval, Databases and Data Mining**

CSE 132A: Database System Principles  
CSE 133: Information Retrieval  
CSE 254: Machine Learning

**Elective 5: Molecular Genetics**

BICD 100: Genetics  
BIMM 100: Molecular Biology  
BIBC 116: Evolution of Genes and Proteins  
BGGN 220: Advanced Molecular Biology  
BGGN 223: Advanced Genetics

**Elective 6: Cell Biology**

BICD 110: Cell Biology  
BICD 130: Embryos, Genes, and Development  
BIOMED 210: Cellular Biology  
BIOMED 212: Cellular and Molecular Pharmacology  
BGGN 222: Advanced Cell Biology

**Elective 7: Physics and Engineering**

BENG 253: Biomedical Transport Phenomena  
BENG 275: Computational Biomechanics  
PHYS 210A: Equilibrium Statistical Mechanics or higher

**Elective 8: Mathematics and Statistics**

Math 174: Numerical Methods in Science and Engineering  
Math 181E: Mathematical Statistics  
Math 280A: Probability Theory

**Example 1—Sample Program (Year 1)**

A student with an undergraduate background in biology might make the following course selections:

<table>
<thead>
<tr>
<th>Year 1</th>
<th>FALL</th>
<th>WINTER</th>
<th>SPRING</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Bioinformatics I</td>
<td>Bioinformatics II</td>
<td>Bioinformatics III</td>
</tr>
<tr>
<td></td>
<td>CSE 100</td>
<td>BENG 275</td>
<td>CSE 101</td>
</tr>
<tr>
<td>Test out—</td>
<td>Chem. 114A</td>
<td>Elective</td>
<td>Test out—</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Elective</td>
<td>BICD 110</td>
</tr>
<tr>
<td>Elective</td>
<td></td>
<td>Research Rotation</td>
<td>Research Rotation</td>
</tr>
</tbody>
</table>

**Year 2**

All students, regardless of their background and elective track, will be expected to begin working in the laboratory of their choice by the second year. Additionally, in Year 2, students will begin preparing for their qualifying examination and will participate in advanced seminar courses and journal clubs identified by program faculty.

**End of Year 2 through 5**

Spring of Year 2: Qualifying Examination  
Spring of Year 3: Advance to Candidacy  
End of Year 5: Ph.D.

In summary, in addition to three quarters of research rotations, students must complete the four compulsory bioinformatics core courses; and, either test out of, or select at least five courses from the eight elective areas.

**Research Rotations**

Each student in the graduate program will participate in three research rotations, at least two of which will be in the laboratory of mentors other than the thesis directors. The purpose of the research rotation will be to train the students in research methodology in specific bioinformatics areas. At the end of the research rotation period, the student will submit a written report that will be evaluated by the faculty mentor in whose laboratory the project was carried out. The report will also be sent to the Qualifying Examination Committee who will take this into consideration in the assessment of the student for admission to candidacy.

**Seminars, Informal Courses, Group Meetings, and Symposia**

Students are expected to attend the weekly Bioinformatics and Systems Biology Seminars hosted by the program. As well as formally structured courses and research rotations, graduate students will have access to seminars, group meetings, and informal sessions during which they will have frequent opportunities to interact closely with faculty mentors and to present their research plans, problems, and findings. In addition to weekly bioinformatics seminars, the graduate program will launch monthly student/faculty meetings at which students can present their research findings and discuss their progress. Graduate students will also be expected to organize an annual symposium where they will invite leading researchers to UCSD for one-day talks and discussions.
Besides the activities noted above, UCSD as a premier research institution has many excellent seminar programs sponsored by each research department and organized research group. Several interdisciplinary programs facilitate research meetings. Notable ones include the La Jolla Interfaces in Sciences (LJIS) Program, the Neurosciences Program, the Molecular Biophysics Program, the Whitaker Institute for Biomedical Engineering, the San Diego Supercomputer Center, and the Structural Genomics Program. LJIS, for example, is an extremely successful interdisciplinary program sponsoring stimulating and state-of-the-art seminars. LJIS recently sponsored a well-received symposium on Post-Genomic Bioinformatics. Many program faculty are involved in several of the areas mentioned above, and the bioinformatics graduate program benefits from all of these additional programs and symposia.

**Research Training**

Students, upon completion of the appropriate course work, will be given research orientation lectures by the bioinformatics program faculty. Each graduate student will participate in a research experience in the laboratory he or she selects to carry out the research rotation. During this period students will become acquainted with scientific methodology for designing experiments, analyzing the results, organizing the data, conducting research in a responsible manner, preparing oral and poster presentations of research results, and writing scientific papers.

Upon successful completion of the Qualifying Examination (described in the following section), graduate students will choose their research project from the many possibilities offered in the program and begin to work on a research problem with their faculty advisors. In consultation with their mentors, students will formulate the research activity that will lead to their dissertation. Graduate students will have the opportunity to do internships in the local bioinformatics/biotechnology industry if the thesis project is of mutual interest to a corporate sponsor and the thesis advisors. The research program is designed with two key objectives in mind: (1) to provide a truly interdisciplinary research training at the interface area between biology and computer science and engineering; and (2) to address fundamentally strong research problems that will lead to the advancement of the field of bioinformatics. We anticipate that every graduating student will emerge as a highly trained bioinformatician who can either pursue an academic career by choosing optimal postdoctoral research positions or enter the next generation biotechnology/biopharmaceutical industry.

It is our belief that active research under proper tutelage is the best means of training and that the foundations of a good graduate training program rest on an outstanding faculty group, an excellent student body, and a strong and well-coordinated research program. Each of the faculty members in this program has expertise and interests that will contribute importantly to the Interdisciplinary Bioinformatics Graduate Program. Participating faculty have pooled their resources in terms of laboratories, and the knowledge and experience to ensure the success of the program. Through daily contact with faculty and other research colleagues, students will learn to develop critical and creative thinking skills, scientific methodology, and a sound knowledge of research problems.

**Second-Year Qualifying Examination**

The Bioinformatics and Systems Biology Second-Year Qualifying Examination (BQE) is designed in an innovative manner to test the ability of students to think analytically and in an interdisciplinary manner. This method was suggested by students of the program during the first two years after inception.

Students are expected to come up with a research problem different from the one he or she may have been working on with a faculty advisor and write a proposal that can be defended at the oral examination to a faculty committee appointed by the chair of BQE. The written document is expected to be in the form of a proposal to NSF or NIH, where the student provides the specific aims of the project, the background for and significance of the problem chosen, some preliminary results and/or observations and specific details on the design of the research. The student is tested on his or her ability to formulate and design the problem as well as on the interdisciplinary nature of the approach.

Once the student passes the oral portion of the exam, the student is deemed to be qualified for advancing into Ph.D. thesis research in bioinformatics. The student can schedule this examination at any time of the year, but with two provisions. First, the student should have completed all the required and most of the elective courses assigned, and second, the examination should be taken before the student completes his or her second year in the program. At the time of BQE, the student should have decided on his or her two mentors/research advisors, and should have discussed with them about joining their laboratories and obtaining guaranteed funding for the duration of research as long as he or she is in good academic standing. The BQE Oral Examination Committee will discuss these specifics and other program requirements with the students at the oral examination.

**ADVANCEMENT TO PH.D. CANDIDACY**

Upon completion of formal course requirements, each student will be required to take a written and oral qualifying examination that will admit the student to the candidacy of the Ph.D. Program in advance of the qualifying examination, each student, in consultation with his or her faculty advisor(s), will establish a dissertation committee of five faculty members. The committee will consist of three faculty, at least two of whom are affiliated with the bioinformatics and systems biology program, and two other faculty from departments affiliated with the program, or who are themselves members of the program faculty. At least two of the five committee members must be from a department other than the committee chair’s department and at least one of these two must be tenure. The thesis advisors will have the major responsibility for the student’s research and dissertation.

**Thesis or Dissertation**

Each graduate student in the program will work on a bioinformatics thesis project under dual mentorship of the program faculty.

**Final Examination**

Bioinformatics graduate students will defend their thesis in a final oral examination. The exam will consist of (1) a presentation of the thesis by the graduate student, (2) questioning by the general audience, and (3) closed door questioning by the thesis committee. The student will be informed of the exam result at the completion of all three parts of the oral examination. The final report of the doctoral committee will be signed by all members of the committee and the final version of the dissertation will conform to the procedures outlined in the publication, *Instructions for the Preparation and Submission of Doctoral and Master’s Theses*.

**Teaching Requirement**

Each graduate student admitted to the Ph.D. Program in bioinformatics is mandated to serve as a teaching assistant (TA) for at least two quarters. This will aid in preparing the students for a teaching career. In addition, each student will make periodic research presentations to the graduate program students/faculty. Students will also discuss their progress at the annual program meeting to be held each year. It is anticipated that these formal presentations will serve as valuable training in preparing the student for a teaching career.

Bioinformatics graduate students will also participate in additional TA training provided by the Office of Graduate Studies and Research through the Center for Teaching Development (CTD).

**Financial Support**

It is expected that all students admitted into the Ph.D. Program in bioinformatics will receive financial assistance subject to their continuance and performance in the program. The assistance will be provided from (1) departmental financial commitments, (2) university financial commitments, (3) teaching assistantships, (4) research assistantships, and (5) NIH-funded graduate training grant.

**Ph.D. Degrees with a Specialization in Bioinformatics**

Currently, UCSD offers Ph.D. degrees with a specialization in bioinformatics from the participating departments listed in this section. Students are admitted into one of the departmental graduate programs and satisfy the requirements of both the department and the interdisciplinary bioinformatics graduate program. If you are interested in the Ph.D. degree with a specialization in bioinformatics, please consult with the Student Affairs Office of the department you are interested in to obtain further information on admission and individual program requirements.

**FURTHER INFORMATION**

For further information please visit our Web site at http://www.bioinformatics.ucsd.edu, or contact the bioinformatics student affairs office at (858) 822-4948 or bioinfo@ucsd.edu.
Bioinformatics Undergraduate Program

Advances in biotechnology allow us to probe thousands of molecules simultaneously. The wealth of information produced must be analyzed using computation, creating a demand for computational biologists, who are trained in biology, mathematics, chemistry, and computer sciences. Bioinformatics will have a tremendous impact upon our understanding of cellular functions, protein structure and interaction, and the molecular basis of disease.

An interdisciplinary undergraduate major leading to B.S. degrees with a major or specialization in bioinformatics was created in fall 2001. This major is designed to provide career opportunities for B.S. graduates, as well as opportunities for future advanced training at the graduate level. Students graduating from this program have been in great demand in top graduate schools, in medical schools, and in industry.

ADMISSIONS

Students wishing to pursue a study in bioinformatics may select from majors offered by the Division of Biological Sciences, or the Departments of Bioengineering, Chemistry and Biochemistry, and Computer Science and Engineering. A major in bioinformatics is available within each of the listed departments and divisions. All participating departments have a substantially common curriculum, but each has its own emphasis through its electives, and there are some differences in the core requirements.

STUDENT AFFAIRS OFFICE
1128 Pacific Hall
(858) 534-0557
DIVISION OF BIOLOGICAL SCIENCES UNDERGRADUATE ADMISSIONS

Because of the large number of students interested in Biological Sciences undergraduate programs, and the limited resources available to accommodate this demand, the university has declared all majors in the Division of Biological Sciences as “impacted.” Effective fall 2009, freshmen admission to any of the Biological Sciences majors will be limited. Students will be selected by the UCSD Office of Undergraduate Admissions based on the students’ comprehensive review scores and availability of slots in the Division of Biological Sciences. All potential freshmen must indicate on the UC application if they wish to major in biology.

Effective fall 2011, new transfer students will be selected by the UCSD Office of Undergraduate Admissions based on the students’ demonstrated academic performance at the community college or previous university and availability of slots in the Division of Biological Sciences. All potential transfers must indicate on the UC application if they wish to major in biology.

Refer to the UCSD Division of Biological Sciences Web site for specific details and requirements (http://biology.ucsd.edu).

DIVISION OF BIOLOGICAL SCIENCES LABORATORY REQUIREMENT

Freshmen

The Division of Biological Sciences requires students in all biology majors, with the exception of bioinformatics, to take one biology lab before the end of the sophomore year.

Continuing Students

Continuing UCSD students who wish to transfer into the major will be evaluated under the rules that were in effect the year in which they entered the university.

Transfer Students

The Division of Biological Sciences requires students in all biology majors, with the exception of bioinformatics, to take one biology lab before the end of the sophomore year. Transfer students may petition to have community college course work cover the lab requirement. Transfer students whose community college laboratory course is determined to be equivalent in content to an existing biology lab will have completed the requirement upon transfer. Transfer students are therefore strongly encouraged to complete this requirement at their community college. Transfer students who do not meet this requirement at the time of transfer may petition the division for an extension.

DIVISION OF BIOLOGICAL SCIENCES RESIDENCY REQUIREMENT

To receive a bachelor of science degree in biology from UCSD, all biology majors, including transfer students, must complete at least forty-eight or more units of upper-division course work within the major. To receive a bachelor of science degree in biology from UCSD, all students must complete at least nine upper-division biology courses (each course must be at least four units) in the Division of Biological Sciences while officially enrolled at UCSD. Students participating in the Education Abroad Program (EAP), and courses at other UC campuses, may petition up to three of these courses to count toward their residency minima. Biology courses completed through the UC Extension program (concurrent enrollment) will not be counted toward this residency requirement.

SATISFACTORY PROGRESS

All students admitted into a biology major must maintain satisfactory progress in order to remain in a biology program. If the GPA in biology courses for such a student falls below 2.0, he or she will be placed on probation during the quarter after the average fell below the line. If the GPA is not brought above the 2.0 level during the quarter on probation, the student will be dropped from the major.

PREREQUISITES

All students are expected to have completed all prerequisites prior to enrolling in any biology course. Please visit the biology student affairs office or consult our web page for the most current information. Prerequisites are enforced in all courses and must be taken for a letter grade. Students who have satisfied the prerequisites of a class at another college may need to be pre-authorized to enroll. Please come to the biology student affairs office (1128 Pacific Hall) BEFORE your priority enrollment to be pre-authorized.

CONCURRENT ENROLLMENT IN BIOLOGY COURSES

For more information on concurrent enrollment, please call (858) 534-3400 or e-mail concurrent@ucsd.edu.

Enrollment process for biology courses:

• Select the biology course(s) you wish to enroll in. Be sure that you’ve completed the prerequisites.

• Attend class starting the first day of the quarter and continue attending. During the beginning of the third week, obtain the instructor’s signature on the concurrent enrollment add card (available at the UCSD Extension Student Services office). Please note that instructors are not required to admit you to the course, and that enrollment is on a space-available basis.

• If you have a signed add card, take it to Biology Student Affairs for a department stamp. Space in the course will be verified at this time. Please note that even if the instructor has signed the add card, if space is not available, the card will not be stamped.

• Return your completed UCSD concurrent enrollment card to the Extension Student Services office with your enrollment fee. Submit one card per class. Concurrent enrollment is closed after the third week of the quarter.

NOTE: Students enrolling in a biology course will not incur a $50 late fee if enrolling during the third week.
REMISSION TO A BIOLOGY MAJOR
Students who were absent for six quarters or more, and who have been readmitted to UCSD, must adhere to the major requirements in effect at the time of readmission or those subsequently established.

Readmitted students may petition to follow the major requirements in effect at the time they left UCSD. These petitions will be reviewed on a case-by-case basis.

GRADE REQUIREMENTS FOR THE MAJORS
The minimum grade requirements for all biology majors, effective fall 2008, are:

- All courses required and used toward any biology major requirements must be passed with a grade of C- or better.
- The minimum grade requirement applies to all lower-division, upper-division, required courses taken in other departments, as well as courses transferred and used toward major requirements.
- Exceptions will be made only for those required courses that have a P/NP only grading option (i.e., BISP 199).

The minimum GPA requirement (for both the major and overall UC) for graduation is 2.0. Students who received D and/or F grades should contact one of the Division of Biological Sciences undergraduate advisors to determine the effect of such grades on their GPAs. The biology major GPA calculation is based on upper-division courses required for the major. Upper-division courses from other UCs, other UCSD departments, and EAP which have been approved via petition to count toward the major are counted into the major GPA. Other transfer courses do not count toward the UC or major GPA. All courses, required for any of the eight majors, must be taken for a letter grade with the exception of BISP 195, 196, 197, and 199.

STUDENTS WITH TRANSFER CREDIT
All courses (including prerequisites) taken at other institutions must be reviewed by the Division of Biological Sciences before they can be applied toward any major requirement. Students must obtain approval from the Biology Student Affairs office prior to taking courses outside of UCSD (for example, students wishing to take a BILD 1 equivalent at another institution must consult with Biology Student Affairs before enrolling in the substitute course). In addition, any student wishing to satisfy a major requirement with upper-division transfer work (with the exception of organic chemistry) must first submit an Undergraduate Student Petition. Contact Biology Student Affairs (1128 Pacific Hall) for specific information regarding transfer documentation and petition procedures.

The Division of Biological Sciences requires that students take the full content equivalencies to UCSD series in math, chemistry, and physics. The Division of Biological Sciences will follow the respective department’s recommendations for equivalency. In some cases, attaining full content equivalency will require a student to complete more than two semesters in a subject. If the courses a student took do not provide full content equivalency, s/he will be required to complete the lacking material at UCSD or at a community college where the material is equivalent.

PROGRAMS ABROAD
The Division of Biological Sciences strongly encourages students to participate in the Education Abroad Program (EAP) or the UCSD Opportunities Abroad Program (OAP). It is very important that students who plan to participate in the UC Education Abroad Program (including the Costa Rica Tropical Ecology program) or the UCSD Opportunities Abroad Program obtain the name of a faculty advisor from the Biology Student Affairs Office in order to discuss the proposed program of study. For most EAP programs, it is strongly recommended that biology majors complete biochemistry (BIBC 100 or 102) and genetics (BICD 100) and their prerequisites before going abroad. For more information, please visit http://programsabroad.ucsd.edu.

SPECIAL STUDIES COURSES
For information on requirements and application procedures for special studies courses, students should go to the Biology Student Affairs Office (1128 Pacific Hall) or visit the Web site at http://biology.ucsd.edu/undergrad/BISP_info.html.

How to apply special studies courses toward your biology major:
- Two quarters of BISP 194 (topics must vary) may count as one upper-division elective for any biology major.
- One quarter of BISP 195 may count as an upper-division elective for any biology major.
- One quarter of BISP 196, 197, or 199 may count as an upper-division elective for any biology major.
- Biochemistry/Cell Biology, General Biology, Human Biology, and Physiology/Neuroscience. The second consecutive quarter of BISP 196 or 199, taken in the same research laboratory, may be petitioned to substitute for one of the upper-division elective lab requirements. The second quarter of BISP 196 or 199 must be complete prior to petitioning. Students are required to submit an undergraduate petition and summary of research to Biology Student Affairs.
- Microbiology, Molecular Biology, Ecology/Behavior, and Evolution. The second consecutive quarter of BISP 196 or 199, taken in the same research laboratory, may be petitioned to substitute for one of the upper-division required laboratory courses. The content of the BISP 196 or 199 must be equivalent to the content covered in the required lab in order to be approved. The second quarter of BISP 196 or 199 must be complete prior to petitioning. Students are required to submit an undergraduate petition and summary of research to Biology Student Affairs.
- Subsequent quarters of BISP 195, 196, 197, or 199 may be applied toward college and university requirements.

NOTE: Students who are approved to use a BISP 196 or 199 to satisfy a lab requirement cannot also use BISP 196, 197, or 199 to satisfy an upper-division elective requirement.

BISP 194—Advanced Topics in Modern Biology
Advanced Topics in Modern Biology is a two-unit topics course taught at a high level and open to upper-division students only. The course content will vary. Students should consult the quarterly Schedule of Classes for topics and descriptions.

BISP 195—Introduction to Teaching in Biology
Being a teaching assistant is an important task and can provide students with experience and faculty contact which can be valuable when applying for graduate school. Students who are interested in being an undergraduate tutor should have received a strong grade in the course which they want to teach, have an overall GPA of at least 3.0, and have taken at least ninety total units. Students should apply very early in the quarter prior to the quarter they wish to teach. Applications will be accepted beginning the second week of the quarter prior to the quarter in which the student wishes to teach. All undergraduate tutor applications are online and may be accessed through the biology Web site, http://www.biology.ucsd.edu/undergrad/index.html.

BISP 196—Honors Thesis in Biological Sciences
Students in any one of the eight biology major programs who have a 3.7 grade-point average or above in upper-division science courses, the biology major, and overall UC at the end of their junior year are eligible to undertake the honors thesis. This program covers the senior year of undergraduate study and involves a maximum of twelve units of senior thesis research (BISP 196) taken in addition to the major requirements for graduation. (Four units of senior thesis research BISP 196 are to be taken during three consecutive quarters.) Research is conducted under the supervision of a faculty member of the Division of Biological Sciences only and cannot be performed in the research labs of other departments such as the School of Medicine, SIO, etc. If there are any questions as to which faculty members are eligible, students should consult with Biology Student Affairs.

Students who are approved to use a BISP 196 or 199 to satisfy a lab requirement cannot also use BISP 196, 197, or 199 to satisfy an upper-division elective requirement.

Application to the Honors Thesis Program
1. Students interested in the program who are eligible as of spring quarter of their junior year (the fourth quarter prior to graduation) need to find a Division of Biological Sciences faculty member willing to act in the capacity of thesis advisor and inform the Biology Student Affairs Office of their intent.
2. After an advisor is selected, the student and the advisor should complete the Special Studies application form and research plan (available on the biology Web site).
3. The application form and research plan should then be submitted to the Biology Student Affairs Office. The deadline for submitting this form is the end of the eighth week of the quarter prior to the quarter the research will begin.

4. The application will be submitted to the honors thesis coordinator after eligibility has been determined.

5. If the student is approved for admission to the program, he or she will then be authorized to register for BISP 196.

Entry into the second and third quarter of the program will require submission of the honors thesis advisor of a written report in which the student summarizes the data obtained in the previous quarters. A brief oral interview with the student on this report can also be expected. If the progress made appears reasonable for an honors student, then the 196 petition will be signed. If not, the student may be dropped from the program. Completion of the program will require a final written report by the student at the end of the third quarter in addition to an oral presentation in the middle of the quarter to a suitable group of faculty and students, including the honors thesis advisor.

**BISP 197—Biology Internship Program**

The Division of Biological Sciences, in collaboration with local biotech industries, created Biotechnology Internship Opportunities (BIO). The mission of BIO is to provide biology majors with an opportunity to participate in research in an industrial setting. We believe that working as an intern in the private sector will enrich a student's educational experience. Students will gain valuable insight into the relationship between theory and practice, and hence, a better understanding of the relevance of course work in their major. Most importantly, students will learn the importance of outstanding oral and written communication skills. This course may be counted as one of the upper-division electives for a biology major, providing that no other special studies courses have already been counted toward the major. Information on BIO may be accessed through the undergraduate biology Web site, http://biointern.ucsd.edu.

To enroll in BISP 197, students must have accrued at least ninety-quarter units with an overall UC GPA of at least 3.0. There will be one weekly meeting lasting up to 1.5 hours. Attendance and participation at these meetings are mandatory and will affect the grade a student receives. There will be three formal oral and three written presentations, interspersed with informal discussions of progress achieved. All written reports must be done with the input of the industry and must have that mentor's signature. Grading will be based on the formal and informal written and oral presentations, as well as input from the industry mentor.

**BISP 199—Individual Research for Undergraduates**

Individual Research BISP 199 is intended to provide interested and qualified biology students with an opportunity to work closely with faculty and professionals in their chosen field and can be a valuable contribution to the student’s preparation for graduate school or career goals. To enroll in BISP 199, students must have accrued at least ninety-quarter units with an overall UC GPA of at least 3.0. Students may select for their instructor any professor at UCSD, but the BISP 199 application must be submitted for approval to the Division of Biological Sciences. The deadline to apply for BISP 199 is the eighth week of the quarter prior to the quarter in which the research will begin.

**AIP 197—Academic Internship Program**

Because the undergraduate research conducted through the Academic Internship Program is generally done at a site not affiliated with the UCSD Division of Biological Sciences, students who wish to request that an AIP 197 course be counted toward their major must submit an Undergraduate Petition for their request. Biology faculty will review the student’s research and ascertain the project’s compatibility with the student’s academic goals and major requirements. Please be advised that an AIP 197 may not be approved toward major requirements. If an AIP 197 course is approved for the student’s major, no other special studies course (BISP 196, 197, or 199) can be used toward the major. For further information, please see http://aip.ucsd.edu.

**MAJOR PROGRAMS IN BIOLOGICAL SCIENCES**

For more information, please see biology’s Web page, http://biology.ucsd.edu/.

The UCSD Division of Biological Sciences is structured around the different levels of biological organization—biochemical, cellular, physiological, and ecological. The research and teaching of the division emphasize the fundamentally important processes that occur at each of these levels. With a solid foundation in these processes future training and study in any area of biology is possible, from plant breeding to genetic counseling, from medical microbiology to ecological epidemiology, from veterinary science to cancer research. The UCSD campus is situated among some of the finest research institutions in the world. The Division of Biological Sciences is fortunate in having close ties with the Scripps Institution of Oceanography, the Salk Institute of Biological Studies, and the Scripps Clinic and Research Foundation, all of which open interesting avenues for motivated students.

The division offers eight different major programs, each of which provides an excellent background for future graduate or professional study. They are (1) biochemistry and cell biology, (2) biology with a specialization in bioinformatics, (3) ecology, behavior, and evolution, (4) general biology, (5) human biology, (6) microbiology, (7) molecular biology, and (8) physiology and neuroscience. The requirements of each of the majors are designed to meet the needs of a different group of students. These requirements are quite concordant, reflecting the division’s philosophy that familiarity with certain basic aspects of the subject is fundamental to all specialized understanding. Bachelor of science degrees granted in each of these majors will be so designated.

The Student Affairs Office (1128 Pacific Hall) administers the undergraduate biology program for all six colleges. For complete details regarding policies and procedures pertaining to the biology programs, please contact Biology Student Affairs.

**BIOCHEMISTRY AND CELL BIOLOGY MAJOR**

This major is designed to provide students with the fundamental courses required for entry into a school of medicine or into postgraduate training in a wide variety of areas of biological and biomedical sciences: biochemistry, biophysics, genetics, molecular biology, cell biology, developmental biology, microbiology, virology, human biology (physiology, metabolism, genetic disorders), cancer biology, pharmacology, and others. The emphasis is on basic principles which help us understand those processes unique to living organisms at the molecular level.

The program includes two required upper-division biology laboratory courses to provide practical experience with modern techniques and useful technology for those seeking positions as lab technicians in clinical and basic research laboratories. The opportunity to select four elective courses allows students either to seek a still broader background in a variety of biology courses or to begin specialization in a chosen field of study.

**LOWER-DIVISION REQUIREMENTS**

- BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)
- Chemistry 6A–B and 6BL
- Mathematics 10A–B, and 11 or 10C or 20A–B–C
- Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A–B–C, and one lab

**UPPER-DIVISION REQUIREMENTS**

1. Organic Chemistry (Chemistry 140A and 140B or 141A and 141B)
2. Organic Chemistry (Chemistry 143A) or Physical Chemistry (Chemistry 105A)
3. Structural Biochemistry (BIBC 100) or Physical Chemistry (BIBC 110) or Physical Chemistry (Chemistry 126)
4. Metabolic Biochemistry (BIBC 102)
5. Biochemical Techniques (BIBC 103)
6. Genetics (BICD 100)
7. Cell Biology (BICD 110)
8. Molecular Biology (BICD 100)
9. Capstone Course: (one of the following seven courses) BIBC 104 (Biochemistry and Biotechnology of Plants), BIBC 110 (Physical Biochemistry), BIBC 120 (Nutrition), BIBC 130 (Marine Biochemistry), BICD 118 (Pathways of Intracellular Protein Trafficking and Compartmentation), BICM 118 (Pharmacology), BICM 130 (Microbial Biochemistry)
10. One upper-division biology lab to be chosen from the following: BICD 101, 111, 123, 131, 145, BICM 101, 121, 127, BIPN 105, 145, or Chemistry 143C.
This program allows the most diversified exposure to biology of any of the majors offered by the Division of Biological Sciences. It is designed for students with broad interests who do not wish to be constrained by the specialized requirements of the other majors and who desire maximum freedom to pursue their particular educational goals.

LOWER-DIVISION REQUIREMENTS

- BILD 1, 2, and 3
- Chemistry 6A-B-C
- Mathematics 10A-B, and 11 or 10C or 20A-B-C
- Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C and one lab
UPPER-DIVISION REQUIREMENTS

1. Organic Chemistry (Chemistry 140A and 140B or 141A and 141B)
2. Metabolic Biochemistry (BIBC 102)
3. Genetics (BICD 100)
4. Two upper-division biology labs to be chosen from the following: BIBC 103, BICD 101, 111, 123, 131, 145, BIEB 121, 165, 167, BIMM 101, 121, 127, BIPN 105, or 145.
5. Seven additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required.

NOTE: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section “Special Studies Courses.”

Although students are free to design upper-division curricula which meet their individual educational goals, Molecular Biology (BIMM 100) and Cell Biology (BICD 110) are strongly recommended for those contemplating applying to graduate or professional schools.

HUMAN BIOLOGY MAJOR

This major is designed to provide students with the fundamental courses required for entry into: schools of medicine, veterinary medicine, dentistry, and pharmacy; Ph.D. programs in the biomedical sciences; and biotech research, teaching, medical technology, patent law, physical therapy, nutrition, and nursing. The core classes required of all human biology majors provide the student with the basic principles that help us understand normal human physiology and the molecular basis of human disease. The course options in Human Physiology, Human Disease, and Biomedical-related laboratories provide the students with educational breadth while still allowing them considerable flexibility in tailoring their course of study to suit their educational goals.

LOWER-DIVISION REQUIREMENTS

• BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)
• Chemistry 6A-B-C and 68L
• Physics 1A/1AL, 1B/1BL, 1C/1CL or Physics 2A-B-C, and one lab
• Mathematics 10A-B, and 11 or 10C or 20A-B-C

UPPER-DIVISION REQUIREMENTS

1. Organic Chemistry (Chemistry 140A and 140B or 141A and 141B)
2. Organic Chemistry Lab (Chemistry 143A)
3. Metabolic Biochemistry (BIBC 102)
4. Genetics (BICD 100)
5. Molecular Biology (BIMM 100)
6. Molecular Basis of Human Disease (BIMM 110)
7. Mammalian Physiology I (BIPN 100)
8. Three courses from the following two groups, Human Physiology and Human Disease. At least one course must be taken from each group.
   Human Physiology
   Nutrition (BIBC 120)
   Embryos, Genes, and Development (BICD 130)
   Human Reproduction and Development (BICD 134)
   Immunology (BICD 140)
   Endocrinology (BICD 150)
   Circadian Rhythms—Biological Clocks (BIMM 116)
   Mammalian Physiology II (BIPN 102)
   Cellular Basis of Learning and Memory (BIPN 148)
   Human Disease
   AIDS Science and Society (BICD 136)
   Virology (BIMM 114)
   Pharmacology (BIMM 118)
   Bacteriology (BIMM 120)
   Medical Microbiology (BIMM 124)
   Biology of Cancer (BIMM 134)
   Environmental and Molecular Toxicology (BIMM 166)
9. Two of the following lab courses: Biochemical Techniques (BIBC 103); Cell Biology Lab (BICD 111); Embryology Lab (BICD 131); Laboratory in Molecular Medicine (BICD 145); Recombinant DNA Techniques (BIMM 101); Microbiology Lab (BIMM 121); Animal Physiology Lab (BIPN 105)
10. At least two other upper-division courses (each course must be at least four units) offered by the UCSD Division of Biological Sciences. Recommended courses include additional courses from the Human Physiology and Human Disease lists in section 8 above and BICD 110 (Cell Biology), BIEB 154 (Molecular Evolution), and BICD 118 (Pathways of Intracellular Protein Trafficking and Compartmentation).

NOTE: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section “Special Studies Courses.”

MICROBIOLOGY MAJOR

The microbiology major is designed to prepare students for graduate studies and for professional careers in a variety of health-related programs. The specialization in microbiology can provide the basic background for work in medical technology, or for further training in public health or other health-related specialties. The program is also designed to provide a foundation for graduate studies in microbiology, virology, and a variety of allied fields as well as for medical and dental school.

LOWER-DIVISION REQUIREMENTS

• BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)
• Chemistry 6A-B-C and BL
• Mathematics 10A-B-C and BL
• Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C, and one lab

UPPER-DIVISION REQUIREMENTS

1. Organic Chemistry (Chemistry 140A-B or 141A-B)
2. Organic Chemistry Laboratory (Chemistry 143A)
3. Metabolic Biochemistry (BIBC 102)
4. Biochemical Techniques (BIBC 103)
5. Genetics (BICD 100)
6. Immunology (BICD 140)
7. Molecular Biology (BIMM 100)
8. Virology (BIMM 114)
9. Bacteriology (BIMM 120)
10. Laboratory in Microbiology (BIMM 121)
11. Medical Microbiology (BIMM 124)
12. Three additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required. Other courses of special interest to microbiology majors are listed below:
   Cell Biology (BICD 110)
   Regulation of Gene Activity in Eucaryotic Cells (BIMM 112)
   Microbial Genetics (BIMM 122)
   Recombinant DNA Techniques (BIMM 101)

NOTE: For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section “Special Studies Courses.”

MOLECULAR BIOLOGY MAJOR

The program for molecular biology is designed to provide an intensive exposure to the theoretical concepts and experimental techniques of molecular biology. The concepts and techniques of molecular biology are the foundation for the studies of all aspects of biology in modern time. A focus on molecular biology, therefore, provides an excellent preparation for a wide range of advanced studies including basic research, medicine, bioengineering, and biotechnology. Considerable emphasis is placed on chemistry, biochemistry, and genetics for students enrolled in the program. As such, it is recommended for those students who have a particularly strong interest in this field of study.

LOWER-DIVISION REQUIREMENTS

• BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)
• Chemistry 6A-B-C and BL
• Mathematics 20A-B-C
• Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C, and one lab

UPPER-DIVISION REQUIREMENTS

1. Organic Chemistry (Chemistry 140A-B or 141A-B)
2. Organic Chemistry Laboratory (Chemistry 143A)
3. Structural Biochemistry (BIBC 100)
4. Metabolic Biochemistry (BIBC 102)
5. Biochemical Techniques (BIBC 103)
6. Genetics (BICD 100)
7. Cell Biology (BICD 110)
8. Molecular Biology (BIMM 100)
9. Recombinant DNA Techniques (BIMM 101)
10. Regulation of Gene Activity in Eukaryotic Cells (BIMM 112)
11. Microbial Genetics (BIMM 122)
12. Four additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required. Attention is drawn to BICD 120, BICD 122, BICD 140, BIMM 110, and BIMM 114.

**MINOR IN BIOLOGICAL SCIENCES**

To receive a minor from the Division of Biological Sciences, a student must complete at least seven four-unit biology courses (for a total of at least twenty-eight units of course work).

**LOWER-DIVISION REQUIREMENTS**

- BILD 1 and 3 (Note: BILD 2 is not required, but is a prerequisite for many upper-division courses.)
- Chemistry 6A-B-C and BL
- Mathematics 10A-B, and 11 or 10C or 20A-B-C
- Physics 1A/1AL, 1B/1BL, 1C/1CL or 2A-B-C, and one lab

**UPPER-DIVISION REQUIREMENTS**

1. Organic Chemistry (Chemistry 140A, 140B, or 141A, 141B)
2. Organic Chemistry Laboratory (Chemistry 143A)
3. Metabolic Biochemistry (BIBC 102)
4. Genetics (BICD 100)
5. Molecular Biology (BIMM 100)
6. Four from the following eight courses:
   - Mammalian Physiology I (BIPN 100)
   - Mammalian Physiology II (BIPN 102)
   - Comparative Physiology (BIPN 106)
   - Cellular Neurobiology (BIPN 140)
   - Systems Neurobiology (BIPN 142)
   - Developmental Neurobiology (BIPN 144)
   - Computational Neurobiology (BIPN 146)
   - Cellular Basis of Learning and Memory (BIPN 148)
7. One of three laboratories (BICD 131, BIPN 105, BIPN 145)
8. One upper-division biology lab to be chosen from the following: BICD 103, BICD 101, 111, 123, 131, 145, BIEB 121, 131, 165, 167, BIMM 101, 121, 127, BIPN 105, 145. This requirement may include a lab from number 7 that has not already been taken by the student.
9. Three additional upper-division biology courses (each course must be at least four units) taken through the UCSD Division of Biological Sciences are required and may include the above (numbers 6–8) if not already taken.

**NOTE:** For more information on how the BISP 194, 195, 196, 197, or 199 can count toward major requirements, please see the previous section “Special Studies Courses.”

**SECONDARY SCHOOL BIOLOGY TEACHING**

UCSD’s biological sciences division is committed to the education of future biology teachers and offers an excellent preparation for teaching biology in secondary schools. If you are interested in earning a California teaching credential from UCSD, contact Education Studies (EDS) for information about the prerequisite and professional preparation requirements. It is recommended that you contact EDS and the Biology Student Affairs Office early in your academic career to help you plan a suitable biology curriculum. If you plan to get your credential at another institution, keep in mind that a broad education in biology is the best preparation to become a teacher.

http://www-tep.ucsd.edu/

We suggest that students take courses in plant and animal biology, microbiology, ecology, population biology, evolution, marine biology, genetics, and biochemistry. Courses in cellular and molecular biology are also advisable. After completion of BILD 1, 2, and 3, a suggested program of upper-division courses would be BICC 100 or 102, BICD 100, 120, 130, BIEB 102, 150, BIPN 106, SIO 275B. This would give you as a prospective teacher the required breadth of education.

**INTEGRATED BACHELOR’S/MASTER’S DEGREE PROGRAM**

An integrated program leading to a bachelor of science degree and a master of science degree in biology is offered to those undergraduate students who are enrolled in any of the major programs offered by the Division of Biological Sciences at UCSD. Qualified students are able to obtain the M.S. degree within one year following receipt of the B.S. degree. Students interested in applying to this program should meet with the BS/M.S. advisor in the Biology Student Affairs Office BEFORE the end of their junior year.

The program is open only to UCSD undergraduates. The Division of Biological Sciences does not have financial aid available for students enrolled in this program although other sources of financial aid may be available to qualified students through the UCSD Financial Aid Office.

**ELIGIBILITY AND ENROLLMENT**

To be eligible, students must have completed the first two quarters of their junior year in residence at UCSD and must have an overall UC GPA of at least 3.0. Students’ major GPA should be at least 3.3. Students must demonstrate excellent performance in upper-division biology core courses during their undergraduate program to be eligible to enroll in biology graduate core courses.

It is the responsibility of the prospective B.S./M.S. student to select a faculty member (from the Division of Biological Sciences) who would be willing to serve as the student’s advisor and in whose laboratory the student would complete at least twenty-four units of research over a two-year period. The units of research which must be completed during the student’s senior undergraduate year, must be taken IN ADDITION to the requirements for the bachelor’s degree. These units will count toward the requirements for the master’s degree only. Students must complete six consecutive quarters of research to fulfill the research component of the program. Any deviation from this plan, such as a break in
enrollment for one or more quarters, will be cause for the student to be dropped from the program.

Students who have been approved (by both the Division of Biological Sciences and the UCSD Office of Graduate Admissions) for the program must enroll in a Special Studies Course, BISP 199 (senior year) or BGGN 271 (graduate year only), for each, and every, quarter of participation in the B.S./M.S. program. Students can obtain the appropriate course code and division stamp at the Biology Student Affairs Office.

Research work (BGGN 271) will be credited toward the B.S./M.S. program requirements only if it is completed during the time a student is officially enrolled at UCSD and has paid tuition for that quarter.

**REQUIREMENTS FOR THE MASTER OF SCIENCE DEGREE**

1. Completion of six consecutive quarters of research during the senior undergraduate year and the graduate period.

2. Completion of at least thirty-six units of graduate course work (BGGN 200-level or higher, or approved via petition) graduate courses offered by related departments at a similar level) during the graduate year. The course of study must be approved by the faculty advisor.

3. Twelve of the thirty-six units must be in courses other than BGGN 271 (BGGN 297 and BGGN 299 may not be used to satisfy this requirement).

4. Serve as a graduate teaching assistant.

5. Maintenance of a grade-point average (both overall and in the major) of at least 3.0 for all course work, both cumulatively and for each quarter of enrollment in the B.S./M.S. program. If the student's GPA falls below 3.0 (for either overall or in the major), he or she will be automatically dropped from the program.

6. Completion of a thesis, with an oral presentation to, and approval of, a three-member Thesis Committee. Only ladder rank faculty in the Biological Sciences or an adjunct faculty in the Biological Sciences may serve as advisor and chair of the Thesis Committee. The Thesis Committee must contain at least two regular faculty from the Division of Biological Sciences and no more than one adjunct faculty can serve on the committee. If an adjunct faculty serves as chair of the Thesis Committee, one of the biology members must serve as co-chair.

7. At least three complete, separate, and consecutive quarters of residency as a graduate student which will commence the quarter immediately following the quarter in which the B.S. degree is awarded. (Note: The summer session is not considered an official quarter during the graduate year.)

8. Students who have been approved for the B.S./M.S. program must provide the Office of Graduate Admissions with a copy of their official UCSD transcripts with the B.S. degree posted, PRIOR TO THE COMMENCEMENT OF THE GRADUATE YEAR IN THE PROGRAM.

**NON-DEGREE PROGRAM**

The Division of Biological Sciences will accept applicants into the non-degree program for a maximum of one year only. Qualified applicants must have at least a 3.0 GPA in their upper-division work to be accepted. Justification will not be made for those who fall below the GPA minimum.

Students who wish to apply to the UCSD biological sciences Ph.D. program at a later date should not apply for this program. However, students who have applied to graduate or medical schools elsewhere, but have not yet been accepted, are welcome to apply.

Once accepted into this program, the student has graduate status for the academic year. Courses may be taken on the undergraduate or graduate level with consent of the instructor. Students will not be assigned faculty advisors and must make their own academic plans.

**THE DOCTORAL PROGRAM**

Graduate studies for a Ph.D. degree in the Division of Biological Sciences are oriented mainly toward the development of the capacity for independent research and for teaching in the biological sciences.

The requirements for entrance to graduate study in the Division of Biological Sciences are flexible, but a strong background in mathematics, chemistry, and physics is recommended.

Formal course work and opportunities for dissertation research include most basic areas of experimental biology, with emphasis in the general areas of biochemistry, biophysics, cell biology, developmental biology, genetics, immunology, molecular biology, neurobiology, plant molecular biology, ecology, behavior and evolution, virology, and cancer biology.

During the first year of graduate study, each student undertakes a research project in the laboratory of each of four to six different faculty members, and is expected to spend a major portion of his or her academic time on this project. The laboratories are selected by the student in consultation with the first year advisor to provide a broad view of the research interests of the division. The student is also expected to enroll in the first-year graduate biology sequence which includes advanced material in genetics, developmental biology, plant biology, neurobiology, molecular biology, cell biology, virology, and immunology. Students are also required to complete a minimum of twelve units of BGGN 500 (Apprentice Teaching in Biology.) A program of further study, including seminars and courses appropriate to a student's background and interests, is arranged through consultation between the student and the faculty. Much reliance is placed on informal instruction through early and close association of the student with the faculty and research staff, and through regular seminars. After becoming familiar with the research activities of the faculty through the laboratory rotation program, the student begins work on a thesis research problem of his or her choice no later than the end of the first year. The student is free to choose for the thesis advisor a regular member of the UCSD faculty or an adjunct member of the Division of Biological Sciences faculty. The student is required to have completed a two-part examination in order to be admitted to candidacy for the Ph.D. degree. The purpose of the examinations is for the student to demonstrate competence in the field of major interest and in related fields of biology. The major remaining requirement for the Ph.D. degree is the satisfactory completion of a dissertation consisting of original research carried out under the guidance of a faculty member.

Close collaboration with members of the Department of Chemistry and Biochemistry is a vital and stimulating aspect of the biology program. Additional strength and breadth in biology are gained by collaborating with the Department of Marine Biology of the Scripps Institution of Oceanography, with The Scripps Research Institute, and with the Salk Institute for Biological Studies.

**DIVISIONAL PH.D. TIME LIMIT POLICIES**

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed seven years.

**JOINT DOCTORAL PROGRAM WITH SAN DIEGO STATE UNIVERSITY**

The Division of Biological Sciences at UCSD participates in a joint graduate program with the Department of Biology at SDSU, primarily in the areas of cell and molecular biology, and leading to the Ph.D. degree in biology. Graduate student participants in the joint doctoral program are required to spend one year enrolled at UCSD; thesis research is carried out under the supervision of the SDSU faculty.

Information regarding admission is found in the current edition of the San Diego State University Graduate Bulletin.

**COURSES**

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

Note: The division will endeavor to offer many of the courses as outlined below; however, unforeseen circumstances sometimes mandate a change of scheduled offerings. Students are strongly advised to check the Schedule of Classes or with the division’s Student Affairs Office (1128 Pacific Hall) to obtain current information. Courses required for the major may be scheduled on the same day and/ or same time. This is of particular importance in planning schedules for graduation requirements.

Students who have satisfied the prerequisites for courses at another college or by AP credit may need to be pre-authorized to register for the course. Please come to the Biology Student Affairs Office before your registration time to be authorized. If the class is full please place your name on the waitlist and attend the first class meeting.

Students who do not attend the first thirty minutes of the first scheduled meeting (be it lab or lecture) will be considered not enrolled in the course and may be administratively dropped. Prior written
of discussion. This course is designed for non-biology students and organisms; illustrations are drawn from microbiology and ecology, and behavior. Three hours of lecture and one hour of recitation. **Prerequisite:** Chem. 6A; Chem. 6B may be taken concurrently.

**BILD 2. Multicellular Life (4)**

An introduction to the development and the physiological processes of plants and animals. Included are treatments of reproduction, nutrition, respiration, transport systems, regulation of the internal environment, the nervous system, and behavior. Three hours of lecture and one hour of recitation. **Prerequisite:** BILD 1.

**BILD 3. Organicism and Evolutionary Biology (4)**
The first principles of evolutionary theory, classification, ecology, and the phylogenetic systematics and the major groups of organisms from viruses to primate. **Prerequisite:** none. (Note: E.B.E. majors should complete this course during their first year at UCSD.)

**BILD 7. The Beginning of Life (4)**

An introduction to the basic principles of plant and animal development, emphasizing the similar strategies by which diverse organisms develop. Practical applications of developmental principles as well as ethical considerations arising from these technologies will be discussed. **Prerequisite:** none.

**BILD 10. Fundamental Concepts of Modern Biology (4)**

An introduction to the biochemistry and genetics of cells and organisms. Illustrations are drawn from microbiology and human biology. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 10 after receiving credit for BILD 1.

**BILD 11. Neurobiology and Behavior (4)**

An introduction to the organization and functions of the nervous system; topics include molecular, cellular, developmental, systems, and behavioral neurobiology. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 11 after receiving credit for BILD 1.

**BILD 16. History of Life (4)**

Life has a very long history on earth and this course will chronicle patterns of biological diversity from its origin over 3 billion years ago to the present day. Topics covered will include methods for reconstructing the history of life on this planet, the origin and evolution of major groups of plants and animals, dinosaur paleobiology, past environmental changes and their effects on species and communities, and extinctions. We will also explore how insights from the past can be used to understand how present and future environmental changes will impact biological diversity. This course is designed for non-biology majors.

Course will focus on issues such as global warming, species extinction, and human impact on the oceans and forests. History and scientific projections will be examined in relation to these events. Possible solutions to these worldwide processes and a critical assessment of their causes and consequences will be covered. **Prerequisite:** none.

**BILD 20. Human Genetics in Modern Society (4)**

Fundamentals of human genetics and introduction to modern genetic technology such as gene cloning and DNA fingerprinting. Applications of these techniques, such as forensic genetics, genetic screening, and genetic engineering. Social impacts and ethical implications of these applications. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 20 after receiving credit for BICD 100.

**BILD 22. Human Nutrition (4)**

A survey of our understanding of the basic chemistry and biology of human nutrition; discussions of all aspects of food: nutritional value, diet, nutritional diseases, public health, and public policy. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 22 after receiving credit for BICD 120.

The topics covered are: sexual development in embryo and fetus, the nature and regulation of changes at puberty, the functioning of the mature sexual system. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major. Note: Students may not receive credit for BILD 24 after receiving credit for BICD 134.

**BILD 26. Human Physiology (4)**

Introduction to the elements of human physiology and the functioning of the various organ systems. The course presents a broad, yet detailed, analysis of human physiology, with particular emphasis towards understanding disease processes. Three hours of lecture and one hour of discussion. This course is designed for non-biology students and does not satisfy a lower-division requirement for any biology major.

**BILD 30. The Biology of Plagues: Past and Present (4)**

An introduction to diseases caused by viruses, bacteria, and parasites, and the impact of these diseases on human society. Topics include the biology of infectious disease, epidemiology, and promising new methods to fight disease. Three hours of lecture and one hour discussion. This course is designed for non-biology majors and does not satisfy a lower-division requirement for any biology major. (Note: Students may not receive credit for BILD 30 after receiving credit for BIMM 120.)

**BILD 36. AIDS Science and Society (4)**

An introduction to all aspects of the AIDS epidemic. Topics include the epidemiology, biology, and clinical aspects of HIV infection; HIV testing; education and approaches to therapy; and the social, political, and legal impacts of AIDS on the individual and society. Students may not receive credit for BILD 36 after receiving credit for BICD 136.

**BILD 71. Genomics Research Initiative (1)**

This class will examine the theoretical and practical basis for modern genomics research. Students will learn the theoretical basis for genomics and tools used for the sequencing and annotation of genomic DNA, and computational and molecular methods for the study of evolution. **Prerequisite:** departmental approval only; restricted to students participating in the National Genomics Research Initiative program.

**BILD 87. Freshman Seminar (1)**

The freshman seminar program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshmen seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

**BILD 90. Undergraduate Seminar (1)**

This seminar is restricted to lower-division undergraduate students (freshmen and sophomores). The course introduces current biomedical topics. The topics vary with instructors and for each quarter. Examples of topics which may be discussed are: wildlife conservation, signaling within and between cells, mapping the human genome, etc. This course does not satisfy any requirement for the biology major, biology minor, or college general education.

**BILD 92. Professional Topics (1)**

This seminar introduces students to the various subdisciplines and their research methodology in the biological sciences. Emphasis will be on bioinformatics, neurophysiology, and biotechnology. Current research topics in the specialized areas in academia and industry will be discussed. The role and professional identity of biologists in consulting, government, management, and teaching will be reviewed. In addition, issues surrounding professional ethics will be discussed.

**BILD 94. Professional Issues in Bioinformatics (1)**

This seminar will introduce undergraduate students, especially freshmen and sophomores, to a variety of issues and topics in the field of bioinformatics.

**BILD 95. Undergraduate Workshops (1)**

The workshops will be designed to focus on lower-division undergraduate. The course will introduce students to the methods of scientific research and to a variety of research topics in the biological/biomedical sciences. Examples of topics are: Introduction to Scientific Research, AIDS, Medical and Social Aspects, Is the Mind the Same as the Brain, Wildlife Conservation.

**BILD 99. Independent Research (2 or 4)**

Independent research by special arrangement with a faculty member. (P/NP grades only). Students must have an overall UCSD GPA of at least 3.0 and a minimum of thirty units complete. Students must complete a “Special Studies” form and a Division of Biological Sciences “Research Plan.” Credit may not be received for a course numbered 99 subsequent to receiving credit for a course numbered 199.

**UPPER-DIVISION**

**BIOCHEMISTRY**

**BIBC 100. Structural Biochemistry (4)**

The structure and function of biomolecules. Includes protein conformation, dynamics, and function; enzymatic catalysis, enzyme kinetics, and allosteric regulation; lipids and membranes; sugars and the pentoses; and nucleic acids. Three hours of lecture and one hour of recitation. **Prerequisite:** Chem. 140A; Chem. 140B may be taken concurrently. (Note: Students may not receive credit for both BIBC 100 and Chem. 114A.)

**BIBC 102. Metabolic Biochemistry (4)**

Energy-producing pathways—glycolysis, the TCA cycle, oxidative phosphorylation, photosynthesis, and fatty acid oxidation; and biosynthetic pathways—glucogenesis, glycogen synthesis, and fatty acid biosynthesis. Nitrogen metabolism, urea cycle, amino acid metabolism, nucleotide metabolism, and metabolism of macromolecules. **Prerequisite:** Chem. 140A; Chem. 140B may be taken concurrently. (Note: Students may not receive credit for both BIBC 102 and Chem. 114B.)

**BIBC 103. Biochemical Techniques (4)**

Introductory laboratory course in current principles and techniques applicable to research problems in biochemistry and molecular biology. Techniques include protein and nucleic acid purification; identification methods such as centrifugation, chromatography, and electrophoresis; immunological, spectrophotometric, and enzymatic methods. **Prerequisite:** BIBC 100. Students may not receive credit for BIBC 103 after taking CHEM 112. Attendance at the first lecture/lab is required. Nonattendance will result in the student’s being dropped from the course roster.

**BIBC 104. Biochemistry and Biotechnology of Plants (4)**

The biochemical and molecular basis of plant genetic engineering to understand modern approaches to crop improvement. **Prerequisites:** BIBC 1; Chem 140A. BIBC 102 and Chem 140B may be taken concurrently.

**BIBC 110. Physical Biochemistry (4)**

The theory and applications of physical chemistry to biological molecules, process and systems and techniques used in biochemistry and physiology. Topics include reversible and irreversible thermodynamics, bioenergetics, energy coupling and transduction, solutions of macromolecules, sedimentation, chromatography, electrophoresis, passive and active membrane transport, spectroscopy, and chemical kinetics. Three hours of lecture and one hour of recitation. **Prerequisites:** calculus and organic chemistry.

**BIBC 116. Evolution of Genes and Proteins (4)**

The history of an organism can be found in its genome. Analyses of the primary sequences will be used to recognize families of genes that arose by duplication and divergence. Topics include comparisons of amino acid
sequences and three dimensional structures and range from the oldest and most widely distributed proteins to modern mosaics. Where possible, specific motifs and folds will be traced to their ancestral beginnings. **PREREQUISITES:** BIBC 100, BIMM 100.

BIBC 130 Marine Biochemistry (4) Biochemical mechanisms of adaptation in organisms to the marine environment. Special emphasis will be on the effects of pressure, temperature, salinity, oxygen, and light on the physiology and biochemistry. **PREREQUISITE:** BIBC 102 or consent of instructor.

GENETICS, CELLULAR AND DEVELOPMENTAL BIOLOGY OF PLANTS AND ANIMALS

BICD 100. Genetics (4) An introduction to the principles of heredity in diploid organisms, fungi, bacteria, and viruses. Mendelian inheritance; population genetics; quantitative genetics; linkage; sex determination; and behavior of chromosome aberrations, gene structure, regulation, and replication; genetic code. Three hours of lecture and one hour of recitation. **PREREQUISITE:** BILD 1 or the equivalent.

BICD 101. Eucaryotic Genetics Laboratory (4) This course emphasizes the principles of Mendelian inheritance and requires the student to apply both cytological and genetic analysis to the solution of problems in transmission genetics. One hour of lecture and seven hours of laboratory. **PREREQUISITE:** BICD 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BICD 110. Cell Biology (4) The structure and function of cells and cell organelles, cell growth and division, motility, cell differentiation and specialization. Three hours of lecture and one hour of recitation. **PREREQUISITES:** BIBC 100 or BIBC 102, and BICD 100.

BICD 111. Cell Biology Laboratory (6) A laboratory course in the application of cellular techniques to biological problems. The establishment, growth, transformation, immortalization, and senescence of mammalian cells will be studied at the molecular and the cellular level. Ten hours of laboratory. In addition to the formal lab hours listed above, there will be an average of two hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. **PREREQUISITE:** BICD 110 (may be taken concurrently); BIBC 103 is strongly recommended. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BICD 118. Pathways of Intracellular Protein Trafficking and Compartmentation (4) This course will focus on various subcellular organelles, their function, protein traffic, disulfide bond formation, protein folding, assembly of macromolecular complexes, protein quality control, and cellular responses to misfolded proteins. The emphasis will be on experimental approaches and model systems for the analyses of these problems, and on the connection of these topics to human disease. Three hours of lecture and one hour of mandatory discussion of primary publications per week. Open to upper-division students only. **PREREQUISITE:** BICD 110 and BIMM 100.

BICD 120. Fundamentals of Plant Biology (4) An introduction to the biology of plants. Basic principles of plant anatomy, physiology, development, and diversity are covered as well as specialized topics, including plant genetic engineering, plant disease and stress, medicinal plants, plant ecosystems, and the environment, and sustainable agriculture. **PREREQUISITES:** BILD 1 and BILD 2.

BICD 122. Plant Cellular and Molecular Biology (4) The cellular and molecular basis of plant development, including plant hormones, signal transduction mechanisms, light and plant growth, plant microorganism interactions, plant transformation, genetic engineering of plants. **PREREQUISITE:** BIBC 102 required; BICD 120 recommended.

BICD 123. Plant Molecular Genetics and Biotechnology Laboratory (6) Techniques in plant cell and tissue culture, plant transformation, genetic selection and screening of mutants, host pathogen interactions, gene regulation, organelle isolation, membrane transport. Two hours of lecture and eight hours of laboratory each week. **PREREQUISITE:** upper-division standing; BICD 120 strongly recommended. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BICD 130. Embryos, Genes, and Development (4) Developmental biology of animals at the tissue, cellular, and molecular levels. Basic processes of embryogenesis in a variety of invertebrate and vertebrate organisms. Cellular and molecular mechanisms that underlie cell fate determination and cell differentiation. More advanced topics such as pattern formation and sex determination are discussed. Open to upper-division students only. Three hours of lecture and one hour of recitation. **PREREQUISITES:** upper-division standing; BICD 100, BIBC 100 or BIBC 102; BICD 110 strongly recommended, BIMM 100 strongly recommended.

BICD 131. Embryology Laboratory (6) Descriptive and experimental embryology of various animal phyla. Four hours of lecture and ten hours of laboratory each week. **PREREQUISITE:** BILD 1; BILD 2. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BICD 134. Human Reproduction and Development (4) This course is addressed to the development of the human sexual system, including gametogenesis, fertilization, and embryo implantation. Emphasis is placed on the physiology of reproductive functions. Three hours of lecture and one hour of discussion. **PREREQUISITES:** BICD 102 and BICD 100.

BICD 136. AIDS Science and Society (4) An introduction to all aspects of the AIDS epidemic. Topics will include the epidemiology, biology, and clinical aspects of HIV infection, HIV testing, education and approaches to therapy, and the social, political, and legal impacts of AIDS on the individual and society. In order to count for their major, biology majors must take the upper-division course, BICD 136. **PREREQUISITES:** BILD 1, BILD 2 recommended.

BICD 140. Immunology (4) Formation and function of the mammalian immune system, molecular and cellular basis of the immune response, infectious diseases and autoimmunity. **PREREQUISITE:** BICD 100, BIMM 100. BICD 100 recommended.

BICD 145. Laboratory in Molecular Medicine (4) This course focuses upon a molecular and immunological approach to study problems in modern medical research. The emphasis will be on novel approaches in medicine, including lymphocyte biology, cancer biology, and gene transfer. **PREREQUISITE:** BIBC 103, BIMM 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student’s being dropped from the course roster.

BICD 150. Endocrinology (4) Normal function and disease of the major hormone systems of the body including the hypothalamus/pituitary axis, the thyroid gland, reproduction and sexual development, metabolism and the pancreas, bone and calcium metabolism, and the adrenal glands. **PREREQUISITE:** BIPM 100. (May be taken concurrently; BIBC 103 recommended.)

BICD 170. Topics in Human Genetics (4) An advanced course covering human genetics using papers from the scientific literature as the major source of information. A review of basic genetics as applied to the human species. Consideration of recent genetic insights into a number of human conditions. **PREREQUISITE:** BICD 100, BIMM 100 is strongly recommended.

ECOLOGY, BEHAVIOR, AND EVOLUTION

BIEB 102. Introductory Ecology-Organisms and Habitat (4) This course emphasizes principles shaping organisms, habitats, and ecosystems. Topics covered include population regulation, physiological ecology, competition, predation, and human exploitation. This will be an empirical look at general principles in ecology and conservation with emphasis on the unique organisms and habitats of California. **PREREQUISITE:** BILD 3 or equivalent.

BIEB 110. Vertebrate Biology (4) Introduction to the natural history of turtles, lizards, snakes, birds, and terrestrial and marine mammals from both an ecological and evolutionary perspective. Students will conduct an independent field project. One field trip required. **PREREQUISITE:** BILD 3, BILD 1 or 2 recommended.

BIEB 121. Ecology Laboratory (6) A laboratory course to familiarize students with ecological principles and experimental techniques. Students will perform outdoor field work and use the Macintosh computer for data exploration and analysis. Two hours of lecture and eight hours of laboratory each week. **PREREQUISITE:** BIEB 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIEB 123. Molecular Methods in Ecology and Evolution Lab (4) Theory and practice of molecular biology techniques used in ecological and evolutionary research. Includes isolation of DNA and RNA, PCR and its applications, DNA sequencing, gene expression analysis, bioinformatics, and ecological and evolutionary analysis of molecular data. Students may not enroll in or receive credit for both BIMM 101 and BIEB 123. **PREREQUISITE:** BILD 3. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIEB 126. Plant Ecology (4) This course begins with an introduction to plant population biology including whole-plant growth and physiology. We then focus on three classes of ecological interactions: plant-plant competition, plant-animal coevolution, and plant reproductive ecology including animal pollination and seed dispersal. **PREREQUISITE:** BILD 3 or equivalent.

BIEB 128. Insect Ecology (4) This course begins with a survey of insect diversity and phylogenetic relationships. We then address ecological issues including thermal ecology, population dynamics (including outbreaks), movement and migration, competition, predation, herbivory, parasitism, insect defense, mimicry complexes, and sociability. **PREREQUISITE:** BILD 3 or equivalent.

BIEB 131. Marine Invertebrate Ecology Laboratory (6) A laboratory course introducing students to marine ecology. Students will participate in outdoor fieldwork and work in the laboratory gathering and analyzing ecological data. We will focus on ecological communities in estuary, sandy beach, and rocky intertidal habitats. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least nine hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. **PREREQUISITES:** BILD 3; BIEB 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student’s being dropped from the course roster.

BIEB 134. Introduction to Biological Oceanography (4)
Basis for understanding the ecology of marine communities. The approach is process-oriented, focusing on major functional groups of organisms, their food-web interactions and community responses to environmental forcing, and contemporary issues in human and climate influences. Prerequisite: upper-division standing; BILD 3 is recommended.

BIEB 136. Ichthyology (4)
Course will study aspects of the biology of fishes from all over the world, from the crushing pressure of the deep sea to the chilling temperatures of Antarctic waters. Students will learn about form/function that allow fishes to thrive in diverse environments. Students will conduct an independent field project. Field trips may be required. Prerequisite: BILD 3 recommended.

BIEB 140. Biodiversity (4)
An introduction to the patterns of geographic distribution and natural history of plants and animals living in terrestrial and marine ecosystems. We will explore: ecological and evolutionary processes responsible for generating and maintaining biological diversity; and the nature of extinction both in past and present ecosystem. Prerequisite: BILD 3.

BIEB 144. Quantitative Ecology and Conservation (4)
Introduction to mathematical and statistical tools for prediction of deterministic and stochastic ecological systems, including age-structured population growth; population regulation; interspecific interaction; species diversity. Conservation biology topics include sustainable harvesting; metapopulation dynamics; extinction; case studies of endangered species. Prerequisite: BIEB 100 and BIEB 102 recommended.

BIEB 145. Spatial Analyses in Ecology and Conservation (4)
Course familiarizes students with the concept and application of geographic analyses in biology and, specifically, the use of GIS as analytical tool. Example studies will be performed that range from global ecology to conservation in San Diego county. Prerequisite: BILD 3; BIEB 100 and BIEB 102. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIEB 147. Introduction to Phylogenetics (4)
Course will review some of the methods for constructing phylogenetic trees using morphological and molecular data. Topics to be covered will include evolutionary and ecological transformations, biodiversity measurements, biogeography, systematics, and taxonomy among others. Prerequisite: BILD 3.

BIEB 150. Evolution (4)
Evolutionary processes are discussed in their genetic, historical, and ecological contexts. Microevolution, speciation, macroevolution, and the evolution of adaptations. Three hours of lecture and one hour of recitation. Prerequisite: BILD 3.

BIEB 154. Molecular Evolution (4)
This course deals with the evolution of genes and the molecules they encode. The role of mutation, selection, and drift at the molecular level are discussed. Molecular phylogenies, jumping genes, viral evolution, and searches for molecular homologies are a few of the topics covered. Three hours of lecture and one hour of recitation. Prerequisite: BIEB 150 and BIEB 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. Note: Students may not enroll in or receive credit for both BIEB 100 and BIEB 120, BIEB 100 and Chem 112A, BIEB 100 and Chem 112B.

BIEB 158. Chromatin Structure and Dynamics (4)
Chromatin is the natural state of DNA in the eukaryotic nucleus. Chromatin structure, nucleosome assembly, chromatin remodeling by ATP-dependent motor proteins, histone modifications and the histone code, heterochromatin, and the influence of the influx, biochemical, and molecular biological processes during differentiation in developing systems. Prerequisite: BIEB 100.

BIEB 160. Molecular Basis of Human Disease (4)
This course explores problems in the regulation of gene activity in eukaryotic cells approached at the molecular level. The course includes the organization, structure, transcription, and regulation of eucaryotic genes; mechanism of hormonal regulation in controlling gene activity; induction of gene expression in eucaryotic cells; role of signal transduction pathways in controlling gene expression; and regulation of gene activity during differentiation in developing systems. Examples are taken from eucaryotic microorganisms, invertebrates, as well as mammalian and other vertebrate systems. Three hours of lecture and one hour of discussion. Prerequisite: BIBM 100.

BIEB 166. Animal Behavior and Communication (4)
An integrated approach to animal behavior focusing on mechanisms of acoustic, visual, and olfactory communication. Course covers ethology and the genetics and neurobiology of behavior; orientation and navigation, and signal origins, properties, design, and evolution. Prerequisite: BILD 3.

BIEB 167. Animal Communication Laboratory (6)
Laboratory exercises will introduce students to quantitative methods of visual, auditory, and olfactory signal analysis and to lab and field studies of animal signaling. Two hours of lecture and eight hours of laboratory each week. In addition to the formal lab hours, there will be at least nine hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. Prerequisites: BIEB 100 and BIEB 166. (BIEB 166 may be taken concurrently.) Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIEB 176. Conservation and the Human Predicament (4)
(Cross-listed with ANTH/BIO 132) A discussion of the human predicament, the biodiversity crisis, and the importance of biological and environmental conservation. Examines issues from biological, cultural, historical, economic, social, political, and ethical perspectives emphasizing new approaches and new techniques for safeguarding the future of humans and other biosphere inhabitants. Prerequisites: upper-division standing and BILD 3 or consent of instructor.

MOLECULAR BIOLOGY, MICROBIOLOGY

BIBM 100. Molecular Biology (4)
Molecular basis of biological processes, emphasizing gene action in context of entire genome. Chromosomes and DNA metabolism: chromatin, DNA replication, repair, mutation, recombination, transcription, translation, protein synthesis, regulation of gene activity. Procaroay and eucaryotic genetics. Prerequisites: BIBM 100 or BIBM 102, BICD 100. (Note: Students may not receive credit for both BIBM 100 and Chem 112A, BIBM 100 and Chem 112B, or BIBM 100 and Chem 112C.)

BIBM 101. Recombinant DNA Techniques (4)
Theory and practice of recombinant DNA and molecular biology techniques. Includes construction and screening of DNA libraries, DNA sequencing, PCR and its applications, bioinformatics, and DNA analysis. Prerequisite: BIBM 100. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. Note: Students may not enroll in or receive credit for both BIBM 101 and BIBM 123, or BIBM 101 and Chem 112B. Prerequisites: BIBM 100.

BIBM 108. Crustacean Biology (4)
Crustacean zoology and anatomy, muscular, nervous, and sensory systems, digestion and respiration, and the anatomy and physiology of crustaceans. Prerequisites: BIBM 101 and BIBM 120. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIBM 122. Microbial Genetics (4)
Organization and function of procaroay genetic systems including sex factors, transduction, transformation, phage genetics, transposons, genetic engineering. Three hours of lecture. Prerequisites: BIBM 100, BICD 100, or consent of instructor.

BIBM 124. Medical Microbiology (4)
This course covers basic principles and detailed aspects of microbial infectious diseases. Biochemical properties underlying microbial spread, host microbial and inflammatory response, immunity, and recovery are emphasized. Emphasis is placed upon microbial pathogenesis, including microbial pathogenesis of host immune responses, of drug resistance, and of viral and plasmid replication. Three hours of lecture and one hour of discussion. Prerequisites: BIBM 100 and BIBM 120, BIBM 140 is recommended.

BIBM 127. Marine Microbiology Laboratory (4)
Techniques and theory in environmental microbiology. Students perform experiments concerning a) enrichment,
enumeration, and identification and b) metabolic and physicochemical adaptations, along with an independent project. Graduate students submit an additional report and take a modified final exam. Credit is earned only once. Department approval required. Nonattendance will result in the student's being dropped from the course roster.

BIMM 130. Microbial Physiology (4)
Prokaryotic microbial physiology will be discussed primarily from a biochemical standpoint with emphasis on mechanisms of resistance to environmental stress. Topics to vary from year to year but will include the following themes: Central metabolism, bioenergetics, biosynthesis, regulation, differentiation, prokaryotic structure-function relationships.

BIMM 132. Molecular Biology of Human Retroviruses (4)
Replication cycle and gene regulation of HIV. Molecular approaches to therapy and vaccines. Three hours of lecture.

BIMM 134. Biology of Cancer (4)
This course covers basic processes of transformation and tumor formation in a two-part format. The first section is focused on molecular and cellular mechanisms of carcinogenesis. The second section discusses tumor pathology and metastasis. Open to upper-division students only.

BIMM 150. Post-Genomics Biology (2)
This course will focus on large-scale analysis of post-genomics biological systems. Students will be introduced to methods that are used to study changes in gene expression and identify protein-protein interactions, screening for pathway inhibitors, characterizing multiprotein complexes, and probing protein localization and function.

BIMM 162. 3D Electron Microscopy of Macromolecules (4)
Biological macromolecules and supramolecular complexes as well as organelles, and small cells are being examined in three-dimensions by modern electron cryomicroscopy and image reconstruction techniques. The basic principles of transmission electron microscopy and 3D image reconstruction are discussed.

BIMM 166. Environmental and Molecular Toxicology (4)
(Cross-listed with CHEM 166; conjoined with BGGN 256, BIMM 266, and CHEM 266.) This course will investigate approaches to study the impact of environmental toxicants on human health. Other modern approaches that are being implemented to detect and remediate environmental toxicants will also be examined. Graduate students will be required to complete an additional paper and exam beyond that expected of undergraduate students.

BIMM 171A. Genomics Research Initiative Laboratory I (4)
Students will isolate bacterial viruses or other organisms from the environment and characterize them by methods including electron microscopy and nucleic acid analysis. The genomic DNA will be purified, and sent for sequencing. Each student will enroll in or receive credit for both BIMM 171A and BIBB 123 or BIMM 171A and BIMM 101. Departmental approval required. Restricted to students participating in the National Genomics Research Initiative Program. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster. It is the student's responsibility to officially drop the course.

BIMM 171B. Genomics Research Initiative Laboratory II (4)
Students will characterize the genomic sequence of the organisms isolated in BIMM 171A and use molecular and computational tools to resolve ambiguities and close gaps. They will then annotate the DNA sequence to identify protein and RNA coding regions. Students may not enroll in or receive credit for both BIMM 171B and BIBB 123 or BIMM 171B and BIMM 101.

BIPN 100. Mammalian Physiology I (4)
This course introduces principles of physiological regulation, controlled and integrated by the nervous and endocrine systems. It then examines the muscular, cardiovascular, and renal systems in detail and considers their control through the interaction of nervous activity and hormones. This course is one hour of discussion.

BIPN 102. Mammalian Physiology II (4)
This course completes a survey of organ systems begun in BIPN 100 by considering the respiratory and gastrointestinal systems. Consideration is given to interactions of these systems in weight and temperature regulation, exercise physiology, stress, and pregnancy and reproduction. Three hours of lecture and one hour of section per week.

BIPN 105. Animal Physiology Lab (6)
Experiments are performed on membrane physiology; nerve muscle function; cardiovascular physiology; respiratory, gastrointestinal and renal physiology. Subjects include experimental animals and humans. Departmental approval required. Three hours of lecture and ten hours of laboratory each week. In addition to the formal lab hours, there will be at least eight hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIPN 106. Comparative Physiology (4)
This course examines the physiological adaptation of animals, invertebrates and vertebrates, to their particular environmental and behavioral regimes. Structure and functional adaptations of the basic organ systems are discussed. Departmental approval required. Three hours of lecture and ten hours of laboratory each week. In addition to the formal lab hours, there will be at least eight hours in which students will be required to work in the class laboratory to complete experiments and prepare for presentations. Attendance at the first lecture/lab is required. Nonattendance will result in the student's being dropped from the course roster.

BIPN 110. Organ Systems and Disease (4)
Course will offer in-depth instruction to human anatomy and diseases from the conceptual framework of organ systems. Central nervous system, cardiovascular system, and gastrointestinal system will be discussed in terms of normal anatomy, pathology, and relevant scientific frontiers.

BIPN 140. Cellular Neurobiology (4)
This course covers the biophysics of the resting and active membranes of nerve cells. It also covers the mechanisms of sensory transduction and neuromodulation, as well as the molecular basis of nerve cell function.

BIPN 144. Developmental Neurobiology (4)
Molecular basis of neuronal cell fate determination, axon pathfinding, synaptogenesis experience-based refinement of connections, and learning in the brain will be examined.

BIPN 145. Neurobiology Laboratory (6)
Basic principles of nerve and muscle physiology will be taught through weekly exercises and individual projects. One hour of lecture and nine hours of laboratory each week.

BIPN 148. Cellular Basis of Learning and Memory (4)
Cellular basis of brain and molecular mechanisms underlying learning and memory. Synapse formation and synaptic plasticity, neurotransmitter systems and their receptors, mechanisms of synaptic modification, and effect of
exposure on neuronal connectivity, and gene expression. **PREREQUISITES:** BILD 1; BILD 2; BIBC 100 or BIBC 102 (may be taken concurrently).

BIPN 150. Diseases of the Nervous System (4) Course will be taught from a research perspective, high-lighting the biological pathways impacted by common neurological diseases. Each disease covered will be used to illustrate a key molecular/cellular pathway involved in proper neurological function. **PREREQUISITES:** BIBC 102 and BICD 100; BIPN 140 may be taken concurrently.

**SPECIAL COURSES**

BISP 190. Advanced Biology Seminars for Seniors (2) Experiential learning in diverse areas of biology from major universities in the U.S. and abroad will describe current research activities being conducted in their laboratories. Relevant readings will be assigned. P/NC grades only. **PREREQUISITES:** seniors only; concurrent enrollment in BISP 199 or consent of instructor.

BISP 192. Senior Seminar in Biology (1) The Seminar is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in biology (at the upper-division level). Topics will vary from quarter to quarter. Senior Seminars may be taken for credit up to four times, with a change in topic and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **PREREQUISITES:** upper-division standing; department stamp and/or consent of instructor.

BISP 194. Advanced Topics in Modern Biology (2) Course will vary in title and content. When offered, the current title and content will be announced in the University catalog, on the Division of Biological Sciences Web site. Can be taken a total of four times as topics vary. Students may not receive credit for the same topic. **PREREQUISITES:** BIBC 102; BICD 100; upper-division standing.

BISP 195. Introduction to Teaching in Biology (4) Introduction to the teaching of the basic course in biology. A student in the first quarter of the instructor of the course is assigned one class section and will meet one time per week with the section. A student is required to attend the course lecture, lead a discussion section, and meet with the instructor of the course at least one time per week during the quarter. P/NC grades permitted. **PREREQUISITES:** consent of instructor and approval of department chair. (Note: Applications for a BISP 195 are to be submitted to the Division of Biological Sciences by the end of the sixth week of the quarter preceding the quarter in which the BISP 195 will be completed.) This course may be counted as one of the upper-division electives for a biology major.

BISP 196. Honors Thesis in Biology (4) Senior thesis research program. Research is conducted under the supervision of a biology faculty member. This one-year program is taken in addition to the major require- ments for graduation. Upon satisfactory completion of the program, students will receive “Distinction in Biology” on their transcripts. **PREREQUISITES:** senior standing, 3.7 GPA or above; prior selection for the program by a faculty member and approval by program coordinator. A departmental stamp will be used to monitor during registration.

BISP 197. Biology Internship Program (4) Under the joint supervision of a biology faculty advisor and a selected industry mentor, the student will conduct independent research on a problem in an industrial biotech laboratory. The student will gain insight into industry research and practical biotech experience. **PREREQUISITES:** BIBC 103 or BIMM 101, BIBC 102, BICD 100, BIMM 100, overall GPA 3.0, and consent of the biology faculty coordinator.

BISP 199. Individual Research for Undergraduates (2 or 4) Individual research on a problem by special arrangement with a faculty member. Projects are expected to involve primary, experimental approaches that augment train- ing in basic biology and that echo the curricular focus of the Division of Biological Sciences. (P/NC grades only.) **PREREQUISITES:** must have an overall UCSD GPA of at least 3.0, a minimum of ninety units complete, and approval by division chair. Students must complete a “Special Studies” form and a Division of Biological Sciences “Research Plan.” (Note: Applications for a BISP 199 must be submitted to the Division of Biological Sciences prior to the eighth week of the quarter preceding the quarter in which the BISP 199 will be completed.) This course may be counted as one of the upper-division electives for a biology major, providing that no other special studies courses have already been counted toward the major. May be taken for credit three times.

**GRADUATE**

**BISP 204. Topics in Community and Population Ecology (3)** This course teaches a different topic each quarter on the theoretical or conceptual side of community and popula- tion ecology. Students will read materials in depth, attend weekly discussions, and explore theories and models with statistical, analytical, and algorithmic tools of the trade. **PREREQUISITE:** graduate standing or consent of instructor. (S/U grades only.) (Quarter offered varies and course is not offered every year.)

**BISP 205. Communicating Science to the Public (2)** Learn effective ways of communicating science to non- scientists. Develop an understanding of how people’s views of science and background knowledge can influence their learning, and the basic techniques and tools needed to tailor communi- cation for different audiences. (Quarter offered varies, and course is not offered every year.)

**BISP 206. Topics in Biophysics and Physical Biology (4)** Selection of topics of current interest. Examples: primary processes of photosynthesis; membrane biophysics; appli- cations of physical methods to problems in biology and chemistry, e.g., magnetic resonance, X-ray diffraction, fluctuation spectroscopy, optical techniques (Fluorescence, optical rotary dispersion, circular dichroism). Topics may vary from year to year and must be taken in conjunction with the upper-division standing for the course. (S/U grades permitted). This course is cross-listed with Physics 206 and Chemistry 206. (Quarter offered varies, and course is not offered every year.)

**BGGN 210. Neurobiology Boot Camp (4)** For incoming doctoral students in Neurobiology, Computational Neurobiology, and Neurosciences. During first two weeks in September, students commit to ten to fifteen hours per day in lectures and laboratories in elec- 898
tron physiology, cellular anatomy, molecular biology, optical imaging, and computational neurobiology. Students also attend weekly seminars during fall quarter. **PREREQUISITE:** graduate standing; major codes BI77, BI79, NE75. (F)

**BGGN 212. Special Topics in Microbiology (3)** Recent developments in prokaryotic and eukaryotic mi- crobial research. Topics vary from year to year but may include the following subjects: the molecular basis of (a) sex determination, expression, and interconversion; (b) differentiation, morphogenesis, and programmed cell death; (c) transcriptional and metabolic regulation; and (d) chemical macromolecular and energy-mediated re- ception, transmission, and response processes. The main thesis of the course is that examples of complex regulatory phenomena in higher organisms can be found in single cell organisms. This course is open to enrollment by undergraduates. **PREREQUISITES:** BIBC 102 and BICD 100. (S/U grades permitted.) (Quarter offered varies, and course is not offered every year.)

**BGGN 213. Topics in Conservation Biology (3)** Provides in depth coverage of topics in population genetics and ecology, community ecology, biogeography, human ecology, and ecosystem management relevant to con- servation biology. Topics vary from year to year and have included: (a) biological conservation; (b) population depression, min- imum viable population size, problems of overabundance, fragmented populations, key-stone species, in-situ and ex-situ conservation techniques. One two-hour meeting weekly. **PREREQUISITE:** graduate standing or consent of instructor. (S/U grades only.) (S)

**BGGN 215. Phylogenetics (3)** This course focuses on the theoretical and practical basis of phylogenetic analysis (the estimation of phylogenetic- trees). Students will understand the assumptions made in phylogenetic analyses, be able to identify the strengths and weaknesses of various methods, and perform a phyloge- netic analysis on DNA sequence data. **PREREQUISITE:** one semester of calculus is recommended. (S)

**BGGN 218. Post-Genomics Biology (2)** This course will examine the analysis of post- genomics biological systems. Students will be introduced to methods for analyzing changes in gene expression, identifying protein-protein interactions, screening for path- way inhibitors, characterizing multiprotein complexes, and probing protein localization.

**BGGN 219. Classic Papers in Genetics (3)** The course explores, through classic papers, how genetic approaches in the distant and near past have opened up novel areas of biology. The goal of the course is to teach students the type of approach that allowed these research- ers to break out of old paradigms into new ones of their own based on genetic pathfinding. (W)

**BGGN 220. Graduate Molecular Biology (6)** Provides a broad, advanced-level coverage of modern molecular biology for first-year graduate students. Topics include prokaryotic and eukaryotic gene structure and regulation, chromatin structure, DNA replication, transla- tion, the functions of small RNA, and an introduction to viruses. **OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM.** (Letter grades only.) (F)

**BGGN 221. Graduate Protein Biochemistry (4)** Topics include general aspects of protein structure and biochemical approaches to the isolation and study of proteins. This course also covers the relationship between the structure and function of selected proteins. Detailed discussion of modern biochemical methods to study protein-protein interactions will be included. **BGGN 220** is a co-requisite. **OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM.** (Letter grades only.) Corequisite: BGGN 220. (F)

**BGGN 222. Graduate Cell Biology (6)** A coverage of modern cell biology for first-year graduate students. There is an up-to-date discussion of topics such as: structure and function of membranes; ion pumps, ion channels, transmembrane signalling; receptor mediated endocytosis; protein targeting; the role of RER and Golgi apparatus; the biosynthesis of intracellular organelles in animal and plant cells; the cytoskeleton, motility, molecular motors, cell-cell interactions, mitosis; and the control of cell division. Also included are extensive coverage of cell signaling techniques, the application of computational techniques and applications to cell biology. **PREREQUISITES:** BGGN 220 and 221. **OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM.** (Letter grades only.) (W)

**BGGN 223. Graduate Genetics (6)** Provides a broad and extensive advanced-level coverage of molecular and formal genetics for first-year graduate students. Topics covered include: bacterial genetics, recombination in prokaryotes and eukaryotes, mammalian somatic-cell genetics, developmental genetics, sex determination, dosage compensation, and immuno- genetics. Extensive coverage of the use of model systems like Drosophila and C. elegans is included. General and specific aspects of cellular signalling mechanisms will be covered. **PREREQUISITES:** BGGN 220, 221 and 222. **OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM.** (Letter grades only.) (S)

**BGGN 224. Graduate Neurobiology (4)** Course covers modern molecular, cellular, developmen- tal, and physiological aspects of neurobiology. Extensive discussion of original research articles will be included. **PREREQUISITES:** BGGN 220 and 221. **OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM.** (Letter grades only.) (F)

**BGGN 225. Graduate Immunology (4)** The course is devoted to immunology and is organized as a combined lecture-tutorial course stressing classical as well as current literature. Each week will compose an indepen- dent section. Topics will include cellular interactions in- volving the immune response and the molecular biology unique to lymphoid factor and receptors. **PREREQUISITES:** BGGN 220 and 221. **OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM.** (Letter grades only.) (S)
BGGN 226. Graduate Animal Virology (4)

This course consists of a review of fundamental concepts together with an in-depth analysis of the structure, genetics, multiplication and oncogenicity of animal viruses. Particular emphasis will be given to the DNA and RNA tumor viruses. The format of this section includes lectures and discussion of selected papers. **Prerequisites:** BGGN 220 and 221. OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (W)

BGGN 227. Graduate Topics in Plant Biology (4)

This course covers advanced topics in plant biology in the areas of molecular genetic developmental, and physiological biology. We will discuss plant-microbe interactions, transposable elements, protein trafficking, ion transport, and caricature development. The format of this section includes lectures and discussion of selected papers. **Prerequisites:** BGGN 220, 221, and 222. OPEN ONLY TO STUDENTS ENROLLED IN A GRADUATE DEGREE PROGRAM. (Letter grades only.) (W)

BGGN 228. Graduate Developmental Biology (4)

This course covers graduate level lectures on developmental biology, emphasizing the use of genetically tractable model systems. Discussion of recent research articles is an integral aspect of this course. Students are introduced to classical experiments and given detailed coverage of recent fundamental findings in developmental biology. **Prerequisites:** BGGN 220 and 221. (Letter grades only.) (S)

BGGN 229. Graduate Oncogenes (4)

This course provides detailed coverage of the cellular and molecular basis of cellular transformation and oncogenesis. There will be extensive discussion on the role of oncogenes and their cellular counterparts. The course also provides in-depth coverage of intracellular signal transduction mechanisms. **Prerequisites:** BGGN 220, 221, and 222. (Letter grades only.) (S)

BGGN 230. Graduate Signal Transduction (4)

The course will introduce students to a variety of signal transduction pathways and their function in the regulation of cellular processes. Special emphasis will be given to signaling cascades relating immunological responses and alterations of signaling pathways during oncogenesis. (W)

Research papers from all aspects of stem cell biology will be read, presented, and discussed. Papers will range from landmark to current studies, spanning many developmental organisms and cell types. Students will present one paper, provide relevant background, and lead discussions. **Prerequisite:** graduate standing or consent of instructor. (F)

BGGN 233. Cellular Immunology (3)

This course covers the molecular and cellular events in the humoral and cellular response to antigen, transplantation biology, the immune status of the major histocompatibility gene complex, the T-cell receptor, lymphokines, and the induction of immunological tolerance. It serves as the second course in a two-part sequence. May be taken by undergraduates who have taken Part 1 (BICD 140) and by graduate students (S/U grades only). (Quarter offered varies and course is not offered every year.)

BGGN 235. Biology and Biochemistry of Cancer Cells (2)

This course covers recent advances in cell biology, biochemistry, immunology, and virology as they relate to cancer cells and their interaction with the host. Cancer research specialists from outside will be brought in to discuss the most recent evidence and interpretations in key areas of cancer research. This course meets two hours per week for lecture and discussion. It will be at an advanced graduate level but open to a limited number of seniors (with permission of instructor) on a P/NP basis. (S/U grades only) (Quarter offered varies, and course is not offered every year.)

BGGN 238A. Integrative Microbiology I (4)

To introduce students with structural and functional properties of microorganisms and with the role of microbes in the world. Emphasizes the integrative aspects of microbiology. First course in series. **Prerequisite:** graduate standing.

BGGN 238B. Integrative Microbiology II (4)

To introduce students with structural and functional properties of microorganisms and with the role of microbes in the world. Emphasizes the integrative aspects of microbiology. Second course in series. **Prerequisite:** graduate standing.

BGGN 240. Cellular Neurobiology (2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPP 140), which they are encouraged to attend. These papers are presented by the students at weekly discussion sessions. **Prerequisite:** consent of instructor. (S/U grades only.) (F)

BGGN 242. Systems Neurobiology (2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPP 142), which they are encouraged to attend. These papers are presented by the students at weekly discussion sessions. **Prerequisite:** consent of instructor. (S/U grades only.) (W)

BGGN 243. Systems Neurophysiology (3)

Ways in which neurons are assembled into circuits to achieve perception and patterned movement. **Prerequisite:** graduate standing or consent of instructor. (S/U grades only.)

BGGN 244A-B. Computational Neurobiology (2-2)

Students read classic and modern papers that form the basis of the undergraduate lectures (BIPP 146), which they are encouraged to attend. These papers are presented by the students at weekly discussion sessions. **Prerequisite:** consent of instructor. (S/U grades only.) (W)

BGGN 249A-C. Basic Neuroscience (4-4)

These courses are designed for graduate students in the neurosciences and other departments that are part of the interdisciplinary program (i.e., Biology, Cog. SCI). These courses have been designed to cover as much basic neuroscience as possible in three quarters of study. They will combine two to three-hour meetings each week with a 1.5 hour lecture and a 1.5 hour discussion of papers. These are required courses for all first-year neurosciences graduate students. **Prerequisite:** graduate standing or consent of instructor. (S/U grades only.)

BGGN 250. Molecular Biology (3)

The first section of this course consists of a review of fundamental concepts in molecular biology together with an in-depth analysis of molecular biological topics of medical importance. The second section covers the structure, genetics, and multiplication of animal viruses, with particular emphasis on the DNA and RNA tumor viruses. Other subjects discussed include viral persistence, latency, and approaches to viral chemotherapy. Three hours of lecture. **Prerequisite:** biochemistry. (Not open to undergraduates.) (S/U grades only) (F)

BGGN 252. Genetics (3)

Human genetics, with emphasis on basic principles. Topics covered include chromosome abnormalities, the mechanisms of dominant and recessive diseases, pedigree analysis, ascertainment of linkage, the interaction of genotype with diseases. Mechanisms of maintaining genetic diversity in human populations will be discussed along with recent approaches to genetic counseling and intervention. **Prerequisite:** consent of instructor. (Not open to undergraduates.) (S/U grades only) (F)

BGGN 253. Immunology (3)

Graduate students will explore topics in specialized areas of immunology and immunology, antigenic and molecular structure of immunoglobulin molecules, antigenic-antibody interactions; cellular events in the humoral and cellular immune responses; translation immunology. **Prerequisite:** consent of instructor. The course is similar in content to BICD 140 and is given for graduate credit only. (S/U grades permitted.) This course is cross-listed with Chemistry 217. (F)

BGGN 254. Cell and Membrane Physiology (3)

This course is a survey covering current subjects in membrane biology relevant to medicine. Subjects include: 1) membrane isolation, composition, and structure; 2) consequences of membrane fluidity (mode of action of anesthetics, intercalated domains for gradient, and endocytosis in biogenesis); 3) sensory perception and response (chemo- and energy reception, cellular neurophysiology, muscle physiology); 4) regulation of membrane function (hormone reception, cellular adhesion, neoplastic transformation). **Prerequisites:** biochemistry and genetics. (S/U grades only)

BGGN 260. Neurodynamics (4)

Introduction to the nonlinear dynamics of neurons and simple neural systems through nonlinear dynamics, bifurcation theory, and chaotic motions. The dynamics of single cells is considered at different levels of abstraction, e.g., bioequivalency and “reduced” models for analysis of regularly spiking and bursting cells, their dynamical properties, and their representation in phase space. Laboratory exercises will accompany the lectures. **Prerequisite:** graduate standing or consent of instructor.

BGGN 266. Advanced Laboratory in Biophysical Techniques (6)

Experiments that emphasize biophysical principles through hands-on experience, with an emphasis on the blending of physical measurements with a clearly identified biological problem. Exercises include the use of optical tweezers to measure viscous forces at the level of cellular organelles, the characterization of sensorimotor control in the fly during visually guided flight, and the use of microscopic imaging techniques to characterize cell motility in vivo. In addition, the following topics will be covered: Students are encouraged to attend the Phys. 173 undergraduate lectures. **Prerequisite:** graduate standing or consent of instructor. Phys. 120A, BILD 1, and Chem. 6CL for undergraduates.

BGGN 269. Mathematics for Neurobiologists (6)

An intensive course to introduce the mathematical concepts and techniques used in modern neurobiology. Intended for beginning graduate students in the neurosciences, but is also available to advanced undergraduates, with the consent of the instructor. **Prerequisite:** graduate standing or consent of instructor.

BGGN 271. Advanced Experimental Methods in Biology (4-12)

Advanced laboratory and/or field experience in contemporary biological methodology. Open only to students enrolled in the integrated Bachelor’s/Master’s Degree Program. **Prerequisites:** consent of instructor and approval of division chair. (F,W,S) (Graduate students: letter grades only.)

BGGN 297. Research Conference (1-3)

Group and individual discussion of research activities and of current literature. **Prerequisite:** graduate standing. (S/U grades only.) (F,W,S)

BGGN 298. Laboratory Projects in Biology (3-12)

An introduction to contemporary laboratory techniques and research interests through independent, original projects. The direction of individual faculty members. **Prerequisite:** consent of instructor. (Letter grades only.) (F,W,S)

BGGN 299. Thesis Research in Biology (1-12) (F,W,S)

BGGN 500. Apprentice Teaching (4)

This course involves participation in upper-division undergraduate teaching at the level of assuming responsibility for recitation sections or laboratories under the supervision of responsible faculty member. Some experience in lecturing to upper-division classes will occasionally be provided. (S/U grades only.) (F,W,S)

BGJC 201. Journal Club in Cell Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. **Prerequisite:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (F,W,S)

BGJC 202. Journal Club in Developmental Biology (1)

Weekly presentations and discussions pertaining to research results reported in recently published literature. **Prerequisite:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (Quarter offered varies, and course is not offered every year.)
BGJC 203. Journal Club in HIV Molecular Biology (I)  
Weekly presentations and discussions pertaining to research results reported in recently published literature. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only) (F,W,S)

BGJC 204. Journal Club in Molecular and Cellular Immunology (I)  
Weekly presentations and discussions pertaining to research results reported in recently published literature. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only) (F,W,S)

BGJC 206. Journal Club in Microbial Physiology (I)  
Weekly presentations and discussions pertaining to research results reported in recently published literature. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only) (S)

BGJC 208. Journal Club in Plant Molecular Biology (I)  
Weekly presentations and discussions pertaining to research results reported in recently published literature. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only) (F,W,S)

BGJC 213. Journal Club in Computational Neurobiology (I)  
Weekly presentations and discussions pertaining to research results reported in recently published literature. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 203. Research Discussion in Development of Dictyostelium (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 204. Molecular Biology of the Cell (I)  
Research reports and discussions based on recent experimental results in cell biology, oncogenesis, genetics, molecular biology and development. Students are expected to present their own new data and the current data of others. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 205. Research Discussion in Plant Membrane Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 206. Research Discussion in Metals in Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 207. Research Discussion in Neuronal Pattern Generation (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 208. Research Discussion in Mammalian Molecular Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 210. Research Discussion in Virology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 211. Research Discussion in Developmental Cellular Neurobiology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 212. Research Discussion in Behavior and Development of Simple Nervous Systems (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 213. Research Discussion in Golgi Structure and Function (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 214. Research Discussion in Development and Function of the Immune System (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 215. Research Discussion in Lymphocyte Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 216. Research Discussion in Molecular and Cell Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 218. Research Discussion in Plant Molecular Genetics (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 219. Research Discussion in Molecular Biophysics (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 220. Research Discussion in Advanced Evolutionary Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 221. Research Discussion in Behavioral Ecology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 222. Research Discussion in Evolutionary Molecular Ecology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 223. Research Discussion in Ecology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 224. Research Discussion in Plant Population Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 225. Research Discussion in Genetic Variation (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 226. Research Discussion in Conservation Genetics (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 227. Research Discussion in Intracellular Signalling (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 228. Research Discussion in Drosophila Developmental Biology (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGRD 230. Research Discussion in Cell Signalling Pathways (I)  
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. PREREQUISITE: none for graduate students. Undergraduates must be seniors or enrolled in BSP 199. (S/U grades only)

BGDR 231. Research Discussion in Nuclear Transport and Function (1)
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.)

BGDR 232. Research Discussion in Chromatin and Transcription Regulation (1)
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.)

BGDR 233. Research Discussion in Cell Cycle Motility (1)
Presentations of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.)

BGDR 234. Research Discussion in Cell Signalling in Drosophila (3)
Presentation of new research results and discussions of closely related published reports. All students are expected to report on their own research findings each quarter. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.)

BGSE 200. Seminar in Biology (1)
Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (FWS)

BGSE 201. Seminar in Molecular Biology (1)
Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (FWS)

BGSE 202. Seminar in Immunology (1)
Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (FWS)

BGSE 203. Seminar in Population Biology (1)
Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (FWS)

BGSE 204. Seminar in Developmental Genetics (1)
Invited speakers from the U.S. and abroad, who are leaders in various aspects of biological research, describe their current research. **PREREQUISITE:** none for graduate students. Undergraduates must be seniors or enrolled in BISP 199. (S/U grades only.) (FWS)

BGSE 205. Graduate Research Seminar (1)
Discussions of recent research in various aspects of biological research conducted by third- and fourth-year doctoral students in the Division of Biological Sciences. (S/U grades only.) (FWS)
THE GRADUATE PROGRAM

The graduate program offered by the Group in Biomedical Sciences (BMS) is designed to lead to the Ph.D. in biomedical sciences. Students prepare for his/her thesis research, using analysis of selected topics in biomedical research, in addition to being exposed to original research articles and critical evaluation. The course progresses through five examinations, The first examination, the written research proposal and defense the proposal. The second examination takes place after the students finalize their preparation for his/her thesis research. Preparation for the Research Proposal Exam begins as soon as students join their thesis laboratories during the first summer quarter in the program. Students prepare a written research proposal and defend the proposal in an oral examination conducted by a program-approved exam committee. The second examination that determines the Advancement to Ph.D. candidacy takes place after the students finalize their thesis research plan, and should be completed by the end of the second summer quarter. Thereafter, the students' thesis research progress is reviewed annually by the thesis committee. The thesis committee also approves the final dissertation. The students' thesis research progress is reviewed annually by the thesis committee. The thesis committee also approves the final dissertation. After the preparation of the dissertation, a public oral defense of the thesis completes the requirement for the Ph.D. in biomedical sciences.

DOCTORAL DEGREE PROGRAM

During the first year, the students enroll in two core courses and specialized track courses in cell biology, molecular biology, pathology, pharmacology, physiology, genetics, and microbiology/immunology. In a required laboratory rotation program, students develop laboratory skills and the ability to formulate scientific hypotheses and become familiar with the research activities of the faculty. Students may differentiate into one of six advanced training tracks: genetics, microbiology/immunology, cell biology, molecular pathology, molecular pharmacology, or physiology. Students can also associate with a number of focus groups in Cancer Biology, Stem Cell Biology, Developmental Biology, Bioinformatics, Neurobiology, Endocrinology, Glycobiology, and Structural-Chemical Biology. Required advanced courses and electives in subsequent years are chosen to develop students' interests and specialized knowledge in the thesis research area and chosen training tracks. BMS students are required to select their thesis advisors and begin their thesis research in their thesis laboratories. The second exam committee also approves the final dissertation. After the preparation of the dissertation, a public oral defense of the thesis completes the requirement for the Ph.D. in biomedical sciences.

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

200A. Molecules to Organisms: Concepts (6)
This course provides a systematic approach to current biomedical research, using analysis of selected topics to focus on the process of research discovery and its critical evaluation. The course progresses through five thematic modules that cover genes, building a cell, cellular responses, organogenesis, and the processes that allow survival in the world. Prerequisite: limited to BMS graduate students except by consent of instructor.

200B. Molecules to Organisms: Approaches (2)
Students will critically evaluate classic and current research papers in biomedical research, in addition to being exposed to state-of-the-art technologies in research. Prerequisite: limited to BMS graduate students except by consent of instructor.
201. Seminars in Biomedical Research (4)
This course includes attendance at seminars in the biomedical sciences and is designed to provoke critical discussion of cutting-edge biomedical and scientific approaches in a small-group setting. PREREQUISITE: Limited to BMS graduate students except by consent of instructor.

202. Carcinogenesis (3)
This elective will explore carcinogenesis at cellular, molecular, and etiological levels. Guided by faculty, students will research and present papers and principles underlying the biology, genetics, and molecular biology, and computer-assisted aspects of several assigned topics. PREREQUISITES: Equivalent background in biology and chemistry. May be concurrent in biology, chemistry plus cell biology, biochemistry, molecular biology. Corequisites as above.

204. Evolution of Modern Concepts in Pharmacology (3)
This course details the evolution of modern principles of pharmacology from first evidences to the present level of knowledge. The course will be independent of but complement general principles of pharmacology courses for medical and graduate students. PREREQUISITE: prior or concurrent Principles of Pharmacology, or equivalent course.

219. Ethics in Scientific Research (1)
Overview of ethical issues in scientific research, conflicts of interest; national, statewide and campus issues and requirement; ethics in research; authorship, retention of research records; tracing of research records; attribution; plagiarism; copyright considerations; primary, archival and meeting summary publications; ethical procedures and policies; NIH, NSF, California and UCSD; case studies and precedents in ethics. PREREQUISITE: consent of instructor.

222. Essentials of Glycobiology (2)
Advanced elective for graduate medical students who have had core courses in cell biology or biochemistry. Expert faculty will present a coordinated overview of the field of glycobiology, which explores the structure, synthesis, and functions of sugar chains in biological systems.

224. Topics in Cancer Research (2)
Each quarter will focus on an important area of cancer research such as immunology (fall), growth regulation (winter), and cancer genetics (spring). One-hour lecture coordinated with a one-hour seminar with the opportunity to meet with the invited speaker. PREREQUISITE: limited to senior undergraduates, graduate students, and medical students. (W, S)

226. Hormone Action (3)
The course covers recent advances in research into hormone action, molecular endocrinology, lipid, lipoprotein, and carbohydrate metabolism, and reproductive medicine. PREREQUISITES: BIOM 200, 201. Limited to BMS graduate students, except by consent of instructor.

228. Modern Drug Discovery Technologies (2)
Drug discovery and screening science available to academic investigators. This course provides an overview of these drug discovery techniques, including high-throughput screening, cell-based screening, computational methods of lead compound discovery, and chemical methods of optimization. PREREQUISITE: Graduate student status or consent of graduate program director.

229. Methods in Pharmacology (3)
A combination of lecture and lab exercises presented by the faculty of the Group in Biomedical Sciences, designed to introduce biomedical science graduate students to the essential research tools employed in molecular and cellular pharmacology. PREREQUISITES: BIOM 212, OP, CBB, biochemistry, molecular biology, biomedical sciences or consent of instructor. (S)

230. Structural and Quantitative Pharmacology (4)
This course is essentially biophysical pharmacology. Two-thirds will be didactic, covering protein structure, thermodynamics, ligand binding, enzyme kinetics, biophysical methods, visualization of structures/docking, mathematical analysis of data. The last section will involve student presentations of original biophysical pharmacology. PREREQUISITE: knowledge of graduate or undergraduate biochemistry is recommended.

231. Contemporary Topics in Pharmacology (2)
A selection of short courses in the biomedical and pharmacological sciences offered by resident experts. Topics will last one to two weeks, meeting five hours a week. PREREQUISITE: consent of instructor. (F, W, S)

232. In vivo Cellular and Molecular Imaging (1)
Strategies such as positron emission tomography, magnetic resonance imaging, and ultrasound for nondestructive imaging molecular and cell biological events inside living organisms and eventually human patients. Emphasis on detecting angiogenesis, apoptosis, and expression of tumor-specific genes. PREREQUISITES: upper-division or graduate courses in molecular and cell biology.

233. Molecular Biology of Human Retroviruses (3)
Replication cycle and gene regulation of HIV. Molecular approaches to therapy and vaccines. PREREQUISITE: undergraduates lower-division courses in BIMM 100.

234. Practical Histopathology and Mouse Models of Human Diseases (2)
The course is designed to introduce and reintroduce histology and histopathology of the various organ systems to those who need to analyze mouse tissues as an essential part of their research. PREREQUISITE: standard undergraduate biology courses.

235. Pharmacogenomics (3)
The pharmacogenetics course is designed to introduce graduate students, medical students, and pharmacy students to this emerging area of interest, including how heritable mechanisms influence drug responses in humans. The lectures, examples, discussions, and journal presentations will provide the students with a working knowledge of the domains of pharmacology, how heredity influences any response traits, and the ways that advances in genome technologies support our emerging understanding of how polymorphic genetic variants determine inter-individual differences in drug responses. The course will include lectures, discussions, and journal article presentations by students. PREREQUISITE: admission to a UCSD graduate program, School of Pharmacy, or School of Pharmacy and Pharmaceutical Sciences.

240. Critical Reading in Cell Biology (3)
This course will focus on critical reading and understanding current areas in cell and molecular biology. The exact topic will vary, but will include such topics as protein trafficking, cell division, intracellular movement, cell interaction, and cell cycle.

242. Seminar in Genetics (1)
Intended for graduate students interested in principles of classical and molecular genetics. Will attend weekly genetics seminar and participate in didactic/discussion preparatory session. PREREQUISITE: consent of instructor.

246. Current Literature in Glycobiology (1)
Informal presentations on topics of current interest in glycobiology as representing fund in the current scientific literature. PREREQUISITE: consent of instructor.

252. Genetics and Genomics (3)
This course will examine the basic principles of genetics and genomics. We will focus on classic discoveries and examples of approaches to current experimental problems. Emphasis areas will vary but will include genes and genomics, chromosome biology and nuclear structure, transcriptional regulation, RNA processing, cell cycle, growth control and death, cell differentiation and stem cell biology, molecular motors and motility, membrane trafficking and signaling. PREREQUISITES: BIOM 200, 201. Limited to BMS graduate students except by consent of instructor.

255. Drugs and Disease (3)
Examines physiological and pathological basis for diseases by exploring normal and dysregulated molecular mechanisms controlling tissue and organ functions. Considers how alterations can be translated into therapeutic interventions and probe unexplored questions regarding human disease etiology and novel drug targets. PREREQUISITES: BIMA 204A-5, 201. Limited to BMS graduate students except by consent of instructor.

260. Immune Regulation (3)
This course will cover most of today’s key aspects in the organization and dynamics of the immune system and its regulation. It will provide students with a basis for understanding physiology and immunology of the immune system in normal and pathological states. PREREQUISITES: core courses in Biomedical Sciences Ph.D. Program, or consent of instructor.

262. Neurophysiology (4)
An overview of neurophysiological systems, emphasizing mammalian neurophysiology and related model vertebrate systems and concepts. (W)

264. Molecular and Cellular Basis of Disease (2)
Lectures on the molecular and cellular mechanisms of pathogenesis. Topics will include Alzheimer’s disease, cell surface and nuclear receptors in disease, signal transduction by oncogenes in cancer cells, AIDS, human diseases affecting glycosylation pathways, rheumatoid arthritis, and arteriosclerosis. PREREQUISITE: graduate students. (W)

266. Environmental and Molecular Toxicology (4)
Course includes attendance at seminars in genetics and is designed to provoke critical discussion of the presented findings and scientific approaches in small group setting. PREREQUISITE: limited to BMS graduate students except by consent of instructor.

272. Seminars in Genetics (2)
This course includes attendance at seminars in genetics and is designed to provoke critical discussion of the presented findings and scientific approaches in a small group setting. PREREQUISITE: limited to BMS graduate students except by consent of instructor.

273. Seminars in Microbiology (2)
This course includes attendance at seminars in microbiology and is designed to provoke critical discussion of the presented findings and scientific approaches in a small group setting. PREREQUISITE: limited to BMS graduate students except by consent of instructor.

274. Seminars in Molecular and Cell Biology (2)
This course includes attendance at seminars in molecular and cell biology and is designed to provoke critical discussion of the presented findings and scientific approaches in a small group setting. PREREQUISITE: limited to BMS graduate students except by consent of instructor.
283 Supramolecular Structure Determination Laboratory (4)
A laboratory-style course combining hands-on mass spectrometry and bioinformatics tools to explore the relationship between structure and function in macromolecules. Tools for peptide sequencing, analysis of post-translational modifications, and fragmentation analysis by mass spectrometry are examples of experiments students will run. (F,W,S)
PREREQUISITE: consent of instructor.

285. Statistical Inference in the Medical Sciences (2)
An introduction to basic techniques used in biomedical literature: t-tests, ANOVA, chi-square, linear and nonlinear regression. Emphasis will be on understanding the appropriate use and interpretation of the tests, rather than on the calculations.

287. Tissue Engineering Laboratory (4)
Students will learn to conduct tissue engineering and developmental biology experiments, microfabricate cell culture systems, engineer biopolymer materials, and develop and analyze quantitative models of transport, cell fate, and growth mechanics. The understanding and manipulation of multi-cellular processes that comprise development and growth involves specialized areas of biomechanics, developmental biology, biomaterials, and the tools of molecular biology, as well as the integration of theory and experiment. To fabricate functional tissues, it is important to establish underlying molecular and physical mechanisms, and then control and integrate these. (F,W,S)
PREREQUISITE: consent of instructor.

294. Pharmacology and Molecular Biology Journal Club (0-1)
Current literature in molecular pharmacology and molecular biology is reviewed. Two papers are chosen per week for oral presentation by students. Faculty critique the student presentations. PREREQUISITE: enrollment in Ph.D. program at year two and above. (F,W,S)

295. Pharmacology Research Discussions (0-1)
Student, faculty, and fellow discussion groups on research projects. Students are expected to present research findings to fellows, other Ph.D. students, and faculty. Written critiques are provided by the faculty. PREREQUISITE: completion of minor proposition examination and two years of graduate work. (F,W,S)

296. Directed Reading (1-4)
Reading of special topics under the direction of a faculty member. Exact subject matter to be arranged in individual cases. PREREQUISITE: consent of instructor.

297. Progress in Signal Transduction (1)
Papers describing recent progress in signal transduction from the cell-surface to the nucleus will be chosen from recent research literature. Two papers will be discussed and critiqued in detail each week for one hour. PREREQUISITE: graduate-level biochemistry, cell biology, and molecular biology; registered as second-year and above graduate student in biomedical sciences, biology, or chemistry. (F,W,S)

298. Directed Study (1-12)
Reading and laboratory study of special topics under the direction of a faculty member. Exact subject matter to be arranged in individual cases. (F,W,S)

299. Independent Study or Research (1-12)
Independent study or research. PREREQUISITE: consent of instructor. (F,W,S)

K. Wayne Yang, Ethnic Studies
Elena Zilberg, Communication

THE MINOR

The California cultures in comparative perspective minor allows students to better understand California’s place in the global community and in history. Students can learn about the impact of language, immigration, market forces, the arts, politics and culture, music, and globalization in the past, present, and future of California. The California cultures minor will be a core component in a broader, cutting-edge interdisciplinary program that encourages research, teaching, and collaboration among faculty, students, and the public to explore the broad implications of the history and current growth of the state of California’s immigrant and ethnic populations. This minor is a university-wide interdisciplinary initiative integrating faculty across a range of departments who all share a common focus on the people, economies, and cultures of California.

The minor in California cultures in comparative perspective is administered by the program director. The minor helps students prepare for careers in the legal, governmental, corporate, and nonprofit sectors that service socially, culturally, and economically diverse populations. The minor concentration in California cultures would also allow undergraduate students to enroll in courses focusing on racial/ethnic populations in the United States and the border region, from departments across the social sciences and humanities.

MINOR REQUIREMENTS

California cultures minor requirements include lower- and upper-division courses from departments in the social sciences and the arts and humanities. Alternatively, minor requirements may be fulfilled with course work in conjunction with internships at local and community-based organizations. Requirements are as follows:

Students will be required to take one lower-division course from the following list. These courses will provide them with background on California cultures and race/ethnicity in the U.S.

Anthropology 23: Debating Multiculturalism: Race, Ethnicity, and Class in American Societies (4)

Ethnic Studies 1A. Introduction to Ethnic Studies: Population Histories of the United States (4)

Ethnic Studies 1B. Introduction to Ethnic Studies: Immigration and Assimilation in American Life (4)

Ethnic Studies 1C. Introduction to Ethnic Studies: Race and Ethnic Relations in the United States (4)

History LD 7A. Race and Ethnicity in the United States (4)

History LD 7B. Race and Ethnicity in the United States (4)

History LD 7C. Race and Ethnicity in the United States (4)

Urban Studies and Planning 3. The City and Social Theory (4)

Students will be required to take one upper-division course (HSUS 114. California History or ETHN 118. Contemporary Immigration Issues).
Track 1: Additional Course Work

Students can choose to take five additional courses from the following list, four of which must be upper-division. These courses generally provide students with in-depth coverage of specialized topics in California cultures and/or race, immigration, urban studies. They may not take more than three courses from any one department.

Communication 114. Bilingual Communication (4)
Communication 115. Education and Global Citizenship (4)

Critical Gender Studies 2A. Introduction to Critical Gender Studies. Social Movements (4)
Economics 135/USP 102. Urban Economics (4)
Ethnic Studies 1A. Introduction to Ethnic Studies. Population Histories of the United States (4) (if not taken as a required course above)
Ethnic Studies 1B. Introduction to Ethnic Studies. Immigration and the Transformation of American Life (4) (if not taken as a required course above)
Ethnic Studies 1C. Introduction to Ethnic Studies. Race and Ethnic Relations in the United States (4) (if not taken as a required course above)
Ethnic Studies 109. Race and Social Movements (4)
Ethnic Studies 111. Native American Literature (4)
Ethnic Studies 116. The United States-Mexico Border in Comparative Perspective. (4)
Ethnic Studies 118. Contemporary Immigration Issues (4)
Ethnic Studies 121. Contemporary Asian-American History (4)
Ethnic Studies 123. Asian-American Politics (4)
Ethnic Studies 129. Asian and Latina Immigrant Workers in the Global Economy (4)
Ethnic Studies 130. Social and Economic History of the Southwest I (4)
Ethnic Studies 132. Chicano Dramatic Literature (4)
Ethnic Studies 136. Topics in Chicano/a-Latino/a Cultures (4)

Ethnic Studies 148. Latino/a and Chicano/a Literature (4)
Ethnic Studies 144. Bilingual Communities in the USA (4)
Ethnic Studies 149. African American History in the 20th Century (4)
Ethnic Studies 161. Black Politics and Protest since 1941 (4)
Ethnic Studies 164. African Americans and the Mass Media (4)
Ethnic Studies 168. Comparative Ethnic Literature (4)

History 108/ETH 112A. History of Native Americans in the United States (4)
History 114. California History (4)

History 117. History of Los Angeles (4)
History 124. Asian-American History (4)
History 158. Social and Economic History of the Southwest I (4)
History 159. Social and Economic History of the Southwest II (4)
History 180. Immigration and Ethnicity in Modern American Society (4)

Literature 28. Introduction to Asian American Literature. Race and Modernity (4)
Music 13AM. World Music/Multicultural America (4)
Political Sci 100H. Race and Ethnicity in American Politics (4)
Poli Sci 100J. Race in American Political Development (4)
Poli Sci 150A. Politics of Immigration (4)
Sociology B 114. Culture and Ethnicity (4)
Sociology O 151. Comparative Race and Ethnic Relations (4)

Theater/History 110. Chicano Dramatic Literature (4)
Urban Studies and Planning 105/SOC 153. Urban Sociology (4)
Urban Studies and Planning 107/POLI 102E. Urban Politics (4)
Urban Studies and Planning 109/POLI 103A. California Government and Politics (4)

Urban Studies and Planning 136/SOC 148M. Labor Market Inequality in Los Angeles and the Border Region (4)
Urban Studies and Planning 165. History of the American Suburb (4)
Urban Studies and Planning 166. History of San Diego (4)
Urban Studies and Planning 171. Sustainable Development (4)

Visual Arts 126CN. Art of the North American Indians (4)
Visual Arts 126DN. African and Afro-American Art (4)

Track 2: Internship Opportunities

Students who choose Track 2 will be able to gain a greater depth of knowledge and appreciation for the California cultures curriculum by applying themselves in an academic or community-based setting. The California cultures in comparative perspective staff has established relationships with several institutions and organizations on and off campus in the San Diego area and other parts of the state, to provide undergraduates firsthand experience at applying themselves and engaging in collaborative efforts and service with a network of practitioners. Internships are to be arranged by the Academic Internship Program for up to eight units. The remaining units needed to complete the internship track will consist of upper-division courses from the list under Track 1.

Chair’s Office: 2040 Urey Hall Addition (858) 534-3575 http://www-chem.ucsd.edu

CHEMISTRY AND BIOCHEMISTRY 185
INTRODUCTION

The UCSD Department of Chemistry and Biochemistry was founded in the 1950s by the late Professor Harold Urey and a group of colleagues who strove to create a department that would stress the fundamentals of chemistry and, at the same time, embrace diverse applications of those principles at the frontiers of knowledge. Degrees offered include:

Biochemistry
- B.S. Biochemistry/Chemistry
- M.S. Chemistry
- Ph.D. Chemistry
- Ph.D. Chemistry with specialization in bioinformatics

Chemistry
- B.A. Environmental Chemistry
- B.S. Biochemistry/Chemistry
- B.S. Bioinformatics from the Department of Chemistry and Biochemistry
- B.S. Chemical Education
- B.S. Chemical Physics
- B.S. Chemistry
- B.S. Chemistry/Earth Sciences
- B.S. Environmental Chemistry
- B.S. Molecular Synthesis
- B.S. Pharmacological Chemistry
- M.S. Chemistry
- Ph.D. Chemistry
- Ph.D. Chemistry with specialization in bioinformatics
- Ph.D. Chemistry with specialization in computational science

GENERAL CHEMISTRY

The General Chemistry Chem. 6 sequence (6A-B-C) is intended for science and engineering majors as well as others who need a quantitative course. It satisfies all preprofessional programs. Chem. 4 is a one-quarter preparation for 6A, which should be taken only by those whose college advisor so recommends. The Honors General Chemistry sequence (6AH-6BH-6CH) is designed for science and engineering majors with strong preparation in science and mathematics. A student intending to major in chemistry can thus begin with 4, 6A, or 6AH depending on the level of preparation. A student intending to major in a discipline other than chemistry should consult his or her advisor in the appropriate department to determine which chemistry course is recommended.

Chem. 11, 12, 13 is a terminal sequence for non-science/non-engineering majors. Chem. 15 is a one-quarter survey course suitable for non-science majors. Students should check with their college advisor to determine applicability toward general-education requirements.

GENERAL INFORMATION ON UNDERGRADUATE MAJOR PROGRAMS

The minimum passing grade is a D, though students may not graduate with more than one D grade in upper-division required course work and must maintain a minimum of a 2.0 GPA in the major. All courses for the major, except for independent research (Chem. 195, 196, and 199) and chemistry instruction (Chem. 195), must be taken on a P/NP basis. All upper-division required course work and must maintain a minimum of a 2.0 GPA. A student may not graduate with more than one D grade in any science major, including transfer students, must complete forty-eight units of upper-division chemistry course work at UCSD and fulfill the campus senior residency requirement. In addition to the requirements, Math. 20F (required for chemical physics majors) and a course in computer programming are also recommended.

Any departure from the requirements outlined below must be approved by petition. This applies to lower- and upper-division requirements. The suggested programs following each of the major descriptions are only examples. All undergraduate degree programs, unless otherwise noted, are certified by the American Chemical Society.

BIOCHEMISTRY/CHEMISTRY MAJOR

The Biochemistry/Cheistry major deals with the chemical processes in living organisms, including structure and function of nucleic acids and proteins. It is suitable for those planning to go to graduate...
school as well as medical, dental, veterinary, and other professional schools. It is also suitable at the bachelor’s level for jobs in the biotechnology or pharmaceutical field.

The following courses must be taken for a letter grade:

**LOWER-DIVISION REQUIREMENTS**

1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-2B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

**UPPER-DIVISION REQUIREMENTS**

1. Three quarters of organic chemistry (Chem. 112A-112B).
2. Two quarters of physical chemistry (Chem. 126-127 required; 131–133 acceptable).
3. One quarter of inorganic chemistry (Chem. 120A).
4. Three quarters of biochemistry (Chem. 114A-C).
5. Six laboratory courses (Chem. 100A, 143AH or 143A, 143B, 105A, either 112A or 112B and one additional chemistry lab from the following: Chem. 100B-8L, 105B, 112A or 112B, 123, 143C, or 143D).
6. Two elective courses from the following list:

7. One additional elective course chosen from among all of the upper-division and graduate courses offered by the Department of Chemistry and Biochemistry (except non-letter-graded courses) or from the following list of courses offered by the Department of Biology (some biology courses will require additional course work to fulfill prerequisites): BICD 100, BICD 110, BICD 140, BIMM 114, BIMM 120, BIPN 100, BIPN 102, BIPN 140. Other electives may be arranged by petition.

**SUGGESTED PROGRAM FOR BIOCHEMISTRY/BIOLOGY B.S. MAJOR**

Many courses have enforced prerequisites or are offered once per year.

**FALL**  |  **WINTER**  |  **SPRING**
--- | --- | ---
**FRESHMAN YEAR**
Chem. 6A  |  Chem. 6B  |  Chem. 6C
Math. 20A  |  Math. 20B  |  Chem. 6BL
   |  BILD 1*  |  Math. 20C

**SOPHOMORE YEAR**
Chem. 100A  |  Chem. 140B  |  Chem. 140C
Chem. 140A  |  Chem. 143AH  |  Chem. 143B
Math. 20D  |  Phys. 2B  |  Phys. 2D
Phys. 2A

**JUNIOR YEAR**
Chem. 114A  |  Chem. 114B  |  Chem. 105A
Chem. 126  |  Chem. 127  |  Chem. 114C
Phys. 2CL

        |  Elective  |  Elective

*Recommended, but not required.
** One of these must be Chem. 112A or 112B.

**BIOINFORMATICS MAJOR FROM THE DEPARTMENT OF CHEMISTRY AND BIOCHEMISTRY**

Also see the program information listed under Bioinformatics in the catalog.

The Bioinformatics major offers a rigorous, interdisciplinary training in the new and rapidly evolving field of bioinformatics with a strong focus on chemistry and biochemistry. Bioinformatics is the field of advanced computational and experimental methods that model the flow of information (genetic, metabolic, and regulatory) in living systems to provide an integrated understanding of the systems properties of model organisms. This is a new and rapidly evolving field in which large volumes of both qualitative and quantitative data will accrue at an increasing pace, and the bioinformatician must have a substantial mastery of both the sciences and engineering. This interdisciplinary specialization will be offered jointly with computer science and engineering, bioengineering, and biological sciences, each with its own set of requirements and electives. The program offered by the Department of Chemistry and Biochemistry is aimed at a student interested in applying and developing tools of bioinformatics for the study of chemical processes in biological systems.

**ADMISSION TO THE BIOINFORMATICS MAJOR**

Freshmen and transfer students are invited to declare to the Department of Chemistry and Biochemistry for a bioinformatics major. Starting fall 2008 the Department of Chemistry and Biochemistry has removed the “Impacted/Closed Status” and admission restrictions for freshmen and transfer applicants to the bioinformatics major. This means the Department of Chemistry and Biochemistry will accept all students that apply to the B.S. Bioinformatics major and are admitted by the UC San Diego Admissions Office.

Furthermore, freshmen and transfer students that start at UC San Diego as undeclared or another major may also switch into the B.S. Bioinformatics major in the Department of Chemistry and Biochemistry (major code CH37), via the Major/Minor link under Tools at http://tritonlink.ucsd.edu to make this change.

It is strongly recommended that students meet with an advisor in the Department of Chemistry and Biochemistry to discuss requirements for the Bioinformatics Program.

**LOWER-DIVISION REQUIREMENTS**

1. Calculus and linear algebra (Math. 20A-20C, 20F)
2. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL).
3. Physics (Phys. 2A-B)
4. Biology (BILD 1-2)
5. Computer programming (CSE 11-12)
6. Mathematics for algorithm and systems (CSE 21/ Math. 15B)
7. Bioinformatics seminar (BILD 94)

The department recommends that students complete an introductory C programming course before taking CSE 11 and CSE 12, either in their first year or during the summer between their first and second years.

**UPPER-DIVISION REQUIREMENTS**

1. Two quarters of organic chemistry (Chem. 140A-B)
2. Organic chemistry (Chem. 140C) or structural biochemistry (Chem. 114A)
3. Metabolic biochemistry (Chem. 114B)
4. Physical chemistry (Chem. 127 accepted, Chem. 131 and 132 recommended)
5. Molecular and cellular biochemistry (Chem. 114D)
6. Two quarters of biochemistry laboratory (Chem. 112A-112B)
7. Genetics (BICD 100)
8. Cell biology (BICD 110)
9. Two computer science courses (CSE 100 or Math. 176; and CSE 101 or Math. 188)
10. Two additional upper-division electives offered by the Department of Chemistry and Biochemistry (each course must be at least four units) with only one quarter of credit allowed for any given course. Recommended courses are: Chem. 100A, 115, 118, and 143A.

The bioinformatics series comprising the following courses:
11. Molecular sequence analysis (BIMM 181 or CSE 181 or BENG 181)
12. Biological databases (Chem. 182 or BIMM 182 or CSE 182 or BENG 182)
13. Applied genomic technologies (BENG 183)
14. Computational molecular biology (BIMM 184 or CSE 184 or BENG 184 or Chem. 184)
15. Bioinformatics lab (BIMM 185)
16. Probability and statistics (Math. 186)

**SUGGESTED PROGRAM FOR THE BIOINFORMATICS B.S. FROM THE DEPARTMENT OF CHEMISTRY AND BIOCHEMISTRY**

Many courses have enforced prerequisites or are offered once per year.

**FALL**  |  **WINTER**  |  **SPRING**
--- | --- | ---
**FRESHMAN YEAR**

   |  Math. 20B  |  Chem. 6BL
   |  BILD 94  | 
CHEMICAL EDUCATION MAJOR

The Chemical Education major offers an excellent preparation for teaching physical science in secondary schools, including chemistry, physics, earth science, biology, and mathematics.

The chemical education program is sufficiently intensive that students with this degree should be admissible as graduate students in chemistry, biochemistry, and teacher education programs at most universities. This program is also excellent preparation for students interested in a career in science writing.

The program is basically a chemistry major with earth science and biochemistry as electives, combined with three courses from Education Studies.

If you are interested in earning a California teaching credential through UCSD, contact Education Studies for information about the prerequisite and professional preparation requirements. It is recommended that you contact Education Studies as early as possible in your academic career.

The following courses must be taken for a letter grade:

LOWER-DIVISION REQUIREMENTS
1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).
4. Biology (BILD 1).
5. Earth Science (SIO 50).

UPPER-DIVISION REQUIREMENTS
1. Three quarters of organic chemistry (Chem. 140A-C).
2. Two quarters of physical chemistry (Chem. 126-127 recommended; 131-133 acceptable).
3. One quarter of inorganic chemistry (Chem. 120A).
4. One quarter of biochemistry (Chem. 114A).
5. Six laboratory courses (Chem. 100A, 143AH or 143A, 143B, 105A, and two of the following: 100B-BL, 105B, 112A, 112B, 123, 143C, or 143D).
6. One additional elective course chosen from among all of the upper-division and graduate courses offered by the Department of Chemistry and Biochemistry (except non-letter graded courses).
7. One earth science course (SIO 102 or 103). Other biology or chemistry courses may be arranged by petition.
8. Chem. 195, 196, or 199. Chem. 195 is recommended.
9. EDS 129A-B-C.

SUGGESTED PROGRAM FOR CHEMICAL EDUCATION B.S. MAJOR

Many courses have enforced prerequisites or are offered once per year.

FALL WINTER SPRING

FRESHMAN YEAR
Chem. 6A Chem. 6B Chem. 6C
Math. 20A BILD 1 Chem. 6BL

Chem. 140A Chem. 143AH Chem. 143B
Math. 20D Phys. 2B Phys. 2D
Phys. 2A

JUNIOR YEAR
Chem. 126 Chem. 127 Phys. 2CL
SIO 50 Elective Lab
SIO 102/103 Elective

SENIOR YEAR
Chem. 114A Chem. 105A Elective Lab
Chem. 120A Chem. 195/196/199 EDS 129A
EDS 129A EDS 129B EDS 129C

CHEMICAL PHYSICS MAJOR

The Chemical Physics major applies the concepts and quantitative methods of physics to the descriptions of atoms and molecules, analyzes matter as a statistical assembly of molecular building blocks, and develops and exploits physical (largely spectroscopic), experimental tools with which to test and refine such theories.

The chemical physics major is designed as a preparation for graduate work in chemistry, physics, or other interdisciplinary areas.

The following courses must be taken for a letter grade:

LOWER-DIVISION REQUIREMENTS
1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus and linear algebra (Math. 20A-F, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended).

It is recommended that the above requirements be completed by the end of the sophomore year.

UPPER-DIVISION REQUIREMENTS
1. Two quarters of organic chemistry (Chem. 140A-B).
2. One year of physical chemistry (Chem. 131-133).
3. Two quarters of inorganic chemistry (Chem. 120A-B). Chem. 114A can substitute for Chem. 120B.
4. Six upper-division chemistry labs: Chem. 100A, 100B-BL, 143AH or 143A, 143B or 143C, 105A and one of the following: 105B, 112A, 112B, 123, 143B, 143C, or 143D.
5. Molecular spectroscopy (Chem. 135).
7. Two quarters of physics (Phys. 110A-B, or Phys. 100A-B).
8. One additional course in physical chemistry or related areas as approved by the department. Chem. 199 may be petitioned.

SUGGESTED PROGRAM FOR CHEMICAL PHYSICS B.S. MAJOR

Many courses have enforced prerequisites or are offered once per year.

CHEMISTRY MAJOR

The Chemistry major provides a broad introduction for the biochemistry, organic, physical, or inorganic student as well as those who prefer not to specialize. This major will enable a student to pursue further studies in chemistry or in related fields of science, medicine, or engineering.

The following courses must be taken for a letter grade:
LOWERING DIVISION REQUIREMENTS
1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

Upper-Division Requirements
1. Three quarters of organic chemistry (Chem. 140A-C).
2. Three quarters of physical chemistry (Chem. 131-133).
3. Two quarters of inorganic chemistry Chem. (120A-B).
4. One quarter of biochemistry (Chem. 114A).
5. Six laboratory courses (Chem. 100A, 143AH or 143A, 143B, 105A and two of the following: Chem. 100B-BL, 105B, 112A, 112B, 123, 143C, or 143D).
6. Three additional four-unit upper-division or graduate courses in chemistry and biochemistry or related areas. One of Chem. 195 or 199 may be petitioned.

SUGGESTED PROGRAM FOR CHEMISTRY B.S. MAJOR
Many courses have enforced prerequisites or are offered once per year.

CHEMISTRY/ EARTH SCIENCES MAJOR
The Chemistry/Earth Sciences major is available in cooperation with UCSD’s Scripps Institution of Oceanography. It requires course work for a major in chemistry, plus additional courses in earth sciences. It will appeal to students who plan to go on to graduate school in related fields, or to those students who plan to go into professional earth sciences careers with their undergraduate degree.
The following courses must be taken for a letter grade:

LOWERING DIVISION REQUIREMENTS
1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

Upper-Division Requirements
1. Two quarters of organic chemistry (Chem. 140A-B).
2. Three quarters of physical chemistry (Chem. 131-133).
3. Two quarters of inorganic chemistry (Chem. 120A-B). Chem. 114A can substitute for Chem. 120B.
4. Six upper-division labs: Chem. 100A, 100B-BL, 143AH or 143A, 105A, SIO 162, and one of the following: Chem. 105B, 112A, 112B, 123, 143B, 143C, or 143D.
5. Four Earth Sciences courses (SIO 100, 102, 103, and 120).
6. One additional course from the following list: SIO 252A, 259, 260, 261, SIO 251/SIO 155 or SIO 247, Chem. 149A, 149B, 173, 174/SIO 141. Petrology is essential for geology students. SIO 251/SIO 155 or SIO 247 should be taken by students planning to go on to graduate school or to go into professional earth sciences careers with their undergraduate degrees. Students are encouraged to take at least one quarter of Chem. 199.

SUGGESTED PROGRAM FOR CHEMISTRY/ EARTH SCIENCES B.S. MAJOR
Many courses have enforced prerequisites or are offered once per year.

ENVIRONMENTAL CHEMISTRY MAJOR
Students have the option of earning the B.A. or the B.S. in the Environmental Chemistry major. The B.S. is ACS certified and is recommended for those who intend to apply to graduate school.
The Environmental Chemistry major requires a strong chemistry background, but also includes breadth courses from other disciplines related to environmental concerns. The elective courses allow specialization in a secondary area of interest, such as economics, political science, biology, earth sciences, or additional chemistry.
The program is designed to prepare students to enter the industrial, governmental, or legal workforce, or to continue studies in the environmental sciences. Students fulfilling their elective requirements with chemistry and biochemistry courses would be prepared to attend most graduate schools in chemical sciences.
The following courses must be taken for a letter grade:

LOWERING DIVISION REQUIREMENTS
1. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and 6BL, or equivalent).
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics (Phys. 2A-B and 2D or equivalent). Phys. 2CL (or Phys. 2BL or 2DL) is required for a B.S. degree.

UPPER-DIVISION REQUIREMENTS
1. Two quarters of organic chemistry (Chem. 140A-B).
2. Two quarters of physical chemistry (Chem. 131-133).
3. One quarter of inorganic chemistry (Chem. 120A) or a third quarter of organic chemistry (Chem. 140C).
4. One quarter of biochemistry (Chem. 114A).
5. Three laboratory courses (Chem. 100A, 100B-BL, and 143AH or 143A).
6. Two quarters of environmental chemistry (Chem. 149A-B).
7. Atmospheric chemistry (Chem. 173).

ELECTIVE REQUIREMENTS
1. Four non-science elective courses chosen from the following list (at least one course must be upper-division): Econ. 1, Econ. 2, Econ. 3, Econ. 131, Econ. 132, Econ. 133, Econ. 145, H craz. 154, Phil. 148, Phil. 164, Poli. SCI 160A, Poli. SCI 160AB, Poli. SCI 162, Soc. 185, USP 2, USP 124, USP 144, USP 171. Environmental chemistry students must complete their elective requirements through course work and cannot substitute examination scores as Advanced Placement examinations for these courses.
2. Three science elective courses chosen from the following list (at least two courses must be upper-division): Chem. 105A, Chem. 105B, Chem. 112A,
SUGGESTED PROGRAM FOR ENVIRONMENTAL CHEMISTRY B.A. OR B.S. MAJOR (B.S. AND ACS CERTIFICATION REQUIRE ADDITIONAL COURSES)

Many courses have enforced prerequisites or are offered once per year.

**FRESHMAN YEAR**

*Chem. 140C may be substituted.

**MOLECULAR SYNTHESIS MAJOR**

The Molecular Synthesis major offers a thorough training in all aspects of the molecular synthesis of organic, inorganic, and biological substances, and with a fundamental understanding of their structure and reactivity. This major provides an excellent preparation for employment in biotechnology, diagnostic, electronic, and pharmaceutical enterprises as well as for graduate programs in organic, bioorganic, and inorganic chemistry.

The following courses must be taken for a letter grade:

**LOWER-DIVISION REQUIREMENTS**

1. General chemistry including laboratory (Chem. 6A-6C or 6AH-CH and 6BL, or equivalent)
2. Calculus (Math. 20A-D, or equivalent).
3. Calculus-based physics including laboratory (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL or 2DL. Phys. 2CL is recommended and is accessible without Phys. 2C).

**UPPER-DIVISION REQUIREMENTS**

1. Three quarters of organic chemistry (Chem. 140A-C)
2. Three quarters of physical chemistry (Chem. 131-133)
3. Two quarters of inorganic chemistry (Chem. 120A-B)
4. One quarter of biochemistry (Chem. 114A)
5. Six laboratory courses (Chem. 100A, 143A or 143AH, 143B, 143C, or 143D, 105A, and 123)
6. Synthetic methods (Chem. 152)
7. Structural or mechanistic organic chemistry (Chem. 154 or 156)
8. Polymer, bioorganic, or bioinorganic chemistry (Chem. 107 or 124 or 157)
9. One additional course from the following: Chem. 114B, 114C, 155, 185, or 199

**SUGGESTED PROGRAM FOR MOLECULAR SYNTHESIS B.S. MAJOR**

Many courses have enforced prerequisites or are offered once per year.

**FRESHMAN YEAR**
- Chem. 6A
- Math. 20A
- Phys. 2A

**SOPHOMORE YEAR**
- Chem. 100A
- Chem. 140A
- Math. 20D

**JUNIOR YEAR**
- Chem. 120A
- Chem. 149A
- Elective

**SENIOR YEAR**
- Chem. 114A
- Chem. 120A*

*Chem. 143D may be substituted.

**PHARMACOLOGICAL CHEMISTRY MAJOR**

The Pharmacological Chemistry major provides a strong background in chemistry and includes most courses required by California pharmacy schools. The major is intended primarily to prepare students for pharmacy school (Pharm.D.). Students fulfilling their elective requirements with appropriate courses would be prepared for graduate school to obtain a Ph.D. in pharmacology, biochemistry, or other areas of science. Degree recipients would also be prepared for most jobs in the biotechnology and chemical industries.

Pharmacological chemistry students are strongly encouraged to complete a full year of general chemistry and a full year of lower-division biology. As with some medical programs, some pharmacy programs may require a full year of these courses and may not accept tests such as the Advanced Placement exam to satisfy these requirements.

The following courses must be taken for a letter grade:

**LOWER-DIVISION REQUIREMENTS**

1. Biology (BILD 1, 2, and 3, and either BCD 101, 111, 131, or BIPN 105 or BIMM 121). Alternatively, a year of biology with laboratory at a community college may be petitioned.
2. General chemistry including laboratory (Chem. 6A-C or 6AH-CH, and Chem. 6BL, or equivalent).
3. Calculus-based physics including laboratory. (Phys. 2A-B and 2D or equivalent, and either 2BL, 2CL, or 2DL. Phys. 2CL is recommended and is usually the course required by pharmacy schools. It is accessible without Phys. 2C).
4. Calculus (Math. 20A-D, or equivalent).
5. Economics (Econ. 1 or 3 or equivalent).
6. Pharmacology seminar (Chem. 92).

Most California pharmacy schools require a course in public speaking for admission to the school. Students planning to apply to these programs should take Public Speaking—TDGE 25, or an appropriate course at a community college.

**UPPER-DIVISION REQUIREMENTS**

1. Two quarters of physical chemistry (Chem. 126-127 recommended; 131–133 acceptable).
2. Three quarters of organic chemistry (Chem. 140A-C).
3. Three quarters of biochemistry (Chem. 114A-B-C).
4. Four laboratory courses (Chem. 100A, 143AH or 143B, 143C and either 112A, 112B, or 143C).
5. One quarter of pharmacology and toxicology (Chem. 118).
6. One chemistry elective course chosen from among all the upper-division and graduate courses offered by the Department of Chemistry and Biochemistry (except non-letter graded courses).

If ACS certification is desired, Chem. 120A, plus two additional laboratory courses (Chem. 105A and a lab chosen from Chem. 100B–BL, 105B, 123, or 143C/112A/112B, if not already taken), are required. Any of these courses would satisfy #6. above.

**SUGGESTED PROGRAM FOR PHARMACOLOGICAL CHEMISTRY B.S. MAJOR (ACS CERTIFICATION REQUIRE ADDITIONAL COURSES)**

Many courses have enforced prerequisites or are offered once per year.

**FRESHMAN YEAR**
- Chem. 6A
- Math. 20A

**WINTER**
- Chem. 6B
- Math. 20B

**SPRING**
- Chem. 6C
- Math. 20C

* Chem. 112A or 112B may be substituted.
** BICD 101, 111, 131, or BIPN 105 or BIMM 121 (some have prerequisites that must be taken in an earlier quarter).

---

**HONORS PROGRAM**

The Department of Chemistry and Biochemistry offers an Honors Program to those students who have demonstrated excellence in any of the nine majors. Students are eligible for Departmental Honors at graduation when they have:

1. Achieved a GPA of 3.2 overall and 3.4 in chemistry courses.
2. Completed a minimum of eight units of Chem. 199, distributed over at least two quarters. A student who registers for 199 and subsequently fails to complete the Honors Program may apply up to four units to any major that normally allows 199 as elective credit. A student who has successfully petitioned to use a Chem 199 course to fulfill elective credit may not use that course to fulfill honors requirements as well.
3. Submitted a final honors research report to three UCSD faculty members, including their research advisor, for approval.
4. Presented an oral report about their research before a group of at least three faculty. This can be an undergraduate research conference or at a seminar involving honors students and faculty.

Students who are interested in the Honors Program should contact the Undergraduate Advising Office in 4010 York Hall, and are invited to do so at any time.

---

**EDUCATION ABROAD**

Majors are encouraged to explore the programs that allow students to study abroad or at other U.S. universities for a term or longer. See an advisor for details.

Chemistry and Biochemistry majors are encouraged to participate in the UC Education Abroad Program (EAP) and UCSD’s Opportunities Abroad Program (OAP). Subject to approval by our faculty, courses taken through EAP/OAP may be accepted for credit toward the major. Students interested in studying abroad should see a departmental program advisor to discuss appropriate courses and programs for their plan of study.

---

**MINOR PROGRAM IN CHEMISTRY AND BIOCHEMISTRY**

A typical minor in chemistry consists of three lower-division lecture courses and at least one laboratory course, followed by a minimum of five upper-division courses, including at least one laboratory course, focused in physical, inorganic, organic, environmental chemistry, or biochemistry. Lower-division course requirements may not be satisfied by advanced placement credit, though transfer units may be used to satisfy lower-division minor requirements.

Upper-division courses required by a student’s major may not be applied toward a minor.

Upper-division courses for the minor must be taken at UCSD in the Department of Chemistry and Biochemistry, and must be taken for a letter grade. The minimum overall GPA requirement for the minor is a 2.0.

---

**THE GRADUATE PROGRAMS**

Graduate students are accepted to the Department of Chemistry and Biochemistry for study toward Plan I (Thesis) and the Plan II (Comprehensive Examination) M.S. in chemistry, the Ph.D. in chemistry and the Ph.D. in chemistry with specialization in bioinformatics. Students interested in the bioinformatics specialization should contact the Student Affairs Office for more information.

**MASTER’S OF SCIENCE**

A Plan I (Thesis) M.S. in chemistry and a Plan II (Comprehensive Examination) M.S. in chemistry are offered.

*Admissions:* UCSD students are admitted for fall, winter, and spring quarter entrance; non-UCSD students are normally admitted for fall entrance only. Eligibility requirements for admission include a solid training in the chemical sciences based on the undergraduate record, a 3.0 GPA in chemistry courses completed, and a 3.0 overall GPA.

The GRE general test is required of all applicants. Foreign applicants must submit a TOEFL score; TWE scores are strongly recommended. Those who wish to apply to the Thesis Plan must have a letter of support from the proposed thesis advisor.

*Residency and Time to Degree:* Master’s students must register at UCSD for a minimum of three quarters, and complete at least twenty units per academic year. Full-time Comprehensive Examination Plan students can complete the degree in three quarters. Thesis Plan students typically take eighteen to twenty-four months to graduate.

*Relationship to Doctoral Program:* Master’s students who wish to continue their studies as doctoral students in chemistry and biochemistry must request to transfer to that program. Application materials are due mid-January and include current letters of recommendation, current UCSD transcript, and statement of purpose. Transfer is for fall quarter only.

---

**Plan I (Thesis)**

**Purpose:** To prepare students for research careers or for doctoral or professional studies; the emphasis is on research.

*Advancement to Candidacy:* A minimum of thirty-six units with an overall GPA of 3.0 must be completed. The majority of units taken are for thesis research (Chem. 299). At least eight units of graduate level chemistry courses must be completed for a letter grade. Four units of teaching apprenticeship are required (Chem. 500; see Doctoral Program, Teaching and Language Requirement sections). Contact the Student Affairs Office for full information.

*Thesis:* Students must give an oral presentation and defense of their thesis project to a Thesis Committee. A student graduates after the thesis has been defended and the written dissertation approved by his or her committee, department, and OGSR, and filed with the University Archivist. The Thesis Committee consists of at least three faculty: (1) the thesis advisor, (2) a faculty member from the Department of Chemistry and Biochemistry familiar with the student’s research area, and (3) a faculty member from either this or another department whose research is in an area different from that of the thesis.

**Plan II (Comprehensive Exam)**

**Purpose:** To prepare students for doctoral or professional studies, teaching at the community college or high school level, or sometimes career work in industry; the emphasis is on course work.

*Advancement to Candidacy:* A minimum of thirty-six units with an overall GPA of 3.0 must be completed. The majority of units taken are in letter-graded graduate chemistry courses. Four units of teaching apprenticeship are required (Chem. 500; see Doctoral Program, Teaching and Language Requirement sections). Four units of nonthesis research (Chem. 297) are allowed. Contact the Student Affairs Office for full information.

*Comprehensive Examination:* The purpose of this requirement is to confirm that students have achieved a solid understanding of, and a comprehensive training in, the chemical sciences. The tests cover a wide range of material, so that students will have a chance to show what they have learned. For master’s students, the department administers the standardized American Chemical Society exams in biochemistry and in analytical, inorganic, organic, and physical chemistry. Students must pass three of the five exams in order to graduate. For doctoral students earning the M.S. on the way to the Ph.D., the Departmental Examination fulfills this requirement.

**DOCTORAL PROGRAM**

The goal of the Ph.D. in chemistry is to prepare students for careers in science by expanding their knowledge of chemistry while developing their ability for critical analysis, creativity, and independent study. The program is designed to encourage initiative and to stimulate enjoyment and development of the student’s area of research expertise as well as the broader aspects of scientific inquiry and enlightenment.
RESEARCH

Students choose their research concentration from programs in biochemistry, biophysics, bioinformatics, inorganic, organic, physical, analytical, and theoretical chemistry, surface and materials chemistry, and atmospheric and environmental chemistry. Opportunities for scientific discovery are also abundant through the department’s extensive collaborations with investigators in the physical, biological, and engineering sciences. This includes on-campus collaborations with faculty in the Materials Science Program, School of Medicine, School of Pharmacy and Pharmaceutical Sciences, and Scripps Institution of Oceanography. There are also off-campus interactions with scientists at nearby research facilities such as the Salk Institute and The Scripps Research Institute. Excellent state-of-the-art facilities and equipment support all the research programs. The department’s Industrial Relations Program interfaces with national and local chemical, biotechnology, and pharmaceutical industries to encourage technology transfer and to assist postgraduates interested in industrial careers.

RESEARCH ADVISOR

A first-year faculty advisor guides students until a research advisor is chosen. Most of a student’s efforts in graduate school are directed toward research for the doctoral dissertation, and selection of a research advisor is of utmost importance. To assist students with this critical decision, all chemistry and biochemistry faculty present research seminars in the fall quarter. Students then rotate in laboratories or consult with faculty to discuss research opportunities. Although students have until the end of the first year to join a laboratory, most start their research studies by mid-year.

PLACEMENT EXAMINATIONS AND COURSE WORK

Entering students take written placement examinations in analytical, biochemistry, inorganic, organic, and physical chemistry. The purposes of these exams are to assist with advising and to assure that students have the breadth and level of competence needed for graduate studies. Deficiencies must be remedied in the first year. Three of five exams must be passed, including the one in the student’s research area.

First-year students normally take at least six of the graduate courses listed below based on the results of their placement examinations, their research programs, and their specialized interests. Chem. 250 and Chem. 500 are required. Undergraduate courses and courses offered through other departments may also be taken, depending on the student’s research area. By the second year, the emphasis is on thesis research, and a lighter load of courses is taken, although participation in seminars and informal study groups continues.

DEPARTMENTAL EXAMINATION

In the winter quarter of the second year, a student’s progress in research and graduate studies is evaluated through the departmental examination, which includes presentation and critical discussion of a recent research article. Students are also evaluated on their general knowledge of their particular field of study. Students may also be asked about progress on their dissertation.

QUALIFYING EXAMINATION

By the end of the third year, students defend the topic, preliminary findings, and future research plans of their dissertation. Passing this defense qualifies the student to advance to candidacy for the dissertation. A dissertation committee composed of five faculty, one of whom is the research advisor, provides consultation and evaluation for the dissertation project.

DISSERTATION

The dissertation is normally completed in the fourth or fifth year. This body of research is expected to make an innovative contribution to the field of chemistry. Ph.D. candidates present a seminar summarizing their research accomplishments and defend their thesis in an oral examination before their dissertation committee.

TEACHING

Experience in teaching is a vital and integral part of every graduate student’s training, and all students participate in the instructional activities of the undergraduate curriculum. Course credit for the teaching apprenticeship is earned by enrolling in Chem. 500. Excellence in teaching is stressed, and the department provides a thorough training program covering the fundamentals of teaching as well as other useful information and techniques for effective instruction. Further training is provided by the campus’s Center for Teaching Development. Faculty and the students taught evaluate the performance of teaching assistants every quarter and awards are bestowed annually for outstanding performance as a teaching assistant.

LANGUAGE REQUIREMENT

Students whose native language is not English must demonstrate a mastery of English adequate to complete the teaching requirement. Deficiencies must be remedied by the end of the first year of academic residence. Foreign English speakers, however, need no foreign-language requirement.

TIME LIMITS

In accordance with UCSD policy, students must advance to candidacy by the end of four years. Total university support cannot exceed six and one-third years. Total registered time at UCSD cannot exceed seven and one-third years.

SEMINARS

Seminars by researchers from other universities, national laboratories, and industry are another basic and important aspect of the graduate curriculum. Seminars are presented weekly in biochemistry, inorganic, organic, and physical chemistry. Department colloquia are given on topics of general interest to the department. Seminars are also sponsored by many other departments and institutes.

FINANCIAL SUPPORT

The department supports all first-year students in good academic standing from a variety of sources, including teaching and research assistantships, training grants, fellowships, and awards. A stipend is paid in addition to fees and, if applicable, tuition. Continuing students who do not have fellowships or awards are normally supported on training grants or on research assistantships by their thesis advisors.

ADMISSIONS

The department seeks bright, motivated doctoral students and welcomes all such applications. To make admissions decisions, the department considers an applicant’s statement of purpose and research interests, GRE scores on the general test plus either the advanced chemistry or advanced biochemistry test, undergraduate record, quality of the undergraduate university, letters of recommendation, and research experience and publications. Applicants whose native language is not English must also submit TOEFL scores; TWE scores are strongly recommended. Admissions to the doctoral program is for fall quarter. Applications received by mid-January receive priority consideration.

Students who have a master’s degree with strong course records and with research experience are encouraged to apply. They normally pass the qualifying examination and graduate at an accelerated pace.

PH.D. IN CHEMISTRY WITH SPECIALIZATION IN COMPUTATIONAL SCIENCE

As of fall 2007, the UCSD campus is offering a new comprehensive Ph.D. specialization in Computational Science that will be available to doctoral candidates in participating science, mathematics, and engineering departments at UCSD.

This Ph.D. specialization is designed to allow students to obtain standard basic training in their chosen field of science, mathematics, or engineering with a specialization in computational science integrated into their graduate studies. Prospective students must apply and be admitted into the Ph.D. program in Chemistry/Biochemistry described previously. (See the Department of Chemistry/Biochemistry for more information.)

JOINT DOCTORAL PROGRAM WITH SAN DIEGO STATE UNIVERSITY

The Department of Chemistry and Biochemistry at UCSD and the Department of Chemistry at San Diego State University offer a joint program of graduate study leading to the Ph.D. Degree in chemistry. More information is available in the current edition of the Bulletin of the Graduate Division of San Diego State University.

LOWER-DIVISION

4. Basic Chemistry (4)
Chemistry 4 is a one-quarter course for science majors with insufficient preparation to start the Chem. 6 sequence. Emphasis is on learning how to solve quantitative problems. Topics include nomenclature, stoichiometry, and the periodic table. Includes a combined laboratory and discussion-recitation each week. PREREQUISITE: Math. 3C or 4C. Cannot be taken for credit after any other chemistry course. Intended for science majors. (F)

6A. General Chemistry I (4)
First quarter of a three-quarter sequence intended for science and engineering majors. Topics include: stoichiometry, gas laws, bonding, atomic theory, quantum theory, and thermodynamics. Three hours lecture, one hour recitation. PREREQUISITES: proficiency in high school chemistry or physics. Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence (may be taken concurrently). (F,W,S)

6AH. Honors General Chemistry I (4)
First quarter of a three-quarter honors sequence intended for well-prepared science and engineering majors. Topics include: stoichiometry, gas laws, bonding, atomic theory, quantum theory, and thermodynamics. Three hours lecture and one hour recitation. PREREQUISITES: proficiency in high school chemistry, physics, and mathematics. Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence. Concurrent enrollment in Math. 20A or higher level calculus required. (F)

6B. General Chemistry II (4)
Second quarter of a three-quarter sequence intended for science and engineering majors. Topics include: molecular geometry, condensed phases and solutions, chemical equilibrium, acids and bases and thermodynamics. Three hours lecture and one hour recitation. PREREQUISITES: Chem. 6A, Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence. (F,W,S)

6BH. Honors General Chemistry II (4)
Second quarter of a three-quarter honors sequence intended for well-prepared science and engineering majors. Topics include: molecular geometry, condensed phases and solutions, chemical equilibrium, acids and bases and thermodynamics. Students may not receive credit for both Chem. 6BH and Chem. 6B. Three hours lecture and one hour recitation. PREREQUISITES: Chem. 6AH, Math. 10A or 20A or a higher course in the Math. 10 or 20 sequence. (F,W,S)

6BL. Introductory Inorganic Chemistry Laboratory (3)
Introduction to experimental procedures used in synthetic, inorganic, analytical, and physical chemistry. Preferably taken concurrently with Chem. 6C. A materials fee is required. A mandatory safety exam must be passed within the first two weeks. (F,W,S)

6C. General Chemistry III (4)
Third quarter of a three-quarter sequence intended for science and engineering majors. Topics include: electrochemistry, kinetics, coordination chemistry, nuclear chemistry, and an introduction to organic and biochemistry. Three hours lecture and one hour recitation. PREREQUISITE: Chem. 6B; Chem. 6BL may be taken concurrently. (F,W,S)

6CH. Honors General Chemistry III (4)
Third quarter of a three-quarter honors sequence intended for well-prepared science and engineering majors. Topics include: electrochemistry, kinetics, coordination chemistry, nuclear chemistry, and an introduction to organic and biochemistry. Three hours lecture and one hour recitation. Students may not receive credit for both Chem. 6CH and Chem. 6C. PREREQUISITES: Chem. 6BH, Math. 20B; Chem. 6BL may be taken concurrently. (S)

11. The Periodic Table (4)
Introduction to the material world of atoms and small inorganic molecules. Intended for non-science majors. Can be skipped by students with a good knowledge of high school chemistry. Cannot be taken for credit after any other general chemistry course. (F)

12. Molecules and Reactions (4)
Introduction to molecular bonding and structure and chemical reactions, including organic molecules and synthetic polymers. Intended for non-science majors. PREREQUISITE: Chem. 6AH. Cannot be taken for credit after any other general chemistry course. (W)

13. Chemistry of Life (4)
Introduction to biochemistry for non-science majors. PREREQUISITE: Chem. 12. Cannot be taken for credit after any biochemistry course. (S)

15. Chemistry of the Universe (4)
This is a one-quarter, nonmathematical chemistry course for non-science majors covering the origin of the universe, the elements, and the formation of the solar system. The evolution of the Earth’s atmosphere, hydrosphere, geosphere, and biosphere will be covered, as well as contemporary problems in environmental chemistry. Cannot be taken for credit after any other chemistry course.

87. Freshman Seminar in Chemistry and Biochemistry (1)
This seminar will present topics in chemistry at a level appropriate for first-year students.

90. Undergraduate Seminar (1)
The seminar will focus on a variety of issues and special areas in the field of chemistry.

91. Undergraduate Honors Seminar (1)
A seminar intended for exposing undergraduate students, especially freshmen and sophomores, to exciting research programs conducted by the faculty. Enrollment is limited.

92. Undergraduate Pharmacology Seminar (1)
Selected topics in pharmacology and toxicology. (S)

96. Introduction to Teaching Science (2)
(Cross-listed with EDS 41.) Visit students’ learning difficulties in science in more depth to prepare students to make meaningful observations of how K–12 teachers deal with these difficulties. Explore how instruction can use students’ knowledge to pose problems that stimulate students’ intellectual curiosity. PREREQUISITE: This course is available to undergraduate students on a space-available basis.

99. Independent Study (2 or 4)
Independent literature or laboratory research by arrangement with and under the direction of a member of the Department of Chemistry and Biochemistry faculty. Students must register on a P/NP basis. PREREQUISITE: lower-division standing, 3.0 minimum UCSD GPA; consent of instructor and department, completion of 30 units of undergraduate study at UCSD, completed and approved Special Studies form.

UPPER-DIVISION

100A. Analytical Chemistry Laboratory (4)
Laboratory course emphasizing classical quantitative chemical analysis techniques, including separation and quantification as well as an introduction to instrumental analysis. PREREQUISITES: CHEM 6C or 6CH or equivalent, and CHEM 6BL or equivalent; PHYS 2CL or 2BL recommended. A materials fee is required for this course. A mandatory safety exam must be passed within the first two weeks. (F, W, S)

100B. Fundamentals of Instrumental Analysis (2)
Fundamental theoretical principles, capabilities, applications, and limitations of modern analytical instrumentation used for qualitative and quantitative analysis. Students will learn how to define the nature of an analytical problem and how to select and appropriate analytical method. PREREQUISITES: Chem. 100A or graduate standing, and Phys. 2A-B or equivalent; Phys. 2CL or 2BL recommended. (Note: Students may not receive credit for both Chem. 100B and Chem. 106.) (F,W,S)

100BL. Instrumental Analysis Laboratory (3)
Hands-on laboratory course focuses on the development of correct laboratory work habits and methodologies for the operation of modern analytical instrumentation. Gas chromatography, gas chromatography-mass spectrometry, high performance liquid chromatography, ion chromatography, atomic absorption spectroscopy. Chem. 100B is for undergraduates only. PREREQUISITES: Chem. 100A; Phys. 2A-2B or equivalent; concurrent with Chem. 100B. Phys. 2BL or 2CL recommended. (Note: Students may not receive credit for both Chem. 100B and Chem. 106.) (F, W, S)

104. Introduction to X-ray Crystallography (4)
(Conjoined with Chem. 204.) Analysis of macromolecular structures by X-ray diffraction. Topics include symmetry, geometry of diffraction, detection of diffraction, intensity of diffracted waves, phase problem and its solution, heavy atom method, isomorphous replacement, anomalous dispersion phasing methods (MAD), direct methods, molecular replacement. PREREQUISITE: Phys. 2A-2B.

105A. Physical Chemistry Laboratory (5)
Laboratory course in experimental physical chemistry. PREREQUISITES: Chem. 100A and Phys. 2CL or equivalent, Chem. 126 or 127 or 131 or 133. A materials fee is required for this course. (F,W,S)

105B. Physical Chemistry Laboratory (4)
Laboratory course in experimental physical chemistry. PREREQUISITE: Chem. 105A. A materials fee is required for this course. (F,W,S)

112A. Molecular Biochemistry Laboratory (6)
The application of techniques to study protein structure and function, including electrophoresis, protein purification, column chromatography, enzyme kinetics, and immunochromeny. PREREQUISITES: Chem. 140A-B-C, 143A, 114A. (Some of these courses may be taken concurrently.) (Note: Students may not receive credit for both Chem. 112A and BBIC 103.) A materials fee is required for this course. (W)

112B. Molecular Biochemistry Laboratory (6)
This laboratory will introduce the students to the tools of molecular biology and will involve experiments with recombinant DNA techniques. PREREQUISITES: Chem. 114A-B, Chem. 114C (may be taken concurrently); Chem. 143A and 143B. (Note: Students may not receive credit for both Chem. 112B and BBIM 101.) A materials fee is required for this course. (S)

113. Chemistry of Biological Macromolecules (4)
(Conjoined with Chem. 213.) A discussion of the structural principles governing biological macromolecules, the techniques used in their study, and the functional properties depend on three-dimensional structure. Chem. 213 students will be expected to complete additional course work beyond that expected of students in Chem. 113. PREREQUISITE: elementary chemistry and physics. (May not be offered every year.)

114A. Biochemical Structure and Function (4)
Introduction to biochemistry from a structural and functional viewpoint. PREREQUISITE: elementary organic chemistry (Chem. 140A or equivalent). (Note: Students may not receive credit for both Chem. 114A and BBIC 100.) (F, W)

114B. Biochemical Energies and Metabolism (4)
This course is an introduction to the metabolic reactions in the cell which produce and utilize energy. The course material will include energy-producing pathways: glycolysis, Krebs cycle, oxidative phosphorylation, fatty-acid oxidation. Biosynthesis of amino acids, lipids, carbohydrates, purines, pyrimidines, proteins, nucleic acids. PREREQUISITE: Chem. 111A or BBIC 100. (Note: Students may not receive credit for both Chem. 114B and BBIC 102) (W)

114C. Biosynthesis of Macromolecules (4)
This course is a continuation of the introduction to biochemistry courses (114A and 114B). This quarter reviews the mechanisms of biosynthesis of macromolecules—particularly proteins and nucleic acids. Emphasis will be placed on how these processes are controlled and integrated with the metabolism of the cell. PREREQUISITE: Chem. 114B or BBIC 102. (Note: Students may not receive credit for both Chem. 114C and BBIM 100.) (S)
114D. Molecular and Cellular Biochemistry (4)
(Conjoined with Chem. 214.) This course represents a continuation of 114C, or an introductory course for first- and second-year graduate students, and covers topics in molecular and cellular biochemistry. Emphasis will be placed on contemporary approaches to the isolation and characterization of mammalian genes and proteins, and molecular genetic approaches to understanding eukaryotic development and human disease. Chem. 214 students will be required to complete additional course work beyond that expected of students in Chem. 114D. PREREQUISITES: Chem. 114A or consent of instructor. (May not be offered every year.)

115. Modeling Biological Macromolecules (4)
Use of computer graphics and modeling methods in the study of biological macromolecules. The course will cover basic methods and techniques. The objective is to provide a good working knowledge of the critical features of the methods and to provide a foundation for further study for those who wish to pursue these methods as research topics. PREREQUISITES: Chem. 114A or equivalent. (May be offered every year.)

116. Chemistry of Enzyme Catalyzed Reactions (4)
A discussion of the chemistry of representative enzyme catalyzed reactions is presented. Enzyme reaction mechanisms and enzyme structure are emphasized. PREREQUISITES: Chem. 140C, 114A, and 126 or 131. (May not be offered every year.)

118. Pharmacology and Toxicology (4)
A survey of the biochemical action of drugs and toxins as well as their absorption and excretion. PREREQUISITES: Chem. 140C or 141C; and Chem. 114C or consent of instructor. Priorities will be given to PharmChem majors. (S)

120A. Inorganic Chemistry I (4)
The chemistry of the main group elements in terms of atomic structure, ionic and covalent bonding. Structural theory involving s, p, and unfilled d orbitals. Thermodynamic and spectroscopic criteria for structure and stability of compounds and chemical reactions of main group elements in terms of molecular structure and reactivity. PREREQUISITES: a general chemistry course. Chem. 140A or equivalent course is recommended. (F)

120B. Inorganic Chemistry II (4)
A continuation of the discussion of structure, bonding, and reactivity with emphasis on transition metals and other elements using filled d orbitals to form bonds. Coordination chemistry in terms of valence bond, crystal field, and molecular orbital theory. The properties and reactivities of transition metal complexes including organometallic compounds. PREREQUISITE: Chem. 120A. (W)

123. Advanced Inorganic Chemistry Laboratory (4)
Synthesis, analysis, and physical characterization of inorganic compounds. A materials fee is required for this course. PREREQUISITES: Chem. 120A, 143AH or 143A. Chem. 120B and 143B may be taken concurrently. (WS)

124. Bioinorganic Chemistry (4)
(Conjoined with Chem. 225.) The role of metal ions in biological systems, with emphasis on transition metal ions in enzymes that transfer electrons, bind oxygen, and fix nitrogen. Also included are metal complexes in medicine, mechanisms of action, and stability of compounds and chemical reactions of metal ions. Emphasis will be placed on the control of stereochemistry during a synthesis. Examples will be selected from the recent literature. Chem. 214 students will be required to complete additional course work beyond that expected of students in Chem. 114D. PREREQUISITES: Chem. 114A or consent of instructor. (May not be offered every year.)

126. Physical Chemistry (4)
An introduction to the physical chemistry with emphasis on biochemical and environmental applications. Thermodynamics, first and second laws, thermochromy, chemical equilibrium, solutions, kinetic theory, reaction kinetics. PREREQUISITE: Chem. 126 or consent of instructor. (W)

131. Physical Chemistry (4)
Thermodynamics, chemical equilibrium, phase equilibrium, chemistry of solutions. PREREQUISITES: Math. 20C or 21C, and Phys. 2B. Recommended: Math. 20D or 21D, and Phys. 2D. (F)

132. Physical Chemistry (4)
Chemical statistics, kinetic theory, reaction kinetics. PREREQUISITES: Math. 20D or 21D, and Phys. 28. Recommended: Phys. 2D. (W)

133. Physical Chemistry (4)
Quantum mechanics, atomic and molecular spectroscopy, molecular structure. PREREQUISITES: Chem. 132 and Phys. 2D; or Chem. 6C, Math. 20D or 21D, Math. 20F; or Chem. 2AB; or consent of instructor. (S)

135. Molecular Spectroscopy (4)
(Conjoined with Chem. 235.) Time-dependent behavior of systems; interaction of matter with light; selection rule. Radiative and nonradiative processes, coherent phenomena, and the density matrices. Instrumentation, measurement, and interpretation. Chem. 235 students will be required to complete additional course work beyond that expected of students in Chem. 135. PREREQUISITES: Chem. 133 or equivalent; Math. 20D or 21D, or Chem. 190.290. (May not be offered every year.)

140A. Organic Chemistry I (4)
Introduction to organic chemistry, with applications to biochemistry. Bonding theory, isomerism, stereochemistry, chemical and physical properties. Introduction to substitution, addition, and elimination reactions. Students may not receive credit for both Chem. 140A and Chem. 141A. PREREQUISITE: Chem. 6C or equivalent course in general chemistry. (F,WS)

140B. Organic Chemistry II (4)
Continuation of Organic Chemistry I. Methods of analysis, chemistry of hydrocarbons, chemistry of the car- bonyl group. Introduction to the reactions of biologically important molecules. Students may not receive credit for both Chem. 1418 and Chem. 140B. PREREQUISITE: Chem. 140A (a grade of C or higher in Chem. 140A is strongly recommended). (F,WS)

140BH. Honors Organic Chemistry (4)
Continuation of Organic Chemistry I, Chem. 140A, at honors level. Methods of analysis, chemistry of hydrocarbons, carbonyls, and biologically important molecules. Emphasis on mechanistic aspects of reactions and structure-reactivity relationships. Students may not receive credit for Chem. 140B and Chem. 140BH. PREREQUISITE: Grade of B+ or higher in Chem. 140A. (Note: Students may not receive credit for both Chem. 140C and 140BH.)

140C. Organic Chemistry III (4)
Continuation of Organic Chemistry I (140A) and Organic Chemistry II (140B). Chemistry of biologically important molecules: carboxylic acids, carbohydrates, pro- teins, fatty acids, biopolymers, natural products. Students may not receive credit for both Chem. 140C and Chem. 141C. PREREQUISITE: Chem. 140B (a grade of C or higher in Chem. 140B is strongly recommended). (F,WS)

140CH. Honors Organic Chemistry (4)
Continuation of Organic Chemistry 140A or 140BH, at honors level. Chemistry of carboxylic acids, carbohydrates, proteins, lipids biopolymers, natural products. Emphasis on mechanistic aspects and structure reactivity relationships. PREREQUISITES: Grade of B+ or higher in Chem. 140B, or B– higher in Chem. 140BH. (Note: Students may not receive credit for both Chem. 143A and Chem. 143AH.)

143A. Organic Chemistry Laboratory (4)
Introduction to organic laboratory techniques. Separation, and purification, spectroscopy, product analysis, and effects of reaction conditions. PREREQUISITES: Chem. 6BL and Chem. 140B or Chem. 141A. A materials fee is required. A mandatory safety exam must be passed within the first two weeks. (Note: Students may not receive credit for both Chem. 143A and Chem. 143AH.)

143AH. Honors Organic Chemistry Laboratory (4)
Organic chemistry laboratory for chemistry majors and other honors-eligible students with strong background in Chem. 140A. Similar to Chem. 143A, but emphasizes instrumental methods of product identification, separation, and analysis. PREREQUISITES: Chem. 6BL and “B” or better grade in Chem. 140A. A materials fee is required. A mandatory safety exam must be passed within the first two weeks. (Note: Students may not receive credit for both Chem. 143A and Chem. 143AH.)

143B. Organic Chemistry Laboratory (4)
Continuation of Chem. 143AH or 143A, emphasizing synthetic methods of organic chemistry. PREREQUISITES: Chem. 143AH or 143A, Chem. 140B (may be taken concurrently). Enrollment is limited to majors in the Department of Chemistry and Biochemistry, unless space is available. A materials fee is required for this course. (WS)

143C. Organic Chemistry Laboratory (5)
Identification of unknown organic compounds by a combination of chemical and physical techniques. This course is intended for chemistry majors only. PREREQUISITES: Chem. 6CL or 100A and 143 AH or 143A (or may be taken concurrently); 143B recommended. A materials fee is required for this course. (F)

143D. Molecular Design and Synthesis (4)
Advanced organic synthesis. Relationships between molecular structure and reactivity using modern synthetic methods and advanced instrumentation. Stresses importance of molecular design, optimized reaction conditions for development of practically useful synthesis, and properties of reactions of particular utility in the organic laboratory. Emphasis is on methods of preparation of carbon-carbon bonds and oxidation reduction sequences. Chem. 252 students will be required to complete an additional paper and/or exam. PREREQUISITE: Chem. 140C or Chem. 141C or consent of instructor. (Note: Students may not receive credit for both Chem. 143D and 143DH.)

149B. Environmental Chemistry (4)
Agricultural productivity, biological impact on the environment, deforestation, environmental disasters (fires, nuclear winter, and volcanoes), and organic waste handling. PREREQUISITE: Chem. 149A. (W)

151. Molecules that Changed the World (4)
A look at some of nature’s most intriguing molecules and the ability of man to discover, synthesize, modify, and use them. The role of chemistry in shaping the world, and how chemical synthesis—the art and science of constructing molecules—shapes our world. PREREQUISITE: Chem. 140A or equivalent.

152. Synthetic Methods in Organic Chemistry (4)
(Conjoined with Chem. 252; formerly Chem. 148.) A survey of methods and to provide a foundation for further study. For those who wish to pursue these methods as research topics. PREREQUISITES: a general chemistry course. Chem. 6CL or 100A and 143 AH or 143A or equivalent (may be offered every year.)

155. Synthesis of Complex Molecules (4)
(Conjoined with Chem. 255; formerly Chem. 144.) This course discusses planning economic routes for the synthesis of complex organic molecules. The uses of specific reagents and protecting groups will be outlined as well as the control of stereochemistry during a synthesis. Examples will be selected from the recent literature. Chem. 255 students will be required to complete an additional paper/ exam. (May not be offered every year.) PREREQUISITE: Chem. 152 or 252 or consent of instructor.

156. Structure and Properties of Organic Molecules (4)
(Conjoined with Chem. 256; formerly Chem. 145.) Introduction to the measurement and theoretical correlation of the physical properties of organic molecules.
Topics covered include molecular geometry, molecular-orbital theory, orbital hybridization, aromaticity, chemical reactivity, stereochemistry, infrared and electronic spectra, photochemistry and light-induced reactions, and magnetic resonance. Chem. 256 students will be required to complete an additional paper/exam. **PREREQUISITES:** Chem. 140ABC or 141ABC or the equivalent.

157. Bioorganic and Natural Products Chemistry (4)
(Conjoined with Chem. 257; formerly Chem. 142.) A comprehensive survey of modern bioorganic and natural products chemistry. Topics will include biosynthesis of natural products, molecular recognition, and small molecule-biomolecule interactions. **PREREQUISITE:** Chem. 140C or 141C or 254 or consent of the instructor.

158. Applied Spectroscopy (4)
(Conjoined with Chem. 258.) Intensive coverage of modern spectroscopic techniques and their application to determine the structure of organic molecules. Problem solving and interpretation of spectra will be strongly emphasized. Chem. 258 students will be required to write and submit a paper that reviews a recent research publication that reports the structure determination by spectroscopic methods of natural products. **PREREQUISITE:** Chem. 154 or 254, or consent of instructor.

161. Supramolecular Coordination Chemistry (4)
(Conjoined with Chem. 261.) An introduction and survey of modern coordination chemistry. Topics will include structure and bonding of alkali, transition, lanthanide and actinide metals; stereochemistry, coordination clusters, molecular solids and nanoparticles. **PREREQUISITE:** Chem. 120A and 120B or equivalent.

165. 3D Electron Microscopy of Macromolecules (4)
(Conjoined with Chem. 265; cross-listed with BIMM 162/ BGN 262.) Biological macromolecules and supramolecular complexes, as well as organelles, and small cells are being examined in three-dimensions by modern electron cryomicroscopy and image reconstruction techniques. The basic principles of transmission electron microscopy and 3D image reconstruction are discussed. Chem. 265/BGN 262 students will be required to complete an additional assignment/exam beyond that expected of students in Chem. 165/BIMM 162. **PREREQUISITES:** Chem. 114A or BIBC 100 or BIBC 110, and Phys. 1A-B-C or Phys. 2A-B-D.

166. Environmental and Molecular Toxicology (4)
(Conjoined with Chem. 266.) Molecular and cellular mechanisms underlie the actions of environmental toxins. This course will investigate approaches to study the impact of environmental toxins on human health. Other modern approaches that are being implemented to detect and remediate environmental toxicants will also be examined. Chem. 266 students will be required to complete an additional assignment/exam beyond that expected of students in Chem. 166. **PREREQUISITES:** Chem. 114A-8.

173. Atmospheric Chemistry (4)
(Conjoined with Chem. 273.) Classical principles applied to the study of atmospheres. Atmospheric photochemistry, radical reactions, chemical lifetime determinations, acid rain, greenhouse effects, ozone cycle, and evolution are discussed. Chem. 273 students will be required to complete an additional assignment/exam beyond that expected of students in Chem. 173. **PREREQUISITES:** Chem. 6A-6C or 6AH, 6BH, and 6 CH, or equivalent. (S)

(Cross-listed with Chem. 141D.) An introduction to the chemistry and distribution of the elements in seawater, emphasizing basic chemical principles such as electron structure, chemical bonding, and group and periodic properties and showing how these affect basic aqueous chemistry in marine systems. **PREREQUISITE:** Chem. 6C, with a grade of C– or better, or consent of instructor. (May not be offered every year.)

182. Biological Databases (4)
(Cross-listed with BIMM 182/BENG 182/CSE 182.) This course provides an introduction to the features of biological data, how those data are organized efficiently in databases, and how existing data resources can be utilized to solve a variety of biological problems. Object oriented databases, data modeling, and description. Survey of current biological database with respect to above, implementation of database on a biological topic. **PREREQUISITE:** CSE 100 or Math. 176. Bioinformatics majors only.

184. Computational Molecular Biology (4)
(Cross-listed with BIMM 184/BENG 184/CSE 184.) This advanced course covers the application of machine learning and modeling techniques to biological systems. Topics include gene structure, recognition of DNA and protein sequence patterns, classification, and protein structure prediction. Pattern discovery, Kuhnert Markov models/support vector machines/neural network/profiles, protein structure prediction, functional characterization of proteins, functional genomics/proteomics, metabolic pathways/gene networks. **PREREQUISITES:** BIMM 181 or BENG 181 or CSE 181; BIMM 182 or BENG 182 or CSE 182. Bioinformatics majors only.

185. Introduction to Computational Chemistry (4)
(Conjoined with Chem. 258.) Course in computational methods building on a background in mathematics and physical chemistry. Brief introduction and background in computational technology, molecular mechanics, semi-empirical methods, and ab initio-based methods of increasing elaboration. Emphasis on applications and reliability. Chem. 285 students will be required to complete an additional assignment/exam beyond that expected of students in Chem. 185. **PREREQUISITES:** Chem. 126 or 133 and Math. 20C or 21C. (May not be offered every year.)

187. Foundations of Teaching and Learning (4)
(Conjoined with Chem. 215.) Course in teaching that will be explored. **PREREQUISITES:** Chem. 6C and Chem. 96.

188. Capstone Seminar in Science Education (4)
(Cross-listed with EDS 123.) In the lecture and observation format, students continue to explore the theories of learning in the science classroom. Conceptual development is fostered, as well as continued development of knowledge of science education. Students will be required to complete an additional assignment/exam beyond that expected of students in Chem. 188. **PREREQUISITES:** elementary physical and organic chemistry. (May not be offered every year.)

195CHEMISTRY AND BIOCHEMISTRY

**GRADUATE**

207. Modern NMR Methods (4)
Treats varied pulse sequences, one- and two-dimensional methods, interpretation of relaxation rates, spin-decoupling, multiple quantum filtering, and solvent suppression with application to liquid crystals, membranes, small molecules, proteins, and nucleic acids. **PREREQUISITE:** does not require extensive mathematics, but recommended. (May not be offered every year.)

209. Macromolecular Recognition (4)
Structures and functions of nucleic acids, folding and catalysis of nucleic acids, motifs and domains of proteins, principles of protein-protein interactions, chemistry of proteolysis, and protein/RNA and protein/DNA interactions. **PREREQUISITE:** biochemical background and graduate standing, or approval of instructor.

211. Metabolic Biochemistry (4)
A comprehensive course in biochemistry emphasizing the use of computer graphics and modeling methods in the study of biological macromolecules. Emphasis will be placed on contemporary approaches to the isolation and characterization of mammalian genes and proteins, and molecular genetic approaches to the understanding of disease. Chem. 214 students will be required to complete additional course work beyond that expected of students in Chem. 113. **PREREQUISITES:**: elementary physical and organic chemistry. (May not be offered every year.)

214. Molecular and Cellular Biochemistry (4)
(Conjoined with Chem. 114D.) This course represents a continuation of 114C, or an introductory course for first- and second-year graduate students, and covers topics in molecular and cellular biochemistry. **PREREQUISITES:**: elementary physical and organic chemistry. (May not be offered every year.)

215. Modeling Biological Macromolecules (4)
(Conjoined with Chem. 115; cross-listed with PHAR 205/ BIOM 205.) Use of computer graphics and modeling methods in the study of biological macromolecules. The course will cover basic methods and techniques. The objective is to provide good working knowledge of the features of the methods and to provide a foundation for further study for those who wish to pursue these methods as research topics. Chem. 215/BIOM 205/PHAR 205 students will be required to complete additional course work beyond that expected of students in Chem. 115. **PREREQUISITE:**: Interdisciplinary background or consent of instructor. (May not be offered every year.)

216. Chemistry of Enzyme Catalyzed Reactions (4)
A discussion of current topics in chemical biology including mechanistic aspects of enzymes and cofactors, use of modified enzymes to alter biochemical pathways, chemical intervention in cellular processes, and natural product discovery. **PREREQUISITE:** graduate standing or consent of instructor. (May not be offered every year.)

219. Special Topics in Biochemistry (4)
Special topics course designed for first-year graduate students in biochemistry. Topics presented in recent years have included protein processing, the chemical modification of proteins, the biosynthesis and function of glycopolysaccharides, lipid biochemistry and membrane structure, and bioenergetics. **PREREQUISITE:** undergraduate courses in biochemistry, Chem. 114A or equivalent. (May not be offered every year.)

221. Signal Transduction (4)
The aim of this course is to develop an appreciation for a variety of topics in signal transduction. We will discuss several historical developments while the focus will be on current issues. Both experimental approaches and results will be included in our discussions. Topics may vary from
222. Structure and Analysis of Solids (4)
(Cross-listed with MATS 227.) Key concepts in the atomic structure and bonding of solids such as metals, ceramics, and semiconductors. Symmetry operations, point groups, lattice types, space groups, and simple and complex inorganic compounds, structure/property comparisons, structure determination with X-ray diffraction. Ions, covalent, metallic bonding compared with physical properties. Atomic and molecular orbitals, bands versus bonds, free electron theory.

224. Spectroscopic Techniques (4)
Application of physical techniques to the elucidation of the structure of inorganic complex ions and organometallic compounds. Topics covered include group theory, and its application to vibrational, magnetic resonance and Raman spectroscopy. (May not be offered every year.)

225. Bioinorganic Chemistry (4)
The role of metal ions in biological systems, with emphasis on transition metal ions in enzymes that transfer electrons, bind oxygen, and fix nitrogen. Also included are metal complexes in medicine, toxicity, and metal ion storage and transport. Chem. 225 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 124. PREREQUISITE: Chem. 6C or 6CH. Chem. 114A and 120A recommended. (May not be offered every year.)

227. Seminar in Inorganic Chemistry (2)
Seminars presented by faculty and students on topics of current interest in inorganic chemistry, including areas such as bioinorganic, organometallic and physical-inorganic chemistry. The course is designed to promote a critical evaluation of the available data in specialized areas of inorganic chemistry. Each quarter three or four different topics will be discussed. PREREQUISITE: graduate standing or consent of instructor. (S/U grades only.)

228. Solid State Chemistry (4)
Survey of the chemistry of semiconductors, superconductors, molecular magnetic materials, zeolites, fast ion conductors, electronically conducting polymers and ceramics. Synthetic techniques such as molecular precursor design, the sol-gel process, electrolysise, and high-temperature thermolysis will be covered. (May not be offered every year.)

229. Special Topics in Inorganic Chemistry (2-4)
Selection of topics of current interest. May be repeated for credit when topics vary. (May not be offered every year.)

230. Quantum Mechanics (4)
Concepts and mathematical formalism that are useful for problems of chemical interest: states, representations, operators, eigenvalues, and eigenfunctions, time evolution, observables, and measurements. Time-independent perturbation theory. PREREQUISITES: Chem. 133 or equivalent; Math. 20D or equivalent; Chem. 190 may be taken concurrently. (May not be offered every year.)

231. Chemical Kinetics and Molecular Reaction Dynamics (4)
Classical kinetics, transition state theory, unimolecular decomposition, potential energy surfaces; scattering processes and photodissociation processes. PREREQUISITE: Chem. 230. (May not be offered every year.)

232. Statistical Mechanics of Chemical Systems (4)
Equilibrium statistical mechanics, distribution functions, and partition functions. Feynman, Bose, and Fermi statistics. The different ensembles; ensemble averages and QM expectation values; derivation of thermodynamic properties of simple systems. PREREQUISITES: Chem. 131, 132 and 133, or equivalent. (May not be offered every year.)

235. Molecular Spectroscopy (4)
(Conjoined with Chem. 133.) Time-dependent behavior of systems, interaction of matter with light; selection rule. Radiative and nonradiative processes, coherent phenomena and the density matrices. Instrumentation, measurement, and interpretation. Chem. 235 students will be required to complete additional course work beyond that expected of students in Chem. 135. PREREQUISITES: Chem. 133 or equivalent; Math. 20D or 21D; or Chem. 190/290. (May not be offered every year.)

239. Special Topics in Chemical Physics (2 or 4)
Topics of special interest will be presented. Examples include NMR, solid-state chemistry, phase transitions, stochastic process, quantum theory, nonequilibrium processes, tensor transformations, and advanced topics in statistical mechanics, thermodynamics, and chemical kinetics. (May not be offered every year.)

240. Electrochemistry (4)
(Cross-listed with MATS 230.) Application of electrochemical techniques to chemistry research. Basic electrochemical theory and instrumentation: the diffusion equations, controlled potential, and current methods. Electro-chemical kinetics, Butler-Volmer, Marcus-Hush theories, preparative electrochemistry, analytical electrochemistry, solid and polymer electrodes and photoelectrochemistry. (May not be offered every year.)

246. Kinetics and Mechanism (4)
Methodology of mechanistic organic chemistry: integration of rate expressions, determination of rate constants, transition state theory; catalysis, kinetic orders, isotope effects, substituent effects, solvent effects, linear free energy relationships; product studies, stereochemistry; reactive intermediates; rapid reactions. (May not be offered every year.)

250. Seminar in Chemistry (2)
Regularly scheduled seminars by first-year graduate students provide opportunities for practice in seminar delivery and for the exploration of topics of general interest. (S/U grades only.)

251. Research Conference (2)
Group discussion of research activities and progress of the group members. PREREQUISITE: consent of instructor. (S/U grades only; F/W/S)

252. Synthetic Methods in Organic Chemistry (4)
(Conjoined with Chem. 152; formerly Chem. 248.) A survey of reactions of particular utility in the organic laboratory. Emphasis is on preparative methods of preparation of carbon-carbon bonds and oxidation reduction sequences. Chem. 252 students will be required to complete additional course work beyond that expected of students in Chem. 152. PREREQUISITE: Chem. 140C.

(Conjoined with Chem. 154; formerly Chem. 247.) A qualitative approach to the mechanisms of various organic reactions; substitutions, additions, eliminations, condensations, rearrangements, oxidations, reductions, free-radical reactions, and photochemistry. Includes considerations of molecular structure and reactivity, synthetic methods, spectroscopic techniques, and stereochemistry. The topics emphasize Am fall year to year. The first quarter of the advanced organic chemistry sequence. Chem. 254 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 154. PREREQUISITES: Chem. 140C or graduate standing.

255. Synthesis of Complex Molecules (4)
(Conjoined with Chem. 155; formerly Chem. 244.) This course discusses planning economic routes for the synthesis of complex organic molecules. The uses of specific reagents and protecting groups will be outlined as well as the control of stereochemistry during a synthesis. Examples will be selected from the recent literature. Chem. 255 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 155. (May not be offered every year.) PREREQUISITE: Chem. 152 or 252 or consent of instructor.

256. Structure and Properties of Organic Molecules (4)
(Conjoined with Chem. 156; formerly Chem. 245.) Introduction to the measurement and theoretical correlation of the physical properties of organic molecules. Topics covered include molecular geometry, molecular orbital theory, orbital hybridization, aromaticity, chemical reactivity, stereochemistry, infrared and electronic spectra, photochemistry, and nuclear magnetic resonance. Chem. 256 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 156. PREREQUISITES: Chem. 140A-B-C or the equivalent.

257. Biorganic and Natural Products Chemistry (4)
(Conjoined with Chem. 157; formerly Chem. 242.) A comprehensive review of modern biorganic and natural products chemistry. Topics include biosynthesis of natural products, molecular recognition, and small molecule-biopharmacophore interactions. Chem. 257 students will be required to complete additional course work beyond that expected of students in Chem. 157. PREREQUISITE: Chem. 140C, 254, or consent of instructor.

258. Applied Spectroscopy (4)
(Conjoined with Chem. 158.) Intensive coverage of modern spectoscopic techniques used to determine the structure of organic molecules. Problem solving and interpretation of spectra will be strongly emphasized. Chem. 258 students will be required to write a paper that reviews a recent research publication that reports the structure determination by spectroscopic methods of natural products. PREREQUISITE: Chem. 154 or 254 or consent of instructor.

259. Special Topics in Organic Chemistry (2-4)
(Formerly Chem. 249.) Various advanced topics in organic chemistry. Includes but is not limited to: advanced kinetics, advanced spectroscopy, computational chemistry, hetero cyclic chemistry, medicinal chemistry, organonanoparticle metal chemistry, polymers, solid-phase synthesis/combinatorial chemistry, stereochemistry, and total synthesis classics.

261. Supramolecular Coordination Chemistry (4)
(Conjoined with Chem. 160.) A survey of current and recent survey of modern coordination chemistry. Topics will include structure and bonding of alkali, transition lanthanide, and actinide metals, with emphasis on the first row transition metals; stereochemistry, coordination clusters, molecular solids, and nanoparticles. Chem. 261 students will be required to complete additional course work beyond that expected of students in Chem. 161. PREREQUISITES: Chem. 120A, 120B or equivalent; or graduate standing.

262. Inorganic Chemistry and NMR (4)
A survey of inorganic chemistry to prepare for graduate research in the field, including a detailed introduction to nuclear magnetic resonance (NMR), followed by applications of NMR to structural and mechanistic problems in inorganic chemistry.

266. Environmental and Molecular Toxicology (4)
(Conjoined with Chem. 166; cross-listed with BIMM 166/ BGNN 256/BIDM 266.) Molecular and cellular mechanisms underlie the actions of environmental toxicants. This course will investigate approaches to study the impact of environmental toxicants on human health. Other modern approaches that are being implemented to detect and remediate environmental toxicants will also be examined. Chem. 266 students will be required to complete an additional paper and/or exam beyond that expected of students in Chem. 166. (W)

270A–B–C. Current Topics in Environmental Chemistry (2-2-2)
Seminar series on the current topics in the field of environmental chemistry. Emphasis is on current research topics in atmospheric, oceanic, and geologic environments. PREREQUISITE: consent of instructor. (S/U grades only.) (May not be offered every year.)

271. Special Topics in Analytical Chemistry (4)
Topics of special interest in analytical chemistry. May include, but is not limited to, chemical separation, sample introductions, mass analyzers, ionization schemes, and current state-of-the-art applications in environmental and biological chemistry.

273. Atmospheric Chemistry (4)
(Conjoined with Chem. 173.) Chemical principles applied to the study of atmospheres. Atmospheric photochemistry, radical reactions, chemical lifetime determinations, acid rain, greenhouse effects, ozone cycle, and evolution are discussed. Chem. 273 students will be required to complete additional course work beyond that expected of students in Chem. 173. PREREQUISITES: Chem. 6A–B–C, or Chem. 6AH, 6BH and 6CH, or equivalent; or graduate standing. (S/U grades only.)

285. Introduction to Computational Chemistry (4)
(Conjoined with Chem. 185.) Course in computational methods building on a background in mathematics and physical chemistry. Brief introduction and background in
computational theory, molecular mechanics, semi-empirical methods, and ab initio-based methods of increasing elaboration. Emphasis on applications and reliability. Chem. 285. Prerequisites: completion of an additional paper and/or exam beyond that expected of students in Chem. 185. Prerequisites: Chem. 126 or 133 and Math. 20C. (May not be offered every year.)

294. Organic Chemistry Seminar (2)
Formal seminars or informal puzzle sessions on topics of current interest in organic chemistry, as presented by visiting lecturers, local researchers, or students. Prerequisites: advanced graduate-student standing. (S/U grades only.) (F,W,S)

295. Biochemistry Seminar (2)
Formal seminars or informal puzzle sessions on topics of current interest in biochemistry, as presented by visiting lecturers, local researchers, or students. Prerequisites: advanced graduate-student standing. (S/U grades only.) (F,W,S)

296. Chemical Physics Seminar (2)
Formal seminars or informal sessions on topics of current interest in chemical physics as presented by visiting lecturers, local researchers, or students. Prerequisites: advanced graduate-student standing. (S/U grades only.) (F,W,S)

297. Experimental Methods in Chemistry (4)
Experimental methods and techniques involved in chemical research are introduced. Hands-on experience provides training for careers in industrial research and for future thesis research. Prerequisites: graduate-student standing. (F,W,S)

298. Special Study in Chemistry (1-4)
Reading and laboratory study of special topics for first-year graduate students under the direction of a faculty member. Exact subject matter to be arranged in individual cases. Prerequisites: graduate-student standing. (S/U grades only.) Prerequisites: first-year graduate-student standing. (F,W,S)

299. Research in Chemistry (1-12)
Prerequisites: graduate-student standing and consent of instructor. Prerequisites: consent of instructor. (S/U grades only.) (F,W,S)

500. Teaching in Chemistry (4)
A doctoral student in chemistry is required to assist in teaching undergraduate chemistry courses. One meeting per week with instructor, one or more meetings per week with assigned class sections or laboratories, and attendance at the lecture of the undergraduate course in which he or she is participating. Prerequisites: graduate-student standing and consent of instructor. Prerequisites: graduate-student standing and consent of instructor. (S/U grades only.) (F,W,S)

THE MINOR

The Chicano/a–Latino/a Arts and Humanities minor is an interdisciplinary minor that provides a broad introduction to the histories and cultural artifacts produced by Spanish-speaking communities in the United States. Through a coordinated course of study drawing upon course offerings in the Departments of Theatre and Dance, Ethnic Studies, Communication, History, Literature, and other departments, students will gain an understanding of this important segment of the U.S. population.

REQUIREMENTS

Students will have a minimum of two years or the equivalent of Spanish language instruction (satisfactory completion of Lit/Spanish 2A, B, C or Lit/Span 2D will satisfy this requirement). Students may count one lower-division language course (four units) towards the total unit requirement.

Students will complete twenty-eight total units of which at least twenty (five courses) must be upper-division. Students may take no more than three upper-division courses in any one department. The required distribution of the five upper-division courses may be selected from among the following courses. Students may petition to receive credit for courses not listed below.

COURSES

(Partial List)

ETHNIC STUDIES

Note: Many ETHN courses are cross-listed courses from other departments.

ETHN 101. Ethnic Images in Film
ETHN 105. Ethnic Diversity and the City
ETHN 140. Language and American Ethnicity
ETHN 141. Language, Culture, and Inequality
ETHN 189. Special Topics in Ethnic Studies

HISTORY

HILD 7C. History of Race and Ethnicity in the U.S.
HIUS 167. Topics in Mexican American History
HIUS 180. Colloquium on the Recent History of Immigration, Ethnicity, and Citizenship in the Twentieth-Century U.S.

HILA 158. Social and Economic History of the Southwest I
HILA 159. Social and Economic History of the Southwest II
HILA 131. History of Mexico
HILA 132. Contemporary Mexico
HILA 122. Cuba

LITERATURE

The following courses are taught in Spanish–Literature Spanish (LTSP):

LTSP 130B. Introduction to Latin American Literature
LTSP 135B. Modern Mexican Literature
LTSP 136. Andean Literature
LTSP 137. Caribbean Literature
LTSP 150A. Early Latino/a and Chicano/a Cultural Production 1848–1960
LTSP 150B. Contemporary Latino/a and Chicano/a Cultural Production 1960 to present
LTSP 151. Topics in Chicano/a and Latino/a Cultures
LTSP 153. Chicano/a and Latino/a Poetry
LTSP 154. Chicano/a and Latino/a Literatures
LTSP 162. Spanish Language in the U.S.

The following courses are taught in English–Literature English (LTEN) and Literature of the Americas (LTAM):

LTEN 180. Chicano Literature in English
LTAM 100. Latino/a Cultures in the United States
LTAM 101. Early Latino/a and Chicano/a Cultures: 1848–1960
LTAM 102. Contemporary Latino/a and Chicano/a Cultural Production 1960 to present
LTAM 105. Gender and Sexuality in Chicano/a and Latino/a Cultural Production
LTAM 106. Modern Chicana and Mexican Women Writers
LTAM 107. Comparative Latino/a and U.S. Ethnic Cultures
LTAM 108. Chicano/a and Latino/a Cultures: Intellectual and Political Traditions
LTAM 109. Cultural Production of the Latino/a Diasporas
LTAM 110. Latin American Literature in Translation
LTAM 120. Mexican Literature in Translation

MUSIC

MUS 13AM. World Music/Multicultural America

THEATRE AND DANCE

TDHT 108. Luis Valdez
TDHT 110. Chicano Dramatic Literature
TDHT 111. Hispanic-American Dramatic Literature
TDHT 112. Gay and Lesbian Themes in U.S. Latino Theater

VISUAL ARTS

VIS 126AN. Pre-Columbian Art of Ancient Mexico and Central America

The Chinese Studies Program combines historical
understanding with an emphasis on modern and
contemporary China. The Chinese History Program
has a strong specialization in late imperial and
modern China. A full spectrum of courses on the
politics, economics, society, and culture of today’s
China are offered. Another focal point of research
interest is visual culture and cultural history in
modern and pre-modern China. The interdisciplinary
nature of the program (see departmental affiliation
of the participating faculty) can accommodate
students of a wide range of interests. In addition
to our local resources, the University of California
Education Abroad Program (EAP) and Opportunities
Abroad Program (OAP) are affiliated with various
universities and language institutes in China, Taiwan,
Hong Kong, and Singapore. This, together with
other academic exchange programs with a number
of Chinese universities, provides the possibility of
a junior year abroad, including both language courses
and courses dealing with various aspects of Chinese
studies. Subject to final approval by the program
chair, EAP credits may be transferred back to UC
San Diego to coordinate with on-campus offerings.
However, at least six of the upper-division courses
for the major must be taken at UCSD.

THE MAJOR PROGRAM
The student choosing a major in Chinese Studies
must meet the following requirements:
1. Two years of Mandarin Chinese (CHIN 10 A-B-C
and 20 A-B-C, CHIN 11-12-13 and 21-22-23 or
equivalent).
2. History 10-11-12 (East Asian History series or
equivalent)
3. Twelve upper-division courses in Chinese studies.
Courses must be taken from at least three
departments. At least one of these courses should
be a seminar or colloquium (i.e. HIEA 160/260-
171/271) in which students would be expected
to write a substantial term paper. No more than
six upper-division language courses may count
toward the major requirement. A minimum of six
upper-division courses must be taken at UCSD.
4. As a rule, only courses taken for a letter grade
can satisfy program requirements (major, minor).
Exceptions are granted for Chinese Studies 198
and 199.

In principle, the courses included in the Chinese
Studies Program are those campus offerings dealing
with China or the Chinese language. Most of the
courses listed below are planned by participating
departments for the current academic year.

HONORS PROGRAM
Requirements for admission to the program are:
1. Junior standing
2. A GPA of 3.5 or better in the major
3. Overall GPA of 3.2 or better
4. Recommendation of a faculty sponsor familiar
with the student's work
5. Completion of at least four upper-division courses
approved by the Chinese Studies Program
6. Completion of at least one year of Chinese
language study

Students who qualify for honors take a two-
quarter sequence of directed study during which
they define a research project, carry out the research,
and complete a senior thesis.

The completed thesis will be evaluated by a com-
mitee consisting of the student’s thesis advisor
and one other faculty member appointed by the Chinese
Studies Program chair.

THE MINOR PROGRAM
A minor in Chinese Studies consists of at least three
lower-division courses (a minimum of twelve units)
and four upper-division courses (a minimum of
sixteen units) taken for a letter grade. These courses
should be chosen from three programs or depart-
ments. No more than three language courses may
apply toward the minor requirement. For students
wishing to apply courses taken abroad to the
minor, please see the program coordinator for more
information. A list of approved courses is available
quarterly from the Chinese Studies Program.

COURSES
For course descriptions not found in the UC San
Diego General Catalog, 2009–10, please contact the
department for more information.

COMMITEE-SPONSORED COURSES
10A-B-C. First-Year Chinese (5-5-5)
[Formerly 11-12-13. First-Year Chinese (5-5-5)]
20A-B-C. Second-Year Chinese (4-4-4)
[Formerly 21-22-23. Second-Year Chinese (4-4-4)]
100A-B-C. Third-Year Chinese (4-4-4)
[Formerly 111-112-113. Third-Year Chinese (4-4-4)]
121-122-123. Fourth-Year Chinese (4-4-4) (Not offered
in 2009–10).
Each of these year-long sequences begins in the
fall term. Students wishing to take more than one
Chinese language class in the same quarter must
obtain approval from the head of the language
program prior to enrolling in the second course.

All Chinese language courses have N, M, and D tracks.
N track is for students with no Chinese language
background; M track is for students with some
Mandarin Chinese language background; D track
is for students with Chinese language background
other than Mandarin.

160/260. Late Imperial and Twentieth-Century
Chinese Historical Texts (4)
This course introduces the primary sources used by histori-
ans of Late Imperial and Twentieth-Century Chinese history.
Reading material includes diaries, newspaper articles, Qing
documents, gazetteers, essays, speeches, popular fiction,
journal articles, scholarly prose, and field surveys. May be
repeated for credit. (P/NP grades only) PREREQUISITE:
advanced knowledge of Chinese language and consent
of instructor.

165A. Business Chinese (4)
Basic training in oral and written communication skills
for business, including introduction to modern business
terminology and social conventions. **PREREQUISITE:** CHIN 113, CHIN 100C, or equivalent.

165B. Business Chinese (4)
Continuation of CHIN 165A. Basic training in oral and written communication skills for business, including introduction to modern business terminology and social conventions. **PREREQUISITE:** CHIN 165A or equivalent.

165C. Business Chinese (4)
Continuation of CHIN 165B. Basic training in oral and written communication skills for business, including introduction to modern business terminology and social conventions. **PREREQUISITE:** CHIN 165B or equivalent.

181A. Introduction to Classical Chinese (4)
Introduction to the classical language through Confucius, Mencius, and the other Great Books. The emphasis will be on comprehension and reading ability. **PREREQUISITE:** CHIN 23 or equivalent.

181B. Introduction to Classical Chinese (4)
Continuation of Chinese Studies 181A. **PREREQUISITE:** CHIN 181A or equivalent.

181C. Introduction to Classical Chinese (4)
This course is a continuation of 181A and B. Short passages from major historical, literary, and philosophical works are introduced. **PREREQUISITE:** CHIN 181B or equivalent.

182A. Introduction to Classical Chinese–Advanced I (4)
An introduction to classical Chinese for students with advanced Chinese background. Basic structures and function words are taught through fables of the pre-Qing period. **PREREQUISITE:** CHIN 113, CHIN 100C, or department approval.

182B. Introduction to Classical Chinese–Advanced II (4)
Continuation of CHIN 182A. Selections from Kongzi, Mengzi, and other philosophers' work will be taught. Focus is on structures, function words, and overall comprehension of a text. **PREREQUISITE:** CHIN 182A or departmental approval.

182C. Introduction to Classical Chinese–Advanced III (4)
Continuation of CHIN 182B. Selections from later periods like Shi ji and poetry will be introduced. Upon completion of this year-long curriculum, students should be able to read classical Chinese texts on their own with the help of a dictionary. **PREREQUISITE:** CHIN 182B or department approval.

185A–B–C. Readings in Chinese Culture and Society (4-4-4)
This course will enlarge a student's vocabulary and improve reading skills through studies of original writings and other media on Chinese culture and society, past and present. **PREREQUISITE:** CHIN 113, CHIN 100C, or consent of instructor.

186A–B–C. Readings in Chinese Economics, Politics, and Trade (4-4-4)
Introduction to the specialized vocabulary relating to Chinese politics, trade, and development. Designed for students in the social sciences or with career interests in international trade, the course will stress reading and translating documents, and the special forms of business correspondence and oral negotiation. **PREREQUISITE:** CHIN 113, CHIN 100C, or equivalent.

196. Directed Thesis Research (4)
B.A. honors thesis under the direction of a faculty member in Chinese studies. This course requires two quarters to complete. An IP grade will be awarded at the end of the first quarter. **PREREQUISITE:** consent of instructor. (FA, W, SP)

198. Directed Group Study in Chinese Studies (2 or 4)
Study of specific aspects in Chinese civilization not covered in regular course work, under the direction of faculty members in Chinese studies. (P/NP grades only) **PREREQUISITE:** consent of instructor. (FA, W, SP)

199. Independent Study in Chinese Studies (2 or 4)
The student will undertake a program of research or advanced reading in selected areas in Chinese studies under the supervision of a faculty member of the Program in Chinese Studies. (P/NP grades only) **PREREQUISITE:** consent of instructor. (FA, W, SP)

260. Late Imperial and Twentieth-Century Chinese Historical Texts (4)
This course introduces the primary sources used by historians of the Late Imperial and twentieth-century Chinese history. Reading material includes diaries, newspaper articles, Qing documents, gazetteers, essays, speeches, popular fiction, journal articles, scholarly prose, and field surveys. May be repeated for credit. (P/NP grades only) **PREREQUISITE:** Advanced knowledge of Chinese language and consent of instructor.

269. Conversational Mandarin for Medical Students—Beginning (2)
(Cross-listed with MED 269) This introductory course is designed to develop a working knowledge of medical Mandarin that will enable the student to communicate with Mandarin-speaking patients. There will be instruction in basic medical vocabulary and grammar, with a focus on taking a medical history. No previous knowledge of Mandarin is required since this is only a conversation course. For graduate and School of Medicine students. (S/U only)

296. Directed Thesis Research (2-12)
Graduate thesis research under the guidance of a faculty member affiliated with the Program in Chinese Studies.

500. Apprentice Teaching (1-4)
A course in which teaching assistants are aided in learning proper teaching methods by means of supervision of their work by the faculty; handling of discussions, preparation and grading of exams and other written exercises, and student relations.

**DEPARTMENT-SUPPORTED COURSES**

For description of courses listed below, see appropriate departmental listing. All graduate-level courses require consent of the instructor for undergraduate students. Some departmental offerings have content that varies from year to year. In those cases, Chinese Studies approval is given only when content relates primarily to China.

Dayna Kalleres, Ph.D., Literature

UC TRI-CAMPUS CLASSICS PROGRAM FACULTY
Thomas F. Scanlon, Ph.D., Ohio State University,
Professor of Classics and Program Director, UCR (Greek and Roman historiography, ancient athletics)
Georgios Anagnostopoulos, Ph.D., Brandeis University, Professor of Philosophy, UCSD (ancient Greek philosophy, ethics, metaphysics)
Luci Berkowitz, Ph.D., Ohio State University, Professor Emerita of Classics, UCI (Greek literary history, computer applications to literature)
Cynthia L. Claxton, Ph.D., University of Wisconsin, Lecturer in Classics and Graduate Teaching Supervisor, UCI (Greek prose, historiography)
Page duBois, Ph.D., University of California, Berkeley, Professor of Classics and Comparative Literature, UCSD (Greek literature, rhetoric, critical theory, cultural studies)
Anthony Edwards, Ph.D., Cornell University, Professor of Classics and Comparative Literature, UCR (epic, Greek comedy, critical theory)
Richard I. Frank, Ph.D., University of California, Berkeley, Associate Professor Emeritus of History and Classics, UCI (Roman history, Latin elegy and satire, classical tradition)
Zina Giannopoulou, Ph.D., University of Illinois, Assistant Professor of Classics, UCI (literary theory and Platonic hermeneutics, classical and Hellenistic philosophy, Greek tragedy and epic)
David Glidden, Ph.D., Princeton University, Professor of Philosophy, UCR (Greek and Roman philosophy)
Anna Gomosová, Ph.D., Harvard University, Associate Professor of Art History, UCI (Byzantine and Medieval art)
Monte Johnson, Ph.D., University of Toronto, Assistant Professor of Philosophy, UCR (early Greek philosophy, classical Greek philosophy, and the influence of ancient philosophy on the history of science)
Dayna Kalleres, Ph.D., Brown University, Assistant Professor of Literature and Study of Religion, UCSD (early to late antique Christian literature and culture)
Andromache Karakini, Ph.D., Princeton University, Assistant Professor of Classics, UCI (Greek epic poetry, Greek lyric, folklore)
Edward N. Lee, Ph.D., Princeton University, Professor Emeritus of Philosophy, UCSD (Greek philosophy, Plato)
Marianne McDonald, Ph.D., University of California, Irvine, Professor of Theatre and Classics, UCR (Greek and Roman theatre, ancient drama in modern plays, film, and opera)
Margaret M. Miles, Ph.D., Princeton University, Associate Professor of Art History, UCI (Greek and Roman art and archaeology, ancient Sicily, Greek religion)
Alden A. Mooshammer, Ph.D., Brown University, Professor Emeritus of History, UCI (early Christian thought, Greek chronography, early Greek history)
Sheldon Nodelman, Ph.D., Yale University, Professor of Visual Arts, UCSD (classical art and architecture, Roman portraiture, critical theory)
Maria C. Pantelia, Ph.D., Ohio State University, Associate Professor of Classics and Director Thesaurus Linguae Graecae, UCI (Greek epic poetry, Hellenistic poetry, computer applications to classics)
Wendy Raschke, Ph.D., State University of New York, Buffalo, Lecturer in Classics, UCR (Roman satire, Greek art and archaeology)
B. P. Reardon, D.U. Université de Nantes, Professor Emeritus of Classics, UCI (late Greek literature, ancient novel)
Michele Salzman, Ph.D., Bryn Mawr College, Associate Professor of History, UCR (late antiquity, Roman history and literature, religion, women's studies)
Gerasimos Santas, Ph.D., Cornell University, Professor of Philosophy, UCI (ancient philosophy, history of philosophy, ethics)
Patrick Sinclair, Ph.D., Northwestern University, Associate Professor Emeritus of Classics, UCI (Roman historiography, Latin lexicography, rhetoric)
Dana F. Sutton, Ph.D., University of Wisconsin, Professor Emeritus of Classics, UCI (Greek and Latin drama, Greek poetry, Anglo-Latin literature)
Andrew Zissos, Ph.D., Princeton University, Assistant Professor of Classics, UCI (Latin epic, medieval Latin, Roman culture)

Classical studies is concerned with the cultures of ancient Greece and Rome—roughly from the time of Homer through the time of St. Augustine—in all of their aspects. This program thus offers undergraduate an opportunity to study the cultures of Greece and Rome through the combined resources of the Departments of History, Literature, Visual Arts, Theatre and Dance, and Philosophy. The study of the ancient Greek and Latin languages themselves serves as the starting point for the broader consideration of specific texts in their literary, intellectual, and historical context. Moreover, in cooperation with the Judaic Studies Program, students are provided the opportunity to link the study of ancient Greece and Rome to that of the ancient Near East.

THE MAJOR PROGRAMS

The Classical Studies Program offers four different degree paths, three within classical studies and one in cooperation with Judaic studies. The majors are Greek, Latin, classics, and Greek and Hebrew. Each consists of a choice of twelve upper-division courses (forty-eight units) approved for the program and listed below. All courses used to meet requirements for a major in classical studies must be taken for a
letter grade and be passed with a grade of C– or better.

Graduate courses may be taken by undergraduates with consent of the instructor. The faculty of the program welcome qualified undergraduates in graduate courses.

Additional courses counting toward a major in classical studies are offered on a year-to-year basis, both at the undergraduate and graduate levels. As these often cannot be listed in advance, interested students should consult the program faculty for an up-to-date list.

GREEK
LTWL 19A-B-C are prerequisites to the Greek major. Six of the twelve upper-division courses must be LTGK courses numbered 100 and above, but exclusive of LTGK 101. The remaining six courses may be in classical civilization (in English translation), selected from the list of approved courses for history, Lit/World, philosophy, political science, and visual arts, though additional LTGK courses numbered 100 and above (including LTGK 101) are acceptable here. These must be from at least two departments and selected in consultation with the advisor; courses dealing with Greek civilization are strongly preferred.

LATIN
LTWL 19A-B-C are prerequisites to the Latin major. Six of the twelve upper-division courses must be LTLA courses numbered 100 and above, but exclusive of LTLA 101 and 102. The remaining six courses may be in classical civilization (in English translation), selected from the list of approved courses from history, Lit/World, philosophy, political science, and visual arts, though additional LTLA courses numbered 100 and above (including LTLA 101 and 102) are acceptable here. These must be from at least two departments and selected in consultation with the advisor; courses dealing with Roman civilization are strongly preferred.

CLASSICS
LTWL 19A-B-C are prerequisites to the classics major. Nine of the twelve upper-division courses must be distributed between LTLA and LTGK courses numbered 100 and above (but exclusive of LTGK 101) and Judaic Studies 101-102-103 or LTNE courses numbered 100 through 112, six in one literature and three in the other according to the student’s emphasis. The remaining three courses may be in ancient Greek and Judaic civilization (in English translation), selected from the list of courses approved for classical studies and from the list of courses approved for Judaic studies, though additional LTGK courses numbered 100 and above (including LTGK 101) or Judaic Studies 101-102-103 or LTNE courses numbered 100 through 112 are acceptable here. These must be from at least two departments and selected in consultation with the advisor (who is selected in accordance with the student’s emphasis) to reflect the relative emphasis upon the Greek and Hebrew literatures, but with at least one course from each program.

THE MINOR PROGRAMS

CLASSICAL STUDIES
A minor in classical studies consists of seven courses (twenty-eight units) from those listed below, of which at least four must be upper-division. A knowledge of the ancient languages is not required. The minor will normally include LTWL 19A-B-C. The Greco-Roman World, and four other courses from the participating departments. All courses used to meet requirements for the minor in Classical Studies must be taken for a letter grade and passed with a grade of C– or better.

Greek
See Literature: “The Minor in Literature”

Latin
See Literature: “The Minor in Literature”

WARREN COLLEGE
A Warren College program of concentration in classical studies normally consists of LTWL 19A-B-C and three of the upper-division courses listed below.

HONORS IN GREEK, LATIN, AND CLASSICS
Honors is intended for the most talented and motivated students majoring in Greek, Latin, classics, or Greek and Hebrew. Requirements for admission to the honors program are

Junior standing
An overall GPA of 3.5
A GPA in the major of 3.7
Qualified students majoring in Greek, Latin, or classics may apply at the end of their junior year to the program faculty on the basis of 1) a thesis proposal (three to four pages) worked out in advance with a classical studies faculty member and 2) a recommendation from that faculty member. It is strongly advised that the proposal be based upon a class paper or project from a course taken toward completion of the major.

The core of the honors program is an honors thesis. The research and writing of the thesis will be conducted over the winter or fall and winter terms of the senior year. Up to four units of 196 course credit to this end may be counted toward the major in place of one of the courses in English translation. A thesis completed by the end of the winter quarter of the senior year will be read and evaluated by the thesis advisor and another member of the program faculty. If the thesis is accepted and the student maintains a 3.7 GPA, departmental honors will be awarded. The level of honors—distinction, high distinction, or highest distinction—will be determined by the program faculty.

Students choosing a major in Greek and Hebrew may complete an honors major as follows: Those with an emphasis on Greek must meet the requirements for honors in the Classical Studies Program and work with a thesis advisor from classical studies, but select a second advisor for the thesis from Judaic studies. Those with an emphasis on Hebrew must meet the requirements for honors in the Judaic Studies Program and work with a thesis advisor from Judaic studies, but select a second advisor for the thesis from classical studies.

TRANSFER STUDENTS
UC San Diego’s Program in Classical Studies welcomes transfer students. Students planning to transfer from two-year colleges should try to complete as many of the lower-division prerequisites for the major as possible: specifically, a course equivalent in duration and content to UCSD’s Literatures of the World 19A-B-C and, if possible, elementary Greek and/or Latin, as appropriate for the planned classical studies major. Students with questions about transferring into UCSD’s Program in Classical Studies should review the “Admission Information for Transfer Students” on the UCSD Web site (go to http://www.ucsd.edu and choose Prospective Students, then Admissions, then For Transfer Students) and feel free to contact the faculty advisor for the program with any questions.

THE UNIVERSITY OF CALIFORNIA TRI-CAMPUS GRADUATE PROGRAM IN CLASSICS

UC Irvine, UC Riverside, and UC San Diego

What is the UC Tri-Campus Program? This graduate program joins together into a single faculty more than twenty experts in classics and related disciplines from the three southernmost University of California campuses (Irvine, Riverside, and San Diego). It features an innovative curriculum and program of study that address the practical and theoretical questions confronting the humanities and classics in particular as both enter the twenty-first century.

What are the program’s goals? The aim of the Tri-Campus Program is to provide an educational environment for pursuing a graduate career in classics that is closely integrated into the main currents
of humanistic and social scientific scholarship. The program's faculty recognizes that today and in the future, teachers of the classics must possess and develop expertise beyond the standard specialties of the traditional classics Ph.D. degree. Classics programs, in both large research universities and small liberal arts colleges, increasingly feel the pressure to break down the boundaries between disciplines.

To achieve these goals, the program and curriculum are designed around five principles:

- Study the ancient texts and objects in their wider social, cultural, and historical contexts.
- Bring the culture of the ancient Greeks and Romans into the purview of contemporary literary and sociological theory.
- Examine the reception of ancient literature and culture by later cultures and the appropriation of the ancient world by the modern world.
- Pay particular attention to the intersections of the traditional classics Ph.D. degree. Classics programs, in both large research universities and small liberal arts colleges, increasingly feel the pressure to break down the boundaries between disciplines.
- Utilize, to the fullest the potential, new computing technologies as tools for research and teaching.

These five interdisciplinary principles are embodied in the four Core Courses (Classics 200A, 200B, 200C, and 201). Graduate seminars (Classics 220) and reading courses in Greek and Latin authors (Classics 205) round out the program of studies. This curriculum has been in effect at UC Irvine since 1995, taught by faculty members from all three campuses.

**Where do I apply?** The Tri-Campus Program uniquely does not belong to a particular campus but to the University of California. Students who are accepted into the program may enroll at any of the three campuses. Because instruction and administrative functions take place on the Irvine campus, students will normally enroll at UC Irvine. Applications to the Tri-Campus Graduate Program will be reviewed by an admissions committee composed of members from all three campuses.

**Where is the Tri-Campus Program located?** UC Irvine is located five miles inland from the Pacific Ocean, fifty miles south of metropolitan Los Angeles, forty-five miles southwest of UC Riverside, and seventy-four miles north of UCSD. In addition to its beaches, mountains, and deserts, Southern California offers excellent cultural amenities such as museums, theater, dance, opera, and music.

**What are the requirements for admission?** Applicants to the program should have a B.A. or equivalent in classics or classical civilization, which normally means that you have had at least three years of one classical language and two of the other. Majors in other disciplines (e.g., comparative literature, history, philosophy, or interdisciplinary fields such as women's studies) are welcome, provided they have sufficient background in Greek and Latin. All applicants must submit Graduate Record Exam (GRE) scores and must have a minimum GPA of 3.0 or the equivalent. If you have completed an M.A. in classics at another institution, you may be admitted with advanced standing and may have the course requirements reduced from the normal three years to two or one. The level of course reduction will be determined by progress evaluation exams administered in the spring quarter of each year.

**The Role of the Joint Executive Committee**

The Tri-Campus Program is administered by a joint executive committee (JEC), which consists of six representatives, two from each campus, serving staggered, two-year terms. The JEC's responsibilities include reviewing graduate applications and admitting students to the program; overseeing the formation of examination and dissertation committees; reviewing and deciding on student petitions; making policy decisions concerning the program, including changes in the program's requirements and procedures; and interpreting the program's requirements and procedures. The JEC elects from its members a chair to serve a three-year term. It is the chair's responsibility to manage budgetary issues, schedule and set the agenda for quarterly JEC meetings, identify faculty to teach graduate courses, and generally look after the smooth operation of the program.

**The Role of the Graduate Advisor**

The graduate advisor is a faculty member responsible for supervising graduate study in the department and monitoring the academic progress of graduate students. The graduate advisor coordinates the various elements of the academic program and advises students and other faculty members about program requirements and university policies. The graduate advisor keeps records for each student and for the whole program, ensures that each student meets all requirements and makes satisfactory progress toward attainment of the degree, and is instrumental in the nomination of students for fellowship support and assistantship appointments. The graduate advisor also provides general help to students as they attempt to negotiate the academic and administrative hurdles on their way to completion of their degrees. The graduate advisor is an ex-officio member of the Tri-Campus JEC for the duration of his or her tenure, normally two years.

**Election of Student Representative**

Graduate students elect a representative who attends JEC meetings as a regular voting member. Graduate students are also invited to attend meetings as observers and to participate where appropriate. The voting rights and attendance of the graduate student representative are circumscribed by the requirements of confidentiality.

**THE PH.D. AND THE M.A. PROGRAMS**

A student's career may be thought of as covering three stages: course work, preparation for qualifying exams, and candidacy (dissertation). For Ph.D. students the normative limits for completion of the program are four years to advancement to candidacy, two years to final approval of the dissertation, and a maximum of seven years in total. Students are only admitted into the Ph.D. program. Entering students who do not already hold a master's degree in classics from another institution will be required to complete M.A. requirements while pursuing the Ph.D.

**COURSE WORK FOR THE M.A.**

The M.A. degree in classics may be awarded either upon completing the Ph.D. course requirements and passing the written Ph.D. examinations or upon completing the M.A. course requirements and master's paper and passing the M.A. translation examinations and general exam. The latter path to the M.A. is intended for Ph.D. students who decide to leave the program before completing the requirements for a Ph.D.

M.A. students must successfully complete a minimum of twelve approved seminar-level courses. The twelve courses must be distributed as follows:

- Nine quarters of Classics 220.
- At least three quarters of Classics 200A-B-C and 201; a fourth quarter may be substituted for a Classics 220.
- Up to one quarter of Classics 290 for research and writing of the master's paper may be substituted for a Classics 220.
- If remedial work is required in Greek or Latin, with the graduate advisor's approval, one enhanced upper-division Greek or Latin course enrolled as a Classics 280 may be substituted for a Classics 220.
- With the graduate advisor's approval, M.A. students may substitute one external graduate seminar in a relevant area outside of classics (at any of the three participating campuses) for a Classics 220.

**COURSE WORK FOR THE PH.D.**

Ph.D. students must successfully complete a minimum of eighteen approved seminar-level courses. The eighteen courses must be distributed as follows:

- Four quarters of Classics 200A-B-C, and 201.
- Twelve quarters of Classics 220.
- Two external graduate seminars, from departments or programs outside of classics. These may be taken from the offerings of any of the three campuses.
- Students may take up to two quarters of enhanced upper-division Greek or Latin courses (enrolled as 280s) in place of Classics 220s, with permission of the graduate advisor if remedial work is required in Greek or Latin.
- Where appropriate, in the third year of course
work, a second Classics 200A, B, or C, may be substituted for a 220.

- Classics 280, Independent Study (supervised research) may be substituted for Classics 220s only with the permission of the graduate advisor.
- Up to twelve equivalent graduate-level courses completed elsewhere may be substituted for Tri-Campus Program courses with approval of the JEC.

Classics 280 may be used, normally in the fourth year, to provide time to work on the Greek and Latin reading lists and to prepare for qualifying exams, but these courses do not count towards the required eighteen courses. Ph.D. students must meet with the graduate advisor early every fall quarter to discuss their progress through the curriculum and their plans for the coming academic year. A student who accumulates more than one outstanding grade of incomplete is considered to be at risk.

For student files, faculty teaching graduate courses will submit to the graduate advisor a brief written evaluation for each student, commenting on the student’s performance and noting whether the student wrote a seminar paper for the course. The graduate advisor will lead the JEC in an annual review of all active graduate students in the program at the JEC’s spring meeting.

**EXAMINATIONS**

Diagnostic Exams: Immediately upon entering the program, the student takes diagnostic translation examinations in both Greek and Latin to establish his or her level of competency and to determine where effort should be directed. In the second year of course work, students will take as diagnostic exams the Latin and Greek translation exams administered as part of the qualifying exam battery.

**Exams for the M.A.**

**Foreign Language Requirement:** Students must demonstrate reading knowledge of German, French, Italian, or an equivalent research language either through appropriate course work or by examination.

**Translation Exams:** Each student must pass a set of translation examinations in Greek and in Latin administered by the master’s committee (two hours each).

The JEC, in consultation with the graduate advisor and the student, recommends to the graduate dean a three-member master’s committee composed of program faculty from at least two campuses to set and evaluate the translation exams and to evaluate the master’s paper. Normally this committee is established in the quarter preceding completion of the master’s paper.

**Exams for the Ph.D.**

1. **Foreign Language Requirements:** Ph.D. students must demonstrate reading proficiency in one modern research language (normally German, French, or Italian) by the end of their second year either through appropriate course work or by examination. Proficiency in a second modern research language is expected by the end of the third year.

2. **Ph.D. Qualifying Exams:** In order to advance to candidacy for the Ph.D. and to enter the dissertation stage, a student must pass a set of seven qualifying exams. The translation exams, history exams, and history of the literatures exam are administered and evaluated on a regular schedule over the academic year by examination boards composed of one faculty member from each campus and appointed for that purpose by the JEC at the graduate advisor’s recommendation. The JEC, in consultation with the graduate advisor and the student, recommends to the graduate dean a five-member candidacy committee composed of four program faculty (from at least two campuses) and one outside member holding tenure on one of the participating campuses (i.e., not a member of the program faculty) to organize and administer the special-area exam and the oral exam taken by the candidate after successful completion of the other exams. All committee members for both candidacy and doctoral committees should normally be voting members of the Academic Senate of the Irvine, Riverside, or San Diego divisions. Any exceptions must hold a Ph.D. be qualified for a UC faculty appointment, and be supported by a memo of justification and a CV submitted by the graduate advisor to the graduate dean for approval at least two weeks prior to an exam. The qualifying examinations include written examinations and a final oral examination:
   a. Greek and Latin translation (three hours each)
   b. Greek and Roman history (two hours each)
   c. History of Greek and Roman literature (three hours)
   d. A “special area” that can be fulfilled by either an extensive research paper or a three-hour written exam
   e. Oral examination to be administered by the candidacy committee and taken only after the other exams have been passed (two hours: one hour general knowledge and one hour special-area exam paper or research paper)

These exams are based on the Tri-Campus Reading Lists and should be completed by the end of the fourth year. The exams on Greek and Roman history are based on up to six books each, three prescribed on the reading list for this exam and up to three agreed to by the student and graduate advisor. The exam on the history of Greek and Roman literature is based on the Greek and Latin Reading Lists and the books prescribed on the reading list for this exam. Students are expected to read, in the original, all works on the Greek and Latin Reading Lists, whether or not they have appeared in courses. (Students may negotiate with the graduate advisor substitutions on the Greek and Latin Reading Lists comprising up to twenty percent of their total length in order to accommodate the particular interests of the individual student.) Upon successful completion of the written examinations, the oral exam will be scheduled. Students failing segments of the qualifying exams may normally retake those sections only once after the interval of one quarter or the summer break, as the case may be. Students may retake segments of the qualifying exams more than once only at the discretion of the JEC. A grade of Pass in all examinations is required for admission to candidacy.

**Thesis and Defense for the M.A.**

The master’s paper comprises a substantial piece of original research. It should exceed the breadth and depth expected for a seminar paper, which can provide a good foundation for the master’s paper. The master’s paper must be submitted to members of the master’s committee three weeks in advance of the general exam.

If the master’s paper is found to be of passing quality by the committee, the student may take the general exam, a one-hour oral exam covering the broader implications of the master’s paper and the classical world generally.

**Thesis and Defense for the Ph.D.**

When the student has advanced to candidacy, the JEC—in consultation with the candidate, the graduate advisor, and the proposed chair of the doctoral committee—will recommend to the dean of the Graduate Division a doctoral committee composed of at least three program faculty (from at least two of the three campuses) and one outside member who holds tenure at one of the participating campuses. The doctoral committee will serve as the examination committee for the thesis defense. Within the first quarter after completion of the qualifying exams and all other prerequisites, the candidate will submit a dissertation proposal for discussion and evaluation to the doctoral committee.

A public oral defense of the dissertation will be scheduled upon its submission to the doctoral committee. Members of the committee must be supplied with a copy of the dissertation at least three weeks before the exam date.
THE EMPHASIS IN COMPARATIVE LITERATURE

Course Work

For the emphasis in comparative literature, students must take at least five graduate courses in the Department of English and Comparative Literature. One course should be Criticism 222A or C. or Comparative Literature 200. At least three of the courses should have a Comparative Literature designation. One of the courses could be Humanities 270 (Critical Theory). Classics students can devote the required outside seminars to this emphasis and may, with the graduate advisor's approval, make appropriate substitutions of courses.

Qualifying Exams

One topic on the Ph.D. qualifying examination must be on a comparative literature topic and should be prepared with a professor from the Comparative Literature Program who would serve as a member of the student's exam committee. The student should be able to demonstrate some expertise in comparative critical methodologies as well as knowledge of a literature and tradition other than classics. Normally classics students will fulfill this requirement by selecting the research-paper option for the oral-exam stage of the qualifying examinations.

Dissertation

One member of the student's doctoral committee must be from the Program in Comparative Literature. Students must submit an application for the emphasis to the graduate advisor in classics, and the department will track the students' progress and fulfillment of the emphasis requirements. Upon graduation, students will receive a letter from the graduate advisor certifying completion of the emphasis.

ATTENDANCE AT COLLOQUIA AND OTHER DEPARTMENTAL ACTIVITIES

Seminars, colloquia, and other activities of interest to classics graduate students are organized regularly by the Tri-Campus Graduate Program. Since these activities are considered part of the student's professional training, all students are required to attend them. Students are also urged to acquaint themselves with colloquia offered in other fields.

SUPPORT FOR GRADUATE STUDENTS

A variety of fellowships and teaching assistantships is available to classics graduate students on a competitive basis. They include Chancellor's Fellowships, Regents' Fellowships, and Dissertation Fellowships, as well as the Thesaurus Linguae Graecae Fellowship. Several teaching and research assistantships are also available and provide a stipend in addition to tuition and fees. Some fourth- and fifth-year teaching assistantships are held at UC Riverside and UC San Diego. Continuation of support is contingent upon satisfactory academic progress. Support from various sources is normally extended to students in good standing for up to six years.

RESOURCES OF THE TRI-CAMPUS PROGRAM

The Department of Classics at UC Irvine, which is the administrative center of the Tri-Campus Program, is housed in pleasant quarters in Humanities Office Building 2. Tri-Campus graduate students avail themselves of:

- Superior library holdings in classics and related fields in the combined collections of all nine University of California research libraries, access to the holdings of the California Digital Library, and expeditious Interlibrary Loan Services with other U.S. and international libraries.
- The facilities of the Thesaurus Linguae Graecae Project (TLG) at UC Irvine, including the complete TLG data bank, the Classics/TLG Computing Lab, and the large collection of primary texts, commentaries, and reference materials housed in the TLG's Marianne Eirene MacDonald Library. Formal (Classics 201) and informal instruction in computer-related methodologies for research and teaching are conducted at the Classics/TLG Computing Lab.
- The Consortium for Latin Lexicography (CLL) at UC Irvine, a collaborative research group whose primary goal is to create a computerized Latin dictionary based on the Thesaurus Linguae Latinae (TLL) in Munich.
- The faculty and program in comparative ancient civilizations at UC Riverside, which are dedicated to a cross-cultural and cross-disciplinary approach to the study of ancient cultures.
- Combined UCI-UCSD Ph.D. Program in theatre, which has a strong classics component, and the nationally renowned regional theatre in La Jolla.
- Seminars, colloquia, and lectures regularly offered by the Critical Theory Institute at UC Irvine and by the University of California Humanities Research Institute that is housed on the UC Irvine campus. Tri-Campus doctoral students may add an emphasis in critical theory under the supervision of the Committee on Critical Theory. The Tri-Campus Program also has its own colloquia series of lectures by visiting scholars on the three campuses.
- The Southern California Graduate Resource-Sharing Consortium, a cooperative association of the Tri-Campus Program and the graduate classics programs of UCLA and the University of Southern California. Every year a faculty member from each of these units offers a graduate seminar in his or her area of expertise at one of the other units. In the spring of every year faculty and graduate students conjoin at an annual consortium luncheon and lecture by a distinguished visiting scholar.

For further information and an online application to the program, please see the Tri-Campus Program's Web site at http://www.hnet.uc Irvine.edu/classics/tricampus/.

UNDERGRADUATE

Classical Studies 196A-B. Honors Thesis (2-4)
Cultural Traditions. Judaic 1A-B (4-4)
Humanities 1. The Foundations of Western Civilization: Israel and Greece (6)
PREREQUISITE: satisfaction of the Entry-Level Writing requirement. (W)
Humanities 2. Rome, Christianity, and the Medieval World (6)
PREREQUISITE: satisfaction of the Entry-Level Writing requirement. (S)
Humanities 3. Renaissance, Reformation, and Early Modern Europe (4)
PREREQUISITE: satisfaction of the Entry-Level Writing requirement. (F)
HIEU 101. Greece in the Classical Age (4)
HIEU 102. The Roman Republic (4)
HIEU 103. The Roman Empire (4)
HIEU 133. Gender in Antiquity and the Early Medieval Mediterranean (4)
HIEU 160. Topics in the History of Greece (4)
HIEU 161. Topics in Roman History (4)
HIEU 199. Independent Study in Greek and Roman History (4)
HISC 101A. Science in the Greek and Roman World (4)
LTGK 1-2-3. Beginning and Intermediate Greek (4-4-4)
LTGK 110. Archaic Period (4)
LTGK 112. Homer (4)
LTGK 113. Classical Period (4)
LTGK 120. New Testament Greek (4)
LTGK 130. Tragedy (4)
Clinical Psychology

OFFICE: Biomedical Sciences Building, Room 2056 (858) 534-4044

THE JOINT DOCTORAL PROGRAM

The interdisciplinary partnership of the Department of Psychiatry at the UCSD School of Medicine and the Department of Psychology at San Diego State University greatly extends the range of perspectives and furnishes unusual opportunities for graduate study leading to the Ph.D. degree in clinical psychology. The Joint Doctoral Group in Clinical Psychology currently consists of faculty from the UCSD Department of Psychiatry, School of Medicine, and the Departments of Neurosciences, Cognitive Science, Family and Preventive Medicine, and Psychology, and the SDSU Department of Psychology and School of Public Health.

Information regarding admission is found in the current edition of the Bulletin of the Graduate Division of San Diego State University and at our Web site: http://www.psychology.sdsu.edu/doctoral.

The program goal is to train clinical psychologists who are accomplished both as clinicians and as research scientists. The curricula and training provide a strong foundation in clinical psychological concepts, methods, theories, and data, together with intensive concentrations in specialized areas of clinical psychology. Currently our program has three areas of specialization: behavioral medicine, neuropsychology, and experimental psychopathology.

The scientist-practitioner model on which this program is based requires that students receive ongoing supervised research experience, including planning, design, implementation, analysis, and communication of findings. Equally important is extensive supervised experience aimed at developing sound general and specialized clinical skills. Students are expected to be actively involved in all these activities throughout their tenure in the program.

The program is designed as a five-year curriculum, including a one-year clinical internship. The curriculum is based on a twelve-month academic year. The program is accredited by the American Psychological Association.

Specific courses currently required as part of the core at UCSD include: Clinical Psychology 294A,B,C (required for neuropsychology track majors only); Clinical Psychology 296 (independent study, lab practicum); Clinical Psychology 299 (independent study project); School of Medicine 202E (Psychopathology).

PH.D. TIME LIMIT POLICIES

Students must be advanced to candidacy by the end of five years. Total University support cannot exceed six years. Total registered time at UCSD cannot exceed seven years.

ASSOCIATE PROGRAM DIRECTORS
Gerry R. Boss, M.D., Professor of Medicine
J. Allen McCutchan, M.D., Professor of Medicine in Residence

ASSOCIATED FACULTY
Gloria E. Bader, Ed.D., President, The Bader Group
Stephan Ber, Ph.D., Clinical Instructor, Family and Preventive Medicine
Simon D. Frost, D.Phil., Associate Adjunct Professor, Pathology
Theodore Ganiats, M.D., Professor, Family and Preventive Medicine
Leslie A. Lenert, M.D., Professor of Medicine, in Residence
W. Christopher Mathews, M.D., Professor of Clinical Medicine
Angela Fornatato McMahill, J.D., Director, Research Compliance and Clinical Trials Administrative Services Office
Joe W. Ramsdell, M.D., Professor of Clinical Medicine
Deborah L. Wingard, M.D., Professor, Family and Preventive Medicine
Michael G. Ziegler, M.D., Professor of Medicine

PROGRAM DESCRIPTION
The Master of Advanced Studies (MAS) in Clinical Research offers a broad-based curriculum in clinical research methodology and integrates classroom instruction with practical training to provide students with the knowledge and skills necessary to produce valid, credible research. Linking the academic and professional scientific communities, the program is appropriate for physicians, pharmacists, nurses with advanced training, psychologists, and biomedical scientists employed in biomedical firms, hospitals, and pharmacies. The program aims to accommodate the varying needs of the students through its modular approach to instruction, a part-time year-round schedule, and a choice of general electives organized by tracks.

The MAS in Clinical Research is a part-time, self-supporting degree program with a flexible course schedule designed for working professionals and academics. The UC San Diego graduate division confers the MAS degree and the Department of Medicine in the UCSD School of Medicine is responsible for the academic management of the curriculum. UCSD Extension administers the program and provides student advising and career counseling services.

ADMISSION
New students are admitted in the winter and summer quarter of each academic year. Prospective candidates should submit and complete the official UCSD online graduate application for admission, the application fee, one set of official transcripts from each institution attended after high school, three letters of professional letters of recommendation, and a current resume or c.v. The GRE/GMAT is not required; however, it is strongly recommended that candidates possess, or currently be pursuing, a graduate degree in a scientific or healthcare related field and also have some level of experience in scientific or clinical research. In some instances candidates without an advanced degree may be admitted to the program if they have demonstrated substantial professional experience in the field at increasing levels of responsibility. The application deadlines are September 17 (winter) and April 15 (summer).

PROGRAM OF STUDY
The part-time master’s degree program is designed to be completed in eighteen to thirty months, depending upon a participant’s time to devote to the program. Classes are typically scheduled in the late afternoons and evenings. The thirty-six-unit degree is comprised of eighteen units of core clinical modules, four units of seminar courses, four units of directed studies, four units of advanced statistics electives, and six units of an independent study project.

COURSES
For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

CLRE 250. Patient-Oriented Research I (2)
This course will develop and apply the theory of clinical trials design and analysis, discuss the practical issues of financing and implementing clinical trials, and describe issues of monitoring trials and working in cooperative groups. The scholar will design and present to a group of peers a concept sheet for a phase I/II and phase II/III clinical trial.

CLRE 251. Epidemiology I (2)
Scholars will recognize and understand different types of study designs, the relative strengths and limitations of each, and the proper choice of study design in conducting their own research. They will also be able to identify and calculate the correct measure of risk for each study design. Participants will recognize major sources of bias, confounding and misclassification, and understand design and analysis methods of dealing with each. They will also be familiar with criteria to differentiate association from causation.

CLRE 252. Health Services Research (2)
Scholars will evaluate relevant outcomes in patient-oriented research from the patient (quality of life) and societal (economic) perspectives and locate potential resources for assessing the relevant outcomes in a wide variety of study designs. They will also be able to describe the relative strengths of different health services research approaches to a clinical problem. Finally, they will understand the components of clinical practice guidelines, including patient preferences, and how these guidelines both depend upon as well as inform patient-oriented research.

CLRE 253. Biostatistics I (2)
Scholars will understand principles of measurement of clinical data, recognize data types, and correctly identify statistical methods appropriate for analysis of a given clinical data set. They will gain experience in assembling a clinical dataset in formats suitable for analysis by STATA or other comparable statistical packages. They will learn skills to conduct graphical and numerical exploratory data analysis, comparative tests of categorical, ordinal, and continuous data, linear and logistic regression analysis, and survival analysis by life table and Kaplan-Meier techniques.

CLRE 254. Biostatistics II (2)
Scholars will understand and conduct advanced biostatistical analyses including: multiple linear and logistic regression, survival analysis, and Cox and extended Cox regression. The scholar will also be familiar with person-time rate analysis with Poisson regression and longitudinal data analysis in the presence of missing values and varying measurement times. PREREQUISITES: Biostatistics I, CLRE 253.

CLRE 255. Data Management and Informatics (2)
This course provides an orientation to database design and management and covers key issues regarding data handling for clinical research and clinical trials. Scholars will also become familiar with technology assessment and decision-making methods and analysis.

CLRE 256. Patient-Oriented Research II (2)
This course will review the ethics and basic regulatory issues involved in human subject protection and the principles of data management for clinical research, including architecture, access and confidentiality, and integrity of databases; and skills in graphic and verbal presentation of research data. Scholars will prepare a mock submission to an IRB for peer review and practice presenting graphic and tabular data. PREREQUISITES: Patient-Oriented Research I, CLRE 250.

CLRE 257. Epidemiology II (2)
Scholars will select the appropriate sampling method and determine the sample size necessary for specific projects and adjust for confounding. Participants will be familiar with several specialized analytic techniques, including matched, cluster, and meta-analyses. They will also be familiar with methodological issues, unique to ecological, behavioral, and genetic studies. PREREQUISITES: Epidemiology I, CLRE 251.

CLRE 258. Professional Development in Clinical Research (2)
Students participate in a series of seminars on professional development topics that will focus on skills and knowledge to enhance the ability of clinical researchers to be successful. Seminar topics may include research management, team building and collaboration, leadership skills, career development in the clinical research field, negotiation skills, research project management, and research budgeting/financial management. PREREQUISITE: MAS Program or permission of department.

CLRE 259. Scientific Communication Skills (2)
This course covers the key elements of scientific communication skills that are designed to enhance the clinical research’s ability to be successful. Topics include secrets of making good oral presentations and engaging the audience, how to write and prepare abstracts, basics of grant writing and submission, and how grants are reviewed. Course includes mock grant study section. PREREQUISITE: MAS Program or permission of department.

CLRE 260. Directed Studies in Clinical Research (2)
Faculty member will direct a student’s study in selected professional development topics in clinical research. Specific content will be tailored to the student’s particular needs and interests. Students must make arrangements with the program and individual faculty member prior to enrolling in the course. PREREQUISITE: MAS Program or permission of department.

CLRE 261. Applied Quantitative Analysis (4)
Students will understand and conduct advanced statistical analyses for clinical research. The course will develop the students’ technical and conceptual skills in cost effectiveness analysis and decision analysis including the creation and evaluation of decision trees, use of sensitivity analysis and the incorporation of patient preferences through utility analysis. PREREQUISITES: CLRE 253, CLRE 254.

CLRE 296. Independent Study Project (6)
The Independent Study Project (ISP) is the cornerstone of the MAS program. Students will be involved in a high-level
clinical research project that integrates what they have learned in their formal course work. The ISP will be an independent and creative scholarly activity in an area related to one or more of the topics covered in the formal curriculum. Students’ work will be evaluated by a committee of faculty, and, in some cases, industry advisors.

Jeanne Townsends, Ph.D.

INTRODUCTION

Cognitive science is a diverse field which is unified and motivated by a single basic inquiry: What is cognition? How do people, animals, or computers “think,” act, and learn? In order to understand the mind/brain, cognitive science brings together methods and discoveries from neuroscience, psychology, linguistics, philosophy, and computer science. UC San Diego has been at the forefront of this exciting field and our Department of Cognitive Science was the first of its kind in the world. It is part of an exceptional scientific community and remains a dominant influence in the field it helped create.

In addition to preparing undergraduates for careers in a variety of sciences, the major also provides an excellent background for many professional fields, including medicine, clinical psychology, and information technology.

The concerns of cognitive science fall into three broad categories: the brain—the neurological anatomy and processes underlying cognitive phenomena; behavior—the cognitive activity of individuals and their interaction with each other and their sociocultural environment, including the use of language, information, and media; and computation—the capacity of mathematical and computer systems to model cognitive and neural phenomena and represent information, and the role of computers as cognitive tools.

The department collaborates closely with other academic departments and research communities, including the Center for Research in Language, the Center for Human Development, the Salk Institute for Biological Studies, the UCSD Medical Center, the San Diego Supercomputer Center, the Center for Functional Magnetic Resonance Imaging Center, and the new Kavli Institute for Brain and Mind, providing many outstanding resources and opportunities.

Students are encouraged to participate actively in the department by sharing their ideas about curriculum, research, and other topics with faculty and staff.

The department offers both a B.A. and a B.S. degree. The B.S. requires completion of more rigorous lower-division course work and three additional courses at the upper-division level. The B.S. degree may be taken optionally with a specified area of specialization. There is also an honors program for exceptional students in both degree programs. Major Code: CG25.

Please Note: Students who officially declared the major before fall 2001 may choose to follow the old major requirements or the new major requirements, but not a combination of both. See department advisor for more information.

GRADE REQUIREMENTS FOR THE MAJOR

A minimum grade-point average of 2.0 is required for admittance to and graduation from the B.A. or B.S. Degree program. Students must receive a grade of C– or better in any course to be counted toward fulfillment of the major requirements. All courses must be taken for a letter grade, with the exception of Cognitive Science 195, 198, and 199, which are taken Pass/Not Pass.

FOUR-YEAR PLAN OF STUDY

The four-year plan of study below assures that all prerequisites and requirements for the cognitive science major are completed. The department does not enforce course prerequisites and several courses are offered only once a year, so careful planning is important. It is recommended that lower-division courses be taken in the first two years, core courses in the third year, and electives in the final year. Check with a departmental advisor about which quarter cognitive science courses will be offered each academic year. Check with a college advisor about course planning to meet college requirements.

Freshman Year:

Twelve units of math (B.A.) or sixteen units of math (B.S.) Students intending to take Cognitive Science 118A and/or 118B should take Mathematics 20A-B-C.

College requirements

Sophomore Year:

Junior Year:

Nine core courses, chosen from a list of twelve (see Core Sequences)

Senior Year:

Electives for the major

LOWER-DIVISION REQUIREMENTS

All majors must complete lower-division courses in introductory cognitive science, mathematics, statistics, and computer programming:

Mathematics Requirement

The cognitive science major requires twelve units of mathematics courses (for the B.A. degree), or sixteen units of mathematics courses (for the B.S. degree), chosen from the following list:

- Mathematics 10A-B-C
- Mathematics 20A-B-C-D-E-F
- Mathematics 15A or CSE 20
- Mathematics 15B or CSE 21

(Students should check with the Department of Mathematics for rules governing duplication of credit between the 10 and 20 series.)
Lower-Division Requirements for the B.A. Degree

Twelve units of mathematics courses chosen from the list above, in addition to the lower-division cognitive science course requirements.

Lower-Division Requirements for the B.S. Degree

Sixteen units of mathematics courses chosen from the list above, in addition to the lower-division cognitive science course requirements.

Lower-Division Cognitive Science Course Requirements

The following lower-division courses in Cognitive Science are required for all majors:

- Cognitive Science 1
- Cognitive Science 14
- Cognitive Science 18
- Cognitive Science 101A-B-C (Cognitive Theory and Phenomena)
- Cognitive Science 102A-B-C (Distributed Cognition, Everyday Cognition, Cognitive Engineering)
- Cognitive Science 107A-B-C (Cognitive Neuroscience)
- Cognitive Science 109, 118A-B (Computational Models of Cognition)

The cognitive science major requires the completion of nine core sequence courses, plus three elective courses (for the B.A. degree), or six elective courses (for the B.S. degree). Students are advised to complete these core courses in their junior year, especially if they intend to apply to the honors program. The remainder of the upper-division requirement is fulfilled by completing electives.

UPPER-DIVISION REQUIREMENTS

The cognitive science major requires the completion of nine core sequence courses, plus three elective courses (for the B.A. degree), or six elective courses (for the B.S. degree). Students are advised to complete these core courses in their junior year, especially if they intend to apply to the honors program. The remainder of the upper-division requirement is fulfilled by completing electives.

CORE SEQUENCES

The core sequences courses in the Department of Cognitive Science are

- Cognitive Science 101A-B-C (Cognitive Theory and Phenomena)
- Cognitive Science 102A-B-C (Distributed Cognition, Everyday Cognition, Cognitive Engineering)
- Cognitive Science 107A-B-C (Cognitive Neuroscience)
- Cognitive Science 109, 118A-B (Computational Models of Cognition)

The cognitive science major requires the completion of nine courses from the core sequences, which must include two courses in the Cognitive Science 101 series, two in the Cognitive Science 102 series, two in the Cognitive Science 107 series, Cognitive Science 109, and two additional courses from any of the core sequences.

ELECTIVES

At least half of the electives for the major must be taken in the department. Courses in the Cognitive Science 19X series (190A, 190B, 190C, 198, 199) may NOT be used as an elective to satisfy the major requirements for the B.A. degree. One course in the Cognitive Science 19X series may be used as an elective to satisfy the requirements for the B.S. degree, but only with the approval of both the instructor who supervised the course and the undergraduate advisor. A course taken outside the department must meet the following criteria:

1. The course must deal with topics and issues that are clearly part of cognitive science.
2. The material must not be available in a course offered inside the department.

This policy permits students and their advisors to be responsive to changes in course offerings. Majors must obtain departmental approval for electives taken outside of the department.

AREAS OF SPECIALIZATION

A major may elect to receive a B.S. in cognitive science with a specified area of specialization. The areas of specialization are intended to provide majors with guidance in choosing elective courses and to make the specific interests and training of a major clear to prospective employers and graduate schools. Specifying an area of specialization is optional; however, students should take into consideration when planning for their specialization that approved courses are not necessarily offered every year.

To major in cognitive science with an area of specialization, the student must fulfill the requirements for the B.S. Degree and must choose four of the required six elective courses from a list of approved electives for that area of specialization. The lists of approved electives for each area of specialization are available in the department office.

The following areas of specialization are currently offered by the department:

Specialization in Clinical Aspects of Cognition

This area of specialization is intended for majors interested in cognitive neuropsychology, psychiatry, cognitive disorders, and the effects of drugs and brain-damage on cognitive functions. Allowed electives include courses in those topics, as well as organic chemistry, biochemistry, and physiology. Major code: CG31

Specialization in Computation

This area of specialization is intended for majors interested in software engineering or research in computational modeling of cognition. Allowed electives include advanced courses in neural networks, artificial intelligence, and computer science. Students interested in this specialization will most likely select courses from the computer science and engineering course offerings, as courses offered within the cognitive science department are limited. Major code: CG27

Specialization in Human Cognition

This area of specialization is intended for majors whose primary interests include human psychology and applications of cognitive science in design and engineering. Allowed electives include courses in cognitive development, language, laboratory research of cognition, anthropology, and sociology. Major code: CG28

Specialization in Human Computer Interaction

This area of specialization is intended for majors interested in human computer interaction; Web; visualization; and applications of cognitive science in design and engineering. Additional electives may be petitioned from communication, computer science, computer engineering, and visual arts. Major code: CG30

Specialization in Neuroscience

This area of specialization is intended for majors interested in neuroscience research or medicine. Allowed electives include courses in cognitive neuroscience, organic chemistry, biochemistry, and physiology. Major code: CG29

COGNITIVE SCIENCE HONORS PROGRAM

The Department of Cognitive Science offers an honors program for a limited number of majors who have demonstrated excellence, talent, and high motivation.

Eligibility Requirements

Students are eligible for admission to the program when they

1. Complete all core courses
2. Have at least junior level standing
3. Have at least a 3.5 GPA in upper-division major courses and at least a 3.0 overall GPA

Eligible students will enroll in four units of 190A (Pre-Honors Project in Cognitive Science) under a faculty member who has agreed to advise them on a potential honors project. Students may apply the COGS 190A course as an elective toward major requirements whether or not they enter the Honors Program. At the end of the 190A course, students will submit to their faculty mentor a written project proposal. The proposal will define the question to be investigated, survey existing literature, describe the approach and methods that will be used, explain how data will be collected if it is an empirical study, detail how human subjects requirements will be met if necessary, discuss expected results, and provide a timeline for project completion.

Acceptance in Honors Program

To formally enter the Honors Program, students must meet the eligibility requirements above, receive a grade of A– or better in COGS 190A, establish an honors committee of at least two faculty and one graduate student to review the proposal and advise them during the process of completing the honors project, and have their project proposal approved by their honors committee.

The honors committee must be kept informed of any deviations from the original approved project proposal and timeline. Students who fail to make satisfactory progress may be asked to withdraw from the program at any point the advisor or the department chair deems necessary.

Successful completion of the Honors Program requires

1. Maintenance of a 3.5 GPA in upper-division major courses, and a 3.0 overall GPA
2. Completion of one cognitive science (or related) graduate level course (may be taken P/NP).

Students may use the required graduate course
as one of their electives for the major whether or not they complete the honors project
3. Completion of COGS 190B and 190C with letter grades of A- or better
4. Completion of COGS 190D (Preparation for Thesis Presentation), a 1-unit seminar given each spring (P/NP)
5. Completion of a written honors thesis describing the project
6. Approval of the thesis by the honors committee and the department chair
7. Satisfactory presentation of the honors thesis to the cognitive science community at the Honors Thesis Presentation Conference, spring quarter

Students who successfully complete all of the requirements for the Honors Program will graduate with Distinction in Cognitive Science recorded on their transcripts.

MINORS AND PROGRAMS OF CONCENTRATION
Each college has specific requirements, and students should consult with an academic advisor in their provost’s office as well as a cognitive science advisor to be sure they fulfill requirements of the college and of the department.

To receive a minor from the Department of Cognitive Science, a student must complete a total of seven (four unit) courses; five of which must be upper-division. Lower-division requirements are normally fulfilled by completing (one of) Cognitive Science 1, 3, 10 or 11 and (one of) Cognitive Science 14, 17 or 18. Upper-division requirements are normally fulfilled by completing two cognitive science electives and one of the following sequences:
- Cognitive Science 101A-B-C
- Cognitive Science 102A-B-C
- Cognitive Science 107A-B-C
- Cognitive Science 109, 118A-B

All courses must be taken for a letter grade. No grade below C– is acceptable.

TRANSFER CREDIT
Students who wish to transfer from another institution to UCSD as cognitive science majors should work closely with university advisors to ensure that all lower-division requirements have been completed and are equivalent to those offered at UCSD. It is extremely important for students to have completed lower-division requirements by the end of their sophomore year so they are prepared for core courses in their junior year. Advanced UCSD students who wish to transfer to the department should consult with the departmental advisors about credit for courses already completed.

Education Abroad
Students majoring in cognitive science are encouraged to participate in the Education Abroad Programs (EAP), and to investigate other options of foreign study through the Opportunities Abroad Program (OAP). By petition, credits earned through EAP/OAP can fulfill UCSD degree and major requirements. Please visit the Web site at http://programs-abroad.ucsd.edu for further details. Financial aid is applicable and special study abroad scholarships are readily available.

THE GRADUATE PROGRAMS
There are two Ph.D. Programs, each with different admissions and graduation requirements. The Department of Cognitive Science offers a Ph.D. in cognitive science. Students are admitted to UCSD directly into the department and fulfill degree requirements of the department. The Interdisciplinary Program in Cognitive Science offers a joint Ph.D. in cognitive science and a home department (anthropology, communication, computer science and engineering, linguistics, neurosciences, philosophy, psychology, or sociology). Students are admitted to UCSD through the home department and fulfill the requirements of both the interdisciplinary program and the home department.

PH.D. IN COGNITIVE SCIENCE
This program provides broad training in neurological processes and phenomena; the experimental methods, results, and theories from the study of psychology, language, and social and cultural issues; and the studies of computational mechanisms. The first year is devoted to familiarizing the student with the findings and current problems in cognitive science through courses in foundations and issues.

By the second year, basic courses and laboratory rotations are completed, with the major emphasis on the completion of a year-long research project. Future years are spent completing the advancement to candidacy requirements and doing the thesis research. Throughout the program, there are frequent faculty-student interactions, including special lectures by the faculty or invited speakers and the weekly informal research discussions and cognitive science seminar.

ADMISSIONS
The admissions committee reviews each applicant’s statement of purpose, letters of recommendation, GRE scores, previous education and work experience, and grade-point averages, then recommends candidates for admission to the entire faculty, who make the final decision.

ADVISING
An interim advisor is appointed to serve as general advisor and counselor for each entering student. The advisor helps chart a set of courses that fulfill department requirements. The advisor helps students choose a permanent advisor who also functions as the chair of the dissertation committee.

All entering students are assumed to have basic prerequisite knowledge, and a list of basic readings will be provided to incoming students. Students who do not have this background can acquire it through self-study in the summer preceding arrival at UCSD or by taking self-paced study courses or relevant undergraduate courses at UCSD.

Summary of Requirements
1. Foundations courses
2. Approved study plan, which includes issues courses, methods courses, and laboratory rotations
3. Second-year project
4. Language requirement
5. Advancement to candidacy
6. Teaching
7. Cognitive Science 200 seminar
8. Participation in departmental events and committees

DESCRIPTION OF REQUIREMENTS
The expectation is that graduate students in the program will maintain a 3.4 GPA, and falling below this expectation may lead to the student being put on departmental probation. No course in which the student is assigned a grade below B– will be allowed to fulfill department requirements.

1. Foundations Courses (Cognitive Science 201, 202, 203). Students complete foundations courses in the areas of brain behavior, and computation by the end of the second year. The department may waive some or all courses for students who already have the required knowledge.

2. Study Plan. Students complete a study plan recommended by their advisor. The normal plan includes:

   a. Issues Courses. A minimum of six issues courses are required, at least one in each of the areas of brain, behavior, and computation. At least four of the issues courses should be taken within the department. Department recommends completion by the end of the second year. Issues courses taken outside the department require the approval of the advisor in conjunction with the Graduate Committee. Five of the six issues courses must be taken for a letter grade.

   b. Methods Courses. Three methods courses are required, one of which must be an approved statistics course. Students should obtain approval for all three courses from their advisor. An approved list of courses is on file with the department to assist students in selecting courses. Students may petition courses not on the approval list. Such petitions must be approved by the student’s advisor and graduate committee. All three courses must be taken for a letter grade.

   c. Laboratory Rotations (Cognitive Science 290). A total of three quarters of laboratory rotations in at least two different faculty laboratories are required. Each rotation is for one to two full quarters as required by the faculty laboratory. All rotations should be completed by the end of fall quarter of the second year.
Students can meet this requirement in the following ways:
- Three one-quarter rotations in three different laboratories, or
- One one-quarter rotation and one two-quarter rotation in two different laboratories, or
- Two two-quarter rotations in two different laboratories for a total of four quarters enrolled in COGS 290.

Department recommends that student and advisor negotiate a topic and activity, then put the agreement in writing, sign, and give to the graduate coordinator.

3. Second-Year Research Project (Cognitive Science 210A-B-C and 211A-B-C). In the summer between the first and second year, students work with their advisor and a faculty committee to develop a prospectus for a research project. The yearlong project culminates with written and oral presentations to the faculty at the end of spring quarter. During the second year, concurrent enrollment in Cognitive Science 210A-B-C and Cognitive Science 211A-B-C is required as part of the Second Year Project.

4. Language Requirement. The main goal of the language requirement is to give all students firsthand experience with some of the differences in structure and usage of languages and the several issues involved in the learning of second languages. This requirement can be satisfied by demonstrating satisfactory proficiency, by prior study in a language (e.g., two years of high school study), or by satisfactory completion of one quarter of study in a language course approved by the department.

5. Advancement to Candidacy/Qualifying Paper and Oral Exam. There are three components to advancement to candidacy:
   a. Competency. This requirement is met by satisfactorily completing items 1-4 above.
   b. Depth. This requirement is met by satisfactorily completing a talk to the entire department on their thesis topic by the end of the third year. A first draft of the thesis proposal must be submitted to the student’s advisor by the end of the third year. Students enroll in COGS 205 during winter and spring quarter of the third year.
   c. Dissertation Topic/Advancement Exam. The student prepares a proposal of the dissertation topic that must be approved by the student’s doctoral committee. A final written proposal is submitted to the committee at least two weeks prior to an oral defense of the proposal. The doctoral committee consists of at least five faculty members: three from the department and two from outside the department; one of the outside members must be tenured.

6. Teaching (Cognitive Science 500). All graduate students must serve as a teaching assistant at least one quarter of each academic year in residence. The undergraduate program offers a special challenge to instructor and student alike, and experience with the teaching of that program can provide a valuable part of the education of a cognitive scientist. Teaching assistantships performed in other departments must be approved by formal petition to the graduate committee to count toward the requirement. The department works closely with the Center for Teaching Development to design effective training and development programs for its teaching assistants. At the end of each quarter, instructors prepare written evaluations of all teaching assistants.

7. Cognitive Science 200 Seminar. Students must enroll in this seminar for at least three quarters while in residence; frequent participation is encouraged.

8. Participation in Departmental Events and Committees. Students participate in departmental special events and committees and serve as student representatives for faculty meetings and the campuswide Graduate Student Association. Students present their research in the under-graduate SCANS series.

**MASTER’S DEGREE**

The Department of Cognitive Science does not offer admissions to a master’s program. However, candidates for the Ph.D. who do not hold a master’s degree from another institution may be granted the M.S. degree after fulfilling the first three requirements listed above. This is usually at the end of the second year. Duplication of advanced academic degrees, e.g., one at the same level, is not permitted at UCSD. Likewise, a professional degree at the master’s or doctoral level, e.g., M.Ed., M.P.J.A., M.D., or Pharm.D., is not regarded as a duplicate of an academic degree.

**EVALUATION OF PERFORMANCE AND PROGRESS**

A formal evaluation of performance and progress for all students takes place at the end of spring quarter every year, with special attention given to the first and second years of study and at the time of qualification. The first-year evaluation is based in large part on the performance in foundations and issues courses. The second-year evaluation is based on the student’s total performance, with heavy weight given to the student’s second-year research project. The third-year evaluation focuses on the competency and depth requirements, and the following years on the progress made toward completion of the dissertation.

**SPECIAL EVENTS**

The department intends to enhance student-faculty interaction and current awareness of active research issues by special “events”:
- Lectures by invited speakers or faculty members
- A full day of faculty/student overview and information at the start of each year, with emphasis on ongoing research activity
- Presentations of second-year research projects and third-year thesis topics to the entire faculty at the end of each year
- Final defense of the dissertation accompanied by a public lecture and celebration

**TIME LIMITS TO PH.D.**

Students must be advanced to candidacy by the end of spring quarter of their fourth year. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

**FINANCIAL AID**

Financial support is available to qualified students in the form of fellowships, loans, and assistantships. Students are encouraged to seek fellowships and research awards from outside the university. Please refer to the Graduate Studies section for more information.

**THE INTERDISCIPLINARY PH.D. PROGRAM**

**PROFESSORS**

- Farrell Ackerman, Ph.D., Linguistics
- Stuart Anstis, Ph.D., Psychology
- Richard C. Atkinson, Ph.D., UC President, Emeritus, Cognitive Science and Psychology
- William Bechtel, Ph.D., Philosophy
- Richard K. Belew, Ph.D., Cognitive Science
- Ursula Bellugi, Ph.D., Adjunct/Psychology
- Gregory Brown, Ph.D., In-Residence, Psychiatry
- Gert Cauwenberghs, Ph.D., Neurobiology
- Patricia S. Churchland, B.Phil., Philosophy
- Paul M. Churchland, Ph.D., Philosophy
- Aaron V. Cisourel, Ph.D., Emeritus, Cognitive Science and Sociology
- Michael Cole, Ph.D., University Professor, Communication
- Garrison W. Cottrell, Ph.D., Program Director, Computer Science and Engineering
- Eric Courchesne, Ph.D., Neurosciences
- Diana Deutsch, Ph.D., Psychology
- Karen R. Dobkins, Ph.D., Psychology
- Charles P. Elkan, Ph.D., Computer Science and Engineering
- Jeffrey L. Elman, Ph.D., Cognitive Science
- Yoav Freund, Ph.D., Computer Science and Engineering
- Philip M. Groves, Ph.D., Emeritus, Psychiatry and Neurosciences
- Rick Grush, Ph.D., Philosophy
- Gail Heyman, Ph.D., Psychology
- Steven A. Hillyard, Ph.D., Neurosciences
- James D. Hollan, Ph.D., Cognitive Science
- Edwin Hutchins, Ph.D., Cognitive Science
- Andrew Kehler, Ph.D., Linguistics
- David J. Kirsh, Ph.D., Cognitive Science
- Marta Kutas, Ph.D., Cognitive Science
- Ronald W. Langacker, Ph.D., Emeritus, Linguistics
- Donald Macleod, Ph.D., Psychology
- George Mandler, Ph.D., Emeritus, Psychology
- Jean M. Mandler, Ph.D., Emerita, Cognitive Science
- Lev Z. Manovich, Ph.D., Visual Arts
- Craig McKenzie, Ph.D., Rady School of Management
- Hugh B. Mehan, Ph.D., Sociology
ASSOCIATE PROFESSORS
Gerald J. Balzano, Ph.D., Music
Leslie Carver, Ph.D., Psychology
Andrea A. Chiba, Ph.D., Cognitive Science
Jonathan Cohen, Ph.D., Philosophy
Seana Coulson, Ph.D., Cognitive Science
Virginia de Sa, Ph.D., Cognitive Science
Gedeon O. Deak, Ph.D., Cognitive Science
Robert E. Kluender, Ph.D., Linguistics
James J. Moore, Ph.D., Anthropology
Rafael Nuñez, Ph.D., Cognitive Science
Steven Parish, Ph.D., Anthropology
Jaime A. Pineda, Ph.D., Cognitive Science
Lawrence Saul, Ph.D., Computer Science and Engineering
Akos Rona-Tas, Ph.D., Sociology
Katerina Semendeferi, Ph.D., Anthropology

ASSISTANT PROFESSORS
Stephan Anagnostaras, Ph.D., Psychology
Eric Bakovic, Ph.D., Linguistics
Serge Belongie, Ph.D., Computer Science and Engineering
Timothy Gentner, Ph.D., Psychology
David Huber, Ph.D., Psychology
Gert Lancieri, Ph.D., Electrical and Computer Engineering
Roger Levy, Ph.D., Linguistics
Nuno Vasconcelos, Ph.D., Electrical and Computer Engineering

LECTURER
Christine M. Johnson, Ph.D., Cognitive Science

The interdisciplinary Ph.D. program is distinct from the departmental Ph.D. Program (see previous section) both in admissions and graduation requirements. There are four aspects to graduate study in the interdisciplinary program: (a) a primary specialization in one of the established disciplines of cognitive science; (b) a secondary specialization in a second field of study; (c) familiarity with general issues in the field and the various approaches taken to these issues by scholars in different disciplines; and (d) an original dissertation project of an interdisciplinary character. The degree itself reflects the interdisciplinary nature of the program, being awarded jointly to the student for studies in cognitive science and the home department. Thus, students in linguistics or psychology will have degrees that read “Ph.D. in Linguistics and Cognitive Science” or “Ph.D. in Psychology and Cognitive Science.”

ADMISSION TO THE PROGRAM
Students enter UCSD through admission to one of the affiliated departments, which then serves as their home department, and which specifies their primary specialization. The affiliated departments are anthropology, communication, computer science and engineering, linguistics, neurosciences, philosophy, psychology, and sociology. Students may apply for admission to the interdisciplinary program anytime after entering UCSD, typically in the second or third year. Students must have an advisor from their home department who is a member of the interdisciplinary program faculty. If a student does not have such an advisor, a member of the Instructional Advisory Committee will be appointed as interim advisor. The Instructional Advisory Committee is made up of an interdisciplinary program faculty person from each of the home departments. The committee member who will serve as interim advisor for a student will come from the same home department as the student.

NOTE: Admission to the interdisciplinary Ph.D. Program is contingent upon applying to and being accepted in a home department.

PRIMARY SPECIALIZATION
Primary specialization is accomplished through the home department. Students are expected to maintain good standing within their home departments and to complete all requirements of their home departments through qualification for candidacy for the Ph.D. degree.

SECONDARY SPECIALIZATION
The power of an interdisciplinary graduate training program lies in large measure in its ability to provide the student the tools of inquiry of more than one discipline. Students in the cognitive science interdisciplinary program are expected to gain significant expertise in areas of study outside of those covered by their home departments. Such expertise can be defined in several ways. The second area might coincide with that of an established discipline, and study within that discipline would be appropriate. Alternatively, the area could be based upon a substantive issue of cognitive science that spans several of the existing disciplines, and study within several departements would be involved. In either case, students work with their advisor and the Instructional Advisory Committee to develop an individual study plan designed to give them this secondary specialization. A list of courses in cognitive studies at UCSD is available. This requirement takes the equivalent of a full year of study, possibly spread out over several years. Often it is valuable to perform an individual research project sponsored by a faculty member in a department other than the student’s home department.

The following list demonstrates some ways to fulfill the secondary specialization requirement. It should be emphasized that these programs are only examples. Students will devise individual plans by working with their advisors and the advisory committee. Ideally, students who elect to do research in their areas of secondary interest will be able to accomplish a substantive piece of work, either one of publishable quality or one that will be of significant assistance in their dissertation projects.

Cognitive Psychology. Get a basic introduction to cognitive psychology through the Cognitive Psychology Seminar (Psychology 218A-B) and acquire or demonstrate knowledge of statistical tools and experimental design (this can be done either by taking the graduate sequence in statistics, Psychology 201A-B, or through the standard “testing out” option offered to all psychology graduate students). Finally, and, perhaps of most importance, the student should do a yearlong project of empirical research in psychology with the guidance of a member of the Department of Psychology.

Cognitive Social Sciences. A course sequence from sociology and anthropology, including one or two courses in field methods and a research project under the direction of a cognitive social sciences faculty member. The course sequence and project should be worked out with the advisory committee to reflect the interests and background of the student. Examples of courses include Distributed Cognition (Cognitive Science 234), Text and Discourse Analysis (Sociology 204), and the Anthropology of Language and Discourse (Anthropology 263). In addition, courses on field methods are offered by both anthropology and sociology.

Computer Science and Artificial Language. This specialization requires a thorough background in computer science. For those who enter the program without much formal training in this area, the secondary specialization in computer science includes some upper-division undergraduate courses (CSE 100, 102, 105) and a minimum of two graduate courses (CSE 250AB). (Note that these courses require basic knowledge of programming and discrete mathematics areas that may require some additional undergraduate courses for those who lack these skills.) Students with stronger backgrounds in computer science may go straight to graduate courses. For all students interested in this specialization, the course sequences and any projects should be worked out on an individual basis with the student’s advisor.

Discourse Structure and Processing. This specialization is highly interdisciplinary, spanning linguistics, computer science, psychology, sociology, philosophy, and anthropology. Research within this specialization depends upon which discipline is given emphasis. Therefore, the specialization will have to be developed according to the interests of the student. All students will have to demonstrate awareness and knowledge of relevant studies and the approaches of the various disciplines.

Linguistics. Students who elect a secondary specialization in linguistics should specialize either in the general area of syntax/semantics or in the general area of phonetics/phonology. Those who specialize in syntax/semantics should plan to take three courses in this area and one course in phonetics/phonology. Conversely, those who specialize in phonetics/phonology should plan to take three courses in this area and one course in syntax/semantics. The specific courses recommended will depend on the individual student’s interests and should be arranged in conjunction with the Department of...
Linguistics faculty liaison to the Cognitive Science Interdisciplinary Program.

In addition, students will prepare a research paper (preferably originating in one of the above courses) that demonstrates control of the methodology and knowledge of important issues in their area of specialization.

Neurosciences. A student specializing in neurosciences would take a program of courses emphasizing brain-behavior relationships, including Behavioral Neuroscience (Neurosciences 264) and the Physiological Basis of Human Information (Neurosciences 243). In addition, depending upon the student's individual interests, one or more of the neurosciences core courses would be taken in the areas of Mammalian Neuroanatomy (Neurosciences 256), Neuro-physiopharmacology (Neurosciences 277), and/or Neurochemistry (Neurosciences 234). In most cases, the student would also take a research rotation in the laboratory of a member of the neurosciences faculty.

Philosophy. Students who elect a secondary specialization in philosophy will focus on philosophy of science, philosophy of mind, philosophy of psychology, philosophy of neuroscience, or philosophy of language, depending on their area of primary specialization. Courses suitable for this program include Philosophy of Language (Philosophy 234), Philosophy of Mind (Philosophy 236), Philosophy of the Cognitive Sciences (Philosophy 250a), and Seminar on Special Topics (Philosophy 285), which will frequently focus on issues relevant to cognitive science. The course sequence should be worked out with the student's advisor.

ACQUISITION OF PERSPECTIVE ON THE FIELD

The cognitive science faculty offers a special seminar, Cognitive Science 200, that emphasizes the interdisciplinary approach to the field and that covers a variety of different problems, each from the perspective of several disciplines. All students are required to enroll in this seminar a total of six quarters while in residence; most students regularly attend the seminar even after fulfilling the requirement. Students may substitute a Cognitive Science Foundations course for a Cognitive Science 200. A maximum of two quarters may be substituted.

PREQUALIFYING EXAMINATIONS

Students must complete any prequalifying and field requirements of their home department.

QUALIFYING EXAMINATIONS

The Dissertation Advisory Committee. As soon as possible, students form a dissertation committee consisting of

- At least three members from the student’s home department, including the student's advisor; and at least three members of the Cognitive Science Program, at least two of whom are not members of the student’s home department.
- University regulations require that at least one of the faculty members of the committee from outside the home department must be tenured.
- The committee must be approved by the interdisciplinary program, the home department, and by the dean of Graduate Studies. The dissertation committee is expected to play an active role in supervising the student and to meet with the student at regular intervals to review progress and plans.
- In the qualifying examination, the student must demonstrate familiarity with the approaches and findings from several disciplines relevant to the proposed dissertation research and must satisfy the committee of the quality, soundness, originality, and interdisciplinary character of the proposed research.

INTERDISCIPLINARY DISSERTATION

It is expected that the dissertation will draw on both the primary and secondary areas of expertise, combining methodologies and viewpoints from two or more perspectives, and that the dissertation will make a substantive contribution to the field of cognitive science.

OVERVIEW

The program can be summarized in this way:

In the first years, basic training within the student's primary specialization, provided by the home departments.

In the middle years, acquisition of secondary specialization and participation in the Cognitive Science Seminar.

In the final years, dissertation research on a topic in cognitive science, supervised by faculty from the program.

Time Limits. Time limits for precandidacy, financial support, and registration are those established for the home department. Normative time is six years.

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

LOWER-DIVISION

1. Introduction to Cognitive Science (4)

A team-taught course highlighting development of the field and the broad range of topics covered in the major. Example topics include addiction, analogy, animal cognition, human-computer interaction, language, neuroimaging, neural networks, reasoning, robots, and real-world applications.

3. Introduction to Computing (4)

A practical introduction to computers. Designed for undergraduates in the social sciences. Topics include: basic operations of personal computers (MAC, PC), UNIX, word processing, e-mail, spreadsheets, and creating web pages using the World Wide Web. No previous background in computing required.

8. Hands-on Computing (4)

Introductory-level course that will give students insight into the fundamental concepts of algorithmic thinking and design. The course will provide the students with first-person, hands-on experience programming a Web crawler and simple physical robots.

10. Cognitive Consequences of Technology (4)

The role of cognition and computation in the development of state-of-the-art technologies such as human computational interaction in aviation, air traffic control, medical diagnosis, robotics and telerobotics, and the design and engineering of cognitive artifacts.

11. Minds and Brains (4)

How damaged and normal brains influence the way humans solve problems, remember or forget, pay attention to things; how they affect our emotions, and the way we use language in daily life.

14. Design and Analysis of Experiments (4)

Design, statistical analysis, and interpretation of experiments in the main areas of cognitive science: brain, behavior, and computation. Introduction to mathematical foundations of probability and statistical decision theory. Decision theory is applied to the problem of designing and analyzing experiments. Students will participate in a group project in which they must design scientific experiments, collect data and analyze results. May fulfill general education requirements; ask a college advisor. PREREQUISITES: Mathematics 10A or equivalent.

17. Neurobiology of Cognition (4)

Introduction to the organization and functions of the nervous system. Topics include molecular, cellular, developmental, systems, and behavioral neurobiology. Specifically, structure and function of neurons, peripheral and central nervous systems, sensory, motor, and control systems, learning and memory mechanisms. (Students may not receive credit for both Biology 12 and Cognitive Science 17. This course fulfills general-education requirements for Marshall and Roosevelt Colleges as well as Warren by petition.)

18. Introduction to Programming for Cognitive Science (4)

Fundamentals of computer programming are introduced. Topics include: fundamentals of computer architecture, variables, functions, and control structures; writing, testing, and debugging programs; programming style and basic software design. Examples and exercises focus on cognitive science applications. PREREQUISITES: Mathematics 10A or 20A.

25. Introduction to Web Programming (4)

Introduction to Web programming languages and their real-world applications. Concepts and languages covered include document structure (XHTML). A basic background in computing is required, but no prior programming experience.

87. Freshman Seminar (1)

The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

91. SCANS Presents (1)

The department faculty and the Students for Cognitive and Neurosciences (SCANS) offer this seminar exploring issues in cognitive science. It includes informal faculty research presentations, investigations of topics not covered in the curriculum, and discussions on graduate school and careers. (May be repeated when topics vary.)

99. Independent Study (2 or 4)

Independent literature or laboratory research by arrangement with and under direction of a Department of Cognitive Science faculty member. PREREQUISITES: lower-division standing, completion of thirty units of UCSD undergraduate study, a minimum UCSD GPA of 3.0, and a completed and approved "Special Studies" form.

UPPER-DIVISION

101A. Sensation and Perception (4)

An introduction to the experimental study of cognition with a focus on sensation and perception. PREREQUISITE: Cognitive Science 1.

101B. Learning, Memory, and Attention (4)

101C. Language (4)
An introduction to structure of natural language, and to the cognitive processes that underlie its acquisition, comprehension, and production. This course covers findings from linguistics, computer science, psychology, and cognitive neuroscience to provide an integrated perspective on human language abilities. **RECOMMENDED:** Cognitive Science 101A.

102A. Distributed Cognition (4)
Distributed cognition extends beyond the boundaries of the person to include the environment, artifacts, social interactions, and culture. Major themes are the study of socially distributed cognition and the role of artifacts in human cognition. **PREREQUISITE:** upper-division standing. Recommended: Cognitive Science 1 or Cognitive Science 10.

102B. Cognitive Ethnography (4)
This course examines memory, reasoning, language understanding, learning, and planning directly in everyday, real-world settings. The course work will include discussions of both the findings and the methodology of naturalistic studies of cognition. **PREREQUISITE:** Cognitive Science 102A.

102C. Cognitive Design Studies (6)
This is a project-based course focused on the process of cognitive design. Students work in teams to design and evaluate a prototype application or redesign an existing system. Three hours of lecture and two hours of design laboratory. **PREREQUISITE:** Cognitive Science 102B or consent of instructor.

107A. Neuroanatomy and Physiology (4)
This first course in the sequence focuses on principles of brain organization, from neurons to circuits to functional networks. It explores developmental plasticity, neuronal connectivity, cellular communication, complex signaling, and how these various dimensions form functional brain systems. **PREREQUISITE:** Cognitive Science 1.

107B. Systems Neuroscience (4)
(Conjoined with Cognitive Science 201) This course is a rigorous introduction to the neurophysiological and neuronal anatomical basis of human and animal cognition, covering cellular neurophysiology and circuit modeling; development, vision, somatosensory, auditory, motor, and limbic systems; neuroimaging and language. Students in Cognitive Science 107B will have a textbook and will be given short-answer tests; students in Cognitive Science 201 will have a reader and written take-home assignments, in addition to a short final paper. **PREREQUISITE:** Cognitive Science 107A.

107C. Cognitive Neuroscience (4)
This course studies brain systems implicated in attention, language, object recognition, and memory. Neurobiological evidence for functional subsystems within these processes and the way specialized systems develop are considered using findings from animal studies, human development, and behavioral and brain imaging. **PREREQUISITES:** Cognitive Science 107B and its prerequisites.

(Course previously offered as COGS 108A fall 2001) The design, implementation, and analysis of algorithms and data structures. Applications include: symbolic artificial intelligence, neural networks, genetic algorithms, computer graphics, and human computer interaction. **PREREQUISITES:** Cognitive Science 1 and Cognitive Science 18 or CSE 9A or CSE 10, or permission of instructor. Course was not offered in 2009–10.

108E. Neural Network Models of Cognition I (4)
(Course previously offered as COGS 108B winter 2002) This course is an elementary introduction to neural networks and their use in cognitive science. Students will learn how to construct and use neural networks to solve problems at both the psychological and neurological levels of cognition. **PREREQUISITE:** Cognitive Science 108D. Course not offered in 2009–10.

(Course previously offered as COGS 108C spring 2002) This course focuses on providing students with additional programming experience in the design of cognitive science applications and modeling. Each time it is offered a specific application or modeling area will be covered. **PREREQUISITES:** Cognitive Science 108E and Math 20F. Course not offered in 2009–10.

109. Modeling and Data Analysis (4)
This course focuses on the basic computational methods useful throughout cognitive science. Computing basic statistics, modeling learning individuals, evolving populations, communicating agents, and corpus-based linguistics will be considered. **PREREQUISITE:** Cognitive Science 18 or equivalent programming experience or consent of instructor.

113. Cognitive Development (4)
(Cross-listed with Psychology 136) This course examines the foundations and growth of mind, discussing the development of perception, imagery, concept formation, memory, and thinking. Emphasis is placed on the representation of knowledge in infancy. Consent may be received for both Psychology 136 and Cognitive Science 113. **PREREQUISITES:** Cognitive Science 101B or Psychology 105 or Psychology 101. Course not offered in 2009–10.

115. Neurological Development and Cognitive Change (4)
This course provides an overview of neurological development and explores the relations between physiological change and the experience for the child from the prenatal period through adolescence. **PREREQUISITES:** BILD 10, or Cognitive Science 17, or HDP 110.

118A. Natural Computation I (4)
This course is an introduction to computational modeling of biological intelligence, focusing on neural networks and related approaches to supervised learning. Topics include estimation, filtering, optimization, multilayer perceptrons, support vector machines, boosting, Bayes nets. **PREREQUISITES:** Cognitive Science 109, Mathematics 20E, Mathematics 20F, and Mathematics 180A or consent of instructor.

118B. Natural Computation II (4)
This course is an introduction to computational modeling of biological intelligence, focusing on neural networks and related approaches to unsupervised learning. Topics include density estimation, clustering, self-organizing maps, principal component analysis, information theoretic models, and evolutionary approaches. **PREREQUISITES:** Cognitive Science 109, Mathematics 20E, Mathematics 20F, and Mathematics 180A or consent of instructor.

120. Human Computer Interaction (4)
This course is an introduction to the field of human computer interaction (HCI). It provides an overview of HCI from the perspective of cognitive science. Recommended: Cognitive Science 10 and an introductory programming course.

121. Human Computer Interaction Programming Studio (4)
This course covers fundamentals of user interface design and implementation of Web-based systems. A major component is completion of a substantial programming project in which students work together in small teams. Three hours of lecture and one hour of laboratory. **PREREQUISITES:** Cognitive Science 120, Cognitive Science 18 or Cognitive Science 3 or Computer Science and Engineering 5A or Computer Science and Engineering 8A or Computer Science and Engineering 8B or Computer Science and Engineering 11 or Computer Science and Engineering 12 or Mechanical and Aerospace Engineering 9, or consent of instructor.

143. Animal Cognition (4)

151. Analog and Conceptual Systems (4)
Human thought and meaning are deeply tied to the capacity for mapping conceptual domains onto each other, inducing common schemas and performing mental simulations. This course examines major aspects of this cognitive activity including metaphor, conceptual blending and embodied cognition. **PREREQUISITE:** upper-division standing.

152. Cognitive Foundations of Mathematics (4)
How the human mind/brain creates mathematics: embodiment, innovation, and creativity. The emergence and power of abstract concepts, such as infinity, infinitesimals, imaginary numbers, or zero. Cognitive approaches that connect mathematics to human thought in general. **PREREQUISITE:** upper-division standing.

154. Communication Disorders in Children and Adults (4)
Neural bases of language use in normal adults, and neural bases of language and communication development in normal children. Evidence on the language and communication deficits in adults (especially aphasia and dementia) and children (specific language impairment, focal brain injury, autism, and apraxia). **PREREQUISITE:** upper-division standing.

155. Gesture and Cognition (4)
Spontaneous gestures and their relationship to speech, cognition, brain, and culture. The course covers, among others, gesture and language development, gesture and conceptual systems, speech-gesture co-production and its brain bases, evolution of language, and gestural behavior in special propulations. **PREREQUISITE:** upper-division standing.

160. Upper-Division Seminar on Special Topics (4)
Special topics in cognitive science are discussed. (May be repeated when topics vary.) **PREREQUISITE:** department approval.

170. Natural and Artificial Symbolic Representational Systems (4)
This course develops a detailed analogy between the evolution and architecture of language comprehension in human primates and symbol processing at the level of individual cells, contrasting this with the analogy between cognition and computation. **PREREQUISITE:** Cognitive Science 17 or Biology 12; Recommended: Cognitive Science 18 or Computer Science and Engineering 62AB.

172. Brain Disorders and Cognition (4)
A review of the patterns of impaired and intact cognitive abilities present in brain-damaged patients in terms of damage to one or more components of a model of normal cognitive functioning. (Cognitive science majors may not receive elective credit for both Psychology 139 and Cognitive Science 172.) **PREREQUISITE:** Cognitive Science 107A.

174. Drugs: Brain, Mind and Culture (4)
This course explores how drugs interact with the brain/mind and culture. It covers evolutionary and historical perspectives, brain chemistry, pharmacology, expectancy, and placebo effects, and models of addiction. It also provides a biopsychosocial survey of commonly used and abused substances. **PREREQUISITE:** upper-division standing.

175. The Neuropsychological Basis of Alternate States of Consciousness (4)
This course will review the literature that correlates brain rhythms in the human EEG with aspects of cognition, behavioral states, neuropsychopharmacology, and psychopathology in order to understand the psychological and neuropsychophysiological underpinnings of these experiences. **PREREQUISITE:** Cognitive Science 101A or Cognitive Science 107A.

179. Electrophysiology of Cognition (4)
This course surveys the theory and practice of using recordings of electrical and magnetic activity of the brain to study cognition and behavior. It explores what brain waves reveal about normal and abnormal perception, processing, decision making, memory, preparation, and comprehension. **PREREQUISITES:** Cognitive Science 107A or Psychology 106; Cognitive Science 101A or Psychology 105.

184. Modeling the Evolution of Cognition (4)
Mathematical and computational modeling of the evolution and mechanisms of simple cognitive functions. Theoretical background, including topics in population genetics, behavioral ecology, evolutionary game theory, dynamical systems theory, genetic algorithms, and neural
networks are applied to questions concerning the evolution of behavioral strategies, the relation between evolution and learning, and the evolution of cooperation, communication, and group behavior. "PREREQUISITES:" programming ability, calculus, and consent of instructor.

187A. Cognitive Aspects of Multimedia Design (4)
Examine the cognitive basis of successful Web and multimedia design. Topics include information architecture, navigation, usability, graph layout, transaction design, and how to understand user interaction. "PREREQUISITES:" Cognitive Science 109 or Computer Science 252, open to cognitive science majors with upper-division standing only.

187B. Cognitive Aspects of Multimedia Design II (4)
This course follows up on the basics of multimedia design taught in Cognitive Science 187A. Students will probe more deeply into selective topics, such as animation, navigation, graphical display of information, and narrative experience. A large fraction of time will be spent on group projects. "PREREQUISITES:" COGS 187A; open to cognitive science majors with upper-division standing only.

188. Representation, Search, and the Web (4)
Computational methods for finding and exploiting structure across vast data corpora from personal e-mail collections to the Web. Students will implement and evaluate algorithms used as part of modern search engines, and connect these to models of shared cognition. "PREREQUISITES:" Cognitive Science 109 or Computer Science 252. Recommended: Cognitive Science 102A or Cognitive Science 1188.

190A. Pre-Honors Project in Cognitive Science (4)
This independent study course is for advanced students who wish to prepare for and apply to the Cognitive Science Honors Program. After completing this course, students may be admitted to the Honors Program contingent upon significant progress made during the course. (See "Cognitive Science Honors Program" section for more information.) Students should contact faculty whose research interests them to discuss possible projects. "PREREQUISITES:" upper-division standing; instructor and department approval.

190B. Honors Studies in Cognitive Science (4)
This course will allow cognitive science honors students to explore advanced issues in the field of cognitive science. It will also provide honors students the opportunity to develop an honors thesis on the topic of their choice and begin preliminary work under faculty supervision. Students will be required to take classes in 190A or 190C, when completed, will replace the "IP" in 190B. "PREREQUISITES:" Cognitive Science 109A with grade of A- or better and formal admittance to the Cognitive Science Honors Program. (See "Cognitive Science Honors Program" section for more information.)

190C. Honors Thesis in Cognitive Science (4)
This course will provide honors candidates an opportunity to complete the research on and preparation of an honors thesis under close faculty supervision. Oral presentation of student's thesis is required to receive honors; additionally, students must receive grade of A- or better in 190B and 190C to receive honors. "PREREQUISITES:" Cognitive Science 109B with grade of A- or better and formal admittance to the Cognitive Science Honors Program. (See "Cognitive Science Honors Program" section for more information.)

190D. Preparation for Thesis Proposal (1)
This course is affiliated with the Honors program (190A-B-C) and is required of honors students during spring quarter. Its aim is to prepare students to present research results to an audience. Emphasis will be on the oral presentation (organization, wording, graphics), but there will also be some discussion about written research reports. Seminar style format with occasional short lectures wherein students will practice oral presentations and provide constructive critique to each other. "PREREQUISITES:" must be concurrently enrolled in 190B or 190C.

191. Laboratory Research (1-4)
Students engage in discussions of reading of recent research on a area designated and directed by the instructor and also participate in design and execution of original research. Assignments include both oral and written presentations and demonstrating the ability to pursue research objectives. "PREREQUISITES:" consent of the instructor and department approval. (May be repeated for credit, but not to exceed 8 units.)

195. Instructional Apprenticeship in Cognitive Science (4)
Students, under the direction of the instructor, lead laboratory or discussion sections, attend lectures, and meet regularly with the instructor to help prepare course materials. Applications must be submitted to and approved by the department. "PREREQUISITES:" upper-division standing; 3.0 GPA; instructor and department approval. P/NP only.

197. Cognitive Science Internship (2 or 4)
The student will undertake a program of practical research in a supervised work environment. Topics to be researched may vary, but in each case the course will provide skills for carrying out these studies. "PREREQUISITE:" consent of instructor.

198. Directed Group Study (4)
This independent study course is for small groups of advanced students who wish to complete a one- quarter reading or research project under the mentorship of a faculty member. Students should contact faculty whose research interests them to discuss possible projects. "PREREQUISITES:" upper-division standing; 2.5 GPA; consent of instructor and department approval.

199. Special Project (2 or 4)
This independent study course is for individual, advanced students who wish to complete a one- quarter reading or research project under the mentorship of a faculty member. Students should contact faculty whose research interests them to discuss possible projects. "PREREQUISITES:" upper-division standing; 2.5 GPA; consent of instructor and department approval.

GRADUATE

This seminar emphasizes the conceptual basis of cognitive science, including representation, processing mechanisms, language, and the role of interaction among individuals, culture, and the environment. Current developments in each field are considered as they relate to issues in cognitive science. (May be repeated for credit.)

201. Systems Neuroscience (4)
(Conjoined with Cognitive Science 107B) This course is a rigorous introduction to the neurophysiological and neuroanatomical basis of human and animal cognition, covering cellular neurophysiology and circuit modeling; development; vision; sensory, auditory, motor and limbic systems; neuroimaging and language. Students in Cognitive Science 107B will have a textbook and will be given short-answer tests; students in Cognitive Science 201 will have a reading list and take-home assignments, in addition to a short final paper.

This course surveys the development of symbolic and connectionist models of cognition. Selected readings from the late 1940s to the present are covered. Topics include: Turing machines, information theory, computational complexity, search, learning, symbolic artificial intelligence, and neural networks.

Surveys a variety of theoretical and methodological approaches to the study of human cognition. Topics include language structure, language processing, concepts and categories, knowledge representation, analogy and metaphor, reasoning, planning and action, problem solving, learning and expertise, and emotion.

205. Introduction to Thesis Research (4)
This course is taken to focus the students' development and expertise, and emotion. (Same as Neurosciences 241) This course will cover ethical issues which arise in academia, including: dishonesty, plagiarism, attribution, sexual misconduct, etc. We will also discuss "survival" issues, including job hunting, grant preparation, journal reviews, writing letters of recommendation, mentoring, etc. S/U only.

206. Seminar on Special Topics (1-4)
Specific topics in cognitive science are discussed. (May be repeated when topics vary.)

210A-B-C. Introduction to Research (4-4-4)
This sequence is an intensive research project. Students under faculty mentorship perform a thorough analysis of a research problem and the literature, carry out original studies, and prepare oral and written presentations. Students should aim for a report of publishable quality. Letter grade required.

211A-B-C. Research Methods in Cognitive Science (2-2-2)
Issues in design, implementation, and evaluation of research in cognitive science are discussed. Students will present and comment on their own research projects in progress. Discussions also include presentations of research to various audiences, abstracts, reviews, grant process, and scientific ethics. Letter grade required.

213. Issues in Cognitive Development (4)
This course examines current issues in human development of interest to cognitive scientists. An emphasis is placed on the foundations of mind and how information is represented at various stages of learning and development. (May be repeated once, when topics vary.)

215. Neurological and Cognitive Development (4)
This course is presented in two sections. The first part of the course focuses on early neurological development. The second part addresses questions concerned with the relations between cognitive brain development, and linguistic and affective development.

220. Information Visualization (4)
This seminar surveys current research in information visualization with the goal of preparing students to do original research. The focus is on the cognitive aspects of information design, dynamic representations, and computational techniques. Topics vary each time course is offered.

234. Distributed Cognition (4)
This course focuses on aspects of individual and socially distributed cognition. Empirical examples are drawn from natural and experimental settings which presuppose tacitly or explicitly, socially distributed knowledge among participants. The class examines the way locally managed, pragmatic conditions influence how decisions are framed.

238. Topics in Cognitive Linguistics (1-4)
(Same as Linguistics 238) Basic concepts, empirical findings, and recent developments in cognitive and functional linguistics. Language viewed dynamically in relation to conceptualization, discourse, meaning construction, and cognitive processing. (As topics vary, may be repeated for credit.)

241. Ethics and Survival Skills in Academia (3)
(Same as Neurosciences 241) This course will cover ethical issues which arise in academia, including: dishonesty, plagiarism, attribution, sexual misconduct, etc. We will also discuss "survival" issues, including job hunting, grant preparation, journal reviews, writing letters of recommendation, mentoring, etc. S/U only.

243. Statistical Inference and Data Analysis (2 or 4)
This course provides a rigorous treatment of hypothesis testing, statistical inference, model fitting, and exploratory data analysis techniques used in the cognitive and neural sciences. Students will acquire an understanding of mathematical foundations and hands-on experience in applying these methods using Matlab.

253. Semantics and Cognition (4)
This course explores current issues in the study of meaning and its interaction with other areas of cognitive science. The focus is on cognitive semantics, pragmatics, and meaning construction in general.

254. Pragmatics and Common Sense Reasoning (4)
A study of the pragmatic principles involved in language comprehension and the logic of everyday life. Cognitive, linguistic, cultural, and sociological aspects will be covered.

260. Seminar on Special Topics (1-4)
Specific topics in cognitive science are discussed. (May be repeated when topics vary.)

272. Topics in Theoretical Neurobiology (4)
The main focus of this course will be on the nervous system and function and cognition. It covers broad theoretical issues and specific topics. Material comes from
lectures, papers, and the text. Topic varies each time the course is offered. (May be repeated for credit.)

273. Biological Basis of Attention (4)
A survey of the theories of attention with special emphasis on the current anatomical, physiological, and biochemical basis of attention.

275. Visual Modeling (4)
Visual system neurophysiology and neuroanatomy, and neurally realistic and artificial intelligence modeling approaches are covered. Topics are dendrites, orientation and edges, motion, stereo, shading and color, eye movements, and pattern recognition. Students prepare computer modeling projects or research papers.

276. Foundations of Neuroimaging (4)
Foundations of neuroimaging: (1) MRI/fMRI: RF excitation, relaxation, echos, image formation, BOLD and flow, DTI, EPI, time and series analysis, (2) cortical surface reconstruction, morphing, mapping, and data display, (3) physiological basis of MEG and EEG, forward and inverse solutions.

279. Electrophysiology of Cognition (4)
(Conjoined with Cognitive Science 179; cross-listed with NEU 279) This course surveys the theory and practice of using recordings of electrical and magnetic activity of the brain to study cognition and behavior. It explores what brain waves reveal about normal and abnormal perception, processing, decision making, memory, preparation, and comprehension. Graduate students will be required to do additional readings for the material each week (different for each grad) and to present orally (as well as in a written page) a critical analysis of the readings. **PREREQUISITES:** Cognitive Science 107A or Psychology 106C, Cognitive Science 107A or Psychology 105.

290. Cognitive Science Laboratory Rotation (2)
Laboratory rotations provide students with experience in the various experimental methods used in cognitive science. **PREREQUISITE:** consent of instructor. S/U only.

291. Laboratory Research (1-4)
Students engage in discussions of reading of recent research in an area designated and directed by the instructor and also participate in the design and execution of original research. Students are expected to demonstrate oral and written competence in presenting original research. **PREREQUISITES:** consent of the instructor and departmental approval. (May be repeated for credit.)

298. Directed Independent Study (1-12)
Students are provided directed research on their dissertation topic by faculty advisors.

299. Thesis Research (1-12)
Students are provided directed research on their dissertation topic by faculty advisors.

500. Teaching Apprenticeship (1-4)
This practicum for graduate students provides experience in teaching undergraduate cognitive science courses. S/U only.

Natalia Roudakova, Ph.D.
Elana Zilberg, Ph.D.

LECTURER WITH SECURITY OF EMPLOYMENT
Claudio Fenner-Lopez, M.A., Emeritus

Communication at UC San Diego is a field of study which emphasizes the role of technologies and institutions of communication, from language, to television, to the Internet and beyond, in mediating human experience. It draws from such social science disciplines as anthropology, psychology, sociology, and political science, and from the humanities and fine arts, including theatre, literature, and visual arts. Communication students will develop a critical awareness of the communicative forces that affect their everyday lives.

The communication major is not designed as a training program in advertising, journalism, production, or public relations. It provides students with a solid liberal arts background necessary for graduate studies in communication and other disciplines, and for professional work in a number of communication-related fields, including primary and secondary education.

Though the emphasis of the major is not a technical one, the faculty in the Department of Communication believe that students will develop a deeper understanding of how communication works by exploring firsthand the capabilities and limitations of a variety of media; students, therefore, will have the opportunity to conduct part of their studies in video, computer communication or other forms of media practice.

Within the Department of Communication curriculum are three broadly defined areas of study: Communication as a Social Force, Communication and Culture, and Communication and Human Information processing. Students take courses in each of these areas.

---

COMMUNICATION AS A SOCIAL FORCE
How are social systems affected by communication technology? What is the social organization of the communication industries? How is the information presented by the media related to the characteristics of the intended audiences? How do media fit into the power structure of societies? Courses in this area address such questions. Students analyze mass communications, the development of telecommunications and information technologies, and the political economy of communication institutions both at home and abroad.

COMMUNICATION AND CULTURE
Film, music, advertising, art, theater, ritual, literature, and language are forms of communication which embody cultural beliefs of the societies from which they come. These media can influence and bring about changes in social behavior, styles, and traditions. At the same time, individuals and groups can reshape the media. Students will study the social production of cultural objects, the cultural traditions that shape their form and content, and various approaches to interpreting or “reading” television, film, newspapers, language, rituals, and other forms.

COMMUNICATION AND HUMAN INFORMATION PROCESSING
How do people turn concepts and ideas into messages? What is the process by which people receive and respond to those messages? Each medium—whether it is language, writing, or electronic media—has different properties that change the way people create and comprehend messages. The impact of television on the individual, the effect of literacy on individuals and on cultures, the ways that concepts are transmitted in film, and the means by which computers expand communication potentials are examples of topics investigated in this area.

THE COMMUNICATION MAJOR

Degree offered: Bachelor of Arts

The major consists of two lower-division courses and fourteen upper-division courses. None of the major courses may be taken on a Pass/Not Pass basis.

LOWER-DIVISION

*COSF 20: Introduction to Communication
*COSF 21: Methods of Media Production

UPPER-DIVISION

*COSF 100: Introduction to Communication as a Social Force
*COCU 100: Introduction to Communication and Culture
*Cohen 100: Introduction to Communication and Human Information Processing
*COC 150: Senior Seminar in Communication

One media methods course
Three courses beyond the introductory courses: (one must be chosen from each of the categories: COSF, COCU, and COHl)
Six upper-division communication electives

* These courses must be taken at UCSD.
NOTE: If students choose to do a 198, 199, or 197 note the following. COGN 198, 199, 197 grading option is Pass/Not Pass and only ONE may be applied to the major to satisfy an upper-division elective. AIP 197 must be petitioned for approval for the major.

RESIDENCY REQUIREMENT
Students are required to complete at least ten classes of their overall work in the major at UCSD. Following are the communication classes required to be taken at UCSD. See your college advisor for further residency requirements.

COCU 20: Introduction to Communication
COSF 100: Introduction to Communication as a Social Force
COHU 100: Introduction to Communication and Culture
COHI 100: Introduction to Communication and Human Information Processing
COGN 150: Senior Seminar
One COCU elective
One COHI elective
One COSF elective
One COMT elective

REQUIREMENTS FOR THE COMMUNICATION MINOR
(Effective fall 1998)
The communication minor at UCSD is a social science minor. None of the courses may be taken on a Pass/Not Pass basis. Students are required to take seven courses in communication as follows:
* COGN 20 (Introduction to Communication)
Two courses of your choice from the following 100’s:
* COSF 100 (Introduction to Communication as a Social Force)
* COCU 100 (Introduction to Communication and Culture)
* COHI 100 (Introduction to Communication and Human Information Processing)
* Four upper-division communication electives within the areas of the chosen 100 classes.
* These courses must be taken at UCSD within the communication department.

NOTE: COG 150, 197, 198, and 199 Media Methods, and courses outside of the department may not be used as electives within the minor.

THE HONORS PROGRAM
The Department of Communication offers an honors program to those students who have demonstrated excellence in the communication major. Successful completion of the honors program enables the student to graduate “With Highest Distinction,” “With High Distinction,” or “With Distinction,” depending on performance in the program. The honors program requires an application. Students wishing to be considered need to include the following in their application: one faculty advisor who supports their admission to the program, a verified overall GPA of 3.0 and a major GPA of 3.5, and a brief but detailed description of the proposed research or creative project.
Applications will be reviewed by a faculty committee, accepting students who meet these criteria. Once accepted into the Honors Program, students are required to complete a two-quarter course sequence, COGN 191A/191B in the fall and winter quarters of their senior year. At the end of the fall quarter, students will receive an IP grade report. This grade will change to the final letter grade at the completion of the course sequence in the winter quarter. This grade is based on attendance in the seminars and successful completion of the research paper or creative production.

THE GRADUATE PROGRAM
The Department of Communication offers a program of study leading to the Doctor of Philosophy degree. Communication at UCSD seeks to combine modes of analysis from the humanities and social sciences to explore the history, structure, and process of communication. The graduate program is conceived as a blending of the tradition of critical communication research with the empirical tradition of American scholarship. The program does not closely resemble any other communication department in this country. It is related by sympathy and interest to mass communication programs, but not by kinship. Historically, this department grew out of an interdisciplinary program jointly sponsored by the Departments of Drama (currently, Theatre and Dance), Political Science, Psychology, and Sociology. The department retains strong ties to the departments and disciplines from which it developed.

The study of communication at UCSD places major emphasis on historical, comparative, and ethnographic approaches to symbolically mediated human communication. Study is organized around the following three analytic perspectives: communication as a social force, communication and culture, and communication and human information processing. In addition, the department believes that investigation into communication requires a blending of theory and practice, hence, our attention to the media practices.

Communication as a Social Force examines the relation of communication institutions to structures of power in society. In this part of the curriculum, we examine institutional arrangements and structural characteristics regarding:
• Communication and political systems: state, law, regulation, social movements and political parties, democracy
• Communication and economic systems: markets, ownership, access; “demographics” and class/gender/racial and national stratification
• The production of content within media industries

Faculty research includes the following topics:
• The study of news as public information and political ideology
• Telecommunications and the information economy
• Intellectual property and the flow of culture between global North and South
• The relationships among law, communication technologies, ownership, democracy, and the public sphere.

• Comparative analysis of media systems
• Communication, globalization, and economic development

Communication and Culture examines the cultural artifacts and discourses through which we experience our everyday lives, including popular music, films and television shows, advertisements, museum displays, landscape and urban design, and health and identity documentation systems. How can we understand the histories and changing practices associated with these forms of representation? What is the role of media (print, visual, electronic, material) in forming ideas about social identity and in shaping subjectivity? This part of the curriculum draws on the humanities, anthropology, history, political theory, cultural studies, and the sociology of culture to offer students a range of methods and theoretical frameworks for interpreting the production and circulation of artifacts, discourses, and meanings in a range of local, national, transnational, and diasporic cultural contexts.

Faculty research includes the following topics:
• Collective memory and the struggles over the meaning of the past
• The politics of representation of women, children, abortion, and childbearing
• Political violence as performance
• Popular music and African-American political movements

Communication and Human Information Processing examines the ways in which our experience as human beings is created by the communicative practices of the societies in which we live and the cultural practices of our families and communities with which we interact from the earliest days of life. With a sociocultural lens, we study the role of communication through language and other organized symbolic media. Because both individuals and their environments are constantly changing, the study of culture and the person pays special attention to the cultural and historical contexts of personal experience and the practices that constitute the proximal environments of individual development. This part of the curriculum draws particularly on the fields of anthropology, sociology, psychology, linguistics, cognitive science, and education to examine such processes as learning and cognition, language structure and language use, the construction and negotiation of meaning, and the organization of mental worlds.

Faculty research includes the following topics:
• The evolution of language and communication in human beings
• The role of new communicative practices in human development
• The study of human cognition as distributed among people and coordinated in communicative practices
• The development of reading and writing in young children
• The use of technology to study human thought
• Bilingual and bicultural development in a globalized world
• The use of information technology in work and leisure

Communication and Media Practices faculty work in video, film, and interactive media production as well as in research scholarship. Graduate students as well as undergraduates are offered the opportunity to integrate creative practice in media production into their program of study.

Some communication faculty production interests include:
• Hybrid documentary and narrative forms
• Alternative representation of gender, race, and ethnicity in film and electronic media
• Distributed and networked media production
• Digital media based on game-like forms
• Development and use of media technology in and for educational contexts
• Global media networks
• Experimental approaches to cinematography and sound design
• Media as a tool for social and political activism

PH.D. REQUIREMENTS

2. 294, The History of Communication Research.
3. At least three methods courses from the 201 methodology sequence (see course listings).
4. Four courses in communication history and theory (see course listings).
5. 280, Advanced Workshop in Communication Media.
6. 296, Communication Research as an Interdisciplinary Activity.
7. First-Year Exam and Evaluation: At the end of the spring quarter of the student’s first year, the student must pass a comprehensive written examination based on course work completed during the first year.
8. Language Requirement: All students are required to demonstrate proficiency in one language other than their native language.
9. Qualifying Examinations: Before the end of the fourth year the student must take and pass an oral qualifying examination. The exam will be based on two papers concerning two of the subfields covered in the program. The student will also present a separate dissertation proposal at the examination. At this time, the faculty will examine the proposal for appropriateness and feasibility.
10. Teaching Requirement: In order to acquire teaching experience, all students are required to participate in the teaching activities of the department for three academic quarters.

11. Dissertation: Acceptance of the dissertation by the university librarian represents the final step in completing all requirements for a Ph.D. The dissertation committee must be approved by the department chair and the dean of Graduate Studies.

DEPARTMENTAL PH.D. TIME LIMIT POLICIES

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

STUDENT ADVISING

Faculty Graduate Advisor: David Serlin, Ph.D.
Faculty Undergraduate Advisor: Valerie Hartouni, Ph.D.
Undergraduate Student Affairs Advisor: Jamie Lloyd
Graduate Program Coordinator: Gayle Aruta

Courses

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

LOWER-DIVISION

GENERAL COMMUNICATION

COGN 20. Introduction to Communication (4)
An historical introduction to the development of the means of human communication, from language and early symbols through the introduction of writing, printing, and electronic media, to today’s digital and multimedia revolution. Examines the effect of communications media on human activity, and the historical forces that shape their development and use. Offered fall and spring quarters.

COGN 21. Methods of Media Production (4)
This course explores fundamental technical and social constraints shaping media production. We read film and television as texts by considering history, theory, genre and practical technique. COGN 22 and COGN 21 taken concurrently strongly recommended. COGN 22 is required for students interested in advanced communication production in media courses. Majors must enroll for a letter grade.

COGN 22. Methods of Media Production Lab (2)
In groups in lab students work hands-on with video and new media equipment, exploring fundamental technical constraints shaping media production. We read film and television as texts by considering history, theory, genre and practical technique. COGN 21 and COGN 22 strongly recommended concurrently. COGN 22 is required for students interested in advanced communication production courses. Majors must enroll for a letter grade. PREREQUISITE: COGN 21 (may be taken concurrently).

COGN 87: Freshman Seminar (1)
The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. PREREQUISITES: none.

UPPER-DIVISION

COMMUNICATION AS A SOCIAL FORCE

COGF 100. Introduction to Communication as a Social Force (4)
A critical overview of areas of macro communication and analysis, with special emphasis on the development of communication institutions, including broadcasting, common carriers, and information industries. Questions regarding power, ideology, and the public interest are addressed. PREREQUISITE: COGN 20. Offered fall quarter.

COGF 123. Communication, Dissent, and Social Movements (4)
Emergence of dissent in different societies, and the relationship of dissent to movements of protest and social change. Movements studied include media concentration, antiwar, antiglobalization, death penalty, national liberation, and labor. Survey of dissenting voices from Tolstoy and Naomi Klein seeking to explain the relationship of ideas to collective action and its outcomes. PREREQUISITE: COGF 100 or consent of instructor.

COGF 124. Black Women, Feminism, and the Media (4)
This course examines the challenges that arise in using feminist theory to understand black women’s experience in Africa and the United States. It also looks at the mass media and popular culture as arenas of black feminist struggle. PREREQUISITE: COGF 100 or consent of instructor.

COGF 126. The Information Age: In Fact and Fiction (4)
Analysis of the forces propelling the “Information Age.” An examination of the differential benefits and costs, and a discussion of the presentation in the general media of the “Information Age.” PREREQUISITE: COGF 100 or consent of instructor.

COGF 127. The Internet Industry (4)
The political economy of the emergent Internet industry, charted through analysis of its hardware, software, and services components. The course specifies leading trends and changing institutional outcomes by relating the Internet industry to the adjoining media, telecommunications, and computer industries. PREREQUISITE: COGF 100 or consent of instructor.

COGF 128. Cultural Industries (4)
We examine how people interact with products of popular culture, production of cultural goods by looking at conditions in cultural industries. We examine film, music, publishing, focusing on how production is organized, what kind of working conditions arise, how products are distributed. PREREQUISITES: COGF 100 or consent of instructor.

COGF 129. Television and Citizenship (4)
Television is a contested site for negotiating the rationales of inclusion and exclusion associated with citizenship and national belonging. Historical and contemporary case studies within international comparative contexts consider regulation, civil rights, cultural difference, social movements, new technologies, and globalization. PREREQUISITE: COGF 100 or consent of instructor.

COGF 130. History of Electronic Media (4)
This course considers the social, cultural, economic, and technological contexts that have shaped electronic media, from the emergence of radio and television to their convergence through the internet, and how these pervasive forms of audiovisual culture have impacted American society. PREREQUISITE: COGF 100 or consent of instructor.

COGF 132. History of U.S. Political Communication (4)
Survey of the history of political communication in the United States from the colonial period to the present. Students will work on term papers in which they will undertake original historical research. PREREQUISITES: COGF 100, communication major.

COGF 133. Science Fiction (4)
Focuses on science fiction’s critical investigation of history, identity, and society across a range of media forms, including film, television, and literature. PREREQUISITE: COGF 100 or consent of instructor.
COSF 134. Communication, Politics, and Citizenship in America (4) 
(Formerly COCU 134.) Selected topics, both historical and contemporary, on the public sphere, political participation, and the meaning of citizenship. Topics may include: voting practices, the role of political parties, social and cultural dimensions of citizenship, and shifts in public understanding of what counts as "political." The course may require five to ten hours of the student's work, arranged through the AIP office. See instructor for further information. PREREQUISITE: COSF 100 or consent of instructor.

COSF 135. Communication and Religion (4) 
The secularization thesis—that as society becomes more modern and standards of living rise, the importance of religion withers and declines to the public sphere—may be wrong. We address religion, communication, culture, and politics in the United States. PREREQUISITE: COSF 100 or consent of instructor.

COSF 139A-B. Law, Communication, and Freedom of Expression (4-4) 
An examination of the legal framework of the freedom of expression in the United States. 139A covers the fundamentals of First Amendment law through the consideration of key cases in historic context. Prior restraint, incitement, obscenity, libel, fighting words, public forum, commercial speech, and hate speech are some of the topics covered. 139B focuses on the law of mass communication, examining the different legal treatments accorded print, broadcast, cable, and common carriers. The decline of broadcast regulation, the breakup of AT&T, the rise of new forms of mass communication, and the question of the public interest are of central concern. PREREQUISITE: 139A-COSF 100 or PS 40 or consent of instructor. 139B-COSF 100 or PS 40, COSF 139A preferred.

COSF 140A. Comparative Media Systems: Asia (4) 
The development of media systems in Asia: focusing on India and China. Debates over nationalism, regionalism, globalization, new technologies, identity politics, censorship, privatization and media piracy. Alignments and differences with North American and European media systems will also be considered. PREREQUISITE: COSF 100 or consent of instructor.

COSF 140B. Comparative Media Systems: Europe (4) 
The development of media systems and policies in Europe. Differences between European and American journalism. Debates over the commercialization of television. The role of media in post-communist societies in Eastern Europe. PREREQUISITE: COSF 100 or consent of instructor.

COSF 140C. Comparative Media Systems: Latin America and the Caribbean (4) 
The development of media systems and policies in Latin America and the Caribbean. Debates over dependency and cultural imperialism. The news media and the process of democratization. Development of the regional television industry. PREREQUISITE: COSF 100 or consent of instructor.

COSF 140XL. Foreign Language Discussion (1) 
Students will exercise advanced foreign language skills to discuss materials and the correspondingly numbered communication language foreign area course. This section is taught by the course instructor, has no final exam, and does not affect the grade in the core course, COSF 140C. PREREQUISITE: concurrent enrollment in COSF 140C.

COSF 141. History of U.S. Telecommunications (4) 
This course provides a social, historical and cultural focus on the developing social form and industry structure of U.S. telecommunication, beginning with the Post Office. Policy issues are regularly incorporated into readings and discussions. Emphasis is placed on the emergence, around the turn of the century, of the regulated, national telephone network system dominated by AT&T and its extension. PREREQUISITE: COSF 100 or consent of instructor.

COSF 142. The Internet in Social and Historical Perspective (4) 
This course explores the social, cultural, legal, and political-economic dimensions of the Internet from the 1960s to the present. Students are introduced to theoretical methods developed in communications and related fields for studying online media and their uses. PREREQUISITE: COSF 100 or consent of instructor.

COSF 159. Work and Industry in the New Information Economy (4) 
This course, a research seminar, examines the evolution of the new information economy and analyzes the transformation of patterns of work and industrial organization. Students will be expected to write a research paper, typically on some aspect of the new economy in the San Diego-Tijuana region. PREREQUISITE: upper-division standing or consent of instructor.

COSF 160. Political Economy/Global Consumer Culture (4) 
This course critically examines social and economic forces that shape the making of this new global consumer culture by following the flows of consumption and production between the 'developed' and 'developing' worlds. We will address the ways in which consumers, workers, and citizens participate in a new globalized consumer culture that challenges older distinctions between the 'First' and the 'Third World.' In this course, we will focus on the flows between the U.S., Asia, Latin America. PREREQUISITE: COSF 100 or consent of instructor.

COSF 161. Global Economy and National Identity (4) 
Examine the interplay of globalization as a discourse and set of practices focusing on free movement of commodities and ideas, nationalist fragmentation marked by ethnic rivalry and identity conflict, seeks to examine those places where dualism is most pronounced. PREREQUISITE: COSF 100 or consent of instructor.

COSF 171A. American News Media (4) 
(Same as Soc. 165A.) History, politics, social organization, and ideology of the American news media. SF 171A surveys the development of the news media as an institution, from earliest new newspapers to modern mass news media. SF 171B deals with special topics, including the nature of television news, and with methods of news media research, and requires a research paper. PREREQUISITE: COSF 100 for COSF 171A.

COSF 172. The Cultural Politics of Sport (4) 
Examine sport as play, performance, competition, an arena that has industry culture, power, identification and struggle. Estimating the social meanings of sport, we address: ethics, race, class, nation, gender, body, science, technolo- gy, entertainment industries, commerce, spectatorship, consumption, amateurism, professionalism. PREREQUISITE: COSF 100 or consent of instructor.

COSF 173. Transparent Society (4) 
How have politics, media, and society made visible features of life that were once hidden? From the women's health movement to gay liberation to laws requiring public disclosure, frankness challenges civility, privacy, and taste. How can the invisible become visible? PREREQUISITE: COSF 100 or consent of instructor.

COSF 175. Advanced Topics in Communication: Social Force (4) 
Specialized study in communication as a social force with topics to be determined by the instructor for any given quarter. Past topics include information as a commodity and book publishing. May be repeated for credit three times. PREREQUISITE: COSF 100 or consent of instructor.

COSF 180. Political Economy of Mass Communications (4) 
The social, legal, and economic forces affecting the evolution of mass communications institutions and structure in the United States today. The character and the dynamics of mass communications in the United States today. PREREQUISITE: COSF 100 or consent of instructor.

COSF 181. Political Economy of International Communications (4) 
The character and forms of international communications. Emerging structures of international communications. The United States as the foremost international communicator. Differential impacts of the free flow of information and the unequal roles and needs of developed and developing economies in international communications. PREREQUISITE: COSF 100 or consent of instructor.

COSF 182. Surveillance, the Media, and the Risk Society (4) 
Contributions of the field of communication to the study of surveillance and risk. Critical and legal perspectives on consumer research, copyright enforcement, the surveil- lance capacity of ICTs, closed-circuit television, interactive media, and the "rhetorics of surveillance" in television and film. PREREQUISITE: COSF 100 or consent of instructor.

COSF 183. The Politics of World Music (4) 
What is "world music?" How, where, and why did it come into being? Is it a naturally occurring category of music? What makes it distinct from other music? We critically ex- amine history of world music, analyzing how it is produced, circulated, and consumed. PREREQUISITE: COSF 100 or consent of instructor.

COSF 184. The Mass Media and Politics in Africa (4) 
This course will critically examine the role of the mass media in Sub-Saharan Africa in the areas of colonial rule, nationalist struggles, authoritarianism, and popular movements. We will examine general trends regionally and internationally, as well as individual national cases, from the early twentieth century to the Internet news services of the information age.

COSF 185. Gender, Labor, and Culture in the Global Economy (4) 
Course examines the ways in which women participate in the global economy as the producers of consumer products and of cultural goods like entertainment and information. It also examines power as it relates to women's labor in producing such material and cultural goods. PREREQUISITE: COSF 100 or consent of instructor.

COSF 186. Film Industry (4) 
A study of the social organization of the film industry throughout its history, addressing such questions as who controls it, how it is capitalized, and how it has evolved. The changing relationships between studios, producers, direc- tors, writers, actors, editors, censors, distributors, audi- ence, and subject matter of the films will be explored. PREREQUISITE: COSF 100 or consent of instructor.

COSF 187. Culture Wars: Creationism vs. Evolutionism (4) 
Explore current debate from a variety of perspectives, rhetorical styles, political views, academic disciplines, media, popular culture, different interest, political, religious, cultural groups, and constituencies. PREREQUISITE: COSF 100 or consent of instructor.

COMMUNICATION AND CULTURE 
COCU 100. Introduction to Communication and Culture (4) 
Processes of communication shape and are shaped by the cultures within which they occur. This course emphasizes the ways in which cultural understandings are constructed and transmitted via the variety of communication media available to members. A wide range of cultural contexts are sampled, and the different ways that available com- munication technologies (language, writing, electronic media) influence the cultural organization of people's lives are analyzed. PREREQUISITE: COGN 20, or HDP 1, or consent of instructor. Offered winter quarter.

COCU 108. Visual Culture (4) 
How visual images contribute to our understanding of the world and ourselves. Theoretical approaches from media studies, art history, gender studies, and social theory will be used to analyze cultures of art, mass media, and everyday life. PREREQUISITE: COCU 100 or consent of instructor.

COCU 110. Cinema in Latin America (4) 
Analysis of the changing content and sociopolitical role in Latin America of contemporary media, including the "new cinema" movement, recent developments in film, and popular television programming, including the telenovela. Examples drawn from Mexico, Brazil, Cuba, and other countries. PREREQUISITE: COCU 100 or consent of instructor.

COCU 120. The Problem of Voice (4) 
This course will explore the problem of self-expression for members of various ethnic and cultural groups. Of special interest is how writers find ways of describing themselves in the face of others' attempts to categorize and define them. PREREQUISITE: COCU 100 or consent of the instructor.
COCU 123. Black Women Filmmakers (4)
Students examine film and video media produced by black women filmmakers worldwide. This course will use readings from the women filmmakers themselves as well as from film studies, women’s studies, literature, sociology, and history. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 124. Documentary History and Theory (4)
Lecture and discussion course in the history of nonfiction film and video. Through film and written texts we survey the nonfiction film genre, considering technological innovations, ethical issues, and formal movements related to these representations of the “real.” Students write a research paper in lieu of a final. **Prerequisite:** COCU 100 or consent of instructor.

COCU 125. How to Read a Film (4)
The purpose of the course is to increase our awareness of the ways we commonly interpret or make understandings from movies and to enrich and increase the means by which one can enjoy and comprehend movies. We will talk about movies and we will explore a range of methods and approaches to film interpretation. Readings will emphasize major and diverse theorists, including: Bazin, Eisenstein, Cavell, and Mulvey. **Prerequisite:** COCU 100 or consent of instructor.

COCU 126. African Cinema (4)
History, theory, and aesthetics of African cinema develop- ed by and around the continent. The course includes film screenings and a wide range of readings, students will discuss such topics as cinema and national identity, cinema and social change, and Hollywood dominance. **Prerequisite:** COCU 100 or consent of instructor.

COCU 127. Folklore and Communication (4)
Folklore is characterized by particular styles, forms, and settings. Course introduces a range of folklore genres from different cultural, historical periods, oral narrative, material folk arts, dramas, rituals. Study of the relationship between expressive form and social context. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 129. Public History and Museum Studies (4)
This course will explore the role that “public history”—history as created for general audiences—plays in communicating cultural and national identities by examining museum exhibitions, their controversies, and how material objects mediate interpretations of the past. **Prerequisite:** COCU 100 or consent of instructor.

COCU 130. Tourism: Global Industry and Cultural Form (4)
The largest industry in the world has far-reaching cultural ramifications. We will explore tourism’s history and its contemporary cultural effects, taking the perspective of the “tourist” as well as that of the tourist. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 131. Cinema of the Cuban Revolution (4)
Overview of the Cuban Revolution (1959–2000) and cultural policies through the study of film production, as a cultural industry and representative style. Cuban film in context of domestic and international events, particularly treatment of race and gender dynamics. **Prerequisite:** COCU 100 or consent of instructor.

COCU 132. Gender and Media (4)
This course examines the work of women artists and the history of the representation of women in the media, from the beginnings of cinema to the present, and offers a basic introduction to feminist media theory. It focuses on the representation of gender, and narrative and experimental strategies used by women media makers, and the role of the female spectator. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 136. Concepts of Freedom (4)
This course examines some of the changing cultural, soci- nal, technological, and political meanings, practices, and aspirations that together constitute what is, and has been, called Freedom. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 137. The Politics of Bodies (4)
This course will explore the construction of gendered bodies and gendered sexuality in postindustrial culture(s) through political, historical, and media analysis. Topics may include abortion, eating disorders, body modification, work and consumption, AIDS, and genetic engineering. **Prerequisite:** COCU 100 or consent of instructor.

COCU 139. Reproductive Discourse and Gender (4)
In this course we will discuss how the discourses in and culture the controversies surrounding the development and use of the new technologies of human genetics and reproduction. Of particular interest will be the way in which these new technological practices and processes test, erode, or undermine traditional understandings of “human nature” and relationship while enforcing traditional understanding of gender. **Prerequisite:** COCU 100 or CGS 2A or 2B or consent of the instructor.

COCU 140. Television, Culture, and the Public (4)
How and what does television communicate? Emphasis will be on contemporary U.S. television programming, placed in comparative and historical context. Special topics may include: TV genres; TV and politics; TV and other media. Frequent in-class screenings. **Prerequisite:** COGN 20 or consent of the instructor.

COCU 141A. Media and Technology: Global Nature, Global Culture (4)
This course examines globalization’s impact on concepts of nature and through media texts, information systems, circulation of consumer goods and services, the emergence of global brands, science, health initiatives, environmental media activism, and the production of social, ethnic, and cultural identities. **Prerequisites:** COSF 100 or COCU 100 or COHI 100 or consent of instructor.

COCU 141B. Media and Technology: Gender and Biomedicine (4)
From historical and cultural aspects of media, information, imaging technology use in biomedical research, clinical care, health communication to constructions of gender, and identity. We approach the subject through audiovisual texts and writings from fields including science and technology studies and cultural studies. **Prerequisites:** COSF 100 or COCU 100 or COHI 100 or consent of instructor.

COCU 141C. Media and Technology: Disability (4)
Cultural and historical ways of defining and understanding disability relative to communication and assistive technolo- gies, including the impact of digital technologies and the Americans with Disabilities Act. Use of audiovisual texts and writings from fields including science and technology studies, and cultural studies. **Prerequisites:** COSF 100 or COCU 100 or COHI 100 or consent of instructor.

COCU 142. Holocaust Discourse (4)
Legal, visual, historical, cultural discourses and debates that contribute to represent the Holocaust as a coherent and cohesive event, and as a touchstone of moral and political discourse in the U.S., entailing powerful stories about pluralism, tolerance, democracy, and justice. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 143. Culture and Media: Theories and Methods (4)
Considers in greater depth the theories and methods introduced in COCU 100. Advanced approaches to the analysis of media texts in everyday life and the study of concepts such as representation, culture, reality, and the virtual. **Prerequisite:** COCU 100.

COCU 144. The Globalization of Culture and Communication (4)
We live in a world of transnational flows of media, money, goods, and people. What representational and methodol- ogical challenges does globalization pose for the study of culture and communication? We will explore such questions from a cross-cultural and global perspective. **Prerequisite:** COCU 100 or consent of instructor.

COCU 145. Cultures of Consumption (4)
This course examines the cultural politics of consumption across time and cultures through several concepts: commodity fetishism; conspicuous consumption; taste, class, and identity formation; consumption’s psychological, phe- nomenological, and poetic dimensions; and contemporary manifestations of globalization and consumer activism. **Prerequisite:** COCU 100 or consent of instructor.

COCU 148. Communication and the Environment (4)
Survey of the communication practices found in en- vironment controversies. The sociological aspects of environmental issues will provide background for the investigation of environmental disputes in particular contested areas, such as scientific institutions, communi- ties, work-places, governments, popular culture, and the media. **Prerequisite:** COCU 100 or consent of instructor.

COCU 160. Performance and Cultural Studies (4)
Explores performance as a range of aesthetic conventions (theater, film, performance art) and as a mode of experienc- ing and conveying cultural identity. Texts include critical writing from anthropology, psychology, linguistics, media studies as well as film/video, play scripts, live performance. **Prerequisite:** COCU 100 or consent of instructor.

COCU 162. Popular Culture (4)
An overview of the historical development of popular culture from the early modern period to the present. Also a review of major theories explaining how popular culture reflects and/or affects patterns of social behavior. **Prerequisites:** COGN 20 and COCU 100 or consent of instructor.

COCU 163. Popular Culture in Contemporary Life (4)
Treats products of modern culture industries, and theories of social political importance. Study cultural forms: including music, television, fashion, food, landscapes. How popular culture is consumed, what it means to audiences, how social and ethnic differences among producers and consumers. **Prerequisite:** upper-division standing or consent of instructor.

COCU 164. Representing Race, Nation, and Violence in Multicultural California (4)
How does media representation of race, nation, and vio- lence work? Taking multicultural California as our site, we will explore how social power is embedded in a variety of visual texts, and how media not only represents but also reproduces conflict. **Prerequisite:** COCU 100 or consent of instructor.

COCU 165. History, Memory and Popular Culture (4)
What role does popular culture play in shaping and creat- ing our shared memory of the past? The course examines diverse sources such as school text books, monuments, holidays and commemorations, museums, films, music, and tourist attractions. **Prerequisite:** COCU 100 or consent of the instructor.

COCU 166. Cartoons (4)
This class relates cartoon programming for children to the history of western childhood and the contemporary American culture of the child. Children may deal with the effects of television on children, one is designed to encourage students to review the long- standing western traditions of hope and fear associated with children that shape these images. **Prerequisite:** COCU 100 or consent of instructor.

COCU 168. Latino Space, Place, and Culture (4)
Develop a critical understanding of the history, politics, and poetics of the Latino barrio as a distinct urban form. Course covers key concepts such as the production of space, landscapes of power, spatial apartheid, everyday urbanism, urban renewal and gentrification. **Prerequisite:** COCU 100 or consent of instructor.

COCU 169. Cultural Domination and Resistance (4)
Explores theories and narratives of cultural power, contem- porary practices of resistance. Texts from a wide range of disciplines consider how domination is enacted, enforced, and what modes of resistance are employed to contend with these. **Prerequisite:** COCU 100 or consent of instructor.

COCU 170. Advertising and Society (4)
Advertising in historical and cross-cultural perspectives. Topics will include the ideology and organization of the advertising industry; the meaning of material goods and gift capitalism, social, and nonindustrial societies; the nature of needs and desires and whether advertising creates needs and desires; and approaches to decoding the messages of advertising. **Prerequisite:** COCU 100 or consent of instructor.
COCU 172. The Cultural Politics of Sport (4)  
(Previously COSF 172.) Examine sports as play, performance, competition, an arena where there are politics, culture, power, identity struggles. Establishing the social meanings of sport, we address: ethics, race, class, nation, gender, body, science, technology, entertainment industries, commerce, spectatorship, consumption, amateurism, professionalism. Students may not receive credit for both COCU 172 and COSF 172. PREREQUISITE: COCU 100 or consent of instructor.

COCU 175. Advanced Topics in Communication: Culture (4) 
Specialized study in communication and culture with topics to be determined by the instructor for any given quarter. Past topics include cultural identity, rituals and spectacles. May be repeated for credit three times. PREREQUISITE: COCU 100 or consent of instructor.

COCU 177. Computer Game Studies (4) 
Course considers computer games both as media and as sites of communication. Games are studied through hands-on play and texts from a variety of disciplinary perspectives. Course encompasses commercial, academic, and independent games. Writing papers, analyzing games required. PREREQUISITE: COCU 100 or consent of instructor.

COCU 178. American Television in the 1970s (4) 
Course will explore the politics and culture of the 1970s through the lens of network television programming and the development of sitcoms, dramas, variety shows, and news features. Students will analyze television episodes and read relevant media studies scholarship. PREREQUISITE: COCU 100 or consent of instructor.

COCU 179. Colonialism and Culture (4) 
This course examines colonial narratives, slave accounts, essays, and stories by both colonizers and colonized. It also explores the issue of nationalism in determining the limits of colonialism among minority groups in the United States and in the Third World. PREREQUISITE: upper-division standing.

COCU 181. Architecture as Communication (4) 
This course examines how buildings, cities, towns, gardens, neighborhoods, roads, bridges, and other bits of infra-structure communicate. We consider both the materiality and language-like properties of physical things in order to understand how built environments are represented, experienced, and remembered. PREREQUISITE: COCU 100 or consent of instructor.

COCU 182. Black Popular Music (4) 
Examine black popular music as social practice, cultural product and create different African American musical expressions, discussions of race and intercultural exchange, power, social change, sound and identity, music industry, black performance. Music making, hearing, performance are exam- ined. PREREQUISITE: COCU 100 or consent of instructor.

Focuses on popular music as a social, aesthetic, historical, political formation. Relationship between musical and extramusical forces (institutions, communities, industries, identities) will be examined. Music making, hearing, perfor-mance will be engaged as sites of expressive practice, cultural politics, social identity. PREREQUISITE: COCU 100 or consent of instructor.

COMMUNICATION AND HUMAN INFORMATION PROCESSING

COHI 100. Introduction to Communication and the Individual (4) 
An introduction to theories of human mental processes which emphasizes the central role of mediation. The course covers methods of research that permit the study of mind in relation to different media and contexts of use. The traditional notion of media effects is critically examined in a range of important domains, including television, film, writing, and oral language. PREREQUISITE: COGN 20 or HDP 1, or consent of instructor. Offered spring quarter.

COHI 112. Interaction with Technology (4) 
In this class we will look closely at the everyday ways in which we interact with technology to discuss: sociocultural character of objects and built environments; situated, distributed, and embodied character of knowledge; the use of multimodal semiotic resources (i.e., talk, gesture, body orientation, ritual, dress) in human cognition. PREREQUISITE: COHI 100 or consent of instructor.

COHI 113. Communication and Social Machines (4) 
An examination of the questions that developments in robotics pose to the scholars of communication: How do we communicate when our interlocutors are nonhumans? How do we study objects that are claimed to be endowed with social and affective character? PREREQUISITE: COHI 100 or consent of instructor.

COHI 114. Bilingual Communication (4) 
This course is designed to introduce students to the multiple settings in which bilingualism is the mode of communication. Students will examine how such settings are socially constructed. Readings on language policy, bilingual education, and linguistic minori-ties, as well as field activities will constitute the bulk of the course. PREREQUISITE: COHI 100 or consent of instructor.

COHI 115. Education and Global Citizenship (4) 
The course introduces students to concepts, possibilities, and dilemmas inherent in the notion of global citizenship. Students will formulate goals and instructional strategies for global education and the expected competence of an individual within a global society—able to function simultane-ously upon many diverse elements, issues, and contexts. It will include readings and discussion of curriculum, which can play in the formation of identity, language use, and civic responsibility of a global citizen. PREREQUISITE: COHI 100 or consent of instructor.

COHI 117. Language, Thought, and the Media (4) 
This course examines the ways in which various commu-nicative channels mediate human action and thought. A basic premise of the course is that human thought is shaped in important ways by the communicative devices used to communicate. There is a particular emphasis on how thought develops, both historically and in the indi-vidual. PREREQUISITE: COHI 100 or consent of instructor.

COHI 119. Learning to Read (4) 
This course explores learning to read as a process involving individual, cultural, and social resources. Reading diffic-ulty is understood as induced by lack of resources, such as access to books or access to strategies for decoding, comprehension, and analysis of written text. Activities of reading are taken as a basic context for understanding patterns of reading difficulty in their populations. PREREQUISITE: COHI 100 or consent of instructor.

COHI 120. Reading the Web (4) 
This course explores how networked computing has helped change many aspects of modern life, from how we manage information to how we see ourselves culturally. The focus of the class is the online venue—how has the Web become part of daily life? What is different about goods, services, and events that transpire online? What theories of communication and social interaction are useful in understanding online behavior? PREREQUISITE: COHI 100 or consent of instructor.

COHI 121. Literacy, Social Organization, and the Individual (4) 
This course will examine the historical growth of literacy from its earliest precursors in the Near East. The interrela-tion between literacy and technology and social organization and the impact of literacy on the individual will be twin foci of the course. Arriving at the modern era, the course will examine such questions as the impediments to teaching reading and writing skills to all normal children in tech-nological societies and the relation between literacy and national development in the Third World. PREREQUISITE: COHI 100 or COCU 100 or HDP 1 or consent of instructor.

COHI 122. Communication and the Community (4) 
This course examines forms of communication that affect people’s everyday lives. Focusing on ways that ethnic com-munities transmit and acquire information and interact with mainstream institutions, we examine a variety of alternative local media, including murals, graffiti, newsmails, newsletters, and community radio. PREREQUISITE: COHI 100 or consent of instructor.

COHI 123. Children and Media (4) 
A course which analyzes the influence of media on chil-dren’s lives. The course adopts an historical as well as social perspective on childhood within which media play a role. Among media studied are books, films for children, video games, computer games, and television. PREREQUISITE: COGN 20 or HDP 1 or consent of instructor.

COHI 124. Voice: Deaf People in America (4) 
The relationship between small groups and dominant culture is studied by exploring the world of deaf people who have been the past twenty years been able to speak as a cultural group. Issues of language, communication, self-representation, and social structure are examined. PREREQUISITE: COHI 100 or consent of instructor.

COHI 125. Communication in Organizations (4) 
Organizations are analyzed as historically evolving discur-sive systems of activity mediated by talk, text, and artifacts. The class covers sense making, coordinating, symbolizing, talking, negotiating, reading and writing, story-telling, joking, and visualizing in organizations. Exemplary case studies, employing several complementary theoretical frameworks, are used to analyze these communicative pro cesses. PREREQUISITE: COHI 100 or consent of instructor.

COHI 127. Biography and Life Stories (4) 
Course examines several different ways of telling stories as a form of communication: our own life and about the lives of others. There are also the occasions that the life stories of others are told and how for example, funerals, festschrifts, retirement dinners, fifteenth-anniversary parties, and retrospective art shows. PREREQUISITE: COHI 100 or consent of instructor.

COHI 128. Mobile Communications (4) 
Movement is central to our lives. This course draws on the latest research into how we travel, trade, and move. Diverse topics will be covered including kids in cars, the New York subway, and theories of mobility. PREREQUISITE: COHI 100 or consent of instructor.

COHI 129. Borderlands (4) 
Communicative and identity aspects of “marginality”— belonging to more than one race, community, or nation-ality, and on the literature about insiders and outsiders. Considers contemporary race-critical and feminist theory, including cyborg anthropology, the historical concept of race in America, and the problematic of multiple members of various sorts. PREREQUISITE: COHI 100 or consent of instructor.

COHI 130. Cross-Cultural Communication (4) 
Explores psychological and communicative processes that create and sustain social and cultural interaction. Students engage in creating simulated cultural groups. Course readings focus on microgenesis of culture, idiocultures, culture as an evolutionary strategy, relationships between cultural groups. PREREQUISITE: COHI 100 or consent of instructor.

COHI 134. Language and Human Communication (4) 
This course examines the interaction of language and culture in human communication. Beginning with lan-guage evolution, the course then discusses a broad range of human languages including indigenous languages, sign languages, and hybrid languages spoken in urban centers. PREREQUISITE: COHI 100 or consent of instructor.

COHI 135. Language and Globalization (4) 
The interaction of language and culture in human commu-nication. New and old languages, standard and dialect, dominant and endangered, are the special focus. Selected languages as examples of how languages exist in con-temporary contexts. PREREQUISITE: COHI 100 or consent of instructor.

COHI 136. Gender and Science (4) 
This course will focus on arguments about cognitive differ-ences between men and women in science. We will review current arguments about essential differences, historical debates about gender attribution, and gender socialization into patterns of learning in school. PREREQUISITE: COHI 100 or consent of instructor.
175. Advanced Topics in Communication: Human Information Processing (4)
Specialized study in communication: human information processing. Topics to be determined by the instructor for any given quarter. May be repeated for credit three times. **PREREQUISITE:** COHI 100 or consent of the instructor.

**COMMUNICATION MEDIA METHODS**

**COMT 100. Nonlinear/Digital Editing (4)**
Prepare students to edit on nonlinear editing facilities and introduce aesthetic theories of editing: time code editing, time line editing on the Media 100, digital storage and digitization of audio and video, compression, resolution, and draft mode editing. **PREREQUISITES:** communication majors, COGN 21 and COGJ 22, or consent of instructor.

**COMT 101. Television Analysis and Production (6)**
An introduction to the techniques and conventions common to the production of news, discussion, and variety format television programs. **PREREQUISITES:** COCI 20 and COGJ 21 and COGJ 22.

**COMT 103. Television Documentary (6)**
An advanced television course which examines the history, form, and function of the television documentary in American society. Experimentation with documentary techniques and styles requires prior knowledge of television or film production. Laboratory sessions apply theory and methods in the documentary genre via technological process. Includes research, studio and field experience of various media components. **PREREQUISITE:** COMT 101 or consent of instructor.

**COMT 104. Studio/TV (4)**
This course offers students the opportunity to produce and engage in critical discussions around various television production formats. We will study and produce a variety of projects, from video announcements, panel programs, scripted drama, and performance productions. **PREREQUISITES:** COGJ 21 and COGJ 22, or consent of instructor.

**COMT 105. Media Stereotypes (4)**
An examination of how the media present society’s members and activities in stereotypical formats. Reasons for and consequences of this presentation are examined. Student responsibilities will be: (a) participation in measurement and analysis of stereotype presentations; (b) investigating techniques for assessing both cognitive and behavioral effects of such scripted presentations on the users of media. Course can be taken to meet COCU major requirement. **PREREQUISITE:** COCU 100 or consent of instructor.

**COMT 108. Writing for Digital Media (4)**
Practice, history, and theory of writing for digital media. Text combines with images, sounds, movement, and interaction. New network technologies (email, blogs, wikis, and virtual worlds) create new audience relationships. Computational processes enable texts that are dynamically configured and more. **PREREQUISITE:** COGJ 21 and COGJ 22.

**COMT 109. Digital Media Pedagogy (4)**
This course teaches techniques for teaching digital media: such as WiMax, Maker, digital camera and digital video, non-linear editing. What are the special challenges digital media present to teachers and students? How do digital media compare to older technologies such as typewriters, film cameras, and analog video? How do gender, class, and access to technology affect student behaviors and responses to digital media? At least six hours of fieldwork at a computer lab of their choice or at Seiter’s project at Adams Elementary will be required. Experience with computers and/or digital imaging recommended. **PREREQUISITE:** communication majors only.

**COMT 110. News Media Workshop (4)**
Designed for students working in student news organizations or off-campus internships or jobs in news, public relations, or public information. A workshop in news writing and news analysis. **PREREQUISITE:** COCU 100 and COFJ 171 (may be taken concurrently) or consent of instructor.

**COMT 111A. Communicating and Computers (4)**
This course introduces students to computers as media of communication. Each quarter students participate in a variety of networking activities designed to show the interactive potential of the medium. Field work designed to teach basic methods is combined with readings designed to build a deeper theoretical understanding of computer-based communication. Courses can be taken to meet COHI major requirement. **PREREQUISITE:** COHI 100 and communication major or consent of instructor.

**COMT 112. Ethnographic Methods for Media Research (4)**
This is a practical course on ethnographic fieldwork — obtaining informed consent interviewing, negotiating, formulating a research topic, finding a role for the researcher, writing a research paper, and assisting others with their research. Course can be taken to meet COHI major requirement. **PREREQUISITE:** COHI 100 or consent of instructor.

**COMT 115. Media and Design of Social Learning Contexts (6)**
Same as HDP 115. A combined lecture/lab course listed in Communication and Human Development. Students attend lecture, write fieldnotes, and spend 3 hours per week in specially designed after-school settings working with children and designing new educational media and producing special projects. **PREREQUISITE:** COHI 100 or HDP 1.

**COMT 116. Practicum in Child Development (6)**
Same as HDP 135. A combined lecture and laboratory course for juniors and seniors in psychology and communication. Students should have a solid foundation in general psychology and communication as human information processing. Students will be expected to spend four hours a week in a supervised practical after-school setting at one of the community field sites involving children. Additional time will be devoted to readings and class prep, as well as six hours a week transcibing field notes and writing up observations and the effect of the field experience as it relates to class lectures and readings. Please note that the enrollment size for each site/section is limited. See department course listing for site/section descriptions. **PREREQUISITE:** COHJ 100 or HDP 1 or Psych 101.

**COMT 120. Documentary Sketchbook (4)**
Digital video is defined as both a production technology and as a device to explore the theory and practice of documentary production. Technical demonstrations, lectures, production exercises, and readings will emphasize the interrelation between production values and ethics, problems of representation, and documentary history. **PREREQUISITE:** COGJ 21 and COGJ 22, or consent of instructor.

**COMT 121. Sound Production and Manipulation (4)**
Advanced seminar in sound production, design, editing. Students create projects by recording original sounds, editing on a Pro-Tools system. We consider the potential of sound in film, radio, TV, and the Web by reviewing work and reading sound theory. **PREREQUISITE:** communication majors only and COGJ 21 and COGJ 22.

**COMT 122. Social Issues of Media Production (4)**
Analyze forms of social issue media production, photogra phy, audio/visual, arts, crafts, Web, print zines, political discourse, etc. Students work with several forms of media making: video, audio, Web design, and a project in their chosen format. **PREREQUISITE:** COGJ 21 and COGJ 22, or consent of instructor.

**COMT 175. Advanced Topics in Communication, Media Methods (4)**
Specialized ‘practice’ in communication: media methods with topics to be determined by the instructor in any given quarter. May be repeated for credit three times. **PREREQUISITE:** communication majors only.

**COMT 175A. Advanced Topics in Communication, Media Methods Production (4)**
Specialized practice in communication: relating to media methods production with topics to be determined by the instructor in any given quarter. **PREREQUISITE:** COGJ 21 and COGJ 22.

**GENERAL COMMUNICATION**

**COGN 150. Senior Seminar in Communication (4)**
This course examines in detail some topic in the field of communication, bringing to bear several of the approaches and techniques introduced in the basic communication curriculum. Seminars will be limited to 25 students and class participation is stressed. A research paper is required. **PREREQUISITE:** senior standing or consent of instructor.

**COGN 175. Advanced Topics in Communication: General (2)**
Specialized study in general communication with topics to be determined by the instructor, for any given quarter. May be repeated for credit. **PREREQUISITE:** must be taken with AIP 197.

**COGN 191A-B. Honors Seminar in Communication (4)**
Preparation of an honors thesis, which can be either a research paper or a media production project. Open to students who have been admitted to the honors program. Grades will be awarded upon completion of the two-quarter sequence. **PREREQUISITE:** admission to the honors program.

**COGN 192. Senior Seminar (1)**
The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in Communication (at the upper-division level). Topics will vary from quarter to quarter. Senior Seminars may be taken for credit up to four times, with a change in topic, and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **PREREQUISITE:** department stamp, consent of instructor, and upper-division standing.

Same as PS 194, USP 194, Hist 193, Soc 194, Ethr 194. Course attached to six-unit internship taken by students participating in the UCDC program. Involves weekly seminars meetings with faculty and teaching assistants and a substantial research paper. **PREREQUISITE:** participation in UCDC program.

**COGN 198. Directed Group Study in Communication (4)**
Directed group study on a topic or in a field not included in the regular curriculum by special arrangement with a faculty member. (P/NP grades only). May be taken three times for credit. **PREREQUISITE:** consent of instructor.

**COGN 199. Independent Study (4)**
Independent study and research under the direction of a member of the staff. (P/NP grades only). **PREREQUISITE:** consent of instructor.

**GRADUATE**

**COGR 200A. Introduction to the Study of Communication as Social Force (4)**
This course focuses on the political economy of communication and the social organization of key media institutions. There will be both descriptive and analytical concerns. The descriptive concern will emphasize the complex structure of communication industries and organizations, both historically and cross-nationally. The analytic focus will examine causal relationships between the economic and political structure of societies, the character of their media institutions, public opinion, and public attitudes and behaviors expressed in patterns of voting, consuming, and public participation. The nature of evidence and theoretical basis for such relationships will be critically explored.
COGR 208B. Introduction to Study of Communication: Communication and Culture (4)
This course focuses on questions of interpretation and meaning. This course will examine how people use texts to interpret the world and coordinate their activities in social groups. Students will study both theories of interpretation in the conventional sense and theories about the act of interpreting.

COGR 209C. Introduction to the Study of Communication: Communication and the Individual (4)
This course will draw on theorists who examine human nature as constituted by social, material, and historical circumstances. This course considers the media in relation to the social, cultural, and historical development of the human being and an examination of the individual as socially constituted in a language-using medium. The role of new communication technologies as part of research methodologies is explored in lecture-seminar.

COGR 218B. Ethnographic Methods for Communication Research (4)
A supervised and coordinated group project will allow students to develop competence in a variety of ethnographic approaches to communication. Subjects covered include choosing a field-work site, setting or process for participation; entry and development of relationships; techniques of observation, interviewing, notetaking, and transcription. Course may also include photography and video as research tools. All participant observation and interviewing strategies fall under the review of the Committee on Human Subjects.

COGR 211C. Discourse Analysis (4)
Review and critique of studies employing discourse analysis, focusing on the ways that "discourse" is identified, recorded, and reported. A working notion of "discourse" will develop from works representing diverse disciplinary approaches. Students will record, transcribe, and report on segments of talk in an everyday setting. All participant observation and interviewing strategies fall under the review of the Committee on Human Subjects.

COGR 210D. Historical Methods for Communication Research (4)
Different approaches to conducting historical research in communication. Such approaches may include the social history of communication technology; structuralist and poststructuralist accounts of language, media, and collective memory; and new historicist treatments of cultural history. Sources, documentation, and the nature of argument from historical evidence are emphasized.

COGR 211J. Comparative Analysis (4)
The logic of comparative analysis and its role in communication research. Scientific inference in qualitative research. Selection of cases. Problems of translation across cultures.

COGR 211L. Qualitative Analysis of Information Systems (4)
Historical and ethnographic studies of information systems—the design and use of information and communication technologies in their social, ethical, political, and organizational dimensions. Objects of study range from the invention of file folders to e-mail use and distributed databases as communication systems. Prerequisite: Graduate standing or consent of instructor.

COGR 210M. Content Analysis (4)
Historical and present quantitative analysis of media content. Includes conceptual issues concerning the quantification of meaning and practical procedures for coding and data analysis. Students read examples of studies using content analysis and carry out their own pilot analyses. Prerequisite: Graduate standing or consent of instructor.

COGR 210. Information and Social System (4)
The social and economic forces affecting the evolution of mass communication institutions and structure in the industrialized world. Differential impacts of the free flow of information and unequal roles and needs of developed and developing economies.

COGR 211. Memory Practices (4)
Examines theories of social and distributed memory—Maurice Halwachs to Ed Hutchins, John Sutton, and nature of the Archive (Foucault and Derrida), reading databases (as memory prostheses), beginning with Mannovich’s work. Enquiry into mediated nature of memory practices. Prerequisite: Graduate standing.

COGR 215. Regulation of Telecommunications (4)
The course will look at the history of, and rationales for, the regulation of mass communications in the United States. The course will cover both broadcasting and common carrier regulation. We will analyze telecommunications regulatory structures as they were constituted historically with the 1934 Communications Act and examine their breakdown in the late 1970s. In a larger vein, the course will examine the rise and functions of regulatory agencies in modern American history.

COGR 220. The News Media (4)
History, politics, social organization, and ideology of the American news media. Special attention will be paid to: historical origins of journalism as a profession and "objective reporting" as ideology; empirical studies of print and TV journalism as social institutions; and news coverage of Vietnam and its implications for theories of the news media.

COGR 221. The State (4)
What is that "thing" we call the State? What is its relationship to government, citizenship, and power? Will consider different approaches to the study and theorization of the state, from European Enlightenment to post-9/11 reflections on sovereignty, rights, and governmental and regulatory control. Prerequisite: Graduate standing or consent of instructor.

COGR 223. Communication Law and Policy (4)
This course examines the legal and policy framework for free speech in the United States. We cover First Amendment case law, free speech theory, copyright, and the efficacy and legality of regulatory treatment historically accorded print, broadcasting, cable television, telephone, and Internet. Prerequisite: Graduate standing or consent of instructor.

COGR 224. Geographies of Difference, Exclusion, and Conflict (4)
This course is a critical geographic of how territorial environments shape entanglements of power and conflict between dominant and subordinate groups, and how, in such conflict between such actors reveals spatial landscapes. Prerequisite: Graduate standing or consent of instructor.

COGR 225A. Introduction to Science Studies: Part I (4)
Study and discussion of classic texts and themes in history of science, sociology of science, and philosophy of science, and of work that attempts to develop an interdisciplinary science studies approach. Prerequisite: Enrollment in the Science Studies Program or consent of instructor.

COGR 225B. Seminar in Science Studies (4)
Study and discussion of a selected topic in the science studies field with an emphasis on the development of research and writing skills. The topic varies from year to year. Prerequisite: Enrollment in the Science Studies Program or consent of instructor.

COGR 225C. Colloquium in Science Studies (4)
A forum for the presentation and discussion of research in progress in science studies by graduate students, faculty, and visitors. Students must attend the colloquium series for their entire first and second years. They receive course credit in one quarter each year. Prerequisite: Enrollment in the Science Studies Program.

COGR 225D. Introduction to Science Studies: Part II (4)
Continuing the introduction developed in Part I, this course examines recent key topics and problem situations in science studies. Emphasis is on recent theoretical perspectives and empirical studies in communication, history, philosophy, and sociology of science and technology, and the interplay between them. Prerequisite: Completion of COGR 225A, HIGR 238, PHIL 209A, or SOCG 255A or consent of instructor.

COGR 238. The Frankfurt School on Mass Culture Social Theory (4)
This reading seminar will consider works by Frankfurt School theorists (Horkheimer, Adorno, Pollock, Lowenthal, Marcuse, Benjamin, Habermas) on mass media, mass culture, ideology, art, authority and the individual, and their relevance in the analysis of contemporary capitalism. Prerequisite: Graduate standing or consent of instructor.

COGR 240. The Culture of Consumption (4)
(Cross-listed with HIGR 273.) This course will explore the development and cultural manifestations of consumerism in the nineteenth and twentieth centuries. Topics will include the rise of museums, the development of mass market journalism and literature, advertising, and the growth of commercialism. Readings will focus primarily, but not exclusively, on the United States. Students will be encouraged to think comparatively.

COGR 250. Third World Cinema Screening (4)
Course examines the historical impetus, development, and construction of “Third Cinema”—a particular style of media making in Africa, Latin America, and Asia. An interdisciplinary approach interrogates how Third Cinema influences world cinema of today. Additional screening session required. Prerequisite: Graduate standing.

COGR 261. Mediational Approaches to Culture/ Mind (4)
This course will examine theories of mind in which cultural mediation is given a leading role. The work of anthropologists, psychologists, and communication scholars will be studied in depth. Emphasis will be placed on the mediodological implication of cultural theories of mind for empirical research.

COGR 275. Topics in Communication (4)
Specialized study in communication, with topics to be determined by the instructor for any given quarter.

COGR 278. Talking Culture, Culture Talking: Voices of Diversity (4)
(Cross-listed with EDS 278.) This course explores the discourse of culture in contemporary society and the problems of “silenced” or unheard voices. The interaction of individual and collective voice, language, and identity are discussed as they bear on the ways that culture moves through important social institutions such as schools. Of particular interest is the study and presentation of cultural artifacts, including poetry, music, video, and performances. Prerequisite: Graduate standing or consent of instructor.

COGR 280. Advanced Workshop in Communication Media (4)
This course is a project course in which students prepare a production or experiment using one of the forms of media. The course is designed to allow students to experiment in a communication form other than the usual oral presentation in class or a term paper. Students can do a video production, a coordinated photographic essay or exhibit, a computer-instruction game, a published newspaper or magazine article directed at a special audience, a theatrical presentation, or some form other than those listed. Prerequisite: Graduate standing or consent of instructor.

COGR 294. The History of Communication Research (4)
An intellectual history of the field of communication studies from Robert Park to the present. Explication and assessment of major research approaches and classic studies representing both empirical and critical traditions.

COGR 296. Communication Research as an Interdisciplinary Activity (4)
A course that introduces students to the interdisciplinary nature of the field of communication research as represented by the work of faculty in the Department of Communication. Through faculty research, students are presented with concrete examples of communication research theory and practice that can provide them with a basis for conducting their own projects. Prerequisite: Graduate standing or consent of instructor.

COGR 298. Directed Group Study (1-12)
The study and analysis of specific topics to be developed by a small group of graduate students under the guidance of an interested faculty member. COGR 500. Practice Teaching in Communication (4)

COGR 299. Graduate Research (1-12)
Advanced independent study in communication under the guidance of Department of Communication faculty.
Comparative Studies in Language, Society, and Culture

Department of Music
OFFICE: 111 Mandeville Center for the Arts
(858) 534-6722/(858) 534-3279
http://music.ucsd.edu

PROGRAM FACULTY
Nancy Caciola, Ph.D., Department of History
Jann C. Pasler, Ph.D., Department of Music, Chair
Don E. Wayne, Ph.D., Department of Literature, Co-Chair
Kathryn A. Woolard, Ph.D., Department of Anthropology

Graduate students in the humanities, social sciences, and arts in this program are provided the opportunity to design curricula, conduct research, and write dissertations under the guidance of interdepartmental and/or intercampus Ph.D. committees. The student who participates in the program must be admitted, satisfy all requirements for advancement to candidacy, and pass the qualifying examination in one department. The student must also undertake advanced study in an integrally related area of research specialization. The student advances to candidacy in the program upon successfully defending a written dissertation proposal before the interdepartmental and/or intercampus Ph.D. committee. In the instance of some departments and programs, the defense will be identical with completion of the departmental qualifying examination.

Application to the program in Comparative Studies may be made at the earliest during the student's third quarter of residency in his or her primary department. From the point of acceptance into the program, the student's preparation for dissertation research will be under the supervision of the interdepartmental intercampus Ph.D. committee. The degree granted may indicate in its title the precise nature of the student's studies and research when appropriate and desirable—e.g., Ph.D. in comparative literature and ethnopoetics, in linguistics and literary studies, in economics and Chinese studies, in philosophy and the history of ideas. When an additional degree title is contemplated, the student's Ph.D. committee must forward a program of study and research, as well as the dissertation proposal, to the supervising committee for initial approval and to the Graduate Council for final approval.

Students applying for admission to UCSD and interested in applying for admission to the program should direct their inquiries to a primary department. Students already admitted to a primary department should, after the required quarters of residence and with the advice of a department advisor, direct inquiries to the chairperson of the program.

FACULTY RESEARCH GROUPS

Beginning with the academic year 1997–1998, the program sponsors a series of faculty research groups. These groups consist of faculty who have announced their intention to supervise graduate students wishing to work on topics involving the comparative study of language, society, and culture. Each faculty research group is expected to be composed of faculty in the humanities, social sciences, and arts from different departments and/or campuses. For a list of current faculty research groups and the topics which they support, contact the chairperson of the program.

THE ANTHROPOLOGY OF MODERN SOCIETY

The Anthropology of Modern Society is a project of graduate training and research dedicated to the study of modernity and its counterparts in the late twentieth century. The group sees the social life of cities as making manifest this problem in issues of citizenship and democracy, social formations in tension with the nation-state, modern subjectivities, social and religious movements, transnational markets and migrations, and relations of local to global processes. Participants are committed to reorienting anthropological theory and ethnographic practice towards such contemporary social and political problems.

Director: James Holston, Department of Anthropology, (858) 534-0111
Co-Director: Martha Lampland, Department of Sociology, (858) 534-5640

PH.D. TIME LIMIT POLICIES

A student admitted to this interdisciplinary program is subject to the same time limit policies as those of the student's primary department.

Contemporary Issues

OFFICE: 2073 Humanities and Social Sciences Building, Muir College, (858) 534-3589

DIRECTOR
Susan Smith, Ph.D.

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

LOWER-DIVISION

22. Human Sexuality (4)
A survey of the nature and problems of human sexuality in the development of the individual, in cultural traditions and values, and in social roles and organizations, particularly with regard to contemporary America. Not offered in 2008–2009.

40. Contemporary Issues: The AIDS Epidemic (4)
Using current information, this course will deal with the worldwide spread of AIDS, particularly into communities, colleges, and universities. Discussion topics: origin, infection, biology, clinical expression, risks, vaccines, epidemiology, and the social, ethical, economic, and legal aspects of this epidemic. Not offered in 2008–2009.

50. Information and Academic Libraries (2)
An introduction to research strategies directed at satisfying the information needs of the student using the academic library, with emphasis on the UCSD library system. Library techniques will be acquired through lectures and discussion, problem sets, and a term project. Students will learn to extend these techniques to independent research. Not offered in 2008–2009.

UPPER-DIVISION

136. The Anthropology of Medicine (4)
Theoretical approaches to and cross-cultural analyses of the role of the medical profession, the sick and the healers, and culture as communication in the medical event. The theoretical anthropological aspects of medical practice and medical research will include a consideration of the "Great Traditions" of medicine as well as primitive and peasant systems. Western medicine will be considered in the foregoing framework, with issues of contemporary concern by way of introduction. PREREQUISITE: upper-division standing. Not offered in 2008–2009.

195. Discussion Leading in Contemporary Issues (4)
Students will lead groups of ten to twenty students in discussions of contemporary concern. Students will meet with the professor to plan and prepare for their discussions to be held weekly. Students will also consult with another faculty member specializing in their topics for further check on reading materials and course of discussion. (P/ NP grades only.) PREREQUISITES: Contemporary Issues 196 and consent of the director of Interdisciplinary Sequences. Not offered in 2008–2009.

196. Contemporary Issues Workshop (2)
A workshop for potential discussion leaders in the Contemporary Issues Program. Students will investigate topics for discussion and methods of presentation and inquiry. Participating in the workshop does not guarantee selection as discussion leader. (P/NP grades only.) Not offered in 2008–2009.

500. Apprentice Teaching in Contemporary Issues (4)
A course in which teaching assistants are aided in learning proper teaching methods by means of supervision of their work by the faculty: handling of discussions, preparation and grading of examinations and other written exercises, and student relations. PREREQUISITE: graduate standing. Not offered in 2008–2009.
The UC San Diego Critical Gender Studies Program (CGS) is an interdisciplinary academic program offering students the opportunity to study gender, race, class, sexuality, and nationalism as intersecting categories of analysis and experience. Some basic questions that anchor the program’s core curriculum include asking how these categories become institutionalized and yet change over time; how they work together to shape individual identity; contribute to the organization of social life; become essential to the production of many different kinds of knowledge about that life.

The program’s core curriculum builds upon feminist scholarship of the last decade, incorporating the new interdisciplinary agendas, intellectual debates, and major scholarly shifts that have reshaped the field of women’s studies. Informed by the insights of critical race feminism, feminist critiques of conventional domains of knowledge, and gender and lesbian inquiries challenging traditional understandings and assumptions about sexuality, this core curriculum is designed to move students beyond simple binary descriptions and contemporary, popularized accounts of gender. Instead, gender is analyzed in the full complexity of its construction over time and in a variety of cultural, scholarly, and global arenas.

Students can expect to encounter a rich intellectual exchange with their peers and advising individual projects in the context of collective advanced Critical Gender Studies majors to pursue their chosen quarter goes online, the Critical Gender Studies Honors Program allows the other half (six) will be drawn from among the other three in Social Sciences. (See information on quarterly course list below.) All CGS majors will be assigned a faculty mentor, who will supervise the student’s progress through the program.

CRITICAL GENDER STUDIES

The UC San Diego Critical Gender Studies Program (CGS) is an interdisciplinary academic program offering students the opportunity to study gender, race, class, sexuality, and nationalism as intersecting categories of analysis and experience. Some basic questions that anchor the program’s core curriculum include asking how these categories become institutionalized and yet change over time; how they work together to shape individual identity; contribute to the organization of social life; become essential to the production of many different kinds of knowledge about that life.

The program’s core curriculum builds upon feminist scholarship of the last decade, incorporating the new interdisciplinary agendas, intellectual debates, and major scholarly shifts that have reshaped the field of women’s studies. Informed by the insights of critical race feminism, feminist critiques of conventional domains of knowledge, and gender and lesbian inquiries challenging traditional understandings and assumptions about sexuality, this core curriculum is designed to move students beyond simple binary descriptions and contemporary, popularized accounts of gender. Instead, gender is analyzed in the full complexity of its construction over time and in a variety of cultural, scholarly, and global arenas.

Students can expect to encounter a rich intellectual exchange with their peers and advising individual projects in the context of collective advanced Critical Gender Studies majors to pursue their chosen quarter goes online, the Critical Gender Studies Honors Program allows the other half (six) will be drawn from among the other three in Social Sciences. (See information on quarterly course list below.) All CGS majors will be assigned a faculty mentor, who will supervise the student’s progress through the program.

MAJOR PROGRAM

To complete a major, students are required to take sixteen courses, comprising four courses in the introductory sequence (2A, 2B, 100, 101), and twelve upper-division courses. Six of the upper-division courses must be taken in the CGS program; the other half (six) will be drawn from among the advanced electives taught within departments. Three of the advanced elective courses must be in the Humanities Division, the other three in Social Sciences. (See information on quarterly course list below.) All CGS majors will be assigned a faculty mentor, who will supervise the student’s progress through the program.

QUARTERLY COURSE LIST

When the UCSD Schedule of Classes for an upcoming quarter goes online, the Critical Gender Studies Program makes available a list of that quarter’s proposed CGS courses. The quarterly list will also include advanced electives being offered. The quarterly list may be found at the CGS Web site.

HONORS PROGRAM

The Critical Gender Studies Honors Program allows advanced Critical Gender Studies majors to pursue individual projects in the context of collective intellectual exchange with their peers and advising...
faculty. Students are eligible if they a) have senior standing at the time they begin the program, and b) are approved by the Critical Gender Studies faculty director and steering committee. Normally, students eligible for honors will have a 3.5 grade point average in upper-division courses taken for the major, but highly motivated students who do not meet this criterion may be admitted to the program at the discretion of the director and the Critical Gender Studies steering committee.

In the fall quarter of their senior year, students take the Honors Seminar (CGS 190), taught by a member of the Critical Gender Studies faculty. The first half of the quarter is devoted to intensive analysis and discussion of recent publications in the fields of gender and sexuality. During the second half of the quarter, each student develops a short thesis proposal and presents it for group discussion. While taking the Honors Seminar, each student also registers for CGS 196A: Honors Research, four units of independent study with a faculty member associated with Critical Gender Studies. With the guidance of this advisor, the student carries out background research for the thesis prospectus and selects a thesis director. In the winter quarter, students complete the thesis under the supervision of their thesis director in the Honors Thesis course, CGS 196B. Students who complete the thesis with a grade of B+ or above and make an oral presentation have the words with distinction added to the notation of the major on their diplomas and transcripts.

DOUBLE MAJOR IN CRITICAL GENDER STUDIES AND ANOTHER DEPARTMENT OR PROGRAM

Students who wish to major both in critical gender studies and in another department or program must fulfill all requirements for the Critical Gender Studies major as described above. A student must submit a double major petition for approval to the participating departments and the student’s college advising office. Critical Gender Studies will accept up to two upper-division courses that overlap requirements for the two majors.

Critical Gender Studies Major Course Checklist

During advising sessions with the critical gender studies faculty director or staff, critical gender studies majors make use of a checklist to determine how courses already taken fulfill the major’s requirements. An example of the checklist may be found at the CGS Web site.

MINOR PROGRAM (AND PROGRAM OF CONCENTRATION)

Critical Gender Studies minors are required to complete Critical Gender Studies 2A-8, 100, and 101. In addition, minors are required to take three upper-division courses, two of which must be upper-division CGS courses, and one upper-division elective. Students who declare the Critical Gender Studies minor (or program of concentration) with junior or senior standing may petition to substitute an upper-division Critical Gender Studies course or a departmental elective course of comparable content for Critical Gender Studies 2A or 2B. Critical gender studies permits one lower-division course and one upper-division course to be taken P/NP. College grading options vary. Please consult with college academic advisors and Critical Gender Studies advisors.

SPECIAL STUDIES, INTERNSHIPS, AND GRADE OPTIONS

Many Critical Gender Studies majors and minors elect to do gender research under the rubrics of Directed Group Study (198), Independent Study (199), internships, and mentor programs. Because these courses can be taken only with a P/NP grade option, the number of such courses to be applied to the major should be carefully discussed with a critical gender studies advisor. Some graduate and professional schools will consider it easier to evaluate a student’s transcript if there are more letter grades. College guidelines and requirements for grade options also vary. Please see college academic advisors and Critical Gender Studies advisors.

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

LOWER-DIVISION

CGS 2A. Introduction to Critical Gender Studies:
Social Movements (4)
The role of social movements in contesting rights and representation in comparative and historical contexts. Historical examples in the U.S. and other locations, including civil rights, men’s movements, antisemitic feminism, women’s movements, AIDS activism, transgenderism, immigrant rights, and the labor movement in the U.S.

CGS 2B. Introduction to Critical Gender Studies:
Gender and Institutions (4)
This course examines how gender organizes and is organized by institutions. Domains of inquiry may include family, education, medicine, technology, law, media, the workplace, immigration, and citizenship.

CGS 87. Critical Gender Studies Freshman Seminar (1)
The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen.

UPPER-DIVISION

CGS 100. Conceptualizing Gender: Theories and
Methods (4)
This course will compare the uses of gender as a category of analysis across academic disciplines in the humanities, social sciences, and natural sciences with particular attention to research methodologies.

CGS 101. Gender, Modernity, and Globalization (4)
The global effects of modernity, modernization, and globalization on men and women. Topics: international consumer culture; international divisions of labor; construction of sexuality and gender within global movements; the migrations of people, capital, and culture. PREREQUISITE: upper-division standing or consent of instructor.

CGS 102. Selected Topics in Critical Gender
Studies (4)
An interdisciplinary course focusing on one of a variety of topics in gender studies, such as gender and science, the body, reproductive technologies, public policy. May be taken for credit three times when topics vary. PREREQUISITE: upper-division standing or consent of instructor.

CGS 103. Feminist Theory (4)
An interdisciplinary course in feminist theory. Topics may range from a general survey of feminist theory in a variety of disciplines to a more focused interdisciplinary, focused theoretical topic such as postmodernism and feminism. May be taken for credit three times when topics vary. PREREQUISITE: upper-division standing or consent of instructor.

CGS 104. Advanced Topics in Comparative
Perspectives (4)
Focuses on the relationship between gender and culture from a multiplicity of perspectives. Possible topics could include gender and ethnicity, gender across class, and other topics be examined in a cross-cultural framework. May be taken for credit two times when topics vary. PREREQUISITE: upper-division standing or consent of instructor.

CGS 105. Queer Theory (4)
Examines the different methodologies and disciplinary histories that together constitute the interdisciplinary project called queer studies. Of particular interest will be how these different methodologies and history construe and construct the relations between gender, race, class, and nation. PREREQUISITE: upper-division standing or consent of instructor.

CGS 106. Gender Equality and the Law (4)
Explores the legal treatment of discrimination on the basis of gender, including equal protection doctrine and some statutory law such as Title VII. Topics include the meaning of gender equality in such areas as single-sex education, military service, sexual harassment, discrimination on the basis of pregnancy, and other current issues. PREREQUISITE: upper-division standing or consent of instructor.

CGS 107. Gender and Reproductive Rights (4)
Legal treatment of gender, reproductive rights, and the family, particularly as evolving law, primarily in the U.S., has created conflicting rights, roles, and responsibilities. Topics include abortion, fertility, surrogacy, marriage, and child custody issues. PREREQUISITE: upper-division standing or consent of instructor.

CGS 109B. Gender and Information Technology (4)
Explores how gender and racialized gender affect and are affected by information technology. Through the use of feminist and race-critical approaches, the course examines the impact of information technology on workplaces, the family, gender identity, and the environment. PREREQUISITE: upper-division standing or consent of instructor.

CGS 110. Gender and Sexuality in Sports (4)
Examines gender and sexuality in the world of sports. Topics may include Title IX and sports, sports and gender as roles, sports in school, masculinity and femininity and sports, femininity and sports, sports through international comparison. Not offered in 2009–10.

CGS 111. Gender and the Body (4)
Various approaches to the study of gendered bodies. Possible topics to include masculinities/feminities, life-cycles; biology, culture, and identity; medical discourses; and health issues. May be taken for credit three times when topics vary. PREREQUISITE: upper-division standing or consent of instructor. Not offered in 2009–10.

CGS 112. Sexuality and Nation (4)
(Cross-listed with ETHN 127) This course explores the nexus of sex, race, ethnicity, gender, and nation and considers their influence on identity; sexuality; migration movement and borders; and other social, cultural, and political issues that these constructs affect. PREREQUISITE: upper-division standing or consent of instructor.

CGS 113. Gender and Sexuality in the Arts (4)
Examines gender and sexuality in artistic practices: music, theater, dance, performance, visual arts, and new media. Topics may include study of specific artists, historical moments, genres, crosscultural analyses, and multiculturalism. May be taken three times when topics vary. PREREQUISITE: upper-division standing or consent of instructor. Not offered in 2009–10.
CGS 190. Honors Seminar (4)
Interdisciplinary readings in feminist theory and research methodology to prepare students for writing an honors thesis. Open to critical gender studies majors who have been admitted to Critical Gender Studies Honors Program. May be applied toward primary concentration in critical gender studies major. **PREREQUISITES:** admission to Critical Gender Studies Honors Program and department stamp required.

CGS 192: Senior Seminar in Critical Gender Studies (1)
The senior seminar is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in critical gender studies (at the upper-division level). Topics will vary from quarter to quarter. Senior seminars may be taken for credit up to four times with a change in topic and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **PREREQUISITES:** upper-division standing; department stamp and/or consent of instructor.

CGS 196A. Critical Gender Studies Honors Research (4)
A program of independent study providing candidates for critical gender studies honors to develop, in consultation with an advisor, a preliminary proposal for the honors thesis. An IP grade will be awarded at the end of this quarter. A final grade for both quarters will be given upon completion of Critical Gender Studies 196B. **PREREQUISITES:** consent of instructor and department stamp required.

CGS 196B. Honors Thesis (4)
Honors thesis research and writing for students who have completed Critical Gender Studies 190 and 196A. A letter grade will be awarded at the end of this quarter. **PREREQUISITES:** consent of instructor and department stamp required.

CGS 198. Directed Group Study (4)
Directed group study on a topic not generally included in the Critical Gender Studies curriculum. **PREREQUISITES:** consent of instructor and director of Critical Gender Studies Program and department stamp required.

CGS 199. Independent Study (4)
Tutorial; independent study on a topic not generally included in the curriculum. **PREREQUISITES:** consent of instructor and director of Critical Gender Studies Program and department stamp required.

CGS 500. Apprentice Teaching in Critical Gender Studies (4)
Consideration of pedagogical methods appropriate to undergraduate teaching in Critical Gender Studies courses under supervision of instructor of course. Instructor will define apprentice’s responsibilities in preparing class presentations, directing student discussions, evaluating and grading students’ work, and maintaining productive association with students.

**APPLICABLE AND PETITIONABLE COURSES**

Departmental courses available to CGS majors and minors fall into two categories. Applicable courses are those approved as always applying to the CGS major and minor. Petitionable courses are either new and therefore not yet approved as applicable or are “topics” courses that focus on gender only in particular quarters. Petitionable courses may be approved by petition to the major/minor during the quarters in which they appear in the CGS quarterly lists.

**QUARTERLY LISTS**

Each quarter, when the upcoming quarter’s Schedule of Classes is published, the critical gender studies quarterly list is available in the CGS office and on the Web site. It is an important, comprehensive source of information about CGS course offerings as well as those from departments throughout the campus. It identifies by cluster areas both applicable as well as petitionable courses for a given quarter. For reference, the office and the Web site maintain archives of quarterly lists.

**CRITICAL GENDER STUDIES CLUSTER AREAS**

( Note: Only applicable courses are listed here. For petitionable courses, please see the quarterly lists mentioned above.)

**SOCIAL SCIENCE COURSES**

| ANSC 125. Gender, Sexuality, and Society |
| ANSC 114B. Media and Technology: Gender and Biomedicine |
| COCU 123. Black Women Filmmakers |
| COCU 132. Gender and Media |
| COCU 137. Politics of Bodies |
| COCU 138. Feminist Theory |
| COCU 139. Reproductive Discourse and Gender |
| COCU 141B. Media and Technology: Gender and Biomedicine |
| COCU 160. Performance and Cultural Studies |
| COCU 163. Popular Culture in Contemporary Life |
| COHI 136. Gender and Science |
| COSF 124. Black Women, Feminism, and the Media |
| COSF 185. Gender, Labor, and Culture in the Global Economy |
| ETHN 129. Asian and Latina Immigrant Workers in the Global Economy |
| ETHN 128. Hip Hop: The Politics of Culture |
| ETHN 165. Sex and Gender in African American Communities |
| ETHN 183. Gender, Race, Ethnicity, and Class |
| LIGN 174. Gender and Language in Society |
| POLI 104M. Law and Sex |
| POLI 115A. Gender and Politics |
| POLI 116A. Feminist Theory |
| PSYC 134. Eating Disorders |
| PSYC 172. The Psychology of Human Sexuality |
| SOC/B 113. Sociology of the AIDS Epidemic |
| SOC/B 118. Sociology of Gender and Roles |
| SOC/B 118A. Gender and Language in Society |
| SOC/B 119. Sociology of Sexual and Sexual Identities |
| SOC/C 129. The Family |
| SOC/C 132. Gender and Work |
| SOC/C 139. Social Inequality: Class, Race, and Gender |
| SOC/C 184. Gender and Film |

**ARTS AND HUMANITIES COURSES**

| HIEU 147A. Women in the Middle Ages |
| HILA 124A. History of Women and Gender in Latin America |
| HISC 118. History of Sexology |
| HIUS 115. History of Sexuality in the United States |
| HIEA 125. Women and Gender in East Asia |
| HIEA 137. Women and Family in Chinese History |
| HIEA 162/262. History of Women in China |
| HIEU 133. Gender in Antiquity and the Early Medieval Mediterranean |
| HIEU 147. The History of Women in Europe: Middle Ages to the Early Modern Era |
| HIEU 148. European Women: The Enlightenment to the Victorian Era |
| HIEU 149. History of Women in Europe: 1870 to Present |
| HIEU 180. Topics in European Women's History |
| HILA 161. History of Women in Latin America |
| HILA 164/264. Women's Work and Family Life in Latin America |
| HISC 103. Gender and Science in Historical Perspective |
| HISC 167/267. Gender and Science |
| HITO 106. Love and Family in the Jewish Past |
| HUWS 130. Cultural History from 1607 to the Civil War |
| HUWS 131. Cultural History from the Civil War to the Present |
| HUWS 156. American Women, American Womanhood |
| HUWS 157. American Women, American Womanhood 1870 to Present |
| HUWS 173. Topics in American Women's History |
| HUWS 176. Race and Sexual Politics |
| LTCS 130. Gender, Race/Ethnicity, Class, and Culture |
| LTCS 135. Interdisciplinary Approaches to Lesbian, Gay, Bisexual, and Transgendered Studies |
| LTCS 115. Performance Culture |
| LTCS 131. Topics in Queer Cultures/Queer Subcultures |
| LTCS 132. Special Topics in Social Identities and the Media |
| LTCS 172. Special Topics in Screening Race/Ethnicity, Gender, and Sexuality |
| LTSP 175. Gender, Sexuality, and Culture |
| LTAM 105. Gender and Sexuality in Latino/a Cultural Production |
| LTAM 106. Modern Chicana and Mexican Women Writings |
| LTTU 147. Women in Italy |
| LTEA 143. Gender and Sexuality in Korean Literature and Culture |
| LTEN 120E. Women in the Eighteenth Century |
| LTEN 146. Women and English/American Literature |
| LTEN 150. Gender, Text, and Culture |
| LTEN 185. Themes in African American Literature |
| LTWL 102. Women in Antiquity |
| LTWL 155. Gender Studies |
| LTWL 160. Women and Literature |
| MUSIC 115. Women in Music |
| TDTH 112. Gay and Lesbian Themes in U.S. Latino Theatre |
| VIS 117B. Theories of Representation |
| VIS 117H. Constructing Gender in Fifth-Century B.C. Athens and Eighteenth-Century France |
CULTURE, ART, AND TECHNOLOGY

OFFICE: Pepper Canyon Hall, Second Floor
http://sixth.ucsd.edu/

PROGRAM DIRECTOR
Linda Strauss, Ph.D.

ASSOCIATE DIRECTOR OF WRITING
Darrin McGraw, Ph.D.

ASSOCIATE DIRECTOR FOR CULTURE, ART AND TECHNOLOGY
Tara Knight, MFA

The Sixth College core sequence in Culture, Art, and Technology offers an opportunity for students to explore the ways in which human beings have come to express and shape themselves and their world through their own creations. The core sequence takes an interdisciplinary, integrated approach to the college theme, with students examining a series of problems and issues from multiple perspectives. These issues center on how culture, art, and technology have developed over time in different societies, how they interact with each other, how human beings have used them to address challenges and how their uses have generated fresh challenges by reshaping people’s relationships to each other and to their environment. The sequence spans the whole range of human experience, from the prehistoric through the present, ending with a consideration of future possibilities.

The college writing program is imbedded in the core sequence, with writing-intensive quarters in CAT 2 and CAT 3. Students learn to use writing to probe and experiment with new ideas as well as to express themselves clearly and effectively to others in their own voices. The core sequence provides students with instruction and multiple opportunities for practice so they may develop a repertoire of strategies and tools for communication.

Students in CAT learn through a combination of lectures, discussions, questions, readings, guest speakers, hands-on activities, writing assignments, and multimedia projects. Sixth College offers a learning environment that extends beyond the classroom and emphasizes teamwork, critical thinking, close reading, pattern recognition, and creative approaches to problems, drawing on models and methods from a variety of fields.

The core sequence prepares Sixth College students to become self-motivated, lifelong learners. They will have broadened and deepened their visions of themselves and the world and will have developed an appreciation of the diversity and powers both of ideas and of the social body. Through inquiry into problems and issues of Culture, Art, and Technology, our students will know how to ask and answer. Good questions lead not just to answers but to more penetrating, more fruitful questions and approaches to problems, which can then lead in many cases to more effective solutions.

LOWER-DIVISION

CAT 1. Culture, Art, and Technology 1 (4)
A global historical overview of principles and patterns of human development, with emphasis on technology, and the arts. Traces causes and consequences of cultural variation. Explores interactions of regional environments (geographic, climatic, biological) with social and cultural forces. **PREREQUISITES:** Sixth College students only; may be taken concurrently with SDCC 1.

CAT 2. Culture, Art, and Technology 2 (6)
Fundamental shifts in one area of endeavor can have a profound impact on whole cultures. Examines select events, technologies, and works of art that revolutionized ways of inhabiting the world. Intensive instructions in university-level writing; featured sections on information literacy. **PREREQUISITES:** completion of UC Entry Level Writing requirement and CAT 1; Sixth College students only.

CAT 3. Culture, Art, and Technology 3 (6)
Students engage with various interdisciplinary modes of apprehending the near-future. Working in teams on community projects, they are challenged to listen and communicate across cultures and develop cogent technological and artistic responses to local problems. Writing and information literacy instruction. **PREREQUISITES:** CAT 1; CAT 2; Sixth College students only.

CAT 24. Introduction to Special Projects/Topics
(2 or 4)
Lower-division students are introduced to projects/topics exploring the interplay of culture, art, and technology. Topics and projects will vary. **PREREQUISITE:** consent of instructor.

CAT 87. Freshman Seminar (1)
The freshman seminar program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students with preference given to entering freshmen. **PREREQUISITES:** none.

CAT 97. Culture, Art, and Technology Lower-Division Internship
(2 or 4)
Course designated for lower-division Sixth College students to have the opportunity to work on a community-based or industry-based project supervised by a faculty member and community or industry mentor. **PREREQUISITES:** lower-division standing and cumulative GPA of 3.0.

CAT 98. Culture, Art, and Technology Lower-Division Group Study
(2 or 4)
Course designated for lower-division Sixth College students to have the opportunity to work together as a group or team on a project supervised by a faculty member in a specific department, not included in a regular curriculum, where group emphasis would be more beneficial and constructive then individual special studies. **PREREQUISITES:** lower-division standing and cumulative GPA of 3.0.

CAT 99. Culture, Art, and Technology Lower-Division Independent Research
(2 or 4)
Course designated for lower-division Sixth College students to have the opportunity to work on a research project supervised by a faculty member in a specific department, where the subject of content of the project cannot be represented by the academic department or faculty member. **PREREQUISITES:** lower-division standing and cumulative GPA of 3.0.

UPPER-DIVISION

CAT 124A. Sixth College Practicum
(4)
Students initiate, plan, and carry out community-based and/or research-based projects that connect classroom-based experiences and knowledge to the outlying community, and that explicitly explore the interplay of culture, art, and technology. **PREREQUISITES:** upper-division standing and consent of instructor.

CAT 124P. Sixth College Practicum
(2, 4)
Students initiate, plan, and carry out community-based and/or research-based projects that connect classroom-based experiences and knowledge to the outlying community, and that explicitly explore the interplay of culture, art, and technology. Topics and projects will vary. Some projects may last more than one quarter. **PREREQUISITES:** upper-division standing and consent of instructor. P/NP grading option only.

CAT 125. Sixth Practicum Writing
(4)
Writing to report and reflect on the practicum experience. Students will link general education to practicum projects, practice communicating with people of various constituencies; use writing as a tool for penetrating culture and for understanding self in relation to community. **PREREQUISITES:** upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement. Completion of the Practicum course/ project. CAT 125 should be taken within one quarter of completion of the practicum project (CAT 124).

CAT 192. Senior Seminar in Culture, Art, and Technology
(1)
The Senior Seminar Program is designed to allow senior undergraduates to meet with faculty members in a small group setting to explore an intellectual topic in Culture, Art, and Technology (at the upper-division level). Topics will vary from quarter to quarter. Senior seminars may be taken for credit up to four times with a change in topic and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. **PREREQUISITES:** upper-division standing; departmental stamp and/or consent of instructor.

CAT 195. Apprentice Teaching
(4)
Undergraduate instructional assistance. Responsibilities in areas of learning and instruction. May collect course material and assist with course projects, digital workshops, and collection, organization and analysis of formative assessment data. **PREREQUISITES:** upper-division standing; 3.0 cumulative GPA; consent of instructor.

CAT 197. Culture, Art, and Technology Field Studies
(4)
Supervised community-based or industry-based field work. Designed for Sixth College students to have the opportunity to work on a community-based or industry-based project supervised by a faculty member and community or industry mentor, where the subject/content of the project cannot be represented by a specific academic department. Students will submit written evaluations each week of their ongoing field study. **PREREQUISITES:** upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement.

CAT 198. Culture, Art, and Technology Directed Group Studies
(4)
Directed group studies or, in group, field studies of a creative project. Designated for Sixth College students to have the opportunity to work together as a group or team on a project supervised by a faculty member in a specific department, not included in a regular curriculum, where group emphasis would be more beneficial and constructive than individual special studies. **PREREQUISITES:** upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement.

CAT 199. Culture, Art, and Technology Independent Studies
(4)
Individual independent research or creative project. Designated for Sixth College students to have the opportunity to work on a project supervised by a faculty member in a specific department, where the subject or content of the project cannot be represented by the academic department of the faculty member. **PREREQUISITES:** upper-division standing, completion of CAT 1, 2, and 3 or (for transfer students) completion of general-education requirements, including lower-division writing requirement.
Dimensions of Culture

OFFICE: 132 Sequoia Hall, Marshall College
(858) 534-2742
http://marshall.ucsd.edu/current/doc

The Dimensions of Culture program (DOC) is a multidisciplinary, issues-oriented, writing-intensive three-quarter social science and humanities sequence required of all first-year students at Thurgood Marshall College. Successful completion of the DOC sequence satisfies the University of California writing requirement.

DOC’s course content closely identifies with the educational philosophy and goals of Thurgood Marshall College, in particular its concerns for social justice, the history and cultural experience of minorities and otherwise underrepresented groups, and the development of intelligent citizenship. Central to the course objective is the question of how scholars move from knowledge to action.

Offered each fall, DOC 1, “Diversity,” introduces students to basic distinctions in academic inquiry about systematic social differences among human individuals and groups. The aim is to convey a range of stratifications that shape our human attachments to self, work, community, and nation; in short, a descriptive sociology of our differences as they intersect along lines of race, ethnicity, class, gender, religion, and ability—themes that DOC 2 and DOC 3 will revisit from different academic perspectives.

DOC 2, “Justice,” offered each winter quarter, introduces students to fundamental concepts in political and social theory and moral philosophy, presenting them in concrete historical and contemporary social contexts. The course provides special focus on political and constitutional implications of American diversity and pluralistic society.

Course readings include numerous original sources, especially Supreme Court opinions, as well as pieces drawn from the rich field of American history.

DOC 3, “Imagination,” presented each spring, investigates the ways in which these same publicly significant social differences examined in DOC 1 and DOC 2 have been imagined and re-imagined in a wide variety of cultural productions. In particular, they will examine how primary texts such as films, television, short stories, poetry, music, technology, journalism, and advertisements imaginatively represent public tensions in the U.S. as they have emerged and changed over time.

Satisfaction of the UC Entry Level Writing requirement (formerly called the Subject A requirement) is a prerequisite for both DOC 2 and DOC 3. Transfer students should see their college academic advisor regarding which DOC courses are required of them.

For further details on Marshall College requirements, see “Marshall College, General-Education Requirements.”

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

LOWE-DIVISION

1. Dimensions of Culture: Diversity (4)
This course focuses on sociocultural diversity in examining class, ethnicity, race, gender, and sexuality as significant markers of differences among persons. Emphasizing American society, it explores the cultural understandings of diversity and its economic, moral, and political consequences. Three hours of lecture, one hour of discussion. Open to Marshall College students only. (Letter grade only) (F)

2. Dimensions of Culture: Justice (6)
This course considers the nature of justice in philosophical, historical, and legal terms. Topics include racial justice, political representation, economic justice, gender and justice, the rights of cultural minorities, and crime and punishment.

The course offers intensive instruction in writing university-level expository prose. Three hours of lecture, two hours of discussion and writing instruction. Open to Marshall College students only. (Letter grade only) PREREQUISITE: completion of UC Entry Level Writing requirement. (W)

3. Dimensions of Culture: Imagination (6)
Using the arts, this course examines the evolution of pluralistic culture to the modern period. There is a special emphasis on the interdisciplinary study of twentieth-century American culture, including music, literature, art, film, and photography. The course offers intensive instruction in writing university-level expository prose.

Three hours of lecture, two hours of discussion and writing instruction. Open to Marshall College students only. (Letter grade only) PREREQUISITE: completion of UC Entry Level Writing requirement. (S)

INTRODUCTION

Economics is the study of how individuals, organizations, and societies deal with scarcity—the fact that resources are not sufficient to satisfy everyone’s wants. Because scarcity requires choice among alternative uses of resources, economists study both the technology by which resources are turned into the products people want and the preferences through which people choose among alternatives. Further, since society is composed of many individuals and groups, economists study markets, governments, and other institutions through which a society might gain the advantages of cooperation and resolve the conflicts due to competing goals. The economics curriculum develops tools and uses them to analyze a wide range of societal problems, and also to study the role of the government in solving these problems.

Economics is a different discipline from business administration. However, there are substantial overlaps. Both disciplines study the behavior of people and firms within the context of market, legal, and other institutions. In evaluating economic institutions, economists tend to emphasize the viewpoint
of the larger society, and business scholars tend to emphasize the viewpoint of firms.

Information on the undergraduate program can be found on the undergraduate program’s Web site at http://economics.ucsd.edu/ugrad/index.php. The Web site contains answers to frequently asked questions, gives practical tips for avoiding problems, and provides a more detailed discussion of the department’s majors than is possible in the general catalog. It is important for students contemplating a major in the department to be familiar with the Web site and the prerequisite requirements listed therein. Time-sensitive information, job and internship announcements, and other important information are sent to all declared majors and minors through campus e-mail.

Students interested in the Education Abroad Program (EAP) are encouraged to check out the brochure “Opportunities in Business and Economics” that is available at the EAP office.

Transfer students should see the department Web site at http://economics.ucsd.edu/ugrad/index.php.

THE UNDERGRADUATE PROGRAM

LOWER-DIVISION ECONOMIC COURSES

Microeconomics and macroeconomics—ECON. 1-2-3

The department offers three lower-division economics classes, ECON 1-2-3. ECON 1 is an introduction to the study of the economic system from the micro, or individual decision maker’s perspective. The focus of ECON 1 is the allocation of resources and the distribution of income in perfectly competitive markets. ECON 2 is a continuation of the study of microeconomics with a focus on the allocation of resources in monopoly and other imperfectly competitive markets, market imperfections, and the role of government in markets. ECON 3 introduces macroeconomics: unemployment, inflation, business cycles, and monetary and fiscal policy. ECON 1 is a prerequisite for both ECON 2 and ECON 3. ECON 2 and ECON 3 can be taken in any order and may be taken concurrently.

ACCOUNTING COURSE

The department offers an accounting course, ECON 4. ECON 4 is a lower-division requirement for the B.S. in management science and the management science minor. ECON 4 is open to students who take no other courses from the department.

UPPER-DIVISION ECONOMICS CORE COURSES

The upper-division economics and management science core courses are expected to be offered according to the following academic schedule:

Fall—100A-B-C, 110A, 120A-B-C, 171, 172A, and 173A
Spring—100A-B-C, 110B, 120A-B-C, 171, 172B, and 173B

The 100, 110, 120, 172, and 173 core courses are sequential. That is, A must be taken before B and when applicable B before C.

ENTRY TO THE MAJORS

Any student in good standing may declare a major in the department. The major codes are as follows: Economics, EN 25; Management Science, EN 26; and Joint Mathematics-Economics, EN 28.

THE ECONOMICS MAJOR (B.A.)

The economics B.A. program is designed to provide a broad understanding of resource-allocation and income-determination mechanisms. Both the development of the tools of economic analysis and their application to contemporary problems and public policy are stressed.

When choosing which mathematics series to take, Math. 10A-B-C or Math. 20A-B-C, it is important to remember that only Math. 20A-B-C allows students access to Math. 20F and several upper-division Math. courses that are recommended as preparation for Ph.D. study in economics and business administration, as well as for graduate studies for professional management degrees, including the MBA. Therefore, while we require economics majors to take Math. 10A-B-C, we recommend that economics students take Math. 20A-B-C.

A student majoring in economics must meet the following requirements:

1. Lower-division mathematics courses. Math. 10A-B-C (required) or Math. 20A-B-C (recommended).
2. Lower-division economics courses. ECON 1 and ECON 3.
3. Upper-division economics core courses, ECON 100A-B-C (microeconomics), ECON 110A-B (macroeconomics), and ECON 120A-B-C (econometrics).
4. Upper-division economics electives. Five more economics courses at the upper-division level. At least two of these elective courses must be “advanced electives.” The economics advanced electives are:

- ECON 103: International Monetary Relations
- ECON 104: Economics of Network Industries
- ECON 105: Industrial Organization and Firm Strategy
- ECON 109: Game Theory
- ECON 113: Mathematical Economics
- ECON 119: Law and Economics: Contracts and Corporations
- ECON 121: Applied Econometrics
- ECON 125: Demographic Analysis and Forecasting
- ECON 141: Economics of Health Consumers
- ECON 142: Behavioral Economics
- ECON 143: Experimental Economics
- ECON 147: Economics of Education
- ECON 150: Public Economics: Taxation
- ECON 151: Public Economics: Expenditures I
- ECON 152: Public Economics: Expenditures II
- ECON 155: Political Economics
- ECON 171: Decisions Under Uncertainty
- ECON 172A: Operations Research A
- ECON 172B: Operations Research B

ECON 173A: Financial Markets
ECON 173B: Corporate Finance
ECON 174: Financial Risk Management
ECON 176: Marketing
ECON 178: Economic and Business Forecasting

Note that many of these advanced economics electives recommend 100C as a prerequisite for the class. In the fall quarter of 2010, 100C will become a prerequisite for the advanced electives that currently only recommend 100C as a prerequisite. Therefore, economics majors are strongly encouraged to take ECON 100A-B-C and either ECON 110A-B or ECON 120A-B-C in their sophomore year.

The following schedule, though not the only possibility, is a well-constructed one for majoring in economics.

FRESHMAN YEAR
ECON 1 and ECON 3
Math. 10A-B-C (required) or Math. 20A-B-C (recommended)

SOPHOMORE YEAR
ECON 100A-B-C
ECON 120A-B-C

JUNIOR YEAR
ECON 110A-B
Economics Electives

SENIOR YEAR
Economics Electives

A detailed description of the economics major is available in the Undergraduate Program section of the department Web site at http://economics.ucsd.edu/ugrad/index.php.

THE MANAGEMENT SCIENCE MAJOR (B.S.C.)

Management science builds on a set of related quantitative methods commonly used to solve problems arising in the private (business and finance) and public (government) sectors. While students will gain some familiarity with the traditional functional fields of business management, this program is more tightly focused and more quantitative than a traditional business administration major. It is not, however, a program in applied mathematics or operational research, since the economic interpretation and application of the tools are continually stressed. Rather, it is a quantitative major in applied economics with a management focus.

A student majoring in management science must meet the following requirements:

1. Lower-division mathematics courses. Math. 20A-B-C and Math. 20F.
2. Lower-division economics courses. ECON 1, ECON 3, and ECON 4.
3. Upper-division economics core courses. ECON 100A-B-C (microeconomics), ECON 120A-B-C (econometrics), ECON 171 (decisions under uncertainty), ECON 172A-B (operations research) and ECON 173A-B (finance).
4. Upper-division economics electives. Four more economics courses at the upper-division level. At least two of these elective courses must be
“advanced electives.” The management science advanced electives are:

- ECON 103: International Monetary Relations
- ECON 104: Economics of Network Industries
- ECON 105: Industrial Organization and Firm Strategy
- ECON 109: Game Theory
- ECON 113: Mathematical Economics
- ECON 119: Law and Economics: Contracts and Corporations
- ECON 121: Applied Econometrics
- ECON 125: Demographic Analysis and Forecasting
- ECON 150: Public Economics: Taxation
- ECON 151: Public Economics: Expenditures I
- ECON 152: Public Economics: Expenditures II
- ECON 155: Political Economics
- ECON 174: Financial Risk Management
- ECON 176: Marketing
- ECON 178: Economic and Business Forecasting

Note that many of these advanced management science electives recommend 100C as a prerequisite for the class. In the fall quarter of 2010, 100C will become a prerequisite for the advanced electives that currently only recommend 100C as a prerequisite. Therefore, management science majors are strongly encouraged to take ECON 100A-B-C and ECON 120A-B-C in their sophomore year. The following schedule, though not the only possibility, is a well-constructed one for a student majoring in management science.

**FRESHMAN YEAR**
- ECON 1 and ECON 3
- ECON 4
- Math. 20A-B-C

**SOPHOMORE YEAR**
- ECON 100A-B-C
- ECON 120A-B-C
- Math. 20F

**JUNIOR YEAR**
- ECON 171
- ECON 172A-B
- ECON 173A-B
- Economics Electives

**SENIOR YEAR**
- Economics Electives

A detailed description of the management science major is available on the department Web site at http://economics.ucsd.edu/ugrad/index.php.

**JOINT MAJOR IN MATHEMATICS AND ECONOMICS (B.A.)**

This major is considered to be excellent preparation for the Ph.D. study in economics and business administration, as well as for graduate studies for professional management degrees, including the M.B.A.

Majors in economics generally recognize the importance of mathematics to their discipline. Undergraduate students who plan to pursue doctoral study in economics or business need the more advanced mathematics training prescribed in this major. Majors in mathematics often feel the need for a more formal introduction to issues involving business applications of science and mathematics. Extending their studies into economics provides this application and can provide a bridge to successful careers or advanced study. This major provides a formal framework making it easier to combine study in economics and mathematics.

Course requirements of the joint major in mathematics and economics consist principally of the required courses of the mathematics major and the economics/management science majors:

**Lower-Division Requirements**

1. One of the following sequences:
   a. Calculus and Linear Algebra. Math. 20A-B-C-D and 20F
   b. Honors Calculus. Math. 31AH-BH, Math 20D
2. Introductory economics. ECON 1 and ECON 3.

**Upper-Division Requirements**

Fifteen upper-division courses in mathematics and economics, with a minimum of seven courses from one department and eight from the other department, chosen from the courses listed below (prerequisites are strictly enforced):

1. Mathematical Reasoning. Math. 109 (Note: Students completing Math. 31CH may substitute a four-unit upper-division math. elective for Math. 109.)
2. One of the following:
   a. Applied Linear Algebra. Math. 102
   b. Numerical Linear Algebra. Math. 170A
   c. Modern Algebra. Math. 100A-B
3. One of the following:
   a. Foundations of Analysis. Math. 140A
   b. Advanced Calculus. Math. 142A
4. One of the following:
   a. Ordinary Differential Equations. Math. 130A
   b. Foundations of Analysis. Math. 140B
   c. Advanced Calculus. Math. 142B
5. Microeconomics. ECON 100A-B-C
6. Econometrics/Statistics. One of the following:
   a. ECON 120A-B-C
   b. Math. 180A and ECON 120B-C
   c. Math. 180A and 181A and ECON 120C
7. One of the following:
   a. Macroeconomics. ECON 110A-B
   c. Introduction to Operations Research. ECON 172A-B
   d. Decisions Under Uncertainty. ECON 171 and Introduction to Operations Research. ECON 172A

When choosing across the Math. 140 or the Math. 142 series, it is recommended that students take Math. 142. Other courses which are strongly recommended are: Math. 130B, 131, 181B, 190, and 193A-B and ECON 109, 113, 173A-B, 174, and 178.

Further information may be obtained in the mathematics and economics undergraduate advising offices.

**HONORS**

**Economics Majors**

To graduate with the phrase "with distinction" on your diploma, you must complete two additional advanced electives (for a total of seven electives, four of which are advanced). You must also have an upper-division GPA in your major greater than or equal to 3.5. The upper-division major GPA will only include grades for courses taken at universities in the UC system and through EAP.

To graduate with the phrase "with highest distinction" on your diploma, you must complete two additional advanced electives (for a total of seven electives, four of which are advanced), take the honors sections of at least two upper-division courses (ECON 100AH-BH-CH, ECON 110AH-BH, and ECON 120AH-BH-CH), and take the Senior Essay Seminar (ECON 191A-B). You must also have an upper-division GPA in your major greater than or equal to 3.5. The major GPA in your honors sections and ECON 191A-B must be 3.5 or above. Admission to honors sections and ECON 191A-B is by special permission; check with the undergraduate advisors in the Economics Student Services Office. Note that we generally offer A honors sections in the fall, B honors sections in the winter, and the C honors sections in the spring.

**Management Science Majors**

To graduate with the phrase "with distinction" on your diploma, you must have an upper-division GPA in your major greater than or equal to 3.5. The upper-division major GPA will only include grades for courses taken at universities in the UC system and through EAP.

To graduate with the phrase "with highest distinction" on your diploma, you must complete the honors sections of at least two upper-division courses (ECON 100AH-BH-CH or ECON 120AH-BH-CH), and take the Senior Essay Seminar (ECON 191A-B). You must also have an upper-division GPA in your major greater than or equal to 3.5. The major GPA in your honors sections and ECON 191A-B must be 3.5 or above. Admission to honors sections and ECON 191A-B is by special permission; check with the undergraduate advisors in the Economics Student Services Office. Note that we generally offer A honors sections in the fall, B honors sections in the winter, and the C honors sections in the spring.

**Joint Mathematics/Economics Majors**

To graduate with honors requires the following:

1. At least one quarter of the Student Colloquium, Math. 196. (Note: Math. 196 is only offered in the fall quarter.)
2. At least one Economics honors course: ECON 100AH, 100BH, 100CH, 110AH, 110BH, 120AH, 120BH, 120CH. (Note: enrollment in these honors classes is by special permission; check with the undergraduate advisors in the Economics Student Services Office, (SH 245).)
3. An Honors Thesis. The research and writing of the thesis will be conducted over two quarters of the senior year under the supervision of a faculty advisor. The completed thesis must be approved.
MINORS AND PROGRAMS OF CONCENTRATION

The economics minor or program of concentration consists of eight courses: introductory microeconomics (ECON 1); microeconomic applications (ECON 2) or ECON 100A; introductory macroeconomics (ECON 3) or ECON 110A; and five additional upper-division economics courses, which are otherwise not restricted.

The management science minor, paralleling the economics minor, consists of nine courses: introductory microeconomics (ECON 1); microeconomic applications (ECON 2) or ECON 100A; introductory macroeconomics (ECON 3) or ECON 110A; financial accounting (ECON 4), and any additional five classes from the following list (Caution: all courses have prerequisites):

ECON 100A. Microeconomics A
ECON 100B. Microeconomics B
ECON 100C. Microeconomics C
ECON 120A. Econometrics A
ECON 120B. Econometrics B
ECON 120C. Econometrics C
ECON 171. Decisions Under Uncertainty
ECON 172A. Operations Research A
ECON 172B. Operations Research B
ECON 173A. Financial Markets
ECON 173B. Corporate Finance
ECON 174. Financial Risk Management
ECON 176. Marketing
ECON 178. Economic and Business Forecasting

Grades of P/NP are acceptable for minor courses. If courses are taken for a letter grade, passing is considered with a C– (C minus) or better. To declare a minor or program of concentration, complete an Undergraduate Declaration of Minor using the Major/Minor tool found on TritonLink. Students should check with their colleges regarding area of focus, programs of concentration, and project minors.

THE GRADUATE PROGRAM

The department offers a Ph.D. degree in economics, designed to provide a solid, analytically oriented training in microeconomics, macroeconomics, econometrics, and advanced specialties. Since the program is structured as a doctoral program, only students who intend to pursue a doctorate should apply.

The main economics Ph.D. requirements are that a student pass qualifying exams in microeconomics, macroeconomics, econometrics, and select courses of specialization, and prepare an acceptable dissertation.

Detailed descriptions of the Ph.D. program are available on the Internet at the department Web site at http://economics.ucsd.edu/. Residence and other campuswide regulations are described in the graduate studies section of this catalog.

DEPARTMENTAL PH.D. TIME LIMIT POLICIES

Students must be advanced to candidacy by the end of five years. Total university support cannot exceed six years. Total registered time at UCSD cannot exceed seven years. Students will not be permitted to continue beyond the pre-candidacy and total registered time limits. Students will not be permitted to receive UCSD administered financial support beyond the support limit.

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

LOWER-DIVISION

1. Principles of Microeconomics (4)
   Introduction to the study of the economic system. Course will introduce the student to economic models used to examine how individuals and firms make decisions in perfectly competitive markets. Credit not allowed for both ECON 1 and ECON 1A.

2. Market Imperfections and Policy (4)
   Analysis of monopoly and imperfectly competitive markets, market imperfections and the role of government. PREREQUISITE: ECON 1 or 1A.

3. Principles of Macroeconomics (4)
   Introduction to macroeconomics: unemployment, inflation, business cycles, monetary and fiscal policy. Credit not allowed for both ECON 1B and ECON 3. PREREQUISITE: ECON 1 or 1A.

4. Financial Accounting (4)
   Recording, organizing, and communicating financial information relating to business entities. No prerequisites.

87. Freshman Seminar (1)
   The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to 15-20 students, with preference given to entering freshmen. May be repeated when course topics vary. (P/NP grades only.)

UPPER-DIVISION

100A. Microeconomics A (4)
   Economic analysis of household determination of the demand for goods and services, consumption/saving decisions, and the supply of labor. Credit not allowed for both ECON 100A and ECON 170A. PREREQUISITES: ECON 1A or 1; and Math. 10C or 20C.

100B. Microeconomics B (4)
   Analysis of firms’ production and costs, the supply of output and demand factors of production. Analysis of perfectly competitive markets. Credit not allowed for both ECON 100B and ECON 170B. PREREQUISITE: ECON 100A or 170A.

100C. Microeconomics C (4)
   Analysis of the effects of imperfect market structure, strategy, and imperfect information. PREREQUISITE: ECON 100B or 170B.

100AH. Honors Microeconomics A (1)
   Honors sequence expanding on the material taught in ECON 100A. ECON 100A must be taken with ECON 100AH. Credit not allowed for both ECON 100AH and ECON 170AH. GPA of 3.5 or better. PREREQUISITE: department stamp required.

100BH. Honors Microeconomics B (1)
   Honors sequence expanding on the material taught in ECON 100B. ECON 100B must be taken with ECON 100BH. Credit not allowed for both ECON 100BH and ECON 170BH. GPA of 3.5 or better. PREREQUISITE: department stamp required.

100CH. Honors Microeconomics C (1)
   Honors sequence expanding on the material taught in ECON 100C. ECON 100C must be taken with ECON 100CH.
GPA of 3.5 or better. **Prerequisite:** department stamp required.

101. International Trade (4)
Examines theories of international trade in goods and services as well as international migration and capital flows. The course discusses comparative advantage, motives for trade policies, and the effects of trade barriers and trading blocs on income distribution and welfare. **Prerequisites:** ECON 1A-B or 2 or 108B or 170B.

103. International Monetary Relations (4)
Analyzes exchange rates and the current account, and relates their joint determination to financial markets and the management of exchange rate policies. Discusses macroeconomic policies under different exchange rate regimes and implications for financial stability and current account sustainability. **Prerequisite:** ECON 110B or 170A or 173A or 175.

104. Economics of Network Industries (4)
Economics of industries with network effects such as telecommunications, internet, software, and airlines. Analysis of standards, complementarities, switching costs, economies of scale, and optimal price setting in the presence of network effects. ECON 100C is recommended. **Prerequisite:** ECON 110B or 170B.

105. Industrial Organization and Firm Strategy (4)
Theory of monopoly and oligopoly pricing, price discrimination, advertising, cartel behavior, price wars, strategic entry barriers, mergers, pro- and anti-competitive restraints on business. ECON 100C is recommended. **Prerequisite:** ECON 100B or 170B.

107. Economic Regulation and Antitrust Policy (4)
Detailed treatment of antitrust policy: Sherman Act, price fixing, collusive practices, predatory pricing, price discrimination, double marginalization, exclusive territories, resale price maintenance, refusal to deal, and foreclosure. Theory of regulation and regulatory experience in electrical utilities, oil, telecommunications, broadcasting, etc. **Prerequisites:** ECON 1A-B or 2 or 100B or 170B; and Math. 10C or 20C.

109. Game Theory (4)
Introduction to game theory. Analysis of people's decisions when the consequences of the decisions depend on what other people do. This course features applications in economics, political science, and law. ECON 100C is recommended. **Prerequisite:** ECON 100B or 170B or Math. 109.

110A. Macroeconomics A (4)
Analysis of the determination of long run growth and models of the determination of output, interest rates, and the price level. Analysis of inflation, unemployment, and monetary and fiscal policy. **Prerequisites:** ECON 1A-B or 2; and Math. 10C or 20C.

110B. Macroeconomics B (4)
Analysis of the determination of consumption spending at the aggregate level and expansion of the basic macro model to include exchange rates and international trade; the aggregate money supply, and the business cycle. **Prerequisite:** ECON 110A.

110AH. Honors Macroeconomics A (1)
Honors sequence expanding on the material taught in ECON 110A. ECON 110A must be taken with ECON 110AH. GPA of 3.5 or better. **Prerequisite:** department stamp required.

110BH. Honors Macroeconomics B (1)
Honors sequence expanding on the material taught in ECON 110B. ECON 110B must be taken with ECON 110B. GPA of 3.5 or better. **Prerequisite:** department stamp required.

111. Monetary Economics (4)
Financial structure of the U.S. economy. Bank behavior. Monetary control. **Prerequisites:** ECON 1A-B or 2 or 3; and Math. 10A or 20A.

113. Mathematical Economics (4)
Mathematical concepts and techniques used in advanced economic analysis; applications to selected aspects of economic theory. ECON 100C is recommended. **Prerequisite:** ECON 100B or ECON 170B; or Math. 140A or Math. 142A.

114. Economics of Immigration (4)
Impact of immigration on the U.S. economy. Empirical evidence on the labor market and fiscal impacts of immigration. Consideration of issues that arise from immigration policies on the economy. **Prerequisites:** ECON 1A-B or ECON 1 and 3.

116. Economic Development (4)
Introduction to the economics of less developed countries, covering their international trade, human resources, urbanization, agriculture, income distribution, political economy, and environment. **Prerequisites:** ECON 1A-B or 2 or 100B.

117. Economic Growth (4)
Models of the economic growth of developed economies. **Prerequisite:** ECON 100A or 170A.

118. Law and Economics: Torts, Property, and Crime (4)
Uses economic theory to evaluate the economic effects of U.S. law in several legal fields, including tort law (accidents), products liability law, property law, criminal law (law enforcement), and litigation. Also considers risk bearing and why people buy insurance. Renumbered from ECON 118A. Credit not allowed for both ECON 118 and ECON 118A. **Prerequisites:** ECON 1A-B or 2 or 100A; and Math. 10A or 20A.

119. Law and Economics: Contracts and Corporations (4)
Uses economic theory to evaluate the economic effects of U.S. law in contract law, corporate law (how large firms are organized and governed), debtor-creditor law, and bankruptcy law. ECON 100C and 118 are recommended. **Prerequisite:** ECON 100B or 170B.

120A. Econometrics A (4)
Probability and statistics used in economics. Probability and sampling theory, statistical inference, and use of spreadsheets. Credit not allowed for ECON 120A and any of the following: ECE 109; Math. 180A; Math. 183; Math. 186. **Prerequisites:** ECON 1A or 1; and Math. 10C or 20C.

120B. Econometrics B (4)
Basic econometric methods, including the linear regression, hypothesis testing, quantifying uncertainty using confidence intervals, and distinguishing correlation from causality. Credit not allowed for both ECON 120B and Math. 181A. **Prerequisite:** ECON 120A or ECE 109 or Math. 180A or Math. 183 or Math. 186.

120C. Econometrics C (4)
Advanced econometric methods: estimation of linear regression models with endogeneity, economic methods designed for panel data sets, estimation of discrete choice models, time series analysis, and estimation in the presence of autocorrelated and heteroskedastic errors. **Prerequisite:** ECON 120B or Math. 181A.

120AH. Honors Econometrics A (1)
Honors sequence expanding on the material taught in ECON 120A. ECON 120A must be taken with ECON 120AH. GPA of 3.5 or better. **Prerequisite:** department stamp required.

120BH. Honors Econometrics B (1)
Honors sequence expanding on the material taught in ECON 120B. ECON 120B must be taken with ECON 120BH. GPA of 3.5 or better. **Prerequisite:** department stamp required.

120CH. Honors Econometrics C (1)
Honors sequence expanding on the material taught in ECON 120C. ECON 120C must be taken with ECON 120CH. GPA of 3.5 or better. **Prerequisite:** department stamp required.

121. Applied Econometrics (4)
Application of econometric techniques to such areas as labor supply, human capital, and financial time series. Concurrent enrollment in ECON 120C is permitted. **Prerequisite:** ECON 120C.

125. Demographic Analysis and Forecasting (4)
Interaction between economic forces and demographic changes are considered, as are demographic composition and analysis, fertility, mortality, and migration processes and trends. Course emphasizes the creation, evaluation, and interpretation of forecasts for states, regions and sub-county areas. ECON 178 is recommended. **Prerequisite:** ECON 120B or Math. 181A.

130. Public Policy (4)
Course uses basic microeconomic tools to discuss a wide variety of public issues, including the war on drugs, global warming, natural resources, health care and safety regulation. Appropriate for majors who have not completed ECON 100A-B or ECON 170A-B and students from other departments. **Prerequisites:** ECON 1A-B or 2 or 100A.

131. Economics of the Environment (4)
Environmental issues from an economic perspective. Relation of the environment to economic growth. Management of natural resources, such as forest and fresh water. Policies on air, water, and toxic waste pollution. International issues such as ozone depletion and sustainable development. **Prerequisites:** ECON 1A-B or 2 or 100A.

132. Energy Economics (4)
Energy from an economic perspective. Fuel cycles for coal, hydro, nuclear, oil, and solar energy. Emphasis on efficiency and control of pollution. Comparison of energy use across sectors and across countries. Global warming. Role of energy in the international economy. **Prerequisites:** ECON 1A-B or 2 or 100A; and Math. 10C or 20C.

133. International Environmental Agreements (4)
Focuses on international boundaries, such as climate change, biodiversity loss, over-fishing. Examines why international agreements are required, how they are negotiated and implemented, and studies their effectiveness. Explores whether more effective environmental treaties could be designed. **Prerequisites:** ECON 1A-B or 2 or 100A.

135. Urban Economics (4)
(Cross-listed with USP 102.) Economic analysis of why and where cities develop, problems they cause, and public policies to deal with these problems. Determination of urban land rent-use reasons for urbanization. Transportation and congestion in cities, zoning, poverty and housing, urban local government. Credit not allowed for both ECON 135 and USP 102. **Prerequisites:** ECON 1A-B or 2 or 100A; and Math. 10A or 20A.

136. Human Resources (4)
A practical yet theory-based study of the firm's role in managing workers, including issues related to hiring, education and training, promotions, layoffs and buyouts, and the overarching role that worker compensation plays in all of these. **Prerequisite:** ECON 100B or 170B.

139. Labor Economics (4)
Theoretical and empirical analysis of labor markets. Topics include: labor supply, labor demand, human capital investment, wage inequality, labor mobility and immigration, labor market discrimination, labor unions and unemployment. **Prerequisites:** ECON 1A-B or 2 or 100B.

140. Economics of Health Producers (4)
Physician and nurse supply, medical malpractice, incentives to avoid patient injury, patients and pricing in the pharmaceutical industry, not-for-profit firms, and government regulation of healthcare producers. Renumbered from ECON 138A. Credit not allowed for both ECON 140 and ECON 138A. **Prerequisites:** ECON 1A-B or 2 or 100B.

141. Economics of Health Consumers (4)
Demand for health care and health insurance, employer-provision of health insurance and impact on wages and working hours. Cross country comparisons of health systems. ECON 100C is recommended. Renumbered from ECON 138B. Credit not allowed for both ECON 141 and ECON 138B. **Prerequisites:** ECON 100B or 170B.

142. Behavioral Economics (4)
Course will study economic models in which standard economic rationality assumptions are combined with psychologically plausible assumptions on behavior. We consider whether the new models improve ability to predict and understand phenomena including altruism, trust and reciprocity, procrastination, and self-control. ECON 100C is recommended. **Prerequisite:** ECON 100B or 170B.
143. Experimental Economics (4)
Explore use of experiments to study individual and interactive (strategic) decision-making. Topics may include choice over risky alternatives, altruism and reciprocity, allocation and information aggregation in competitive markets, cooperation and collusion, bidding in auctions, strategy in coordination and “outr guissing” games. ECON 100C is recommended. PREREQUISITE: ECON 100B or 170B.

144. Economics of Conservation (4)
Examines conservation of biodiversity from an economic perspective. Topics include valuing biodiversity, defining successful conservation, and evaluating the cost-effective-ness of policies such as conservation payments, ecotour-ism, and privatization. Emphasis on forests, coral reefs, elephants, tigers, and sea turtles. PREREQUISITES: ECON 1A-B or 2 or 100A.

145. Economics of Ocean Resources (4)
Economic issues associated with oceans. Economics of managing renewable resources in the oceans, with an emphasis on fisheries, economics of conservation and biodiversity preservation for living marine resources, with an emphasis on whales, dolphins, sea-turtles, and coral reefs. PREREQUISITES: ECON 1A-B or 2 or 100A.

146. Economic Stabilization (4)
Theory of business cycles and techniques used by gov-ernments to stabilize an economy. Discussion of recent economic experience. PREREQUISITE: ECON 110B.

147. Economics of Education (4)
Examination of issues in education using theoretical and empirical approaches from economics. Analysis of decisions made in education. Consideration of value of market structures in education, including school choice and school finance programs. PREREQUISITES: ECON 1A-B or 2 or 100A; and ECON 120B or Math. 181A.

150. Public Economics: Taxation (4)
Overview of the public sector in the U.S. and the scope of government intervention in economic life. Basic principles of taxation, tax incidence, and tax efficiency. Analysis of the U.S. tax system before and after the Tax Reform Act of 1986. ECON 100C is recommended. PREREQUISITE: ECON 100B or 170B.

151. Public Economics: Expenditures I (4)
Overview of the public sector in the U.S. and the scope of government intervention in economic life. Theory of public goods and externalities. Discussion of specific expenditure programs such as education and national defense. ECON 100C is recommended. PREREQUISITE: ECON 100B or 170B.

152. Public Economics: Expenditures II (4)
Overview of the public sector in the U.S. and the justifi-cations for government intervention in economic life. Theory of public goods and externalities. Applications to current policy in such areas as welfare, unemployment insurance, and Social Security. ECON 100C is recommended. Renumbered from ECON 153. Credit not allowed for both ECON 152 and ECON 153. PREREQUISITE: ECON 100B or 170B.

155. Political Economics (4)
An analysis of social decision-making, including such topics as the desirable scope and size of the public sector, the efficiency of collective decision-making procedures, voting theory and collective vs. market resource allocation. PREREQUISITE: ECON 109.

158. Economic History of the United States I (4)
(Cross-listed with HIS 140.) The United States as a raw mat-erials producer, as an agrarian society, and as an industrial nation. Emphasis on the logic of the growth process, the social and political tensions accompanying expansion, and nineteenth- and early twentieth-century transformations of American capitalism. Renumbered from 158A. Credit not allowed for ECON 158 and any of the following: ECON 158A; HIS 140. PREREQUISITE: upper-division standing.

159. Economic History of the United States II (4)
(Cross-listed with HIS 141.) The United States as a modern industrial nation. Emphasis on the logic of the growth process, the social and political tensions accompanying expansion, and twentieth-century transformations of American capitalism. Renumbered from 158B. Credit not allowed for ECON 159 and any of the following: ECON 158B; HIS 141. PREREQUISITE: upper-division standing.

161. Global Integration of Latin America (4)
Examines the integration of Latin American and Caribbean countries into the global economy. Topics include trade in agricultural and manufactured goods, regional trade agreements, international capital flows to Latin America, financial vulnerabilities, and policy responses. PREREQUISITES: ECON 1A-B or ECON 1 and 3.

162. Economics of Mexico (4)
Survey of the Mexican economy. Topics such as economic growth, business cycles, saving-investment balance, financial markets, trade policies, and international trade and agriculture. PREREQUISITES: ECON 1A-B or ECON 1 and 3.

163. Japanese Economy (4)
Survey of the Japanese economy. Economic growth, business cycles, saving-investment balance, financial markets, fiscal and monetary policy, labor markets, industrial structure, international trade, and agricultural policy. PREREQUISITES: ECON 1A-B or ECON 1 and 3.

164. Middle East Economics (4)
Internal economies of radical religious groups and terror-ist organizations. Ottoman economic history, economic demography and migration, Islamic banking, economic development and Islamic economics. PREREQUISITES: ECON 1A-B or ECON 1 and 3.

171. Decisions Under Uncertainty (4)
Decision-making when the consequences are uncer-tain. Decision trees, payoff tables, decision criteria, ex-pected utility theory, risk aversion, sample information. PREREQUISITES: ECON 100A or 170A; and ECON 120A or ECE 109 or Math. 180A or Math. 183 or Math. 186.

172A. Operations Research A (4)
Linear and integer programming, elements of zero-sum, two-person game theory, and specific combinatorial algo-rithms. Credit not allowed for both ECON 172A and Math. 171A. PREREQUISITES: ECON 100A or 170A; and ECON 120A or ECE 109 or Math. 180A or Math. 183 or Math. 186. or Math. 20F.

172B. Operations Research B (4)
Non-linear programming, deterministic and stochastic dy-namic programming, queuing theory, search models, and inventory models. Credit not allowed for both ECON 172B and Math. 171B. PREREQUISITE: ECON 172A or Math. 171A.

173A. Financial Markets (4)
Financial market functions, institutions and instruments: corporate finance, risk management, bonds, certificates of deposit, and money market funds. Credit not allowed for both ECON 173A and Math. 173A. PREREQUISITE: ECON 100A or 170A; and ECON 120B or Math. 186.

173B. Corporate Finance (4)
Introduces the firm’s capital budgeting decision, includ-ing methods for evaluating and ranking of investment projects, the firm’s choice of capital structure, dividend policy decisions, corporate taxes, mergers and acquisitions. Renumbered from ECON 173. Credit not allowed for both ECON 173B and ECON 173. PREREQUISITES: ECON 4; and ECON 173A or 175.

174. Financial Risk Management (4)
Risk measures, hedging techniques, value of risk to firms, estimation of optimal hedge ratio, risk management with options and futures. ECON 171 is recommended. PREREQUISITE: ECON 173A or 175.

176. Marketing (4)
Role of marketing in the economy. Topics such as buyer behavior, marketing mix, promotion, product selection, pricing, and distribution. Concurrent enrollment in ECON 120C is permitted. PREREQUISITE: ECON 120C.

178. Economics and Business Forecasting (4)
Survey of theoretical and practical aspects of statistical and economic forecasting. Such topics as long-run and short-run forecasts, leading indicator analysis, econo-metric models, technological and population forecasts, forecast evaluation, and the use of forecasts for public policy. Concurrent enrollment in ECON 120C is permitted. PREREQUISITE: ECON 120C.

180. Topics in Econometrics (4)
Selected topics in econometrics. May be repeated for credit, as topics vary. PREREQUISITES: ECON 120C; consent of department is required.

181. Topics in Finance (4)
Selected topics in finance. May be repeated for credit as topics vary. PREREQUISITES: ECON 173A or 175; consent of department is required.

182. Topics in Microeconomics (4)
Selected topics in microeconomics. ECON 100C is recom-mended. PREREQUISITE: ECON 100B or 170B, consent of department is required.

191A. Senior Essay Seminar A (4)
Senior essay seminar for students with superior records in department majors. Students must complete ECON 191A and ECON 191B in consecutive quarters. PREREQUISITE: department stamp required.

191B. Senior Essay Seminar B (4)
Senior essay seminar for students with superior records in department majors. Students must complete ECON 191A and ECON 191B in consecutive quarters. PREREQUISITE: department stamp required.

192. Senior Seminar in Economics (1)
The senior seminar is designed to allow senior under-graduates to meet with faculty members in a small group setting to explore an intellectual topic in economics at the upper-division level. Topics will vary from quarter to quarter. Senior seminar majors may be taken for credit up to four times, with a change in topic and permission of the department. Enrollment is limited to twenty students, with preference given to seniors. PREREQUISITE: department stamp and/or consent of instructor.

195. Introduction to Teaching Economics (4)
Introduction to teaching economics. Each student will be responsible for a class section in one of the lower-division economics courses. Limited to advanced economics majors with at least a 3.5 GPA in upper-division economics work. (P/NP grades only.) Students may not earn more than eight units credit in 195 courses. PREREQUISITE: consent of the department.

196. Directed Group Study (2 or 4)
Directed study on a topic or in a group field not included in regular department curriculum by special arrangement with a faculty member. PREREQUISITES: upper-division standing and consent of instructor. May be repeated up to three times when course topics vary. (P/NP grades only.)

199. Independent Study (2 or 4)
Independent reading or research under the direction of and by special arrangement with a Department of Economics faculty member. (P/NP grades only.) PREREQUISITES: con-sent of instructor and departmental approval.

GRADUATE

200A-200B. Microeconomics (4-4-4)
Background mathematical techniques, static and intertemporal consumer and producer theory, partial and general equilibrium, modern producer and consumer theory, risk, time, and interdependence, modern welfare economics.

201. Advanced Economic Theory (4)
An intensive examination of selected topics in economic theory. Course topic not available in a three-year cycle. PREREQUISITES: ECON 207 and 213.

An examination of recent research in economic theory, including topics in general equilibrium, welfare economics, duality, and social choice; development of related research topics by both graduate students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.) PREREQUISITE: ECON 207 or consent of instructor.

205. Mathematics for Economists (4)
Advanced calculus review for new graduate students.

206. Decisions (4)
Further topics in consumer and producer theory, intertemporal optimization, and decision-making under uncertainty.
208. Games and Information (4)
Further topics in game theory and the economics of infor-
mation. (Previously numbered ECON 2007; PREREQUISITES: ECON 200A-B or consent of instructor.)

210A-B-C. Macroeconomics (4-4-4)
Neoclassical and Keynesian theories of employment, income, interest rate, price level, and other aggregate variables; macroeconomic policy; balance of payments and exchange rates; conflicts between external and internal balance; disequilibrium theory; growth theory.

211. Advanced Macroeconomics (4-4-4)
Covers various topics in macroeconomics at the forefront of research, including theory, computation, and empirical work. Emphasis depends on the instructor. Students will read the latest working papers and publications in the covered areas. PREREQUISITES: graduate standing and ECON 210A-B-C or consent of instructor.

212A-B-C. Workshop in Macroeconomics (0-4/0-4/0-4)
Examination of recent research in macroeconomics; develop-
ment of own research by graduate students and faculty. Course may be repeated an unlimited number of times. (S/U grades only; PREREQUISITE: ECON 210C.)

213. Advanced Macroeconomic Theory (4)
This course develops purely theoretical models for prob-
lems in macroeconomics. Topics include dynamic general
equilibrium, asset market equilibrium, and economic growth and distribution. PREREQUISITES: ECON 210A-B-C or consent of instructor.

215. Macroeconomic Policy (4)
This course focuses on theoretical models and empirical
analysis aimed at understanding and directing macroeco-
nomics policy, including monetary, fiscal, and structural policies. PREREQUISITES: ECON 210A-B-C or consent of instructor.

216. Computation for Macroeconomics (4)
This course covers advanced computation techniques that
are widely used in macroeconomics, finance, and other
fields. Students will learn a range of numerical methods for handling systems of equations, integration, optimization, and other problems. PREREQUISITES: ECON 210A-B-C or consent of instructor.

219. Readings in Macroeconomics (4)
This course will cover numerical analysis of dynamic mac-
roeconomic models. Topics include numerical techniques, dynamic linear systems, solution algo-
rithms, and applications to dynamic general equilibrium. PREREQUISITE: graduate standing or consent of instructor.

220A-B-C-D-E-F. Econometrics (4-4-4-4-4-4)
The construction and application of stochastic models in
 economics. This includes both single and simultaneous equations models. Matrix algebra and basic statistics are
covered. Also covered (in 220F) are empirical applications to micro and macroeconomics. These require the comple-
tion of an empirical project.

221. Advanced Econometrics (4)
Advanced Topics in Econometrics. Topics may vary from
year to year, covering areas such as cross-section, time-
series, panel, limited dependent variables, conditional quantities, univariate and multivariate time series, bootstrapping, and large- and small-
sample distribution theory. PREREQUISITES: graduate standing and ECON 220A, 220B, 220C, 220D, and 220E or consent of instructor.

222A-B-C. Workshop in Econometrics (4-4-4)
Examination of recent econometric research; development of
own research by students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.)

224. Readings in Econometrics (1)
Examination of recent research in econometrics to facilitate the
development of the thesis research by graduate students. (S/U grades only.)

225. Forecasting (4)
Topics include testing for rationality of forecasts, Mincer-
Zarnowitz regressions, asymmetric loss functions, tests for
equal (superior) predictive ability, multivariate forecasting. PREREQUISITES: graduate standing and ECON 220A, 220B, 220C, 220D, and 220E or consent of instructor.

226. Bayesian and Numerical Methods (4)
Topics include Bayesian inference and decision theory, loss functions, estimation of dynamic stochastic general equilibrium models, nonlinear time series, state-space models, temporal-spatial models, and high-frequency data. PREREQUISITES: graduate standing and ECON 220A, 220B, 220C, 220D, and 220E or consent of instructor.

227. Nonparametric and Semi-Parametric Models (4)
Topics include neural networks, kernels, series, splines, estimation of densities and spectra, smoothing param-
eter selection, semi-parametric models, efficiency and adaptation, forecasting with nonlinear models, over-fit, computation, and interpretation. PREREQUISITES: graduate standing and ECON 220A, 220B, 220C, 220D, and 220E or consent of instructor.

228. Nonstandard Inference (4)
Topics include weak instruments, unit roots, break tests,
switching models, set-based inference, maximum like-
kelihood estimation and meaning of misspecified models, consistency, asymptotic normality, consistent covariance
matrix estimation, and tests of model misspecification. PREREQUISITES: graduate standing and ECON 220A, 220B, 220C, 220D, and 220E or consent of instructor.

229. Estimating Causal Effects (4)
Topics include the definition, identification, and estimation of
causal effects. Topics include White and Chalak’s settable
systems, Granger causality, treatment effects, parametric and non-parametric estimation methods, and estimation of IV methods, and tests for structural identification. PREREQUISITES: graduate standing and ECON 220A, 220B, 220C, 220D, and 220E or instructor approval.

230. Public Economics: Taxation (4)
Exploration of existing theoretical literature evaluating the
efficiency and distribution effects of income and trans-
fer taxes. Characterization of an “optimal” tax structure, and
evaluation of problems faced in tax administration. Scrutiny of behavioral responses to existing tax structures. PREREQUISITES: ECON 200A-B-C and ECON 220A-B-C.

231. Public Economics: National Government
Expenditures (4)
Examination of possible normative justification of govern-
ment expenditures (public goods, externalities, and market
failures). Exploration of positive government-behavior models. Analysis of behavioral responses to key exist-
ing government-expenditure programs (social security, Medicare, and unemployment insurance). Overview of cost-benefit analysis. PREREQUISITES: ECON 200A-B-C and ECON 220A-B-C.

232. Public Economics: Redistribution and Social
Insurance (4)
Justifications for government involvement in redistribution
and social insurance systems. Overview of program-evaluation methods. Theoretical and empirical analyses of specific programs, such as welfare, unemployment insurance, and social security. PREREQUISITES: ECON 200A-B-C and ECON 220A-B-C.

235A-B-C. Workshop in Applied Econometrics (0-4/0-4/0-4)
Examination of recent research in applied economics; develop-
ment of own research by graduate students and faculty. Course may be repeated an unlimited number of times. (S/U grades only.)

237. Political Economy: Microeconomic
Perspectives (4)
The course will examine recent research investigating the
behavior of key actors in the political arena: voters, can-
didates, legislators, interest groups, political parties, and
the media, and then assessing the resulting political and
economic outcomes. PREREQUISITE: graduate standing.

240. Economic Development (4)
Theoretical and empirical issues in economic development. PREREQUISITE: consent of instructor.

241. Microeconomics of Development (4)
Course introduces the household as a decision-making
unit, and the contracts and institutions that emerge to compensate for imperfect markets. Emphasis is placed on data and identification strategies that can be used to measure the impact of policy interventions. PREREQUISITE: graduate standing or consent of instructor.

242. Macroeconomics of Development (4)
Course begins with measurement of development and
continues to history of division of world into industrial and
agricultural countries. Roles of trade, finance, and
investment in aggregate growth are then studied. Course
concludes by covering income distribution and political economy. PREREQUISITE: graduate standing or consent of instructor.

245. International Trade (4)
This course covers the determinants of the pattern and
volume of trade in goods and services, the interaction
of international trade with income distribution and eco-

246. International Macroeconomics (4)
This course covers advanced computation techniques that
are widely used in macroeconomics, finance, and other
fields. Students will learn a range of numerical methods for handling systems of equations, integration, optimization, and other problems. PREREQUISITES: ECON 210A-B-C or consent of instructor.

247. Empirical Topics in International Economics (4)
This course examines the empirical work in international trade or international macroeconomics. International trade topics include empirical tests of theories of international trade and international capital movements. International macroeconomic topics include empirical studies of ex-
change rate and relative price adjustments. PREREQUISITE: consent of instructor.

249A. International Development Workshop I (1-4)
Presentation of recent research in international and de-
velopment economics by faculty and graduate students, cov-
ering micro and macroeconomic aspect of both areas. Regular attendance is required. PREREQUISITE: graduate standing or consent of instructor.

249B. International Development Workshop II (1-4)
Presentation of recent research in international and de-
velopment economics by faculty and graduate students, cov-
ering micro and macroeconomic aspect of both areas. Regular attendance is required. PREREQUISITE: graduate standing or consent of instructor.

249C. International Development Workshop III (1-4)
Presentation of recent research in international and de-
velopment economics by faculty and graduate students, cov-
ering micro and macroeconomic aspect of both areas. Regular attendance is required. PREREQUISITE: graduate standing or consent of instructor.

250. Labor Economics (4)
Theoretical and empirical issues in labor economics. (Previously numbered ECON 236A-B.) PREREQUISITE: consent of instructor.

260. Industrial Organization (4)
Theoretical and empirical issues in industrial organization. (Previously numbered ECON 234.) PREREQUISITE: ECON 220F or consent of instructor.

261. Industrial Organization II (4)
This course covers theory and empirical applications in the
following areas of industrial organization: mergers, vertical integration, and innovation. Optional topics include network effects, technology adoption, and regulation. PREREQUISITE: ECON 220F or consent of instructor.

264. Experimental Economics (4)
Design and interpretation of controlled experiments us-
ing human subjects. (Previously numbered ECON 207.) PREREQUISITE: consent of instructor.
Education Abroad Program (EAP)

OFFICE: Programs Abroad Office in the International Center (corner of Gilman Drive and Library Walk) (858) 534-1123
http://programsabroad.ucsd.edu
E-mail: abroad@ucsd.edu

David Mares, Political Science, Faculty Director
Paula Levin, Education Studies, Associate Faculty Director
Lynne Anderson, Dean of International Education

Kimberly Burton, Director for Programs Abroad
Molly Ann McCarren, EAP Advisor
Marisa Alioto, EAP Advisor
Tonia Luo, EAP Advisor
Maribeth Erlich, EAP Advisor
Rachel Rigoli, EAP Advisor
Kathleen McLaren-Hawking, EAP Advisor
Kelly O’Sullivan, Academic Integration Officer
Christine Trinidad, Office Manager

The Education Abroad Program places students at the finest universities abroad. In most cases students take courses side by side with local students in a wide range of academic fields. In some programs EAP students pursue language study and take special courses designed for foreign students. In others, they pursue specialized studies in their major, take courses to add breadth to their general education, concentrate on language or area studies, and conduct research.

Each student is concurrently enrolled on the home campus of the University of California and at the host university. Full academic credit is received for courses satisfactorily completed. With advance planning and wise choice of courses abroad, most students can make normal progress toward completion of major, minor, and/or general-education requirements for their UCSD degree.

ACADEMIC PLANNING AND ADVISING

In order to make normal progress toward graduation, students should counsel in advance with departmental advisors and an academic advisor in their college provost's office in order to ascertain how participation will affect their academic program. Descriptions of individual courses currently approved for UC credit may be found in the Programs Abroad Resource Library and on the EAP Web site (http://eap.ucop.edu/coursefinder). Many of the same or similar courses will be available in future years, but students should plan programs that are sufficiently flexible to allow them to take alternate courses. Each year new courses taken by UC students are added to a center’s approved offerings. Although courses approved by the University of California carry full credit, each department retains the right to determine the extent to which it will accept specific courses to fulfill requirements for its own majors.

In order to facilitate the academic work of the students, University of California professors serve as directors and associate directors of the study centers. They work with their counterparts in the host university in developing the academic program and advise students on their course work. In addition, the directors are responsible for all aspects of student welfare and conduct.

COST, FINANCIAL AID, AND SCHOLARSHIPS

The regents endeavor to bring the program within the reach of all students, regardless of their financial resources. The cost of studying abroad is usually comparable to the cost of studying on a UC campus. The only additional costs directly related to the program are for round-trip transportation, on-site orientation, and personal expenses beyond what normally would be spent at home. Programs in some countries actually cost less than a comparable period of study at a UC campus.

Many forms of financial assistance are available to EAP students. Those already receiving UC financial aid maintain their eligibility for grants, loans, and scholarships while studying on EAP. Financial aid is based on the cost of studying at each EAP location and on individual need. Students who might not normally be eligible for financial aid may qualify for financial aid while studying abroad.

266. Economics of Natural Resources (4)
Theoretical and empirical issues in natural resource economics. (Previously numbered ECON 242.) PREREQUISITE: consent of instructor.

270. Finance—Core Asset Pricing (4)
Theoretical and empirical issues in finance. (Previously numbered ECON 214A.)

272. Finance—Theory and Testing of Intertemporal Asset Pricing Models (4)
Theoretical and empirical issues in finance. (Previously numbered ECON 214C.)

280. Computation (2)
Introduction to econometric computing. (S/U grades only.)

281. Special Topics in Economics (4)
Lecture course at an advanced level on a special topic. May be repeated for credit if topic differs. (Previously numbered ECON 267.) PREREQUISITE: consent of instructor.

282. Introduction to Research and Literature Review (4)
Introduction to research methods and the literature, including overviews of active research areas, formulation of research ideas, critical reviewing, and data sources. Students write a critical review of a body of literature including a proposal for an original research paper. PREREQUISITE: graduate standing.

285. Pre-Candidacy Presentation (2)
This course is a workshop in which students make formal presentations on the literature and on their own projects and receive input from other students and the instructor. PREREQUISITE: graduate standing.

291. Advanced Field Advising (4)
Controlled reading and discussion with advisor; literature survey. May be repeated for credit. (S/U grades only.)

296. Original Research Paper (1-12)
In this course, students are guided toward the formulation of an original research idea and the writing of an original paper. Students receive support and input through group discussion and also through interaction with the instructor. PREREQUISITE: graduate standing.

297. Independent Study (1-5)
(S/U grades only.)

299. Research in Economics for Dissertation (1-9)
(S/U grades only.)

500A-B-C. Teaching Methods in Economics (4-4-4)
The study and development of effective pedagogical materials and techniques in economics. Students who hold appointments as teaching assistants must enroll in this course, but it is open to other students as well. (S/U grades only.)

The program stimulates the intellectual development of the participants, broadening their general education, and giving a new depth to their particular academic interests. Many gain fluency in a language other than their own, and all grow in their ability to engage in independent study. Perhaps most valuable of all are increased self-understanding, clarified life purpose, and a broadening and deepening of personal values.

The University of California also hosts reciprocity students from more than one hundred institutions in approximately thirty countries. Reciprocal exchange students attend the University of California for up to one academic year on a no-fee-exchange, nondegree basis. Students on the Education Abroad Program earn degrees at their home university though they are enrolled at a university abroad. Undergraduate and graduate reciprocity students are nominated by partner institutions under the provisions of specific contractual agreements.

Purpose

The Education Abroad Program offers undergraduate (sophomores, juniors, and seniors) and graduate students opportunities to integrate into the academic and social life of select foreign universities while continuing to work in major fields of study or otherwise fulfilling UC requirements. EAP provides students access to distinguished academic programs that complement those of the UC campuses and where students can make normal progress toward their degrees at a cost as close as possible to that of education on a UC campus. EAP helps students acquire the knowledge, sensitivities, and skills necessary to function confidently and compete successfully in our global environment. The program stimulates the intellectual development of the participants, broadening their general education, and giving a new depth to their particular academic interests. Many gain fluency in a language other than their own, and all grow in their ability to engage in independent study. Perhaps most valuable of all are increased self-understanding, clarified life purpose, and a broadening and deepening of personal values.

The University of California also hosts reciprocity students from more than one hundred institutions in approximately thirty countries. Reciprocal exchange students attend the University of California for up to one academic year on a no-fee-exchange, nondegree basis. Students on the Education Abroad Program earn degrees at their home university though they are enrolled at a university abroad. Undergraduate and graduate reciprocity students are nominated by partner institutions under the provisions of specific contractual agreements.

The Education Abroad Program (EAP) has established study centers in Australia, Barbados, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, France, Germany, Ghana, Hong Kong (S.A.R.), Hungary, India, Ireland, Israel, Italy, Japan, Korea, Mexico, the Netherlands, New Zealand, the Philippines, Russia, Singapore, South Africa, Spain, Sweden, Taiwan, Thailand, Turkey, the United Kingdom, and Vietnam. EAP offers full-year and short-term programs in a wide range of academic disciplines. Please see the EAP Web site (http://eap.ucop.edu) for the most up-to-date information about all aspects of the program. Students may use the EAP Program Wizard (http://eap.ucop.edu/programwizard) to search for programs by country, specific areas of study, language of instruction, etc. EAP participants are eligible for financial aid and many scholarships. Other non-EAP study-abroad opportunities at UCSD are described at the end of this section.

The academic program

In order to make normal progress toward graduation, students should counsel in advance with departmental advisors and an academic advisor in their college provost’s office in order to ascertain how participation will affect their academic program. Descriptions of individual courses currently approved for UC credit may be found in the Programs Abroad Resource Library and on the EAP Web site (http://eap.ucop.edu/coursefinder). Many of the same or similar courses will be available in future years, but students should plan programs that are sufficiently flexible to allow them to take alternate courses. Each year new courses taken by UC students are added to a center’s approved offerings. Although courses approved by the University of California carry full credit, each department retains the right to determine the extent to which it will accept specific courses to fulfill requirements for its own majors.

In order to facilitate the academic work of the students, University of California professors serve as directors and associate directors of the study centers. They work with their counterparts in the host university in developing the academic program and advise students on their course work. In addition, the directors are responsible for all aspects of student welfare and conduct.

</table>
the period they are on EAP. In addition to UC financial aid, scholarships are also available from EAP, the Friends of the International Center, various campus offices and departments, and outside organizations. Annually, UCSD students access about $500,000 in special scholarships available only for study abroad. Information about these scholarships is available in the Programs Abroad Office and on the UCSD Financial Aid Web site (http://fao.ucsd.edu).

Prospective participants who require financial assistance should counsel with the Student Financial Services Office.

APPLICATIONS

Applications for admission to the Education Abroad Program are given to students following a discussion of various aspects of the program with an EAP advisor in the Programs Abroad Office. Information on deadlines and related matters such as course offerings, selection, schedules of departures, and payment of fees may be obtained from the Programs Abroad Office, and online at http://eap.ucop.edu and http://programsabroad.ucsd.edu.

It is not too early to begin planning for an experience abroad prior to or during one’s freshman year. Students are then able to take the language classes needed for certain programs, as well as plan which degree requirements to fulfill at UCSD and which to take abroad. Early planning also allows students to apply for the many programs now open to sophomores. General group information sessions about the programs are held during Welcome Week and in October and January. First Steps workshops are held throughout the year.

SELECTION

Undergraduate selection is generally open to students with the following qualifications: 3.0 cumulative grade-point average at the time of departure (some programs are available to students with at least a 2.0 GPA); at least sophomore or junior standing by time of departure, depending on the specific program; support of the UCSD EAP Selection Committee; and completion of university-level language courses when required (one, two, or three years, depending on the host institution) with a 3.0 grade-point average in language. Exceptions to these requirements can be made on a case-by-case basis, in consultation with the EAP advisor.

In addition to academic criteria for selection, the faculty committee looks for indications of the student’s seriousness of purpose, maturity, and capacity to adapt to the experience of study abroad. As part of the planning process, students are required to consult with their college academic and department advisors.

GRADUATE STUDENTS

Graduate students can be accommodated at most EAP-affiliated host universities. Graduate students may take courses, conduct research, and participate in short-term language programs for a semester or year. Students must meet EAP minimum requirements, including language prerequisites; have completed at least one year of graduate work; and have the support of their academic department and graduate dean.

TRANSFER STUDENTS

Transfer students from other colleges and universities are eligible for EAP. Applications may be submitted prior to their first quarter at UCSD if appropriate for the specific program. Please contact the Programs Abroad Office for further information.

SAFETY, STUDENT CONDUCT, AND PARENTAL APPROVAL

EAP considers student health and safety while abroad one of its top priorities. All participants in EAP are covered by a mandatory health insurance policy while abroad. While no one can guarantee student security either in the U.S. or abroad, the program makes every reasonable effort to assure a safe environment in its programs abroad, and to counsel students on potential risks and necessary precautions. In return, participants have a responsibility to pay careful attention to safety and health information provided in predeparture materials and at orientations in the U.S. and abroad.

It is anticipated that the students selected for the Education Abroad Program will be of high caliber, committed to profiting from both the intellectual and social aspects of the experience. Since they will be guests in another country and at another university, their conduct will reflect on both the University of California and the United States.

Participation in the program by students who are minors must be approved by their parents or guardians. In approving such participation, parents and guardians should be aware that a greater degree of personal freedom is afforded to students in the foreign university and that the University of California cannot take responsibility for closely supervising the activities of individual students. The directors and staff of the centers will be available to students with problems and will maintain contact with the student group as a whole. The university provides comprehensive medical and hospitalization coverage for all participants.

UCSD OPPORTUNITIES ABROAD PROGRAM

OFFICE: Programs Abroad Office in the International Center (corner of Gilman Drive and Library Walk) (858) 534-1123 http://programsabroad.ucsd.edu

David Mares, Political Science, Faculty Director
Paula Levin, Education Studies, Associate Faculty Director
Lynn Anderson, Dean of International Education
Kimberly Burton, Director of Programs Abroad
Jim Galvin, Director of Faculty-Led Programs Abroad
Jenny Garza, Coordinator of Faculty-Led Programs Abroad
Kelly O’Sullivan, Academic Integration Officer

UCSD Global Seminars are a pilot program of five-week study abroad experiences led by a UCSD professor. They are offered during the summer. Students will enroll in two courses for a total of eight UCSD units. Class sizes will be between fifteen and thirty students, so there will be excellent opportunities for interaction with some of the best professors at UCSD. All courses will be taught in English, but several programs will have some very basic, elementary language instruction to help students navigate the local community. The Programs Abroad Office will assist students with advising, application, financial aid, predeparture orientation, and reentry issues. Special study abroad scholarships are available. For more information, consult the UCSD Global Seminars section of the Programs Abroad Web site at: http://pao.ucsd.edu.

Education Studies

OFFICE: Pepper Canyon Hall, Third Floor University Center
http://eds.ucsd.edu
MINORS IN EDUCATION STUDIES

The Education Studies program offers three specific Minor programs. These minors are designed for students considering K–12 teaching as a career; those interested in teaching at the college level; and students who are interested in becoming better, more reflective learners. The Minor in Education Studies provides course work and field experience for students interested in elementary teaching, or for English, mathematics, science, or engineering students who decide to pursue teaching during their junior or senior years. The Mathematics and Science Education Minors explore teaching and learning practices specific to these disciplines along with the components of the knowledge base necessary to teach K–12 science and mathematics successfully. All courses for these minors must be taken for a letter grade except for EDS 39 and EDS 139. Depending on students’ majors and career plans, they may select from the following minor options:

- Minor in Education Studies
- Minor in Mathematics Education
- Minor in Science Education

Minor in Education Studies

Students must complete a minimum of one practicum course in Teaching and Learning (EDS 130, 134, 136, 138, 128AB, or 129ABC) and a minimum of one course from two of the remaining three categories of Learning Environments (EDS 114, 115, 118, 119), Language and Culture (EDS 117 or 125), or School and Society (EDS 126 or 125).

Students planning to apply for the UCSD graduate credential program must take specific courses in all four categories above (except for the Minor in Mathematics Education, and the Minor in Science Education). These two minors have their own specific courses, described below. Please contact EDS for specific minor courses that meet the prerequisite requirements for admission to the graduate credential program. The EDS minor requires a minimum of twelve units in EDS courses. A maximum of eight units of practicum (EDS 139) may be applied to this minor (total of twenty-eight quarter units).

Minor in Mathematics Education

- MATH 95. Introduction to Teaching Mathematics
- EDS 39. Practicum in Science and Mathematics Teaching/Learning
- EDS 117. Language, Culture and Education
- MATH 121A. Foundations of Teaching and Learning Mathematics I
- MATH 121B. Foundations of Teaching and Learning Mathematics II
- EDS 129A. Introduction to Teaching and Learning
- EDS 139. Practicum in Teaching/Learning
- EDS 129B. Introduction to Teaching and Learning
- EDS 139. Practicum in Teaching/Learning
- EDS 129C. Introduction to Teaching and Learning
- EDS 139. Practicum in Teaching/Learning (total of thirty-four quarter units)

Minor in Science Education

- CHEM 96. Introduction to Teaching Science
- EDS 39. Practicum in Science and Mathematics Teaching/Learning
- EDS 117. Language, Culture and Education
- CHEM 187. Teaching and Learning Science
- CHEM 188. Capstone Seminar in Science
- EDS 129A. Introduction to Teaching and Learning
- EDS 139. Practicum in Teaching/Learning
- EDS 129B. Introduction to Teaching and Learning
- EDS 139. Practicum in Teaching/Learning
- EDS 129C. Introduction to Teaching and Learning
- EDS 139. Practicum in Teaching/Learning (total of thirty-four quarter units)

Students interested in pursuing a graduate teaching credential program at UCSD should contact EDS for the specific prerequisite requirements.
for admission to the UCSD graduate credential program.

GRADUATE PROGRAMS

MASTER OF EDUCATION (M.Ed.)/CREDENTIAL PROGRAM

The M.Ed. articulates with the Preliminary Multiple Subject and Preliminary Single Subject credential programs. It is a rigorous fifteen- to twenty-four-month professional degree program designed specifically to prepare preservice elementary and secondary teachers earning their initial teaching credential at UCSD. This course of study allows candidates to earn a Preliminary California Teaching Credential and the M.Ed. degree from UCSD prior to entering the teaching profession. The program seeks applicants with strong subject matter preparation and clear career intentions.

M.Ed./Credential Admissions Process

The application deadline for the M.Ed./Credential programs is February 1. All applicants must apply online at http://eds.ucsd.edu.

Applicants interested in financial aid should complete the FAFSA application by March 2, and may contact Graduate Student Financial Services at (858) 534-3807.

Each applicant is carefully reviewed for admission by a committee. The selection committee ensures that applicants have completed the prerequisite course requirements for admission and evaluates each applicant on the basis of the following criteria:

A. A strong interest in multicultural approaches to education; a strong desire to improve the quality of American education; a strong desire to develop self-activated learners;

B. Experience working with children in educational environments, especially with students from diverse backgrounds;

C. Participation in public service activities;

D. Academic excellence in their undergraduate and graduate studies.

More information about the entire application process is available on the EDS Web site at http://eds.ucsd.edu.

M.Ed./PRELIMINARY MULTIPLE SUBJECT (ELEMENTARY) CREDENTIAL

Students working toward any major at UCSD may complete the prerequisite admission requirements and educational foundations courses while they are undergraduates for the M.Ed./Multiple Subject Credential Program.

Candidates who have already received a Bachelor of Arts or Science from any University of California campus, or an appropriate equivalent degree from another institution, must apply for graduate status as an M.Ed. Preliminary Multiple Subject Credential student.

Students applying for admission to the UCSD graduate credential program must contact EDS for information on the required prerequisite course requirements.

Examples of majors from other universities not eligible for application to the M.Ed./Multiple Subject Credential program include Business, Education, Liberal Studies, Marketing, and Recreation.

Prerequisite Requirements for the Multiple Subject Preliminary Credential

1. A 3.0 cumulative GPA is required from the institution awarding the bachelor's degree.

2. Subject Matter Competence: This requirement is satisfied by providing evidence of satisfactory completion of the California Subject Examinations for Teachers (CSET).

3. The California Basic Educational Skills Test (CBEST): Evidence of passing the CBEST (or CSET Writing Skills exam) satisfies this requirement.

4. U.S. Constitution requirement: This requirement is satisfied by either
   - Completion of a course covering the provisions and principles of the U.S. Constitution, or
   - Passage of an appropriate exam offered through the County Office of Education (Contact the EDS office for information.)

5. Sensitivity to second language learning: Applicants must demonstrate, through course work or equivalent experience, an informed sensitivity to the challenges of second language learning and acquisition. This can be fulfilled in one of three ways:
   - Completion of nine quarter units of college course work in a single language that is not the applicant's native language, or
   - Completion of three years of secondary school course work in a language other than English. The course work must be taken in grades 7 through 12, with at least a B average, or
   - Demonstration of an "equivalent experience" in a second language situation. Applicants who wish to satisfy this requirement by one of the three options listed below must submit an essay that describes the length and circumstances of the experience, including at least three specific examples of situations that helped you gain personal knowledge and appreciation of issues surrounding second language acquisition in a diverse cultural setting. The three equivalent experience options are:
     - The applicant has lived for prolonged period of time in a country where the language spoken was not native to the applicant, and where the applicant was continuously required to speak that second language (e.g., Peace Corps).
     - The applicant has had an extended experience immersed in a multilingual community in his/her native country.
   - The applicant was raised in a multilingual community.

6. Satisfactory scores on the Graduate Record Exam (GRE) General Test

7. Satisfactory completion of the education foundations prerequisites for the Multiple Subject Credential (contact EDS for the current prerequisite requirements).

8. Prerequisites for BCLAD (Bilingual Cross-cultural, Language and Academic Development) Emphasis in Spanish or American Sign Language options: These emphases are designed for students who have sufficient bilingual skills to effectively teach in English and either Spanish or American Sign Language. Students interested in applying for admission to the BCLAD program must demonstrate
   - Spanish or American Sign Language fluency: Spanish: Completion of two Spanish literature courses (Spanish/English BCLAD only), at least one of which must be upper-division in either Latin American or Chicano literature, and completion of the EDS Spanish Language Assessment, with an FSI score of at least 3 (scores of 3+ will be accepted, but students must receive a score of 3 prior to being recommended for the BCLAD credential). EDS coordinates these exams; please contact the program in January prior to your application to the credential program.
   - American Sign Language: At least one course on the language or culture of deaf people in the U.S. or intensive experience living among deaf people in the U.S.
   - History, Politics, and Theory of Bilingual Education: EDS 125 or ETHN 140.

9. A desire to teach in a bilingual setting.

NOTE: A grade of B– or higher is required for all BCLAD courses.

Multiple Subject Professional Preparation

The professional preparation component of the Preliminary Multiple Subject credential consists of twelve courses and fifteen weeks of student teaching in elementary school classrooms.

A typical student schedule for the Multiple Subject Professional Preparation Program is shown in Table 1:

EDUCATION STUDIES 239
M.Ed./PRELIMINARY SINGLE SUBJECT (SECONDARY) CREDENTIAL

UCSD Students working toward a Literature, Linguistics, Mathematics, Engineering, or any Science major may complete the prerequisite single subject credential requirements if they take specified courses for one of the EDS Minors while they are undergraduates. Contact EDS for the prerequisite requirements for admission to the UCSD graduate credential program.

Prerequisite Requirements for the Single Subject Preliminary Credential

1. Undergraduates working toward selected majors at UCSD may complete the foundation requirements for the Preliminary Single Subject Credential prior to completing their degree. Students must be working toward a major in the discipline corresponding to that of the desired credential:
   • English: any UCSD Literature or Linguistics major, or equivalent.
   • Mathematics: any UCSD Mathematics, Engineering, or Computer Science major, or equivalent.
   • Biology, Chemistry, Geosciences, or Physics: any UCSD Natural Science major, or equivalent.

2. Candidates, who have already received a literature, linguistics, mathematics, or science Bachelor of Arts or Science degree from any University of California campus, or an equivalent appropriate degree from another institution, must apply for graduate status as an M.Ed./Preliminary Single Subject credential student.

3. A 3.0 cumulative GPA is required from the institution awarding the bachelor’s degree.

4. Subject Matter Competence: This requirement is satisfied by either
   • Providing evidence of satisfactory completion of the appropriate sections of the California Subject Examinations for Teachers (CSET) or
   • Having completed the entire subject matter preparation program (for Math SS credential candidates only).

5. The California Basic Educational Skills Test (CBEST): Evidence of passing the CBEST satisfies this requirement.

6. U.S. Constitution requirement
   • Completion of a course covering the provisions and principles of the U.S. Constitution or
   • Passage of an appropriate exam offered through the County Office of Education (Contact the EDS office for information.)

7. Sensitivity to second language learning: Applicants must demonstrate, through course work or equivalent experience, an informed sensitivity to the challenges of second language learning and acquisition. This can be fulfilled in one of three ways:
   • Completion of nine quarter units of college course work in a single language that is not the applicant's native language or
   • Completion of three years of secondary school course work in a language other than English.

   The course work must be taken in grades 7 through 12, with at least a B average or
   • Demonstration of an “equivalent experience” in a second language situation. Applicants who wish to satisfy this requirement by one of the three options listed below must submit an essay that describes the length and circumstances of the experience, including at least three specific examples of situations that helped you gain personal knowledge and appreciation of issues surrounding second language acquisition in a diverse cultural setting. The three equivalent experience options are:
     • The applicant has lived for a prolonged period of time in a country where the language spoken was not native to the applicant, and where the applicant was continuously required to speak that second language (e.g., Peace Corps).
     • The applicant has had an extended experience immersed in a multilingual community in his/her native country.
     • The applicant was raised in a multilingual community.

8. Satisfactory scores on the Graduate Record Exam (GRE) General Test.

9. Satisfactory completion of the education foundations prerequisites for the Single Subject Credential (contact EDS for the current prerequisite requirements).

10. Prerequisites for BCLAD Emphasis in Spanish: This emphasis is designed for students who have sufficient bilingual skills to effectively teach in English and Spanish. Students interested in applying for admission to the BCLAD program must demonstrate
   • Spanish Language Fluency:
     • Completion of two Spanish literature courses, at least one of which must be upper-division in either Latin American or Chicano literature, and
     • Completion of the EDS Spanish Assessment, with an FSI score of at least 3 (Scores of 3– will be accepted, but student must receive a score of 3 prior to being recommended for the BCLAD credential.)

   EDS coordinates these exams; please contact the program in January prior to application to the credential program.
   • Cultural Knowledge: One history course and one culture course covering Chicano or Latin American-related topics.
   • History, Politics, and Theory of Bilingual Education: EDS 125 or ETHN 140.

11. A desire to teach in a bilingual setting.

   NOTE: A grade of B- or higher is required for all BCLAD courses.

Single Subject Professional Preparation

Students engage in an intensive program of professional preparation, including five teaching methods courses in the summer prior to the internship, and seminars offered throughout the academic year that address classroom management techniques and strategies for dealing with individual teaching situations.

Students admitted to the M.Ed./Preliminary Single Subject Credential Program are eligible to be interviewed in the summer for a paid internship in a local middle or high school for the following school year. Availability of internship positions is not guaranteed, though EDS attempts to facilitate internship positions for all Single Subject students. Students who do not receive an internship position will do their practicum as student teachers instead. Interns are responsible for teaching classes in their subject area under the guidance of an EDS supervisor and an on-site support provider. Interns are typically hired as part-time teachers and receive a salary from the school district commensurate with the number of sections taught.

A typical student schedule for the Preliminary Single Subject Professional Preparation Program is shown in Table 2.

THE MASTER OF ARTS IN TEACHING AND LEARNING: CURRICULUM DESIGN

The M.A. in Teaching and Learning (Curriculum Design) offers professional educators in elementary and secondary schools an extensive overview of principles of educational research and curriculum design.

A key feature of the M.A. program is the integration of research and practice. M.A. students remain full-time teachers for the duration of the program. They design, implement, and evaluate curricular innovations in their own classrooms. The culmination of the M.A. work is a thesis describing the rationale, development, and effectiveness of these innovations.

Examples of M.A. Research Projects

The topics of the M.A. theses in past years are varied, and have included: multimedia approaches to secondary biology and chemistry instruction; writing revision among emergent writers; building partnerships between families and schools; activities which link home and school experiences in the content areas of reading and writing, mathematics, science, and social studies; improved integration of curriculum and assessment; motivation and art; using technology for mathematics and geography teaching; and embedding ESL in native-language instruction.
The M.A. Course of Study (Teaching and Learning: Emphasis in Curriculum Design)

The M.A. program requirements consist of forty quarter units of course work, including the master's thesis. Courses are usually offered for four quarter units of credit, and are typically offered one night per week, from 5:00–8:00 p.m. Core course work comprises twenty-eight units, with the remaining twelve units consisting of elective course work. A typical program consists of

**CORE M.A. COURSE WORK**

First Summer (mid-June to late August)
- EDS 231. Advanced Instructional Practices or EDS 232. Special Topics in Education (offered alternating summers)
- EDS 229. Introduction to Educational Resources

Fall, Winter, and Spring
- EDS 230A-B-C. Research in Curriculum Design
- EDS 233A-B. Topics in Education Research and Design
- EDS 290. Research Practicum

Second Summer (mid-June to late August)
- EDS 231. Advanced Instructional Practices or EDS 232. Special Topics in Education (offered alternating summers)
- EDS 295. M.A. Thesis
- Completion of M.A. thesis writing

**Admission Requirements**

Admission to the M.A. program in teaching and learning at UCSD is competitive. Factors considered by the selection committee include:
- Teaching experience
- Professional development activities
- Experience and interest in curriculum design
- Academic record

Admission to graduate standing at UCSD requires a minimum cumulative GPA of 3.0 for any prior graduate work, and for the bachelor's degree. Official scores from the GRE verbal, analytic, and quantitative sections are also required. The application deadline is February 1.

**THE MASTER OF ARTS IN TEACHING AND LEARNING: BILINGUAL EDUCATION (ASL-ENGLISH)**

Education Studies (EDS) at UCSD offers a master of arts in teaching and learning: bilingual education emphasis (ASL-English) and the California Deaf and Hard-of-Hearing Specialist Teaching Credential and the Preliminary Multiple Subject Teaching Credential with BCLAD emphasis for elementary school teachers. This program of study includes extensive practicum experience combined with the latest research and innovation in bilingual education and deaf education. Students in the program participate in research and development on the leading edge of bilingual, multicultural education for deaf and hard-of-hearing children.

In keeping with its aim of training teachers who will be able to meet the needs of deaf and hard-of-hearing children from various language and cultural backgrounds, EDS requires fluency in ASL for acceptance into the program. EDS's teacher training program is designed to prepare teachers to work in various types of school settings from residential school classrooms to local public school classrooms for deaf and hard-of-hearing children. EDS recognizes that deaf and hard-of-hearing children need teachers who are bilingual and knowledgeable about the role of culture in human development.

**Prerequisite Course Requirements**

Prior to admittance to the credential and master's study, foundation students (or UCSD undergraduates pursuing the minor in education studies) complete the following five courses offered during the first summer. UCSD students can complete these prerequisites as part of the Minor in Education Studies. Contact EDS for more information on the graduate credential prerequisite requirements:
- EDS 128A-B. Introduction to Teaching and Learning (Elementary)
- EDS 115. Cognitive Development and Education
- EDS 117. Language, Culture, and Education
- EDS 125. History, Politics, and Theory of Bilingual Education

**Program of Study for the Deaf and Hard-of-Hearing Specialist Credential, the Preliminary Multiple Subject Teaching Credential with BCLAD Emphasis, and the Master of Arts in Teaching and Learning.**

After completion of the prerequisite component, students complete a program of study resulting in the California Deaf and Hard-of-Hearing Specialist Credential at the elementary level. Students also qualify for the Preliminary Multiple Subject (BCLAD) credential.

This program of study consists of courses in bilingual education theory, methods, and applications to deaf education in addition to intensive classroom practice. During the second year of study the focus is on designing, implementing, and evaluating a research-based project. This integration of research and practice is central to the goal of the M.A. program to develop teachers as researchers.

A typical program of study includes the following:

**YEARS 1-2**

**YEARS 1**
- Fall
  - COHI 124. Voice. Deaf People in America
  - EDS 342A. ASL-English Bilingual Education Practices
  - EDS 361A. Innovative Instructional Practices
  - EDS 390. Research Practicum (four units)
  - EDS 203. Technology, Teaching, and Learning
  - EDS 201. Introduction to Resources for Teaching

**YEARS 2**
- Fall
  - EDS 351. Teaching the English Language Learner
  - EDS 240A. Research in ASL-English Bilingual Education, and
  - EDS 241. Advanced Topics in Deaf Education

- Winter
  - EDS 233A. Topics in Education Research and Design
  - EDS 240B. Research in ASL-English Bilingual Education, and
  - EDS 290. Research Practicum

- Spring
  - EDS 349. Education Specialist Student Teaching
  - EDS 240C. Research in ASL-English Bilingual Education

- Summer
  - EDS 295. M.A. Thesis

**Admission Requirements**

Candidates will apply for graduate admission to the foundation component of this program. Upon satisfactory completion of the prerequisite component, students will advance to the professional/master's component, which requires two years of study. The following are the minimum eligibility requirements for admission to the graduate prerequisite component. Applications are available beginning in January. The application deadline is March 1.

1. A bachelor's degree with a 3.0 cumulative GPA
2. Official Graduate Record Exam (GRE) scores
3. Subject matter competence (CSET)
4. The California Basic Educational Skills Test (CBEST)
5. Completion of a course including the provisions and principles of the U.S. Constitution, or passage of the appropriate exam
6. Official Graduate Application and fee
7. Statement of Purpose and reference letters
8. Fluency in American Sign Language
9. Knowledge and experience of the social and cultural life of deaf people
10. A desire to teach deaf children of varying language and cultural backgrounds
11. Admission to graduate standing at UCSD requires a minimum cumulative GPA of 3.0 for any prior graduate work, and for the bachelor’s degree. Official scores from the GRE verbal, analytic, and quantitative sections are also required.

DOCTOR OF EDUCATION (Ed.D.) IN TEACHING AND LEARNING

Education Studies at UCSD offers a Doctor of Education (Ed.D.) degree in Teaching and Learning. This cohort-based four-year doctorate is designed to enable professional educators to participate in a research-based program while working in an educational setting. The Ed.D. course of study provides a research perspective on educational reform, with the expectation of developing regional leadership for K–12 and postsecondary teaching and learning. With its rich tradition of research and technological innovation, UCSD is uniquely positioned in the region to provide the research expertise for this program.

The Doctor of Education in Teaching and Learning program provides professional educators with the knowledge and skills to serve as faculty of pre-service teacher education and leaders of professional development for practicing teachers. Students take courses which address the topics of school reform and educational equity; learning and educational technology; curriculum research and theory; qualitative and quantitative research methods; cognition and learning theory; the social organization of schooling; language and culture; and research on teaching and learning.

The following is a typical course of study:

YEAR 1

Summer
- EDS 229. Introduction to Educational Resources
- EDS 231. Advanced Instructional Practices, or EDS 232. Special Topics in Education (offered alternating summers)

Fall-Winter-Spring
- EDS 230A-B-C. Research in Curriculum Design

Summer
- EDS 295. M.A. Thesis
- EDS 231. Advanced Instructional Practices, or EDS 232. Special Topics in Education (offered alternating summers)

YEAR 2

Fall
- EDS 260A. Educational Research and Evaluation Design
- EDS 270. Leadership and Equity in Educational Reform

Winter
- EDS 260B. Educational Research and Evaluation Design
- Elective Graduate Seminar

Spring
- EDS 260C. Educational Research and Evaluation Design
- Elective Graduate Seminar

YEAR 3

Fall-Winter-Spring
- EDS 261A-B-C. Advanced Research and Evaluation Methods
- Elective Graduate Seminar

YEAR 4

Fall-Winter-Spring
- EDS 262A-B-C. Dissertation Writing Seminar
- EDS 299. Dissertation Research

 Admission Requirements
See the EDS Web site for current admission requirements. The application deadline is February 1.

DOCTOR OF EDUCATION (Ed.D.) IN EDUCATIONAL LEADERSHIP

The Doctor of Education in Educational Leadership is offered through a partnership between UCSD and California State University, San Marcos (CSUSM). The program is designed as a professional degree for P-12 and postsecondary educators who will develop advanced leadership and research skills related to their own institutional settings. Students are typically mid-career working professional educators who attend classes on weeknights and weekends over a thirty-six-month period. Students take courses designed to develop four specific leadership capacities: (1) leadership for learning; (2) leadership for a diverse society; (3) leadership for organizational change; and (4) leadership for organizational development. This program prepares leaders for culturally, linguistically, and economically diverse educational settings. Students will conduct research on professional practice within their own institutions, addressing specific local problems that have national implications for teaching and learning, school reform, and professional development. Students completing the program will receive a joint degree from UCSD and CSUSM.

The following is a typical course of study taught by UCSD and CSUSM faculty:
COURSES
For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

The Education Studies Program offers the following courses. Students are encouraged to consult with an EDS advisor to determine which courses satisfy credential requirements. Undergraduate students may enroll in graduate seminars with the consent of instructor.

LOWER-DIVISION
EDS 20. Introduction to Principles of Learning (4) Students will study discipline-specific principles of effective learning, including critical thinking, problem solving, collaboration and group communication, laboratory and hypothesis testing, library research and writing skills, and self-assessment. Students will explore concepts and procedures in mathematics, science, and economics as the context for making explicit these often-tacit principles of learning. PREREQUISITE: Summer Bridge participation. Available to undergraduate students on a space-available basis.

EDS 30/Math. 95. Introduction to Math Teaching (2) Revisit students’ learning difficulties in mathematics in more depth to prepare students to make meaningful observations of how K-12 teachers deal with these difficulties. Explore how instruction can use students’ knowledge to pose problems that stimulate students’ intellectual curiosity. PREREQUISITE: Math. 87. Teaching Math and Science: The Challenge. Available to undergraduate students on a space-available basis.

EDS 31 Chem. 96. Introduction to Teaching Science (2) Revisit students’ learning difficulties in science in more depth to prepare students to make meaningful observations of how K-12 teachers deal with these difficulties. Explore how instruction can use students’ knowledge to pose problems that stimulate students’ intellectual curiosity. PREREQUISITE: Math. 87. Teaching Math and Science: The Challenge. Available to undergraduate students on a space-available basis.

EDS 39. Practicum in Science and Math Teaching/Learning (2) Undergraduate students are placed in local schools and work with children in classrooms and the community. Students work on educational activities with K-12 students. A minimum of 20 hours/quarter. PREREQUISITES: department stamp; concurrent enrollment in either Math 87: Teaching Math; The Challenge, or Chem. 87: Teaching Science: The Challenge.

EDS 87. Freshman Seminar (1) The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small-seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students; with preference given to entering freshmen. Seminars are open to sophomores, juniors, and seniors on a space-available basis.

UPPER-DIVISION
EDS 105. Teaching and Learning Physics (4) (Same as PHYS 180.) A course on how people learn and understand key concepts in Newtonian mechanics. Reading in physics and cognitive science plus fieldwork teaching and evaluating K-12 students. Useful for students interested in teaching. PREREQUISITES: three quarters of lower-division physics.

EDS 114. Cognitive Development and Interactive Computing Environments (4) Learning and development considered as an evolving interplay between “internal representations” and “external representations” of the world, with special attention devoted to the design, history, and educational implications of computer-based tools and learning environments. PREREQUISITE: upper-division standing.

EDS 115. Cognitive Development and Education (4) This course examines the development of thinking and learning in preschool and elementary school children, with implications for education. Examples include facilitating children’s learning, and individual differences in cognition. Examples of topics covered are word learning, mathemathical knowledge, and scientific thinking. Letter grade only.

EDS 116. The Psychology of Teaching and Structures of Information for Human Learning (4) College students tutoring college students. Curriculum: basic applied learning principles, specifying objectives, planning and designing instruction, testing, evaluation, interpersonal communication skills, study skills. Objectives will be specified for each area. Competency will be assessed by project completion and practicum feedback. This course is not creditable toward professional preparation requirements for the multiple subject credential. PREREQUISITE: departmental approval (consent of instructor)—department stamp restricted.

EDS 117. Language, Culture, and Education (4) (Same as Soc/C 117) The mutual influence of language, culture, and education. Explanations of students’ school success and failure that employ linguistic and cultural variables, bilingualism, and cultural transmission through education are explored. PREREQUISITE: upper-division standing.

EDS 118. Adolescent Development and Education (4) This course introduces prospective secondary teachers to the cognitive, social, and emotional development of adolescents, including developmental learning theory, the teaching/learning process, effective learning environments, and cross-cultural variation in development. Implications for classroom practice are drawn.

EDS/LIGN 119. First and Second Language Learning: From Childhood through Adolescence (4) An examination of how human language learning ability develops and changes over the first two decades of life, including discussion of factors that may affect this ability. PREREQUISITE: upper-division standing or consent of instructor.

EDS 121A/Math. 121A. Foundations of Teaching and Learning Mathematics I (4) Develop teachers’ knowledge base (knowledge of mathematics content, pedagogy, and student learning) in the context of advanced mathematics. This course builds on the previous courses where these components of knowledge were addressed exclusively in the context of high-school mathematics. PREREQUISITES: EDS 30/Math. 95, and Calculus 10C or 20C.

EDS 121B/Math. 121B. Foundations of Teaching and Learning Mathematics II (4) Examine how learning theories can consolidate observations about conceptual development with the individual student as well as the development of knowledge in the history of mathematics. Examine how teaching theories explain the effect of teaching approaches addressed in the previous courses. PREREQUISITE: EDS 121A/Math. 121A.

EDS 122/Chem. 187. Foundations of Teaching and Learning Science (4) Examine theories of learning and how they are important in the science classroom. Conceptual development in the individual student, as well as the development of knowledge in the history of science. Key conceptual obstacles in science will be explored. PREREQUISITES: EDS 31/Chem. 87: Introduction to Teaching Science, Chemistry 6C.

EDS 123/Chem. 188. Capstone Seminar in Science Education (4) In the lecture and observation format, students continue to explore the etiories of learning in the science classroom. Conceptual development is fostered, as well as continued development of knowledge of science history. Students are exposed to the science of teaching science in actual practice. PREREQUISITE: EDS 122/Chem. 187.

COHI 124. Voice: Deaf People in America (4) The relationship between small groups and dominant culture is studied by exploring the world of deaf people who have for the past twenty years begun to speak as a cultural group. Issues of language, communication, self-representation, and social structure are examined. PREREQUISITE: Com/HIP 100 or consent of the instructor.

EDS 125. History, Politics, and Theory of Bilingual Education (4) This course provides a historical overview and models of bilingual education in the United States. Students will examine socio-cultural, theoretical, and policy issues associated with native language and second-language instruction, and legal requirements for public bilingual program.

EDS 126. Social Organization of Education (4) (Same as Soc/C 126) The social organization of education in the U.S. and other societies; the functions of education for individuals and society; the structure of schools; educational decision-making; educational testing; socialization and education; formal and informal education; cultural transmission. PREREQUISITE: upper-division standing.

EDS 127A-B-C. Practicum in Interactive Computing (4-4-4) The course focuses on interactive computing in teaching/learning. Course work concentrates on interactive computing, application to teaching, learning, bilingualism, and communication. Concurrent with course work, students are assigned to a school or community field site implementing interactive computing. Students will write research reports integrating course work and field experience. (F,W,S)

EDS 128 A-B. Introduction to Teaching and Learning (Elementary) (4-4) This course series is for undergraduates who are exploring a career in elementary school teaching. Topics addressed include: theories of teaching and learning; research on cognition and motivation; and the cultural context of classroom teaching and learning. EDS 128A focuses on the teacher in the teaching/learning environment and EDS 128B focuses on the teacher in the teaching/learning interaction. PREREQUISITES: department stamp required. EDS 139 must be taken as corequisite. EDS 130 or 134 must be completed before EDS 128A, and 128A for 128B. EDS 128A and EDS 128B are restricted for students applying to the EDS M.Ed/ Multiple Subject Credential Program.

EDUCATION STUDIES 243
EDS 129 A-B-C. Introduction to Teaching and Learning (Secondary) (4-4-4)
This course series is for undergraduates who are exploring a career in secondary education. Topics addressed include: theories of teaching and learning processes and motivation for science, mathematics, and English instruction. EDS 129A focuses on the analysis of the needs of individual learners and small group instruction techniques; EDS 129B emphasizes the roles of the classroom teacher and planning individual lessons; and EDS 129C emphasizes the assessment of student work and longer-range curriculum planning. PREREQUISITES: department stamp; EDS 139 must be taken as corequisite. Must have successfully completed EDS 136, 138, or 129A for 129B, and 129B for 129C. EDS 129B and 129C are restricted for students applying to the EDS M.Ed./Single Subject Credential Program.

EDS 130. Introduction to Academic Mentoring of Elementary/School Students (4)
This course focuses on the role of undergraduate mentors in raising academic expectations for students and families traditionally underrepresented at the university. The relationship between the school and community, the social and political organization of elementary schools, and the academic achievement of elementary children are examined. PREREQUISITES: department stamp required; EDS 139 must be taken as a corequisite.

EDS 131. Introduction to Early Childhood Education (4)
Course examines effective practices for literacy, numeracy, and social-emotional development in early childhood education. Field experience and seminar focus on social relationships between the UCSD student, the teacher and children, developmentally appropriate teaching and learning processes in literacy and numeracy, and community service. PREREQUISITES: department stamp; EDS 139 must be taken as a corequisite.

EDS 134. Introduction to Literacy and Numeracy Tutoring (4)
This course examines effective practices for language arts and mathematics learning for elementary school children. Field experience and seminars focus on the tutor/student relationship, teaching and learning processes for literacy and numeracy, and community service. PREREQUISITES: department stamp required; EDS 139 must be taken as a corequisite.

EDS 136. Introduction to Academic Tutoring of Secondary School Students (4)
This course focuses on the role of undergraduate tutors in building academic resiliency in secondary students traditionally underrepresented at the university. The relationship between the school and community, the social and political organization of secondary schools, the philosophical, sociological, and political issues which relate to the U.S. secondary educational system, and the academic achievement of secondary children are examined. PREREQUISITES: department stamp required; EDS 139 must be taken as a corequisite.

EDS 137. Introduction to Discipline-Specific Teaching and Learning (4)
This course examines effective practices for teaching and learning in specific academic content areas in PreK–12 school or community settings. The field experience and seminar focus on relationship building between mentors and learners, discipline-relevant teaching and learning processes, and community service. PREREQUISITES: EDS 139 must be taken as a corequisite.

EDS 138. Introduction to Academic Tutoring at the Preuss School (4)
This course focuses on effects of the Charter School movement on public education in the U.S., the role of the research universities in K–12 education, the social and political organization of the schools, the philosophical, sociological, and political issues which relate to the U.S. secondary educational system, and the academic achievement of secondary children. Students investigate the role of undergraduate tutors in building academic resiliency in secondary students traditionally underrepresented at the university. PREREQUISITES: department stamp required; EDS 139 must be taken as a corequisite.

EDS 139. Practicum in Teaching/Learning (2)
Students are placed in local schools and work with students in classrooms and the community. Students work on education, effecting learning in a minimum of 120 hours/week. PREREQUISITES: department stamp required; one of the following courses (may be taken concurrently) EDS 109, or EDS 127A-B-C, or EDS 128A-B, or 129A-B-C, or 130, or 134, or 136, or 138.

EDS 190. Research Practicum (1-6)
Supervised research with individual topics selected according to students' special interests. Students will develop a research proposal and begin to gather and analyze data. PREREQUISITE: consent of instructor. (F,WS)

EDS 195. Apprentice Teaching (2-4)
Advanced EDS students are prepared in effective methods of supervising the preparation of UCSD students serving as paraprofessionals in K-12 classrooms. Topics covered include: classroom management, interpersonal relations, supervision techniques, multi-cultural and multi-lingual education, politics in the school, and curriculum development. Each student serves as a discussion leader and conducts at least two workshops. PREREQUISITES: department stamp required and TE79 or TE80 major code.

EDS 198. Directed Group Study (4-2)
Directed group study, guided reading, and study involving research and analysis of activities and services in multicultural education, bilingual education, the teaching-learning process in elementary classrooms that are not covered by the present curriculum. PREREQUISITE: consent of instructor.

EDS 199. Special Studies (4)
Individual guided reading and study involving research and analysis of activities and services in multicultural education, bilingual education, the teaching-learning process, and other areas that are not covered by the present curriculum. PREREQUISITE: consent of instructor.

EDS 342A. ASL-English Bilingual Education Practices (4)
Students will examine the history, current theory, philosophy, legislation, and trends in deaf education. Methods of first- and second-language development, communication, and literacy skills for deaf and hard-of-hearing children will be introduced. PREREQUISITES: EDS 115, EDS 117, EDS 126, EDS 128A, EDS 128B. Must be an EDS76 major. (F)

EDS 342B. ASL-English Bilingual Education Practices (2)
Students will investigate formal and informal assessment techniques used for deaf and hard-of-hearing children. bilingual/multicultural education practices across the curriculum, effects of students’ special interests. The field experience provides professional preparation and diversified teaching responsibilities for post-baccalaureate students pursuing the California Deaf and Hard of Hearing Specialist and BCLAD Credential. PREREQUISITE: must be an EDS76 major.

EDS 349. Deaf Education Specialist Student Teaching Practicum (9)
Education specialist credential candidates perform student teaching in participating schools for a minimum of seven weeks full-time under the supervision of a cooperating teacher and university supervisor. The field experience provides professional preparation and diversified teaching responsibilities for post-baccalaureate students pursuing the California Deaf and Hard of Hearing Specialist and BCLAD Credential. PREREQUISITE: must be an EDS76 major.

EDS 351. Teaching the English Language Learner (4)
Students will examine the principles of second language acquisition and approaches to bilingual education. They will develop a repertoire of strategies for teaching in elementary or secondary content areas. PREREQUISITE: EDS76 or EDS78 major: Elementary Multiple Subject or Single Subject candidates at UCSD who have advanced to student teaching or internship. (F)

EDS 352A. Bilingual Instructional Practices I (2)
First course in a two-course sequence. Provides a theoretical and practical grounding in various pedagogical techniques for teaching Spanish as a native language. Students will study native language methods, strategies and approaches, assessment materials, and techniques of transition for implementing curricula across disciplines in a bilingual classroom. PREREQUISITE: EDS78 major.

EDS 352B. Bilingual Instructional Practices II (2)
Second course in the sequence. Provides a theoretical and practical grounding in various pedagogical techniques for teaching Spanish as a native language. Students will study native language methods, strategies and approaches, assessment materials, and techniques of transition for implementing curricula across disciplines in a bilingual classroom. PREREQUISITES: EDS 352A, and student must be an EDS78 major.

EDS 355A. Advanced Mathematics Teaching Practices for Grades K-6 (2)
First course in a three-course sequence. Provides a theoretical and practical grounding in pedagogy and professional factors influencing high-quality elementary mathematics education. Students will review research literature and various content standards, assessment materials, and curriculum materials in preparation for specialized mathematics instruction in elementary classrooms. PREREQUISITES: admission into the EDS78: Multiple Subject (MS-2 program), and concurrent enrollment in EDS 361A or consent of instructor.

EDS 355B. Advanced Mathematics Teaching Practices for Grades K-6 (2)
Second course in the sequence. Provides a theoretical and practical grounding in pedagogy and professional factors influencing high-quality elementary mathematics education. Students will review research literature and various content standards, assessment materials, and curriculum materials in preparation for specialized mathematics instruction in elementary classrooms. EDS 355A, admission into the EDS85: Multiple Subject (MS-2 program), and concurrent enrollment in EDS 361B or consent of instructor.

EDS 355C. Advanced Mathematics Teaching Practices for Grades K-6 (2)
Third course in the series, which provides a theoretical and practical grounding in pedagogy and professional factors influencing high-quality elementary mathematics education. Students will review research literature and various content standards, assessment materials, and curriculum materials in preparation for specialized mathematics instruction in elementary classrooms. PREREQUISITES: EDS 355B, admission into the EDS85: Multiple Subject (MS-2 program), and concurrent enrollment in EDS 361C or consent of instructor.

EDS 361A. Innovative Instructional Practices I (6)
First course in a three-course sequence. It provides pedagogical methods for multiple-subject teaching. Diverse subject areas (math, science, fine arts, P.E., and social studies) are integrated into a single intercurricular course of study by emphasizing activity/inquiry techniques of instruction. PREREQUISITE: must be an EDS76 major. Teaching and Learning Bilingual Education (ASL-English) or EDS78 major only for Elementary Multiple Subject candidate who has advanced to student teaching. (F)

EDS 361B. Innovative Instructional Practices II (6)
Second course in three-course sequence. It provides pedagogical methods for multiple subject teaching. Diverse subject areas (language arts, English language development, health education, mathematics, sciences, social studies, fine arts, and physical education) are integrated into a single intercurricular course of study by emphasizing activity/inquiry techniques of instruction. PREREQUISITES: EDS 361A, EDS76 major: Teaching and Learning Bilingual Education (ASL-English) or EDS78 major only for Elementary Multiple Subject candidate who has advanced to student teaching.
EDS 361C. Innovative Instructional Practices III (4)
Last course in a three course sequence. It provides peda-
gogical methods for multiple subject teaching. General
teaching methods are integrated into a single interdis-
curricular course of study by emphasizing activity/inquiry
inquiry techniques of instruction. PREREQUISITES: EDS 361B,
ED76 major: Teaching and Learning Bilingual Education
(ASL-English) or ED74 major only for Elementary Multiple
Subject candidates who have advanced to student teaching.

EDS 369A. Multiple Subject (Elementary)
Student Teaching Practicum I-III (9)
First course in a series. The elementary credential candidate
performs student teaching in participating schools for
seven to eight weeks full-time for each course (fifteen
weeks total) under the supervision of a cooperating teacher
and university supervisor. The student teaching experience
experiences the development of professional responsibilities
and diversified teaching responsibilities for post-baccalaureate students
pursuing the California Multiple Subject Teaching Credential.
PREREQUISITES: ED78 major for Elementary Multiple
Subject only. Affirmed Multiple Subject Credential can-
didate at UCSD who has advanced to student teaching.

EDS 369B. Multiple Subject (Elementary)
Student Teaching Practicum II (9)
Second course in a two-course series. The elementary
credential candidate performs student teaching in par-
ticipating schools for seven to eight weeks full-time for
each course (fifteen weeks total) under the supervision of a cooperating teacher
and university supervisor. The student teaching experience offers professional prepa-
ration and diversified teaching responsibilities for post-
baccalaureate students pursuing the California Multiple Subject Teaching Credential.
PREREQUISITES: ED 269A, ED78 major for Elementary Multiple Subjects only. Affirmed
Multiple Subject Credential candidate at UCSD who has
advanced to student teaching.

EDS 373. Secondary English Teaching Practices (4)
The course introduces prospective secondary teachers to
principles and strategies of teaching English language
arts. Topics include: writing processes, reading processes,
integrated language arts, assessment, the second language
learning theory, the California English Language Arts Framework. PREREQUISITES: ED78
Single Subject major only. Affirmed Single Subject candidate
at UCSD who has advanced to internship or consent of
instructor.

EDS 374. Secondary Mathematics Teaching
Practices (4)
Mathematics teaching techniques including, curriculum
design, California Model Curriculum Standards, instruc-
tional methods, computer applications, selection and
use of textbooks, student assessment, lesson planning,
and classroom management. Professional matters includ-
ing curriculum planning, professional organizations,
para-professionals, professional ethics, education law,
and parent involvement are addressed. PREREQUISITES:
ED78 Single Subject major only. Affirmed Single Subject
candidate at UCSD who has advanced to internship or consent of
instructor.

Science teaching techniques, including science cur-
riculum design, California Model Curriculum Standards,
instructional methods, computer applications, selection and
use of textbooks, student assessment, lesson plan-
ning, and classroom organization. Professional matters includ-
ing curriculum planning, professional organizations,
para-professionals, professional ethics, education law,
and parent involvement are addressed. PREREQUISITES:
ED78 Single Subject major only. Affirmed Single Subject
candidate at UCSD who has advanced to internship or consent of
instructor.

EDS 376. Language and Learning Instruction (4)
This course satisfies the California Commission on Teacher
Credentialing requirement for preparation in reading
theory and methods for all credential candidates. Theories
of reading development, integration of the language
arts, reading and writing in the content areas, teaching
methods, and literature. PREREQUISITE: ED78 Elementary
Multiple Subject or Single Subject candidates at UCSD who have
advanced to student teaching or internship.

EDS 379A. Single Subject (Secondary)
Internship Practicum I (8)
The secondary credential candidate teaches approximately
one semester of each course in this series (one public
school academic year) under the guidance of a university supervisor with additional support provided by
an on-site teacher. The internship offers extensive profes-
sional preparation and diversified teaching experience
under actual classroom conditions. Professional
requirements for post-baccalaureate students pursuing
the California Single Subject Teaching Credential.
PREREQUISITES: ED78 Single Subject major only.
Affirmed Single Subject candidate at UCSD who has
advanced to internship or consent of instructor.

EDS 379B. Single Subject (Secondary)
Internship Practicum II (8)
Second course in the series. The secondary credential
candidate teaches approximately one academic quarter for
each course in this series (one public school academic year)
under the guidance of a university supervisor with additional support provided by an on-site teacher.
The internship offers extensive professional preparation and diversified teaching experience under actual classroom
conditions for post-baccalaureate students pursuing
the California Single Subject Teaching Credential.
PREREQUISITES: EDS 379A. ED78 Single Subject major
only. Affirmed Single Subject candidate at UCSD who has
advanced to internship.

EDS 379C. Single Subject (Secondary)
Internship Practicum III (8)
Third course in the series. The secondary credential candi-
date teaches approximately one academic quarter for each
quarter (one public school academic year) under the guidance of a university supervisor with additional support provided
by an on-site teacher. The internship offers extensive professional preparation and diversified teaching experience under actual classroom conditions for post-baccalaureate students pursuing the California Single Subject Teaching Credential.
PREREQUISITES: ED 379B. ED78 Single Subject major
only. Affirmed Single Subject candidate at UCSD who has
advanced to internship.

EDS 381. Health Education (4)
This course satisfies the Commission on Teacher
Credentialing requirement for Health Education. Topics
include: physical education, substance abuse, sex edu-
cation, cardio-pulmonary resuscitation, nutrition, and first aid.
PREREQUISITE: ED78 major: Elementary Multiple Subject or Single Subject candidates at UCSD who have advanced to student teaching or internship.

EDS 382. Inclusive Educational Practices (4)
This course satisfies the Commission on Teacher
Credentialing requirements for Special Education. Topics
include: teaching methods for accommodating special-
needs students in the regular classroom, diverse learning
styles, Individual Education Plan, characteristics of special-needs
students, lesson planning to accommodate individual dif-
fferences, and legislated mandates. PREREQUISITE: EDS 78 or
ED 81 major: Elementary Multiple Subject or Single Subject candidates at UCSD who have advanced to student teaching or internship.

EDS 385. Elementary School Mathematics
Content and Pedagogy (4)
Examines the underlying mathematical concepts of the
elementary school mathematics curriculum and related
pedagogical implications for teaching. Topics include
number sense, numeration, geometry, and data
analysis and collection. PREREQUISITES: must be
ED 78 majors: M.Ed./Elementary-Multiple Subject Credential candidates who have advanced to student teaching or internship. (MS-2).

EDS 390. Graduate Research Practicum 1–6
Supervised research studies with individual topics selected
according to student's special interests. Students will
develop a research proposal, gather and analyze data.
PREREQUISITE: Consent of instructor.

EDS 398. Directed Group Study 1–6
Study and analysis of teaching and learning topics for cre-
dential students under the guidance of a faculty member.
Offered for repeated registration. PREREQUISITE: Consent of instructor.

EDS 399. Independent Study 1–6
Individual guided study and/or research in an area not
covered by present curriculum course offerings for creden-
tial candidates who have advanced to internship or consent of instructor.

GRADUATE
Soc. 270. The Sociology of Education (4)
A consideration of the major theories of schooling and society,
including functionalist, conflict, critical, and inter-
tactional; selected topics in the sociology of education will
be addressed in a given quarter, including: the debate over inequality, social selection, cultural reproduction and the
growth of knowledge, the cognitive and economic consequences of education. Major research methods will
be discussed and critiqued.

EDS 201. Introduction to Resources for Teaching and
Learning (4)
This course introduces students to educational resources,
both in print and on-line. Students compile and evaluate
research studies, curricular materials, and instructional
approaches in preparation for future projects in develop-
ing and evaluating various approaches to teaching and
learning. PREREQUISITE: students must be registered EDS graduate students (ED 76, 77, 78, 79, 80).

EDS 203. Technology, Teaching, and Learning (4)
This course will review current literature on effective ap-
plications of technology in the classroom. Students will also
become fluent in the use of productivity tools, presentation
software, and Web development for teaching and learning; critique software relevant to their area of teaching; and
develop an educational activity based on a review of
the literature that harnesses the power of technology.
PREREQUISITE: students must be registered EDS graduate students (ED 76, 77, 78, 79, 80).

EDS 204. Technology and Professional Assessment
(4)
Advanced techniques for using network-based resources
for teaching and learning will be introduced. Students will
review relevant research on advanced technologies related to assessment of professional performance and
student achievement. Students will present a Web-based Professional Teaching Performance Portfolio that
tests reflecting teaching performance during their student
teaching or internship field experience. PREREQUISITE:
students must be registered EDS graduate students.

EDS 205A. Reflective Teaching Practice (2)
This course introduces principles and practices of reflective
teaching. Student teachers and interns will systematically
document their practice teaching and analyze observation
data to improve performance. Students will collaborate with
supervisors and expert teachers throughout the yearlong
preservice teaching experience. PREREQUISITES:
students must be registered EDS graduate students.

EDS 205B. Reflective Teaching Practice (2)
This course introduces principles and practices of reflective
practice. Students and interns will systematically
document their practice teaching and analyze observation
data to improve performance. Students will collaborate with
supervisors and expert teachers throughout the yearlong
preservice teaching experience. PREREQUISITES:
EDS 205A, and students must be registered EDS graduate
students.

EDS 206. Teaching Performance Assessment Portfolio
(4)
This course introduces the use of a Teaching Performance Assessment Portfolio for assessment of teaching per-
formance. Student teachers and interns will design an
electronic portfolio that demonstrates acceptable perform-
ance on essential credential standards. National Board of Professional Teaching Standards will also be
introduced. PREREQUISITE: students must be registered EDS graduate students.

EDS 229. Introduction to Educational Resources (4)
This course prepares K-12 teacher-researchers to design,
implement, and evaluate classroom research. Students learn
how to access and evaluate research studies, cur-
ricular materials, and instructional approaches both on-line
and in print. **Prerequisite:** students must be registered TE76 majors.

EDS 230A-B-C. Research in Curriculum Design (4-4-4) A year-long course sequence which provides an extensive overview of curriculum design principles appropriate for K-12 instruction. Consensus and model building methods will be discussed using case studies of curriculum research and development projects appropriate for various subject areas and grade levels. Participants will design, implement, and evaluate a curriculum project in their own classrooms. **Prerequisite:** must be TE76 major or consent of instructor. (F,W,S)

EDS 231. Advanced Topics in Instructional Practices (4) Selected advanced topics in K–12 instructional practices in various subject areas. Techniques for teaching higher-level cognitively demanding content and various applications of computer and other technology will be stressed. Participants will conduct a field study of promising teaching practices appropriate to their grade level(s) and subject area(s) of instruction. **Prerequisite:** must be TE76 major or consent of instructor. (Su)

EDS 232. Special Topics in Education (4) This course explores topical issues in education. It focuses on recent developments which have broad implications for research and practice in teaching and learning. Course topics will vary each time the course is offered. **Prerequisite:** TE76 major or consent of instructor.

EDS 233A. Topics in Education Research and Design (2) Current topics in education and educational research methodology, including action research, participant observation, ethnography, and survey research. This is the first in a two-course series. **Prerequisite:** TE76 major or consent of instructor.

EDS 233B. Topics in Education Research and Design (2) Current topics and issues in education and educational research methodology, including action research, participant observation, ethnography, and survey research. This is the second in a two-course series. **Prerequisite:** EDS 233A. TE76 major or consent of instructor.

EDS 240A. Research in ASL-English Bilingual Education (4) A three-course sequence in which participants conduct an overview of research and design and conduct a study related to bilingual, bicultural education for deaf children. **Prerequisite:** TE81 major: Teaching and Learning Bilingual Education (ASL-English) or consent of instructor.

EDS 240B. Research in ASL-English Bilingual Education (4) A three-course sequence in which participants conduct an overview of research and design and conduct a study related to bilingual, bicultural education for deaf children. **Prerequisite:** EDS 240A, and TE81 major: Teaching and Learning Bilingual Education (ASL-English) or consent of instructor.

EDS 240C. Research in ASL-English Bilingual Education (4) A three-course sequence in which participants conduct an overview of research and design and conduct a study related to bilingual, bicultural education for deaf children. **Prerequisite:** EDS 240A/EDS 240B, and TE81 major: Teaching and Learning Bilingual Education (ASL-English) or consent of instructor.

EDS 241. Advanced Topics in Deaf Education (2) Topics in human development and education that relate to deaf and hard-of-hearing children and the relationship between language, community/culture, and classroom. **Prerequisite:** TE81 major or consent of instructor.

EDS 250. Equitable Educational Research and Practice (4) This course introduces students to research studies and educational practices of educational equity, both in general and with specific subject areas. Research studies relevant to educational equity will be examined, as will practices that have attempted to enable all students to achieve to the best of their abilities. **Prerequisite:** students must be registered EDS graduate students.

EDS 260A. Educational Research and Evaluation Design (4) This course integrates a variety of social and behavioral science research methodology with conceptualization of research design and attention to audience and writing style. This is the first of a three-course series. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 260B. Educational Research and Evaluation Design (4) This course integrates a variety of social and behavioral science research methodology with conceptualization of research design and attention to audience and writing style. This is the second of a three-course series. **Prerequisites:** EDS 262A, and admission into the Ed.D. program or consent of instructor.

EDS 260C. Educational Research and Evaluation Design (4) This course integrates a variety of social and behavioral science research methodologies with conceptualization of research design and attention to audience and writing style. This is the third of a three-course series. **Prerequisites:** EDS 260A, and admission into the Ed.D. program or consent of instructor.

EDS 261A. Advanced Research and Evaluation Methods (4) This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda and develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the first of a three-course series. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 261B. Advanced Research and Evaluation Methods (4) This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda and develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the second of a three-course series. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 261C. Advanced Research and Evaluation Methods (4) This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda and develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the third of a three-course series. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 262A. Dissertation Writing Seminar (4) This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the first of a three-course series. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 262B. Dissertation Writing Seminar (4) This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the second of a three-course series. **Prerequisites:** EDS 262A, and admission into the Ed.D. program or consent of instructor.

EDS 262C. Dissertation Writing Seminar (4) This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the third of a three-course series. **Prerequisites:** EDS 262B, and admission into the Ed.D. program or consent of instructor.

EDS 270. Leadership and Equity in Educational Reform (4) This course provides a framework for understanding school reform movements that integrates relevant theory and research from a number of academic disciplines. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 271. Language and Diversity in the Schooling Process (4) This course examines current research and theory which relate language and diversity to educational outcomes. Topics addressed include the development of language and literacy in schools and other settings, socio-cultural perspectives on language learning, and implications for educational policy and practice. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 272. Education and Culture (4) This course examines schooling from an anthropological perspective, focusing on the impact of social and cultural forces on teaching and learning in U.S. public schools using comparative materials from other societies and settings. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 273. Research in Teaching and Learning: Reading and Writing (4) This seminar will address current theories and research on the teaching and learning of reading and writing, as well as how research can be used to improve teaching practices. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 274. Research in Teaching and Learning: Mathematics (4) This seminar will address current theories and research on the teaching and learning of mathematics, as well as how research can be used to improve teaching practices. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 275. Research in Teaching and Learning: Science (4) This seminar will address current theories and research on the teaching and learning of science, as well as how research can be used to improve teaching practices. **Prerequisite:** admission into the Ed.D. program or consent of instructor.

EDS 276. Research in Teaching and Learning: English Language Learning (4) This seminar will address current theories and research on the teaching and learning of second-language learning, as well as how research can be used to improve teaching practices. **Prerequisite:** admission into the Ed.D. Program or consent of instructor.

EDS 277. Research in Teaching and Learning: History and Social Sciences (4) This seminar will address current theories and research on the teaching and learning of social sciences, as well as how research can be used to improve teaching practices. **Prerequisite:** admission into the Ed.D. program or consent of instructor.
teaching practices. **Prerequisite:** admission into the Ed.D. Program or consent of instructor.

**EDS 278/COGR 278. Talking Culture, Culture Talking: Voices of Diversity (4)**

This course explores the discourse of culture in American society and the problem of "silenced" or unheard voices. The interaction of individual and collective voice, language, and identity are discussed as they bear on the ways that culture moves through important social institutions such as schools. Of particular interest are issues of teaching, learning, displacement, inclusion, marginality, and the "speaking center." **Prerequisite:** graduate status or consent of instructor.

**EDS 280. Re-Thinking Leadership (4)**

This course will present the evolution of leadership thought and theory, with an emphasis on the distinction between, and interrelatedness of, effective management and leadership. The ethics of leadership practice and epistemological perspectives of emerging leadership styles will be explored, and students will have opportunities to reflect on the nature of leadership as it is practiced in educational settings. Applying critical, self-reflective leadership practice through structured activities is also an element of this course.

**EDS 281. Leadership for Learning (4)**

This course will explore various models of curriculum and instruction in response to students' learning needs. It also will examine models of school organization and the leader's role and responsibility in developing a school culture that promotes student achievement, using evidence-based decision-making. A major emphasis will be on evaluating research on which theories and practice are based. **Prerequisite:** Joint Ed.D. in Educational Leadership student status.

**EDS 282. Leadership for a Diverse Society (4)**

This course will address theories and practices for achieving schools and classrooms that are informed by and built around the participation of diverse communities and cultures. The emphasis is on how leadership intersects with socio-historical and socio-cultural theories that suggest that the organization of schools and instruction is critical to student inclusion and outcomes. A basic premise of this course is that a socially just learning theory begins with using all of the resources and knowledge of families, communities, and cultures in formulating policy and practice. **Prerequisite:** Joint Ed.D. in Educational Leadership student status.

**EDS 283. Leadership for Organizational Change (4)**

This course will present multiple theories of organizational change, explore group processes and identify models of decision-making, and analyze human motivation theories. Establishing a purpose-driven organization, while dealing with competing demands, will be discussed. A major emphasis in this course is on people as agents of change and on the creation of high-quality ethical and productive workplaces where employees can achieve success and satisfaction, while advancing the mission of the educational organization. **Prerequisite:** Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 284. Leadership for Organizational Development (4)**

This course will investigate the skills and dispositions needed for students to lead the development of learning organizations. Faculty will teach and model concepts of working with people within educational organizations and programs. Emphasis will be placed on individual's team development and facilitation, organizational communications, adult learning, and professional development. **Prerequisite:** Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 285. Leadership for the Future (4)**

This course addresses interdisciplinary influences on leadership practice within learning organizations. Contributions from scholars in futures' studies, including those influenced by modernism and postmodernism, will be used to explore topics such as long-range planning, demographic trends, technology, and brain theory. **Prerequisite:** Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 286. Advanced Topics in Leadership (4)**

This course explores topical issues in the field of leadership. It focuses on recent developments that have broad implications for research and practice in educational leadership. Course topics will vary each time the course is offered. **Prerequisite:** Joint Ed.D. in Educational Leadership student status.

**EDS 287A. Educational Research and Evaluation Design (4)**

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including experimental and quasi-experimental survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. This is the first in a three-course sequence. **Prerequisite:** EDS Education Doctorate student or consent of instructor.

**EDS 287B. Educational Research and Evaluation Design (4)**

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including experimental and quasi-experimental survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. **Prerequisites:** EDS 287A, and EDS Education Doctorate student or consent of instructor.

**EDS 287C. Educational Research and Evaluation Design (4)**

This course integrates a variety of social and behavioral science perspectives and research methodologies in examining topics of central relevance to education. Students have opportunities to design and apply to educational-research questions a variety of methodologies, including experimental and quasi-experimental survey, interview, ethnographic, case study, video data analysis, and discourse analysis methods. **Prerequisites:** EDS 287A, and EDS Education Doctorate student or consent of instructor.

**EDS 288A. Advanced Research and Evaluation Methods (4)**

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda to develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the second in a three-course series. **Prerequisite:** Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 288B. Advanced Research and Evaluation Methods (4)**

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda to develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the second in a three-course series. **Prerequisites:** EDS 288A, and Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 288C. Advanced Research and Evaluation Methods (4)**

This course addresses more advanced topics in research design and methodology. Students hone the requisite research skills to conduct dissertation research. Students gain varied hands-on experiences in collecting and analyzing data relevant to schooling, as well as learn how to develop, manage, and analyze large data files. Students create a research agenda to develop skills needed in proposal writing: development, organization and coherence, conceptualization of research design, and attention to audience and writing style. This is the third course in a three-course series. **Prerequisites:** EDS 288B, and Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 289A. Dissertation Writing Seminar (4)**

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the first in a four-course series. **Prerequisite:** Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 289B. Dissertation Writing Seminar (4)**

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the second in a four-course series. **Prerequisites:** EDS 289A, and Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 289C. Dissertation Writing Seminar (4)**

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the third in a four-course series. **Prerequisites:** EDS 289B, and Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 289D. Dissertation Writing Seminar (4)**

This seminar provides an opportunity for doctoral candidates to present and critique in-progress dissertation research and writing. Topics addressed will also include writing for professional publications and presenting research findings to varied audiences. This is the fourth in a four-course series. **Prerequisites:** EDS 289C, and Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 290. Research Practicum (1-12)**

Supervised research studies with individual topics selected according to students' special interests. Students develop a research proposal appropriate for M.A. thesis, begin to gather and analyze data. **Prerequisites:** M.A. candidate and consent of instructor. (S/U grades only.)

**EDS 291A. Leadership Research Practicum (2)**

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the first in a three-course series. **Prerequisite:** Joint Ed.D. in Educational Leadership student status or consent of instructor.

**EDS 291B. Leadership Research Practicum (2)**

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the second course in a three-course series. **Prerequisites:** EDS 291A, and Joint Ed.D. in Educational Leadership student status.

**EDS 291C. Leadership Research Practicum (2)**

Students use their placements in local schools and educational settings to examine leadership research and practice topics raised in the Leadership core courses and Research and Evaluation Design/Methods courses. This is the third course in a three-course series. **Prerequisites:** EDS 291B, and Joint Ed.D. in Educational Leadership student status.

**EDS 292. Qualifying Paper Preparation (2)**

This course will provide students with time, resources, and guidance for the purpose of developing a review of literature on a student-related topic, which typically becomes the focus of the dissertation research project. Students will be expected to use a variety of resources in order to discover and identify relevant information. **Prerequisite:** Joint Ed.D. in Educational Leadership student status. (S/U grade permitted)
Eleanor Roosevelt College

THE MAKING OF THE MODERN WORLD/WRITING PROGRAM

OFFICE: Eleanor Roosevelt College MMW Program ERC Administration Building

ELEANOR ROOSEVELT COLLEGE

HONORS PROGRAM

OFFICE: Provost, Eleanor Roosevelt College ERC Administration Building

Honors programs at Eleanor Roosevelt College have been established to provide exceptionally motivated and capable students with enhanced educational experiences through close interaction with faculty and other honors students. There are two main components to the program: the Freshman Honors Program and the Sophomore Honors Research Project. Participation in either is by invitation.

In the fall quarter of their freshman year, selected students are invited to enroll in the Freshman Honors Seminar, a two- to three-quarter course. During the fall quarter, students meet with a variety of faculty members to learn more about their research, and about academic enrichment opportunities at UC San Diego. The seminar continues during the winter quarter, focusing on an international theme with faculty speakers. Honors students may receive opportunities for particular cultural and social events. Second-year students with GPAs of 3.5 or higher have the opportunity to pursue independent study with individual faculty.

Additional honors opportunities are offered in the Making of the Modern World (MMW) sequence. Students with excellent grades in MMW 1, 2, and 3 and high cumulative grade-point averages are eligible to take MMW 4H, 5H, and 6H. Honors students attend regular course lectures but meet in separate honors sections. They may also be invited to special guest lectures and enrichment activities connected with MMW.

There are also opportunities for university-wide honors, including provost’s honors. Students who maintain a GPA of 3.5 for a full academic year are awarded certificates of merit by the college.

UCSD’s reputation for excellence is also reflected in the numbers of students who enroll in departmental senior honors programs and who earn college or university honors or election to Phi Beta Kappa.

ELENA ROOSEVELT SEMINAR

OFFICE: Provost, Eleanor Roosevelt College ERC Administration Building

90. Undergraduate Seminar (1)

A seminar intended for exposing undergraduate students, especially freshmen and sophomores, to exciting research programs conducted by the faculty. PREREQUISITE: none. Pass/Not Pass only.

Engineering, Jacobs School of

OFFICE: 7310 Engineering Building Unit 1, Warren Mall http://www.jacobsschool.ucsd.edu

The Irwin and Joan Jacobs School of Engineering at UC San Diego comprises the Departments of Bioengineering (BE), Computer Science and Engineering (CSE), Electrical and Computer Engineering (ECE), Mechanical and Aerospace Engineering (MAE), NanoEngineering (NE), and Structural Engineering (SE). The Jacobs School is directed by the dean of engineering. The departments offer sixteen undergraduate programs that fall into three categories: impacted, pre-major, and open major programs as well as many graduate degree programs. For a complete list of engineering undergraduate and graduate programs, please visit our Web site at http://www.jacobsschool.ucsd.edu. Students interested in engineering should consult the Web site and the individual department listings which follow this section of the catalog.

UCSD’s six undergraduate colleges differ in their general-education requirements. Prospective students should review the general-education requirements and take them into account when planning their college curriculum.
ACCEPTANCE TO DEPARTMENTAL MAJORS IN THE JACOBS SCHOOL OF ENGINEERING

Student demand exceeds program capacity in several of the undergraduate majors. Owing to limited departmental resources, major programs to which more students apply than can be accepted have been declared impacted majors. Acceptance into an impacted engineering major is based on academic excellence demonstrated in high school or at a community college. Acceptance will be granted to the maximum number of students in each of these impacted major programs consistent with maintaining acceptable program quality and in compliance with admissions procedures and criteria approved by the Academic Senate's Committee on Educational Policy.

Remember that admission to the university and to a college does not guarantee acceptance to an impacted major.

FRESHMEN

Freshmen are admitted to engineering majors in one of three ways: open majors, pre-majors and impacted majors.

Open Majors

The following majors are open to all admitted UCSD students: chemical engineering (offered through the NE department), electrical engineering, engineering science (offered through the MAE department), bioengineering: bioinformatics (offered through the BENG department), engineering sciences (offered through the SE department), environmental engineering, computer engineering (offered through the CSE department), computer engineering (offered through the ECE department), computer science, and structural engineering. All applicants who have been accepted to UCSD and indicated a pre-major or open engineering major on their application are placed directly into that major.

Pre-major Programs

There are two engineering pre-major programs offered: (1) bioengineering: pre-medical and (2) engineering physics. Incoming freshmen who identified either of these pre-majors as their first choice on their UCSD admissions application are accepted directly into these pre-majors upon admission to UCSD. Subsequent acceptance to the major is dependent on performance in selected mathematics, science, and engineering screening courses as well as competitive grade-point average in the pre-major screening courses.

Pre-major engineering students are expected to apply for acceptance to the major during the spring quarter of their freshman year. Acceptance to the major is based on the grade-point average in the screening courses only. The grade-point average required for acceptance to the major by pre-majors is set individually by each engineering program. Pre-majors should consult their departments concerning the appropriate screening courses and the current grade-point average standards for acceptance. In addition to the courses required by the departments, it is expected that all pre-major students will take twelve to eighteen units of general-education college requirements during their first year.

Pre-major engineering students who are not able to apply before the end of their third quarter, or who wish to reapply following an unsuccessful application, must contact their department as soon as possible for further advising as acceptance to any engineering major that has a pre-major will not be considered after six quarters of enrollment.

Impacted Majors

The following engineering majors are impacted: aerospace engineering, bioengineering, bioinformatics, biotechnology, and mechanical engineering (MAE). Applicants must indicate one of these impacted majors as their first choice on their UC application in order to be considered for acceptance to the major by the UC San Diego Office of Admissions.

Effective fall 2001, this selection is based on the freshman review criteria (Comprehensive Review) administered by the UCSD Office of Admissions and Relations with Schools.

It is strongly suggested that all students accepted into engineering programs consult their department's academic advisor at an early stage to plan their lower-division engineering courses, and that they consult with a college academic counselor to arrange general-education courses around the required screening courses. Students admitted fall quarter should attend the engineering department's orientation meetings during Welcome Week.

Bioinformatics Programs

Students interested in applying to either the bioengineering: bioinformatics major (offered by the Department of Bioengineering), or the computer science major with a specialization in bioinformatics (offered by the Department of Computer Science and Engineering) should consult individual department listings which follow this section of the catalog.

TRANSFERS

Following California's Master Plan for Higher Education, UC San Diego gives high priority to students transferring from California community colleges.

Transfer students are admitted to engineering majors in one of three ways: open majors, pre-majors, and impacted majors. For major-specific advising, please contact the relevant departmental undergraduate academic advising office.

Effective fall 2009, these courses are strongly recommended for all engineering transfer students for success in their major:

- Calculus I—for Science and Engineering (Math. 20A)
- Calculus II—for Science and Engineering (Math. 20B)
- Calculus and Analytic Geometry (Math. 20C)
- Differential Equations (Math. 20D)
- Linear Algebra (Math. 20F)
- Complete calculus-based physics series with lab experience (Physics 2A-8-C)
- Chemistry 6A (except computer science and computer engineering majors)

NOTE: A total of ten quarter-units of general chemistry (including laboratory) will be recommended for students applying to all majors offered by the Department of Bioengineering.

- Highest level of introductory computer programming language course offerings at the community college**
- Community college equivalent courses can be found at: http://www.assist.org

**Refer to the UC San Diego General Catalog to select major prerequisite recommendations for computer language courses.

Open Majors

The following majors are open to all admitted UCSD students: aerospace engineering (offered through MAE through spring 2011), chemical engineering (offered through NE), electrical engineering, engineering science (offered through MAE), engineering sciences (offered through SE), environmental engineering, computer engineering (offered through CSE), computer engineering (offered through ECE), computer science, mechanical engineering (offered through MAE through spring 2011), structural engineering and bioengineering: bioinformatics (offered through the BENG department).

Pre-major Programs

There are two engineering pre-major programs offered: (1) bioengineering: pre-medical and (2) engineering physics. Subsequent acceptance to the major is dependent on performance in selected mathematics, science, and engineering screening courses as well as competitive grade-point average in the pre-major screening courses.

Pre-major transfer engineering students are expected to apply for acceptance to the major during their third quarter of their first year at UCSD. Acceptance to the major is based on the grade-point average in the screening courses only. The grade-point average required for acceptance to the major by pre-majors is set individually by each engineering program. Pre-majors should consult their departments concerning the appropriate screening courses and the current grade-point average standards for acceptance. In addition to the courses required by the departments, it is expected that all pre-major students will take twelve to eighteen units of general-education college requirements during their first year.

Pre-major transfer engineering students must apply to the major before the end of their third quarter as acceptance to any engineering major that has a pre-major by a transfer student will not be considered after the end of the third quarter of enrollment.

Impacted Majors

Since acceptance to impacted engineering majors is quite competitive for freshman and transfer applicants alike, academic standards are high.
Transfer students who choose impacted engineering major programs (bioengineering, bioengineering: biotechnology) as their first-choice major on their UC application are strongly encouraged to complete the major preparation classes listed previously.

Acceptance to impacted majors may be limited to the best transfer applicants, e.g., those who have been admitted to UCSD with the most complete lower-division preparation and the highest college grade-point averages. Since acceptance is restricted to these majors, transfer students are encouraged to apply to more than one major degree program.

It is strongly suggested that all students accepted into engineering programs consult their department's academic advisor at an early stage to plan their lower-division engineering courses, and that they consult with a college academic counselor to arrange general-education courses around the required screening courses. Students admitted fall quarter should attend the engineering department's orientation meetings during Welcome Week.

For specific program requirements for transfer students, please refer to the appropriate department's listing which follow this section of the catalog.

Bioinformatics Programs

Students interested in applying to either the bioengineering: bioinformatics major (offered by the Department of Bioengineering), or the computer science major with a specialization in bioinformatics (offered by the Department of Computer Science and Engineering) should consult individual department listings which follow this section of the catalog.

CONTINUING UCSD STUDENTS

Continuing UCSD undergraduate students who wish to change into impacted majors must submit an application to the department on or before the target dates and must meet minimum requirements. Interested students should make an appointment to speak with the departmental undergraduate advisor for more details.

ACCESS OF NON-ENGINEERING MAJORS TO THE JACOBS SCHOOL OF ENGINEERING COURSES

The number of students enrolled in some courses offered by departments in the Jacobs School of Engineering must be restricted to meet the resources available. Students who have successfully completed all prerequisite courses will be enrolled in these restricted courses in the following order:

1. students accepted by the department to a major curriculum
2. students accepted by the department to a minor curriculum
3. students fulfilling a requirement for another major
4. all others, with permission of the department and instructor

Students should check with the departments concerning the limitations on specific courses and the requirements needed prior to attempting to enroll.

DOUBLE MAJORS AND MINORS

It is the policy of the UC San Diego Academic Senate not to approve double majors within engineering. Students who qualify for admission to graduate school and who have the extra time are encouraged to consider co-terminal B.S./Master's degrees in one or two engineering disciplines.

For more information visit: http://www.jacobsschool.ucsd.edu/academic/academic_undergrad/bs-ms.shtml.

ORIENTATION TO ENGINEERING

ECE 1A-B-C: This course series has no prerequisites and students will be given an introduction to the engineering profession and our undergraduate program. Exercises and practicums will develop the problem-solving skills needed to succeed in engineering. It is offered fall, winter, and spring.

INTEGRATIVE ENGINEERING EDUCATION

Engineering Student Services: Engineering Student Services (ESS) facilitates and encourages the professional, academic, and personal success of engineering students. The services available through Engineering Student Services are designed to assist students as they pursue their chosen degrees and to prepare them for life outside of the university as engineering professionals and responsible citizens. The staff serve as a resource for those interested in applying to engineering majors; getting involved in student organizations; seeking internships; accessing tutoring, scholarship, and involvement information; or for those needing a referral to on-campus and community resources. In addition, support is provided to the Teams in Engineering Service (TIES) Program, Team Internship Program, and the California State Summer School for Mathematics and Science (COSMOS). For more information, visit the office in Engineering Building Unit 1, Room 1400, e-mail the staff at ess@soe.ucsd.edu, or visit http://ess.ucsd.edu.

Teams in Engineering Service (TIES): Engineering undergraduates can place their technical and creative skills to work for San Diego nonprofit organizations through the Teams in Engineering Service (TIES) Program. Through TIES, multidisciplinary teams of UCSD students design, build, and deploy projects that solve technology-based problems for local community organizations, and receive technical elective (or academic) credit. For details, visit http://ties.ucsd.edu.

Team Internship Program (TIP): Under the direction of the Corporate Affiliates Program, this corporate-sponsored program gives students the opportunity to develop their engineering skills in a multidisciplinary team environment that provides real-world engineering experience in preparation for entering the workforce. In these full-time, competitive summer paid internships, students work on-site with industry partners as a systems-oriented solution team focused on a clearly defined and significant project. For details, visit http://www.jacobsschool.ucsd.edu/TIP.

The California State Summer School for Mathematics and Science (COSMOS) is a four-week residential pre-college academic experience in math, science, and engineering for top high school students. Students participate in one of the following eight academic courses (or clusters): 1. Computers in Everyday Life; 2. Engineering Design and Control of Kinetic Sculptures; 3. Living Oceans and Global Climate Change; 4. Earthquakes in Action; 5. Bright Ideas: Exploring the Cosmos; 7. Biological Motivations for Tensegrity Structures; and 8. The Molecular Biology Revolution. In summer 2008, one-third of the admitted students were awarded full financial aid. For more information, visit http://www.jacobsschool.ucsd.edu/cosmos.

COURSES

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

100. Principles of Team Engineering (2)
Introduction to the practice of engineering as a team-driven profession. Levels of the design process, verbal and written communication, principles of teamwork, project management, ethics, legal issues, quality management, entrepreneurship, and community involvement. PREREQUISITES: concurrent enrollment in or completion of one of the following: DOC 2, CAT 2, HUM 2, MMW 2, MCWP 50, or WCWP 10B and one university-level mathematics course (or equivalent) or consent of instructor. Preference given to engineering majors. Not open to graduate students.

100L. Team Engineering Laboratory (2)
Faculty-directed, multi-disciplinary, long-term engineering projects. Students use their technical knowledge to design and develop solutions to real problems in consultation with customers such as community organizations. PREREQUISITES: ENG 100 (required prior to or in concurrent enrollment with ENG 100).

201. Venture Mechanics (4)
Examines the engineering/entrepreneurism interface. Discovery, development, and implementation of new product ideas. Understanding markets, competitors, and selling innovations. Cultivating effective working relationships between research, engineering, manufacturing, and marketing elements of an organization. Priority enrollment given to engineering majors.

202. Enterprise Dynamics (4)
Case studies of start-ups, strategic technology management, practice in use of industrial decision-making tools, and speakers from successful firms combined with experience in making management decisions dynamically in a competitive computer-simulated enterprise. Field study of ongoing processes in a local high technology company. Priority enrollment given to engineering majors.

203. Applied Innovations (4)
Course includes the examination of business plans developed by early stage technology businesses. Students expected to work on the development of business plans for real, innovative business organizations. Will explore all of the business research and analysis that needs to be undertaken in order to develop a complete business plan. Completion of ENG 201 or ENG 202 preferred.

204. Theory and Practice of University Teaching (2)
Teaching and learning at the college/university level. Readings in engineering and cognitive science, plus opportunities for teaching and evaluating college level
Bioengineering

J. S. Lee, Ph.D.
G. Paternostro, Ph.D.
E. I. Ruoslahti, M.D., Ph.D.
P. Tong, Ph.D.
R. M. Winslow, M.D.

AFFILIATED FACULTY
G. Cauwenberghs, Ph.D., Professor, Biological Sciences
R. C. Chau, Ph.D., Professor, Mechanical and Aerospace Engineering
J. W. Covell, M.D., Professor Emeritus, Medicine
M. H. Ellisman, Ph.D., Professor, Neurosciences
D. J. Hall, Ph.D., Assistant Adjunct Professor, Radiology
J. Lasheras, Ph.D., Distinguished Professor, Mechanical and Aerospace Engineering
R. L. Lieber, Ph.D., Professor, Orthopaedics
T. Liu, Ph.D., Associate Professor, Radiology
T. Nelson, Ph.D., Professor, Radiology
S. Nigam, M.D., Professor, Department of Pediatrics
J. H. Omens, Ph.D., Adjunct Professor, Medicine
M. Sailor, Ph.D., Professor, Chemistry and Biochemistry
K. L. P. Sung, Ph.D., Emeritus, Orthopaedics
S. Thomson, M.D., Ph.D., Professor in Research, Medicine
P. D. Wagner, M.D., Professor, Medicine
S. Ward, Ph.D., Assistant Professor-in-Residence, Radiology and Orthopaedic Surgery
J. B. West, M.D., Ph.D., Professor, Medicine

PROFESSIONAL RESEARCH STAFF
C. Barrett, Ph.D., Assistant Project Scientist
A. C. Chen, Ph.D., Associate Project Scientist
P. C. Chen, Ph.D., Project Scientist
B. K. Cho, Ph.D., Assistant Project Scientist
J. H. Haga, Ph.D., Assistant Project Scientist
Y. L. Hu, Ph.D., Associate Project Scientist
W. Huang, M.D., Ph.D., Associate Project Scientist
R. C. Kerckhoff, Ph.D., Assistant Project Scientist
Y. S. Li, Ph.D., Associate Project Scientist
M. R. Maurya, Ph.D., Assistant Project Scientist
A. P. Mihaylova, Ph.D., Assistant Research Scientist
T. Ravasi, Ph.D., Assistant Research Scientist
Z. Shi, Ph.D., Assistant Project Scientist
A. G. Tsai, Ph.D., Research Scientist
K. Zengler, Ph.D., Assistant Project Scientist

DEPARTMENTAL FOCUS

Bioengineering is an interdisciplinary major in which the principles and tools of traditional engineering fields, such as mechanical, materials, electrical, and chemical engineering, are applied to biomedical and biological problems. Engineering plays an increasingly important role in medicine in projects that range from basic research in physiology to advances in biotechnology and the improvement of health-care delivery. By its very nature, bioengineering is broad and requires a foundation in the engineering sciences as well as in physiology and other biological sciences.

The overall mission of the Department of Bioengineering is to improve health and quality of life by applying engineering principles to scientific discovery and technology innovation and to train future leaders in bioengineering through inspiring education and dedicated mentorship.

The educational objectives of the Bioengineering program at UCSD are to produce graduates with a modern bioengineering education who will

- apply the central areas of bioengineering, its underlying sciences, and related technologies in a broad range of careers
- use strong communication, learning, and team-work skills to facilitate bioengineering practice and continued professional advancement
- act professionally, ethically, and in a socially responsible manner

At the undergraduate level, the department offers several four-year engineering majors. One leads to a B.S. degree in Bioengineering. This major prepares students for careers in the biomedical device industry and for further education in graduate school. Students completing the B.S. degree in Bioengineering have a broad preparation in traditional topics in engineering, allowing for a variety of career pathways. This program addresses the bioengineering topics of biomechanics, biotransport, bioinstrumentation, bioelectricity, biosystems, and biomaterials, and the complementary fields of systems and integrative physiology. Education in these areas allows application of bioengineering and other scientific principles to benefit human health by advancing methods for effective diagnosis and treatment of disease, e.g., through development of medical devices and technologies.

The department also offers a B.S. degree in Bioengineering: Biotechnology. This major prepares students for careers in the biotechnology industry and for further education in graduate school. The curriculum has a strong engineering foundation with emphasis on biochemical process applications. This program addresses the bioengineering topics of biochemistry, metabolism, kinetics, biotransport, biosystems, bioreactors, bioseparations, tissue engineering, and the complementary fields of cellular physiology. Education in these areas allows application of bioengineering and physicochemical principles to cellular and molecular biology, with the applications that benefit human health.

In addition, the department offers a four-year major leading to a B.S. degree in Bioengineering: Premedical. This curriculum is designed to meet the requirements for admission to medical schools and other schools of the health professions. This program provides a quantitative understanding of the engineering design of the body, as well as certain technologies used in medical practice. It has less engineering content but more biological sciences and is one of many majors that can serve as preparation for further training in medical, veterinary, or allied health professions. In addition to entering these health science professional schools, graduates of this program can also pursue graduate education in bioengineering, neurosciences, or related fields, or work in industry.

The department also offers a major leading to a B.S. degree in Bioengineering: Bioinformatics. Bioinformatics is the study of the flow of information (genetic, metabolic, and regulatory) in living systems to provide an understanding of the properties of cells and organisms. This major has been developed by the Departments of Bioengineering, Chemistry and Biochemistry, Computer Science and Engineering, and Division of Biological Sciences. Students wishing to major in bioinformatics may apply through any of these departments or the division. The Bioinformatics major in Bioengineering emphasizes systems engineering and model-based approaches to interpreting and integrating bioinformatics data. The Bioinformatics major
prepares students for careers in the pharmaceutical, biotechnology, and biomedical software industries, and for further studies in graduate school.

The programs and curricula of Bioengineering emphasize education in the fundamentals of engineering sciences that form the common basis of all engineering subspecialties. Education with this emphasis is intended to provide students with an interdisciplinary engineering foundation for a career in which engineering practice may expand rapidly. In addition, elements of bioengineering design are incorporated at every level in the curricula. This is accomplished by integration of laboratory experimentation, computer applications, and exposure to real bioengineering problems throughout the program. In the Bioengineering and Bioengineering: Biotechnology majors, students also work in teams on a senior design project to design a solution to a multidisciplinary bioengineering problem suggested by professionals in bioengineering industry, academia, or medicine.

The Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (EAC/ABET) is an organization with a mission of serving the public through promotion and advancement of education in fields including engineering, and ABET’s strategic plans include accreditation of educational programs and promotion of quality and innovation in education (http://www.abet.org). At UC San Diego, Bioengineering and Bioengineering: Biotechnology have a relatively heavy emphasis on engineering, whereas Bioengineering: Bioinformatics and Bioengineering: Premedical have a relatively heavy emphasis on biological, chemical, and physical sciences. The Bioengineering and Bioengineering: Biotechnology programs are accredited by EAC/ABET. The Bioengineering: Bioinformatics and Bioengineering: Premedical programs are not accredited by a Commission of ABET.

At the graduate level, specialized curricula lead to the M.S., M.Eng. (Master of Engineering), and Ph.D. degrees, as well as an integrated B.S./M.S. degree. In addition to the Ph.D. degree, the department offers a Ph.D. degree with a specialization in Bioinformatics. It is intended for students who have an interdisciplinary persuasion to work across computers, biology, medicine, and engineering. For further information on the specialization, please consult with the Student Affairs Office. The M.Eng. degree is a terminal professional degree whereas the M.S. and Ph.D. degrees are research programs. (See section on master’s degree programs.) The graduate programs are characterized by strong interdisciplinary relationships with the other engineering departments and Departments of Physics, Mathematics, Biology, Chemistry and Biochemistry, Medicine, and others, as well as with campus organizations such as the Whitaker Institute for Biomedical Engineering, Institute for Mechanics and Materials, and the School of Medicine.

### THE UNDERGRADUATE PROGRAM

#### MAJOR REQUIREMENTS

Specific course requirements for each of the majors are outlined in tables below. In addition to the required technical courses specifically indicated, a suggested scheduling of humanities and social science courses (HSS) is included in the curricula for students to use to meet college general-education requirements. To graduate, students must maintain an overall GPA of at least 2.0, and obtain at least a C– grade in each course required for the major. All courses required for the major must be taken for a letter grade.

Deviations from the required programs of study must be approved by the Undergraduate Studies Committee prior to students taking alternative courses. In addition, students must obtain departmental approval of technical elective (TE) course selections prior to students taking the course. In the ABET-accredited programs, TE courses are restricted to those that meet ABET standards. Courses such as BENG 196, 197, and 198 are encouraged, but do not count as upper-division technical electives. BENG 195 and 199 can be used as technical electives under certain conditions. Policy information may be obtained from the Student Affairs Office.

Students with accelerated academic preparation at admission to the university may vary the scheduling of lower-division courses such as mathematics, physics, and chemistry, but must first consult the department. Most lower-division courses are offered more than once each year to permit students some flexibility in their program scheduling. However, most upper-division bioengineering courses are taught only once each year. Deviations in the scheduling of upper-division Bioengineering courses are strongly discouraged, as such changes usually lead to a delay in graduation. The curricula shown in the tables below are consistent with the current scheduling of classes.

Minors are not offered in Bioengineering, and double major options are restricted. Students interested in double majors should consult the Student Affairs Office as early as possible.

### GENERAL-EDUCATION/COLLEGE REQUIREMENTS

For graduation, each student must satisfy general-education course requirements determined by the student’s college, as well as the major requirements determined by the department. The six colleges at UCSD require different general-education courses. However, most upper-division bioengineering courses are taught only once each year. Deviations in the scheduling of upper-division Bioengineering courses are strongly discouraged, as such changes usually lead to a delay in graduation. The curricula shown in the tables below are consistent with the current scheduling of classes.

Minors are not offered in Bioengineering, and double major options are restricted. Students interested in double majors should consult the Student Affairs Office as early as possible.

BENG 183 | BENG 184 | TE1
BIBC 103 | TE1 | TE1
HSS4 | HSS4 | HSS4

*Chem. 6BL may be taken concurrently with Chem. 6C or in any quarter within the first two years after completion of Chem. 6B.

1Students may take the slower paced version, CSE 8A-B, instead of CSE 11.

2Technical elective (TE) courses must be selected from a departmental approved list. Consult the Student Affairs Office.

3Ten HSS courses are listed here; individual college requirements may be higher.

4Chem. 140C is not required for the major and can be used as a technical elective. Chem. 140C is a requirement for application to most medical schools.

### POLICIES AND PROCEDURES

Transfer Student Admission into Bioengineering, Bioengineering: Biotechnology, Bioengineering: Premedical, or Bioengineering: Bioinformatics

The following courses are strongly recommended as preparation for all engineering transfer students:
- Calculus I—for Science and Engineering (Math. 20A)
- Calculus II—for Science and Engineering (Math. 20B)
- Calculus and Analytic Geometry (Math. 20C)
- Differential Equations (Math. 20D)
- Linear Algebra (Math. 20F)
- Complete calculus-based physics series with lab experience (Physics 2A-2C)
- Chemistry 6A (except Computer Science and Computer Engineering majors)

Admission of transfer applicants into Bioengineering or Bioengineering: Biotechnology is limited to those who have demonstrated a high level of achievement commensurate with the prospect of success in these programs.

### Freshman Students

Freshman students who have excelled in high school and have declared Bioengineering or Bioengineering: Biotechnology on their UCSD application are eligible for direct admission into those majors.

Effective fall 2009 the UCSD Office of Admissions and Relations with Schools will calculate an admissions target number and admit the appropriate number of incoming freshmen into each impacted major using the "UCSD Comprehensive Review" score as a ranking method. (Visit http://infopath-1.ucsd.edu/catalog/front/UgrdPol.html and http://gort.ucsd.edu/admissions/ for detailed information concerning the "UCSD Comprehensive Review" score.) Students who meet the UCSD admission criteria will be admitted into their chosen impacted major, starting with the student having the highest "comprehensive review score," until the admission target number is reached. These students will be notified directly by the Office of Admissions and Relations with Schools whether they have been admitted into their chosen impacted major.

Freshman students who applied but were not admitted directly from high school into the impacted Bioengineering or Bioengineering: Biotechnology majors will be admitted into the major indicated as their "second choice" on the UC application (providing it is an "open" major).

### Transfer Students

Admission of transfer applicants into Bioengineering or Bioengineering: Biotechnology is limited to those who have demonstrated a high level of achievement commensurate with the prospect of success in these programs...
majors. Successful applicants must have completed substantial training at the community college and must have achieved a high level of academic performance there. The required minimum of ninety quarter transfer units should include eighteen quarter-units of calculus, twelve quarter-units of calculus-based physics, ten quarter-units of general chemistry (including laboratory), and the highest level computer science course offered at their community college.

Effective fall 2009, the UCSD Office of Admissions and Relations with Schools will calculate an admissions target number and admit the appropriate number of incoming transfer students into each impacted major, based on completion of the required courses previously listed and the community college GPA. Students who meet the UCSD admission criteria will be admitted into their chosen impacted major, starting with the student having the highest community college GPA, until the admission target number is reached. (At least a 3.2 GPA in the community college transfer courses, and a 3.4 GPA in math, physics, and computer science courses, are likely to be needed to gain admission.) These students will be notified directly by the Office of Admissions and Relations with Schools whether they have been admitted into their chosen impacted major.

Transfer students who applied but were not admitted directly from community college into the impacted Bioengineering or Bioengineering: Biotechnology majors will be admitted into the major indicated as their “second choice” on the UC application (providing it is an “open” major).

Continuing Students

For the 2009–10 academic year, ten “open” slots will be available in each of the impacted Bioengineering and Bioengineering: Biotechnology majors for UCSD continuing students interested in applying.

Interested continuing students must not have been past sophomore standing, as to time to graduation would be delayed since departmental upper-division courses are currently offered only once a year.

Continuing students will be required to complete the following nine courses prior to applying: BILD 1; Chem. 6A; MAE 9; Math. 20A-C; Physics 2AB. Upon completion of these courses, students will obtain an application from the Bioengineering Student Affairs Office. Applications must be submitted to the Bioengineering Student Affairs Office by Friday of the first week of instruction. Continuing students’ applications will be ranked according to the GPA obtained in the nine required courses.

Applications to an impacted major will be approved, starting with the student having the highest GPA in the nine required courses, until the predetermined target number is reached. The Bioengineering Student Affairs Office will notify students who are successful in transitioning into an impacted major to “officially” declare the appropriate major online via the Major/Minor link under Tools at http://tritonlink.ucsd.edu.

Continuing students who apply and are unable to transition into an impacted major will also be notified of their status in a timely manner by the Bioengineering Student Affairs Office.

Admission to Bioengineering: Premedical

Freshman Students

Students intending to complete a Bioengineering: Premedical major are initially identified as Pre-Bioengineering: Premedical majors and admitted into a pre-major status. Pre-Bioengineering: Premedical majors who have achieved a GPA of 3.0 or better in the eight required pre-major courses (Math. 20A-B-C; Phys. 2A-B; Chem. 6A; MAE 9 or 10, and one other pre-bioengineering course by the end of the freshman year) are assured of admission into the Bioengineering: Premedical major. Students who have not completed the “pre-major” courses or achieved the necessary GPA for entry into the Bioengineering: Premedical major by the end of the freshman year may still enter the Bioengineering: Premedical major if these requirements have been satisfied before the end of the sixth quarter of study at UCSD. At the end of the appropriate quarter, students who have satisfied the “pre-major” course and GPA requirements may transition into the Bioengineering: Premedical major via the Major/Minor link under Tools at http://tritonlink.ucsd.edu; however, students who are unable to transition into the Bioengineering: Premedical major by the end of the sixth quarter of study at UCSD will be required to declare another major.

Transfer Students

Students are initially identified as “pre-majors” and will be admitted to the Bioengineering: Premedical major based on academic performance in ten prerequisite courses. It is expected that students will have completed or have in progress all ten prerequisite courses when applying to UCSD. Students are required to achieve a GPA of 3.0 or better in the ten prerequisite pre-major courses (Math. 20A-B-C; Phys. 2A-B; Chem. 6A; MAE 9 or 10, and three other courses required by the major) by the end of the third quarter of study at UCSD. NOTE: Two of the prerequisite courses must be taken at UCSD, one of which must be an upper-division course. Students who have satisfied the “pre-major” course and GPA requirements by the end of their third quarter at UCSD may transition into the Bioengineering: Premedical major via the Major/Minor link under Tools at http://tritonlink.ucsd.edu; however, students who are unable to transition into the Bioengineering: Premedical major by the end of the third quarter of study at UCSD will be required to declare another major.

Admission to Bioengineering: Bioinformatics

Freshman and Transfer Students

Interested freshman and transfer students admitted to UCSD in fall 2009 and thereafter are invited to contact the Department of Bioengineering to obtain information about declaring a major in Bioengineering: Bioinformatics via the Major/Minor link under Tools at http://tritonlink.ucsd.edu.

Continuing Students

Current UCSD students in any major or “Undeclared” status will have the option of declaring a major in Bioengineering: Bioinformatics via the Major/Minor link under Tools at http://tritonlink.ucsd.edu.

Prospective Freshman and Transfer Students

Prospective freshman and transfer students planning to enter UCSD in fall 2010 will be able to apply for “direct admission” into the Bioengineering: Bioinformatics major by indicating their choice on the UC Undergraduate Admissions Application.

It is strongly recommended that students meet with an advisor in the Department of Bioengineering to discuss the Bioengineering: Bioinformatics degree requirements.

Academic Advising

Upon admission to a major, students are encouraged to seek advice from departmental staff in the Bioengineering Student Affairs Office, Room 141, Powell-Focht Bioengineering Hall, to plan a program of study. Students are expected to chart their progress within their major. As the department may make a small number of course and/or curricular changes every year, it is imperative that students check their e-mail for updates and consult a bioengineering undergraduate advisor on an annual basis.

To enroll in any courses required for a bioengineering major, a student must have satisfied prerequisite courses with a C– or better. (The department does not consider D or F grades as adequate preparation for subsequent material.) Also, the majority of bioengineering courses have enrollment restrictions and are open only to students who have been admitted to a bioengineering pre-major or major. Where these restrictions apply, the registrar will not enroll other students except by department approval. The department expects students to adhere to these policies and enroll in courses accordingly. Students are advised that they may be dropped from course rosters if prerequisites have not been met.

Bioengineering courses are typically offered only once a year and therefore should be taken in the recommended sequence. If courses are taken out of sequence, it may not always be possible to enroll in courses as desired or needed for timely graduation. If this occurs, students should seek immediate departmental advice.

Programmatic advice may be obtained from the Bioengineering Student Affairs Office. In addition, technical advice may be obtained from a specific bioengineering faculty advisor assigned to each student upon admission to the major.

Program Alterations, Exceptions to Requirements, and Special Programs

Exceptions to any program or course requirements are possible if approved by the Undergraduate Studies Committee before the courses in question are taken. Petitions may be obtained from the Bioengineering Student Affairs Office.

Capstone Design Course Sequence for Bioengineering and Bioengineering: Biotechnology

A capstone design course sequence is required for senior level students in the Bioengineering and Bioengineering: Biotechnology majors. The capstone
design course sequence consists of a multiquarter upper-division sequence of courses that totals ten quarter-units and includes (1) a series of four one-unit courses on selection (BENG 187A), design (BENG 187B), implementation (BENG 187C), and presentation (BENG 187D) of design projects, with consideration of professional issues, and (2) a sequence of two-three-unit laboratory design projects, offered in many of the primary areas of bioengineering, including biomechanics (BENG 119AB), systems bioengineering (BENG 127AB, 128AB, 129AB), nanoscale and molecular bioengineering (BENG 139AB), organ system bioengineering (BENG 147AB, 148AB, 149AB), tissue engineering and regenerative medicine (BENG 169AB), and bioinstrumentation (BENG 179AB). The design projects and presentations will be performed by student teams in the course sequence.

Independent Study for Undergraduates

Under the guidance of a bioengineering faculty member, lower- and upper-division level bioengineering students have opportunities to participate in independent study and research. Upper-division bioengineering students may take BENG 199, Independent Study for Undergraduates. Lower-division bioengineering students may enroll in BENG 99, which is similar to BENG 199 except that less background in the curriculum is needed. These courses are taken as electives on a P/NP basis. Under certain conditions, a BENG 199 course may be used to satisfy upper-division technical elective course requirements for the major. Students interested in this alternative must identify a faculty member with whom they wish to work and propose a two-quarter research or study topic for Bioengineering and Bioengineering: Biotechnology majors, a one- or two-quarter research topic for Bioengineering: Premedical majors, and a one-quarter research topic for Bioengineering: Bioinformatics majors. Completion of two consecutive quarters of BENG 199 will satisfy both technical elective requirements in the Bioengineering and Bioengineering: Biotechnology majors. A Bioengineering: Premedical major may satisfy up to two of the three technical elective requirements in that major by completion of BENG 199 courses. Additionally, Bioengineering: Bioinformatics majors may also use a BENG 199 course to satisfy the major’s one technical elective course requirement. After obtaining the faculty advisor’s concurrence on the topic and scope of the study, the student must submit a Special Studies Course Form (each quarter) and a BENG 199 as Technical Elective Contract to the Undergraduate Studies Committee. These forms must be completed, approved, and processed prior to the beginning of the quarter in which the course is to be taken.

Teaching

Students interested in participating in the instructional activities of the department may take BENG 195, Undergraduate Teaching as an elective on a P/NP basis. Under certain conditions, it may be used to satisfy upper-division technical elective course requirements for the Bioengineering: Premedical major. Policy in this regard may be obtained from the Student Affairs Office.

Integrated Bachelor’s/Master’s Degree Program

An integrated program leading to a bachelor of science and a master of science degree in bioengineering is offered to undergraduate students who are enrolled in any of the major programs offered by the Department of Bioengineering. Students interested in obtaining the M.S. degree within one year following completion of the B.S. degree may apply to the department for admission to the program during the fourth quarter prior to the receipt of the B.S. degree. The program is open only to UCSD undergraduates.

To be eligible, students must have completed the first two quarters of their junior year in residence at UCSD and have an upper-division GPA of 3.5 or better and a 3.0 overall UC GPA. Twelve units of bioengineering graduate-level courses must be completed during the student’s senior undergraduate year, in addition to the requirements for the bachelor’s degree; these twelve units will count toward the requirements for the master’s degree only and must be taken for a letter grade. It is the responsibility of the prospective B.S./M.S. student to select a bioengineering faculty member who is willing to serve as the student’s advisor. The student will also arrange (with their faculty advisor’s approval) a schedule of courses for the senior year that will fulfill the requirements for the B.S. degree while also serving the program planned for the M.S. degree. Students are expected to meet the requirements for the M.S. degree in one year (three consecutive academic quarters) from the date of the receipt of the B.S. degree.

Industrial Internship Program and Graduate Industrial Training Program

The Department of Bioengineering offers two industry-related programs: the Industrial Internship Program for undergraduates and the Graduate Industrial Training Program for graduate students. Both industrial programs are designed to complement the department’s academic curriculum with practical industry experience. The Bioengineering Industrial Internship Office is located in 125 Powell-Focht Bioengineering Hall. Students interested in these programs should contact the office at internship@bioeng.ucsd.edu well in advance of the quarter in which they would like to start their internship.

The Industrial Internship Program is available to undergraduate students who have completed all lower-division course requirements. Academic credit under BENG 196, Bioengineering Industrial Internship, can be earned by spending ten weeks or more as interns in an industrial setting. The intern may be involved in a range of activities, including design, analysis, manufacturing, testing, regulatory affairs, etc., under the direction of a mentor in the workplace. At the completion of the internship experience, students are required to submit a brief report to the mentor and faculty advisor describing their activities.

The Graduate Industrial Training Program is designed for students in the Master of Engineering Degree Program. This program serves to significantly enhance the professional development of M.Eng. students in preparation for leadership in the bioengineering industry. Students will complete an independent industrial bioengineering project in a company setting under the direction of an industrial and faculty advisor.

The Graduate Program

Admission to the M.Eng., M.S., and Ph.D. programs, as well as to the Ph.D. with a specialization in bioinformatics programs, is in accordance with the general requirements of the graduate division. Applicants are required to have completed a B.S. and/or M.S. degree by time of admission in a branch of engineering, natural sciences, mathematics, or quantitative life sciences. M.S. and Ph.D. applicants must have a GPA of 3.4 or better in technical courses. M.Eng. applicants should have competitive grades (greater than a 3.0 GPA). All applicants must submit GRE General Test scores, as well as three letters of recommendation from individuals who can attest to their academic or professional competence and to the depth of their interest in pursuing graduate study. Attention will be paid to the background and statement of purpose to ensure that they are consistent with the goals of the program. For example, whereas undergraduate research experience and the intention to pursue a research career or advanced studies are qualifications and interests typically well suited to the M.S. program, industrial experience and the intention to pursue a professional career are better suited to the M.Eng. program.

A minimum score of 550 (paper based), 213 (computer based), or 80 (Internet based) on the Test of English as a Foreign Language (TOEFL) is required of all international applicants whose native language is not English and whose undergraduate education was conducted in a language other than English. Students who score below 600 on the TOEFL examination are strongly encouraged to enroll in an English as a Second Language program before beginning graduate work. (UC San Diego Extension offers an English language program during the summer as well as the academic year.) Admission to the M.S. or Ph.D. degree program is designated when the applicants are judged to be appropriately qualified to pursue the degree requested at the time of application. Applicants are considered for admission for the fall quarter only.

A new graduate student who does not meet the prerequisites of required courses in the M.Eng., M.S., or Ph.D. curricula may have to take some basic courses to make up the deficiency. Thus, a student deficient in mathematics and mechanics may have to take Math. 110, CENG 101C or BENG 103B, BENG 110, 122A in the first year and BENG 250A-B, 253 in the second year. A student deficient in biology and chemistry may have to take CHEM. 131 or BENG 130 and BIPN 100, 102 in the first year and BENG 230A-B-C in the second year.

Nonmatriculated students are welcome to seek enrollment in bioengineering courses via UC San Diego Extension’s concurrent registration program. However, such enrollment in a bioengineering graduate course must be approved by the instructor.
MASTER OF SCIENCE DEGREE PROGRAMS

The Master of Science (M.S.) Program is intended to extend and broaden an undergraduate background and equip the graduates with fundamental knowledge in bioengineering. It is intended for those students wishing to gain experience in academic research, especially those considering continuing graduate studies at the doctoral level. The M.S. degree may be terminal or may be obtained while pursuing a doctorate. Doctoral degree students wishing to obtain the M.S. degree should refer to "Obtaining an M.S. Degree" under the section, "Doctoral Degree Program."

An individualized program is agreed upon by the student and a faculty advisor. The plan of study must involve both course work and research, culminating in the preparation of a thesis.

A total of forty-eight units of credit is required:

- Thirty-six units in course work. Nine courses, of which six are core courses in Engineering Physics and Life Science and three are elective courses to be selected from course offerings in Bioengineering, other engineering/science departments, and the School of Medicine as described below. The faculty advisor must approve the three elective courses.

- Twelve units in research (S/U grading only). Bioengineering Research (BENG 299) under the direction of the chosen faculty research advisor.

A thesis based on the research is written and subsequently reviewed by the thesis advisor and two other faculty members appointed by the dean of Graduate Studies. The oral defense of the thesis constitutes the departmental master's exam.

Required Core Courses for M.S. Degree Program

CORE COURSES (six required)

ENGINEERING PHYSICS

BENG 221. Mathematical Methods for Bioengineering (F)
BENG 222. Continuum Mechanics and Transport Phenomena in Living Systems (W)
BENG 223. Thermodynamics, Statistical Mechanics, Interfacial Phenomena in Living Systems (S)

LIFE SCIENCE

BENG 230A. Biochemistry (F)
BENG 230B. Cell and Molecular Biology (W)
BENG 231. Foundations of Physiology for Bioengineering (S)

ELECTIVE COURSES (three required from any of the four categories)

SYSTEMS BIOLOGY

BENG 202/CSE 282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (W)
BENG 203/CSE 283. Bioinformatics III: Functional Genomics (S)
BENG 211. Systems Biology & Bioengineering I: Biological Components (F)

BENG 212. Systems Biology & Bioengineering II: Network Reconstruction (W)
BENG 213. Systems Biology & Bioengineering III: Building & Simulating Large-Scale In Silico Models (S)

REGENERATIVE MEDICINE AND IMAGING

BENG 230C. Cardiovascular Physiology (S)
BENG 230D. Respiratory and Renal Physiology (S)
BENG 241A. Foundations of Tissue Engineering (S)
BENG 280A. Principles of Biomedical Imaging (F)
BENG 280B. Comparative Biomedical Imaging (W)

MULTISCALE BIOENGINEERING

BENG 209/MAE 209. Continuum Mechanics Applied to Medicine/Biology (F)
BENG 238/MED 238. Molecular Biology of the Cardiovascular System (S)
BENG 247A/ECE 247A. Advanced BioPhotonics (F)
BENG 247B/ECE 247B. BioElectronics (W)
BENG 247C/ECE 247C. BioNanotechnology (S)
BENG 250A. Biomechanics (W)
BENG 276/Chem. 276/Math. 276. Numerical Analysis in Multi-Scale Biology (S)

OTHER COURSES THAT CAN SERVE AS ELECTIVES

BENG 207. Topics in Bioengineering

Course given at the discretion of the faculty on current topics of interest in bioengineering. (The specific topics course must be approved by the Student Affairs Office.) Graduate level courses must be approved by the assigned advisor (or thesis advisor if determined).

SEMINARS

BENG 281. Seminar in Bioengineering (F,W,S)
BENG 282. (New) Seminar: Faculty Research (F,W,S)

Restrictions to core course work requirements are as follows:

1. Units obtained in BENG 281, 299, or 501 may not be applied toward the course work requirement.
2. No more than a total of eight units of BENG 296 may be applied toward the course work requirement.
3. No more than twelve units of upper-division 100-level bioengineering courses may be applied toward the course work requirement.

Students must maintain at least a B average in the courses taken to fulfill the degree requirements.

Master's Time Limit Policy

Full-time M.S. students are permitted seven quarters in which to complete all requirements. While there are no written time limits for part-time students, the department has the right to set individual deadlines if necessary.

A strong effort is made to schedule M.S.-level course offerings so that students may obtain their M.S. degree in one year of full-time study or two years of part-time study (see regulations on part-time study under "Graduate Studies"). Entering students who do not meet the prerequisites of these core courses may have to take some basic courses to make up the deficiency.

A candidate admitted for the M.S. degree who wishes to transfer to the Ph.D. program must consult the Student Affairs Office for the transfer before completion of the M.S. program.

Change of Degree Aim

Upon completion of the requirements for the M.S. degree, students are not automatically eligible for admission to the Ph.D. program.

M.S. candidates who wish to pursue a doctorate must submit an application for a change in status to the Graduate Studies Committee. The application must be approved and signed by a bioengineering faculty member who expects to serve as the student’s Ph.D. advisor. Applications will be reviewed by an ad hoc faculty committee. If the committee recommends that the student has good potential for success in the doctoral program, the student will be given the opportunity to take an oral examination equivalent to the Ph.D. Departmental Qualifying Examination. At the time of that exam, an assessment will be made concerning admission to the Ph.D. program.

A change of status from a master’s program to the doctoral program requires that the student meet the minimal grade-point average required by the department of doctoral candidates.

MASTER OF ENGINEERING DEGREE PROGRAM

The department offers a master of engineering (M.Eng.) degree. The purpose of this degree is to prepare design and project engineers for careers in the biomedical and biotechnology industries within the framework of the graduate program of the Department of Bioengineering. It is a terminal professional degree in engineering which includes recognition of the importance of breadth in technical knowledge and sufficient electives to address job-specific interests and professional skills such as economics, management, and business. It is intended for students who are primarily interested in engineering design, development, manufacturing, and management within an industrial setting.

The M.Eng. program is a flexible, course-intensive terminal professional degree, designed to be completed in one academic year of full-time study. It does not require a research project, a thesis, or a comprehensive exam. However, students do have the option of enrolling for technical elective credit in BENG 295, Bioengineering Design Project and Industrial Training under the direction of a faculty advisor. This is done by participating in the Graduate Industrial Training Program, which allows students to work in an industrial setting on bioengineering projects in order to gain practical experience. (See “Industrial Internship Program” and “Graduate Industrial Training Program” sections of this catalog.) Students who may be interested in continuing to the Ph.D. program should apply to the M.S. program and not the terminal M.Eng. program.

Students must select six courses from approved core areas, three additional approved technical elective courses from any graduate engineering program, and three general elective courses which may be drawn from the bioengineering core areas.
Required Core Courses for M.Eng. Program (six required)

- Biomechanics and Transport Phenomena—BENG 250A, 222
- Tissue Engineering—BENG 241A-B-C
- Life Science—BENG 230A-B-C
- Other approved core graduate courses taught by bioengineering faculty that satisfy the depth requirement of the M.Eng. degree as approved by the Graduate Studies Committee. A list of applicable approved courses is available from the Department of Bioengineering Student Affairs Office.

Examples of Technical Electives for M.Eng. (three required)

- BENG 202/CSE 282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications
- BENG 207. Neuromuscular Physiology and Biomechanics
- BENG 208. Topics in Bioengineering with Lab
- BENG 209. Continuum Mechanics
- BENG 211/212/213. Systems Bioengineering
- BENG 230A-B-C-D. Biochem/Physiology
- BENG 238/MED 238. Molecular Biology of the Cardiovascular System
- BENG 241A-B-C. Tissue Engineering
- BENG 247A. Biophotonics
- BENG 247B. Bioelectronics
- BENG 247C. Bionanotechnology
- BENG 250A-B. Biomechanics
- BENG 267. Microcirculation in Health and Disease
- BENG 276/Chem. 276/Math. 276. Numerical Analysis in Multi-Scale Biology
- BENG 280A-B. Biomedical Imaging
- BENG 295. Bioengineering Design Project (two-quarters, four units each)
- MAE 210A-B-C. Fluid Mechanics
- MAE 221A-B-C. Heat and Mass Transfer
- MAE 229A. Mechanical Properties
- MAE 231A-B-C. Solid Mechanics
- MAE 280A. Linear Systems Theory
- MAE 293. Advanced Computer Graphics for Engineers and Scientists
- MATS 253. Nanomaterials and Properties
- CSE 202. Algorithm Design and Analysis
- CSE 206B. Algorithms in Computational Biology
- CSE 210. Principles of Software Engineering
- CSE 250A. Artificial Intelligence
- ECE 235. Nanometer-Scale Probes and Devices

ECE 251AN, BN. Digital Image Processing and Analysis

Examples of General Electives for M.Eng. (three required)

- BENG 161A-B-C. Biochemical, Bioreactor, and Metabolic Engineering
- BENG 186A-B-C. Principles of Biomaterials, Bioinstrumentation, and Bioengineering Design
- BENG 207. Topic Courses
- BENG 225. BioBusiness: Biotech Company
- Chem. 140A-B-C. Organic Chemistry
- ENG 201, 202, 203. Entrepreneurism
- ECE 138L. Microstructuring Processing Technology Laboratory
- ECE 254. Detection Theory
- IR/PS Management: IRGN 420, 434, 438, 442, 444, 445, IRCO 420, 421, 490G
- IR/PS International Issues: IRCO 401, IRGN 407, 411, 413, 418
- ECON 133. International Environmental Agreements
- ECON 172A-B-C. Introduction to Operations Research
- ECON 175. Financial Investments
- ECON 178. Economic and Business Forecasting

DOCTORAL DEGREE PROGRAM

The bioengineering Ph.D. program is intended to prepare students for a variety of careers in research and teaching. Therefore, depending on the student’s background and ability, research is initiated as soon as possible. Bioengineering students have specific course requirements and must maintain a minimum grade-point average of 3.4 in these courses. Students, in consultation with their advisors, develop course programs that will prepare them for the Departmental Qualifying Examination and for their dissertation research. These programs of study and research must be planned to meet the time limits established to advance to candidacy and to complete the requirements for the degree. Doctoral students who have passed the Departmental Qualifying Examination may take any course for an S/U grade with the exception of courses required by the Departmental or Senate Qualifying Examination Committee. It is recommended that all bioengineering graduate students take a minimum of two courses (other than research) per academic year after passing the Departmental Qualifying Examination. Details can be obtained from the Student Affairs Office.

Doctoral Examinations

A bioengineering Ph.D. student is required to pass three examinations. The first is a Departmental Qualifying Examination, which must be taken during the spring quarter of the first year of study. The exam is designed to ensure that all successful candidates possess a firm command of the engineering and life science subjects that form the foundations of bioengineering research and their integration at a level appropriate for the doctorate. It is administered by a committee designated by the department, consisting of departmental faculty members and, in some cases, other faculty members from a related academic department (e.g., MAE, ECE, medicine). The scope of the oral examination includes the two broad areas that form the core first-year Ph.D. curriculum, namely Engineering Physics and Life Science. The purpose of the exam is not merely to recapitulate the content of first-year courses, but rather to establish that students are able to synthesize this knowledge and apply it to solve problems in contemporary bioengineering research.

Curriculum for First-Year Ph.D. Students

All bioengineering students are expected to enroll for letter grade credit in the core courses in Engineering Physics and Life Sciences tracks listed below. In addition they are required to take three electives for a letter grade from among the courses listed based on advice from the graduate advisor. Each incoming student will be assigned a bioengineering faculty advisor who will serve as a graduate advisor until the student chooses a thesis advisor. First-year students are also required to enroll in two one-credit seminars.

Core Courses (all six required)

ENGINEERING PHYSICS

- BENG 221. Mathematical Methods for Bioengineering (F)
- BENG 222. Continuum Mechanics and Transport Phenomena in Living Systems (W)
- BENG 223. Thermodynamics, Statistical Mechanics, Interfacial Phenomena in Living Systems (S)

LIFE SCIENCE

- BENG 230A. Biochemistry (F)
- BENG 230B. Cell and Molecular Biology (W)
- BENG 231. Foundations of Physiology for Bioengineering (S)

Elective Courses (three required, from any of the four categories)

SYSTEMS BIOLOGY

- BENG 202/CSE 282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (W)
- BENG 203/CSE 283. Bioinformatics III: Functional Genomics (S)
- BENG 211. Systems Biology and Bioengineering I: Biological Components (F)
BENG 212. Systems Biology and Bioengineering II: Network Reconstruction (W)
BENG 213. Systems Biology and Bioengineering III: Building and Simulating Large-Scale In Silico Models (S)

REGENERATIVE MEDICINE AND IMAGING
BENG 230C/BIOC 271. Cardiovascular Physiology (S)
BENG 230D. Respiratory and Renal Physiology (S)
BENG 241A. Foundations of Tissue Engineering (S)
BENG 280A. Principles of Biomedical Imaging (F)
BENG 280B. Comparative Biomedical Imaging (W)

MULTISCALE BIOENGINEERING
BENG 209/MAE 209. Continuum Mechanics Applied to Medicine/Biology (F)
BENG 238/MED 238. Molecular Biology of the Cardiovascular System (S)
BENG 247A/ECE 247A. Advanced Biophotonics (F)
BENG 247B/ECE 247B. Bioelectronics (W)
BENG 247C/ECE 247C. Bionanotechnology (S)
BENG 250A. Biomechanics (W)
BENG 276/Chem. 276/Math. 276/Pharm 276. Numerical Analysis in Multi-Scale Biology (S)

OTHER COURSES THAT CAN SERVE AS ELECTIVES
BENG 207. Topics in Bioengineering
Course given at the discretion of the faculty on current topics of interest in bioengineering. (The specific topics course must be approved by the Student Affairs Office.)
Graduate level courses approved by the assigned advisor (or thesis advisor if determined).

SEMINARS
BENG 281. Seminar in Bioengineering (F,W,S)
BENG 282. (New) Seminar: Faculty Research (F,W,S)
In addition to the above mentioned breadth requirements, students must complete the following courses in their second and subsequent years of study:
• At least two four-unit courses from an approved list that includes the bioengineering graduate course sequences, other engineering/science course offerings, and School of Medicine courses. Students often take SOM courses to fulfill the second-year course requirements. The faculty advisor must approve the courses. Approved courses include BENG 203, BENG 207, BENG 230D, BENG 247A-B-C, BENG 250B, BENG 238, MAE 231A-B-C, MAE 210A-B-C, MAE 207, MAE 221A, MATS 253, ECE 251, Chem. 211, and MAM 238
• One quarter of BENG 501. Teaching Experience
Courses comprising subject areas as well as subsequent requirements and composition of the examination committee, must be approved by the Graduate Studies Committee. Students are advised to seek such approval well in advance of their expected examination date, preferably while planning graduate studies.
Teaching experience is required of all bioengineering Ph.D. students prior to taking the Senate Qualifying Exam described below. Teaching experience is defined as service as a graduate student instructor in a course designated by the department. The total teaching requirement for new Ph.D. students is four quarters at 25 percent effort (ten hours per week). At least one quarter of teaching experience is required during the first year (prior to the departmental qualifying examination) and at least one quarter in the second year. Teaching experience can be fulfilled as a requirement for student support or taken as a course for academic credit (BENG 501). Students must contact the Student Affairs Office to plan for completion of this requirement.
The Senate Qualifying Examination is the second examination required of bioengineering Ph.D. students. In preparation for this examination, students must have completed the Departmental Qualifying Examination and the departmental teaching experience requirement, obtained a faculty research advisor, and identified a topic for their dissertation research and made initial progress. At the time of application for advancement to candidacy, a doctoral committee responsible for the remainder of the student’s graduate program is appointed by the Graduate Council. The committee conducts the Senate Qualifying Examination, during which students must demonstrate the ability to engage in thesis research. This involves the presentation and defense of a plan for the thesis research project. Upon successful completion of this examination, students are advanced to candidacy and are awarded the Candidate in Philosophy degree (see “Graduate Studies” section in this catalog).
The Dissertation Defense is the final Ph.D. examination. Upon completion of the dissertation research project, the student writes a dissertation that must be successfully defended in a public presentation and oral examination conducted by the doctoral committee. A complete copy of the student’s dissertation must be submitted to each member of the doctoral committee approximately four weeks before the defense. It is understood that this copy of the dissertation given to committee members will not be the final copy, and that the committee members may suggest changes in the text at the time of the defense. This examination must be conducted after completion of at least three quarters from the date of advancement to doctoral candidacy. Acceptance of the dissertation by the Office of Graduate Studies and the university librarian represents the final step in completion of all requirements for the Ph.D.
There is no formal foreign language requirement for doctoral candidates. Students are expected to master whatever language is needed for the pursuit of their own research.

Obtaining an M.S. Degree
Ph.D. students may obtain the M.S. degree by completing the course work requirements and by passing the Ph.D. departmental qualifying examination. Course work requirements include successful completion of a total of forty-eight units of credit comprising Engineering Physics and Life Science and two four-unit courses from an approved list taken during the second year of the Ph.D. degree (see details on course work requirements in the section “Doctoral Degree Program”). Students should consult with the Student Affairs Office in advance of their second year of study concerning required paperwork and deadlines for conferral of the M.S. degree.

Ph.D. Time Limit Policy
Precandidacy status is limited to three years. Doctoral students are eligible for university support for six years. The defense and submission of the doctoral dissertation must be within seven years.

Evaluations
In the spring of each year, the faculty evaluate each doctoral student’s overall performance in course work, research, and prospects for financial support for future years. A written assessment is given to the student after the evaluation. If a student’s work is found to be inadequate, the faculty may determine that the student cannot continue in the graduate program.

COURSES
For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

NOTE: The department will endeavor to offer the courses as outlined below; however, unforeseen circumstances sometimes mandate a change of scheduled offerings. Students are strongly advised to check with the department’s Student Affairs Office. This is of particular importance in planning schedules to satisfy graduation requirements.
The following schedule is tentative for the academic year 2009–10 only. The quarter in which a course is scheduled may differ in subsequent academic years. Students should consult TritonLink and the Student Affairs Office to obtain current information.
Prerequisites are enforced when students register for courses. Students who have satisfied prerequisites at another institution or by AP credit need to be pre-approved to register in these courses. If pre-authorization is necessary, students should contact the Student Affairs Office before the scheduled registration period.
Some courses require a course material fee.

LOWER-DIVISION
BENG 1. Introduction to Bioengineering (1)
An introduction to the central topics of bioengineering in a seminar format. The principles of problem definition, team design, engineering inventiveness, information access, communication, ethics, and social responsibility will be emphasized. P/NP grading only. PREREQUISITE: none. (W)
BENG 87. Freshman Seminar (1)
The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to fifteen to twenty students, with preference given to entering freshmen. (F,W,S)
BENG 97. Internship/Field Studies (1–4)
An enrichment program available to a limited number of lower-division undergraduate students, which provides work experience with industry, government offices, and hospitals. The internship is coordinated through UCSD’s Academic Internship Program under the supervision of a faculty member and an industrial, government, or hospital employee. PREREQUISITES: lower-division standing.
completion of thirty units of UCSD undergraduate study, a minimum UCSD GPA of 3.0, and a completed and approved Special Studies form. (F,WS)

BENG 98. Directed Group Study (1-4)
Directed group study on a topic or in a field not included in the regular curriculum. (P/NP grades only) **PREREQUISITES:** lower-division standing, completion of thirty units of undergraduate study at UCSD with a UCSD GPA of at least 3.0 and consent of a Bioengineering faculty member; completed and approved Special Studies form.

BENG 99. Independent Study for Undergraduates (4)
Independent reading or research by arrangement with a Bioengineering faculty member. **PREREQUISITES:** lower-division standing, completion of thirty units of undergraduate study at UCSD with a UCSD GPA of at least 3.0 and consent of a Bioengineering faculty member; completed and approved Special Studies form.

BENG 99R. Independent Study (1)
Independent study or research under direction of a member of the faculty. **PREREQUISITES:** student must be of first-year standing and a Regent's Scholar; approved Special Studies form.

**UPPER-DIVISION**

**BENG 100. Introduction to Bioengineering Design (4)**
A general introduction to bioengineering design, including examples of engineering analysis and design applied to representative topics in biomechanics, bioinstrumentation, biomaterials, biotechnology, and related areas. A review of technological needs, design methodology, testing procedures, statistical analysis, governmental regulation, evaluation of costs and benefits, quality of life, and ethical issues. **PREREQUISITES:** BENG 1; grade of C– or better in Math. 21C or Math. 20C and Math. 21D or Math. 20D, and Phys. 2C; majors only. (S)

**BENG 101. Foundations of Biomedical Imaging (4)**
An introduction to the principles and applications of biomedical imaging, with emphasis on the acquisition, processing, display of imagery, and design of imaging systems. Filtering, convolution, and Fourier methods. Microscopy, radiography, ultrasound, magnetic resonance, ultrason, and nuclear imaging. **PREREQUISITES:** Grade of C- or better in BENG 100; majors only or consent of department. (F)

**BENG 103B. Bioengineering Mass Transfer (4)**
Mass transfer in solids, liquids, and gases with application to biological systems. Free and facilitated diffusion. Convective, mixed, and diffusion-reaction phenomena. Active transport. Biological mass transfer coefficients. Steady and unsteady state. Flux-force relationships. **PREREQUISITES:** Concurrent enrollment in BENG 107A or BENG 112A; majors only or consent of instructor. (S)

**BENG 109. Bioengineering Statics and Dynamics (4)**
Newton's Laws. Static resistant forces and moments. Conservation laws of dynamics. Muscle and joint loads. Human body dynamics, locomotion, and clinical applications. Bodies in contact: friction, momentum, and impulse; impact and injury. Work, power, and energy relationships. Bioengineering design problems. **PREREQUISITES:** grade of C- or better in Math. 21D or Math. 20D; Phys. 2C; majors only or consent of instructor. (W)

**BENG 110. Continuum Mechanics (4)**
An introduction to continuum mechanics of both living and nonliving bodies. The laws of motion and free-body diagrams. Stresses. Deformation. Compatibility conditions. Constitutive equations. Properties of common fluids and solids. Derivation of field equations and boundary conditions. Applications to bioengineering design. **PREREQUISITES:** grades of C– or better in Physics 2A, 2B, 2C, and BENG 109; majors only or consent of instructor. (F)

**BENG 112A. Biomechanics (4)**
Introduction to physiological systems, with emphasis on structure and function of major tissues and organs. Application of mechanics to understand the behavior of these tissues and organs at gross and microscopic levels. Bioelastic solids. Rigid body biomechanics. Biomechanics and medical design. **PREREQUISITES:** grade of C– or better in BENG 110; majors only or consent of instructor. (W)

**BENG 112B. Biomechanics (4)**
Biomechanics of living tissues with emphasis on continuum analysis of problems in biofluid and cell mechanics. Engineering design and problem solving in the biomechanics of mammalian tissues, especially those of the cardiovascular system. **PREREQUISITES:** grade of C– or better in BENG 112A; majors only or consent of instructor. (S)

**BENG 119A. Design Development in Biomechanics (3)**
Development of design project in biomechanics. **PREREQUISITES:** concurrent enrollment in BENG 197B; Bioengineering or Biotechnology majors only or consent of instructor. (F)

**BENG 119B. Design Implementation in Biomechanics (3)**
Implementation of design project in biomechanics. **PREREQUISITES:** grade of C– or above in BENG 119A; concurrent enrollment in BENG 197C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

**BENG 122A. Biosystems and Control (4)**
Systems and control theory applied to bioengineering. Modeling, linearization, transfer functions, Laplace transforms, closed-loop systems, design and simulation of controllers. Dynamic behavior and controls of first and second order processes. PID controllers. Stability. Bode design. Features of biological controls systems. A simulation term project using MATLAB and an oral presentation are required. **PREREQUISITES:** grade of C– or better in MAE 140; majors only or consent of department. (W)

**BENG 123. Systems Biology and Bioengineering (4)**
Systems biology and bioengineering consists of: (1) enumeration of biological components participating in a biological process, (2) reconstruction of interactions to form a network, (3) mathematical representation for analysis, interpretation, and prediction, (4) model validation and use in prospective design. **PREREQUISITES:** grade of C– or better in BIBC 100; majors only or consent of instructor. (W)

**BENG 125. Modeling and Computation in Bioengineering (4)**
Computational modeling of molecular bioengineering phenomena: excitable cells, regulatory networks, and transport. Application of ordinary, stochastic, and partial differential equations. Introduction to data analysis techniques: power spectra, wavelets, and nonlinear time series analysis. **PREREQUISITES:** grade of C– or better in BENG 122A or BENG 113; majors only or consent of instructor. (S)

**BENG 126A. Design Development in Bioinformatics Bioengineering (3)**
Development of design project in bioinformatics bioengineering. **PREREQUISITES:** concurrent enrollment in BENG 197B; Bioengineering or Biotechnology majors only or consent of instructor. (F)

**BENG 126B. Design Implementation in Bioinformatics Bioengineering (3)**
Implementation of design project in bioinformatics bioengineering. **PREREQUISITES:** grade of C– or above in BENG 126A; concurrent enrollment in BENG 197C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

**BENG 127A. Design Development in Molecular Systems Bioengineering (3)**
Development of design project in molecular systems bioengineering. **PREREQUISITES:** concurrent enrollment in BENG 187B; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (F)

**BENG 127B. Design Implementation in Molecular Systems Bioengineering (3)**
Implementation of design project in molecular systems bioengineering. **PREREQUISITES:** grade of C– or above in BENG 127A; concurrent enrollment in BENG 187C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

**BENG 128A. Design Development in Genetic Circuits Bioengineering (3)**
Development of design project in genetic circuits bioengineering. **PREREQUISITES:** concurrent enrollment in BENG 187B; Bioengineering or Biotechnology majors only or consent of instructor. (F)

**BENG 128B. Design Implementation in Genetic Circuits Bioengineering (3)**
Implementation of design project in genetic circuits bioengineering. **PREREQUISITES:** grade of C– or above in BENG 128A; concurrent enrollment in BENG 187C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

**BENG 129A. Design Development in Cell Systems Bioengineering (3)**
Development of design project in cell systems bioengineering. **PREREQUISITES:** concurrent enrollment in BENG 187B; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (F)

**BENG 129B. Design Implementation in Cell Systems Bioengineering (3)**
Implementation of design project in cell systems bioengineering. **PREREQUISITES:** grade of C– or above in BENG 129A; concurrent enrollment in BENG 187C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

**BENG 130. Molecular Physical Chemistry (4)**
An introduction to physical principles that govern biological matter and processes. Thermodynamic principles and their molecular origin, structural basis of life and physical and conceptual models to illustrate life phenomena. (Credit allowed for one of the following: Chem. 126, Chem. 127, Chem. 131, or BENG 130.) **PREREQUISITES:** grade of C– or better in Chem. 6B, Math. 20A, 20B, Physics 2A, 2B, 2C. (Physics 2C may be taken concurrently); majors only or consent of instructor. (W)

**BENG 139A. Design Development in Molecular Biotechnology (3)**
Development of design project in molecular biotechnology. **PREREQUISITES:** concurrent enrollment in BENG 187B; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (F)

**BENG 139B. Design Implementation in Molecular Biotechnology (3)**
Implementation of design project in molecular biotechnology. **PREREQUISITES:** grade of C– or above in BENG 139A; concurrent enrollment in BENG 187C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

**BENG 140A. Bioengineering Physiology (4)**
Introductory mammalian physiology for bioengineering students, with emphasis on control mechanisms and engineering principles. Basic cell functions; biological control systems; muscle; neural; endocrine, and circulatory systems. Not intended for premedical bioengineering students. (Credit not allowed for both BIPN 100 and BENG 140A.) **PREREQUISITES:** grade of C– or better in Chem. 6A, 6B, Physics 2A, 2B, 2C, BILD 1; majors only or consent of instructor. (W)

**BENG 140B. Bioengineering Physiology (4)**
Introductory mammalian physiology for bioengineering students, with emphasis on control mechanisms and engineering principles. Digestive, respiratory, renal, and reproductive systems; regulation of metabolism, and defense mechanisms. (Credit not allowed for both BIPN 100 and BENG 140B.) **PREREQUISITES:** grade of C– or better in BENG 140A; majors only or consent of instructor. (S)

**BENG 147A. Design Development in Neural Engineering (3)**
Development of design project in neural engineering. **PREREQUISITES:** concurrent enrollment in BENG 187B; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (F)

**BENG 147B. Design Implementation in Neural Engineering (3)**
Implementation of design project in neural engineering. **PREREQUISITES:** grade of C– or above in BENG 147A; concurrent enrollment in BENG 187C; Bioengineering or
Bioengineering: Biotechnology majors only or consent of instructor. (W)

BENG 148A. Design Development in Cardiac Bioengineering (3)
Development of design project in cardiac bioengineering. PREREQUISITES: concurrent enrollment in BENG 167B; Biotechnology or Biengineering: Biotechnology majors only or consent of instructor. (F)

BENG 148B. Design Implementation in Cardiac Bioengineering (3)
Implementation of design project in cardiac bioengineering. PREREQUISITES: grade of C– or above in BENG 148A; concurrent enrollment in BENG 187C; Biotechnology or Biengineering: Biotechnology majors only or consent of instructor. (W)

BENG 149A. Design Development in Vascular Bioengineering (3)
Development of design project in vascular bioengineering. PREREQUISITES: concurrent enrollment in BENG 167B; Biotechnology or Biengineering: Biotechnology majors only or consent of instructor. (F)

BENG 149B. Design Implementation in Vascular Bioengineering (3)
Implementation of design project in vascular bioengineering. PREREQUISITES: grade of C– or above in BENG 149A; concurrent enrollment in BENG 167C; Biotechnology or Biengineering: Biotechnology majors only or consent of instructor. (W)

BENG 160. Chemical and Molecular Bioengineering Techniques (4)
Introductory laboratory course in current principles and techniques of chemistry and molecular biology applicable to bioengineering. Quantitative of proteins and nucleic acids by spectrophotometric, immunological, and enzymatic methods. Separations and purification by centrifugation, chromatographic, and electrophoretic methods. Course material may apply. PREREQUISITES: grade of C– or better in BIBC 102, BICD 100, BENG 100, MAE 170; majors only or consent of instructor. (S)

BENG 161A. Bioreactor Engineering (4)
Engineering, biochemical, and physiological considerations in the design of bioreactor processes: enzyme kinetics, mass transfer limitations, microbial growth, and product formation kinetics. Fermentation reactor selection, design, scale-up, control, quantitative. Bioanalytical engineering analysis and design of biochemical processes and experiments on biomolecules. PREREQUISITES: grade of C– or better in Chem. 114B or BIBC 102 (may be taken concurrently), BENG 122A, BENG 123, and/or BIBC 103 or BENG 160; majors only or consent of instructor. (F)

BENG 161B. Biochemical Engineering (4)
Commercial production of biochemical commodity products. Application of genetic control systems and mutant populations. Recombinant DNA and eucaryotic proteins in the design of bioreactor processes. PREREQUISITES: grade of C– or better in Chem. 114B or BIBC 102 (may be taken concurrently), BENG 122A, BENG 123, and/or BIBC 103 or BENG 160; majors only or consent of instructor. (W)

BENG 161C. Metabolic Engineering (4)
Engineering systems analysis of metabolic and regulatory processes. Use of high-throughput data techniques. Bioinformatics focused on discovering the complex regulatory and metabolic interactions of these processes. Use of bioinformatics data to understand genetic network topology. PREREQUISITES: concurrent enrollment in BENG 187C; Biotechnology or Biengineering: Biotechnology majors only or consent of instructor. (W)

BENG 162. Biotechnology Laboratory (4)
Laboratory practices and design principles for biotechnology. Culture of microorganisms and mammalian cells, recombinant DNA bioreactor design and operation. Design and implementation of biosensors. A team design-based term project and oral presentation required. Course material fee(s) may apply. PREREQUISITES: grade of C– or above in MAE 170; Bioengineering or BENG 160; majors only or consent of instructor. (F)

BENG 166A. Cell and Tissue Engineering (4)
Engineering analysis of physico-chemical rate processes that affect, limit, and govern the function of cells and tissues. Cell migration, mitosis, apoptosis, and differentiation. Dynamic and structural interactions between mesenchyme and parenchyme. The role of the tissue microenvironment including cell-cell interactions, extracellular matrix, and growth factor communication. The design of functional tissue substitutes including cell and material sourcing, scale-up and manufacturing, and safety regulatory, and ethical topics. Clinical Applications. PREREQUISITES: grade of C– or better in BENG 130B or BENG 112B; senior standing; majors or only consent of department. (F)

BENG 167. Cell and Tissue Engineering Laboratory (4)
An introduction to contemporary methods and applications. Students will formulate and test hypotheses related to the design and production of functional tissue substitutes. Topics to be explored include tissue characterization, biomaterial scaffolds, cell migration, adhesion, and growth. PREREQUISITE: BENG 166A; majors only or consent of instructor. (S)

BENG 168. Biomedical Engineering (4)
Basic molecular biology and recombinant DNA technologies; design and manufacture of recombinant proteins and genetically engineered cells; architecture and mechanism of molecular nanomachines that perform gene regulation, energy conversion, enzymatic catalysis, and active transport. PREREQUISITE: grade of C– or better in BILD 1 and BENG 100; majors only or consent of instructor. (S)

BENG 169A. Design Development in Tissue Engineering (3)
Development of design project in tissue bioengineering. PREREQUISITES: concurrent enrollment in BENG 187B; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (F)

BENG 169B. Design Implementation in Tissue Engineering (3)
Implementation of design project in tissue engineering. PREREQUISITES: grade of C– or above in BENG 169A; concurrent enrollment in BENG 187C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

BENG 172. Bioengineering Laboratory (4)
A laboratory course demonstrating basic concepts of biomechanics, bioengineering design, and experimental procedures involving animal tissue. Sources of error and experimental limitations. Computer data acquisition, modeling, statistical analysis, and parameter estimation. PREREQUISITE: grade of C– or better in MAE 170; junior or senior standing in the major or consent of instructor. (S)

BENG 173. Bioengineering Project Laboratory (5)
Applications of bioengineering concepts to the solution of practical and research problems. Planning, design, and testing of prototype devices. Term project and oral presentation are required. PREREQUISITES: majors only; consent of instructor; BENG 112B, BENG 172. (Not offered in 2009–10.) (S)

BENG 179A. Design Development in Bioinstrumentation (3)
Development of design project in bioinstrumentation. PREREQUISITES: concurrent enrollment in BENG 187B; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (F)

BENG 179B. Design Implementation in Bioinstrumentation (3)
Implementation of design project in bioinstrumentation. PREREQUISITES: grade of C– or above in BENG 179A; concurrent enrollment in BENG 187C; Bioengineering or Biotechnology: Biotechnology majors only or consent of instructor. (W)

BENG/BIMM/CSE 181. Molecular Sequence Analysis (4)
(Cross-listed as BIMM 181 and CSE 181.) This course covers the analysis of nucleic acid and protein sequences, with an emphasis on the application of algorithms to biological problems. Topics include sequence alignments, database searching, comparative genomics, and phylogenetic and clustering analyses. Pairwise alignment, multiple alignment, hidden Markov models/support vector machines/neural network/profiles, and protein structure prediction. Pattern discovery, hidden Markov models/support vector machines/neighborhood networks, protein structure prediction, functional characterization of proteins, functional genomics/proteomics, metabolic pathways/gene networks. PREREQUISITES: BENG 181 or BIMM 181 or CSE 181; BENG 182 or BIMM 182 or CSE 182 or Chem. 114C; BICD 110; Bioinformatics majors only. (F)

BENG/BIMM/CSE/Chem. 184. Computational Molecular Biology (4)
(Cross-listed as BIMM 184, CSE 184, and Chem. 184.) This advanced course covers the application of machine learning and modeling techniques to biological systems. Topics include gene structure, recognition of DNA and protein sequence patterns, classification, and protein structure prediction. Pattern discovery, hidden Markov models/support vector machines/neighborhood networks, protein structure prediction, functional characterization of proteins, functional genomics/proteomics, metabolic pathways/gene networks. PREREQUISITES: BENG 181 or BIMM 181 or CSE 181; BENG 182 or BIMM 182 or CSE 182 or Chem. 182; Bioinformatics majors only. (W)

BENG 186A. Principles of Biotransformations (3)
Fundamentals of materials science as applied to bioengineering design. Natural and synthetic polymeric materials characterization and design, wound repair, blood clotting, foreign body response, transplantation biology, biocompatibility of materials, tissue engineering. Artificial organs and medical devices. Government regulations. Patenting. Economic impact. Ethical issues. A term project and oral presentation are required. PREREQUISITES: grade of C– or better in BENG 112B or senior standing in Bioengineering: Biotechnology major; majors only or consent of department. (S)

BENG 186B. Principles of Bioinstrumentation Design (4)
Biophysical phenomena, transducers, and electronics as related to the design of biomedical instrumentation. Potentiometric and amperometric signals and amplifiers. Biopotentials, membrane potentials, chemical sensors. Electrical safety. Mechanical transducers for displacement, force, and pressure. Temperature sensors. Flow sensors. Light-based instrumentation. PREREQUISITES: grade of C– or better in MAE 140 and MAE 170; majors only or consent of instructor. (W)

BENG 186C. Bioengineering Design (4)
Development of a bioengineering design described in a formal engineering report. Engineering analysis and application of methodologies from applied sciences, biology, bioengineering, and chemistry. Analysis of economic, environmental, manufacturing, ethical, health and safety, social issues, and application of governmental regulations. PREREQUISITES: grade of C– or better in BENG 103B, BENG
BENG 187A. Bioengineering Design Project: Planning (I)
General engineering design topics, including project planning and design objectives, background research, engineering needs assessment, and technical design specifications and requirements. Introduction to biomedical and biotechnology design projects. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. PREREQUISITES: grade of C– or better in BENG 110 or BICD 100; BENG 112A or CENG 101A; BENG 140A or IIBC 120; BENG 166B or BENG 123; Bioengineering or Biotechnology majors only or consent of instructor. (S)

BENG 187B. Bioengineering Design Project: Development (I)
Development of original bioengineering design solution to the problem of biology or medicine. Analysis of economic issues, manufacturing and quality assurance, ethics, safety, government regulations, and patent requirements. Oral presentation and formal engineering reports. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. PREREQUISITES: grade of C– or better in BENG 120 or BENG 123; concurrent enrollment in one of BENG 119A, BENG 126A, BENG 127A, BENG 128A, BENG 139A, BENG 147A, BENG 148A, BENG 149A, BENG 169A, or BENG 179A; Bioengineering or Biotechnology majors only or consent of instructor. (F)

BENG 187C. Bioengineering Design Project: Implementation (I)
Approaches to implementation of senior design project, including final report. Teams will report on construction of prototypes, conducting of tests, collection of data, and assessment of reliability and failure. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. PREREQUISITES: grade of C– or better in BENG 187A, MAE 120, and BENG 112B or BENG 123; concurrent enrollment in one of BENG 119A, BENG 126A, BENG 127A, BENG 128A, BENG 139A, BENG 147A, BENG 148A, BENG 149A, BENG 169A, or BENG 179A; Bioengineering or Biotechnology majors only or consent of instructor. (W)

BENG 187D. Bioengineering Design Project: Presentation (I)
Oral presentations of design projects, including design, development, and implementation strategies and results of prototype testing. Majors must enroll in the course for a letter grade in order to count the sequence toward the major. No exceptions will be approved. PREREQUISITES: grade of C– or better in BENG 187B; concurrent enrollment in one of the following lab sections: BENG 119B, BENG 126B, BENG 127B, BENG 128B, BENG 129B, BENG 139B, BENG 147B, BENG 148B, BENG 149B, BENG 169B, or BENG 179B; Bioengineering or Biotechnology majors only or consent of instructor. (W)

BENG 186B. Principles of Bioinstrumentation (Design) (4)

BENG 189. Directed Group Study (1-4)
Directed group study, on a topic or in a field not included in the regular department curriculum, by arrangement with a bioengineering faculty member. (F/P/NP grades only.) PREREQUISITES: consent of instructor. (W)

BENG 190. Independent Study for Undergraduates (4)
Independent reading or research by arrangement with a bioengineering faculty member. May be taken for credit three times. (F/P/NP grades only.) PREREQUISITES: upper-division standing, completion of ninety units of UCSD undergraduate study, a minimum UCSD GPA of 2.5, consent of instructor, and a completed and approved Special Studies form. (F/W/S)

BENG 202C/282. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (4) (Formerly BENG 202C/257A.) Introduction to methods for sequence analysis. Applications to genome and proteome sequences. Protein structure, sequence-structure analysis. PREREQUISITES: Pharm. 201 or consent of instructor. (W)

Annotating genomes, characterizing functional genes, profiling, reconstructing pathways. PREREQUISITES: Pharm. 201, BENG 202C/282 or consent of instructor. (S)

BENG 207. Topics in Bioengineering (4)
Course given at the discretion of the faculty on current topics of interest in bioengineering. (F/W/S)

BENG 208. Topics in Bioengineering with Lab (4)
A course to be given at the discretion of the faculty on topics of current interest in engineering science. This course is intended to be a lecture and lab companion topics course. PREREQUISITES: consent of instructor. (S)

Introduction to the basic definitions of Continuum Mechanics and their mathematical formulation at the graduate level with applications to problems in medicine and biology. This course is intended for students with little or no background in mechanics; it is an introduction to the Bioengineering courses BENG 250 A-B in the Department of Bioengineering and to Solid and Fluid Mechanics courses MAE 210A and MAE 231A in the Department of Mechanical and Aerospace Engineering. This course should not be taken concurrently with MAE 210A or MAE 231A. PREREQUISITES: consent of instructor. (F)

BENG 211. Systems Biology and Bioengineering: I. Biological Components (4)
Components of biological systems, their biochemical properties and function. The technology used for obtaining component lists. Relationships within and integration of component lists. Structured vocabularies and component ontologies. Algorithms for comparative approaches in deciphering and mining component lists. PREREQUISITES: BENG 230A or BIMM 100 or consent of instructor. (F)

BENG 212. Systems Biology and Bioengineering: II. Network Reconstruction (4)
This course will cover the process of reconstructing complex biological reaction networks. Reconstruction of metabolic networks, regulatory networks and signaling networks. Bottom-up and top-down approaches. The use of collections of historical data. The principles underlying high-throughput experimental technologies and examples given on how this data is used for network reconstruction, consistency checking, and validation. PREREQUISITE: BENG 211 or consent of instructor. (W)

BENG 213. Systems Biology and Bioengineering: III. Building and Simulating Large-Scale in Silico Models (4)
Mathematical models of reconstructed reaction networks and simulation of their emergent properties. Classical kinetic theory, stochastic simulation methods and constraints-based models. Methods that are scalable and integrate multiple cellular processes will be emphasized. Existing genome-scale models will be used for network reconstruction, computations performed. Emphasis will be on studying the genotype-phenotype relationship in an in silico model driven fashion. Comparisons with phenotypic data will be emphasized. PREREQUISITE: BENG 212 or consent of instructor. (S)

BENG 221. Mathematical Methods for Bioengineering (4)
Introduction of the foundations of engineering by teaching the mathematical methods that describe the engineering principles. Analytical and numerical approaches to solving the equations. PREREQUISITE: graduate standing in bioengineering or consent of instructor. (F)

BENG 222. Continuum Mechanics and Transport Phenomena in Living Systems (4)
Introduction to engineering problems from a physics and a problem-solving perspective. Important bioengineering problems in mechanics and transport will be discussed with case studies. PREREQUISITE: graduate standing in bioengineering or consent of instructor. (W)

BENG 223. Thermodynamics, Statistical Mechanics, Interfacial Phenomena in Living Systems (4)
Thermodynamics, statistical mechanics, and interfacial phenomena that emphasize the chemical natures of living systems. Topics include intermolecular and surface forces, calculation of energetic processes, computation of electrical forces and fields, and principles of physics in multiscale engineering and design. PREREQUISITE: graduate standing in bioengineering or consent of instructor. (W)

Biotech is a special breed of business, especially in the start-up and early phases. Whether you are considering joining a biotech start-up or want to be successful in a life science organization, it pays to understand this unique business model. In this course, you will study and analyze (1) business plan development (2) the business case for the biotech industry (3) biotech categories and growth strategies (4) the process of spinning out viable product concepts from academia (5)
financing techniques (6) business development (7) acquisition/ IPO valuation methods and (8) potentially disruptive technologies. The format is highly interactive and learning is enhanced through small group exercises, team presentations, and case studies. PREREQUISITE: bioengineering M.Eng. degree student or consent of instructor. (S)

BENG 230A. Biochemistry (4) A graduate course in biochemistry especially tailored to the requirements and background of bioengineering graduate students. It will cover the important macro- and small molecules in cells that are the major constituents, or that function as signaling molecules or molecular machineries. The structures, pathways, interactions, methodologies, and molecular designs using recombinant DNA technology will be covered. PREREQUISITES: BIPN 100 and 102 or consent of instructor. (F)

BENG 230B. Cell and Molecular Biology (4) A general survey of structure-function relationships at the molecular and cellular levels. Emphasis on basic genetic mechanisms; control of gene expression; membrane structure, transport and traffic; cell signaling; cell adhesion; mechanisms of cell division; and cytoskeleton. PREREQUISITES: BIPN 100, 102, and BENG 230A, or consent of instructor. (W)

BENG 230C/BION 271. Cardiovascular Physiology (4) Physical concepts of behavior of heart, large blood vessels, vascular beds in major organs and the microcirculation. Physical and physiological principles of blood flow, blood pressure, and electromechanics of the heart. Special vascular beds, including their biological and hemodynamic importance. Integration through nervous and humoral controls. PREREQUISITES: BIPP 100, 102, and BENG 230B, or consent of instructor. (S)

BENG 231. Foundations of Physiology for Bioengineering (4) Introduction to human physiology emphasizing quantitative physiological principles and engineering applications to the study and understanding of physiological systems. The study of principal organ systems will be integrated with cell and molecular biology, biological control systems, and the physical sciences. PREREQUISITE: graduate standing in bioengineering or consent of instructor. (S)

BENG 238/MED 238. Molecular Biology of the Cardiovascular System (4) An overview of heart, vascular development and associated disease. Structural and functional biology of the cardiovascular system. Current approaches for generating mouse models of cardiovascular disease and recently developed technologies for physiological assessment in small animal models will be presented. (S)

BENG 241B. Methods in Tissue Engineering Science (4) Isolation of cells, cell and tissue culture systems. Fluorescence and confocal microscopy. Intracellular imaging and tissue engineering of tissues. Multimodal tissue engineering and analysis of cell deformability and cell interaction. Methods in microcirculation and angiogenesis. PREREQUISITE: BENG 241A or consent of instructor. (S)

BENG 242/MATS 257. Polymer Science and Engineering (4) Quantitative basic understanding of different branches of polymer science varying from polymer chemistry, character- ization, thermodynamics, rheological properties, smart materials, self-assembly in biopolymers (natural) and synthetic polymers, and applications of polymers ranging from medicine to structure. PREREQUISITE: graduate standing in bioengineering or materials science or consent of instructor. (S)

BENG 247A/ECOE 247A. Advanced Biophotonics (4) Basic physics and chemistry for the interaction of photons with matter, including both biological and synthetic materials; use of photonic radiation pressure for manipulation of objects and materials; advanced optoelectronic detection systems, devices and methods, including time resolved fluorescent and chemiluminescent methods, fluorescent energy transfer (FRET) techniques, quantum dots, and near-field optical techniques; underlying mechanisms of the optical sensitivity, including chlorophylls, and Rhodopsin; and processes for photosynthetic energy conversion and the basis of vision processes. PREREQUISITE: graduate standing. (F)

BENG 247B/ECOE 247B. Bioelectronics (4) Topics to be covered will include photolithographic techniques for high-density DNA microarray production, incorporation of CMOS control into electronic DNA microarrays, direct electronic detection technology used in microarrays and biosensor devices, and focus on problems related to making highly integrated devices (lab-on-a-chip, in vivo biosensors, etc.) form heterogeneous materials and components. PREREQUISITE: graduate standing. (W)

BENG 247C/ECOE 247C. Bionanotechnology (4) Topics include nanoelectronics, nanoscale manipulation of nanodevices for both clinical diagnostics and bioferrator (bioterror) agent detection; nanostructures for drug delivery, nanoarrays and nanodevices; use of nanotechnological devices and systems; methods and techniques for modification or functionalization of nanoparticles and nanostructures with biological molecules; nanostructural aspects of fuel cells and biofuel cells; potential use of DNA and other biomolecules for computing and ultra-high-density data storage. PREREQUISITE: graduate standing. (S)

BENG 250A. Biomechanics (4) An introduction to biomechanics and transport phenomena in biological systems at the macroscopic level. Biomechanical: solid mechanics, muscle mechanics, mass transfer, moment transfer, energy transfer. PREREQUISITES: CENG 101C, BENG 112B, and BENG 222 or consent of instructor. (W)

BENG 250B. Advanced Biomechanics (4) Modern development of biomechanics at an advanced mathematical level. Selected topics in the dynamics of heart, pulsatile blood flow, microcirculation, and muscle mechanics. PREREQUISITE: BENG 253 or consent of instructor. (S)

BENG 260/BGNN 260. Neurodynamics (4) Introduction to the nonlinear dynamics of neurons and neural systems using bifurcation theory and chaotic motions, at different levels of abstraction, e.g., biophysical and "reduced" models for analysis of spiking and bursting cells. Laboratory exercises will accompany the lectures. PREREQUISITE: graduate standing or consent of instructor. (W)

BENG 267. Microcirculation in Health and Disease (4) Structural and functional aspects of transport and blood-tissue exchange in key organs during circulatory shock, bacterial toxaemia, hypertension. Physical and ultrastruc- tural techniques used to analyze small-vessel dynamics. PREREQUISITE: consent of instructor. (S)

BENG 276C/Chem. 276/Math. 276. Numerical Analysis in Multi-scale Biology (4) Introduces mathematical tools to simulate biological processes at multiple scales. Numerical methods for ordinary and partial differential equations (deterministic and stochastic), and methods for parallel computing and visualization. Hands-on use of computers emphasized; students will apply numerical methods in individual projects. PREREQUISITE: consent of instructor. (F, W)

BENG 277/BIOI 287. Tissue Engineering Laboratory (4) Students will learn to conduct tissue engineering and develop microfabrication experiments, microfabricate cell culture systems, engineer biopolymer materials, and develop and analyze quantitative models of transport, cell fate, and growth mechanics. The understanding and manipulation of multicellular processes that comprise development and growth involves specialized areas of biomechanics, developmental biology, biomaterials, and the tools of molecular biology, as well as the integration of theory and experiment. To fabricate functional tissues, it is important to establish underlying molecular and physical mechanisms and then control and integrate these. PREREQUISITE: consent of instructor. (S)

BENG 280A. Principles of Biomedical Imaging (4) Fundamentals of Fourier transform and linear systems theory including convolution, sampling, noise, filtering, image reconstruction and visualization with an emphasis on applications to biomedical imaging. Examples from optical imaging, CT, MR, ultrasound, nuclear, PET, and radiography. PREREQUISITE: consent of instructor. (F)

BENG 280B. Comparative Biomedical Imaging (4) Application of biomedical imaging to the measurement of structure, function, and dynamics of organ systems from the microscopic to the organ level. Emphasis on detailed evaluation and comparison of specific imaging modalities. PREREQUISITE: consent of instructor. (WS)

BENG 281. Seminar in Bioengineering (1) Weekly seminars by faculty, visitors, postdoctoral research fellows, and graduate students concerning research topics in bioengineering and related subjects. May be repeated for credit. This course does not count toward M.S. graduation requirements. (S/U grades only.) (F, W, S)

BENG 282. Seminar: Faculty Research (1) Weekly seminars by bioengineering faculty presenting their research. May be repeated for credit. (S/U grades only.) (F, W, S)

BENG 283/Chem. 283/BION 283. Supramolecular Structure Determination Laboratory (4) A laboratory course combining hands-on mass spectrometry and bioinformatics tools to explore the relationship between structure and function in macromolecules. Tools for peptide sequencing, analysis of post-translational modification, and fragmentation analysis by mass spectrometry are examples of experiments students will run. PREREQUISITE: consent of instructor. (F, W, S)

BENG 290. Bioengineering Special Graduate Seminar (1-2) Seminars by faculty, visitors, postdoctoral research fellows, and/or graduate students in selected topic(s) in bioengineering and/or related subjects. This course does not apply toward M.S. graduation requirements.

BENG 291/191. Senior Seminar I: Professional Issues in Bioengineering (2) (Conjoined with BENG 191.) Instills skills for personal and organizational development during lifelong learning. Student prepares portfolio of personal attributes and experiences, prepares for career interviews plus oral report of interviewing organizational CEO. Graduate students will prepare a NIH small business research grant. PREREQUISITE: consent of instructor. (W)

BENG 295. Bioengineering Design Project and Industrial Training (4) Independent work by graduate students focused on design, applied research, and professional experience. PREREQUISITES: consent of instructor and departmental approval. (F, W, S)

BENG 296. Independent Study (4) PREREQUISITE: consent of instructor. (F, W, S)

BENG 298. Directed Group Study (1-4) Directed group study on a topic or in a field not included in regular department curriculum, by special arrangement with a faculty member. (S/U grades only.) PREREQUISITE: consent of instructor. (F, W, S)
BENG 299. Graduate Research (1-12)
Independent work by graduate students engaged in research and writing theses. (S/U grades only.) PREREQUISITE: consent of instructor. (F,W,S)

BENG 501. Teaching Experience (2 or 4)
Teaching experience in an appropriate bioengineering undergraduate course under direction of the faculty member in charge of the course. Lecturing one to two hours per week in either a problem-solving section or regular lecture. (S/U grades only.) PREREQUISITES: consent of instructor and departmental approval. (F,W,S)

THE UNDERGRADUATE PROGRAM

Degree and Program Options
The Department of Computer Science and Engineering (CSE) offers four degree programs: the B.S. degree in computer science, the B.A. degree in computer science, the B.S. degree in computer engineering, and the B.S. degree in computer science with a specialization in bioinformatics. The B.A. degree in computer science is a flexible program that allows comprehensive studies beyond computer science and engineering.

All CSE programs of study provide a broad and rigorous curriculum and are designed to provide students with the strong technical education necessary for placement in the competitive high-tech job market as well as for advanced studies in graduate school.

CSE offers courses in the following areas:
• Theory
• Artificial intelligence
• Software
• Hardware
• Computer security and cryptography
• Computer vision and graphics
• Databases and XML
• Systems and networking
• Bioinformatics
• Software engineering

In addition, CSE seniors can participate in challenging project-courses in: software systems, where teams create multiplayer games; Internet systems, where students create sophisticated Web transaction systems; and mobile wireless computing, where teams create applications for handheld devices. The CSE department supports and encourages students to explore opportunities outside the classroom. Students assist in many CSE courses as paid lab tutors and readers, getting an excellent opportunity to interact more closely with faculty and other students. In addition, CSE students participate in research projects with graduate students and faculty in CSE, the San Diego Supercomputer Center, and the California Institute for Telecommunications and Information Technology (Calit2). Under the direction of our faculty, CSE students may also earn credit by participating in independent research projects. The CSE department has strong ties with local and national high-tech industry, where students can earn course credit while applying their academic knowledge toward exciting commercial technologies in paid internships.

B.S. COMPUTER SCIENCE PROGRAM
The lower-division B.S. computer science program is designed to provide a strong foundation in mathematics, physics, electrical engineering, programming methodology and skills, and computer organization. Upper-division core courses deal with the theory and design of algorithms, hardware, and software. Students can gain additional breadth and/
or depth in computer science and engineering by an appropriate selection of technical electives.

Students should have sufficient background in high school mathematics so that they can take freshman calculus in their first quarter. Courses in high school physics and computer programming, although helpful, are not required for admission to the program.

The department requires a total of 132 units for the B.S. Computer science program (not including the general-education requirements). There are three varieties of requirements: lower-division, upper-division, and technical electives.

1. Lower-Division Requirements

Students are expected to complete the following seventy-two units by the end of their sophomore year.

Computer Science and Engineering:
CSE 88 or CSE 11, CSE 12, CSE 15L, CSE 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, CSE 70, and CSE 91; twenty-eight units.

NOTE: Students without any programming experience are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11. CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and CSE 8B, and requires experience in programming with a compiled language.

Mathematics:

Physics:
Phys. 2A, Phys. 2B, Phys. 2C; twelve units. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the Department of Mathematics placement test permits them to start with Math. 20B or a higher course may take Phys. 2A in the fall quarter of the freshman year; all others will take Phys. 2A in the winter quarter of the freshman year. Students who received high grades in both calculus and physics in high school may substitute the major’s sequence, Phys. 4A-4B-C for Phys. 2A-2B-C.

Introduction to Electrical Engineering:
ECE 53; four units. Comprehensive introduction to electrical engineering.

Probability and Statistics:
Math. 183 or CSE 103; four units.

2. Upper-Division Requirements

All B.S. computer science students are required to take CSE 100 or Math. 176, CSE 101 or Math. 188, CSE 105 or Math. 166, CSE 120, 130, 131, 140, 140L, 141 and 141L; thirty-six units.

Students are expected to complete almost all of these courses by the end of their junior year. If students want to accelerate their program, they should consider taking CSE 100 or Math. 176, CSE 105, and/or CSE 140 and 140L in the sophomore year.

3. Technical Electives

B.S. computer science students are required to take six technical electives for a total of twenty-four units. Four electives must be computer science and engineering upper-division or graduate courses.

The remaining two technical electives can be chosen from the wider set of courses that includes computer science and engineering upper-division courses, graduate courses, and other electives as listed under the section titled Electives. Other restrictions in the selection of technical electives are also given in the section Electives.

Notes for Selecting and Scheduling Classes for B.S. Computer Science

All courses must be taken for a letter grade.

1. First Programming Course: CSE 11 is a faster paced version of CSE 8A, CSE 8AL and CSE 8B. CSE 8B or CSE 11 must be taken before CSE 12. Students may self-select which course they wish to take. Students without experience in programming in a compiled language are advised to take CSE 8A and CSE 8AL, and then CSE 8B, instead of CSE 11.

2. CSE 11, and CSE 20/Math. 15A, can be taken in the same quarter. Please obtain department approval for enrollment permission at ugradinfo@cs.ucsd.edu.

3. CSE 15L and CSE 70 are new courses starting fall 2007.

4. CSE 15L must be completed before CSE 12.

5. You must complete six technical electives. Four of your six technical electives must be CSE upper division courses. You must obtain approval to use a CSE graduate course for technical elective credit. Once a graduate course is used for an undergraduate degree that course may not be reused for a graduate degree. In addition, only four units of either a CSE 197, 198, or 199 may be used toward technical elective credit.

6. Two of the technical electives may be chosen from a list of approved electives. This list is at http://www.cse.ucsd.edu/undergrad/degree-programs/electives.html. If you want to deviate from this list of approved electives, you must petition the CSE student advisor at: ugradinfo@cs.ucsd.edu.

B.S. COMPUTER ENGINEERING PROGRAM

(Curriculum is the same in both the CSE and ECE departments.)

The B.S. Computer engineering program is jointly administered by the Departments of Computer Science and Engineering and Electrical and Computer Engineering. Students wishing to take the computer engineering program must be admitted to one of the departments.

The lower-division computer engineering program is designed to provide a strong foundation in mathematics, physics, electrical engineering, programming methodology and skills, and computer organization. Upper-division core courses deal with the theory and design of algorithms, hardware and software, as well as electronic systems. Students can gain additional breadth and/ or depth in computer science and engineering by an appropriate selection of technical electives.

Students should have sufficient background in high school mathematics so that they can take freshman calculus in their first quarter. Courses in high school physics and computer programming, although helpful, are not required for admission to the program.

B.S. Computer engineering program requires a total of 152 units (not including the general-education requirements). There are three varieties of requirements: lower-division, upper-division, and technical electives.

1. Lower-Division Requirements

Students are expected to complete the following eighty units by the end of their sophomore year.

Computer Science and Engineering:
CSE 88 or CSE 11, CSE 12, CSE 15L, CSE 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, CSE 70, and CSE 91; twenty-eight units.

NOTE: Students without any programming experience are advised to take CSE 8A, CSE 8AL, instead of CSE 11. CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and requires experience in programming with a compiled language.

Mathematics:

Physics:
Phys. 2A, Phys. 2B, Phys. 2C; sixteen units. Math. 20A is a prerequisite for Phys. 2A. Students...
whose performance on the Department of Mathematics placement test permits them to start
with Math. 208 or a higher course may take Phys. 2A in the fall quarter of the freshman year; all others will
take Phys. 2A in the winter quarter of the freshman year. Students who received high grades in both
calculus and physics in high school may substitute the major's sequence, Phys. 4A-B-C-D for Phys.
2A-B-C-D.

**Introduction to Electrical Engineering:**
ECE 35, 45, 65; twelve units. These courses give a comprehensive introduction to electrical
engineering.

**Probability and Statistics:**
ECE 109; four units. This course can be taken in the
sophomore year.

### 2. Upper-Division Requirements

All B.S. Computer engineering students are required to take CSE 100 or Math. 176, CSE 101 or Math. 188,
CSE 105 or Math. 166, CSE 120, 130, 140, 140L, 141, and 141L; thirty-six units.

In addition, all B.S. Computer engineering
students have to fulfill the following upper-division
ECE requirements.

**Linear Systems:**
ECE 101; four units. The department recommends that this course be taken in the
junior year.

**Electronic Circuits and Systems:**
ECE 102, ECE 108; eight units. The department
recommendsthat these courses be taken in the
junior year.

If students want to accelerate their program, they
should consider taking CSE 100 or Math. 176, CSE
105 or Math. 166, and/or CSE 140 and 140L in the
sophomore year.

### 3. Technical Electives

All B.S. Computer engineering students are required to take six technical electives for a total of twenty-
four units. One of these courses must be either
ECE 111 or ECE 118. Of the remaining five courses,
four must be computer science and engineering or
electrical and computer engineering upper-division
or graduate courses.

The remaining course can be any computer
science and engineering or electrical and computer
engineering upper-division or graduate course,
or any other course listed under the section titled
Electives. Other restrictions in the selection of tech-
nical electives are also given in the section Electives.

### 4. B.S. Computer Engineering, Sample Program

**B.S. COMPUTER SCIENCE WITH A SPECIALIZATION IN BIOINFORMATICS**

The explosion in biological knowledge spawned by the various genome projects has created entirely
new fields and industries, and a need for trained
computational biologists who are familiar with
biology, mathematics, and computer sciences. The
computer science and engineering department
offers rigorous, interdisciplinary training in the new
and rapidly evolving field of bioinformatics.

Bioinformatics refers to advanced computational
and experimental methods that model the flow of
information (genetic, metabolic, and regulatory) in
living systems to provide an integrated understand-
ing of the system properties of organisms.

This interdisciplinary major is offered by three
other programs (Division of Biological Sciences,
Department of Chemistry and Biochemistry, and
Department of Bioengineering). The computer
science and engineering requirements comprise of
152 units to be taken from the divisions of physical
sciences, biology, and engineering.

### 1. Lower-Division Requirements

Lower-divison requirements, sixty-four units:
Students are expected to complete all lower-division
requirements by the end of their sophomore year.

1. Math. 20A, Math. 20B, Math. 20C, and Math. 20F,
   (16 units)
   lab (15 units)
3. BILD 1, BILD 2, and BILD 94 (9 units)
4. CSE 11, CSE 12, and Math. 15B (12 units)
5. Phys. 2A, Phys. 2B, and Phys. 2C (12 units)

### 2. Upper-Division Requirements

Upper-division requirements, eighty-eight units
(includes five CSE technical electives)

1. CSE 100 or Math. 176 (Data Structures), (4 units)
2. CSE 101 or Math. 188 (Algorithms), (4 units)
3. Chem. 140A–140B (Organic Chemistry), (8 units)
4. Chem. 114B (Biochemical Energetics and
   Metabolism) or BBC 102 (Structural and
   Metabolic Biochemistry), (4 units)
5. BBC 103 (Biochemical Techniques), (4 units)
6. BICD 100 (Genetics), (4 units)
7. BIMM 100 (Molecular Biology) or Chem. 114D
   (Molecular and Cell Biochemistry), (4 units)
8. BIMM 101 (Recombinant DNA Lab), (4 units)
9. BICD 110 (Cell Biology), (4 units)
10. BBC 110 (Physical Biochemistry) or Chem. 127
    (Physical Chemistry), (4 units)
11. Five additional CSE upper-division electives
    (electives 1, 2, 3, 4, and 5).

At least one course from each of the three groups
for a total of five electives:

- Group I: CSE 30, 111, 131A, 131B, 134A
- Group II: CSE 105, 150, 151, Math. 184A
- Group III: CSE 132A, 132B, 133

The bioinformatics series comprises the following
six courses, twenty-four units:

12. CSE 181 or BIMM 181 or BENG 181 (Molecular
    Sequence Analysis), (4 units)
13. CSE 182 or BIMM 182 or BENG 182 or Chem. 182
    (Biological Databases), (4 units)
14. BENG 183 (Applied Genomic Technologies), (4 units)
15. CSE 184 or BIMM 184 or BENG 184 (Computational Molecular Biology), (4 units)
16. BIMM 185 (Bioinformatics lab), (4 units)
17. Math. 186 (Probability and Statistics), (4 units)

Notes for Selecting and Scheduling Classes for B.A. Computer Science

1. First Programming Course: CSE 11 is a faster paced version of CSE 8A, CSE 8AL and CSE 8B. CSE 8B or CSE 11 must be taken before CSE 12.* Students may self-select which course they wish to take. Students without experience in programming in a compiled language are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11.

2. Students may take the slower paced version, CSE 8A + CSE 8AL + CSE 8B, instead of CSE 11.

3. Students may take the slower paced version, CSE 8A + CSE 8AL + CSE 8B, instead of CSE 11.

4. Bioinformatics series: CSE 181 is cross-listed with BIMM 181 and BENG 181; CSE 182 is cross-listed with BIMM 182, Chem. 182, and BENG 182; CSE 184 is cross-listed with BIMM 184 and BENG 184; and (BENG 183, BIMM 185, and Chem. 186 are not cross-listed with any other courses).

5. Students must complete five CSE technical electives from the approved list.

B.A. COMPUTER SCIENCE PROGRAM

The B.A. Computer science program gives students more latitude in designing their course of study. The lower-division program is designed to provide a strong foundation in mathematics, physics, programming methodology and skills, and computer organization. Upper-division core courses deal with the theory and design of algorithms, hardware, and software. Students can gain additional breadth and/or depth in computer science and engineering by an appropriate selection of technical electives.

By requiring fewer technical electives, the B.A. Computer science program serves those students desiring more time for undergraduate studies outside their major subject.

The department requires a total of 112 units for the B.A. Computer science program (not including the general-education requirements). There are three varieties of requirements: lower-division, upper-division, and technical electives.

1. Lower-Division Requirements

Students are expected to complete the following sixty units by the end of their sophomore year.

**Computer Science and Engineering:**

CSE 8B or CSE 11, CSE 12, CSE 15L, CSE 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, CSE 70, and CSE 91; twenty-eight units.

*Note:* Students without any programming experience are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11. CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and CSE 8B, and requires experience in programming with a compiled language.

**Mathematics:**

**Physics:**

2. Upper-Division Requirements

All B.A. Computer science students are required to take CSE 100 or Math. 176, CSE 101 or Math. 188, CSE 105 or Math. 166, CSE 120, 131, 140, 140L, 141, and 141L; thirty-six units.

Students are expected to complete almost all of these courses by the end of their junior year. If students want to accelerate their program, they should consider taking Math. 120, CSE 120, CSE 131, Math. 132, and CSE 140 and 141L in the sophomore year.

3. Technical Electives

B.A. Computer science students are required to take four technical electives for a total of sixteen units. Of these four electives, at least two must be computer science and engineering upper-division or graduate courses.

The remaining two technical electives can be chosen from a wider set of courses that includes computer science and engineering upper-division courses, graduate courses, and other electives as listed under the section titled Electives. Other restrictions in the selection of technical electives are also given in the section Electives.

4. B.A. Computer Science, Sample Program

Notes for Selecting and Scheduling Classes for B.A. Computer Science

(All courses must be taken for a letter grade.)

1. First Programming Course: CSE 11 is a faster paced version of CSE 8A, CSE 8AL and CSE 8B. CSE 8B or CSE 11 must be taken before CSE 12.* Students may self-select which course they wish to take. Students without experience in programming in a compiled language are advised to take CSE 8A, CSE 8AL, and then CSE 8B, instead of CSE 11.

2. CSE 11, and CSE 20/Math. 15A, can be taken in the same quarter. Please obtain department approval for enrollment permission at ugradinfo@cs.ucsd.edu.

3. CSE 15L and CSE 70 are new courses starting fall 2007.

4. CSE 15L must be completed before CSE 12.

5. You must complete six technical electives. Four of your six technical electives must be CSE upper division courses. You must obtain approval to use a CSE graduate course for technical elective credit. Once a graduate course is used for an undergraduate degree that course may not be reused for a graduate degree. In addition, only four units of either a CSE 197, 198, or 199 may be used toward technical elective credit.

6. Two of the technical electives may be chosen from a list of approved electives. This list is at http://www.cse.ucsd.edu/undergrad/degreeprograms/electives.html. If you want to deviate from this list of approved electives, you must petition the CSE student advisor at: ugradinfo@cs.ucsd.edu.
ELECTIVES

The discipline of computer science and engineering interacts with a number of other disciplines in a mutually beneficial way. These disciplines include mathematics, electrical engineering, and cognitive science. The following is a list of upper-division courses from these and other disciplines that can be counted as technical electives.

Restrictions:

A. At most four units of CSE 197, 198, or 199 may be used towards technical elective requirements.
B. CSE 195 cannot be used towards course requirements.
C. Undergraduate students must get instructor’s permission and departmental stamp to enroll in a graduate course.
D. Students may not get duplicate credit for equivalent courses.
E. The UC San Diego General Catalog should be consulted for equivalency information and any restrictions placed on the courses.
F. Additional restrictions are noted below. Any deviation from this list must be petitioned.

Computer Science with a Specialization in Bioinformatics:

Students must petition department for technical elective credit not on approved list.

Mathematics:

If a student has completed CSE 167, then he or she cannot get elective credit for Math. 155A. Students may receive elective credit for only one of the following courses: CSE 164A, Math. 174, Math. 173, Phys. 105A-B, CENG 100, MAE 107. No credit for any of these courses will be given if Math. 170A-B-C is taken. Students may receive credit for either one of the following: Math. 166 or CSE 105 (but not both), Math. 188 or CSE 101 (but not both), Math. 176 or CSE 100 (but not both).

Credit will be given for only one of the following: ECE 109 or Math. 183 or Econ. 120A.

Electrical and Computer Engineering:

All ECE upper-division courses except 195-199.

Students may not get credit for both CSE 123A and ECE 158A or CSE 143 and ECE 165. Credit will be given for only one of the following: ECE 109 or Math. 183 or Econ. 120A.

Cognitive Science:

Students may not get credit for both CSE 150 and Advanced Programming Methods for Cognitive Science 108F.

Mechanical and Aerospace Engineering:

All upper-division MAE courses except MAE 140 (ONLY Computer Science majors may take MAE 140) and 195-199.

Students may receive elective credit for only one of the following courses: CSE 164A, Math. 174, Math. 173, Phys. 105A-B, CENG 100, MAE 107. Students may only get credit for one of the two courses, CSE 167 or MAE 152.

Economics:

Credit will be given for only one of the following: ECE 109 or Math. 183 or Econ. 120A.

Linguistics:

Engineering:

Principles of Team Engineering 100, Team Engineering Laboratory 100L, Team Engineering 101.

Computer Science and Computer Engineering:

Students are eligible to receive six units of technical elective credit for completing a combination of ENG 100 (two units) and ENG 100L (two units). Students must complete one quarter of ENG 100 for two units, and two quarters of ENG 100L for a total of four units. With this combination, students will get credit for one technical elective. To receive credit for two technical electives, students must complete one more quarter of ENG 100L. This credit can be applied to fulfill the technical elective requirements.

Music:

Computer Music II 172, Audio Production: Mixing and Editing 173.

Psychology:

Introduction to Engineering Psychology 161.

MINOR AND PROGRAM OF CONCENTRATION

The CSE minor requires successful completion of a total of nine CSE courses. Lower-division courses are CSE 8B or CSE 11, CSE 12, CSE 20, CSE 21, and CSE 30. The remaining four CSE courses are CSE 100, CSE 101, and two additional CSE upper-division courses subject to enforcement of prerequisites.

CS Minor:

Scheduling Notes:

Students without any programming experience are advised to take CSE 3 and CSE 5A before taking CSE 8A and CSE 8AL. Concurrent enrollment is required in CSE 8A and CSE 8AL. Students may also start with CSE 11, but they should be aware that CSE 11 is a faster paced version of CSE 8A, CSE 8AL, and CSE 8B, and requires experience in programming with a compiled language.

Students should consult their college provost’s office concerning the rules for the minor or program of concentration.

Restriction:

Effective fall 2000, mathematics/computer science majors will not be allowed the minor in computer science.

COMPUTING COURSES FOR NON-MAJORS

The department offers a slow-paced course providing a practical introduction to computers, computation, and programming; CSE 5A—an introduction to structured programming using the C/Java programming language. We also offer an introduction to fluency in information technology: CSE 3—an introduction to basic information students need to deal with information technology. It is more of a concepts course than a programming course, but some simple programming will be done as part of the teaching of concepts.
ADMISSION TO MAJOR

Freshmen Students

Freshmen students are invited to declare the CSE computer science, computer engineering, or computer science with a specialization in bioinformatics major. Starting fall 2008 the Department of CSE removed the “Impacted/Closed Status” and admission restrictions for freshmen applicants. This means the Department of CSE will accept all students that apply to the Department of CSE and are admitted by the UC San Diego Admissions Office.

Furthermore, freshmen students that start at UC San Diego as undeclared or in another major may also switch into a computer science or computer engineering major. Students may use the Major/Minor link under Tools at http://tritonlink.ucsd.edu to make this change.

Major choices for your selection:

B.A. Computer Science (CS28)
B.S. Computer Science (CS26)
B.S. Computer Science with a Specialization in Bioinformatics (CS27)
B.S. Computer Engineering (CS25)

Admission to the department as a major, transfer, or minor is in accordance with the general requirements established by the Jacobs School of Engineering.

Transfer Students

Transfer students are invited to declare the CSE computer science, computer engineering, or computer science with a specialization in bioinformatics majors. Starting fall 2008 the Department of CSE removed the “Impacted/Closed Status” and admission restrictions for transfer applicants. This means the Department of CSE will accept all students that apply to the Department of CSE and are admitted by the UC San Diego Admissions Office.

Furthermore, freshmen and transfer students that start at UC San Diego as undeclared or in another major may also switch into the B.S. in Computer Science with a Specialization in Bioinformatics major (major code CS27). Students may use the Major/Minor link under Tools at http://tritonlink.ucsd.edu to make this change.

It is strongly recommended that students meet with an advisor in the Department of CSE to discuss requirements for the bioinformatics program.

Advanced Placement Credit: Application to Major Requirements

Effective January 14, 2005, the following CSE advanced placement equivalencies have been approved (a four-unit maximum for both tests).

- Computer Science A Exam (Java Programming), two units:
  - Score of 4 = exempt CSE 8A and 8AL; student should take CSE 11
  - Score of 5 = exempt CSE 11

- Computer Science AB Exam (Java Programming, and Data Structures and Object-Oriented Programming), four units:
  - Score of 4 or 5 = exempt CSE 11
  - Score of 5 = exempt CSE 12 with department approval

ENROLLMENT IN CSE COURSES

All CSE and non-CSE majors may enroll in lower- and upper-division CSE courses. Students must meet course prerequisites. **PLEASE NOTE:** Student demands exceed capacity in many CSE graduate courses. Accordingly, many CSE graduate courses may have enrollment restrictions, which give priority to students in the following order:

1. CSE M.S. and CSE Ph.D. students.
2. All others, with permission of the Department of Computer Science and Engineering.

B.S. in Computer Science with a Specialization in Bioinformatics

Freshmen and transfer students are invited to declare the CSE bioinformatics major. Starting fall 2008 the Department of CSE has removed the “Impacted/Closed Status” and admission restrictions for freshman and transfer applicants. This means the Department of CSE will accept all students that apply to the Department of CSE and are admitted by the UC San Diego Admissions Office.

Furthermore, freshmen and transfer students that start at UC San Diego as undeclared or in another major may also switch into the B.S. in Computer Science with a specialization in bioinformatics. Students may use the Major/Minor link under Tools at http://tritonlink.ucsd.edu to make this change.

It is strongly recommended that students meet with an advisor in the Department of CSE to discuss requirements for the bioinformatics program.

Advanced Placement Credit: Application to Major Requirements

Effective January 14, 2005, the following CSE advanced placement equivalencies have been approved (a four-unit maximum for both tests).

- Computer Science A Exam (Java Programming), two units:
  - Score of 4 = exempt CSE 8A and 8AL; student should take CSE 11
  - Score of 5 = exempt CSE 11

- Computer Science AB Exam (Java Programming, and Data Structures and Object-Oriented Programming), four units:
  - Score of 4 or 5 = exempt CSE 11
  - Score of 5 = exempt CSE 12 with department approval

FIVE-YEAR BACHELOR’S-MASTER’S PROGRAM

Undergraduate students in the Department of Computer Science and Engineering who are enrolled in the B.S. or B.A. Computer science or B.S. Computer engineering degree programs, and who have a cumulative GPA of 3.4 and also a GPA of 3.4 in at least seven core courses, are eligible to apply for the Five-Year Bachelor’s-Master’s Degree Program. Students must apply four quarters before graduation. Acceptance into this program is an honor which carries with it practical benefits—the graduate application process is simplified (no GREs required), and students accepted into this program can be

ENGREERING, COMPUTER SCIENCE AND ENGINEERING (CSE)
admitted fall, winter, and spring quarter, based upon availability of openings in the program. Advanced students are given access to graduate level courses and have the opportunity to do graduate level research earlier under the direct supervision of UCSD’s faculty, and students are able to complete the B.A., B.S., and M.S. degree within a five-year time period. Courses taken can be used toward either the B.A., B.S., Or M.S. degree, but not counted toward both degrees. Additional information and applications can be obtained by contacting the CSE Student Affairs Office, EBU 38, Room 1234. For an application, visit http://www.cse.ucsd.edu/gradedu/admissions.html.

THE GRADUATE PROGRAM

The graduate program offers master of science and doctor of philosophy degrees in computer science and computer engineering. To be accepted into either course of study, a student should have a B.A./B.S. degree in computer science, computer engineering, or a related area, or be able to demonstrate an equivalent competency.

The graduate program is concerned with fundamental aspects of computation. The computer science specialization is divided among the following areas:

- Algorithms and complexity
- Artificial intelligence
- Bioinformatics
- Computer architecture and compilers
- Computer graphics and computer vision
- Databases and information management
- Embedded systems and software
- High-performance computing
- Programming systems
- Security and cryptography
- Software engineering
- Systems and networking
- Ubiquitous Computing
- VLSI/CAD (computer-aided design)

The computer engineering specialization places a greater emphasis on hardware and the design of computer systems.

Admission to the graduate program is done through the Office of Graduate Admissions, Department of CSE. The application deadline is in December. Admissions are always effective the following fall quarter. For admission deadline and requirements, please refer to the departmental Web page: http://www.cse.ucsd.edu/gradedu/admissions/graduateadmissions.html.

Admission decisions for the M.S. and Ph.D. programs are made separately. A current M.S. student who wishes to enter the Ph.D. program must submit a petition, including a new statement of purpose and three new letters of recommendation, to the CSE Admissions Committee.

COMPUTER SCIENCE PROGRAM

MASTER OF SCIENCE PROGRAM

The department offers the master of science degree in computer science. The degree can be pursued under either the Thesis Plan I or the Comprehensive Examination Plan II. Each plan requires forty-nine units of work. For full-time students, all the requirements can be completed within two years.

Thesis or Comprehensive Exam

There are two plans of study for the master's degree: Plan I, in which the student writes a thesis, and Plan II, in which the student takes a set of comprehensive exams.

Plan I: Thesis Option, No Comprehensive Exam

This plan involves both course work and research, culminating in the preparation of a thesis. The student must take twelve units of CSE 298 (Independent Study) to fulfill the research requirement, and a thesis based on research must be written and subsequently reviewed by the thesis committee. This committee, which is appointed by the dean of Graduate Studies, consists of three faculty members, with at least two members from within the CSE department.

Plan II: Comprehensive Examination, No Thesis

Under this plan, the student must pass a written comprehensive examination designed to test the student’s knowledge in basic computer science material. The examination can normally be passed with a thorough knowledge of topics covered in the undergraduate and first-year graduate computer science programs. It is offered every year in the first few weeks of the fall quarter and in the first few weeks of the spring quarter. Each student is allowed three attempts to pass the examination. The student must secure at least a master’s-level pass in the written comprehensive examination. More information regarding the comprehensive examination can be found in a separate document provided by the CSE graduate office.

In particular, the written examination is structured around the three CSE core areas: algorithms and data structures; operating systems; and computer architecture and digital logic design.

Required Courses

Students entering the M.S. Program in Computer Science will choose an area of concentration. Each concentration is an area in which the faculty has significant research expertise.

The typical concentration is a collection of three courses which are designed to give the student in-depth training in the chosen field. Additionally, to ensure breadth, all students are required to take four core courses.

Core courses must be completed with an average grade of B and no grade below B-. The four core courses required of all students are as follows:

- CSE 202. Algorithms Design and Analysis
- CSE 221. Operating Systems
- CSE 240A. Principles of Computer Architecture
- CSE 292. Faculty Research Seminar

The department expects to offer concentrations in the following areas:

- Artificial Intelligence
- Bioinformatics
- Communication Networks
- Computer Architecture and Compilers
- Computer Graphics and Vision
- Cryptography and Security
- Databases
- Design Automation for Microelectronic Designs
- Distributed and Fault-Tolerant Computing
- Embedded Systems and Software
- Human–Computer Interaction
- Parallel and Scientific Computing
- Software Engineering
- Storage Systems
- Ph.D. Preparation

The specific courses involved in each of the concentrations are detailed in a separate bulletin which is available in the Graduate Student Affairs Office, EBU 38 1234 or on the Web at http://www.cse.ucsd.edu/gradedu/advising/newstudentinfo/mastersconcentration.html.

Project

Students electing Plan II are required to execute a project with an advisor while enrolled in four units of CSE 293.

Electives

In addition to completing the required core courses and fulfilling either the thesis or comprehensive examination requirements described above, the student must also complete additional approved courses to bring the total number of units to forty-nine. The number of units of electives depends upon whether the student chooses Plan I or Plan II. The electives consist of other CSE graduate courses or courses from a list of approved electives. Units obtained in the courses CSE 293, 298, 299, 500, 501, 599, and any of the seminar courses CSE 209, 229, 259, 269, 290, and 294 do not count toward the elective requirement.

COMPUTER ENGINEERING PROGRAM

The CSE computer engineering program offers master of science and doctoral degrees with the degree title computer science and engineering (computer engineering). Computer engineering explores the engineering analysis and design aspects of algorithms and technology. Specific research areas include computer systems, signal processing systems, architecture, networks, computer-aided design, fault tolerance, and data storage systems.

MASTER OF SCIENCE PROGRAM

The degree can be pursued under either the Thesis Plan I or the Comprehensive Examination Plan II. Each plan requires forty-nine units of work. For full-time students, all the requirements must be completed within two years. Students with an adequate background in computer engineering
can complete the M.S. program within four to five quarters of full-time study.

**Plan I: Thesis Option, No Comprehensive Exam**

This plan of study involves both course work and research, culminating in the preparation of a thesis. A total of forty-nine units of credit is required, as follows:

**Core Courses**

The following core courses must be completed with an average grade of B and no grade below B-:

Three Software Courses:

- CSE 202
- CSE 221
- CSE 231

Three Hardware Courses:

- CSE 240A
- ECE 260A
- CSE 243A or CSE 244A or CSE 244B or ECE 251A

**Electives**

Students must elect at least four technical units among graduate courses within the Departments of MAE, CSE, ECE, Mathematics, and Physics.

**Thesis**

Twelve units of CSE 298 must be taken with a faculty member in CSE or ECE who agrees to act as advisor for the thesis to fulfill the research requirement.

A thesis based on research must be written and subsequently reviewed by a committee, consisting of three faculty members, with at least two members from within the CSE department. The committee is appointed by the dean of Graduate Studies.

**Plan II: Comprehensive Examination, No Thesis**

In order to receive the M.S. degree in computer engineering under this plan, a student must complete the course requirements listed below and pass a written comprehensive examination.

The written examination is structured around the following three CSE core areas: algorithms and data structures; operating systems; and computer architecture and digital logic design.

**Core Courses**

Three Software Courses:

- CSE 202
- CSE 221
- CSE 231

Three Hardware Courses:

- CSE 240A
- ECE 260A
- CSE 243A or CSE 244A or CSE 244B or ECE 251A

**Electives**

Students must elect at least twelve technical units among graduate courses within the Departments of MAE, CSE, ECE, Mathematics, and Physics.

**Comprehensive Examination**

The comprehensive examination is designed to test the student’s knowledge in basic computer science and engineering material. The examination can normally be passed with a thorough knowledge of topics covered in the undergraduate and first-year graduate computer science or computer engineering programs.

It is offered every year in the first few weeks of the fall quarter and in the first few weeks of the spring quarter. If fewer than seven people sign up, then the department may cancel the examination in the spring quarter. Each student is allowed three attempts to pass the examination. The student must secure at least a master’s-level pass in the written comprehensive examination.

This examination is the same for both the computer science and the computer engineering graduate programs. More information about the comprehensive examination can be obtained in a separate document from the CSE graduate office.

**DOCTORAL PROGRAMS**

**PH.D. DEGREE PROGRAMS IN COMPUTER SCIENCE AND COMPUTER ENGINEERING**

CSE offers doctor of philosophy degrees in computer science and in computer engineering, providing a research-oriented education in preparation for a research, industrial, or entrepreneurial career. These programs explore both the fundamental aspects and application of computer science, spanning theory, software, hardware, and applications. Our particular areas of research expertise include:

- algorithms
- artificial intelligence
- bioinformatics
- complexity theory
- computer architecture/compilers
- VLSI/CAD and embedded systems
- databases and information management
- distributed systems and networking
- graphics and vision
- high performance computing
- mobile computing
- security and cryptography
- software engineering

**Competency Requirement**

We consider command of the materials covered in the following courses to be an adequate background for the Ph.D. Program. The competency requirement is intended to ensure that Ph.D. Students already have or acquire this undergraduate background. Students, who do not have this background at the time of entry, may be asked to either enroll in the following undergraduate class or to study it independently and demonstrate their knowledge by obtaining a B+ or better in the class or in the final exam.

- CSE 101 (Algorithms)
- CSE 105 (Theory of Computation)
- CSE 120 (Principles of Computer Operating Systems)
- CSE 130 (Programming Languages)
- CSE 131 (Compilers)
- CSE 141 (Introduction to Computer Architecture)

**Course Requirements**

The course requirement is intended to ensure that students are exposed to fundamental concepts and tools (core requirement), a deep up-to-date view of their research area (depth requirement), and advanced, up-to-date view of the some topics outside their area (breadth requirement). Ph.D. Students are expected to complete the core, depth, and breadth requirements in the first two years of the program.

All required course work must be taken for a letter grade except for CSE 291 (Topics in CSE), CSE 292 (Faculty Research Seminar), CSE 299 (Research), and CSE 500 or CSE 501 (Teaching Assistantship) for which only S/U grades are allowed.

Units obtained from a single course cannot count more than once towards satisfying the requirement in each of the core, depth, breadth, and elective areas. Ph.D. Students who have taken similar courses elsewhere may petition for a waiver of the required courses or for substitution by alternative courses.

**Depth Requirements**

The depth requirement ensures that the Ph.D. Students share knowledge of fundamental concepts and tools. Each Ph.D. student must take these courses for letter grade and maintain an overall core course GPA of 3.3 with no grade lower than a B- (except for CSE 292, for which a letter grade is not assigned). A student will typically complete all the core courses within the first year of graduate study, and must complete all core courses within two years of entry.

- CSE 202 (Algorithms)
- CSE 221 (Operating Systems)
- CSE 240A (Architecture)
- CSE 290 (Complexity) for Computer Science or CSE 241A (VLSI Integration of Computing Circuitry) for Computer Engineering
- CSE 292 (Faculty Research Seminar)
The student must take these courses for letter grade and maintain an overall depth course GPA of 3.4 with no grade lower than B- in these courses. One of these three courses can be Topics in CSE (CSE 291) or Independent Study (CSE 299), which are not taken for a letter grade. The department will maintain a list of appropriate courses for each major area.

The major areas are:
- Theoretical Computer Science
- Programming Languages, Compilers, and Software Engineering
- Computer Systems
- Database Systems
- Computer Engineering
- Artificial Intelligence
- Graphics and Vision
- Bioinformatics

**Breadth Requirements**

Research in computer science and engineering is increasingly interdisciplinary, and acquiring a broader view of the field in general is important. Each Ph.D. Student must take three courses (twelve units) from at least two other areas different from the major area. Any course that is listed in a student’s depth area cannot be used to fulfill the breadth requirement, even if it is cross-listed in another area. Courses must be taken for letter grade and students must maintain an overall breadth course GPA of 3.0 with no grade lower than B- in these courses. Units obtained in CSE 209 series, 229 series, 239 series, 249 series, 259 series, 269 series, 279 series, 289 series, 290, 292, 293, 294, 298, 291, 299, 500, 501, and 599 do not count toward the breadth requirement.

**Electives**

In addition to the above required course work, each student is expected to take two additional courses (eight units). Students must obtain no grade lower than C- in these courses. Undergraduate upper-division courses, CSE 291, and CSE 299 may fulfill this requirement. Units obtained in CSE 209 series, 229 series, 239 series, 249 series, 259 series, 269 series, 279 series, 289 series, 290, 292, 293, 294, 298, 500, 501, and 599 do not count toward the elective requirement.

**Research Exam Requirement**

The research exam is intended to verify three components of the student’s preparation for Ph.D. research: (1) breadth of comprehension sufficient to enable computer science research in areas beyond the topic(s) of the research exam and thesis; (2) ability to perform critical study, analysis, and writing in a focused area; and (3) research experience.

The research exam has both an oral part and a written part. The oral part of the research exam is conducted by a committee appointed by the dean of Graduate Studies and Research and consists of faculty from CSE and other departments. More information on the composition of the committee can be obtained from the CSE graduate office. The examination is taken after the student and his or her advisor have identified a topic for the dissertation and an initial demonstration of feasible progress has been made. The candidate is expected to describe his or her accomplishments to date as well as future work.

**Dissertation**

The dissertation defense is the final Ph.D. examination. A candidate for the Ph.D. is expected to write a dissertation and defend it in an oral examination conducted by the doctoral committee.

**Departmental Ph.D. Time Limit Policies**

Students must be advanced to candidacy by the end of four years. Total university support cannot exceed seven years. Total registered time at UCSD cannot exceed eight years.

**Financial Aid**

Financial support is available to qualified graduate students in the form of fellowships, loans, and assistantships. Anticipated stipends for half-time research assistantships are $2,100 per month, with the possibility of full-time employment during the summer months. For a half-time teaching assistantship, the anticipated stipend will be $1,840 per month. Requests for application forms for admission and financial support should be directed to the Department of Computer Science and Engineering.

**COURSES**

For course descriptions not found in the UC San Diego General Catalog, 2009–10, please contact the department for more information.

A tentative schedule of course offerings is available from the Department of CSE each spring for the following academic year. The tentative schedule for 2009–10 is also found at http://www.cse.ucsd.edu/undergrad/courses/ugradnextyearcourses.html.

**LOWER-DIVISION**

**CSE 3. Fluency in Information Technology (4)**

Introduces the concepts and skills necessary to effectively use information technology. Includes basic concepts and some practical skills with computer and networks. **PREREQUISITE:** none.

**CSE 4GS. Mathematical Beauty in Rome (4)**

Exploration of concepts in mathematics and engineering as they relate to classical architecture in Rome, Italy. Geometrical constructions and engineering analyses of the Colosseum, Pantheon, St. Peter’s Basilica and Square, Roman bridges and aqueducts, etc. **PREREQUISITES:** Math. 10A or Math. 20A; departmental approval.

**CSE 6GS. Mathematical Laboratory in Rome (4)**

Companion course to CSE 4GS where theory is applied and lab experiments are carried out in the field in Rome, Italy. For final projects, students will analyze and model a complex structure such as the Colosseum or Pantheon using computer-based tools. **PREREQUISITES:** Math. 10A or Math. 20B; departmental approval.

**CSE 5A. Introduction to Programming I (4)**

(Formerly CSE 62A) Introduction to algorithms and top-down problem solving. Introduction to the C language including functions, arrays, and standard libraries. Basic skills for using a PC graphical user interface operating system environment. File maintenance utilities are covered. (A student may not receive credit for CSE 5A after receiving credit for CSE 10 or CSE 11 or CSE 8B or CSE 62B or CSE 65J.) **PREREQUISITE:** A familiarity with high-school level algebra is expected, but this course assumes no prior programming knowledge.

**CSE 8A. Introduction to Computer Science: JAVA (3)**

Basic Unix. Basics of Java language. Classes, methods, and parameters. Modularity and abstraction. Documentation techniques. Testing and verification techniques. Basic inheritance. Event-driven programming. Programming with AWT library or other similar library. CSE 8A, CSE 8B, and CSE 8AL is a slower paced version of CSE 11 with more programming practice. Concurrent enrollment with CSE 8AL is required. Students who have taken CSE 8B or CSE 11 may not take CSE 8A. Majors only. **PREREQUISITE:** high school algebra. Specified majors only.

**CSE 8AL. Introduction to Computer Science: JAVA Lab (1)**

Exercises in the theory and practice of computer science under the supervision of an instructor. Hands-on experience with designing, editing, compiling, and executing programming constructs and applications. Must be taken concurrently with CSE 8A. CSE 8A, CSE 8B, and CSE 8AL is a slower paced version of CSE 11 with more programming practice. Students who have taken CSE 8B or CSE 11 may not take CSE 8AL. Majors only. **PREREQUISITE:** high school algebra. Specified majors only.

**CSE 8B. Introduction to Computer Science: Java (4)**

Continuation of the Java language. Continuation of programming techniques. More on Inheritance. Exception handling. CSE 8A-B is a slower paced version of CSE 11 with more programming practice. (Students who have taken CSE 9A or CSE 9B or CSE 10 or CSE 11 may not take CSE 8B.) **PREREQUISITE:** high school algebra. Majors only.
CSE 11. Introduction to Computer Science and Object-Oriented Programming: Java (4)  
Introduction to computer science and programming using the Java language. Basic UNIX. Modularity and abstraction. Documentation, testing and verification techniques. Basic object-oriented programming including inheritance and dynamic bind. Exception handling. Event-driven programming. Exploring with a text and W3 browser or other simple library. PREREQUISITES: CSE 11 or consent of instructor.

CSE 12. Basic Data Structures and Object-Independent Design (4)  
Basic data structures including stacks, queues, lists, binary trees, hash tables. Basic object-oriented design including encapsulation, abstraction, inheritance, classes. The implementation of abstract data types. Memory management, pointers, recursion, and big-o notation. Use the C/C++ and Java programming language. PREREQUISITES: CSE 8B or CSE 11, and CSE 15L.

CSE 15L. Tools and Technique Laboratory (2)  
Hands-on exploration of software development tools and techniques. Investigation of the scientific process as applied to software development and debugging. Emphasis is on weekly hands-on laboratory experiences, development of laboratory notebook techniques as applied to software design. PREREQUISITES: CSE 8A, CSE 8B, or CSE 11.

CSE 20. Introduction to Discrete Mathematics (4)  
Basic discrete mathematics: sets, relations, functions, sequences, equivalence relations, partial orders, and number systems. Methods of reasoning and proofs: propositional logic, predicate logic, induction, recursion, and pigeon-hole principle. Infinite sets and diagonalization. Basic counting techniques; permutation and combinations. Applications will be given to digital logic design, elementary number theory, design of programs, and proofs of program correctness. Credit not offered for both Math. 15A and CSE 20. Equivalent to Math 15A. PREREQUISITES: CSE 8A or CSE 8B or CSE 11. CSE 8B or CSE 11 may be taken concurrently with CSE 20. Math. 15A.

This course will provide an introduction to the discrete mathematical tools needed to analyze algorithms and systems. Enumerative combinatorics: basic counting principles, inclusion-exclusion, and generating functions. Matrix notation. Applied discrete probability. Finite automata. Credit not offered for both Math. 15B and CSE 21. Equivalent to Math 15B. PREREQUISITES: CSE 20 or Math. 15A.

CSE 30. Computer Organization and Systems Programming (4)  
Introduction to organization of modern digital computers—understanding the various components of a computer and their interrelationships. Study of a specific architecture/machine with emphasis on systems programming in C and Assembly languages in a UNIX environment. PREREQUISITES: CSE 12, CSE 15L, CSE 20 or Math. 15B, or consent of instructor.

CSE 70. Software Engineering (4)  
Introduction to software development and engineering methods, including specification, design, implementation, testing, and process. An emphasis on team development, agile methods, and use of tools such as IDEs, version control, and test harnesses. PREREQUISITES: CSE 12.

CSE 80. UNIX Lab (2)  
The objective of the course is to help the programmer create a productive UNIX environment. Topics include customizing the shell, file system, shell programming, process management, and UNIX tools. PREREQUISITES: CSE 8B or CSE 11. Majors only.

CSE 86. C++ for Java Programmers (2)  
Helps programmers to be productive in the C++ programming environment. Topics include the similarities and differences between Java and C++ with special attention to pointers, operator overloading, templates, the STL, the preprocessor, and the C++ Runtime Environment. PREREQUISITES: CSE 12 or consent of instructor.

CSE 91. Perspectives in Computer Science and Engineering (2)  
A seminar format discussion led by CSE faculty on topics in central aspects of computer science, concentrating on the relation among them, recent developments, and future directions. PREREQUISITES: Majors only.

CSE 92. Reading and Writing in Computer Science (2)  
This course helps students to read and write technical English better, and to read and write software better. They write short papers responding to a CSE-related book, learn the basics of functional programming, and do a project using a functional language. PREREQUISITES: CSE 12. Majors only.

CSE 87. Freshman Seminar (1)  
The Freshman Seminar Program is designed to provide new students with the opportunity to explore an intellectual topic with a faculty member in a small seminar setting. Freshman seminars are offered in all campus departments and undergraduate colleges, and topics vary from quarter to quarter. Enrollment is limited to 15 to 20 students, with preference given to entering freshmen. PREREQUISITES: none.

CSE 99. Independent Study in Computer Science and Engineering (4)  
Independent reading or research by special arrangement with a faculty member. PREREQUISITES: lower-division standing. Completion of 30 units at UCSD with a UCSD GPA of 3.0 and approval form required. Department stamp required. Consent of instructor and approval of the department. Majors only.

UPPER-DIVISION

CSE 100. Advanced Data Structures (4)  
Descriptive and analytical presentation of data structures and algorithms. Lists, tables, priority queues, disjoint subsets, and dictionaries data types. Data structure techniques include linked lists, arrays, hashing, and trees. Performance evaluation involving worst case, expected case, and amortized analysis. Credit not offered for both Math. 176 and CSE 100. Equivalent to Math. 176. PREREQUISITES: CSE 21 or Math. 15B, and CSE 30, and CSE 70 or consent of instructor. Majors only.

CSE 101. Design and Analysis of Algorithms (4)  
Design and analysis of efficient algorithms with emphasis on non-numerical algorithms such as sorting, searching, pattern matching, and graph and network algorithms. Measuring complexity of algorithms, time and storage. NP-complete problems. Credit not offered for both Math. 188 and CSE 101. Equivalent to Math 188. PREREQUISITES: CSE 12, CSE 21 or Math. 100A or Math. 103A and CSE 100 or Math. 176. Majors only.

CSE 102. Storage System Architectures (4)  
Descriptive and analytical introduction to storage system architectures. Disk drive storage media organization and runtime performance; external indexing data structures B-trees and linear hashing algorithms. Disk arrays, RAID data organization, reliability, sparing, data declustering, and video servers. PREREQUISITES: CSE 100 or Math. 176, CSE 120, CSE 123A, or consent of the instructor. Majors only.

CSE 103. A Practical Introduction to Probability and Statistics (4)  

CSE 105. Theory of Computability (4)  
An introduction to the mathematical theory of computability. Formal languages. Finite automata and regular expressions. Push-down automata and context-free languages. Computable or recursive functions: Turing machines, the halting problem. Undecidability. Credit not offered for both Math. 166 and CSE 105. Equivalent to Math. 166. PREREQUISITES: CSE 12, CSE 21 or Math. 15B or Math. 100A or Math. 103A. Majors only.

CSE 107. Introduction to Modern Cryptography (4)  
Topics include public and private-key cryptography, block ciphers, data encryption, authentication, key distribution and certification, pseudorandom number generators, design and analysis of protocols, zero-knowledge proofs, and advanced protocols. Emphasizes rigorous mathematical approach including formal definitions of security goals and proofs of protocol security. PREREQUISITES: CSE 21 or CSE 101 or Math. 188, CSE 105 or Math. 166. Majors only.

CSE 111. Object Oriented Software Design (4)  
Introduction to object-oriented analysis and design. Object-oriented modeling methods for analysis and design, object-oriented general design paradigms, object-oriented design techniques. Cyclic development of object-oriented systems. PREREQUISITES: CSE 8B or CSE 80 or CSE 10 or CSE 11, CSE 12, and CSE 100 or Math. 176. Majors only.

CSE 112. Software Engineering (4)  
(Formerly CSE 110.) This course will cover software engineering topics associated with large systems development such as requirements and specifications, testing and maintenance, and design. PREREQUISITES: CSE 111. Majors only.

CSE 118. Ubiquitous Computing (4)  
Explores emerging opportunities enabled by cheap sensors and networked computing devices. Small research projects will be conducted in teams, culminating in project presentations at the end of the term. Section will cover current research topics such as research methods, software engineering, teamwork, and project management. PREREQUISITES: any course from the following: CSE 131, CSE 132B, Cog Sci 122, Cog Sci 121, Cog Sci 184, ECE 111, ECE 118, ECE 191, ECE 192, COMT 111B, COMT 115, or ICAM, or consent of instructor.

CSE 120. Principles of Computer Operating Systems (4)  
Basic functions of operating systems; basic kernel structure, concurrency, memory management, virtual memory, file systems, process scheduling, security and protection. PREREQUISITES: CSE 100 or Math. 176 and CSE 101 or Math. 188. Majors only.

CSE 121. Operating Systems: Architecture and Implementation (4)  
(Formerly CSE 171B.) Case study of architecture and implementation of a selected modern operating system. In-depth analysis through a detailed study of source code. Topics include process creation, context-switching, memory management, execution mechanisms, inter-process communication, I/O buffering, device drivers, and file systems. PREREQUISITES: CSE 120.

CSE 123. Computer Networks (4)  
(Renumbered from CSE 123A.) Introduction to concepts, principles, and practice of computer communication networks with examples from contemporary protocols, and standards with special emphasis on the Internet protocols. Layering and the OSI model; physical and data link layers; local and wide area networks; datagrams and virtual circuits; routing and congestion control; internetworking. Transport protocols. Credit may not be received for both CSE 123A and 158A or CSE 123B and 158B. PREREQUISITES: CSE 120 or consent of instructor. Majors only.

CSE 124. Networked Services (4)  
(Renumbered from CSE 123B.) The architecture of modern networked services, including data center design, enterprise storage, fault tolerance, and load balancing. Protocol and software structuring, the Transmission Control Protocol (TCP), remote procedure calls, protocols for digital audio and video communication, overlay and peer-to-peer systems, secure communication. Credit may not be received for both CSE 124 and ECE 158B. Students may not receive credit for both CSE 123B and CSE 124. PREREQUISITES: CSE 120 or consent of instructor. Majors only.

CSE 125. Software System Design and Implementation (4)  
Design and implementation of large, complex software systems involving multiple aspects of CSE curriculum. Emphasis on software engineering applied to a single, large group project with close interaction with instructor. PREREQUISITES: senior standing with substantial program-
CSE 127. Introduction to Computer Security (4)
Topics include basic cryptography, security/threat analysis, access control, auditing, security models, distributed systems security, and theory behind common attack and defense techniques. The class will go over formal models as well as the bits and bytes of security exploits. **PREREQUISITES:** CSE 21 or Math. 15B, and CSE 120. Majors only.

CSE 128. Concurrence (4)
Specification of concurrent programs safety, liveness, and fairness: producer-consumer, mutual exclusion; atomic read/writes; semaphores; monitors; distributed algorithms and memory coherency; programming with threads; concurrency in popular programming languages and operating systems. **PREREQUISITES:** CSE 120. Majors only.

CSE 130. Programming Languages: Principles and Paradigms (Formerly CSE 173.) Introduction to programming languages and paradigms, the components that comprise them, and the principles of language design, all through the analysis and comparison of a variety of languages (e.g., Pascal, Ada, C++, PROLOG, ML.) Will involve programming in most languages studied. **PREREQUISITES:** CSE 12 and CSE 100 or Math. 176. Majors only.

CSE 131. Compiler Construction (4)
Introduction to the compilation of programming languages, practice of lexical and syntactic analysis, symbol tables, syntax-directed translation, type checking, code generation, optimization interpretation, and Compiler structure. Students may receive repeat credit for CSE 131A and CSE 131B by completing CSE 131. **PREREQUISITES:** CSE 100 or Math. 176, CSE 105 or Math. 168, and CSE 130. Majors only.

CSE 132A. Database System Principles (4)
Basic concepts of database, including data modeling, relational databases, query languages, optimization, dependencies, schema design, and concurrency control. Exposure to one or several commercial database systems. Advanced topics such as deductive and object-oriented database systems, time allowing. **PREREQUISITES:** CSE 100 or Math. 176. Majors only.

CSE 132B. Database Systems Applications (4)
Design of databases, transactions, use of trigger facilities and databases. Performance measuring, organization of index structures. **PREREQUISITES:** CSE 132 or CSE 132A or equivalent.

CSE 134A. Web Server Languages (4)
Design and implementation of interactive World Wide Web documents using server-side programs. Languages covered include HTML, Perl, and JavaScript. Other languages as time allows. **PREREQUISITES:** CSE 100 or Math. 176. Majors only.

CSE 134B. Web Client Languages (4)
Design and implementation of interactive World Wide Web clients using helper applications and plug-ins. The main language covered will be Java. **PREREQUISITES:** CSE 100 or Math. 176. Majors only.

CSE 135. Server-side Web Applications (4)
Design and implementation of dynamic web-based applications. Multi-tier architecture, scripting languages, SQL, XML, session handling, non-browser clients, Web services, and scalability, security, and usability in the Web context. **PREREQUISITES:** CSE 100 or Math. 176. Majors only.

CSE 136. Enterprise-class Web Applications (4)
Design and implementation of large scale web-based applications. Modeling organizational needs, design and revision management, J2EE or similar software platforms, Web and application server functionality, reuse of object-oriented components, model-view-controller and other design patterns, clustering, load-balancing, fault-tolerance, authentication, usage accounting. **PREREQUISITES:** CSE 135. Majors only.

CSE 140. Components and Design Techniques for Digital Systems (4)
(Formerly CSE 170A) Design of Boolean logic and finite state machines, two-level, multi-level combinatorial logic design, combinational modules and modular networks, Mealy and Moore machines, analysis and synthesis of canonical forms, sequential modules. **PREREQUISITES:** CSE 20 or Math. 15A, CSE 30. CSE 140L must be taken concurrently. Majors only.

CSE 140L. Digital Systems Laboratory (2)
(Formerly CSE 175B) Implementation with computer-aided design tools for combinational logic minimization and state machine synthesis. Hardware construction of a small digital system. **PREREQUISITES:** CSE 20, CSE 30. CSE 140 must be taken concurrently.

CSE 141. Introduction to Computer Architecture (4)
Introduction to computer architecture. Computer system design. Processor design. Control design. Memory systems. **PREREQUISITES:** CSE 140, CSE 140L, or consent of the instructor. CSE 141L should be taken concurrently. Majors only.

CSE 141L. Project in Computer Architecture (2)
Hands-on computer architecture project aiming to familiarize students with instruction set architecture, and design of process. Control and memory systems. **PREREQUISITES:** CSE 140, CSE 140L, or consent of the instructor. CSE 141 should be taken concurrently. Majors only.

CSE 142. Advanced Digital Logic Design (4)
(Formerly CSE 170C) Digital logic optimization; functional decomposition and symmetric functions; reliable design and fault diagnosis; combinational logic synthesis. Petri nets; asynchronous circuit design. Assignments using logic synthesis tools. **PREREQUISITES:** CSE 140, CSE 140L.

CSE 143. Microelectronic System Design (4)
VLSI process technologies; circuit characterization; logic design styles; clocking strategies; computer-aided design tools; subsystem design; design case studies. System design using CAD hardware description logic synthesis, physical layout to design verification. Students may not receive credit for both CSE 143 and ECE 161B. **PREREQUISITES:** CSE 140 and CSE 141. Majors only.

CSE 145. Embedded System Design Project (4)
Project class building an embedded computing system. Learn fundamental knowledge of microcontrollers, sensors, and actuators. Introduction to the hardware and software tools to build project in a team environment and end-to-end system building. **PREREQUISITES:** CSE 30.

CSE 146. Introduction to Reliable Hardware (4)
Fault models and tests, combinational circuit test generation, fault collapsing, fault simulation, synchronous sequential circuit testing, fault tolerance and error recovery. **PREREQUISITES:** CSE 140 and CSE 140L, or consent of instructor. Majors only.

CSE 148. Advanced Processor Architecture Design Project (4)
Students will use hardware description language tools to add advanced architectural features to a basic processor design. These features may include pipelining, superscalar execution, branch prediction, and advanced cache features. Designs will be implemented in programmable logic devices. **PREREQUISITES:** CSE 141, CSE 141L, or consent of instructor. Majors only.

CSE 150. Introduction to Artificial Intelligence: Search and Reasoning (4)
Search algorithms including BFS, DFS, iterative deepening and A*; random-searched algorithms including Walksat, syntax and semantics of first-order logic (FOL), knowledge representation in FOL including reasoning, basic reasoning with probabilities, basic genetic algorithms, **PREREQUISITES:** CSE 100 or Math. 176 or consent of instructors. Majors only.

CSE 151. Introduction to Artificial Intelligence: Statistical Approaches (4)
Reasoning with probabilities, reasoning and learning with Bayesian networks, decision-making under uncertainty, sequential decision-making, statistical learning methods, and reinforcement learning. **PREREQUISITES:** CSE 100 or Math. 176 or consent of instructor. Majors only.

CSE 152. Introduction to Computer Vision (4)
The goal of computer vision is to compute scene and object properties from images and videos. This introductory course includes feature detection, image segmentation, motion estimation, object recognition, and 3-D shape reconstruction through stereo, photometric stereo, and structure from motion. **PREREQUISITES:** Math. 20F, CSE 100 or Math. 176, CSE 101 or Math. 188, Knowledge of C, C++ or Matlab programming. Majors only.

CSE 160. Introduction to Parallel Computing (4)
Introduction to high performance parallel computing: parallel architecture, algorithms, software, and problem-solving techniques. Areas covered: Flynn’s taxonomy, processor-memory organizations, shared and non-shared memory models, message passing and multithreading, data parallelism; speedup, efficiency and Amdahl’s law, communication and synchronization, inefficiency and scalability. Assignments given to provide practical experience. **PREREQUISITES:** CSE 100 or Math. 176. Majors only.

CSE 166. Image Processing (4)
Principles of image formation, analysis, and representation. Image enhancement, restoration, and segmentation; stochastic image models. Filter design, sampling, Fourier and wavelet transforms. Selected applications in computer graphics and machine vision. **PREREQUISITES:** Math. 20F, CSE 100 or Math. 176. Majors only.

CSE 167. Computer Graphics (Formerly CSE 177) Representation and manipulation of pictorial data. Two-dimensional and three-dimensional transformations, curves, surfaces. Projection, illumination, and shading models. Raster and vector graphic I/O devices; retained-mode and immediate-mode graphics software systems and applications. **PREREQUISITES:** Math. 2EA/20F and CSE 100 or Math. 176. Majors only.

CSE 168. Computer Graphics II: Rendering (4)
Weekly programming assignments that will cover graphics rendering algorithms. During the course the students will learn about ray tracing, geometry, tessellation, acceleration structures, sampling, filtering, shading models, and advanced topics such as global illumination and programmable graphics hardware. **PREREQUISITES:** CSE 167 or concurrent enrollment. Majors only.

CSE 169. Computer Animation (4)
Advanced graphics focusing on the programming techniques involved in computer animation. Algo-rhythms and approaches for both character animation and physically based animation. Particular subjects may include skeletons, skinning, key-framing, facial animation, inverse kinematics, locomotion, motion capture, video game animation, particle systems, rigid bodies, clothing, and hair. **PREREQUISITES:** a good understanding of linear algebra. CSE 167 or consent of instructor. Majors only.

CSE 171. User Interface Design (4)
Explores usability, representation and coordination issues in user interface design with some focus on distributed cooperative work, semiotics, and the interplay between socio-cognitive and technical issues. Most examples and homework involve the Web. **PREREQUISITES:** CSE 8B or 11, CSE 20 or Math. 15A, and CSE 100 or Math. 176. Majors only.

CSE 175. Social and Ethical Issues in Information Technology (4)
Social aspects of information technology, with an emphasis on ethical issues. Topics include ethical theories, privacy and security, e-commerce, intellectual property, open source software, medical informatics, actor-network theory, and some neo-classical economics. **PREREQUISITES:** CSE 100 or Math. 176. Majors only.

CSE 181. Molecular Sequence Analysis (4)
This course covers the analysis of nucleic acid and protein sequences, with an emphasis on the application of algorithmic and computational biological problems. Topics include sequence alignments, database searching, comparative genomics, and phylogenetic and clustering analyses. Pairwise alignment, multiple alignment, DNAS sequencing, scoring functions, fast database search, comparative genomics, clustering, alignment trees, genome DNA statistics. **PREREQUISITES:** CSE 100 or Math. 176, CSE 101 or Math. 188, BIMM 100 or Chem. 114D. Bioinformatics majors only. CSE 181 is crosslisted with BIMM 181 and BENG 181.
CSE 182. Biological Databases (4)
This course provides an introduction to the features of biological data, how that data are organized efficiently in databases, and how querying data resources can be uti-
ilized to solve a variety of biological problems. Relational databases, object oriented databases, ontologies, data modeling and description, survey of current biological databases, with respect to above, implementation of a database focused on a biological topic. PREREQUISITES: CSE 100 or Math. 176. Bioinformatics majors only. CSE 182 is crosslisted with BIMM 182, Chem. 182, and BENG 182.

CSE 184. Computational Molecular Biology (4)
This advanced course covers the application of machine learning and modeling techniques to biological systems. Topics include gene structure, recognition of DNA and protein sequence patterns, classification, and protein structure prediction. Pattern discovery, Hidden Markov models/support vector machines/neural network/profiles. Protein structure prediction, functional characterization or proteins, functional genomics/proteomics, metabolic pathways/gene networks. PREREQUISITES: BIMM 181 or BENG 181 or CSE 181, BIMM 182 or CSE 182 or CHEM 182. Bioinformatics majors only. CSE 184 is crosslisted with BIMM 184, BENG 184, and Chem. 184.

CSE 190. Topics in Computer Science and Engineering (4)
Topics of special interest in computer science and engi-
neering. Topics may vary from quarter to quarter. May be repeated for credit with the consent of instructor. PREREQUISITES: consent of instructor. Department stamp required. Majors only.

CSE 191. Seminar in CSE (1-4)
A seminar course on topics of current interest. Students, as well as, the instructor will be actively involved in running the course/class. This course cannot be counted toward a technical elective. PREREQUISITES: consent of instructor. Department stamp required. Majors only.

CSE 195. Teaching (4)
Teaching and tutorial assistance in a CSE course under the supervision of the instructor. (P/NP grades only.) PREREQUISITES: consent of the department chair. Department stamp required.

CSE 197. Field Study in Computer Science and Engineering (4, 8, 12, or 16)
Directed study and research at laboratories away from the campus. (P/NP grades only.) PREREQUISITES: consent of the instructor and approval of the department. Department stamp required.

CSE 198. Directed Group Study (2 or 4)
Computer science and engineering topics whose study involves reading and discussion by a small group of stu-
dents under the supervision of a faculty member. (P/NP grades only.) PREREQUISITES: consent of the instructor. Department stamp required.

CSE 199. Independent Study for Undergraduates (2 or 4)
Independent reading or research by special arrangement with a faculty member. (P/NP grades only.) PREREQUISITES: consent of the instructor. Department stamp required.

GRADUATE

CSE 200. Computability and Complexity (4)
Computability review, including halting problem, dec-
idable sets, r.e. sets, many-one reductions; TIME(ind), SPACE(ind), proof checking (PCP); Application of PCP to approximation hardness; Complexity of proof systems; Parallel complexity classes NC and AC; P-completeness. PREREQUISITE: CSE 200.

CSE 201. Advanced Complexity (4)
Polytonal-time hierarchy (PH); BPP in second level of
p; Savitch's theorem; NL=coNL; non-uniform and cir-
cuit complexity; some circuit lower bounds; Ip=PSPACE; probabilistic proof checking (PCP); Application of PCP to approximation hardness; Complexity of proof systems; Parallel complexity classes NC and AC; P-completeness. PREREQUISITE: CSE 200.

CSE 202. Algorithm Design and Analysis (4)
The basic techniques for the design and analysis of algo-
Rithms. Divide-and-conquer, dynamic programming, data structures, graphs, combinatorial problems, randomized algorithms, lower bounds, probabilistic analysis, parallel algorithms. PREREQUISITE: CSE 101 or equivalent.

CSE 203A. Advanced Algorithms (4)
Modern advances in design and analysis of algorithms. Exact syllabus varies. Topics include approximation, randomized algorithms, probabilistic analysis, heuris-
tics, online algorithms, competitive analysis, models of memory hierarchy, parallel algorithms, number-theoretic algorithms, cryptanalysis, computational geometry, computational biology, network algorithms, VLSI CAD algorithms. PREREQUISITE: CSE 202.

CSE 204A. Combinatorial Optimization (4)
Linear programming, simplex method, duality, and column generating technique. Integer programming introduced via the Knapsack problem. The periodic nature of all integer programs. Why the round-off technique cannot work in general. The solution of the Knapsack problem in polynomial time since nonbasic columns form a group. PREREQUISITE: CSE 202 or linear algebra or consent of instructor.

CSE 205A. Logic in Computer Science (4)
(Formerly CSE 208D) Mathematical logic as a tool in com-
puter science. Propositional logic, resolution, first-order logic, completeness, incompleteness theorems; with computational viewpoint, finite model theory, descriptive complexity, logic programming, non-monotonic reason-
ing, temporal logic. Applications to databases, automatic theorem proving, program verification, and distributed systems. PREREQUISITE: CSE 200 or consent of instructor.

CSE 206A. Lattice Algorithms and Applications (4)
(Formerly CSE 207C) Introduction to the algorithmic theory of point lattices (A.K.A. algorithmic geometry of numbers), and some of its most important applications in cryptog-
raphy and cryptanalysis. Topics usually include: LLL basis reduction algorithm, cryptanalysis of broadcast RSA, hard-
ness of approximating lattice problems. PREREQUISITES: CSE 202, CSE 200, or concurrent.

CSE 207. Modern Cryptography (4)
Private and public key cryptography, introduction to re-
duction based proofs of security, concrete security, block ciphers, pseudorandom functions and generators, symmetric encryption, asymmetric encryption, computational number theory, RSA and discrete log systems, message authentication, digital signatures, key distribution and key management. PREREQUISITE: CSE 202 or consent of instructor.

CSE 207C. Lattices and Cryptography (4)
Renumbered to CSE 206A (see above).

CSE 208. Advanced Cryptography (4)
Zero-knowledge, secure computation, session-key distribu-
tion, protocols, key escrow, payment, one-way functions, trapdoor permutations, pseudorandom bit generators, hardcore bits. PREREQUISITES: CSE 202, CSE 200, and CSE 207 or consent of instructor.

CSE 208D. Logic in Computer Science (4)
Renumbered to CSE 205A (see above).

CSE 209A. Topics/Seminar in Algorithms, Complexity, and Logic (1-4)
Topics of special interest in algorithms, complexity, and logic to be presented by faculty and students under fac-
dulty direction. Topics vary from quarter to quarter. May be repeated for credit. PREREQUISITE: consent of instructor.

CSE 209B. Topics/Seminar in Cryptography (1-4)
Topics of special interest in cryptography to be presented by faculty and students under faculty direction. Topics vary from quarter to quarter. May be repeated for credit. PREREQUISITE: consent of instructor.

CSE 210. Principles of Software Engineering (4)
(Formerly CSE 264A.) General principles in modern soft-
ware engineering. Both theoretical and practical topics are covered. Theoretical topics include proofs of correctness, programming language semantics, and theory of testing. Practical topics include structured programming, modularization techniques, design of languages for reliable programming, and software tools. PREREQUISITES: CSE 100, 131A, 120, or consent of instructor.

CSE 211. Software Testing and Analysis (4)
Survey of testing and analysis methods. Introduction to advanced topics in area as well as traditional production methods. Topics include inspections and reviews, formal analysis, verification and validation standards, non-statisti-
cal testing, statistical-testing and reliability models, cover-
age methods, testing and analysis tools, and organization management and planning. Methods special to special development approaches such as object-oriented testing will also be described. PREREQUISITE: undergraduate major in computer science or extensive industrial experience.

CSE 218. Advanced Topics in Software Engineering (4)
This course will cover a current topic in software engi-
neering in depth. Topics in the past have included soft-
ware tools, impacts of programming language design, and software system structure. (S/U grades permitted.) PREREQUISITE: none.

CSE 221. Operating Systems (4)
Operating system structures, concurrent computation models, scheduling, synchronization mechanisms, address spaces, memory management protection and security, buffering, streams, data-copuytng reduction techniques, file systems, naming, caching, disk organization, mapped file systems, case studies of major operating systems. PREREQUISITES: CSE 120 and 121, or consent of instructor.

CSE 222. Communication Networks (4)
Renumbered to CSE 222A (see below).

CSE 222A. Computer Communication Networks (4)
(Formerly CSE 222.) Computer communication network concepts, protocols, and architectures, with an emphasis on an analysis of algorithms, protocols, and design meth-
odologies. Topics will include layering, error control, flow control, congestion control, switching and routing, quality of service management, mobility, naming, security, and selected contemporary topics. PREREQUISITE: CSE 123A or consent of instructor.

CSE 222B. Internet Algorithms (4)
(Formerly CSE 222H.) Techniques for speeding up Internet implementations including system restructuring, new algorithms, and hardware innovations. Topics include: models for protocols, systems and hardware; efficiency principles; applying these principles to deriving techniques for efficient implementation of common endnode and router functions; PREREQUISITE: CSE 123A or CSE 222A or consent of instructor.

CSE 223. Distributed Systems (4)
Renumbered to CSE 223A (see below).

CSE 223A. Principles of Distributed Computing (4)
(Formerly CSE 223.) Logical and physical time, snapshot protocols, failure models, replication strategies, consensus and reliable broadcast, self-stabilization, atomic commit. PREREQUISITE: CSE 221 or consent of instructor.

CSE 223B. Distributed Computing and Systems (4)
Efficient primitives for distributed operating systems and high-performance network servers, including concurrent and event-driven server architectures, remote procedure calls, and load shedding. Distributed naming, directory, and storage services, replication for fault tolerance, and router functions. PREREQUISITES: CSE 221, CSE 222A, or consent of instructor.

CSE 225. High Performance Distributed Computing (and Computational Grids) (4)
Architecture of high performance distributed systems (e.g., frameworks and middleware). High performance distrib-
uted objects (DCOM, CORBA, Java Beans) and networking with crosscut issues for performance, availability, and per-
formance predictability. Scalable servers, metacomputing, and scientific computing. PREREQUISITES: CSE 121 and CSE 123A or consent of instructor.

CSE 226. Storage Systems (4)
(Formerly CSE 228B.) Secondary and tertiary storage sys-
tems, optical and magnetic media, performance analysis,
Embedded system technologies including processors, and more. Connections to logic and complexity theory, dependency theory, deductive databases, incomplete information, and more. Devices, standard cells and interconnects, locking, power/ground distribution, arithmetic modules, memories. Methodologies and tradeoffs in system implementation. PREREQUISITE: layout (CSE 165 or ECE 260A) and logic design (CSE 140 or ECE 111), or consent of instructor.

CSE 242A. Integrated Circuit Layout Automation (4)
Coupings among timing, circuits and spatial embedding in nanometer-scale CMOS design. The role, and key problems, of physical layout in IC implementation. Example topics: RTL-to-GDSII methodologies, analyses and estimations, partitioning, floor planning, placement, routing, special net routing, cell generation, compaction. PREREQUISITE: CSE 241A or consent of instructor.

CSE 243A. Introduction to Synthesis Methodologies in VLSI CAD (4)
Hardware software co-design, architectural level synthesis, control synthesis and optimization, scheduling, binding, register and bus sharing, interconnect design, module selection, combinational logic optimization, state minimization, state encoding, and retiming. PREREQUISITE: CSE 241A or consent of instructor.

CSE 244A. VLSI Test (4)
Design for test, testing economics, defects, failures and fault models, faults, fault models, automatic test pattern generation, functional testing, memory, PLA, FPGA, microprocessor test, and fault diagnosis. PREREQUISITE: CSE 241A or consent of instructor.

CSE 244B. Testable and Fault Tolerant Hardware Design (4)
Scan path design, BIST architectures, test point insertion, self-checking circuits, test and fault tolerance in architectural synthesis, reconfigurable fault tolerant hardware, and SOC test design. PREREQUISITE: CSE 244A or consent of instructor.

CSE 245. Computer Aided Circuit Simulation and Verification (4)
This course is about the computer algorithms, techniques, and theory used in the simulation and verification of electrical circuits. PREREQUISITE: CSE 241A or consent of instructor.

CSE 246. Computer Arithmetic Algorithms and Hardware Design (4)
Number representation, fixed point adders, subtractors, and multipliers; modified Booth’s recoding, high-radix multiplication, (non)restoring dividers, SRT division, high-radix dividers, division by convergence, square-rooting, floating point arithmetic, rounding schemes, errors and error control, and floating point adders, subtractors, multipliers, dividers. PREREQUISITE: CSE 241A or consent of instructor.

CSE 247. Application Specific and Reconfigurable Computer Architecture (4)
This course covers architecture concepts used to tailor processors to a specific application or sets of applications. It covers Field-Programmable Gate Arrays (FPGAs), various forms of Application Specific Integrated Circuit (ASIC) designs, Application Specific Integrated Processors (ASIP), and augmenting customizable VHDL cores. PREREQUISITE: CSE 241A or consent of instructor.

CSE 248. Algorithmic and Optimization Foundations for VLSI CAD (4)
Algorithmic techniques and optimization frameworks for largescale, difficult optimizations. Primal-dual multicommodity flow approximations, approximations for geometric and graph Steiner formulations, continuous placement optimization, heuristics for Boolean satisfiability, multilevel methods, semidefinite programming and application to other formulations (e.g., scheduling). PREREQUISITE: CSE 241A or CSE 242A or consent of instructor.
CSE 249A. Topics/Seminar in Computer Architecture (1-4)
Topics of special interest in computer architecture to be presented by faculty and students under faculty direction. Topics vary from quarter to quarter. May be repeated for credit. PREREQUISITE: consent of instructor.

CSE 249B. Topics/Seminar in VLSI (1-4)
Topics of special interest in VLSI to be presented by faculty and students under faculty direction. Topics vary from quarter to quarter. May be repeated for credit. PREREQUISITE: consent of instructor.

CSE 249C. Topics/Seminar in CAD (1-4)
Topics of special interest in CAD to be presented by faculty and students under faculty direction. Topics vary from quarter to quarter. May be repeated for credit. PREREQUISITE: consent of instructor.

CSE 250A. Artificial Intelligence: Search and Reasoning (4)
Heuristic search algorithms including A*, constraint satisfaction algorithms including DPLL, randomized search, knowledge representation in first-order logic (FOL), resolution methods for reasoning in FOL; reasoning about action and planning; reasoning with Bayesian networks. CSE 101 recommended. PREREQUISITE: graduate standing in CSE or consent of instructor.

CSE 250B. Artificial Intelligence: Learning (4)
Classifier learning including linear separators, decision trees, and nearest neighbors. Generalization and overfitting; design of learning experiments; the PAC model. Possible topics include ensemble methods, boosting, kernel methods, online and reinforcement learning. PREREQUISITE: graduate standing or consent of instructor.

CSE 252A. Computer Vision I (4)
Comprehensive introduction to computer vision providing broad coverage including low-level vision (image formation, photometry, color, image feature detection), inferring 3-D properties from images (shape-from shading, stereo vision, motion interpretation) and object recognition. Companion to CSE 252B covering complementary topics. PREREQUISITE: Math. 10D and Math. 20A-F or equivalent.

CSE 252B. Computer Vision II (4)
Comprehensive introduction to computer vision providing focused coverage of multiview geometry, structure from motion, image segmentation, motion segmentation, texture analysis and recognition, object detection, and image-based rendering. Companion to CSE 252A covering complementary topics. PREREQUISITE: Math. 10D and Math. 20A-F or equivalent.

CSE 252C. Selected Topics in Vision and Learning (1-4)
Selected topics in computer vision and statistical pattern recognition, with an emphasis on recent developments. Possible topics include: grouping and segmentation, object recognition and tracking, multiple view geometry, kernel-based methods, dimensionality reduction, and mixture models. ET/CS: CSE 252 or equivalent and CSE 250B or equivalent.

CSE 253. Neural Networks for Pattern Recognition (4)
Probability density estimation, perceptrons, multilayer neural networks, radial basis function networks, support vector machines, error functions, data preprocessing. Possible topics include unsupervised learning methods, recurrent networks, statistical learning theory. CSE 250B recommended. PREREQUISITE: graduate standing.

CSE 254. Statistical Learning (4)
Learning algorithms based on statistics. Possible topics include minimum-variance unbiased estimators, maximum likelihood estimation, likelihood ratio tests, resampling methods, linear logistic regression, feature selection, regularization and dimension reduction, manifold detection. An upper-division undergraduate course on probability and statistics such as Math. 183 or 186, or any graduate course on statistics, pattern recognition, or machine learning is recommended. PREREQUISITE: graduate standing.

CSE 256/LING 256. Statistical Natural Language Processing (4)
Introduction to modern statistical approaches to natural language processing: part-of-speech tagging, word-sense disambiguation and parsing, using Markov models, hidden Markov models and probabilistic context-free grammars. Recommended PREREQUISITE: one of LIGN 165, LIGN 245, CSE 151, CSE 250A, CSE 254. PREREQUISITE: graduate standing or consent of instructor.

CSE 257. Computational Biology (4)
Computational methods are indispensable to an understanding of the vast datasets emerging from human and other organisms' genomes. This course surveys algorithms underlying genome analysis, sequence alignment, phylogenetic trees, protein folding, gene expression, metabolic pathways, and biologic knowledge base design. PREREQUISITE: Pharm. 201 or consent of instructor.

CSE 257B. Algorithms in Computational Biology (4)
Renumbered to CSE 206B (see above).

CSE 258A. Cognitive Modeling (4)
Connectionist models and a sampling of other cognitive modeling techniques. Models of language processing, memory, sequential processes, and vision. Areas covered may vary depending on student and faculty interests. Can be repeated for credit. CSE 151 or CSE 250B or CSE 253 or CSE 254, or equivalent experience recommended. PREREQUISITE: graduate standing.

CSE 259. Seminar in Artificial Intelligence (1)
A weekly meeting featuring local (and occasional external) speakers discussing their current research in Artificial Intelligence and Cognitive Algorithms. (S/U grades only.) PREREQUISITE: none.

CSE 259C. Topics/Seminar in Machine Learning (1-4)
Topics of special interest in machine learning to be presented by faculty and students under faculty direction. Topics vary from quarter to quarter. May be repeated for credit. PREREQUISITE: consent of instructor.

CSE 260. Parallel Computation (4)
(Formerly CSE 274A.) This course provides an overview of parallel hardware, algorithms, models, and software. Topics include Flynn's taxonomy, interconnection networks, memory organization, a survey of commercially available multiprocessors, parallel algorithm paradigms and complexity criteria, parallel programming environments and tools for parallel debugging, language specification, mapping, performance, etc. PREREQUISITE: graduate standing or consent of instructor.

CSE 262. System Support for Applications of Parallel Computation (4)
This course will explore design of software support for applications of parallel computation. Topics include: programming languages, run time support, portability, and load balancing. The course will terminate in a project. PREREQUISITE: consent of instructor.

CSE 271. User Interface Design: Social and Technical Issues (4)
Web technologies (HTML, Java, JavaScript, etc.) can quickly build superbly connected, but aesthetically ugly systems that still fully meet their function and functional requirements. This course explores interface usability and representation issues, with some focus on hypermedia and cooperative work. PREREQUISITE: CSE 20, CSE 100, or equivalent.

CSE 272. Advanced Image Synthesis (4)
Computer graphics techniques for creating realistic images. Topics include ray tracing, global illumination, subsurface scattering, and participating media. CSE 168 or equivalent recommended.

CSE 274. Selected Topics in Graphics (2-4)
Selected topics in computer graphics, with an emphasis on recent developments. Possible topics include computer animation, shape modeling and analysis, image synthesis, appearance modeling, and real-time rendering. CSE 168 or CSE 169 recommended. PREREQUISITE: graduate standing or consent of instructor.

CSE 280A. Algorithms in Computational Biology (4)
(Formerly CSE 206B.) The course focuses on algorithmic aspects of modern bioinformatics and covers the following topics: computational gene hunting, sequencing, DNA arrays, sequence comparison, pattern discovery in DNA, genome rearrangements, molecular evolution, computational proteomics, and others. PREREQUISITE: CSE 202 preferred or consent of instructor.

CSE 280B. Advanced Topics in Computational Biology (4)
The advanced topics include, but are not limited to: population genetics, pathways, RNA, database filtering, comparative genomics, and others. Students are expected to pick one of the topics for an intensive research project, and report on their findings at the end of the class. PREREQUISITES: CSE 280A preferred or consent of instructor.

CSE 282/BENG 202. Bioinformatics II: Sequence and Structure Analysis—Methods and Applications (4)
(Formerly CSE 257A/BENG 202.) Introduction to methods for sequence analysis. Applications to genome and proteome sequences. Protein structure, sequence-structure analysis. PREREQUISITE: Pharm. 201 or consent of instructor.

CSE 283/BENG 203. Bioinformatics III: Functional Genomics (4)
Annotating genomes, characterizing functional genes, profiling, reconstructing pathways. PREREQUISITE: Pharm. 201, BENG 202/CSE 282 or consent of instructor.

CSE 290. Seminar in Computer Science and Engineering (1-4)
(Formerly CSE 280A.) A seminar course in which topics of special interest in computer science and engineering will be presented by staff members and graduate students under faculty direction. Topics vary from quarter to quarter. May be repeated for credit. (S/U grades only) PREREQUISITE: consent of instructor. (Offered as faculty resources permit)

CSE 291. Topics in Computer Science and Engineering (1-8)
(Formerly CSE 281A.) Topics of interest in computer science and engineering. Topics may vary from quarter to quarter. May be repeated for credit with the consent of instructor. (S/U grades permitted.) PREREQUISITE: consent of instructor. (Offered as faculty resources permit)

CSE 292. Faculty Research Seminar (1)
(Formerly CSE 282.) Computer science and engineering faculty will present one hour seminars of the current research work in their areas of interest. PREREQUISITE: CSE graduate status.

CSE 293. Special Project in Computer Science and Engineering (1-12)
The student will conceive, design, and execute a project in computer science under the direction of a faculty member. The project will typically include a large programming or hardware design task, but other types of projects are possible. PREREQUISITE: CSE graduate student status. (CS 75, 76, 77, 78, 80, 81) (S/U grades only.)

CSE 294. Research Meeting in CSE (2)
Advisory faculty study and analysis of active research in computer science and computer engineering. Discussion of current research and literature in the research specialty of the staff member teaching the course. PREREQUISITE: consent of instructor.

CSE 298. Independent Study (1-16)
Open to properly qualified graduate students who wish to pursue a problem through advanced study under the direction of a member of the staff. (S/U grades only) PREREQUISITE: consent of instructor.

CSE 299. Research (1-16)
Research. PREREQUISITE: consent of faculty.

CSE 500. Teaching Assistantship (2-4)
A course in which teaching assistants are aided in learning proper teaching methods by means of supervision of their instructors; also faculty handling of discussions, preparation and grading of examinations and other written exercises, and student relations. May be used to meet teaching experience requirement for candidates for the Ph.D. degree. Number of units for credit depends on number of hours devoted to class or section assistance. PREREQUISITE: graduate standing and consent of instructor.

CSE 501. Teaching Assistantship (2-4)
Renumbered to CSE 500 (see above).

**PROFESSORS**

Anthony S. Acampora, Ph.D., Emeritus
Victor C. Anderson, Ph.D., Emeritus (not in-residence)
Peter M. Asbeck, Ph.D., Skyworks Endowed Chair
H. Neal Bertram, Ph.D., Emeritus
William S. C. Chang, Ph.D., Emeritus
Pamela C. Cosman, Ph.D.
René L. Cruz, Ph.D.
Sujit Dey, Ph.D.
Sadik C. Esener, Ph.D.
Shaya Fainman, Ph.D.
Joseph Ford, Ph.D.
Eric Fullerton, Ph.D., CMRR Endowed Chair
Ian Galton, Ph.D.
Carl W. Helstrom, Ph.D., Emeritus
Ramesh C. Jain, Ph.D., Emeritus
Andrew B. Kahng, Ph.D.
Kenneth Kreutz-Delgado, Ph.D.
Walter H. Ku, Ph.D., Emeritus
Lawrence E. Larson, Ph.D., Chair, CWC Industry Endowed Chair in Wireless Communications
S. S. Lau, Ph.D.
Sing H. Lee, Ph.D., Emeritus
Yu Hwa Lo, Ph.D.
Robert Lugannani, Ph.D.
Huey-Lin Luo, Ph.D., Emeritus
Elias Masry, Ph.D.
D. Asoka Mendis, Ph.D., Emeritus
Laurence B. Milstein, Ph.D., Ericsson Endowed Chair
Farrokh Najmabadi, Ph.D.
Truong Q. Nguyen, Ph.D.
Alon Orlitsky, Ph.D.
George Papen, Ph.D., Vice Chair
Kevin B. Quest, Ph.D.
Stojan Radic, Ph.D.
Bhaskar Rao, Ph.D.
Ramesh Rao, Ph.D., Qualcomm Endowed Chair
Gabriel Rebeiz, Ph.D.
Barnaby J. Rickett, Ph.D., Emeritus
Manuel Rotenberg, Ph.D., Emeritus

M. Lea Rud ee, Ph.D., Emeritus
Víctor H. Rumsey, Ph.D., Emeritus (not in-residence)
Vitali Shapiro, Ph.D., Emeritus
Paul H. Siegel, Ph.D., Director, Center for Magnetic Recording Research
Bang-Sup Song, Ph.D., Charles Lee Powell Endowed Chair in Wireless Communications
David Swonder, Ph.D.
Yuan Taur, Ph.D.
Mohan Trivedi, Ph.D.
Charles W. Tu, Ph.D., Associate Dean, Jacobs School of Engineering
Alexander Vardy, Ph.D.
Andrew J. Viterbi, Ph.D., Emeritus
Harry H. Wieder, Ph.D., Emeritus-in-Residence
Jack K. Wolf, Ph.D., Stephen O. Rice Professor of Electrical and Computer Engineering
Edward T. Yu, Ph.D.
Paul Yu, Ph.D.
Kenneth A. Zeger, Ph.D.

**ASSOCIATE PROFESSORS**

James F. Buckwalter, Ph.D.
Tara Javidhi, Ph.D.
Young-Han Kim, Ph.D.
Gert Lanckriet, Ph.D.
Zhaowei Liu, Ph.D.
Vitaliy Lomakin, Ph.D.
Curt Schurgers, Ph.D.
Deli Wang, Ph.D.
Jie Xiang, Ph.D.

**ADJUNCT PROFESSORS**

C. K. Cheng, Ph.D., Professor, Computer Science and Engineering
Pankaj K. Das, Ph.D., Rensselaer Polytechnic Institute
Madhu Gupta, Ph.D., SDSU
Rajesh Gupta, Ph.D., Professor, Computer Science and Engineering
Robert Hecht-Nielsen, Ph.D., Hecht-Nielsen Neurocomputing Corporation
John A. Hildebrand, Ph.D., Marine Physical Laboratory, Scripps Institution of Oceanography
William S. Hodgkins, Ph.D., Professor, Marine Physical Laboratory, Scripps Institution of Oceanography
James U. Lemke, Ph.D., Center for Magnetic Recording Research
Roberto Padovani, Ph.D., Qualcomm
John Proakis, Ph.D., Northeastern University
Luleu Sham, Ph.D., Professor, Physics
Jin-Joo Song, Ph.D.

**ASSOCIATED FACULTY**

Gustaf O. S. Arhenius, Ph.D., Professor, Marine Research Division, Scripps Institution of Oceanography

George Tynan, Ph.D., Associate Professor, Mechanical and Aerospace Engineering

**PROGRAM MISSION STATEMENT**

To educate tomorrow's technology leaders.

**PROGRAM EDUCATIONAL OBJECTIVES**

- To provide our students with training in the fundamental science and mathematics that underlie engineering, and with a general breadth and depth in engineering and in engineering design so that they are prepared for graduate school and for engineering careers. Students should have both proficiency in a specific technical area, and the flexibility and broad knowledge base needed for life-long engineering careers in a changing technical environment.
- To ensure that our students are educated in the classical sense. In particular, that they are broadly aware of social and environmental issues and of the impact of their profession on these issues.
- To assist our students in preparing themselves to work effectively in their profession. Specifically, to develop communications, teamwork, and leadership skills.

**PROGRAM OUTCOMES AND ASSESSMENT**

Program outcomes have been established based on the Program Educational Objectives. Graduates of the ECE Program in Electrical Engineering are expected to have:

1. An understanding of the underlying principles of, and an ability to apply knowledge of mathematics, science, and engineering to electrical engineering problems
2. An ability to design and conduct experiments, as well as to analyze and interpret data
3. A knowledge of electrical engineering safety issues
4. An ability to design a system, component, or process to meet desired needs
5. An ability to collaborate effectively with others
6. An ability to function on multidisciplinary teams
7. An ability to identify, formulate, and solve engineering problems
8. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice, including familiarity with computer programming and information technology
9. An understanding of professional and ethical responsibility
10. An ability to communicate effectively in writing
11. An ability to communicate effectively in speech
12. An ability to communicate effectively with visual means
10. The broad education necessary to understand the impact of engineering solutions in a global and societal context
11. A recognition of the need for, and the ability to engage in, lifelong learning
12. A knowledge of contemporary issues

THE UNDERGRADUATE PROGRAMS

The Department of Electrical and Computer Engineering offers undergraduate programs leading to the B.S. degree in electrical engineering, engineering physics, and computer engineering, and the B.A. degree in electrical engineering and society. Each of these programs can be tailored to provide preparation for graduate study or employment in a wide range of fields. The Electrical Engineering Program is accredited by the Accreditation Board for Engineering and Technology (ABET). The Electrical Engineering Program has a common lower-division and a very flexible structure in the upper-division. After the lower-division core, all students take six breadth courses during the junior year. They must then satisfy a depth requirement which can be met with five courses focused on some specialty, and a design requirement of at least one project course. The remainder of the program consists of seven electives, which may range as widely or as narrowly as needed.

The Engineering Physics Program is conducted in cooperation with the Department of Physics. Its structure is very similar to that of electrical engineering except the depth requirement includes seven courses and there are only five electives.

The Computer Engineering Program is conducted jointly with the Department of Computer Science and Engineering. It has a more prescribed structure. The program encompasses the study of hardware design, data storage, computer architecture, assembly languages, and the design of computers for engineering, information retrieval, and scientific research.

The B.A.-Electrical Engineering and Society Program intends to better prepare engineering students in the areas of social sciences and the humanities, as a response to the globalization of engineering and technology. We recognize that "engineering only" training may not be sufficient when students seek alternate career paths besides engineering upon graduation, such as in the law, finance, and public policy sectors.

For information about the program and about academic advising, students are referred to the section on ECE departmental regulations. In order to complete the programs in a timely fashion, students must plan their courses carefully, starting in their freshman year. Students should have sufficient background in high school mathematics so that they can take freshman calculus in the first quarter.

For graduation, each student must also satisfy general-education requirements determined by the student’s college. The six colleges at UC San Diego require widely different numbers of general-education courses. Students should choose their college carefully, considering the special nature of the college and the breadth of education required. They should realize that some colleges require considerably more courses than others. Students wishing to transfer to another college should see their college advisor.

Graduates of community colleges may enter ECE programs in the junior year. However, transfer students should be particularly mindful of the freshman and sophomore course requirements when planning their programs.

These programs have strong components in laboratory experiments and in the use of computers throughout the curricula. In addition, the department is committed to exposing students to the nature of engineering design. This is accomplished throughout the curricula by use of design-oriented homework problems; by exposure to engineering problems in lectures, by courses which emphasize student-initiated projects in both laboratory and computer courses, and finally by senior design-project courses in which teams of students work to solve an engineering design problem, often brought from industry.

IT IS IMPERATIVE THAT STUDENTS DISCUSS THEIR CURRICULUM WITH THE APPROPRIATE DEPARTMENTAL ADVISOR IMMEDIATELY UPON ENTRANCE TO UCSD, AND THEN AT LEAST ONCE A YEAR UNTIL GRADUATION.

B.S. ELECTRICAL ENGINEERING PROGRAM

Students must complete 180 units for graduation, including the general-education requirements (GER). Note that 144 units (excluding GER) are required.

Lower-Division Requirements (total of seventy-two units)

Mathematics (twenty-four units):
Math. 20A-B-C-D-E-F.

Physics (sixteen units):
Phys. 2A-B-C-D or Phys. 4A-B-C-D-E. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the mathematics placement test permits them to start with Math. 20B or higher may take Phys. 2A in the fall quarter of the freshman year.

Chemistry (four units):
Chem. 6A.

Programming Course (four units):
ECE 15.

Electrical engineering (twenty-four units):
ECE 25, 30, 35, 45, 65, and 75.

Additional Notes:
1. Students with AP math credit are strongly advised to take Math. 20B in the fall quarter, leaving room for a GER in the winter quarter.
2. The ECE undergraduate Web site shows several scheduling options. Please refer to the Web site and consult with the staff advisors in the undergraduate offices, rooms 2705 and 2707 in EBU1.

Upper-Division Requirements (total of seventy-two units)

a. Electrical Engineering BREADTH Courses (twenty-four units)

Courses required of all electrical engineering majors:
The six courses, ECE 101, 102, 103, 107, 108, and 109 are required of all electrical engineering majors and they are an assumed prerequisite for senior-level courses, even if they are not explicitly required. Although the courses are largely independent, there are some prerequisites. ECE 102 is a prerequisite for ECE 108. Students who delay some of the breadth courses into the spring should be careful that it does not delay their depth sequence. For the ECE 109 requirement, credit will not be allowed for ECON 120A, Math. 180A-B, Math. 183, or Math. 186.

b. Electrical Engineering DESIGN Course (4 units)

NOTE: In order to fulfill the design requirement, students must complete one of the following courses with a grade C- or better. Graduation will not be approved until a written copy of the design project is submitted to the ECE undergraduate office. ECE 111, 118, 191 cannot be used to satisfy both the Design and Depth requirements.

The electrical engineering design requirement can be fulfilled in any of the following three ways:
1. Take ECE 191: Engineering Group Design Project
2. Take ECE 190: Engineering Design This course requires the department stamp. Specifications and enrollment forms are available in the undergraduate office.
3. Take one of the following courses:
   • ECE 111: Advanced Digital Design Project
   • ECE 118: Computer Interfacing
   • ECE 155B or 155C: Digital Recording Projects

   Students who wish to take one of these courses to satisfy the design requirement must fill out an enrollment form and have departmental approval for the design credit prior to taking the course. The project must meet the same specifications as ECE 190.

c. Electrical Engineering ELECTIVES (twenty-four units)

   • Three upper-division engineering, mathematics, or physics courses.
   • Three additional electives which students may use to broaden their professional goals.

   (For additional information, please refer to the section on “Elective Policy for Electrical Engineering and Engineering Physics Majors.”)

d. Electrical Engineering Depth Requirement (twenty units)

Students must complete a “depth requirement” of at least five quarter courses to provide a focus for their studies. This set must include a clear chain of study of at least three courses which depend on
the “breadth” courses. Students may choose one of the approved depth sequences listed below, or propose another with the approval of their faculty advisor. Some of the approved sequences have lower-division prerequisites and thus list six courses. Students choosing one of these sequences will have to complete only two “professional” electives. Guidelines for meeting the depth requirement can be obtained from the undergraduate office. ECE 111, 118, 191 cannot be used to satisfy both the Design and Depth requirements.

Electronics Circuits and Systems:
ECE 163, 164, 165, and any two of ECE 111, 118, 161A, 161B, 161C, and 166.

Electronic Devices and Materials:
ECE 135A, ECE 135B, 136L, 139, and 183.

Controls and Systems Theory:
ECE 171A, 171B, 173, 174, and 118 or 191.

Machine Intelligence:
ECE 173, 174, 172A and any two of ECE 161A, ECE 175, ECE 176A, 187, 253A, 285, and COGS 108F.

Photonics:
ECE 181, 182, 183, 184, and 185.

Communications Systems:
ECE 161A, 153, 154A-B-C.

Networks:
ECE 153, 159A, 159B, 158A-B.

Queuing Systems:
ECE 171A, 174, 159A-B, and Math. 181A.

Signal and Image Processing:
ECE 161A, 161B, 161C, 153, and ECE 172A or 174.

Computer Design:
CSE 12, 21, and 141, ECE 158A, 111 or 118, and 165.

Software Systems:
CSE 12, 21, 100, 101, 141, and 120.

B.S. ENGINEERING PHYSICS

Students must complete a total of 180 units for graduation, including the general-education requirements. Note that 146 units (excluding GER) are required.

All students will initially be placed in pre-major status. Upon successful completion of the following courses (with a minimum 2.0 GPA by the end of the first three quarters if a transfer student, six quarters if an incoming freshman), students will be admitted into full Engineering-Physics major status.

1. Math. 20A-B-C
2. Phys. 2A-B
3. ECE 15, 25, and 35

To initiate the change from pre-major status to full major status, transfer students must see the ECE undergraduate advisor by the end of their third quarter at UCSD; incoming freshmen by the end of their sixth quarter.

Please refer to the section “Undergraduate Regulations and Requirements” for important details.

Lower-Division Requirements
(tot al of seventy-four units)

Mathematics (twenty-four units):
Math. 20A-B-C-D-E-F.

Physics (sixteen units):
Phys. 2A-B-C-D or Phys. 4A-B-C-D-E. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the mathematics placement test permits them to start with Math. 20B or higher may take Phys. 2A in the fall quarter of the freshman year.

Physics Lab (two units):
Phys. 2DL is required.

Chemistry (four units):
Chem. 6A.

Programming Course (four units):
ECE 15.

Electrical engineering (twenty-four units):
ECE 25, 30, 35, 45, 65, and 75.

Additional Notes:
1. Students with AP math credit are strongly advised to take Math. 20B in the fall quarter, leaving room for a GER in the winter quarter.
2. The ECE undergraduate Web site shows several scheduling options. Please refer to the Web site and consult with the staff advisors in the undergraduate offices, rooms 2705 and 2707 in EBU1.

Upper-Division Requirements
(seventy-two units)

a. Engineering Physics BREADTH Courses
(twenty-four units)
The electrical engineering breadth courses ECE 101, 102, 103, 107, 108, and 109, are also required of engineering physics majors. However, because of the scheduling of Math. 110, Phys. 110A and 130A, they can only be taken in a specific order (please consult the ECE Web site). For the ECE 109 requirement, credit will not be allowed for ECON 120A, Math. 180A-B, Math. 183, or Math. 186.

b. Engineering Physics DESIGN Course
(four units)
Note: In order to fulfill the design requirement, students must complete one of the following courses with a grade C– or better. Graduation will not be approved until a written copy of the design project is submitted to the ECE undergraduate office.

The engineering physics design requirement can be fulfilled in any of the following three ways:
1. Take ECE 191: Engineering Group Design Project
2. Take ECE 190: Engineering Design. This course requires the department stamp. Specifications and enrollment forms are available in the undergraduate office.
3. Take one of the following courses:
   • ECE 111: Advanced Digital Design Project
   • ECE 118: Computer Interfacing
   • ECE 155B or 155C: Digital Recording Projects

Students who wish to take one of these courses to satisfy the design require ment must fill out an enrollment form and have departmental approval for the design credit prior to taking the course. The project must meet the same specifications as ECE 190.

c. Engineering Physics ELECTIVES (sixteen units)
   • One upper-division engineering, mathematics, or physics course.
   • Three additional electives which students may use to broaden their professional goals.

   (For additional information, please refer to the section on Elective Policy for Electrical Engineering and Engineering Physics Majors.)

d. Engineering Physics DEPTH Courses
(twenty-eight Units)
All B.S. engineering physics students are required to take Phys. 110A, 130A-B, 140A, Math. 110, ECE 123 and 166; or ECE 135A and 135B; or ECE 182 and (181 or 183).

Elective Policy for Electrical Engineering and Engineering Physics Majors

1. Technical Electives:
Technical electives must be upper-division engineering, math or physics courses (except for the bioengineering track). At most one lower-division course in engineering may be used but it must receive prior approval from the ECE department. Certain courses listed below are not allowed as electives because of overlap with ECE courses.

Physics:
Students may not receive upper-division elective credit for any lower-division physics courses.

Mathematics:
Math. 180A overlaps ECE 109 and 153, and therefore will not qualify for elective credit of either type. Math. 183 or Math. 186 will not be allowed as an elective. Math. 163 will only be allowed as a professional elective. All lower-division mathematics is excluded from elective credit of either type.
Bioengineering:
The following series of courses will provide “core” preparation in bioengineering and will satisfy up to five courses of the ECE elective requirements:

- BILD 1, BILD 2, BE 100, BE 140A-B.

The bioengineering department will guarantee admission to these courses for ECE students on a space available basis.

CSE:
The following courses are excluded as electives: CSE 1, 2, 5A-B, 8A-B, 11, 123A (duplicates ECE 158A), 140 (duplicates ECE 25), 140L (duplicates ECE 36), 143 (duplicates ECE 165). CSE 12, 20, and 21 will count toward the three professional electives ONLY.

Mechanical and Aerospace Engineering (MAE):
Credit will not be allowed for MAE 105, 139, 140, 143B, or 170.

Special Studies:
Courses 195–199: At most four units of 195–199 may be used for elective credit.

2. Professional Electives:
Normally these will be upper-division courses in engineering, mathematics, or physics. Students may also choose upper-division courses from other departments provided that they fit into a coherent professional program. In such cases, a lower-division prerequisite may be included in the electives. Courses other than upper-division engineering, mathematics, or physics must be justified in terms of such a program, and must be approved by a faculty advisor.

Biological and Chemistry:
Of the three electives intended to allow for the professional diversity, one lower-division biology or chemistry course from BILD 1, 2, Chem. 68-C may be counted for credit in combination with two upper-division biology or chemistry courses. Furthermore, this will count only if the student can demonstrate to a faculty advisor that they constitute part of a coherent plan for professional/career development.

Upper-division biology and chemistry courses will count toward the three professional electives but not the three math/physics/engineering electives.

Economics:
Suitable electives would include:
- Econ. 1 and 3 followed by the courses in one of the following tracks:
  - Macroeconomics: Econ. 110A-B.
  - Monetary economics: Econ. 111, and another economics upper division elective.
- Economics 1 and 2 followed by two courses in one of the following tracks:
  - Public and Environmental: Econ. 118, 130, 131, 132, 133, 137, 145.
  - Labor and Human Resources: Econ. 137, 139, 140.

NOTE: Econ. 100A can be substituted for Econ. 2 Econ. 1 and 100A followed by two courses in one of the following tracks:
- Microeconomics: Econ.100B-C.
- Financial Markets: Econ. 120B and 173A.
- Human Resources: Econ. 100B and 136.

NOTE: Econ. 120A, and 158A-B will not be allowed as professional electives. If Economics is chosen for professional electives, only three technical electives are required for electrical engineering majors; only one technical elective is required for engineering physics majors.

B.S. COMPUTER ENGINEERING:
Students wishing to pursue the computer engineering curriculum may do so in either the ECE or CSE department. The set of required courses and allowed electives is the same in both departments; please note that the curriculum requires twenty upper-division courses. The Computer Engineering Program requires a total of 151 units (not including the general-education requirements).

The Computer Engineering Program offers a strong emphasis on engineering mathematics and other basic engineering science as well as a firm grounding in computer science. Students should have sufficient background in high school mathematics so that they can take freshman calculus in their first quarter. Courses in high school physics and computer programming, although helpful, are not required for admission to the program.

Lower-Division Requirements
(totai of seventy-five units)

Mathematics (twenty units):
Math. 20A-B-C-D-F.

Physics (sixteen units):
Phys. 2A-B-C-D, or Phys. 4A-B-C-D. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the mathematics placement test permits them to start with Math. 20B or higher may take Phys. 2A in the fall quarter of the freshman year.

Computer Science (twenty-seven units):
CSE 11 or 88*, 12, 15L, CSE 20 or Math. 15A, CSE 21 or Math. 15B, CSE 30, CSE 70, and CSE 91.
- CSE 8A and CSE 8B are not required if a student completes CSE 11. CSE 11 is a faster paced version of CSE 8A and CSE 8B. Students will self-select which course they wish to take. Students without programming experience in a compiled language are advised to take CSE 8A and then CSE 8B instead of CSE 11.

Electrical Engineering (twelve units):
ECE 35, ECE 45, ECE 65.

Upper-Division Requirements
(totai of seventy-six units)
a. All B.S. computer engineering students are required to take CSE 100 or Math. 176, CSE 101 or Math. 188, CSE 105 or Math. 166, CSE 120; 131, 139, 140, 140L (CSE 140 and 140L must be taken concurrently), 141, 141L (CSE 141 and 141L must be taken concurrently).
b. In addition, all B.S. computer engineering students must fulfill the following upper-division ECE requirements:
- Electronic Circuits and Systems ECE 102 and 108.
- Linear systems ECE 101.
c. Technical electives: All B.S. computer engineering majors are required to take six technical electives.
- One technical elective must be either ECE 111 or ECE 118.
- Of the remaining five technical electives, four must be ECE or CSE upper-division or graduate courses.
- The remaining course can be any upper-division course listed under the non-CSE/ECE electives. (See the section on electives below.)

Electives:
The discipline of computer engineering interacts with a number of other disciplines in a mutually beneficial way. These disciplines include mathematics, computer science, and cognitive science. The following is a list of upper-division courses from these and other disciplines that can be counted as technical electives.

At most four units of 197, 198, or 199 may be used towards technical elective requirements. ECE/ CSE 195 cannot be used towards course requirements. Undergraduate students must get instructor’s permission and departmental stamp to enroll in a graduate course.

Students may not get duplicate credit for equivalent courses. The UC San Diego General Catalog should be consulted for equivalency information and any restrictions placed on the courses. Additional restrictions are noted below. Any deviation from this list must be petitioned.

Mathematics:
All upper-division courses except Math. 168A-B, 179A-B, 183, 184A-B, 189A-B, and 195–199. If a student has completed CSE 167, then he or she cannot get elective credit for Math. 155A. Students may receive elective credit for only one of the following courses: CSE 164A, Math. 174, Math. 173, Math. 175, Phys. 105A-B, MAE 107, CENG 100. No credit for any of these courses will be given if Math. 170A-B-C is taken. Students will receive credit for either Math. 166 or CSE 105 (but not both), either Math. 188 or CSE 101 (but not both), and either Math. 176 or CSE 100 (but not both).

Computer Science and Engineering:
All CSE upper-division courses except CSE 195. Students will receive credit for either CSE 123A or ECE 158A (but not both).
Cognitive Science:
Students may not get credit for both CSE 150 and Advanced Programming Methods for Cognitive Science 108F or for both CSE 151 and Artificial Intelligence Modeling II 182.
Mechanical and Aerospace Engineering (MAE):
All upper-division MAE courses except MAE 140, and MAE 195-199.
Students may receive elective credit for only one of the following courses: CSE 164A, Math. 174, Math. 173, Phys. 105A-B, CENG 100, MAE 107. Students may only get credit for one of the two courses, CSE 167 or MAE 152.
Economics:
Students cannot take Economics 120A since it duplicates ECE 109.
Linguistics:
Phonetics 110, Phonology I 111, Phonology II 115, Morphology 120, Syntax I 121, Syntax II 125, Semantics 130, Mathematical Analysis of Languages 160, Computers and Language 163, Computational Linguistics 165, Psycholinguistics 170, Language and the Brain 172, and Sociolinguistics 175.
Engineering:
Team Engineering 101 (see course description under the Jacobs School of Engineering section).
Music:
Computer Music II 172, Audio Production: Mixing and Editing 173.
Psychology:
Engineering Psychology 161.
B.A. ELECTRICAL ENGINEERING AND SOCIETY
Students must complete a total of 180 units for graduation, including the general-education requirements (GER). Note that 144 units (excluding GER) are required.
Lower-Division Requirements (total of eighty units)
Mathematics (twenty-four units):
Math. 20A-B-C-D-E-F.
Physics (sixteen units):
Phys. 2A-B-C-D or Phys. 4A-B-C-D-E. Math. 20A is a prerequisite for Phys. 2A. Students whose performance on the mathematics placement test permits them to start with Math. 20B or higher may take Phys. 2A in the fall quarter of the freshman year.
Chemistry (four units):
Chem. 6A.
Programming Course (four units):
ECE 15.
Electrical Engineering (twenty units):
ECE 25, 30, 35, 45, 65, and 75.
Elective Courses in Social Sciences and Humanities Studies (eight units):
These can be prerequisite courses for the upper-division depth sequence in social sciences/humanities. For instance, for history studies, this can be two history lower-division courses (HILD 2, 7, 10–12). Historically oriented HUM, MWM, and CAT courses would count as well. At least one lower-division course should have a writing component. For economics studies, this can be two lower-division courses (ECON 1, and ECON 4 for the finance track); or one lower-division course (ECON 1) plus one upper-division course for the data analysis track.
For political science, the following courses may be utilized: PS10, PS11, PS12, PS13, PS30. For sociology studies, students will choose two lower-division courses from SOCL 1A, 1B, and 30, of which L30 is highly recommended.
Other courses in social sciences/humanities will be available after an agreement between ECE and the respective departments/programs are established and approved.
Additional Notes:
1. Students with AP math credit are strongly advised to take Math. 20B in the fall quarter, leaving room for a GER in the winter quarter.
2. The ECE undergraduate Web site shows several scheduling options. Please refer to the Web site and consult with the staff advisors in the undergraduate offices, rooms 2705 and 2707 in EBU1.
Upper-Division Requirements (total of sixty-four units)

a. Electrical Engineering BREADTH Courses (twenty-four units)
Courses required of all electrical engineering majors:

b. Electrical Engineering DESIGN Course (four units)

NOTE: In order to fulfill the design requirement, students must complete one of the following courses with a grade C– or better. When taking this course, the student has the option of having a portion of the project related to his/her social sciences/humanities study. Graduation will not be approved until a written copy of the design project is submitted to the ECE undergraduate office.
The electrical engineering design requirement can be fulfilled in any of the following three ways:
2. Take ECE 190. Engineering Design. This course requires the department stamp. Specifications and enrollment forms are available in the undergraduate office.
3. Take one of the following courses:
   • ECE 111. Advanced Digital Design Project
   • ECE 118. Computer Interfacing
   • ECE 155B or 155C. Digital Recording Projects
Students who wish to take one of these courses to satisfy the design requirement must fill out an enrollment form and have departmental approval for the design credit prior to taking the course. The project must meet the same specifications as ECE 190.
c. Electrical Engineering ELECTIVES (twelve units)
Three upper-division engineering, mathematics, or physics courses.
d. Social Sciences/Humanities Studies Depth Requirement (twenty-four units)
Students must complete a “depth requirement” of at least six quarter courses to provide a focus for their studies. Sample depth programs for history and economics students are discussed below. Students may choose this demonstrated sequence or they may propose another with the approval of their faculty co-advisor from the respective social sciences/humanities department.

History Studies (six courses, twenty-four units):
   • At least four of these should belong to the specific field the student is pursuing (e.g., History of: East Asia, United States, Europe, Science, etc.).
   • At least one course should be in the field of history of science and technology.
   • At least one course should be a colloquium (i.e., a small course, with an emphasis on essay writing).
HISC 105. History of Environmentalism
HISC 106. The Scientific Revolution
HISC 107. The Emergence of Modern Science
HISC 108. Science and Technology in the Twentieth Century
HISC 109. Science in Western Civilization
HISC 110. The Atomic Bomb and the Atomic Age
HISC 115. Making Modern Medicine
HISC 131. Science Technology and Law
HISC 173/273. Darwin and Darwinism
HILD 2A. United States History
HILD 7A. Race and Ethnicity
HILD 10. East Asia: The Great Tradition
HILD 11. East Asia and the West
HILD 12. Twentieth-Century East Asia
HIUS 140. Economic History of the United States
HIUS 151. American Legal History 1865 to the Present
HIUS 187. Social Movements in the United States
HIUS 148. American Cities in the Twentieth Century
HIEU 143. European Intellectual History
HIGR 222. European History
HILA 102. Latin America in the Twentieth Century

Economics Studies
Track A: Finance (six courses, twenty-four units):
- Intermediate Microeconomic sequence: ECON 100A-B-C
- Finance sequence: ECON 173A-B
- One elective course from the following: ECON 104, 105, 109, 113, 119, 120B, 141, 142, 143, 147, 150, 151, 155, 171, 172A

Track B: Data Analysis (seven courses, twenty-eight units, one of them can be taken during lower-division years):
- Intermediate Microeconomic sequence: ECON 100A-B-C
- Data Analysis sequence: ECON 120B-C
- Two elective courses from the following: ECON 104, 105, 109, 119, 121, 125, 150, 151, 152, 155, 173A, 173B, 174, 176, 178
- Other upper-division courses for satisfying the depth sequences for other studies in social sciences/humanities will be available after an agreement is established between ECE and the respective department/program in social sciences/humanities.

Political Science Studies (six courses, twenty-four units):

Policy Analysis
At least four courses from:
PS 160AA. Introduction to Policy Analysis
PS 160AB. Introduction to Policy Analysis
PS 162. Environmental Policy
PS 163. Analyzing Politics
PS 165. Special Topic: Policy Analysis
PS 168. Policy Assessment
PS 170A. Introductory Statistics for Political Science and Public Policy
and at least two courses from:
PS 100H. Race and Ethnicity
PS 102J. Advanced Topics in Urban Politics
PS 103A. California Government and Politics
PS 103B. Politics and Policymaking in Los Angeles

HIC 103C. Politics and Policymaking/San Diego
PS 125. Politics of Conservation
PS 125A. Communities and the Environment
PS 126AA. Modern Capitalism
PS 142A. United States Foreign Policy
PS 142B. U.S. Foreign Economic Policy
PS 142J. National Security Strategy
PS 142M. U.S. Foreign Policy/Regional Security

Sociology Studies (six courses, twenty-four units):
Students may specialize in one of four departmental concentrations or complete the “general sociology” track.
Students will choose eight courses, two lower-division and six upper-division courses from their choice of concentrations in: Science and Medicine, Law and Society, Economy and Society, International Studies, or General Sociology. *SOC 30 and SOCC 168T are highly recommended for all tracks.

Concentration in Science and Medicine (eight courses, thirty-two units):
Students will choose two lower division courses from SOCL 1A, 1B, and 30, of which L30 is highly recommended; and six upper division courses from the list below, in which SOCC 168T is highly recommended.

Lower-Division
L 1A. The Study of Society
L 1B. The Study of Society
L 30. Science, Technology, and Society (highly recommended)

Upper-Division
C 168T. Sociology of Technology (highly recommended)
B 113. Sociology of the AIDS Epidemic
C 134A. The Making of Modern Medicine
C 135. Medical Sociology
C 136A. Sociology of Mental Illness: An Historical Approach
C 136B. Sociology of Mental Illness in Contemporary Society
C 138. Genetics and Society
C 149. Sociology of the Environment
C 167. Science and War
C 168E. Sociology of Science

Concentration in Law and Society (eight courses, thirty-two units):
Students will choose two lower-division courses from SOCL 1A, 1B, and 30, of which L30 is highly recommended; and six upper-division courses from the list below, in which SOCC 168T is highly recommended.

Lower-Division
L 1A. The Study of Society
L 1B. The Study of Society
L 30. Science, Technology, and Society (highly recommended)

Upper-Division
C 168T. Sociology of Technology (highly recommended)
B 111A. Human Rights: Principles and Problems
B 111B. Human Rights: Practices and Cases
B 130. Population and Society
B 145. Violence and Society
B 151. Comparative Race and Ethnic Relations
**General Sociology (eight courses, thirty-two units)**

Students will choose two lower-division courses from SOCL 1A, 1B, and 30, of which 30 is highly recommended; and six upper-division courses, including one from EACH of the following four concentrations: Science and Medicine, Law and Society, Economy and Society, International Studies.

*SOCL 30 and SOCC 168T are highly recommended as two of the total courses.

**Sample of a four-year program for the B.A. in Engineering Majors**

**MINOR CURRICULA**

ECE offers three minors in accord with the general university policy that a minor requires five upper-division courses. Students must realize that these upper-division courses have extensive lower-division prerequisites (please consult the ECE undergraduate office). Students should also consult their college provost's office concerning the rules governing minors and programs of concentration.

**Electrical Engineering:** Twenty units chosen from the breadth courses ECE 101, 102, 103, 107, 108, 109.

**Engineering Physics:** Twenty units chosen from the junior year courses Phys. 110A, 130A, Math. 110, ECE 101, 102, 103, 107, 108, 109.

**Computer Engineering:** Twenty units chosen from the junior year courses ECE 102, 108, CSE 100, 101, 105, 120, 140L, 141L, 141L.

The department will consider other mixtures of upper-division ECE, CSE, physics, and mathematics courses by petition.

**UNDERGRADUATE ADMISSIONS, POLICIES, AND PROCEDURES**

**FRESHMAN ELIGIBILITY:**

1. **Computer Engineering:**
   Freshmen students who have declared Computer Engineering on their application will be directly admitted into the major.

2. **Electrical Engineering:**
   Freshmen students who have declared Electrical Engineering on their application will be directly admitted into the major.

**3. Engineering Physics:**

All students will initially be placed in pre-major status. Upon successful completion of the following courses (with a minimum 2.0 GPA by the end of the first three quarters if a transfer student, six quarters if an incoming freshman), students will be admitted into full Engineering-Physics major status.

1. Math. 20A-B-C
2. Phys. 2A-B
3. ECE 15, 25, and 35

To initiate the change from pre-major status to full major status, transfer students must see the ECE undergraduate advisor by the end of their third quarter at UCSD; incoming freshmen by the end of their sixth quarter.

Please refer to the section "Undergraduate Regulations and Requirements" for important details.

**TRANSFER STUDENTS ELIGIBILITY**

It is strongly recommended that transfer students complete the following course preparation for engineering majors:

- Calculus I—for Science and Engineering (Math. 20A)
- Calculus II—for Science and Engineering (Math. 20B)
- Calculus and Analytic Geometry (Math. 20C)
- Differential Equations (Math. 20D)
- Linear Algebra (Math. 20F)
- Complete calculus-based physics series with lab experience (Phys. 2A-B-C)
- Chemistry 6A (except computer science and computer engineering majors)
- Highest level of introductory computer programming language course offerings at the community college*

Refer to the UC San Diego General Catalog to select major prerequisite requirement for computer language courses.

1. **Computer Engineering:**
   Applicants seeking admission as transfer students will be directly admitted into the Computer Engineering major.

2. **Electrical Engineering:**
   Applicants seeking admission as transfer students will be directly admitted into the electrical engineering major.

3. **Engineering Physics:**
   Students are accepted into the pre-major and must complete the following courses in order to be accepted into the engineering physics major: Math. 20A-B-C, Phys. 2A-B, ECE 15, 25, and 35. Students who wish to enter in the engineering physics major must contact the department before the beginning of the fall quarter, submitting course descriptions and transcripts for courses used to satisfy their lower-division requirements. Normally, admission will be for the fall quarter; students entering in the
winter or spring quarter should be aware that scheduling difficulties may occur because upper-division sequences normally begin in the fall quarter.

GRADE REQUIREMENT IN THE MAJOR

Courses required for the major must be taken for a letter grade. All major courses must be completed with a grade of C– or better.

A GPA of 2.0 is required in all upper-division courses in the major, including technical electives. The grade of D will not be considered an adequate prerequisite for any ECE course and will not be allowed for graduation. The engineering design requirement must be completed with a grade of C– or better.

ADVISING

Students are required to complete an academic planning form and to discuss their curriculum with the appropriate departmental advisor immediately upon entrance to UCSD, and then every year until graduation. This is intended to help students in: a) their choice of depth sequence, b) their choice of electives, c) keeping up with changes in departmental requirements. A faculty advisor will be assigned by the ECE department undergraduate office.

NEW TRANSFER STUDENTS IN ELECTRICAL ENGINEERING AND ENGINEERING PHYSICS

The entire curriculum is predicated on the idea of actively involving students in engineering from the time they enter as freshmen. The freshman courses have been carefully crafted to provide an overview of the engineering mindset with its interrelationships among physics, mathematics, problem solving, and computation. All later courses are specifically designed to build on this foundation. All transfer students should understand that the lower-division curriculum is demanding. Transfer students will be required to take all lower-division requirements or their equivalent. Transfer students are advised to consult the ECE Web site for sample recommended course schedules and for the ECE course requirement guide.

NEW TRANSFER STUDENTS IN COMPUTER ENGINEERING

Transfer students are advised to consult the ECE Web site for sample recommended course schedules and for the ECE course requirement guide.

Students who do not have any programming experience are encouraged to take the CSE 8A-B sequence instead of CSE 11. Experience has shown that most students who are not familiar with programming and take CSE 11 have to retake the class because the accelerated pace makes it difficult to learn the new material.

NOTE: Transfer students are encouraged to consult with the ECE undergraduate office for academic planning upon entrance to UCSD.

ECE HONORS PROGRAM

The ECE Undergraduate Honors Program is intended to give eligible students the opportunity to work closely with faculty in a project, and to honor the top graduating undergraduate students.

ELIGIBILITY FOR ADMISSION TO THE HONORS PROGRAM:

1. Students with a minimum GPA of 3.5 in the major and 3.25 overall will be eligible to apply. Students may apply at the end of the winter quarter of their junior year and no later than the end of the second week of fall quarter of their senior year. No late applications will be accepted.
2. Students must submit a project proposal (sponsored by an ECE faculty member) to the honors program committee at the time of application.
3. The major GPA will include ALL lower-division required for the major and all upper-division required for the major that are completed at the time of application (a minimum of twenty-four units of upper-division course work).

REQUIREMENTS FOR AWARD OF HONORS:

1. Completion of all ECE requirements with a minimum GPA of 3.5 in the major based on grades through winter quarter of the senior year.
2. Formal participation (i.e., registration and attendance) in the ECE 290 graduate seminar program in the winter quarter of their senior year.
3. Completion of an eight-unit approved honors project (ECE 193H: Honors Project) and submission of a written report by the first day of spring quarter of the senior year. This project must contain enough design to satisfy the ECE B.S. four-unit design requirement.
4. The ECE honors committee will review each project final report and certify the projects which have been successfully completed at the honors level.

PROCEDURE FOR APPLICATION TO THE HONORS PROGRAM:

Between the end of the winter quarter of their junior year and the second week of the fall quarter of their senior year, interested students must advise the department of their intention to participate by submitting a proposal for the honors project sponsored by an ECE faculty member. Admission to the honors program will be formally approved by the ECE honors committee based on GPA and the proposal.

UNIT CONSIDERATIONS

Except for the two-unit graduate seminar, this honors program does not increase a participant’s total unit requirements. The honors project will satisfy the departmental design requirement and students may use four units of their honors project course as a technical elective.

FIVE-YEAR B.S./MASTER’S PROGRAM

Undergraduates in the ECE department who have maintained a good academic record in both departmental and overall course work are encouraged to participate in the five-year B.S./master’s program offered by the department. Participation in the program will permit students to complete the requirements for the M.S. or M.Eng. degree within one year following receipt of the B.S. degree. Complete details regarding admission to and participation in the program are available from the ECE Undergraduate Affairs office.

ADMISSION TO THE PROGRAM

Students should submit an application for the B.S./master’s program, including three letters of recommendation, by the program deadline during the spring quarter of their junior year. Applications are available from the ECE Undergraduate Affairs office. No GRE’s are required for application to the B.S./master’s program. A GPA of at least 3.0 both overall and in the major and strong letters of recommendation are required to be considered for program admission. Students should indicate at that time whether they wish to be considered for the M.S. degree program.

In the winter quarter of the senior year, applications of students admitted to the program will be forwarded by the department to the UCSD Office of Graduate Studies. Each student must submit the regular graduate application fee prior to the application deadline for their application to be processed. Students who have been accepted into the B.S./master’s program will automatically be admitted for graduate study beginning the following fall provided they maintain an overall GPA through the winter quarter of the senior year of at least 3.0. Upper-division (up to twelve units) or graduate courses taken during the senior year that are not used to satisfy undergraduate course requirements may be counted towards the forty-eight units required for the M.S. degree.

CONTINUATION IN THE PROGRAM
